

MAD DOGS AGAIN RUN WILD THROUGH RANGER

that reminds me...

Back in March 20, 1912, Theodore Roosevelt said in an address, "I have scant patience with this talk of the tyranny of the majority."

fooling with the Constitution of the United States of America is dangerous business for the welfare of the people.

Many reactions have come as a result of the Supreme Court's decision regarding NRA. The president has indicated that he is sorely disappointed and is making efforts to reinstate it in some kind of manner.

The first fruits of the depression can be placed on the branches of business. The fruit became stagnant and rotted on the ground.

History says that China at one time was the most advanced and most constructive nation in the world.

New Evidence In Trial of Sheriff Is Brought Out

LUBBOCK, June 5.—Additional evidence that Sheriff Lynn Irving received bribes to protect liquor dealers in Lamb county, was introduced in court today.

STRIKES MAY TIE UP PLANTS OVER TOLEDO

TOLEDO, O., May 5.—Business and industry operated here today under threats of complete paralysis as the result of a strike of electric workers of the Toledo Edison company which supplies current to half a million people.

Strike leaders who had predicted the tieup would be complete by mid-day admitted it would be "probably 24 hours" before they would be able to force complete discontinuance of service.

Friends Work Crop For Stricken Man

Friends of T. J. Adams, who has been ill for some time, visited at his farm home Monday and did considerable work on his garden and crops, which were being neglected because of his continued illness.

Rev. Eskridge Said To Be Hysterical

ORANGE, June 5.—Rev. Edgar Eskridge, 40-year-old Baptist minister, in jail on a charge of murder in connection with the slaying of Police Chief Ed O'Reilly, became hysterical, his wife said today after visiting him.

AGENTS KNOW WEYERHAEUSER KIDNAP GANG

TACOMA, Wash., June 5.—The names of the six men who kidnaped George Weyerhaeuser, 9, and collected \$200,000 for his safe return, are known to the department of justice, it was learned today.

Search is concentrated in Seattle and Portland for five of them—local men—and is spread through the Midwest for the sixth, a minor figure in the old Barker-Karpis gang.

The "low-voiced, nervous" man who passed one of the \$20 ransom bills at Huntington, Ore., in exchange for a railway ticket to Salt Lake City is the old Karpis gangster, it was said by department of justice agents.

He is sought, also, for a part in the kidnaping of Edward G. Bremer of St. Paul, and his presence with the Tacoma gang gave it the characteristics of the gang.

The Karpis gangster is the only one who has fled from the Pacific Northwest, agents believe.

The "pot-bellied" man, described in police broadcasts, is known as a former bootlegger.

The erstwhile bootlegger is probably the "egoist" signer of the ransom note. Most authorities think so. He is described as the brains of the plot.

He is said to be a drug addict.

Allred to Speak At Pampa Meeting

PAMPA, Texas, June 5.—Gov. James V. Allred will speak here on June 7, welcoming visitors to the second annual pre-centennial and Pioneers' Round-Up, June 6 and 7, and helping launch the Panhandle Oil Show on the same dates.

A mammoth program has been completed to include a pageant depicting progress of this section, a two-day rodeo, two parades, a wrestling show, baseball game and street dancing featuring "old-timey" dances.

Church of Christ Revival to Start Thursday at Noon

The Church of Christ revival will begin Thursday, Rev. John G. Bills, pastor, announced today. Services will be held each day, one at 12:15 until 12:45 p. m., and the other at 8 p. m.

Cornet Solo Played At Lions Club Meet

Clyde Chaney, accompanied on the piano by G. W. Collum, played a cornet solo at the Lion's Club luncheon held Tuesday noon on Connellee hotel roof.

B. M. Collie, a visitor, announced the Rotary presentation of S. S. Henry, magician, Friday night at the Connellee theater.

Nineteen were present, three visitors, Judge B. W. McDonald, B. M. Collie, and Jack McDonald, son of W. H. McDonald, and the club pianist, Miss Ruth Meek.

Revival Continues At Nazarene Church

"The Importance of Pentecost" was discussed Tuesday night, by Evangelist John L. Knight, who is conducting the revival at the Church of the Nazarene.

