President In Request For GOP Aid

By RAYMOND LAHR
United Press Staff Correspondent
WASHINGTON (UP)—President Eisenhower has signalled his intentions in Congress to blow the whistle on the Democratic anti-recession plunge, a highly-placed Republican said today.
This source said the President passed the word at his weekly meeting with GOP congressional leaders at the White House Tuesday.
The President felt anti-recession measures were not getting adequate consideration, the source reported.
Block Early Moves
Taking the cue, Senate Republicans Tuesday successfully blocked plans of the Democratic leadership to pass a billion-dollar public works bill before the congressional Easter recess begins Friday.
Taking advantage of Democratic absences, including that of Senate Leader Lyndon B. Johnson who was in Texas, GOP senators forced postponement until April 14 of further consideration of the bill. The 41-39 delaying vote was almost entirely on party lines.
The measure would make available to communities one billion dollars in federal loans for a wide variety of local projects such as hospitals, streets and sewers.

Ike Says 'Go Slow On Tax Cut'

Report Meet Held 'Center' Property To Be Marked By Flags

The Pampa Jaycees will go out to the site of the Pampa Youth and Community Center, Saturday, to place some flags marking the site. General Campaign Director Johnny Campbell announced the Jaycees' intention at the fourth General Report Meeting today.
An oral report was made this morning on the contributions since yesterday's report meet, which "will be made public when audited," campaign officials said.
The Jaycees, who pledged \$2,000 at their Board of Directors meeting Tuesday, are credited with starting the Youth and Community Center project, several years ago.
In another statement, Girl Scout Executive Mrs. N. C. Kadingo voiced a growing conviction on the part of youth workers in this community that the youth of Pampa need a place which will meet needs not met by existing organizations or other places.
The Pampa Youth and Community Center will have five features designed for youth and adults in the Community. First of these will be a swimming pool, planned to accommodate the Red Cross, Boy Scout and Girl Scout swimming programs as well as the personal programs of those who like to swim.
A large general activities room will have a trampoline and a portable stage, usable for plays or bands. The room can be used for small assemblies, for dancing or for small sports.
The lounge will have facilities for those wanting to read or wait to listen to records. Civic organizations can get permission to use the lounge for their meetings and can have coffee served from the snack bar.
The game room will interest those who want to play ping pong or pool or would like to sit at a table and play any number of small games like checkers.
The snack bar will have all the facilities of a well run soda fountain but will not serve meals. Like the lounge, it will be a place where students can relax and meet their friends.
The fund raising divisions in the Pampa Youth and Community Center Campaign plan another report meeting for Friday at 10 a. m. in the Palm Room of City Hall. Owing to some pledges which will be held until late this week. Division members anticipate a greater than usual gain for the Center Building Fund.

SPEBSQSA OFFICERS
The installation banquet of the SPEBSQSA was held last night at the Pampa Hotel. SPEBSQSA stands for the Society for the Preservation and Encouragement of Barber Shop Quartet Singing in America. From left to right are Howard Buckingham, immediate past president; Ott Shewmaker, new president; Dick Stowers, vice president; and C. R. Howard, secretary-treasurer. Other officers are Dave Redus, historian and round up reporter; Hansford Ousley, sergeant-at-arms; Bill Haley, chorus director; and Bill Hunt, assistant chorus director. (News Photo)

Seeks A Definite Beneficial Effect

WASHINGTON (UP)—President Eisenhower sounded another go-slow warning today on cutting taxes.
The President told a news conference that he must stop and look very steadily at proposals to cut taxes. He said we must really make sure that we are right and that a tax cut would have a beneficial effect upon the economy in future years.
He was asked about New York financier Bernard M. Baruch's congressional testimony Tuesday that it would be "folly" to cut taxes. The President replied that he had known Baruch for 30 years, had a great respect for his opinions, and believed that they warranted serious consideration.
Central Defense Authority
In other news conference highlights, the President:
—Said his Defense Department reorganization plan, which he probably will submit to Congress Thursday, is based on the necessity of the defense secretary having central authority as to the size, composition and strategic planning of armed forces.
—Explained that despite his objections, he signed the anti-recession housing bill Tuesday because he believed its advantages outweighed the disadvantages.
—Said he decided against a unilateral suspension of nuclear tests because he didn't believe it would be for the good of the United States.
—Said he hadn't abandoned hope that Russia would change its attitude sufficiently so that there can be a constructive East-West summit meeting.
Cautions About Automation
—Described as "ridiculous" a statement that a so-called palace guard was keeping from him information that he should have. This was in connection with a statement made in a recent television interview by Sen. Styles Bridges (R-N.H.).
—Expressed the opinion that industrial automation will be a good thing for the nation but he cautioned that industry should not use it only for the purpose of throwing people out of work.
—Said he does not believe a large nuclear test device can be exploded secretly without detection by other countries.
—Vetted a suggestion that the Psychological Warfare Board be re-established in an effort to improve U.S. achievement in a propaganda battle with Russia. But he conceded that it might be a good idea to have one official, possibly in the State Department. (See IKE Page 3)

Cuban Rebels Still On Hunger Strike

BROWNSVILLE, Tex. (UP)—Thirty-five captured Cuban rebels carried a hunger strike into their second week today, joined in their starvation protest by rebel groups in New York, Chicago and Miami.
The men have vowed to starve to the death if necessary to protest their imprisonment following the scuttling of their heavily-armed expedition to support the forces of Cuban revolutionary Fidel Castro against the government of President Fulgencio Batista.
They and the other hunger strikers are protesting against continued shipment of U.S. arms to the Batista government.
In Florida Tuesday, 22 Castro supporters were arrested after a demonstration at a railroad station where they believed a delegation of Batista emissaries was passing through on the way to Washington for more arms. Two Cuban nationals were arrested at Key West as they tried to smuggle arms to Castro's forces in an outboard motorboat.
Arrests in Virginia
At Winchester, Va., three men arrested in an allegedly stolen car with a cargo of knives, bayonets and a sawed-off shotgun, said they were part of an army of 1,500 to 2,000 men being trained here to join the Castro forces. They gave their names as Forest Lipscomb, Patrick Patterson and Harry Voelker.
Fourteen of the 35 men held in Brownsville since their ship was rammed by a Coast Guard cutter last Thursday have been transferred from jail cells to Mercy Hospital beds and are being fed intravenously. U. S. Marshal James W. McCarthy said.
Although the formal hunger strike began only after their capture, doctors said the men actually hadn't eaten for two days before that — they were too busy or too excited.
Most of them are U.S. citizens and residents of New York. The wife of their leader, Arnaldo Barron of New York, said "most of them were fought for this country in World War II or Korea. Now they thought they couldn't stay in this country and do nothing."
Mrs. Barron, who came to Brownsville after her husband's arrest, said many of the men had good jobs in New York. They saved \$20,000, she said, to buy arms and ammunition in Mexico and charter the 70-foot freighter in which they sailed.
In New York, 14 men and four women members of the Orthodox Committee, headed by Barron, began a hunger strike at 7 p. m. Friday. One woman dropped out during the night; 17 remained without food.
Of 10 members of the rebel Revolutionary Labor Directorate, only two remained on a hunger strike Monday night and four more were forced to begin eating again late Tuesday night.
Another group of Cubans picked the U.S. Court House at Chicago with signs protesting the Brownsville capture.
Nine more rebel sympathizers were conducting a "sitdown hunger strike" in the lobby of a Miami television station.

US Families Seek Navy's Protection

HAVANA, Cuba (UP)—Forty-five American families in rebel-infested Oriente Province have asked the U.S. Navy to send warships there as a protective measure, reports from Santiago de Cuba said today.
The reports said the families, employees of the U.S. government owned Nicaro nickel plant on the north coast, forwarded their request to the Guantanamo Naval Base in event civil war makes their flight necessary.
The base itself cancelled all leaves and took what authorities described as "emergency measures" in preparation for the expected start of an all-out war against the government by Fidel Castro's rebels.
"About 250 dependents of Navy personnel were moved into the base from nearby Boqueron, Cajanera and Guantanamo City. Castro has threatened to start his April "blood bath" campaign against president Fulgencio Batista in that area.
Batista, armed with extraordinary powers Tuesday night and forwarded it for publication in the "official gazette" which makes it law.
Informed quarters in Havana said the government had sent 600 more troops into Oriente Province to bolster its forces there.
Reports from the mountainous province said a "business as usual" outlook prevailed with only minor skirmishes reported.
The U.S. Navy's precaution at Guantanamo Bay coincided with reports of increasing rebel harassment of American consuls in Oriente.
The American-owned South Santiago Manganese Mining Co. was visited by an armed 15-man rebel patrol and ordered to shut down. Similar orders were given to another U.S. manganese mine near Oriente's capital city and one near Charco Redondo.
Unconfirmed reports said the Texas Oil Co. was preparing to shut down its big 15 million dollar refinery near Santiago de Cuba.

Mrs. Kadingo Says 'Center' Is Important

Before the fourth Pampa Youth and Community Center Report Meeting today, Mrs. N. C. Kadingo of the Top of Texas Girl Scout Council, released a statement on the need and importance of a Youth and Community Center for Pampa.
"Since the youth of today are citizens of tomorrow, I and our Council president, Mrs. Joba Holt Jr., feel that anything that will benefit Pampa's young people will benefit the community," stated Mrs. Kadingo, executive director.
"A youth center in Pampa will, in no way, duplicate or compete with our Girl Scout program. In fact, some of the facilities, especially the indoor swimming pool, will allow us to broaden our program. At present, troops working toward swimming and life saving badges must travel to Amarillo to use indoor pool facilities there during the months the Pampa Municipal pool is closed. An indoor pool here in Pampa will allow more troops to work on badges in these areas."
(See CENTER Page 3)

Highway Bill Moves Closer To Final Passage Today

WASHINGTON (UP)—The anti-recession highway bill, its controversial anti-billboard provision still intact, moved closer today toward final passage by Congress.
A conference committee worked out Tuesday a compromise version of two different highway bills passed by the House and Senate and sent it to the two chambers. Both are expected to vote on the compromise Thursday before adjourning for the Easter recess.
The conferees accepted the provision to give states federal bonuses if they restrict billboards on the new Interstate Highway System.
The bill would pump \$5,500,000,000 in federal and state funds into road-building in the next two years and provide up to as many as half a million new jobs.
Congress was to receive today President Eisenhower's plan for expanding the National Advisory Committee for Aeronautics and putting it in charge of non-military space exploration.
Later today the White House also was expected to send Congress another big supplemental budget request for stepped up defense spending.
The Senate Preparedness subcommittee postponed its scheduled hearing at which Defense Secretary McElroy was to report on progress of U.S. missile and space programs.
A House commerce subcommittee planned to wind up today its investigation of alleged misconduct by Federal Communications Commissioners.
The U.S. Chamber of Commerce endorsed President Eisenhower's proposed \$3,800,000,000 foreign-aid program but said it could be cut by 260 million dollars by trimming military assistance and other special programs.
The chamber's views were expressed by spokesman James Tanham in testimony prepared for the Senate Foreign Relations Committee.
Other congressional news:
Public Works: Senate Republicans forced postponement until April 14 of further consideration of a Democratic-sponsored bill to pump another billion dollars into community public works projects. The Republicans won the delay on a 41-39 vote.
Housing: The President signed with reluctance the \$1,850,000,000 Democratic-sponsored housing bill. He conceded it would create new jobs and spur home construction. But he said it saddles new burdens on the taxpayers and in some of its provisions violates the spirit of free enterprise.

British Experts Say Russia Near Ready On New Project

LONDON (UP)—British rocket satellite intended to return safely to earth with its living and instrument cargo.
Members of the British Interplanetary Society, through various sources, have heard that Soviet rocket scientists have been traveling from their usual research posts, presumably to the rocket ranges near Stalingrad.
L. J. Carter, an official of the British group, said this coming and going is taken to mean intense activity at the rocket sites. But Carter does not agree that it necessarily means an imminent firing.
"I doubt they would do it in the absence of such an important space scientist as Professor Serov who is, I understand, out of the country," Carter said. "But certainly something seems to be underway. They are obviously working at high pressure."

Roma Rescued Head For Port

ADEN (UP)—The Italian liner Roma headed for this Red Sea port today with more than 1,000 survivors of the immigrant-laden Norwegian ship Skaubryn, which caught fire and burned at sea Monday.
The Roma was expected to arrive here today or Thursday. A spokesman for the International Committee for European Migrants said the European immigrants who made up the Skaubryn's passenger list would be on their way to Australia again by Sunday, either by ship or by plane.

