May Be 40 Dead

Crane Working To Recover Rail Cars

By JAMES HEARN
United Press International
BAYONNE, N.J. (UPI)—A huge floating crane worked through the night to recover three Jersey Central Railroad passenger cars that, with two engines, plunged through an open drawbridge into 50 feet of water in Newark Bay. Twenty bodies had been recovered by early today and the death toll threatened to rise as high as 40. At least 40 persons were injured. The bodies recovered included seven picked up shortly after the tragedy and 13 found in a passenger car raised by the crane at 12:10 a.m. The Hudson County medical examiner scheduled an autopsy on the body of engineer Lloyd F. Wilburn, 63, to determine whether he may have had a heart attack at the throttle. The passenger car hauled up by the crane shortly after midnight was the second of the three cars to plunge into the water and the one believed containing the most dead. The first of the three cars was empty. The third hung suspended from the bridge for 2½ hours before dropping into the bay, allowing most of its passengers to escape. Nearly every window was smashed in the first car hauled up. A man's leg hung outside one shattered window indicating he nearly escaped the watery death. The hands of another man's body were badly cut, apparently from smashing a window in a vain escape attempt. No one was known to have escaped from the second car which followed the two engines and the deadhead car into the water like a link in an anchor chain. Mayor Among Victims Determination of the exact death toll might take days, officials said, because the strong tidal currents in the area may have washed bodies out through the smashed windows. One of the bodies brought up in the second car was tentatively identified as that of John Hawkins, mayor of Shrewsbury, N.J. Police said he carried an unspecified amount of negotiable securities which were recovered. Missing and feared to have been on the train was George (Snuffy) Strunweiss, former star infielder for the New York Yankees.

Doctor's Last Words Back Son

NEW YORK (UPI)—Dr. Melvin Nimer managed to gasp out two words before he died, words that tend to support his 8-year-old son's original statement that a masked intruder stabbed Nimer and his wife to death. Police investigating the mysterious bread knife slayings of the Nimers disclosed Monday that the doctor uttered the words "mask" and "prowler" as he lay dying on the kitchen floor of his Staten Island home. Mrs. Nimer used much the same terms to describe the attacker, as did her son, Melvin Dean, but Dean switched from his original story and told police on three separate occasions that it was he who killed his parents. The child is undergoing psychiatric tests in an effort by authorities to determine which of his conflicting stories is true.

Exponent Of Krebiozen Takes Drug

CHICAGO (UPI)—Dr. Andrew C. Ivy, a leading exponent of the controversial "cancer drug" Krebiozen, disclosed he has injected himself with the drug in an experiment to see if it might prevent cancer. "I have a pre-cancerous lesion on my tongue, the result of smoking a pound of pipe tobacco every week for about 30 years," Ivy, 65, said. He said he would undergo an operation today, known as "electro-coagulation," to burn away the lesion. However, during the surgery, there is a possibility that cancer cells might be released into the blood stream and spread through the body. The University of Illinois scientist will not learn until later if he has cancer. "I'm taking the drug to prevent cancer cells from growing if there happens to be any there," Ivy said. "I always believe in taking my own medicine myself. 'Exhibit A' in an effort to determine if the drug has any cancer preventive properties. The white-haired pathologist has been battling for nine years to gain recognition of Krebiozen as a treatment for cancer. An American Medical Assn. committee has said the drug is worthless.

Aquatic School Films Slated
A national Water Safety instructor will meet with a committee of the Pampa Red Cross Wednesday, according to James Hart, Water Safety chairman. The meeting time has been set for 7:30 p.m. Wednesday in the home of Mrs. D. J. George, 2612 Hamilton. Bob Bain will come from Amarillo to show films of the Red Cross Aquatic Schools in which he has taught. Bain serves on the staff of the National Red Cross as a Water Safety instructor for aquatic schools.

