'Mama's Boarding House' Is Given At Las Lealas Club Annual Tea
"Mama's Boarding House," by John D. Fitzgerald was the title of the book reviewed by Miss Gladys Green at the meeting of the Las Lealas Club annual guest day held in the Women's Club Monday evening. For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids and to relieve pain—without surgery. In case after case, while gently relieving pain, actual reduction (shrinkage) took place. Most amazing of all—results were so thorough that sufferers made astonishing statements like "Piles have ceased to be a problem!" The secret is a new healing substance (Bio-Lyne®)—discovery of a world-famous research institute. This substance is now available in suppository or ointment form called *Preparation H*. Who's on Who's Back-
... is a timely question in insurance circles. Every insurance buyer should know that he is helping to carry the load inflicted by the careless driver... the homeowner who allows hazards to exist on his premises... the person who abuses the broken glass privilege... the householder who overloads electrical circuits... the juror who allows himself to be swayed by emotional pleas for sympathy... to name only a few which cause premiums to rise. When an insured loss occurs, the cost must be reflected in the premiums you pay in the future. So do your part to help prevent needless claims. Join the drive to keep needless insurance costs down... not to run them up.

In this Kingswood, every window is Safety Plate Glass.

Nicest wagon that ever joined your family!

Chevy's station wagons should really be called family wagons. You can choose from five models, including the four-door nine-passenger Kingswood, with its rear-facing rear seat.

Here's a brisk and breezy wagon that'll take on any chore you name, from a trip to the beach to a journey

home from the lumberyard. There's room, you see, for a whole half-ton of cargo—a space ten feet long, with the rear seat and tailgate down.

These wagons are easy to load, too—you just roll the rear window into the tailgate and flip it down flat. No liftgate to wrestle with.

Chevrolet's so easy to handle it's a natural for the lady of the house. Big, safer brakes, too. Chevy's even

got bigger tires—they come as standard equipment on every one of our wagons. But why not fall in love with a Chevy firsthand—at your Chevrolet dealer's!

The car that's wanted for all its worth!

Mrs. Harold Durham, program chairman for next year, gave the members program questionnaires and requested that they be filled out and returned to her as soon as possible. These questionnaires will serve as a guide in planning the 1959-60 yearbook.

Twenty-Two From Here to Attend Witness Meeting

Twenty two delegates of the Eastland congregation of Jehovah's witnesses will be among the other witnesses convening in Bowie, this Friday at 6:45 p.m.

According to Mrs. Zetty Parrack, presiding minister of the Eastland Congregation, the convocation is slated for Friday, Saturday and Sunday. The program will include courses and demonstrations on the practical house to house ministry of Jehovah's witnesses. Most of the speakers are from the North Central Texas area.

Kenneth R. Savoy, district supervisor from Brooklyn, New York, will oversee the assembly. Also he will speak Sunday, April 26 at 3 p.m. on the subject, "Paradise Earth Through God's Kingdom."

"The program is designed to instruct the delegates to be teachers of the good news," stated Mrs. Parrack, "so that on returning home they might build up the moral fibre of our community by encouraging family Bible study."

MAGIC FLAME OF PROGRESS

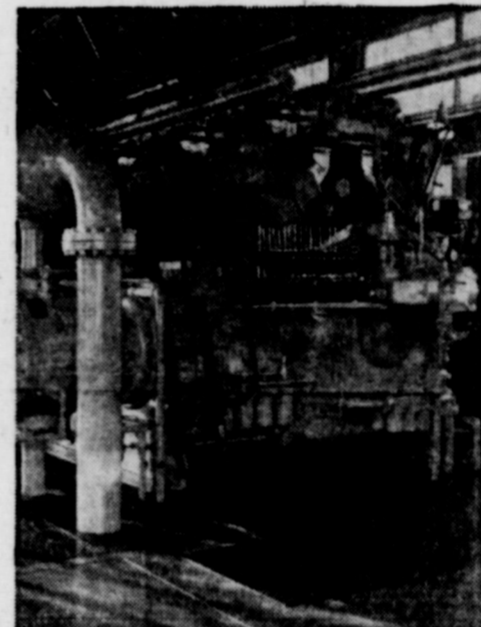

EXPLORATION—where natural gas service begins. Constant search for new fields is required to provide for the increasing demand for the world's finest fuel.