Jaycees View Film on Waste In Government

A film on wastes of tax money by the US government was shown at yesterday's meeting of the Pampa Jaycees.
George Whitten, in charge of the project designed to promote government economy, gave brief introductory statements before the film was shown. The club plans to show the film to as many local civic clubs as possible and encourage persons to write their Congressmen to express their concern over governmental waste.
Guests for the day included F. A. Record, Borger Jaycee president, and Doug Gallatin of Amarillo.
Ray Blumer was introduced as Jaycee of the Month, an honor awarded him at yesterday morning's meeting of the board of directors.
The new officers for the year were also introduced. They are Horton Russell, president; Raymond Hill, first vice president; Gene Hollar, second vice president; Melvin Jayroe, secretary; and Lyle Gage, treasurer.
The Pampa Jaycees are the chartering club for the Jaycees in Stinnett, who will have their charter night banquet Monday.
"Pete" Snelson of Midland, state Jaycee president, will be present for the banquet. He will arrive in Amarillo via plane the day of the banquet and will be greeted by a delegation from Pampa. Another delegation from the Pampa club will take Snelson back to Amarillo Tuesday morning in order for him to catch a plane back to Midland.
Jaycees are also making plans now for the state convention, a program of weeks off, and the annual Teenage Roadshow, driving contest.
Clyde Dickerson is in charge of the Roadshow and reports that it will be held on April 27.
The installation banquet for the new officers will be held Saturday, April 26. Key man of the year will be announced at the banquet. A place to stage the event has not as yet been decided upon.

Commission Is Against Federal Aid

In late action by the City Commissioners yesterday, the Commissioners went on record as being officially opposed to federal aid for city projects on the grounds that it would be "detrimental to the city's excellent credit rating."
In other action the Commissioners also disapproved any additional taxes other than Ad Valorem.
A unanimous vote endorsed the proposal to enforce the ordinance on water bills. The ordinance provides that all water, sewer and garbage bills will become due 10 days after the billing date and will be declared delinquent after 30 days with resultant penalties on unpaid bills.
Payment to the United States Government in the amount of \$19,200 for Section No. 1, Reese Air Field, was authorized. The field is four miles south of Pampa on U.S. 70 and will be used for drilling of future water wells.
The members of the three man equalization board, George Scott, James Poole, and Gene Lewis Jr., were given the oath of office in the city clerk's office yesterday.
Other business on the agenda included the third and final reading of the city electrical Ordinance 489 and refusal of the city commission to approve the Mesilla Park plat until they complete further investigation and discussion. The paving program, composed of 20 units, was passed as an emergency ordinance in three readings yesterday. Commissioners said public hearing on this Ordinance, No. 492, will be held at 9 a. m., April 22, in City Hall.

Easter Cantata Tonight

The Seven Last Words of Christ by Theodore Dubois will be sung at 8 p. m. today in the Sanctuary of the First Presbyterian Church.
Soloists will be Yvonne Sligar, soprano; Mrs. William Hunt, soprano; Richard Sligar, tenor and Dr. Harold Meador, baritone.
The director of the cantata is William A. Hunt. The text of "The Seven Last Words of Christ" is taken from the scriptures and represents the seven last words that Jesus said on the Cross.
The organist for the occasion will be Fidelia Yoder.
Everyone is invited to this presentation of Dubois' "Seven Last Words of Christ," billed as an outstanding musical event at the First Presbyterian Church.

More Students In Private Schools

WASHINGTON (UP)—The U.S. Office of Education reported today that more and more of the nation's students are attending private schools.
It said the proportion of the nation's elementary and high school pupils enrolled in church-related and non-sectarian private schools has increased steadily since 1900.
If it comes from a Hardware Store, we have it. Lewis Hardware.

Lower Down Payments On Homes Now

By EDWARD COWAN
United Press Staff Correspondent
WASHINGTON (UP)—Starting today, homes financed by FHA-insured loans can be purchased with lower down payments.
This reduction is one of the principal provisions of a \$1,850,000,000 anti-recession housing bill signed into law Tuesday by President Eisenhower. The legislation is designed to speed the building of 200,000 homes this year and to create 800,000 new jobs.
Eisenhower gave his approval to the bill somewhat reluctantly. He conceded it will create new jobs, but said in an unusual message to Congress that it will also saddle the taxpayers with "a wholly unnecessary burden of up to one billion dollars" by forcing the government to assume obligation which rightfully belong to business.
John M. Dickerman, executive director of the National Association of Homebuilders, said the law could be of "tremendous benefit" to moderate-income families unable to buy homes because of tight credit.
Volume Tamed Small
But Harold P. Braman, managing director of the National League of Insured Savings Associations, said "the housing industry suddenly isn't going to sprout wings and save the economy just because the so-called emergency housing bill has been signed."
Braman said the volume of new credit provided by the measure is small in comparison with overall home financing operations.
Here are the major provisions of the legislation:
—Federal Housing Commissioner Norman H. Mason ordered the lower down payment rate on FHA-insured mortgages into effect immediately. The reduction will apply not only to new applications, but to those already on file and not yet processed.
The downpayment requirements in the past have been 3 per cent on the first \$10,000 of value, 15 per cent of the next \$6,000 and 30 per cent of additional value. The new law lifts the first bracket to \$15,000. Thus, on a house valued at \$25,000 the downpayment is trimmed from \$1,000 to \$950.
—The law increases from 4 1/2 to 4 per cent the interest rate on GI housing loans. The Veterans Administration is expected to order the increase into effect late this week.
Federal Mortgage Aid
—Mason also put into effect immediately, and the VA later this week, the law's repeal of all discount controls on FHA and GI mortgages. A mortgage discount is the difference between the amount actually advanced by the lender and the face value of the loan — the amount that must be repaid. Mason said removing discount controls lifts a "serious handicap to the free flow of mortgage funds."
—The law provides \$1,500,000,000 for the Federal National Mortgage Assn. to buy up secondary mortgages under special assistance programs. This agency buys mortgages from private lenders so they will have more cash to make new loans.
—The law extends for two years the VA's direct home loan program to veterans who live in small towns and rural areas where private financing is not easily available. It adds 300 million dollars to VA funds for such loans.
—The law also provides 50 million dollars to FNMA for the purchase of additional military housing mortgages and raises from 4 to 4 1/2 per cent the interest rates on FHA military housing loans.

DEAR ABBY...

By Abigail Van Buren

DEAR ABBY: My brother-in-law has owed me \$500.00 for six years. Since that time he has traded two cars and now he's starting to build a house. This burns me up and my wife doesn't quit nagging me about it. Should I remind him with a good strong hint that he owes me?

OWED

Dear Oued: People don't "forget" a debt of \$500.00. A hint won't do it—tell him in plain words that you'd like him to start paying off. He didn't "hint" when he borrowed it.

DEAR ABBY: So... "A Wife Who Knows" thinks all we secretaries have to do all day is make whoopee with their husbands? We may arrive at the office looking glamorous, but after a hectic day of catering to the boss' whims, putting up with his childish tantrums, placating all the people he's insulted to make him look like a god to his clients, we don't care how we look! As for that vodka bottle in the bottom drawer... I wish I had one. I'd like to break it over my boss' fat head and give him away.

A SECRETARY WHO KNOWS

DEAR ABBY: My brother was married for three years to a woman who was no good. He divorced her in a scandalous court fight (she contested it) when he had pictures to prove she had (and kept) all the way with six different men. My brother never remarried after that because he lost all faith in women. He passed away a single man. Now his wife is calling herself a Widow instead of a divorcee. How can we stop her?

HIS SISTER

Dear Sister: You can't stop her from calling herself whatever she wishes, but I imagine those who know her are still calling her by the name she earned.

DEAR ABBY: I am on the verge of a nervous breakdown because my husband (age 46) refuses to go to High School although he can't read, write, count or even understand the calendar. He thinks because he makes a good salary he doesn't have to know these things but everybody is robbing him blind because of his ignorance. He says

Manners Make Friends

If a friend says something that hurts your feelings, just remember that the remark was probably

not meant the way you took it. If you show that you've been hurt, you'll strain a friendship. And it may be for no good reason except that you are too quick to take offense.

Advertisement "How To Get Rid Of Jesus" Will Be Sermon Topic Tonight

Woodrow Adcock

Holy Week Evangelistic Services are being conducted at the first Methodist Church each night this week through Friday at 7:30. The pastor, Woodrow Adcock, is doing the preaching. The subjects of his sermons are based on the events of the week leading to the Crucifixion of Jesus.

(The subjects are as follows: Wednesday night, "How To Get Rid of Jesus"; Thursday night, "Fellowship With Jesus"; and Friday night, "Jesus Faces Death." The Sacrament of the Lord's Supper will be observed as a part of the service Friday night.

The music and singing for the services will be under the direction of Tom Atkins, Minister of Music. The choir of the church will furnish the special music. The General public is cordially invited to attend these services.

he is too old to learn and would rather watch Western on T. V. than go to Night School. What can I do with this stubborn mule?

DISCOURAGED

Dear Discouraged: He is not too old to learn, but if he thinks he is and is too lazy to try, then let him suffer the consequences.

CONFIDENTIAL to Concerned M.D.: If you are a doctor you know that a psychiatrist is also a physician and would not treat a patient for a mental illness until all the possibilities of a physical illness have been dealt with.

For a personal reply, write to ABBY in care of this paper. Enclose a self-addressed, stamped envelope.

dew tell!

by Doris E. Wilson

Pampa News Women's Editor

Who, in town, was surprised to return to their car, parked near the Western Auto Store on Saturday evening, to find a 50-foot, heavy-duty Trouble Light and cord that did not belong to them lying in the seat?

Well, we can shed a little "light" on the Trouble Light situation. The light was rolled and tied with an electric cord and placed in the wrong car by mistake. It had been borrowed by Mrs. Luellan Overstreet, 911 E. Browning, for use during the recent Business and Professional Women's High rummage sale held in the former Clyde's Pharmacy. In closing up shop on Saturday evening, a friend offered to place the light in Mrs. Overstreet's car. The friend did place it in a car, but not Mrs. Overstreet's. The light had been borrowed from Mrs. Overstreet's son, who will be coming home this week end and she is most anxious to find it before then.

We thought perhaps the surprised recipients might like to know to whom the mistakenly placed light really does belong. Mrs. Overstreet may be contacted during the day at B & B Pharmacy.

It was nice to see Mattie Crowson, president of the Business and Professional Women's Club, presiding at its noon luncheon executive board meeting yesterday noon. She has been a pretty sick gal and is still on the "weak" side.

Old and new presidents of local PTA units were honored yesterday morning at a reception given in Lovett Memorial Library by the PTA City Council. Mrs. R. A. Mack, council president, looked mighty "pert" in a red suit, white sailor hat adorned on the brim with a saucy red flower, while she presided at the meeting. It was a shame that Aaron Meek, who has served in the local school system

The scent of April violets is a welcome one. This girl uses it in the form of after-bath freshener which she can follow up with cologne.

Prolong Beauty Bath With Scents

By ALICIA HART NEA Beauty Editor

Some of us like a nice, hot bath. Some of us prefer a quick, brisk shower. Some like both.

Whatever your choice, that feeling of well-being which comes as you step out of the tub will last longer if you take some steps to prolong it. The best way is through the use of bath preparations that are fresh and flowery.

You start out with a lightly perfumed soap that's gentle. For luxury, you toss a handful of bath crystals in the same scent into the tub. When you've finished with the towel, fluff dusting powder in matching scent over your skin.

To prevent dryness, you'll probably want to use a new after-bath freshener with a lovely violet scent. This is a clear lotion which smooths and softens the skin. It also leaves a fresh fragrance that will cling to your skin for hours.

Ribbons Awarded At County Contests

Gray County Contests for 4-H Team Demonstrations were held Saturday morning in the Southwestern Public Service Rooms. Awards were given on a basis of 100-90, Blue, 89-80, Red; and 70-70, White.

Duplicate Winners Told By PD Club

Pampa Duplicate Bridge Club met Monday evening in St. Matthew's Episcopal Parish Hall, 727 W. Browning, with seven tables playing the Mitchell Movement. Winning in the north-south position were Mmes. Haskell Maguire, H. M. Luna, first; Mmes. Carroll Boutte, Fred Van Shoubrouck, second; Mr. and Mrs. Jim Hendricks. East-west winners were Mmes. Knox Kinard, W. B. Murphy, first; Mmes. Jack Richard and Carl Leiddecker, second; Mmes. Robert Rasmussen and Bill Craig, third.