Far East War May Spread

Red China, US Study Proposals

WARSAW (UPI)—The United States and Communist China today considered each other's "substantive" proposals for peace in the Formosa Strait. U.S. Ambassador Jacob Beam and Red Chinese Ambassador Wang Ping-nan met Monday for nearly three hours to trade terms for silencing guns on the Communist mainland and on Nationalist-held Quemoy. Although it was their first meeting, the two ambassadors got down to business immediately and made "substantive" proposals, a highly-placed Western source said. They also agreed to meet again Thursday in the Mysłowski Palace, a hunting lodge in the center of a Warsaw park which the Polish government made available. Their task was not to achieve a final solution to the problem of the two Chinas but to spike the Communist sources, including the official Polish News Agency, said the atmosphere of the talks was "optimistic." They expressed belief the Chinese were ready to bargain seriously on the question of Quemoy and Matsu which the Communist claim. Whether or not their terms would be acceptable to the United States was another question. Most Western observers expected there would be many lengthy meetings in Warsaw. In Peiping, Ruo Mo-jo, chairman of the "China Peace Committee," said Monday China was table with the United States for five years or "even ten" if necessary, the New China News Agency reported.

BULLETIN

CAPE CANAVERAL, Fla. (UPI)—The Navy control to zero on its temperamental Vanguard today and flames spurted from the rocket for a few seconds. But it never left the ground and minutes later the launching was called off.

RAIN LAST NIGHT
The moisture as a result of the rain yesterday, came to 12 hundredths of an inch, per the News rain gauge reading. Pampa felt the first real touch of fall this morning with fallen temperatures.

ONE FIRE CALL REPORTED HERE
A trash fire at Montagu and Banks brought the Pampa Fire Department out at 2 a.m. today. The blaze occurred in the corner park.

Ford Motor Co., UAW Are 'Within Reach' Of Agreement
They later were sealed down to a company-estimated 48 cents an hour and stood at that point when the company presented its offer. Changes Collosion Neither Reuther nor Bugas would back down in a sharp clash over whether there was "collosion" between Ford, General Motors and Chrysler. All three companies presented similar offers to union negotiators in a surprise move Monday. "I think it goes without saying," Reuther said, "that when the big three auto companies are able to come within 18 minutes of each other with a common proposal, there is industrywide bargaining by remote control." Bugas denied there was any collusion between Ford and any of the other auto companies.

DETROIT (UPI)—Ford Motor Co. and the United Auto Workers were "within reach" of a contract agreement today with less than 24 hours left before a strike deadline. But tempers on both sides aimed to flare as the talks, aimed at reaching agreement on a new contract before 10 a.m. Wednesday, reached the final stages. The talks moved forward at a rapid pace Monday night after all of the "big three" auto companies submitted similar proposals to the union in a space of only 18 minutes. The union rejected the Ford offer and made a counter offer before the talks broke up shortly before midnight. Seek Three-Year Pact "There are certain areas in which the union can make a new approach," UAW president Walter P. Reuther said. "We have rejected the company offer and have a counter offer in the areas in which there is disagreement. At the moment there is still time to reach an agreement, although there is a great difference in some areas." Although details of both the company's offer and the union's counter offer were withheld, some details became available through various sources. Ford vice president John S. Bugas first revealed the offer was for a three-year contract. An authoritative spokesman later disclosed the offer would include pay hikes of between 24 and 30 cents over three years. The spokesman said the offer also contained these key points:

