Fighting Pat had his latest run-in with two senators: Cutting of New Mexico and King of Utah. Cutting is an independent republican, one of the ablest and cleanest men in public life. He is a New Englander who selected New Mexico as his home and he has made history. He has ever been against the political crooks of New Mexico and the country. King is one of the able lawyers of Utah. He is a man of high ideals and distinguished ability. These senators asked questions of the lighting man from Oklahoma. Soungsters appear to be determined to take charge of the Chicago convention.

However, this is not the paramount issue away down in Texas. There is a Dawes credit reconstruction act with a \$2,000,000,000 fund behind it. It would be well to repair the pledge of the president when he signed the act. His pledge was positive, that this huge sum was to be used for the smashing of frozen credits, the release of congested credits and bank deposits in closed institutions, and for the making of jobs for the jobless in city and country. A return of prosperity is much more important to all ahe American people than the plans and programs of ambitious statesmen who are for the most part practical policicans.

Most criminals, he said, go wrong because of unfavorable home conditions and not because they are mentally deficient. Heredity has little to do with filling prisons. Environment is all-important.

It would be more pleasant, possibly, to stick to the older idea and blame it all on heredity. That would relieve us of all responsibility. But we can't do it, and Dr. Baker's remarks ought to make us stop and do a bit of thinking. That expression, "unfavorable home conditions," can a direct responsibility in it.

It covers, for example, homes in city slums, where health conditions are bad, food is poor and the street is a child's only playground.

It covers homes in certain mining towns, where the workers are ground down by poverty, live in conditions of the ard-pan. That plant food is significantly spending squalor and count themselves lucky if they can just get enough to eat from day to day.

It covers homes in rotten tenements which, if we hard any social conscience at all, would be torn down no matter where a child can grow up without any advantages what speever; homes in dull factory towns where a mill-owner is absolute ezar over all his workers—homes everywhere, in absolute example of the social conscience as a line of the conditions of th

That is where our crime stems from. As long as society is willing to let a large number of human beings live in such homes it will have a nasty "crime problem." We all share in the responsibility.