Wayssides, also, won a red ribbon. With vegetable demonstrations, Misses Nancy Furr and Darlene Coffee, Pampa Waysides; Misses Francine Green and Marilyn McGuire, Pampa Cloverettes, were winners of blue ribbons. Misses Kay Lovell and Judy Garrison, and Sharron Mackie, Hopkins 4-H; Misses Connie Heard were white ribbon winners.

THIS AIN'T HAY, BUD \$990 CASH from S.I.C.

It's no joke when you need a bundle like \$990, and you are exactly \$990 short. Every man jack at S.I.C. knows all about that from his own past troubles with personal shortages. No wonder every one of us is so glad to fix it up so someone else can get the \$990 HE needs—gets it quick, easy and private. And with that great big S.I.C. SMILE thrown in. And look: \$47.71 a month, 24 months, repays that \$990 S.I.C. loan. How about that? Come down and—SOS-SIC

Mrs. Norma Stewart, 1618 Ripley, is reported ill in Worley Hospital. Friends report her condition satisfactory. Girl Scout Camping Committee will meet tonight at 7:30 in Girl Scout Little House, 716 E. Kingsmill, according to Mrs. Tony Smith, chairman. Plans will be made for the clean-up program to be conducted in May at Camp Mel Davis and plans completed for the Tree Planting Ceremony to be held on April 26th.

Mrs. Tony Smith, Jr., of Lordsburg, N.M. is visiting in the home of her parents, Mr. and Mrs. Henry Holtman and with Mr. and Mrs. Tony Smith. Her husband will join her here for a visit later in the week.

Jack W. Prather has returned Gray Commission Invests Funds

In a meeting held yesterday at 10 a.m. in the county court room, the Gray County commissioners approved routine bills and voted to invest an additional \$240,000 of county funds.

This will make a total of \$489,800 invested with the \$243,000 already invested, along with a permanent school fund of \$6,500. The commissioners also noted that county sheriffs' deputies, constables and juvenile officers may designate \$5 per day of their monthly salary as a subsistence allowance under Section 120 of the 1954 Internal Revenue Code. This \$5 per day is also tax free.

15-Year-Man Is Signed Up For Three More

Master Sgt. Robert F. Wilson was sworn in Monday for three more years as Battalion sergeant major of the Headquarters Battery, 474th FA Battalion, Pampa National Guard. He was sworn in by 1st Lieut. V. E. Tarbet Jr., commanding officer of the Battalion. Wilson joined the National Guard in June, 1951. He has been here since 1955.

The National Guard can't be beat for kids just out of High School who want to finish their education," says Wilson, who is a mechanic for Sinclair Oil Company. Entering the Second War in 1943, Wilson spent 17 months and 12 days in Europe. Upon discharge in 1946, he joined the Reserve Corp. Wilson has a wife, Billie Jean, and two girls. Paula is ten and Pamela is five.

Air Force Has Plane Problem

SPokane, Wash. (UP) - Air Force personnel tackled the puzzling problem today of how to return a C-45 cargo plane which made an emergency landing on a little-used highway 23 miles northeast of Boise, Idaho. The wings of the two-engine plane became heavily iced, one propeller quit and one engine caught fire while on a flight from Ogden, Utah, to Spokane Tuesday. The pilot and co-pilot, Capt. Donald Keinholtz and Dalton W. Smith, landed the plane safely on the highway near the old gold-mining town of Idaho City. Both escaped injury.

Center

(Continued From Page 1) "Our Top O' Texas Girl Scout Council has a representative serving on the Youth Center Planning Committee where our knowledge of the interests of youth and experience in working with girls from seven to 17 can be shared in planning an adequate, well-rounded program for the young people of Pampa," Mrs. Kadingo concluded.

COMING AGAIN TO PAMPA!

The world famous Dale Carnegie Course will soon start in Pampa again. Tentative starting schedule will be about April 10th. Anyone interested in learning more about this training in human relations, effective speaking, memory, and leadership training may write to Perry Box DC, care of Pampa Daily News. A representative will call to explain the facts about Dale Carnegie Training. 3 out of 4 persons who joined this class last year received a salary increase within short months after completion. Write today for an appointment. Presented in Pampa by Western Sales Institute, Box 6384, Amarillo, Texas.

Holy Week

Value Of Christian Faith Every Day

EDITOR'S NOTE: This is the third of six Easter meditations in which prominent clergymen discuss the events of each day in the final week of Jesus Christ's earthly ministry. Today's author is the rector of St. John's Episcopal Church, Bethesda, Md.

By THE REV. DR. WILLIAM F. CREIGHTON, Written For The United Press. In the midst of the most eventful week of Christ's life among men, this week of rapid action, comes Wednesday. And it comes with the strange dramatic effect that we experience in unexpected silence. Christ appears on this day not to have gone into the city but to have spent its hours quietly with his friends and disciples in Bethany. The triumphal entry and the cleansing of the temple are behind him. The last supper and the arrest and crucifixion lie ahead.

Few of us would question the real value of Christian faith in dealing with the dramatic crises of our lives. It may be much more important for us to realize God's presence, his being, in the uneventful, unrecorded, days of our lives.

More Important. It may be more important because there are many more of them and they lie for all of us somewhere between the high moments. Ordinary days come in between birth and death, between decision and consequence. What happens on those common days affirms or denies what went before, and shapes the events to come.

This day, then, can say much to us because of its setting and because of its quiet, because it speaks to us more of being than of doing. It reminds us that God acts not only in great world-shaking events but also on ordinary days. Here are all persons on a common day (what did I do last Wednesday?) affirming or denying all that has gone before, and preparing for all that is to come.

Phone Company Pays 1957 Gross Receipts Tax

The Southwestern Bell Telephone Company presented the Pampa tax collector with a check for \$9,758.02 yesterday as payment in full for its gross receipts tax for 1957.

Clyde Dickerson, telephone company manager, said the payment represented an increase of more than \$1,000 over last year's gross receipts tax. "I don't think anyone likes to pay taxes," Dickerson said, "but as we all know they are necessary to pay for the services rendered by the city. I speak for myself as well as the telephone company when I say that we are happy to play a part in paying part of the cost of these services." Dickerson said the gross receipts tax paid by the telephone company amounted to enough money to pay the administration costs of the Pampa Police Department for a month with enough left over to pay the cost of maintaining and operating the City Hall for another month.

Toastmaster Installation Is Held

Pampa Toastmasters held installation of officers at their meeting last night, with their wives and guests in attendance.

Departing from their regular custom of the members participating in table topics, Mrs. W. A. Morgan took charge as topic master and called on six of the women present to stand and discuss various subjects. W. J. Miller, a Toastmaster from Perryton, was the guest speaker. Miller gave a humorous talk and kept the audience in an uproar.

Bob Swanson was installed as president with Horton Russell as educational vice president and W. A. Morgan as administrative vice president. and Jim Nation. Anyone who has paid his poll tax and resides in the Pampa School District is eligible to vote in the School Board Election. In this election one need not own this election one need not own

Municipal Elections Held In Top O' Texas Area Towns

Municipal elections were held Tuesday in Miami, Lefors, McLean, Wheeler and Perryton as well as other Panhandle Cities. In Miami, R. A. Flowers, J. W. Thompson and Newton Cox had no opposition to re-election as aldermen. The 48 qualified voters at the polls gave Flowers 47 votes; Thompson, 46, and Cox, 41.

The vote in McLean was the heaviest in several years. Jess Kemp was returned to office in the City Commission with 76 votes. Returning with him were O. Dell Mantooh with 50 and Amos Page with 61. Eighty-two votes were cast. Thirty-four write-in votes went to Ruel Smith, 25 to Spencer Sitter and two to Evan Sitter.

The voters in Perryton approved the expansion of the city-county airport by a two-to-one vote. On the same ballot they elected Irvin Buchanan and Frank Shaffer to the City Commission and re-elected Mayor Drew Ellis. Defeated in the City Commission vote were Clyde Cofe and Leo Johnson. Cofe was up for re-election. Mayor Ellis met with no opposition in his re-election.

The airport expansion project will involve a city expenditure of \$40,000 and a like outlay by the County for land and runway. The CAA will pay out an additional \$35,000 for the land and an added \$45,000 for the runways.

Why "Good-Time Charlie" Suffers Uneasy Bladder

Uneasy eating or drinking may be a source of mild, but annoying bladder irritation-making you feel restless, tense, and uncomfortable. And if restless nights, with nagging backache, headache or muscular aches and pains due to over-exertion, strain or emotional upset, are adding to your misery—don't wait—try Doan's Pills. Doan's Pills act 3 ways for speedy relief. 1—They have a soothing effect on bladder irritation. 2—A fast pain-relieving action on nagging backache, headache, muscular aches and pains. 3—A wonderfully mild diuretic action that the kidneys, tending to increase the output of the 16 ounces of kidney urine, so, get the same happy relief millions have enjoyed over 60 years. Yes, large, genuine size saves money. Get Doan's Pills today!

Southwestern Life REPORTS...

The accompanying statement of condition and other operating results for 1957 tell of another year of substantial progress by Southwestern Life in serving the insurance and investment needs of the growing Southwest.

55th ANNUAL STATEMENT OF CONDITION DECEMBER 31, 1957. ASSETS: United States Government Bonds \$4,729,504.04; County and Municipal Bonds 31,706,671.44; Public Utility and Corporation Bonds 44,590,025.65; First Mortgage Loans on Real Estate 200,861,332.41; Collateral Loans 8,328,976.54; Home Office Building 1,600,000.00; Preferred Stocks 8,917,259.41; Bank Stocks 7,077,957.00; Other Common Stocks 17,753,556.00; Cash 6,813,650.40; Loans Against Cash Values of Policies 30,089,733.33; Accrued Interest and Miscellaneous Assets 2,292,190.47; Net Premiums to Complete Policy Years 15,402,528.14. TOTAL ASSETS \$418,163,384.83. LIABILITIES: Policy Reserves 335,196,574.61; Premiums and Interest Paid in Advance 3,518,972.77; Reserve for Taxes and Other Liabilities 4,218,578.58; Mandatory Valuation Reserve 9,929,042.48. TOTAL LIABILITIES \$352,863,168.44. Surplus Funds for Protection of Policyowners: Reserve for Contingencies 19,030,216.39; Capital Stock 7,500,000.00; Surplus 22,000,000.00. Total Capital and Surplus Funds 48,530,216.39. TOTAL LIABILITIES AND SURPLUS FUNDS \$418,163,384.83.

During the year assets increased to a total of \$418,163,384. For some years the Company has ranked among the top 5% of all life insurance companies in the United States.

Southwestern Life's resources, consisting for the most part of Policyowners' savings, continue to be an important factor in the economic development of the area served. These funds are invested in the construction or improvement of homes, churches, hospitals, schools, roads, farms, ranches and industrial enterprises, all of which contribute to a high and rising standard of living in the Southwest. More than \$57,000,000 of new such investments were made in 1957.

More Than \$1,615,000,000 Insurance in Force

Total ownership of Southwestern Life Insurance at the end of the year amounted to \$1,615,490,922. The twelve-month gain was the largest ever recorded by the Company. It was the ninth consecutive year in which the Company's agency organization achieved a new production record.

New Record in Policy Benefits Paid

Benefits paid to policyowners and their beneficiaries reached a new calendar-year high of \$25,215,156, and such payments by the Company since it was organized nearly 55 years ago amounted to \$369,832,104.

Southwestern Life INSURANCE COMPANY. JAMES RALPH WOOD, PRESIDENT HOME OFFICE, DALLAS. FAMILY PROTECTION - BUSINESS LIFE INSURANCE - ANNUITIES - PENSION PLANS - GROUP LIFE INSURANCE.

Senators Again Headed For Cellar

Slim Hope In New Regulars

By LEON H. PETERSEN
United Press Sports Editor
ORLANDO, Fla. (UP)—The Washington Senators, who are getting used to finishing third, seem doomed to wind up in the American League cellar again.

Even their manager, Cookie Lavagetto, is so pessimistic that he'll only go so far as to say, "We'll win more games than we did last year." He won't admit it, but he'd settle right now for seventh place.

The only ray of hope Lavagetto sees in the Senators' 1958 outlook is that he plans to start the season with five new regulars and has what appears to be the best rookie pitcher in the Florida spring training camps.

Fronting Newcomer The newcomer is Ralph Lumentli, a 6-2 left-hander whom the Senators signed off the University of Massachusetts campus late last season.