By BRUCE W. MUNN
United Press International
UNITED NATIONS, N.Y. (UPI)—The Soviet Union launched a determined campaign today to seat Communist China in the 13th U.N. General Assembly session opening this afternoon. It hinted strongly it would bring up the Quemoy crisis as well. The official Communist Party organ Pravda and the Soviet government organ Izvestia today printed twin demands the United Nations "expel the political corpse" of Nationalist China and seat Red China, Moscow dispatches reported. The Soviets might bring up the question even before the election of a new assembly president is settled. The tense Middle East situation was reflected in a presidential address today by Dr. Charles Malik, the pro-American, lame-duck foreign minister of Lebanon, and Mohammed Ahmed Mahgoub, foreign minister of Sudan, who is backed by the Arab League. May Switch Support The Russians were backing Czechoslovakia's Jiri Nosek but were expected to switch the support of the nine-nation Soviet bloc to Mahgoub. The other announced candidate was Yugoslav Foreign Minister Koca Popovic. The Soviet demand was expected soon after the outgoing president, Sir Leslie Munro of New Zealand, gave the session to order after a minute of silent meditation. That is when the question of credentials of the delegates is taken up as a matter of routine. Moscow radio also got the jump on the U.N. session by listing several items Russia will introduce for debate: —Another demand the General Assembly force the United States and Britain to withdraw troops from Lebanon and Jordan. —A demand the assembly discuss the suspension of nuclear tests—a move that would bypass the Western-sponsored Geneva Conference on Oct. 31 on that subject.

Russia Tries To Seat Red China In UN

It generally had been expected the question of Communist China would come up later in the session. India has asked for a formal debate later, and most diplomats thought that in view of the Indian item Russia would not press the issue immediately. But Izvestia said today current events in the Far East "show with renewed vividness the extent of the abnormality of the existing situation" in which Red China is not a U.N. member. U. S. Confident "The unrealistic position of the U.S. government, which still continues to prefer to turn a blind eye to the real situation in China, prevents the member states of the U.N. from adopting the only correct solution," Izvestia said. Pravda took the identical line and then hinted the entire question of the Formosa crisis would be injected into the assembly meeting. "Although the preliminary agenda of the assembly does not deal with the problem of the provocative activities of the American militarists in the region of the Taiwan (Formosa) Strait, the attention of all participants of the session will undoubtedly be riveted to this vital problem." American delegates were confident they could muster the necessary vote to defeat any Soviet attempt to oust the Nationalists.

CABOT SPEAKING ROSTER
Shown above is the speaking roster of this morning's Cabot Southwestern Division Management Conference. The men are here from their posts in France, England, Canada and Australia as well as from the local scene. The front row, right to left, has George Cash, England; John Andrews, France; G. M. Martin; and Louis W. Cabot, Boston. Right to left on the back row are Hugh Burdette, Pampa, general manager; Boyd Britton; Arthur Phillips, Boston; Roy Darwin, Canada; and Ed Holland, Tuscola. France Pressured To Outlaw Reds

By JOHN D. FARRY
United Press International
PARIS (UPI)—The French government was under strong pressure today to outlaw the Communist Party. Interior Minister Emile Peletier hinted at a move to ban the largest Red party in Western Europe after the unsuccessful attempt on the life of Information Minister Jacques Soustelle by Algerian terrorists Monday. Peletier accused the Communists of aiding the Algerian nationalist movement and charged the Communist newspaper Humanite and the morning newspaper Liberation were guilty of "collusion" with the nationalists who want independence from France. Rightwing political leaders prepared to renew demands the party, which won one-fourth of the votes in the last parliamentary election in 1956, be outlawed. The attack on Soustelle and new violence that exploded during the night were part of a terror campaign by the Algerians to defeat Premier Charles de Gaulle's strong-man constitution in the Sept. 28 referendum. It makes no provision for Algerian independence. The Communists fear the new constitution will permit the government to outlaw their party. Soustelle, an advocate of stiff repressive measures against the Algerian rebels when he was governor-general, was cut on the face by flying glass when Algerian gunmen opened fire on his limousine in downtown Paris. Two of the attackers were caught after one of them shot and killed a passerby. One of the Algerians and four passersby were wounded in the gunplay.