After the resurrection of Jesus He appeared to the 11 and made known Himself to them. He opened their understanding, that they might understand the scriptures, how it behoved Christ to suffer, and to rise the dead the third day.

The coming of this power, which was the coming of The Holy Ghost, was the need of those early disciples. It is the crying need of the church today. The Holy Ghost purifies the heart when He comes in. Hear Peter, an eye witness, in Acts 15:8-9: "And God—giving them the Holy Ghost, even as he did unto us; and put no difference between us and them, purifying their hearts by faith."

Softball Stars to Play Cisco Tonight

Eastland all-star softball nine is scheduled to play a crack aggregation of Cisco tonight at 8:15 p. m., on Humble lighted field in that town.

The Eastland team will likely be composed of Billy Cheatham, Darrell Tully, Terrell Coleman, Charlie Joe Owen, Cotton Wallace, Joe Walsh, Howard Miller, Roy Brown and Joe Collins.

The game will be their first of the season with Cisco.

Winners In Calf Roping Contest Are Announced

Winners in the calf roping contests held on trades day this week were announced Wednesday by H. C. Davis, Chamber of Commerce secretary.

In the first contest: Guy Stoker, of Morton Valley, first, 20 1-5 seconds. Sig Faircloth, of Ranger, second, 22 1-5 seconds.

In the second contest: Guy Stoker, first, 16 seconds. Winice Graham, second, 18 1-5 seconds.

Another Added to Mosquito Killing Campaign Tuesday

A colored resident of Eastland was employed to aid in the city's mosquito eradication campaign Tuesday, M. H. Kelly, city secretary, reported Wednesday.

Commerce Smoker Is Due Thursday

Ticket sales for the Chamber of Commerce smoker Thursday night were reported heavier than those sold for former affairs today by H. C. Davis, Chamber of Commerce secretary.

Ramsay MacDonald To Resign Friday As Prime Minister

LONDON, June 5.—Ramsay MacDonald is expected to resign as prime minister at an audience with King George Friday morning and to be succeeded by Stanley Baldwin.

Eastland Police May Get New Car

Indication that Eastland police will have a new automobile for apprehending criminals was seen Wednesday when bids were reported being taken from dealers.

Rev. Estes Will Preach at Strawn Church On Sunday

Rev. Charles W. Estes, pastor of the Eastland and Strawn churches, will preach at the latter church on Sunday, he announced Wednesday.

KANSAS CITY MAY NOT HAVE FLOOD WATERS

KANSAS CITY, June 5.—Although floodwaters are sweeping rapidly upon Kansas City from two directions, the danger of a major inundation here is diminishing, Col. R. C. Moore, district river engineer, said today.

The crest of two great floods, one swelling the fertile valley of the Kaw river, the other coming down the Missouri, converged on the city today.

The Kaw empties into the Missouri here and engineers feared if both flood tides reached here at the same time, flood conditions, such as have not occurred in 25 years, will result.

Will J. Curtis, a County Pioneer to Be Buried Thursday

Funeral services for Will J. Curtis, 65, of Romney, who died today at 3:30 a. m., in Cisco, will be held in the former community Thursday at 10 a. m., with Rev. E. S. James, Cisco Baptist pastor, and Rev. W. R. Ivie, pastor of the Union Church, officiating.

Born Aug. 25, 1869, near Calhoun, Borden county, Georgia, Mr. Curtis moved to Waco, Texas, when four, later moved to Bosque and then to Eastland county in the Curtis community, which was named for his father.

Thirty years ago he moved to the Romney community and had been a resident up to his death. On Feb. 12, 1898, Miss Beulah Anderson was married to Mr. Curtis. Eight children were born of which six survive.

Falls From Boiler, Breaks Two Ribs

Two broken ribs and foot injuries were results of a fall from the boiler in the courthouse basement Wednesday of George Parrock, courthouse engineer. The accident occurred while Parrock was working. He is now resting at his residence in Eastland.

Eastland Boys Get ACC Track Letters

ABILENE, June 5.—Elmer and Delmer Brown of Eastland are included in the list of Abilene Christian College students awarded track letters for services to teams this year.