Lumentli was only the third player to whom the Senators ever paid a bonus — the others being third baseman Harmon Killebrew and outfielder Jerard Schoonmaker.

Killebrew isn't much of a glove man, but the 101 runs he batted in for Chattanooga last year while hitting 29 homers, gives Lavagetto hope that he finally will be able to hit major league pitching.

The other new regulars in Lavagetto's scheme of things are centerfielder Albi Pearson, catcher Steve Korcheck, first baseman Norm Zauchin, and second baseman Bob Malkmus.

Lavagetto rates Korcheck the top of his four catchers, the others being veterans Ed Fitzgerald, Clint Courtney and Lou Berberet.

That is Washington's strongest department, and the Senators may collect dividends from it because several clubs, including some in the National League, are after catching help.

Zauchin at First Zauchin will be at first base with the National League castoff, Rocky Bridges at short. Veteran Eddie Yost is pushing Killebrew at third base while Herb-Plew will take over second if Malkmus, a .291 hitter with Wichita, can't make it.

The Senators' brightest star, Roy Sievers, the American League home run and runs batted in king, will be in left field with Jim Lemon in right if he hits.

Otherwise Neil Chrastley, who batted .343 at Indianapolis in 1957, Carlos Paula, up from Minneapolis, where he hit .288, or Whitey Herzog will be given a shot at the job.

Longhorns In Lead Of SWC Baseball

By UNITED PRESS
Texas tightened its grip on the Southwest Conference baseball top spot Tuesday with a 4-2 victory over Baylor on the strength of a three-run streak in the fifth inning.

Second and third place Texas A&M and Southern Methodist clung to their positions Tuesday although SMU lost a closely-fought game to Rice, 3-2. A&M scored 10 runs on 11 hits to beat Texas Christian 10-1, the Horned Frogs' fifth straight loss in conference play.

The conference standings Wednesday were Texas 5-0, A&M 4-1, SMU 3-2, Rice 2-3, Baylor 1-4 and TCU 0-5.

Next Games The next conference games will find A&M at Rice and Baylor at TCU next Tuesday. On Wednesday SMU will travel to Austin to challenge first place Texas.

In last Tuesday's game, Texas took advantage of a Bear error in the fifth and added three singles and a double in the same inning to defeat home-team Baylor.

The Bears had scored an unearned run in the first inning on a single and two Longhorn errors to lead 1-0 until the Longhorns' three-run streak in the fifth.

SPORTS

Jim Bunning

THE BIG SWEEP—Jim Bunning dropped out of the clouds with an authoritative curve last season to win 20 games for the Detroit Tigers with an earned run average of 2.70.

Minoso, Doby May Boost Cleveland

By FRED DOWN
United Press Sports Writer
Those critics of Cleveland Indians General Manager Frank Lane are being drowned out today by the thunder of Minie Minoso's bat.

And they'll cease to exist at all if the newly-acquired Larry Doby pans out for the Indians the way Minoso is. Acquired Dec. 4 in a deal that involved the popular Early Wynn and Al Smith, Minoso is enjoying one of the finest springs of his nine-year career.

All the 34-year-old native of Mantanzas, Cuba, did Tuesday was wallop three homers and a single to drive in eight runs and lead the Tribe to a 14-7 victory over the Chicago Cubs. That outburst topped another terrific showing by Ernie Banks who smacked his 10th and 11th homers of the spring and knocked in five runs for the losers.

Lane was criticized for making both the Minoso and Doby deals but in reuniting sluggers who twice previously have been "roomies" he is trying to "wake up" a city whose attendance last season fell to 720,000.

White Deer Cagers Honored

(Special to The News)
WHITE DEER — Arlen Kaiser and Mary Ann Freeman were honored recently as King and Queen of the White Deer Basketball teams, at a program sponsored by the Student Council in the high school auditorium.

Attendants were A. J. Alford and Nancy McConnell, Don Essary and Joy Kotara, and Courtney White and Lorean Holloway, all seniors. A. J. presented Queen Mary Ann with an arm bouquet of white carnations and a certificate of honor; and Joy presented King Arlen with a carnation boutonniere and a similar certificate.

Rapetine, master of ceremonies, introduced each member of the Bucks and Does basketball teams, naming their positions and classifications.

Schlemeyer, like Abernathy, hurled five-hit ball, and he struck out nine Ovis as Abernathy out down seven Mustangs, but he nevertheless suffered his first league loss through lack of field and bat support.

Jim Smith Ranks As Top Cager

By BILL HENRY
United Press Sports Writer
STUEBENVILLE, Ohio (UP)—He is a small college basketball player who has gained national recognition and acclaim.

He is sought by National Basketball Association teams to play professionally.

He is Jim Smith, 6-6 center on Steubenville's small college national championship team.

Smith led the Barons to a 24-1 record last season and gained the attention of numerous NBA scouts who would like to sign him for their club.

Sought by Knicks According to one college official, the New York Knickerbockers will draft Smith in the first round of the annual player selections.

Smith said the Harlem Globetrotters offered him \$2,000 to make the annual tour with the College All-Stars. However, he said he decided to complete his education.

Hank Kuzma, Smith's coach, has no fears about his big star becoming even a bigger star in the pro ranks.

"Jim is one of the greatest clutch performers that I have ever seen," Kuzma said. "I've seen the best individuals since 1947 play in New York, Philadelphia and Kansas City, and Jim could hold his own in that fast company."

Smith earned his recognition the hard way at a small school with an enrollment slightly over 500.

The college, which is just across the Ohio River from Weirton, W. Va., doesn't have a fieldhouse or gym of its own. The team works out wherever it can on high school floors in the area.

One of the gymnas used to practice in last season, was so poorly lighted the team had to use a white ball.

Bassey Scores KO For Win Over Moreno

By ALEX KAHN
United Press Sports Writer
LOS ANGELES (UP)—Dusky Nigerian featherweight champion Hogan (Kid) Bassey, who stalks an opponent like a tiger, today accepted the plaudits of power-punching Ricardo (Pajarito) Moreno as "the better man" after he scored a third-round knockout over the Mexican challenger.

In the first defense of the title he won last June, Bassey weathered Moreno's bull-like rushes and lashing blows even though they staggered him and then landed a jolting right to the head in the third round to drop Moreno for the full count after 2:35 minutes Tuesday night.

"Bassey proved to me he was the better man," Moreno said as he wept unashamed in his dressing room following a quick ending to the scheduled 15-round title bout.

Masters Golf Tournament To Get Underway Tomorrow

By TOM PRICE
United Press Sports Writer
AUGUSTA Ga., (UP)—The Masters golf tournament, won by relative youngsters the past three years, starts Thursday for the 22nd time with four old timers making perhaps a last grand effort to stave off the new generation.

Jimmy Demaret and Sam Snead, the only three-time winners in Masters history, along with two-time winner and four-time runner-up Ben Hogan and Lloyd Mangrum, holder of the record 18-hole score in Masters play, know this may be it if they are ever going to win the big one again.

Dominant for Six Years For six years, 1949 through 1954, Snead, Demaret and Hogan dominated the Masters scene. Slammin' Sammy winning in 1949, of 67.
Amateur William Hyndman of Philadelphia, a member of the 1937 Walker Cup team, matched Snead's three under par practice round of 69.
The Augusta National golf course, designed by Bobby Jones in 1933 and now the favorite golfing grounds of President Eisenhower, was in top shape for the opening round of match play. A field of about 90 golfers, somewhat less than the 101 that teed off on opening day last year, was shaping up.

But the past three years have been dominated by the younger generation. Cary Middlecoff, the golfing dentist from Memphis, won in 1955, Jackie Burke Jr., in 1956, and Doug Ford was victorious by three strokes over Snead last year.

Snead posted a three under par 69 Tuesday over the 3,650-yard course which most of the pros said played "long" due to heavy recent rains. Hogan had a three over par 75 practice round.

Venturi Five Under Ken Venturi, the California youngster picked by Snead and other veterans as a favorite in the tournament founded by the ailing Bobby Jones, showed Tuesday he intends to live up to his billing. He put together a 33-34 round for a five under par card of 67.

LONDON—Mrs. Heather Riley, winner of a tax-free \$585,421 on a football pool, saying one of the first things she would do is help her polo stricken grandson in Canton, Ohio.

"Now we can go to the states and bring the bairn (Scottish for baby) back to England for treatment. We tried a few years ago but just could not raise the money."

Celtics, Hawks Tangle In Third Game Of Playoff

ST. LOUIS (UP)—The St. Louis Hawks and the Boston Celtics, capable of stirring up a basketball donnybrook whenever they meet, will tangle once more tonight in the third game of their best-of-seven series for the National Basketball Association crown.

The Hawks and Celts, all even after splitting the first two games in Boston, worked out Tuesday, the Hawks in the afternoon, the Celtics at night.

Alex Hannum, the Hawks' outspoken coach, has no love for the Celtics, and there may be sideline fireworks when the teams come to grips once more.

Hannum, described by Boston owner Walter Brown as "a basketball accident," was well satisfied with the progress of the series thus far. "If Boston is such a tremendous team, we're doing real well by winning one game on its home court," he said.

22nd time with four old timers making perhaps a last grand effort to stave off the new generation.

Jimmy Demaret and Sam Snead, the only three-time winners in Masters history, along with two-time winner and four-time runner-up Ben Hogan and Lloyd Mangrum, holder of the record 18-hole score in Masters play, know this may be it if they are ever going to win the big one again.

For six years, 1949 through 1954, Snead, Demaret and Hogan dominated the Masters scene. Slammin' Sammy winning in 1949, of 67.

Amateur William Hyndman of Philadelphia, a member of the 1937 Walker Cup team, matched Snead's three under par practice round of 69.

The Augusta National golf course, designed by Bobby Jones in 1933 and now the favorite golfing grounds of President Eisenhower, was in top shape for the opening round of match play. A field of about 90 golfers, somewhat less than the 101 that teed off on opening day last year, was shaping up.

Bassey Scores KO For Win Over Moreno

By ALEX KAHN
United Press Sports Writer
LOS ANGELES (UP)—Dusky Nigerian featherweight champion Hogan (Kid) Bassey, who stalks an opponent like a tiger, today accepted the plaudits of power-punching Ricardo (Pajarito) Moreno as "the better man" after he scored a third-round knockout over the Mexican challenger.

In the first defense of the title he won last June, Bassey weathered Moreno's bull-like rushes and lashing blows even though they staggered him and then landed a jolting right to the head in the third round to drop Moreno for the full count after 2:35 minutes Tuesday night.

"Bassey proved to me he was the better man," Moreno said as he wept unashamed in his dressing room following a quick ending to the scheduled 15-round title bout.

Masters Golf Tournament To Get Underway Tomorrow

By TOM PRICE
United Press Sports Writer
AUGUSTA Ga., (UP)—The Masters golf tournament, won by relative youngsters the past three years, starts Thursday for the 22nd time with four old timers making perhaps a last grand effort to stave off the new generation.

Jimmy Demaret and Sam Snead, the only three-time winners in Masters history, along with two-time winner and four-time runner-up Ben Hogan and Lloyd Mangrum, holder of the record 18-hole score in Masters play, know this may be it if they are ever going to win the big one again.

For six years, 1949 through 1954, Snead, Demaret and Hogan dominated the Masters scene. Slammin' Sammy winning in 1949, of 67.

Amateur William Hyndman of Philadelphia, a member of the 1937 Walker Cup team, matched Snead's three under par practice round of 69.

The Augusta National golf course, designed by Bobby Jones in 1933 and now the favorite golfing grounds of President Eisenhower, was in top shape for the opening round of match play. A field of about 90 golfers, somewhat less than the 101 that teed off on opening day last year, was shaping up.

But the past three years have been dominated by the younger generation. Cary Middlecoff, the golfing dentist from Memphis, won in 1955, Jackie Burke Jr., in 1956, and Doug Ford was victorious by three strokes over Snead last year.

Snead posted a three under par 69 Tuesday over the 3,650-yard course which most of the pros said played "long" due to heavy recent rains. Hogan had a three over par 75 practice round.

Venturi Five Under Ken Venturi, the California youngster picked by Snead and other veterans as a favorite in the tournament founded by the ailing Bobby Jones, showed Tuesday he intends to live up to his billing. He put together a 33-34 round for a five under par card of 67.

LONDON—Mrs. Heather Riley, winner of a tax-free \$585,421 on a football pool, saying one of the first things she would do is help her polo stricken grandson in Canton, Ohio.

"Now we can go to the states and bring the bairn (Scottish for baby) back to England for treatment. We tried a few years ago but just could not raise the money."