Hoffa's Picture Of Self Is 'Out Of Focus'

By DICK WEST
United Press International
WASHINGTON (UPI)—Senate racketeers investigators contended today Teamsters president James R. Hoffa's picture of himself as the union's housecleaning champion was out of focus. They took issue with Hoffa's claim Monday that he is doing an "excellent job" of ridding the union of ex-convicts, racketeers and other unsavory characters. Robert F. Kennedy, chief counsel of the racketeers committee, said Hoffa's analysis of his clean-up campaign was incomplete and overlooked two important points: —"A great number" of the persons named in committee testimony as having criminal backgrounds were brought into the union by Hoffa. —"A great number" of those still on the union payroll hold important positions in such states as Illinois, Michigan, Ohio, Indiana and Minnesota. Kennedy asserted Hoffa's housecleaning activities thus far were spurred by the board of monitors appointed by a federal court to keep watch over the union. Hoffa, who faced more questioning today, had an answer for suggestions his clean-up efforts were motivated by the monitors. He charged the board has been trying to "capitalize" in the situation by recommending corrective measures which he already was preparing to undertake. He and committee members spent most of Monday's session wrangling over the issue.

US Troops In Japan Protested

TOKYO (UPI)—The Soviet Union demanded today Japan deny the United States use of military bases on its territory because of American "aggressive" activity in the Formosa crisis. A protest note delivered to the Japanese Foreign Ministry accused U.S. forces of openly using Japanese territory for "provocative, aggressive actions" against Communist China. It also quoted news reports to the effect American forces in Japan have "completed their battle preparations." Russia warned that even if it comes from a hardware store, we have it. Lewis Howe.

Nationalist Premier Threatens Mainland

TAIPEI, Formosa (UPI)—Premier Chen Cheng told the nation today the war in the Formosa Strait will spread to the Chinese mainland if the Communist blockade of the Quemoy Islands is not broken soon. "We have absolutely no intention of idly sitting by and letting the more than 100,000 civilians and military personnel of Quemoy and its adjacent islands be besieged without taking effective methods for their reinforcement," Chen said. "I am firmly of the opinion that should the enemy persist in sealing off Quemoy completely, it would mean extending the war." The National Assembly adopted a resolution Monday requesting the United States and Nationalist armed forces to "take immediate and effective measures of bombing the mainland coastal areas and thoroughly destroy the Communist gun positions." Convoys Fail The assembly said the U. S. Navy escorted sea convoys attempting to break the Quemoy blockade "had little effect" and that bombing of the Communist guns is needed to "save the 150,000 (sic) civilians and soldiers on the islands from a helpless state." Chen, in an interview with Choi Byung Wbo, editor of the Korean Times, said his nation's troops would never evacuate the Quemoy Islands even if asked to do so by the United States. Choi asked the "theoretical question" of leaving the islands and Chen replied: "It is not a theoretical question. It is a very realistic question. I tell you we shall never abandon the offshore islands." Chen said any "concessions" made by the United States to Red China in the Warsaw talks would not affect Nationalist China's position and added, "You know that if you back up one step the Communists advance two steps." Just before Chen reported to the nation today Communist shore guns half-encircling the 14 besieged Quemoy Islands opened their 23rd day of bombardment since Aug. 23. Big Quemoy, Little Quemoy, Tatan and Erh-tan were the principal targets. Forty minutes after the guns fell silent a lone C-46 of the Nationalist Air Force escaped from Big Quemoy with a load of 21 wounded Nationalist soldiers, some with legs blown off, and the last three newsmen remaining on Quemoy. The U. S. and Nationalist governments have barred (See FAR EAST, Page 3)

Cabot Holding Management Conference

Top ranking officials of the Cabot Company gathered in Pampa today for the 29th Management Conference of the Southwestern Division. Reports were heard from Canada, England, France, Australia, Boston, Mass., and Tuscola, Ill. The men met in Cabot Auditorium this morning at 9:30, going to Poole's-Steak House for lunch. The afternoon session was to begin at 1:30. Diner and an evening program were scheduled. Management representatives will meet tomorrow in the auditorium for an open forum and election of chairman as Carbon Black men resume their meeting. Heard this morning were Roy Darwin, Canada; George Cash, England; John Andrews, France; Dennis O'Mulloy, Australia; Ed Holland, Tuscola; Arthur H. Phillips and Louis W. Cabot, Boston. Joe Reid spoke on Oil, Gas and Gasoline; W. L. Loving, Carbon Black; R. E. Dobbins, Research and Development; R. A. Baker, Cabot Shops; Robert P. Vail, Cabot Engineering Company; and Hugh "Buck" Burdette, General. Beginning the afternoon session, C. G. Conner, inspector for the Texas Highway Patrol, was to take up The Management Approach to Motor Vehicle Traffic.