Relief Head Urges Local Cooperation With Relief Cases

AUSTIN, June 5.—Prompted by recent operations of relief recipients at Paris, state relief director Adam Johnson today pleaded for cooperation from local officials in cutting the relief loads.

"I don't believe we may reasonably expect larger relief grants in the future. Federal officials know the drought has been broken in Texas and they expect a large number of relief cases to become self sustaining. We understand farmers all over the state are in need of help in their fields. Able bodied men on our rolls should not fail to seek this employment," Johnson said.

ROOSEVELT TO USE TAXES TO FORCE CODES

WASHINGTON, June 5.—President Roosevelt is bending every effort to formulate a permanent substitute for NRA which definitely will be submitted to congress this session, leaders said today.

Ranchman Buried At Brad Monday

Funeral services for W. W. Christian, 61, who lived on the Brad route out of Strawn, were conducted Monday afternoon at the Brad cemetery with Rev. W. H. Rucker conducting the services. Interment was in the Brad cemetery immediately following the services. Funeral arrangements were made by Strawn Merchandise company.

The decedent was born at Black Spring, Parker county, on Nov. 30, 1873 and died at his ranch home on May 29. He was preceded in death by his wife, who died three years ago. He was a member of the Presbyterian church for many years.

Oil Confiscation Bill Is Attacked

TYLER, June 5.—The oil confiscation bill was attacked in federal court here today.

Labor Will Protest Change In Wages

HOUSTON, June 5.—Labor will protest wage reductions by some Houston firms at a mass meeting next Monday night, it was announced today.

ESTIMATES ARE HALF HUNDRED DOGS BITTEN

A mad dog ran rampant throughout the city of Ranger Tuesday night, biting at least 40 dogs, according to estimates by police officers who followed in his wake, and today a concerted war on all dogs not vaccinated was declared by the city officials.

The city ordinance recently enacted by the city commission requiring that all dogs in the city be vaccinated against rabies or the owners subject to a fine, was declared an emergency ordinance and in effect immediately in order that the slaughter of unvaccinated dogs could begin Thursday morning.

"Every dog in Ranger that has not been vaccinated is potentially mad," Dr. W. C. Palmer, city health officer, declared this morning, "and is such a menace to the life of practically every citizen of the community. Unless rapid and radical steps are taken there is danger of an extreme epidemic of rabies in the town."

"Not only are dogs subject to rabies," he continued, "but cats, horses, cows, skunks or any other animal, including humans, exposed to rabies is also likely to become rabid if treatments are not taken immediately."

Dr. Harry A. Logsdon, mayor of Ranger, and the city commissioners also heartily approved of the war against rabies, declaring it one of the most acute problems to face the city and its citizens in many years and is probably more acute than the influenza epidemics of several years ago.

Wade Swift, sanitary officer of the city and in charge of the dog eradication plans, stated that a dog wagon would be started out early Thursday morning and instructions would be that all dogs not bearing vaccination and license tags be killed immediately. Even those who have dogs tied up or kept in pens are not exempt from the vaccination and licensing provisions, it was pointed out, and they, too, are subject to a fine if they do not secure the proper treatment for their dogs and have them licensed.

With an estimated 50 to 75 dogs in the town that have not been vaccinated and which have been bitten in the past week or more by mad dogs, turn, became afflicted with rabies and start on their rounds of the town biting other dogs, and probably many people.

Tuesday night, when the mad dog was first reported in the Hodges Oak Park neighborhood, police rushed to the scene to find that two dogs had been bitten, one fatally and the other severely. They took up the chase and trailed the dog throughout the night.

Later it was found in the colored section, where it again ran amuck and bit eight or ten dogs, but left before the police could arrive. Night Watchman Ricker next located the dog on the east side of the T. & P. tracks, and took one shot at it as it ran across a street. Near dawn the dog was said to have been back on the north side of town, leaving a trail of bitten dogs behind, and had apparently left the city behind, though it might have doubled back into town.

People were again warned today that their pet dogs might easily be exposed to rabies by being attacked by a mad dog, and the pets, in turn, bite the owners. For this reason vaccination was urged for all dogs, and unless vaccinated and licensed the owners would be subject to a fine, each day constituting a separate offense.