Celtics, Hawks Tangle In Third Game Of Playoff

ST. LOUIS (UP)—The St. Louis Hawks and the Boston Celtics, capable of stirring up a basketball donnybrook whenever they meet, will tangle once more tonight in the third game of their best-of-seven series for the National Basketball Association crown.

The Hawks and Celts, all even after splitting the first two games in Boston, worked out Tuesday, the Hawks in the afternoon, the Celtics at night.

Alex Hannum, the Hawks' outspoken coach, has no love for the Celtics, and there may be sideline fireworks when the teams come to grips once more.

Hannum, described by Boston owner Walter Brown as "a basketball accident," was well satisfied with the progress of the series thus far. "If Boston is such a tremendous team, we're doing real well by winning one game on its home court," he said.

By HENRY MCLEMORE that he was telling the truth before I would buy them for Mary. Well, he was telling the truth all right...

Not all foreign antique dealers are frauds! Not all foreign antique dealers are liars, cheats, and frauds. Take the man who sold us six lion stools and ladder from the kitchen chairs in Coblenz, Germany...

BETTER JOBS Free Enterprise Vs. Socialism A Tale of Two Countries

The March 21 issue of "U.S. News & World Report" carries an article reprinted from the March, 1958, "Monthly Bank Letter" issued by the First National City Bank of New York...

It is a splendid object lesson that people in the United States should profit by the experience of others rather than having to go through the terrible hardships that eventually result from state socialism...

"Capitalism, according to its opponents, exploits the many to pile up wealth and income for the few. Socialism, according to its proponents, redistributes the wealth and income among the masses of the population and brings about 'social justice and equality'..."

"Government, meanwhile, accumulates more and more dependents, removed from the labor force. The growing tax burdens shift inexorably toward the same masses whom the socialist state is intended to help..."

Unions of all sizes have ganged up on Goldwater with billions at their command because he has made this issue his own. He has priority in that issue over Senator Knowland, the California Republican, who has now adopted it for his gubernatorial campaign...

"Industrial production in Germany in 1948-57 soared 254 per cent while in the U. K. (1946-57) it went up only 70 per cent. Per capita output of goods and services (1949-57), in constant prices, rose 115 per cent in Germany as against 15 per cent in the U. K..."

"The decision to adopt the Marktwirtschaft — the free-market economy — has paid off handsomely. West Germany, phoenix-like, has risen from the rubble of World War II to economic and financial pre-eminence in Western Europe..."

"This particular 'miracle' lends itself to statistical measurement — as can be seen in the charts on page 101."

"West German workers' pay is that's all. He didn't make a ny claims regarding their strength. Her-second suggestion was that I fix them. That one we're wrestling with right now."

I suppose I could finally fix the chair if I put my job, resigned from my club, and withdrew from circulation completely for two or three years. But I'd rather sit on campstools than do that — or use six or eight shooting sticks around the table when guests come in...

Fair Enough Kohler Probe Revealed Who Is On Who's Side

By WESTBROOKE PEGLER NEW YORK — The McClellan Committee's hesitant investigation of horrible crimes in the long siege of the Kohler factories in Wisconsin has produced an unexpected profit in the defiant declarations of six Democratic Senators who upheld Reuther as a worthy citizen...

The letter has been minimized as an unwise outburst of a young idealist, but Reuther's later conduct has adhered to the program that he rapturously admired except in areas where perverted regional American governments have cooperated with him instead of maintaining the Constitution...

The Senators who rallied to Reuther's help on the floor of the upper house all performed according to their known political possessions. They are McNamara, of Michigan, who was elected by the power of union money...

Unions of all sizes have ganged up on Goldwater with billions at their command because he has made this issue his own. He has priority in that issue over Senator Knowland, the California Republican, who has now adopted it for his gubernatorial campaign...

"The method was absolutely the same as Hitler's Brown Shirts were using about the same time. These criminals were riding down government and a studied military revolutionary plan was obvious..."

All this bore out the intentions that the Lovestones-Communists had defiantly published right there in Detroit about that time. "Yet, so far down the road have we gone since Roosevelt took power in 1933 that his widow brazenly consorts with Reuther, and six members of the Senate attack a patriotic member — in his absence for illness, by the way — for trying to 'cripple and embarrass'..."

(To be continued) Walter Reuther.

'How Do You Rate?' Is Most Fascinating New Quiz Show

By WILLIAM EWALD
United Press Staff Correspondent

NEW YORK (UP) — "How Do You Rate?" a new CBS-TV morning quiz, is the most fascinating show to bow in this season.

The half-hour offering, which made its debut Monday, is not concerned with the total yardage of dental floss consumed by male Peruvians in 1932 or with the lifetime batting average of Kiki Cuyler or with the names of all French premiers since last week.

Instead, the questions on this daily quiz are based on the what-ifs that make up aptitude tests. Thus, competing guests were asked, among other things, to build specified patterns with blocks (design test); to count the number of times the figures "62" appeared within a series of numbers while a phonograph played rock and roll (distraction test) and to buckle a buckle, button a button, snap a snap and lace a shoe (dexterity test).

There were other questions based on sense of direction, mechanical ability, logical reasoning, musical bent, and judgment of time, all of them posers that called for little specialized knowledge.

The show, emceed painlessly by John Reddy, had its faults, but they were the sort of faults that can be shaken out in time. The contestants on the opener were a pretty stiff lot and the losers were knocked off much too quickly.

Too, there was a lot of bosh about the significance of each question. Thus, a successful negotiation of a blocks test meant, we were told, that "you can probably furnish a house or match your clothes." Or, answering a comprehension question about trick relationships within a family meant that "people can't pull the wool over your eyes."

All this aside, I would say the most satisfying thing about "How Do You Rate?" is its lack of interest in fact-type questions. All of our other quiz shows seem to have a mania for collecting contestants strong on incidental data.

As a result, I'm sure many TV viewers have reached the point where they are now confusing an educated man with a data-obsessed one.

I'd class "How Do You Rate?" not only as an entertaining show,

On The Business Scene

By UNITED PRESS
Labor Secretary James P. Mitchell said the administration will decide this month whether to propose a tax cut. Mid-March unemployment figures, expected to be announced in a week, are an economic indicator expected to play a major part in any decision.

The House Banking Committee approved a proposal designed to make an additional three billion dollars available for lending by big New York and Chicago banks. The committee approved an amendment to abolish the separate category of general reserve city banks which are now required to keep 10 per cent of their deposits on reserve.

Montgomery Ward & Co. and Aiden's Inc., two big mail order firms, said their spring catalogs show price cuts of roughly 13 per cent. Bennett S. Chapple Jr., administrative vice president of U. S. Steel Corp., said at a news conference the aluminum price cut last week has put steel at a "disadvantage" but declined to comment on whether steel companies also would lower prices.

General Motors Corp. Frigidaire division and Westinghouse Electric Corp. announced further production cutbacks and layoffs. Frigidaire is furloughing 1,100 workers and some salaried employees at its Dayton, Ohio, plant. Westinghouse will close its Columbus, Ohio, plant next week, idling 4,000.

Ford Has Car With No Wheels

DETROIT (UP) — Ford Motor Co. chose April Fool's Day to unveil a car without wheels, but they said it's no joke.

Andrew H. Kucher, Ford vice president of engineering and research, showed a new version of the "Glideair," a vehicle designed to travel on a cushion of air at speeds up to 600 miles an hour.

Kucher and his engineering staff demonstrated a three-foot model of a "Glideair" car, and had a "Glideair" scooter for newsmen to hide along a laboratory corridor.

The vehicle demonstrated a ride on what Kucher called "levapads." Tiny jets of air which can be produced either by a gas turbine or turbojet engine hold the vehicle just above the ground. It is guided by a monorail either above or below.

Kucher said the "Glideair" vehicles offer man a breakthrough of the ground-speed barrier. He said for long distance, sustained speeds up to 600 miles an hour, do four shows, the others will divide the remaining six among them.

PAMPA TEXAS, WEDNESDAY APRIL 2, 1958

Texas Industrial Week Section

Industrial Future For Pampa Is Bright

(Editor's Note: The following information was taken from a report prepared for the Pampa Chamber of Commerce and Board of City Development and The Pampa News. The report and projected look at Pampa and Gray County was prepared by Burt C. Blanton, consulting industrial engineer and business economist.)

number of inhabitants residing in the City of Pampa, for specified years, should approximate 27,381 in the year of 1960; 37,598 in the year of 1970; and 47,796 in the year of 1980.

survey, which comprise agricultural-extractive and chemurgic types, the opinion is rendered that further development and expansion in agriculture in the Pampa area will be synchronized with industrial development.

era, 1955 to 1980, in so far as current rail and motor transport are concerned, but the utilization of aircraft of various types, especially helicopters, will materially increase. Therefore, aside from expansion in trafficways to accommodate vehicular transport, added facilities will be necessary to adequately provide for air service.

number of retail enterprises in the city will be substantially augmented by the advent of each of the respective oncoming decades.

"On the same basis of projection, the volume of retail sales in Gray County will show substantial increases, as cited in this report, for the oncoming era . . .

"In the year of 1960, the volume of wholesale sales in the city should approximate \$31,560,000; the year of 1970 volume should approximate \$45,784,000; and, in the year of 1980, sales should approximate \$63,798,000. On this hypothesis, it is evident that the current number of wholesale enterprises in the city will be substantially augmented by the advent of each of the respective oncoming decades.

"In the year of 1960, the volume of service business in the city should approximate \$4,189,000; in the year of 1970, service business should approximate \$6,178,000; and in the year of 1980, service business should approximate \$8,941,000 . . . it is evident that the current number of service business enterprises in the city will be substantially augmented by the advent of the respective oncoming decades.

"(6) Expansion in Industry: (See INDUSTRIAL, Page 5)

POTENTIAL NEW TOP O' TEXAS INDUSTRIES TAKEN NOTE!
At least one industrial engineer and business economist sees a bright future for Pampa and Gray County.

He is Burt C. Blanton, who took a survey and projected look at the city and county as to its agricultural, financial, commercial, industrial and economic aspects.

A part of his report is as printed below:

"In the scheme of things to come in Pampa and within the confines of Gray County, it is obvious that cognizance must be given to all basic constituents which will provide the components entering into the projection depicting this economic entity and its status as of 1960, 1970 and 1980.

"Therefore, the projection, with forecasts and analyses, is concisely delineated and portrayed herein:

"(1) Expansion of City Area: The present urban area development of the city of Pampa, approximates 4.7 square miles. The opinion is rendered, predicated on the anticipated growth and development of the City of Pampa, that expansion of the city's area by the advent of the year of 1960 will approximate 6.1 square miles; by the advent of the year of 1970, this expansion will approximate 7.7 square miles; and, by the advent of the year of 1980, this expansion will approximate 9.5 square miles.

"(2) The opinion is rendered that the population growth of the City of Pampa will remain on a consistent basis over the period of the next quarter century from 1955 to 1980, inclusive. Based on conservative projections, the total

"The deduction is also made that the rate of growth in population in Gray County will continue on a consistent basis during the next quarter century from 1955 to 1980, inclusive. Based on conservative projections, the total number of inhabitants residing within the confines of Gray County, for specified years, should approximate 35,581 in the year of 1960; 45,786 in the year of 1970; and, 47,894 in the year of 1980.

"(3) Expansion in Agriculture: "Predicated on the new types of industries as recommended in this

"The objective of marked industrial expansion in the Pampa area, during the oncoming era from 1955 to 1980, inclusive, is absolutely essential to assure a well-balanced economic entity.

"(4) Expansion in Transportation: "The overall transportation facilities in the City of Pampa will not, in all probability, show great expansion during the oncoming

"(5) Expansion in Retail and Wholesale Trade and Service Business: "Predicated on conservative projections relating to the growth and development of the City of Pampa and environs during the oncoming era, 1955 to 1980, it is evident that there will be marked expansion in retail and wholesale trade and service business.

"In the year of 1960, the volume of retail sales in the city should approximate \$47,482,000; in the year of 1970, sales should approximate \$68,099,000; and, in the year of 1980, sales should approximate \$90,747,000. On this hypothesis, it is evident that the current

A Glimpse At Our Area

Pampa, seat of Gray County, Texas, is the wholesale, retail and financial center of a metropolitan area of approximately 450 square miles and a retail trade territory consisting of twenty counties in Texas and Oklahoma. Its economy is a blend of agriculture, ranching, oil, gas and allied industries and businesses. The climate is temperate with a mean annual temperature of 56.9 degrees and average rainfall of 20.99 inches per year at an elevation of 3,218 feet above sea level.