Commission Lets Contract On Lights

The Pampa City Commission, in its morning meeting, gave a contract for installation of new traffic lights to the Trail Electric Company on a bid of \$2,695. There were three other bidders in the race. Commissioners also opened bids on several Dempster Dumpster trash containers but no official action was taken. Stockton Construction Company's estimated of \$15,939.95 on water supply lines was approved as well as one from Arey Construction Company for \$10,949.65. Gordon, Gordon and Buzzard, attorneys, were employed to represent the City for miscellaneous claims resulting from the Hobart Street Underpass Construction. In other action, the commissioners approved bills of \$617.88 and \$5,238.85 for engineering services rendered by Roberts, Merriman and Bowden. The other bidders for the traffic light installation on Hobart were The Electric Supply Company, Duke's Electric and Sims Electric Company, all of Pampa.

Brucker Says Ike Averted War

WASHINGTON (UPI)—Army Secretary Wilber M. Brucker said Monday night President Eisenhower's "no appeasement" stand had averted a shooting war in the Formosa Strait. Diplomatic officials, commenting on Brucker's statement, said it may be "a little overstated but there is cause for optimism." Back from a three week tour in the Far East, Brucker told newsmen the U. S. government's strong warnings to the Red Chinese had backed up free world allies in the Orient from Pakistan to Korea. "This thing would have lit up into a shooting war," Brucker said, if it had not been for Eisenhower's "no Munich" speech last Thursday night. The Army secretary described the Formosa Strait situation as "still tense and serious," but added the President's stand had started a cooling off period. "I look for quite a difference in the next 30 days," he said.

Little Theatre Meeting

The little theatre movement in Pampa will come to a point Thursday in the City Commission Room as local theatre lovers gather for a business meeting. Seventy p.m. is the time to attend. Interest in theatre was shown at the preliminary meeting last Friday, prompting another meeting to work out the organizational details. Suggestions will be in order on the purpose and function of a community stage. To fill the coming season, there will be openings for anyone who can perform on stage, backstage or in other theatre areas. There will be a job for every interested person, regardless of previous experience, according to leaders of the movement. Since the arts of the theatre are many, singers, dancers, musicians, painters, carpenters and electricians will be much in demand. The City Commission Room, on the first floor of Pampa City Hall, will be the Thursday meeting place.

Bob Hope Reverts To Type On His Opening Show Friday

By VERNON SCOTT
UPI Hollywood Correspondent

HOLLYWOOD (UPI)—Comedian Bob Hope reverts to type on his opening show this Friday when he turns some - and - vance mand in "Roberta," the Broadway musical that launched him to stardom 25 years ago.

The original theater program listed him thusly: "Bob Hope, who is a hit in amateur shows around Ohio."

But rapid Robert wasn't in a mood for gags when he took time off during rehearsals for the 1 1/2 hour program.

"There's an awful lot of sentiment about that show for me," he said. "I met my wife Dolores during the run of the show. It was the turning point in my career. Thanks to Robert I became a radio star and was bombarded with offers for movies."

Old Songs, New Lines
"Almost all of the original cast is dead now. My co-star was Tamara. She's gone, and so are Fay Templeton, Sydney Greenstreet and Lyda Roberti."

A bashful saxophone player named Fred MacMurray also was a member of the original cast. He had a bit part.

