Many Democrats and Republicans who were still hoping to balance the budget were pointing to an expanded aid program as the top priority target for congressional budget cuts.

The Democratic national committee distributed to lawmakers in that party a "confidential" memorandum which seemed to reflect a fair cross-section of the Democratic reaction in congress. The memo suggested that the budget failed to carry out 1952 Republican campaign pledges and that the President had reversed his field on a umber of recommendations.

Estimate of \$62 Billion Mr. Eisenhower sent congress Monday his budget message for the 1956 fiscal year starting next July 1. It estimated federal spending in that year at \$62.4 billion, and the deficit at \$2.4 billion. Congressional reaction was

MADDIX glanced briefly over the paper, laid it brusquely to one side. His manner hardened and Crotch glimpsed the degree of hatred the man held for him for the beaching of his packet. Along the Colorado there was no law except the enforcement of the strongest will, and Maddix's court was an irregularity. A few of the spectators were keenly aware of this. Yet Crotch's case was hopeless. In from Duey's kicking, his tongue all probability Sugar Logan was tormented by fire and bloatknew nothing of the proceedings. Sugar Logan and John Slade were in La Paz.

"This agreement contains your signature," Maddix proclaimed solemnly. "I decree that you surrender your copy to the court. If you do that freely, forbearing all further efforts to coerce the company, the other charges against you will be dropped. Failure to do so will carry a penalty of six months in fail."

Anger was a churning, bub-bling thing in Crotch as Maddix laid down his humiliating edict. "I never saw the contract that called for \$7. This man doesn't belong in any way with the ore company. He lies!"

Judge Maddix arose, face flaming scarlet. "Any word spoken against the ore company is contempt of court. The witness has testified and in so doing has established his facts. This man is the friend of the miner, the merchant, the freighter who desires honest charges on river transportation. The Court will not sanction offense against the company or the friends of the people. Captain Crotch, you are sentenced to jail!" They hit him from behind be-

fore the pistol cleared his belt. Among them were two malcontent traders and a pair of Coco-

CROTCH came to in a darkness having neither outline nor ed between his teeth. He lay at first in a dull stupor. He won-dered if he had been blinded in the fight. He tried to run a hand in front of his eyes but his arms refused to respond. From this he decided he had been bound.

He lay on a wooden floor, for the surface was hard and splintery, and he could distinguish the reverberations of a man's tread receding from him.

He turned over and felt a

knifing object against his back. Still numb to these fresh sensations, he continued to lie on the object. His real plight came to him then. He must get away from this hole before Jamison directed his vengeance against the General Heath.

The sharp object by now had cut through his jacket. He was brought us here? conscious of blood trickling from flesh cut. Again he rolled, this time bringing a pair of broken windows into focus. "Take it easy, Irv. You ain't

Leather swinging begins tonight in the annual Pampa District Golden Gloves Tournament at the Top o' Texas Sportman's Club arena. Tournament director Oren James predicted today that the entry list would approach the 100 mark which would be the highest field in

the tourney's history. An estimated 50 or 60 boys from Pampa are expected to weighin today. From out of town, Borger is sending 25 or 30 boys, Dumas 15 or 20, and another 10 or 15 is expected from other Panhandle

the tournament here and the winners could easily be reversed in the tourney here. There's no way to ascertain who will fight tonight since the pairings can't be made out until the

boys weigh in today. Some of the boys in all likelihood will be fighting in different weight brackets in the Pampa tournament from the one they fought in at Borger.

At least 20 matches, though, will be fought on each of the three or four night tourney program. # Pipe Line To Privilege

The help that Uncle Sam wants to give you is apparently limited only by the amount of money he can dredge out of your pocket and the inventive genius of the greatest aggregation of bureaucrats since the days of the Caesars. Take the new device just installed in Grand Central Terminal, New York City.

It's an oversized phone booth on the balcony. If you've had a hard day and you don't think the boss has just been fair about everything you go into this booth and pick up the phone. It's free, of course. Taxpayers have underwritten that, too. Immediately you are in touch with the soft and pleas-

in that particular type of complaint. The idea, according to Secretary of Labor James P. Mitchell, is to "promote and develop the welfare of

the wage-earners." Presumably, since the working man is thus given a direct pipeline to the Federal Government, the employer who knows of it will be a good boy and take great care not to bruise the tender feelings of his employee. Also, he will know that the Mighty Department of Labor will be onto him for all his little tricks.

He has one recourse. He, too, can use this phone. But when he calls he must limit his discussion to having the regulations explained to him so that he knows just how many rights his employees have and how few are

Incidentally, all inquiries are recorded so there will be a permanent record. If you can think of a device more likely to damage employer and employee relations and create a feeling of distrust which could at times even border on terror, what would it be?

We know this is dreadfully naive, but we wonder just what would happen if the employee with a "beef" took it up directly with his boss. The employee wouldn't be an employee if the boss didn't want him there in the first place. Therefore, if the matter were legitimate it is only reasonable to assume that the employer would be interested and would treat the employee with every

This myth that the boss is a combination oaf and pare ought to be laid by the heels once and for all. The Federal Government cannot and will not help to "promote and develop the welfare of the wage-earners" by getting in between employers and employees. If it really wants good relations it will get out of the labor picture and let the boss and his helpers get together.