Financial institutions include two strong banks with combined deposits of \$25,470,581; combined resources of \$28,410,186 and a savings and loan association with deposits of \$13,670,121.

And Its Natural Resources

Gray County is located on the Panhandle Plains of Texas and has fertile soil ranging from dark chocolate loam to deep sands. Approximately one-third of the County's area of 937 square miles is located on the level high plains, the remainder being rolling and broken, thereby creating diversification in agriculture.

The County has an abundant supply of underground water and 90% of the land is devoted to farming and ranching.

Oil, gas, petro-chemicals, and related products and industries are of primary importance in the County, which is one of the State's largest producers of natural gas. Agriculture is second and principal crops in order of their importance are wheat—grain sorghums, cotton, hay, oats, barley, corn, truck crops and fruits. Crop values in the Pampa trade territory according to 1950 figures of the U. S. Census of agriculture were \$125,053,843. Livestock values, from the same source, totaled \$77,673,990. The rolling and broken areas of the County are devoted to ranching with fine Hereford cattle predominating. The livestock industry is very important to the economy with the raising and fattening of cattle for market, as well as dairy cows, horses, hogs and poultry. A large percentage of the cattle and hogs produced in the territory are processed in the City of Pampa.

Top o' Texas 'Black Gold' Important

Industrial Development Tied Closely With Oil Production

The development of industry in Gray County is closely tied with the production of "black gold."

Before the discovery of oil in Gray County, the towns of Pampa, Letors and McLean, like so many other towns in the Panhandle, were quiet, dreamy little towns depending upon farming and ranching for the economy of the county.

With the coming of the oil business in the 1920's the picture changed. At first the change was more evident, because it was new to the area, and like anything that is new there is a novelty.

As more wells were drilled the novelty wore off but the effects of the discovery of oil have become an integral part of the way of life in this area and other industries have developed because of oil.

It was in 1924, before most of the residents of this area even heard of Pampa that the first oil well was drilled in Gray County. This well, located on the Bowers Lease some 12 miles south of Pampa, was drilled by the Wilcox Oil Company.

Two years before, the first gas well had been discovered in Gray County by Dick Dulaney for the

Texas Company on the banks of the river about 15 miles south of Pampa.

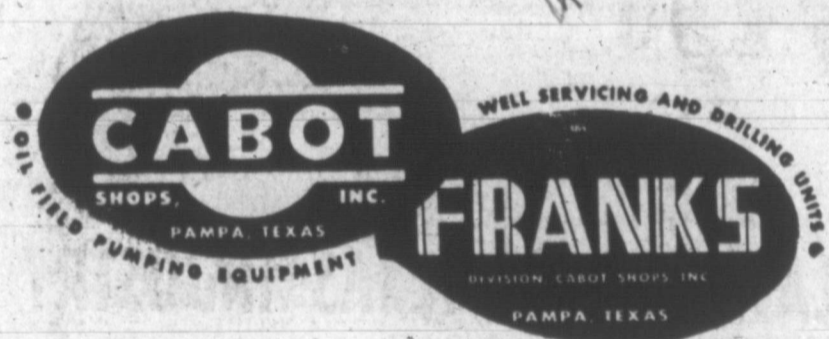

With the successful completion of the well on the Bowers Lease in 1924 the oil industry began in the county and with it came the boom. Drilling of wells throughout the county started in earnest and by 1926 the oil industry was firmly planted in Gray County. The boom was over years ago, but the drilling business has never slowed down and the oil industry is still expanding.

Gray County was a bit behind in 1930 building permits were issued, valued at \$1,040,463; 1931, \$157,475; 1932, \$40,435; 1933, \$136,320; 1934, \$108,600; 1935, \$208,444; 1936, \$507,187; 1937, \$408,850; 1938, \$507,187. (See BUILDING, Page 2)

Building Permits Increase

The value of building permits issued in Pampa for 1937, shows an increase of \$991,127 over the previous year. Permits valued at \$6,604,984 were issued last year and permits totaling \$5,813,837 for 1956. Building values have shown a steady increase since 1955.

In 1930 building permits were issued, valued at \$1,040,463; 1931, \$157,475; 1932, \$40,435; 1933, \$136,320; 1934, \$108,600; 1935, \$208,444; 1936, \$507,187; 1937, \$408,850; 1938, \$507,187. (See BUILDING, Page 2)

TOP O' TEXAS WHEAT FIELD

The farm industry is another basic industry of the Top o' Texas. Most farms in the area are devoted primarily to the growing of wheat. There is some irrigation but the major part of the farming is dry-land. Annually many car-loads of grain are shipped from this area to larger markets. The above photo is of a typical wheat field when many think it is the most beautiful, just before harvest.

Firm Manufacturer Of Concrete Pipe

Concrete pipe lines in Kansas, Oklahoma, New Mexico and Texas are the work of the Arey Concrete Pipe Company, across from the Pampa Country Club.

In its own plant the firm reaches a production of 335,000 pipe feet a year and lays the same amount. At present twenty men divided between two pipe laying gangs are at work on their way to projects in Gray, Carson, Armstrong, Hanford, Hartley, Roberts, Ochiltree and Dalhart Counties. Some more pipe is going in near Guymon, Okla.

Arey Concrete Pipe is used chiefly for irrigation and sewer purposes.

Martin Nesselroad, plant foreman, oversees the making of all pipe. With his thirteen workers he molds concrete joints with a diameter of anywhere from 10 to 15 inches. However, most of the concrete usually goes into 12 inch pipe.

The pipe is put under steam from 10 to 12 hours and then set out in the yard for two weeks to dry. Rain has little effect on Nesselroad's production as, if he has to, he can dry pipe in the shed. However, the field superintendents see a lot less pipe laid when there's mud.

The biggest innovation for Nesselroad is the purchase of cement in carload lots and the elimination of paper sacks. The cement comes in from Fort Worth and Dallas at the rate of a couple carloads a week and is carried by conveyors to the chute, all ready for the mixing bowl.

When Owner Earnest Arey acquired the site of the old Danciger Plant in 1955, Nesselroad came in to help set up operations.

Operating separately from the Pipe Company, the Arey Construction Company lays steel oil and gas lines for companies up and down the Panhandle. Between them the two construction gangs have from 30 to 40 men. Steel pipe sizes begin at 2 inches and go up to 28 inches in diameter.

As well as laying steel pipe that is made elsewhere, the Construction Company maintains its own warehouse and repair shop as a service to the gas companies.

Examples of Construction equipment are water pumps, dope and

cleaning machines, tractors, bulldozers, ditching machines and a complete fleet of pipeline trucks equipped with low field truck beds. A mobile field office and a warehouse move with the two construction crews.

BUILDING

(Continued From Page 1)
\$479,800; 1939, \$261,725; and 1940, \$718,576.

Building permits for 1941 had a valuation of \$318,715; 1942, \$156,850; 1943, \$436,395; 1944, \$33,998; 45, \$781,825; 1946, \$1,252,615; 1947, \$727,265; 1948, \$2,380,286; 1949, \$3,258,874.

For the 1950's building permits were valued at \$563,584 in 1950, \$2,693,040 in 1951, \$5,301,791 in 1952, \$2,287,187 in 1953, \$2,751,226 in 1954 and \$4,345,290 in 1955.

INDUSTRIAL

(Continued From Page 1)

The expansion in manufacturing and processing industries in the City of Pampa and environs during the oncoming era, 1955 to 1980, should prove substantial in view of the potentiality of the establishment of a number of new types of industries which are logical for location in the area to serve the expanding markets in this geographical section of Texas and the Southwest states.

"The value added by manufacturing and processing in industries located in the City of Pampa and environs, conservatively estimated for the year of 1955 is approximately \$4,392,770. Based on the anticipated industrial expansion in the community, the value added by manufacturing and processing in the year of 1980, should approximate \$5,926,880; and, in the year of 1980, value added should approximate \$14,292,750.

"It is obvious that the anticipated growth of the City of Pampa and environs, during the oncoming era from 1955 to 1980, inclusive, will result in substantial gains in earned income from all gainful occupations of the inhabitants, together with effective purchasing power or buying income.

"Total earned income from all gainful occupations of the in-

habitants residing in the City of Pampa for the year of 1955 is conservatively estimated at approximately \$32,347,760. Projections, predicated on population growth, indicates earned income in the year of 1960 will approximate \$40,250,070; in the year of 1970, earned income will approximate \$56,021,020; and, in the year of 1980, earned income will approximate \$72,171,960. On a comparable basis, as cited in this report, the effective purchasing power or buying income of inhabitants residing in the City of Pampa and environs will, likewise, show consistent gains. The foregoing indicated gains in total earned income and effective purchasing power or buying income, will likewise, prove true in Gray County.

"(8) Expansion in Real Estate Development:

"Predicated on the anticipated growth in the City of Pampa and environs, the opinion is rendered that the urban area development will probably double in size on or before the advent of the year of 1980. On this hypothesis, it is evident that there will be marked gains in real-estate investments in all major classifications, value of building permits issued, total assessed or taxable valuations of all property, and indicated true value of all property.

"(9) Future Business Activity:

GASOLINE REFINERY

Gasoline refineries are a common sight throughout the Top O' Texas. Many refineries, such as the one pictured above, dot the landscape around Pampa, reflecting an active oil industry. Oil is important to the Top O' Texas and efforts are continually being made to develop and produce better service on the part of participants.

"The composite index of Pampa's business activity should continue to rise on a consistent annual basis to the advent of the year of 1980, barring the contingency of atomic war or other unforeseen economic transitions.

"In the age of nuclear-electronics, when development of atomic power and electronics have attained maturity, producing a whole new way of life by the advent of the year of 1970, the level of Pampa's business activity, as indicated, should be approximately 121.3 per cent above that for the year of 1955.

"(10) Potentialities of the Area: "The City of Pampa and Gray County occupy a strategic geographical position for the location of a number of types of new manufacturing and processing enterprises in view of the stupendous inland consuming markets comprising the State of Texas and the Southwest states.

With its complement of manufacturing facilities, embracing adequate and economical power, fuel, labor, raw materials, and transportation, this area offers to industry all of the requisites of successful development and expansion. Furthermore, the area is most desirable for the location of new industries, due to these essential conditions: desirable living conditions and conveniences for industrial workers and their families in such specific and important factors as education, culture and recreation.

"The City of Pampa is replete with the fundamentals of location and the factors determining the desirability of a metropolitan area as a logical site for industrial enterprises, wholesale and distributing firms, especially in view of the adequate and efficient type of native labor available and the prevailing social relations, environment and type of citizenship.

"The City of Pampa is a modern and progressive city. It has shown marked development and growth during the past decade. Therefore, it is safe to assume the city's growth as inherent and permanent for these specific reasons: (A) the age levels are low; (B) a large number of families are newly organized and, as a consequence, many children are below school age; (C) the majority of the inhabitants are native white, this being likewise true of the entire population of the region; (D) the average wage earner is young; and, (E) the inhabitants within the area are in relatively good pecuniary circumstances due to their fortitude and progressiveness.

"Specific groups of businesses which may be anticipated to prosper in the City of Pampa and within the confines of Gray County during the oncoming era will include: accounting; advertising; agricultural implements and other farm equipment; automotive; baking and related food products; banking and finance; building con-

Oil Recovery Is Purpose Of Firm

As the result of a study made some 14 years ago on the part of all operators in the Panhandle to improve the oil production of their properties, the West Pampa Re-pressuring Association was formed to conduct a "secondary" oil recovery program whereby high pressure gas was returned to the oil reservoir through gas injection wells.

The Association made agreements with the Cities Service Oil Company and the Skelly Oil Company to build two compressor stations that would furnish gas at 800 pounds per square inch pressure to the 182 gas injection wells located uniformly throughout the oil field. A gas distributing system was built to transport the gas from the compressor plants to the injection wells.

In May of 1945, Fred Neslage was moved to the area to supervise the construction of the field distribution system and the compressor plants. On March of 1946, gas injection operations were commenced on the largest dolomite repressuring project in the world.

At the present time, the West Pampa Repressuring Project covers an area of approximately 12,000 acres with 872 producing oil wells and 162 gas injection wells.

In Carson and Hutchinson Counties is a second repressuring operation known as the Watkins Re-pressuring Project. The project includes an area of over 13,400 acres with 1,081 producing oil wells and 154 gas injection wells. Both projects are under the supervision of the West Pampa Repressuring Association office.