World Renaissance Still Ahead of Us

Within the next 10 years there will be an "engineering renaissance" that will revolutionize the world.

So says Charles F. Kettering, president of the General Motors Research Corporation, in an address before a middle-western technical school graduating class.

Mr. Kettering remarks that many people have mistakenly assumed that the business world no longer holds a place for the young engineer, and says that this assumption is made chiefly "because we don't know anything yet."

"We are just finding out that we must recognize fundamentals," he says, "and in the next 10 years we are going to find out what fundamentals are. This will bring an engineering renaissance that will revolutionize the world."

All of this, if it comes true, will mean more experimentation, and not less. This, says Mr. Kettering, is a good idea—provided you know what you are experimenting for.

"If you know where you want to go, the road you take doesn't make much difference," he told the graduates. "But you must first determine whether the thing on which you are going to spend time, money and energy is a good risk—whether it will mean anything when the problem is solved. The real difficult problem is to pick out which is important and which is not."

Now this bit of comment is worth repeating here for the simple reason that our depression experience have led a good many of us to assume that our future is largely behind us. We look back on the hopeful days of the 1920's when everyone was looking ahead and great plans for the future were being laid, as if such days were gone forever. It is easy to feel that whatever is done henceforth will be done by the government, if it is done at all.

And yet an outlook like this is a great deal more pessimistic than the facts warrant. In the long run, we shall probably gear our society to the achievements of our engineers; and the engineers, as Mr. Kettering remarks, have barely scratched the surface.

Their job is to find easier, simpler and handier ways of doing the world's drudgery; to arrange things, in other words, so that human beings can spend less and less of their time on the unessentials and have more time for those activities that give life richness and meaning.

While the rest of us moan about the passing of the good old days, the engineers buckle down to their job—and, one of these days, we shall discover that they are pointing the way to a new era that will make the 'twenties look dull and sepitless by comparison.

Stiff Test Is Put Up To U. S. Citizens

Whatever else you may think about it, you must at least admit that current affairs in the United States do offer the citizen plenty of chance to exercise his brain.

Prof. R. P. Crawford of the University of Nebraska pointed this out to some of his students the other day. He gave them what he called five exercises in creative thinking, and they're worth looking at. Here they are: First—Some people say that we must spend money to create prosperity; others say that we can become prosperous only by saving money. Reconcile these two viewpoints.

Second—We use the bumper crops that mean prosperity! now we are working on the opposite idea. Farmers had a greater income in 1934, on the heels of drought and crop restriction, than in 1932 or 1933. How can the destruction of wealth make for prosperity?

Third—Better medical service is steadily lengthening the life span of the individual, but at the same time fewer children are being born in each family. How will this ultimately affect the nation and individual citizens?

Fourth—How are goods roads affecting the country's small towns?

Fifth—Review the accomplishments of the Roosevelt administration. Ten years from now, will the achievements which today seem to be most important still appear in that light—or will it then be evident that the really important policies are those which today do not seem especially momentous.

All this makes a pretty stiff sort of mental test. Indeed, it might be said that if you could really get at the answers to all five questions you would know a great deal more about the immediate future of America, and about the proper solutions to some of our greatest problems, than any man pretends to know today.

And yet it is precisely such questions as these which we must answer, and answer correctly, before we can fully emerge from our present difficulties.

That is what makes life today more complicated and more perplexing than it has been for at least two generations. We are up against seemingly insoluble problems which have to be solved, and solved fairly quickly.

It is small wonder that our political scene appears confused and shifting. We are called upon to do that most difficult of human feats—to get ourselves out of a bad situation by sheer intelligence.

WALLACE HAILS AAA SHOWING AS PROOF THAT PLAN IS FLEXIBLE, AVERTING BOTH GLUT AND SCARCITY

LOYALTY TO ROOSEVELT VOICED BY FARM THROUNG

CROPS FROM 40 MILLION MORE ACRES IN 1935

Riddles Belief That Only Idea Is Reductor of Soil's Yield.

BENEFITS GIVEN

Great Cotton Surplus Is Now Reduced to Normal Holdover.