CIO Making Grants To The National Council Of Churches

How far the C. I. O. is willing to go in order to get control of our economy and our form of government comes to light in an arwritten by James C. Ingebretsen. He reports that the C. I. O. grants to the National Council of Churches for a special educational

But let Mr. Ingebretsen give the details on the matter, as he re-

"I attended an impressive luncheon the other day, financed by the C. I. O. and addressed by Walter Reuther. I wondered why the C.I.O. the world's most powerful labor union, should be so interested in clergymen. Over a hundred students from theological seminaries and clergymen of all denominations were attending a two-day session of the National Religion and Labor Foundation held at the C. I. O.'s annual convention. Dr. Witherspoon Dodge, director of this foundation, said that during the last seventeen years, hundreds on hundreds of ministers influenced by these sessions have gone out into the world with a new sympathetic understanding of the problems of labor

"I looked around at the luncheon and was struck by the sincerity and intense interest of the clergymen who were nodding their heads in agreement with President Reuther's words.

"Mr. Reuther said that although man is a spiritual being, 'he can only begin to grow as a spiritual being after we have solved our conomic problems.'

"I wondered if any of the ministers or students there thought how this contradicted Christ's "Seek ye first the Kingdom of Heaven and all these things shall be added to

"He told me that the C. I. O. in cooperation with Wayne University, carried out a broad study of opinions of workers on social and political questions. The labor leaders were shocked to learn that labor's own publications and commentators hardly made a dent on union workers' opinions - but that the 'great dominant force in public opinion still remained the ministers, priests and rabbis."

"I wondered how much headway he C. I. O. is making among

AFTER · ALL-WHAT'S-MONEY **DEPARTMENT:** This is National Thrift Week. Pampans are reported spending at their usual rate. Washington is no different. The President's budget message showed another deficit is in the making. But, at least, he's got the right idea . . . It's down from last year . . . It looks as if Humorist Artemus Ward had the right idea many years ago. This is how he put it: "Let us all be happy and live within our means, even if we have to borrow the money to do it with.'

THEY GET to thinking you're invincible when you keep on winning. And then, whammo! You lose your first game in 73 starts and they really put you to "work." . . Take Cliff McNeely, the Harvesbasketball coach, on the Monay after the Saturday before when Portales "hit" Pampa, There he was, sweeping out the floor of ne of Pampa's clothing stores

And he was "grumbling. Says he: "And I don't even know how much they're going to pay me." . . P. S. He's still coach and proud of "his boys." And he really didn't HAVE to sweep out.

THERE'S ONLY ONE thing wrong with KPDN's "Staff Breakthey say . . . You know, that's the radio show in the mornng when the station gets various people around town to talk about mselves and what they're doing . . And, indeed, the folks on the how say they enjoy the experience, they really do . . . But the trouble is, they don't get anything to eat, A lot of "staff," but "breakfast.". . Matter of fact, the way a fella told us the other day, there IS one of the staff who es eat. No one else, though.

FIFTY EQUALS FOURTEEN-Nope, that's not a mathematical impossibility. It's the truth. At ast, it is where 50 boys from two dens of Pack 80 are concerned. . The 50 took a train ride Saturday afternoon, some of them for the first time, and the railroad made out individual tickets for them . . With the result that the train left Pampa at 8:29 a.m. instead of 8:15, a delay of 14 minutes . . What were they going to Miami for? Very simple. It is Railroading Month for the Cub Scouts.

And they'll hold up the railroads'
timetables, if need be, to do what hey're supposed to.

MAN, THIS SCHOOL LIFE is a the high school. Always before, dents reported only for scheduled tests . . . But how times have changed — they'll have to attend

NEW 1955 MERCURY MONTCLAIR AND MONTEREY\_FIRST CARS IN THEIR PRICE CLASS WITH DUAL EXHAUST AS STANDARD EQUIPMENT

What turns Mercury's high horsepower into brilliant performance? To begin at the end of the car-the new dual-exhaust system that's built right into the massive rear bumper assembly. Dual-exhaust performance is something you found as standard equipment only on the most expensive cars-up to now. But now it's yours at no extra cost on every Mercury Montclair and Monterey.

This dual exhaust-plus new developments in Mercury's vacuum-controlled 4-barrel carburetor-helps set new performance standards with the new 198-hp and 188-hp SUPER-TORQUE V-8 engines. And to let you use that power with greater safety—there are further improvements in Mercury's ball-joint front suspension, for even easier, steadier turning and cornering, even greater road stability.

At hundreds of Mercury showrooms all over the country, public enthusiasm for Mercury power is matched by admiration for Mercury's all-new styling for 1955. With entirely new bodies on a new chassis-Mercury is lower, longer and wider. Mercury's clean, classic lines make it a car that will look new for years to come. Come in and get the full story-at our showroom now!