"Fred borrowed my top hat and cane one day to make a screen test," Bob recalled. "I told him he was crazy, that they'd forget who he was before he arrived in Hollywood."

"A few months later I almost swooned when I saw his name on a Broadway theater marquee. He was a star. Now he's so rich he could foreclose on Crosby."

Bob went on to say that the television of the show would include 36 minutes of songs, including "The Touch of Your Hand" and "Smoke Gets in Your Eyes." But it will be modernized with up-to-date gags and one of Bob's famed monologues.

More Overseas Programs
"I did the show in St. Louis this summer," he said. "It went over so well my sponsors decided to start my TV season with it."

"We've got a cast of 50, and we've been working like dogs for more than a week to polish it up. Next spring I may do the show in London for six or eight weeks. It's added real excitement to my career."

Hope will do eight TV shows this year compared with six in 1957-58.

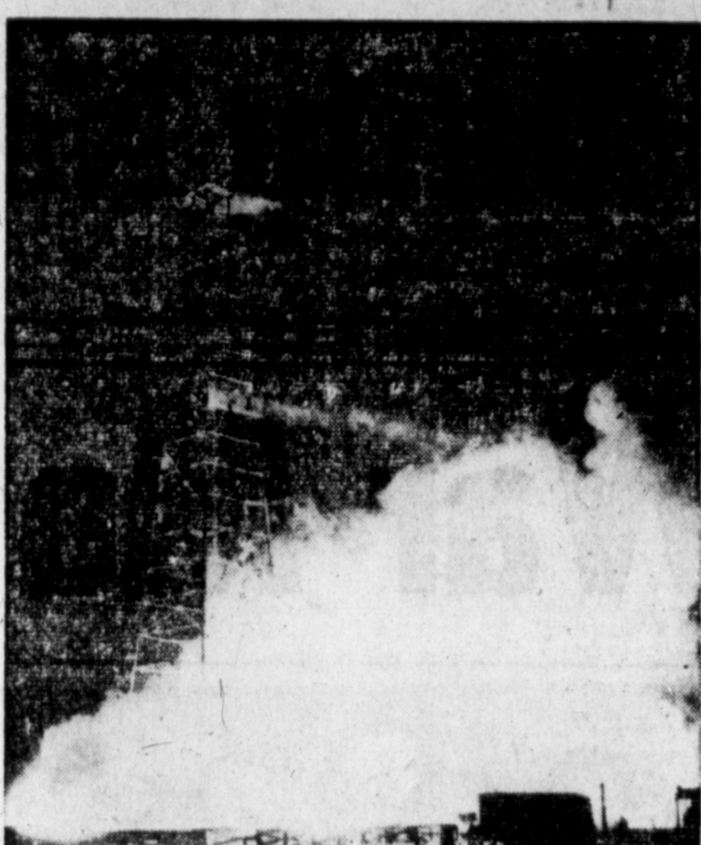

"I have a couple of ideas for some more musical comedy programs later in the season," he said. "Then I'll be traveling again to bring different backgrounds to the programs. Last year our shows from Moscow, Alaska and Africa were well received. I get a kick out of doing them."

Starring with Hope on the NBC-TV spectacular are Anna Maria Alberghetti, Janice Paige and Howard Keel.

"I leave most of the singing to them," Hope grinned. "Me, I'm sticking with the jokes."

Good Deal Of Money Put Into 'Northwest Passage'

Television In Review
By WILLIAM EWALD
United Press International

NEW YORK (UPI)—The opening number of NBC-TV's "Northwest Passage" was, quite obviously, a half-hour film into which a good deal of money had been poured. It checked in complete with sumptuous avalanche, a cast of dozens and the glossy look of an old MGM movie. Herein lay most of its troubles — it looked too much like a film that had been made for the large arena of a theater rather than the cabin of the living room.