Though provoking and timely, in view of the great farm demonstration for AAA, is this interview with Secretary of Agriculture Henry A. Wallace, giving highlights of the two-year history of AAA and looking ahead to its extensive farm program.

BY WILLIS THORNTON NEA Service Staff Correspondent

WASHINGTON—As the Agricultural Adjustment program enters its third year, Secretary Henry A. Wallace views with considerable satisfaction this fact: Crops will be harvested from 40,000,000 more acres this year than last.

Satisfaction? In a department which everybody supposes to be devoted to reducing crops?

Yes, satisfaction. Secretary Wallace regards this increase in acreage as final proof of the fact that the farm program is flexible, that it can adjust crops either downward or upward according to the situation. It is this flexibility that was stressed by President Roosevelt in his spirited defense of the AAA before 4000 farmers in Washington.

"We never had any idea that 'agricultural adjustment' could mean only reduction," says the cabinet officer. "The program aims at farm production adjusted to conditions as they are."

"Under normal weather conditions, it tends to be a reduction program. It must be, as long as we can't sell abroad the foodstuffs we've sold there in the past. But we're not putting the American people at the mercy of a scarcity by cutting crops below what can be sold."

Flexibility Is Aim "We are doing all we can to stimulate spring wheat production this year, because the country needs hard wheat. We haven't any dogmas that are sacred. We try to keep flexible, to adjust according to necessity of the situation."

There is no hint in the humorous, twinkling dark eyes of Secretary Wallace these days that he is disturbed by the barrage of criticism that has been breaking over the AAA, especially since amendments extending its power began to be considered.

Much of this criticism has concerned the cotton program. Yet it

This sea of upturned faces stretched out before President Roosevelt as he stood on the south portico of the White House and was photographed with the great assemblage. In one of the most uproarious demonstrations Washington has witnessed in years, the "dirt farmers" from 20 states pledged loyalty to the president's program of farm prosperity under the New Deal, spokesmen declaring "We'll go anywhere for this administration and the AAA."

is in cotton that Wallace considers the AAA has been of especially great service.

"The greatest disaster if there had been no AAA would have been in cotton," explains the secretary. "When the AAA opened up shop, May 12, 1933, there were 13,000,000 bales of American cotton on hand. The average is 5-6,000. The price was down to 5 and 6 cents a pound, with prospects for a big crop again that summer."

Cotton Growers Benefit "So 10,000,000 acres of cotton were plowed under—and, mind you that's the only actual minding crop that has been plowed under. The expected good crop did come, but the surplus was reduced to 10 1/2 million bales that year neverthless."

"We have every reason to expect that we will be back to the normal carryover of 5,000,000 bales by 1938. The price rose to 10 and 12 cents a pound. Income of the cotton growers was doubled—from \$400,000,000 to \$800,000,000."

"If you think you have no interest in cotton, and don't care about that, ask the mail order houses and the automobile makers where that money went, and whether it gave any work to city people."

Secretary Wallace, freely admitting the failures and the disappointments of the AAA program,

WHOA!

believes in its principles as firmly as ever, and cites the gains made in the first two years of its effort to help the farmer.

Farmers Gain Heavily "Farm prices are very materially higher," he points out, "and that was, after all, the primary object. If you say that dollar devaluation had something to do with that, I admit it freely, and point out in return that the Thomas amendment which allowed that, as well as the farm credit program, are parts of the same legislation as AAA."

"The main point is that farmers received roughly \$6,000,000,000 for their 1934 crop, compared with about \$4,000,000,000 in 1932."

"We have had to do some things which we knew would be unpopular and misunderstood. For instance, the slaughter of 6,000,000 little pigs in September, 1933."

"Nobody who knows anything about farms wants to see little 80-pound pigs slaughtered. But pigs aren't raised for pets. The large supplies of hogs had driven the price down to \$3.50 a hundred."

More Pork Than Ever "If those 6,000,000 young pigs were fed to full weight, they would have glutted the hog market and pushed the price down to \$2 a hundred, an absolutely starvation price for the man who grows the pigs."