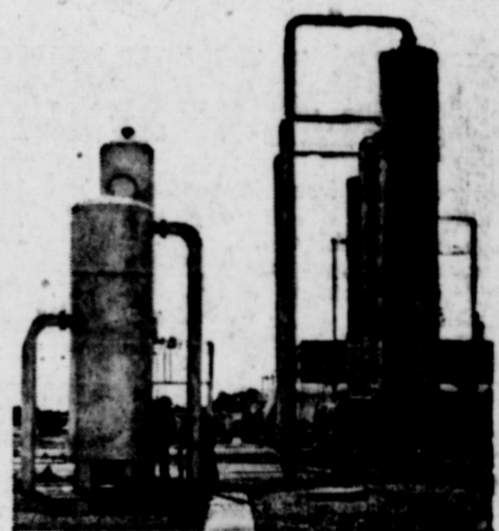

DRILLING—After geological explorations are made, leasing completed, the rig is positioned and drilling begins. Drill bits bore deep into the earth to possible natural gas strata.

TYING-IN—natural gas from the fields to the transmission line. The natural gas has begun its long journey to you.

COMPRESSOR STATIONS—natural gas receives a boost. Pushed on by large compressors that maintain pressure in the pipelines to assure safety and a dependable, sufficient flow.

PROCESSING PLANT—removes the liquid by-products of natural gas (hydrocarbons like butane, propane and isopentane and others); dehydration plants remove water vapor to prevent pipeline stoppages, so that pipelines may operate trouble-free.

PIPELINES—a network of long distance pipelines is necessary to bring the natural gas from its origination point to the city where it will serve uninterrupted, day and night.

All this adds up to an adequate supply of natural gas...

but gas must be bought in the gas fields in the face of vigorous competition!

Everyone knows - there is nothing more important to a natural gas company than supply - gas reserves attached and ready for use.

Lone Star Gas Company has had a 50-year record of dependable, adequate gas supply - except for the few early, trying years when the Company was struggling to get started and remain in business.

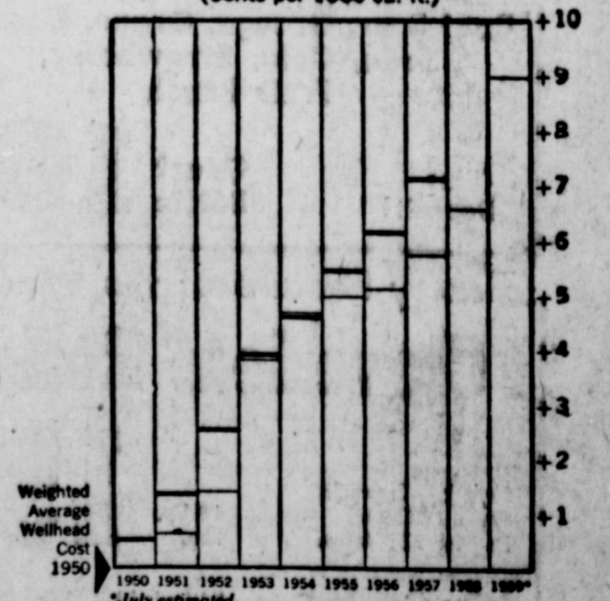

Lone Star's present gas supplies are being used up, and Lone Star must continue, day by day, to add to its supply. These additional supplies are available for purchase only in the face of competition from other pipelines.

Lone Star will protect and maintain your gas supply, but it must pay higher prices, if it is to continue to get the gas you need.

Satisfying your need for round-the-clock natural gas service is our obligation.

How competition has affected field prices for gas INCREASES in weighted average field prices (Cents per 1000 cu. ft.)

Heavy bars show increases in weighted average prices paid to producers for gas purchased in the fields of the Southwestern area by 10 major gas pipeline companies (not available for 1958 and 1959). Light bars show similar increases paid by Lone Star.