The two projects combined total approximately 25,000 acres, 2000 producing wells and 312 gas injection wells. A total of 40 million cubic feet of gas per day is injected into the reservoir in the production from the combined areas is approximately 16,000 barrels of which it is estimated that approximately one half is due to the repressuring program and remedial work. Since operations started 11 years ago in the West Pampa project and six years ago in the Watkins project, a total of 51 million barrels of oil have been produced and of this total 16.2 million barrels is due to the injection program. The two projects combined have injected a total of 110 billion cubic feet of gas since they were commenced.

The purpose of the gas injection program is to return high pressure pressure gas to the oil reservoir. This gas will then pass through the oil pay section causing oil that is in the formation to move to the producing wells. Under original reservoir conditions there was only sufficient energy in the oil formation to cause approximately 20 to 25 per cent of the oil to be recovered from the oil formation.

By injecting the high pressure gas into the reservoir it will be possible to recover an additional 15 to 25 per cent of this oil which will prolong the economic life of the field for many years to come and enable the leases to produce millions of barrels of oil that would otherwise be left in the oil formation. In addition to making it impossible to obtain this additional oil it also makes it possible for gasoline plants in the area to op-

eration at full capacity, thereby providing jobs for both oil and gasoline plant employees. It is impossible to put a dollar value on the total operation but it will help sustain the Panhandle Field in the category of a major oil field for many years to come. The importance of the West Pampa and Watkins Repressuring Projects on the economy of the Panhandle area can be more fully appreciated when one realizes that over 2280 of the 8500 oil wells in the Panhandle are included in these two repressuring projects which will greatly increase the life of the wells in addition to enabling the operators to produce oil that would otherwise never be produced. The millions of barrels of oil, gasoline propane and butane, to be recovered due to the injection program will provide employment to hundreds of oil field workers and help sustain the economy of the Panhandle.

Milling Firm Is Important

A small business that means a lot to the economy of the Top O' Texas area is the Whitener Milling Company, located at 625 S. West. The firm has been in operation since October 1955 and was known as the Lawrence and Whitener Milling Company until the first of this year when Herbert M. Whitener bought out the interest owned by J. M. Lawrence.

The firm is still listed as the Lawrence and Whitener Milling Company in the phone directory and other advertising, but Whitener reported that the name would be changed as soon as possible.

The firm is strictly a manufacturing plant, Whitener said. The raw materials are processed into finished products of feed for livestock, hogs and poultry.

The firm has three employees, in addition to Whitener, and has a capacity of 40 tons of finished feed per day.

Machinery used in the processing of the feed includes two two-ton feed mixers, a pellet mill, a machine that sacks the feed and molasses mixer, a steam generator and a cooling system.

DEVELOPMENT

(Continued From Page 1)
the drilling of the first wells in the Panhandle, but it wasn't long in catching up after operations started and today this county ranks as the top producer in the Panhandle.

The first oil well in the Panhandle was drilled in 1922-23 on the Burnett Ranch in Hutchinson County by the Texas Company. The first gas well was drilled on the Masterson Ranch, north of Amarillo, in 1918.

In 1925 and 1926 the excitement of oil in the county had reached a fever pitch and the influx of the oilmen was felt in Gray County. Within a few short months rigs were rushed into the Top o' Texas and, said an old-time oil man, old in relation to the oil industry, the rigs were moved in so fast and furious that "the strings of tools were almost working on top of one another."

New industry had taken over. Hundreds of new faces were crowding into the county to work in the oil fields, to build and operate the early gasoline and carbon black plants, and to operate the subsidiary businesses. A new well was built in Pampa later, local businessmen that had been here before the boom saw incomes start a dizzy climb and it wasn't very long before rents and property values started the climb to catch up.

Residents could see and feel the sudden pulsation of new life. A new era had been born in the county. The county which, at the time had been formally organized less than 25 years, was witnessing a rebirth. In the early days of the oil business, it was not like it is now. The rigs were built out of timber by special crews. The rigs were not moved from one well site to another and the wooden rigs were usually left when the well was completed.

The drilling was accomplished by the use of cable tools, instead of the modern rotary equipment. The bit was lifted by the steel cable and allowed to fall back into the hole. Old time drillers use to check the progress of the drilling by feeling of the cable and some of the old-time drillers swear that the vibrations on the cable were sufficient to tell them of any trouble.

In the early days the oil men did not have the modern testing equipment to show them the various formations and when they hit the best producing formation. An example of this was a well drilled in Hutchinson County in 1922 by the Dixon Creek Oil Company. When first drilled the well produced 3,000 barrels. This particular well helped to start the boom in that county and the company went back the next year, drilled only two feet and had a 10,000-barrel producer that rocketed the Panhandle area into national oil prominence.

Extensive development in Gray County did not come till June 12, 1926, when a 700-barrel flowing

well was drilled on the Combs-Worley Ranch. Another early well was Cities Service No. 1 Heitholt, completed in July of 1925, but for only 15 barrels in dolomite.

One of the favorite pastimes of residents of the area was to watch the drilling operations of the No. 1 Worley Reynolds. This well sits in a hollow, with slight hills rising around it, and people who lived here at that time say it was a popular Sunday pastime to travel out to the well and watch it being drilled. Spectators from town would sit around the edge of the natural amphitheater and watch drilling operations below.

One of the earliest wells drilled in Gray County was the old Purple Sage test drilled in 1922. The venture was drilled about four miles northwest of Alanreed.

One of the most expensive wells from a point of wasted resources was the Stone-Tipton No. 1 McConnell. Many local veteran oilmen still believe that had the well been drilled at least 40 feet deeper, Pampa and not Borger might have gotten the biggest part of the boom.

One of the biggest wells in the county, and in the Panhandle, was the Taconian No. 1 Sullivan which was drilled two miles southwest of Pampa in 1930 and produced 20,000 barrels of oil. This well was later sold for \$500,000.

The well that holds the record for production in Gray County, and offsets the north half of the Phillips-Jackson lease, is the Texas Company's No. 1 Bowers, eight miles southeast of Pampa. This

Frustrated Safecracker

SHREVEPORT, La. (UP)—Pure frustration has turned an unidentified safecracker from his life of crime. Or so he says.

After making rather a mess of his attempt to enter a safe at the First Methodist Church here, the thief seated himself at a typewriter and wrote:

"I swear I will never steal again. After working for about four hours I finally lighted a match to see what was doing and saw the tumbler off I can't work. God has taught me a lesson."

The safe combination is printed in plain view of the door.

Inmates Paint Jail Pink

LAMESA, Tex. (UP)—Spring has sprung, the grass is ris and the town of Lamesa now has the only pink jail in the state—maybe in the world.

Police Chief Leo Box said two inmates volunteered to paint the local lockup and the only can of paint they could find was pink. He didn't say what shade.

well has produced well over 2,000,000 barrels and is still producing.

There can be little doubt that the oil industry has made a distinct impression upon Gray County. The chances are that if it had not been for the oil and allied industries coming to the area, Gray County would probably still be one devoted to farming and ranching and Pampa would only be a whistle stop on the Santa Fe.

FRANKS UNITS

Cabot moved Franks Manufacturing Company to Pampa from Tulsa, Okla., last summer. The firm set up operations in connection with the Cabot Shops just west of town on the Amarillo Highway. Principal products of the industry are drilling and well servicing units. Shown here are a Franks all aluminum "Rocket Model 44TD," well servicing unit with teles coping derrick and a Franks "Comet Model 35," in drilling position.

Best Grain Harvest Since '47 Seen

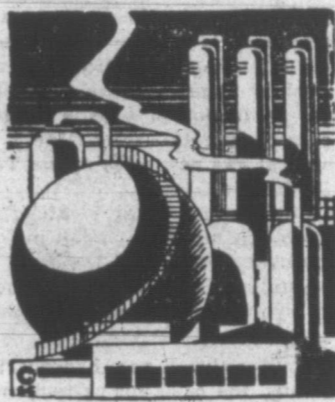

The biggest news for the grain industry is that the 1958 season may bring the best harvest since 1948, according to W. I. Wilkinson, Hoover bins of the Barnett, Wilkin- son Grain Company can handle 400,000 bushels of that.

C. V. Wilkinson and D. I. Barnett have been in the grain business together for 15 years. During a good harvest year they have seen as much as 75,000 bushels of wheat a day pour into the two elevators. But for the past two years the average has been 75,000 bushels a year. For two years in the 1930's the farmers got less than 14 inches of rain and for the past several years their plight has been the same.

Unlocking THE DOORS OF PROGRESS

Since the dawn of civilization man has striven, tortuously, to unlock the secrets of our universe. And bit by bit, through accident as well as intent, he has come to a greater realization of the limitless potentiality of nature's phenomena.

Such a phenomenon is oil. From its earliest uses as a humble lubricant and inflammable fuel for lamps and torches, it has grown through the years into a mighty Genie — the nation's largest industry and a veritable treasure chest of applications that make themselves known in practically every phase of modern living. Yes, oil has unlocked many a door along the path of human progress, and continued research and experimentation give promise of still broader applications to come. The story of natural gas closely parallels that of Oil Progress. It, too, has proved to be one of our most valuable resources ... and year after year is making an increasingly important contribution to progress in the home, industry, and agriculture.

fuel for a growing empire **Pioneer Natural Gas Company**

Pampa Foundry Is Big Local Industry

Starting in 1948 with five employees, the Pampa Foundry now has 34 on the payroll and, even during the 1958 slack, turns out 100,000 pounds of finished metal a week.

Owner H. O. Darby states that the Foundry is reaching farther afield and taking on new operations to meet the so-called recession. On a sub contract with the Air Force he ships two carloads of bumper castings into Denver, Colo., each month. The bumper castings are designed for the heavy towing tractors used on airfields.

Another new operation is the production of 2,500 meter box lids for a firm in Lubbock.

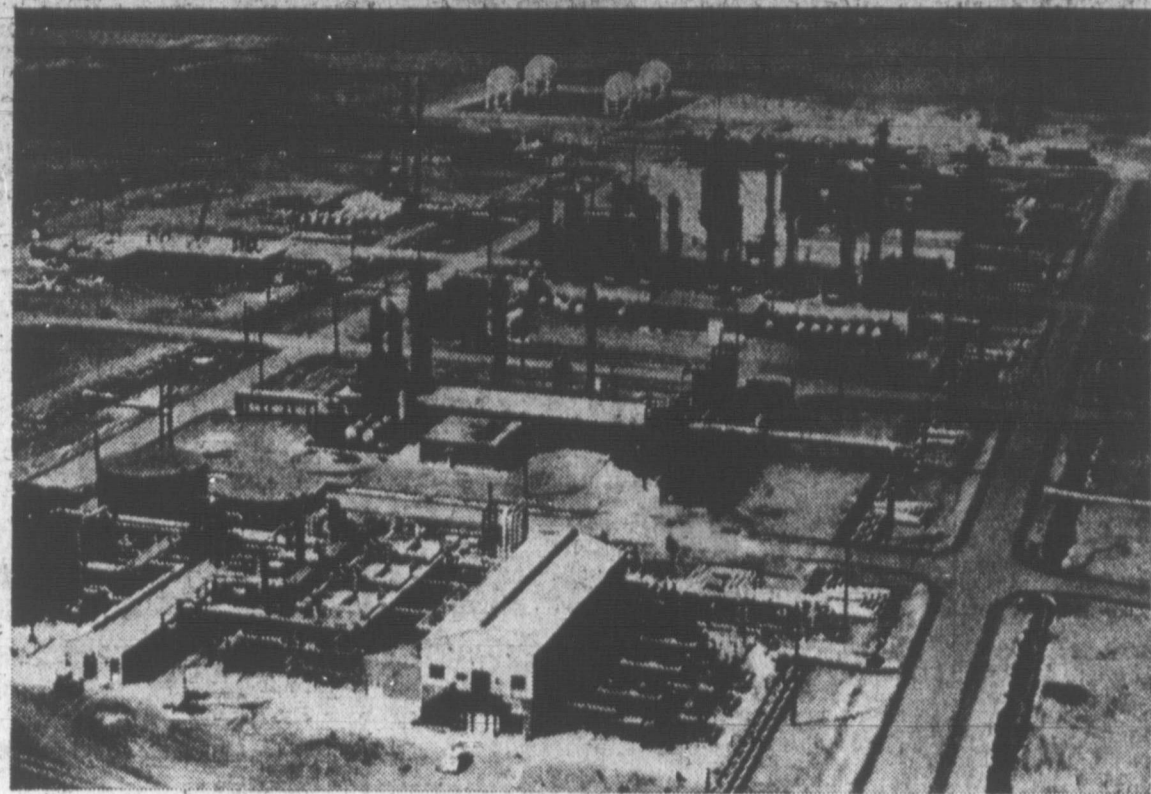

The Foundry supplies local farm implement dealers, wholesalers, engineering outfits, manufacturers, irrigation suppliers and machine shops. Normally, pumping parts form the bulk of the operation and are used by local firms.