The debut show was stuffed with so many long and medium shots it was difficult to feel any contact with it. Its big scenes looked compressed, squeezed, the way many full length movies do on TV. However, I should add the series packs plenty of potential. It deals with a fascinating period, pre-Revolutionary America; it is adequately staffed by actors Keith Larsen and Buddy Ebsen, and it is as slickly turned out as any series on TV.

I can't say as much for another NBC-TV show, "Steve Canyon,"

which bowed in on Saturday night. It was strictly Jack Armstrong stuff and not very good Armstrong at that. Dean Fredericks, who plays the title role, has the looks, but seems to be wanting in acting skills.

NBC-TV also trotted out a new quiz, "Brains and Brawn," on Saturday. It was, I thought, a trifle dull. However, this may have been the fault of a couple of rocket experts who flubbed most of their "brains" questions. Its only exciting moments were provided by two "brawn" guests — golfers Sammy Sneed and Tommy Bolt — who tackled an assortment of tough shots via remote telecast from a local course.

The Channel Swim: Leonard Bernstein is planning a feature on the pianoforte for NBC-TV's "Omnibus" this season. ABC-TV is planning a new daytime soap opera, "Your Day in Court," for an Oct. 13 start.

Anita Bryant, Miss Oklahoma and a finalist in this year's Miss America contest, will be a guest vocalist on the 60-minute "Peter Lind Hayes Show" set for an Oct.

Plenty Beef Produced In The US

United Press International
WASHINGTON, D. C. (UPI)—

Someone with a flair for statistics has figured out that if you put all the beef and veal produced in the United States annually into refrigerated cars, the train would stretch from San Francisco to Boston.

That would be 3,270 miles of meat, nearly 16 billion pounds on a dressed basis, which adds up to some bulky proportions. Yet the U.S. is still importing comparatively large amounts of beef and veal. Going to the train analogy again, if you put all our beef and veal imports into refrigerated cars, the train would stretch about 124 miles. That's a lot smaller than domestic production.

13 debut on ABC-TV. Kathleen Murray, who played the title role in NBC-TV's late "Kitty Foyel," has been cast in an upcoming episode of ABC-TV's new series, "Rough Riders."

tion but quite a chunk considering the size of the domestic output. USDA experts say the amount of beef we buy from abroad depends largely on the level of our own production and cattle prices. But a department survey shows domestic beef and veal output actually dropped in 1957 and continued to decline during the first half of this year. At the same time, prices have jumped. Larger imports are inevitable to meet consumer demand.

The Department says the import demand is growing stronger for the U.S. is the world's biggest consumer of beef and veal. We eat an average of 93 pounds a year per person.

Boy Scouts Set Meeting Here Tonight

District Scouters will meet in the Palm Room of Pampa City Hall tonight at 7:30 for the theme of the Month Round Tables, Assistant District Commissioner W. L. Veale has announced. The themes will be "American Folklore" for Cub leaders, "World Brotherhood," Scout; and "Highlight Events," Explorers.

Survey cards and safety handbooks will be distributed at the meeting. And a pennant will go to the Scout unit that has already attained its 20 per cent increase in membership.

Dale Stone and Veale will preside at the Cub Round Table, Paul Turner at the Scout and John Ayres at the Explorer.

Wilson Puryear, Safety Booklet Distribution chairman, will turn the booklets over to Scout leaders who will divide them among the members of their units for distribution in town.

Leaders will receive a briefing on plans for the coming District Camporee from W. A. Morgan, Camping and Activities chairman.

Survey cards, recently filled out in Pampa Schools, will go to Scouters to aid them in their search for "Elusive Elmer." Elmer will be the 5,800th boy to register with a Scouting Unit in the Adobe Walls Council. Unit leaders will give the cards to their boys with the understanding that boy will invite a new boy.

Dr. George Snell, District commissioner, urges all unit leaders, den mothers and Scouters to attend.

Way Sought To Teach 3,000 Students

By **BRUCE MILLER**
 United Press International

LITTLE ROCK, Ark. (UPI)—The Little Rock School Board cast about today for a stopgap means of teaching 3,470 students unable to attend classes because Gov. Orval E. Faubus has closed all four of Little Rock's high schools.