"Today, though there were fewer pigs farrowed in 1934 than normally, they are being fed to greater weight. So you see there is actually more pork in the country today than there would have been if we hadn't killed the little pigs."

Wheat Little Affected "Wheat, due to weather conditions, has been little affected by the AAA program, Secretary Wallace admitted."

"We're perfectly aware of weather down here," he says with a grin. "Anybody who's been raised on a farm is. But you'd think to read some of the big city comment on the AAA that the city papers had discovered weather."

"Mark what weather did to the wheat problem. In 1933 we had the shortest wheat crop in 40 years. There was just one chance in 40 of there being so short a crop. The next year, 1934, was just as poor. One chance in 1600 of two such poor crops in a row."

"If 1935 should prove as bad a drought year as the two preceding, the one chance in 64,000 of three such drought crops in a row would be realized."

"Nobody can call 'em on chances like that. That's why we have to keep our program flexible."

"But with the combination of

drouth and acreage reduction we've cut down the wheat carryover from 387,000,000 bushels two years ago to 150,000,000 bushels in 1935, and that's close to the normal figure of 110,000,000."

Curb Is Relaxed "We are relaxing the wheat restrictions this summer, to be dead sure that there is enough hard wheat to feed U. S. consumers, but we continue to pay benefits to farmers who will promise acreage reduction in 1936 if weather in the meantime gets back toward normal."

"It will be necessary again then unless tariff reduction makes it possible to increase our imports by that time so the wheat can be exported."

In at least one field, the AAA program "succeeded too well."

"The 1933-34 program in the flue-cured tobacco belt brought prices above the parity figure at which we are shooting in all commodities. So the question immediately was put to us whether it was the government's job to increase acreage to bring prices down to parity, as well as it had been to lift them up."

"The answer is, yes. And this we're now engaged in doing. So you see in spring wheat, corn, and flue-cured tobacco, we are now expanding rather than contracting acreage."

Farm Market Vanishes

"But I said that under normal weather conditions, the AAA is to be a reduction program, for and this is why:

"The market for the product of 50,000,000 acres of our farm land disappeared. Before the World War we were able to sell it abroad, because we owed money abroad, and could pay our debts in this way."

"After the World War, we were able to keep exporting farm products for a while because we lent Europe the money to buy our own products. In 1930 we stopped that. "Since then, though we still won't import goods to enable Europe to buy our farm products, we've been importing gold to give the same effect."

"Some people think it's unpatric to import anything but gold. And when we get all of it, I suppose we can build some sort of monument with it—and that will be very lovely to look at. But will be the end of even what export trade we have left? We'll be back right where we were in 1932."

Big Problems Remains "Our big fundamental problem is still with us. America has not yet chosen between nationalism and international trade, though there are evidences that right now nationalism is growing. If it turns out to be the decision, we may as well prepare for still greater federal regulation of agriculture and still greater reductions in acreage, for that will be the only course unless we can sell farm products abroad."

"I might add that I, personally, have no more enthusiasm for reducing crops than any other farmer. But the farmers should not be willing to abandon the processing tax until industry is willing to abandon all its tariffs. All farmers should hold to their marketing agreements and licenses until industry is willing to surrender the equivalent—the corporate form of doing business."

"Then everything will be square and we can all go back free, untrammelled individualism."

By HARRY GRAYSON

ESSE OWENS promises to make the Big Ten championships at Ann Arbor on May 24 and 25 a memorable meet by breaking the world record of 26 feet 2 3/4 inches in the running broad jump established by the remarkable Japanese, Chushei Nambu, in his native land on Oct. 27, 1931.

Owens fell only three-eighths of an inch short of Nambu's figure despite an injured ankle when he set a new American mark of 26 feet 1 3/4 inches for the event in the Drake Relays. The brilliant Ohio State sophomore recorded a new world indoor record of 25 9/16 in the Butler Relays.

Negro youths have played important roles in Western Conference broad jumping. Willis Ward, a one-man track team like Owens, won the event for Michigan at Evanston a year ago with 23 feet 2 3/4 inches.