The Foundry turns out heavy wheel weights that keep tractor wheels from sliding and produces pump bowls and universal pump hookups for the irrigation industry. Other products of the Foundry are bushings, pistons, gauge wheel attachments and, subsoiler castings.

In the 1957 expansion the plant acquired automatic machinery that makes about half the molds. The other half is made by hand molders. Other features of the expansion were a new cupola that melts pig iron and scrap and modern air supply controls.

In December, R. F. Forsythe came from Tulsa, Okla. to take over as plant superintendent. Forsythe had put in 11 years with the Tulsa Big 4 Foundry.

Cast iron streams in from the four state area of Texas, Oklahoma, Kansas and New Mexico and coke and limestone from the southern states to be turned into gray iron products. In normal operation, says Darby, one would

CELANESE PLANT

Pictured above is the Celanese Corporation of America Pampa Plant. Celanese is a leading producer of chemicals. The plant is located about five miles west of town just off the Amarillo Highway. Celanese engaged in some expansion activity last year and is now producing various chemicals while serving as one of the largest industries in the Top o' Texas. Its products have numerous commercial uses.

Celanese Tops In Chemicals

With the production of new acrylate esters, the Pampa Plant of the Celanese Corporation America, west of Pampa, steams ahead in the production of a wide range of petrochemicals from the vast natural gas resources of the Texas Panhandle.

The Pampa Plant steamed into operation in 1952, following the discovery in 1945 of the first successful process for the production of synthetic acetone and acetic acid.

Until natural gas hydrocarbons formed the basis for petrochemical production, the chemicals for Celanese acetate fiber and plastic products were derived from farm products.

As far back as 1937 Celanese chemists were looking around for a new source of acetone and acetic acid. Thirteen years of research revealed that the direct oxidation of propane and butane would yield low cost chemicals and enable the Corporation to develop new primary hydrocarbon products and derivatives.

A plant went up in Bishop in 1945 and seven years later the new process resulted in the building of the Pampa plant.

Since last year the local employment rolls have increased by 25 persons, both technical and non technical, to make 265 employed. The people of this area receive over a million dollars a year from the Celanese payroll.

H. V. Wilks came from the Bishop Plant last year to become manager of the Pampa Plant. At Bishop he superintended Maintenance and Engineering.

Since last April Bob Rasmussen was promoted to production superintendent, replacing Jim Wall, who was transferred to the Research Department of the Clarkwood Plant. Earl Schneiding was transferred from the Clarkwood Project to Pampa as head of the Process Engineering Department. Don Bramac transferred from the Bishop project to head the Personnel Department.

Cliff Whitney left for New York to work under Jim McCulla, Personnel Administration head and C. W. Henry was promoted from buyer to purchasing agent.

Pampa Celanese is pleased that its men are active and interested

Cattlemen Pick Up 'Moon Talk'

MADISONVILLE, Tex. (UP) — The Madisonville Sidewalk Cattlemen's Association, an organization that sometimes rivals the Burlington Liars Club, has announced that it's picking up "moon" talk for its 1958 shindig.

This year the club will honor the person who writes the best letter on "Texas or the Moon? Why I would Rather Go to Texas."

W. B. Crossley, editor of the Madisonville Meteor, and spokesman for the sidewalk cattlemen, said the group had been mulling over President Eisenhower's estimate of \$2 million as the cost of man's first trip to the moon.

Crossley said the association will dig up \$10,000 to give to the first traveler to the moon, provide the space man will "really live it up" before returning to earth.

Crossley didn't say how the cattlemen knew \$10,000 in good American money could be spent on the moon. The cattlemen don't always worry about such minor details.

The editor said that although a trip to the moon would be exciting, a trip to Texas would be even more so.

Who knows whether a rocket ride would be smoother than a ride atop a Texas cow pony? Crossley asks.

Winner to be Rewarded

The cattlemen say they will stick to the horse and Texas even while turning over in their minds such phrases from the President's report as "minimal moon contact," "minimal plane-

CABOT SHOPS

Cabot Shops, located just west of town on the Amarillo Highway, employs approximately 350 persons and is one of the largest industries in the Top o' Texas. The principal products at the Shops are pumping units, well servicing units and drilling rigs. The new office building can be seen at the left of the picture, in front.

Approximately \$1,720,000,000 worth of merchandise is sold through coin-vending machines every year.

Washington, D.C., leads the world in number of telephones per capita, with 84 telephones for every 100 persons.

Clears Up Egg Law

AUSTIN (UP) — Agriculture Commissioner John White said attention to two major points would clear up confusion about Texas' new egg law.

He said the main points are:—An egg producer is exempt from the law if he sells only from the production of his own flock on an ungraded basis.

—The egg law is essentially an egg labeling act, requiring that eggs sold within the state be properly marked. The cartons, White said, must be correctly labeled as to size and grade if a grade is claimed, or marked "ungraded" if no grade is claimed.

Cabot Operation Varied, Important

With over 800 employees in the Pampa area, Cabot is one of the biggest industries in Gray County. Actually Cabot is three companies. These are Cabot Shops, Inc., Cabot Carbon Co. and Cabot Engineering Co.

Cabot has four plants in the vicinity of Pampa, the Cabot Shops and three carbon black plants.

All of the plants operate out of the Pampa office, located in the Hughes Building, which is headquarters for the Southwestern Division. Office personnel in the Pampa office totals 160 persons, an increase of about 14 persons over last year.

Recently the Pampa office has expanded and now includes all of three floors in the Hughes Building.

Cabot Shops, located on the Amarillo highway west of Pampa, covers about thirty acres of land and has approximately 150,000 square feet of floor space in the building, and employs approximately 225 people.

Cabot Shops was started around 1930 to fabricate steel for the construction of the Cabot carbon black plants, and soon it was doing quite a bit of work for other industries in the area. A line of oil field pumping units was developed, and Cabot Shops is now one of the top producers of this kind of equipment. The sale and distribution of the pumping units is handled through J.L. Supply Company with about 30 stores located throughout the nation.

During World War II the ordnance division of Cabot Shops was formed to make 40 to 155 MM gun tubes for the United States government. This division produced its own steel; and forged, rough-turned and heat-treated gun tubes. During the Korean conflict the division was reactivated, but is now in moth balls. The only personnel at the ordnance plant are guards and maintenance men.

In 1955 Cabot Shops purchased Franks Manufacturing Corporation of Tulsa, Oklahoma, one of the first and best known builders of portable well drilling and servicing equipment for the oil and gas industry. It was moved to Pampa in September of 1957, and 100 families moved from Tulsa, and now operates as Franks Division of

Tent, Awning Firm Here Since 1948

Melvin Clark, owner and operator of the Pampa Tent and Awning Company, 217 E. Brown, began his operations in 1948 after purchasing the equipment and company name. The firm had originally been located on 321 E. Brown. Clark operated the firm with one employee until 1950. At

present he employs four persons besides himself.

The building originally occupied about 1350 square feet of floor space and was increased to the present size of 2900 square feet in 1953.

The firm is equipped to make and repair all types of awnings used by residences and businesses. They also make metal awnings and are the distributors of a line of ventilated metal awnings.

A service offered to sportmen of the area is the renting of tents for camping use.

They sell venetian blinds both inside and outside types and draperies for the home.

The firm specializes in the making and repairing of canvas for oil field use. They are equipped to make rig canopies of any size for the oil industries in this area.

The area covered by the firm is with a 90 mile radius.

There are 30 letters in the Russian language. It is written in the Cyrillic alphabet, which is based largely upon the Greek.

No Supreme Court justice may practice law privately.

Mattress Firm Here Three Years

The Acme Mattress and Spring Company, 817 W. Foster, came to Pampa on Nov. 15, 1955, from Lubbock, where C. H. Tollison, then owner and manager of the firm, had been in the mattress business for over 15 years.

The business is now owned and run by his son, Gene Tollison, who moved here from Amarillo. The family now operates mattress and spring companies in Lubbock, Amarillo, Borger and Pampa, this being the newest endeavor.

The firm here employs three persons at the present time and occupies approximately 250 feet of floor space.

They are equipped to do all phases of mattress renovation and building. Equipment includes a sterilization plant where mattresses are kept at 230 degrees for one hour, a felting machine, roll edge machine, tape edge machine and a filling machine.

Production capacity of the firm at present is from 10 to 15 mattresses a day.

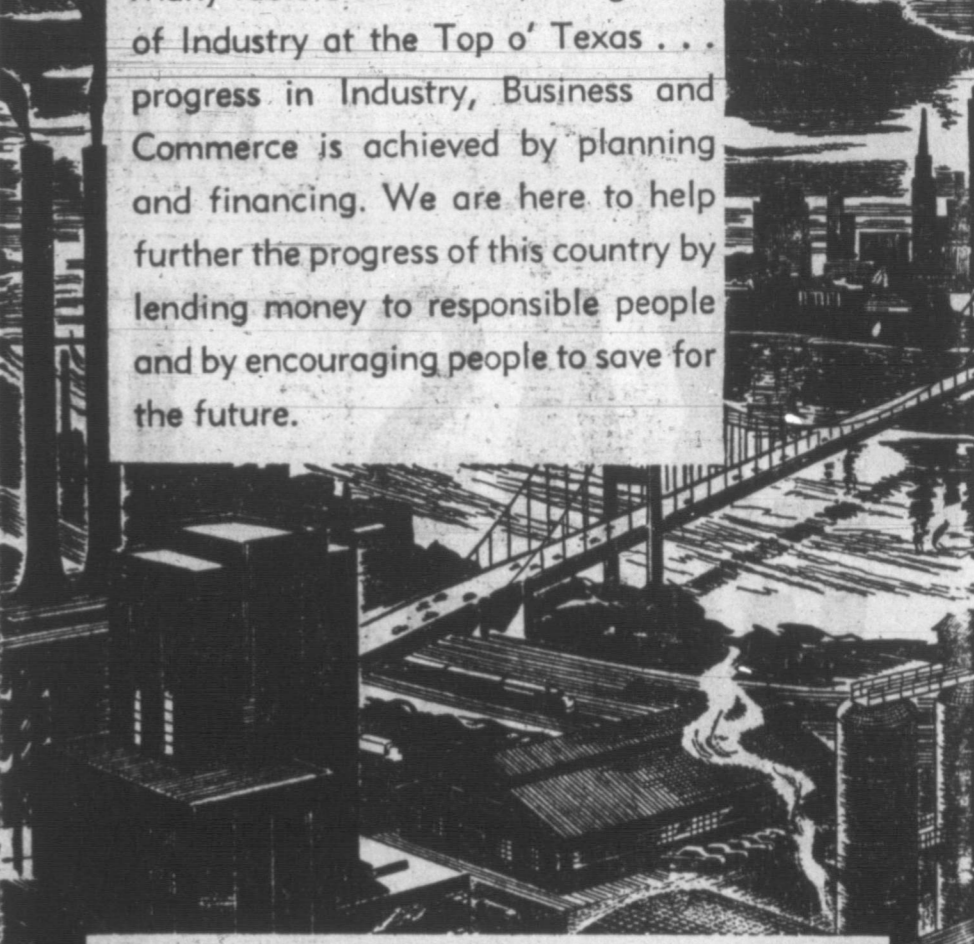

They make box springs by attaching a wooden frame then covering the spring with an insulator and padding, then covering it to match the mattress. King-size mattresses are made to any length or width and are furnished with either a metal frame or legs. Also made by the firm are foam rubber mattresses.

Quilting cotton is made by the firm and kept in stock at all times. All the work is done in Pampa and the company gives one-day service.

DAYTON, Ohio (UP) — World auto racing champion Juan Manuel Fangio of Argentina has agreed to test a speedy racer owned by George Walther Jr., president of the Dayton Steel Foundry. If the car meets with Fangio's approval he will drive in the Indianapolis 500-mile race on Memorial Day.

BANKS HELP BUILD PROGRESS

Many factors entered into the growth of Industry at the Top o' Texas... progress in Industry, Business and Commerce is achieved by planning and financing. We are here to help further the progress of this country by lending money to responsible people and by encouraging people to save for the future.
