I noticed on television last night where Dallas elderly citizens 65 years and older owned property, were shown lining up at their tax office to sign exemption forms on their taxes.

This state constitutional ammendment was passed in the last general election, giving local taxing agencies, such as school boards, cities, and counties, to adopt the resolution if they desired. As I understood it on television, it is a "Permissive" law

I wonder if our local school board, the county commissioners, or the City commissioners, are going to pass resolutions adopting the new law. Are we widows and elderly people who own property going to continue to have to pay high taxes just because we happen to live in Eastland and Eastland County?

It would be nice if the Pioneer Club the SOS club and others interested in getting their property taxes lowered would take the bull by the horns and contact their school board members, county commissioners, and city commissioners, and get something done about this Rubye M. Pledger

I must say

All of us who have reared children, know there are many times they complain about food and other things at home. especially if mama and daddy allow them to only eat what they want. I never allowed anyone to say "I don't like that" at my table. Of course if you know me, and most of you do, you would certainly say I did not know what a balanced meal was. I look like I think it's all you can balance in both hands

Saul Pullman has told me I looked like I was a good cook and ate most of it. But back to the kids. The reason God gave us grownups was because children could not know what is best for them. (Hopefully grown ups intelligence matures with their bodies)

Most kids don't have enough to eat when

- 1. They don't like carrots They don't like Spinach
- They can't find anyone to trade vegetables with

4. They don't "like" period. The portions are served from large serving spoons and not tea spoons THINK!!!

Of course some children eat more than others, but the lack of serving time and the number of children make it impossible to determine this It does not take

a Soloman to understand this. The menus are basically the same from other schools. They are furnished also by the State checked Abilene menu, myself, substantially the same,

and recipes the same. The portions are as to age groups, also State approved. They are never served lef-

SHIELD OF SHELTER

Dear friends,

We have been asked this question, "What should be done when death comes to a loved one at some distant point?"

We suggest that the next of kin immediately phone his hometown funeral director who will then make all arrangements for the care and return of the de-

This will avoid possible misunderstandings that can so easily occur.

Respectfully,

tovers.!!

The current year check by the state far exceeded food content evaluation. And, far above the state requirement for type A lunches

These are documented facts. as I personally investigated. Children, the state feels (and

we should too) should be served what they need and hopefully this will in time become what they want. One reason for this besides the primary one, is this is the only balanced meal some of them have all day, not necessarily from neglect, but from knowing food content.

As far as rumors - It's much worse to repeat one, than to be one. But if you meet the wholesale meat man in town. you too, can buy meat from

Yes, let's be concerned mothers, both for our child's character, as well as his tummy. Let's join hands and support our schools. Let's be builders and not wreckers. If any problem exists, lets go to the head man and get the truth. That's the only thing that will stand alone. Mrs. Lois Meazell