It is the Western Conference record of De Hart Hubbard, also a colored boy, that virtually is certain to fall when Owens is old at Ann Arbor. It is the old Michigan luminary's collegiate record that virtually is certain to go when the versatile product of Cleveland's East Side appears in the National Collegiate carnival this summer.

figure, but his accomplishing something that he had been endeavoring to do for three years in the National Collegiate carnival in Chicago that summer bordered on the dramatic.

From the day he enrolled at Ann Arbor the Cincinnati youth had his mind set on chalking up a world record in the running broad jump, and it wasn't until his final trial that he did it by clearing 25 feet 1 3/4 inches.

Owens, like Hubbard before him, also stars in the 100-yard dash. Both started as hurdlers. Hubbard ran the barriers which he first entered, Michigan, but switched to the century. Owens is one of the fastest 220 men on college cinders. Hubbard on the other hand, seldom ran the longer dash.

Late Leaps Lengthened

BROAD jumping has made rapid strides in more recent years. Pat O'Connor leaped 24 feet 11 1/2 inches for a world record in 1901. That mark withstood all assaults until Ned Gourdin of Harvard, popped to the front in 1921 with a jump of 25 feet 3 inches. Then came Bob Legendre, of Georgetown, Hubbard, and the famous Ed Hamm of Georgia Tech.

Hamm cleared 25 feet 11 1/2 inches in 1923 to erase Hubbard's splendid performance, which stood until Nambu, the nimble Nipponese took off in the land of the rising sun.

Thus over a 20-year period only 3 3/4 inches were added to the broad jumping distance while throughout the 10-year stretch from 1921 to 1931 the distance was increased by 1 3/4 inches.

And the exceptionally talented Owens gives every indication of taking on some more inches before closing out his collegiate competition.

Hubbard's Last Jump Best

OTHER renowned Western Conference broad jumpers of the past include the late Carl Johnson, also of Michigan, Edward Gordon of Iowa, and Johnny Brooks of Chicago, but Hubbard was outstanding among them until Owens came along.

Hubbard cracked the Western Conference and the world and collegiate records a week apart in June, 1925.

Hubbard, a senior at the time, realized one of his burning ambitions in shattering the long-standing record.

Boy Scouts, Band To Share Receipts In Magician Show

Receipts of the S. S. Henry, magician, show Friday night at 8 o'clock in the Connelley Theatre, will be shared by the Boy Scouts and Eastland High school band, it was announced Tuesday.

Boy Scouts will participate in ticket sales for the show, members of the Rotary Club, sponsor, stated.

The magician's show is reputed one of the most entertaining offered today in American theatrical circles.

He has played engagements at all of the larger theatres in the United States and foreign countries, receiving favorable press notices.

That Reminds Me

(Continued from page 1)

lius Caesar said in the Roman Senate, "It becomes all men, conscript fathers, who deliberate on dubious matters, to be influenced neither by hatred, affection, anger nor pity. The mind, when such feelings obstruct its view, cannot easily see what is bright; nor has any human being consulted, at the same moment, his passions and his interest. When the mind is freely exerted, its reasoning is sound, but passion, if it gain possession of it, becomes its tyrant, and reason is powerless. I could easily mention, conscript fathers, numerous examples of kings and nations, who swayed by resentment and compassion, have adopted injudicious courses of conduct; but I had rather speak of those instances in which our ancestors, in opposition to the impulse of passion, acted with wisdom and sound policy."

Unquestionably the signers of the Declaration of Independence and the framers of the original Constitution of the United States acted with wisdom and sound policy.

Now since we are back to normal, how about that swimming pool for Eastland. That is also a little matter of wisdom and sound policy.

Dealers, Growers To Present Wool Marketing Views

COLLEGE STATION—A proposal to license dealers in wool and mohair, under which certain trade practices which act to reduce returns to growers would be prohibited, is being considered by the Agricultural Adjustment Administration. Hearings on the proposed license will begin July 2.

One hearing has been scheduled at San Angelo, Texas, for July 29 and 30, and other hearings will be held as follows: July 1 and 2, Boston, Mass.; July 8 and 9, Denver, Colo.; July 11 and 12, Billings, Mont.; July 15 and 16, Portland, Ore.; July 18 and 19, San Francisco, Calif.; July 23 and 24, Salt Lake City, Utah; Aug. 1 and 2, Kansas City, Mo.; and Aug. 5 and 6, Columbus, Ohio.

Henry Ford's Niece Honored

Smiling Jeanne Bryant might easily pose at the wheel of an auto for her uncle builds them by the millions. But she's an enthusiastic horsewoman first, a niece of Henry Ford second. For her grace in the saddle, she has been chosen marshal of the floral parade of the national cherry festival to be held in Traverse City, Mich., July 17-19. Miss Bryant is a student at Rogers Hall, Lowell, Mass.

STRAWN

Mr. and Mrs. Ed Harmon of Fort Worth spent Sunday with relatives and friends in Strawn.

Mrs. H. A. Crawford is visiting relatives in Brownsfield.

Mr. and Mrs. J. A. Milling were called to Lubbock last Sunday to the bedside of their son, John Dean, who is quite ill.

Mrs. Bill McKinney is visiting in Mingus this week.

Mr. and Mrs. Bean Robinson and Miss Charlie Orme left Sunday for Bisbee, Ariz. They will visit points in Old Mexico before they return.

Mrs. M. C. Anderson, Mrs. Roy Kelley and daughter, Anne Eva, all

GRANDVIEW

There is no severe sickness in this community at this writing.

Farmers are very busy planting cotton, corn and late feed. The farm women are also busy with their canning.

Each member is urged to be present.

Sunday school at 10:30. Prayer service at 7:30 each Sunday night. Every one is invited to come.

of Caddo, attended the commencement exercises here last Friday evening.

Miss Maxie Barrett, who is employed in Abilene, spent Sunday with her parents, Mr. and Mrs. A. M. Barrett.

Ed E. Ratliff is visiting Mr. and Mrs. G. F. Ratliff in Albany this week.

Miss Kathleen Maxwell, who teaches in Eastland, returned home Saturday.

Mr. and Mrs. H. C. Poyner were Weatherford visitors Sunday.

Steel and Cotton Buying to Be On A&M Short Course

By United Press

COLLEGE STATION, Texas.—Problems of street buyers will be emphasized and typical cotton transactions will be demonstrated as a part of the course of the twenty-sixth annual session of the summer school of cotton which will open at the Texas A. & M. college

June 4 and continue through July 13.

Prof. J. B. Bagley, head of the department of textile engineering of the college, will have charge of the school.

The school was planned to prepare young men to enter the cotton business, to train cotton growers to market their cotton intelligently and profitably and to assist cotton buyers to become more familiar with low grade and off colored cotton and to judge staple. It will offer instruction by professional cotton men with years of experience as teachers.

Grading, stapling and cotton trade procedure will comprise the subjects to be taught. Facilities of the department of textile engineering, including the cotton mill, will be available for instructional work. Lectures will be given daily covering subjects of general interest.

Eastland Personals

Mr. and Mrs. Sterling Holloway of Brownwood were visitors in Eastland Wednesday.

F. D. Wright and R. E. Grantham of Cisco were courthous-

visitors Wednesday.

L. R. Pearson of Ranger was Eastland visitor Wednesday.

Miss Jean Kitley, former Eastland resident, now of Troup, visited in the home of Miss Frances Hunter.

Mr. and Mrs. C. R. Sanford daughter, Julia Ann, of Cisco, dined in Eastland Sunday.

DEAREST DAUGHTER,

Thanks so much for sending that delightful little note, remembering my birthday. And please don't feel that its being so short made it any the less welcome.

Besides, I know what it is to have "shoppers headache"—to feel all worn out and dragged down, with your feet as heavy as lead from walking around all day.

Ruf. my dear, why do you do it? I know you and Bob have something of a struggle to make ends meet. It won't always be that way, because I know Bob's a very ambitious young man—ambitious for you as well as for himself.

But take an old lady's advice, dear. Look for bargains—no matter how wealthy you become. But don't make an expedition of it. Make it a tour. You get a newspaper. Look for real bargains there, before you set out. Then you'll know where you're going, and you won't wear yourself out. I know, because I do it.

Give my best to Bob, and give Bob, Jr., a great big kiss from his grandma.

Lots of love,
Mother