The school board considered lessons taught on Little Rock's three television stations and study assignments at home or in the public library.

Faubus closed the schools Monday because, he said, opening them integrated as the Supreme Court ordered would provoke almost certain violence.

A cross with an effigy of a Negro strapped to it was burned Monday night near the entrance to Little Rock's War Memorial Park.

Faubus said the schools may not open until after a special election on the integration question.

The schools originally were scheduled to open Sept. 2. Their opening was put off until Sept. 15 to await the Supreme Court decision. Then Faubus ordered them closed.

Many students have asked for transfers. The school board promised that, in any case, the students will get a full 180 days of instruction when they do open.

newsmen from visiting the island complex.

U.S. Planes Arrive
 There had been reports that F-104A all-weather Star fighters had arrived on Formosa. The U.S. Taiwan Defense Command said today one squadron (about 25) had arrived here from Hamilton Air Force Base, Calif.

It also said Marine planes deployed here from Japan last week for amphibious landing exercises were staying on to defend U.S. Navy installations.

The United States already has brought in Matador guided missiles and Nike-Hercules ground-to-air missiles. A dispatch from El Paso, Texas, said Nike-trained troops of the 71st Artillery have been ordered to the "Pacific area."

TROOPS

(Continued From Page 1)

Japan did not wish to become involved in any out-break of hostilities in the Formosa Strait area, it cannot be helped if Japan is considered a party to aggression," should the United States continue to use the bases.

In Tokyo, observers considered the note a skillful attempt to pressure the Japanese government into drastic action to revise the 1951 security agreement with the United States.

Talks to revise the agreement are scheduled to open in Tokyo shortly.

Lebanese Rebel In Warning

CAIRO (UPI)—Lebanese rebel leader Kamil Jumblatt warned Monday night that the Lebanese opposition front will resume fighting against government forces if all American troops are not withdrawn from his country.

"In that event," Jumblatt said, "the opposition front will ask for aid from all the peoples of the world and will submit a complaint to the United Nations against the United States for its aggression against our national independence."

(Two U.S. Marine battalions are in the process of being evacuated from Lebanon. Their departure will leave about 8,000 American troops in the country.)

Jumblatt is the first Lebanese opposition leader to visit Cairo since the Lebanese internal strife calmed down. He is expected to meet with United Arab Republic President Gamel Abdel Nasser.

Oil Men Hitch To Rocket

By **CLYDE H. FARNSWORTH**
 United Press International

NEW YORK (UPI)—Oil men are hitching their wagon to a rocket the way they hitched it to Henry Ford's horseless carriage 50 years ago.

They haven't talked much about it, but from what's been said so far it's apparent their stake in the space age is big.

W. G. Duke Jr., a top scientist for Esso Research and Engineering Co., puts it this way: "Although forms of energy will change, the oil industry will always have a stake in any energy-consuming device."

Firms like Esso, research affiliate of Standard Oil Co. (New Jersey), Phillips Petroleum Co. and Standard Oil Co. (Indiana) are pushing both liquid and rocket fuel activities at rocket speed.

For liquid rocket fuels the oil industry supplies a highly refined type of kerosene, used among other places in the intermediate range Thor ballistic missile.

Work On Solid Fuels
 Other liquid fuels are alcohol and liquid hydrazine, a colorless, fuming, corrosive material. To solid propellants the oil industry was a relative late comer. Although most solid propellants use synthetic rubber, a petroleum derivative, the chemical industry did much of the pioneer work in this field.

Later metal companies entered the picture when it was discovered that adding powdered metals like aluminum and boron to the solid propellant formula gave more power.

Indiana Standard says its scientists have been doing research on solid fuels since 1951. Recently Dr. Philip C. White, the company's general manager of research, revealed it is at work on a solid fuel for use in an auxiliary power unit of the falcon—an air-force air-to-air missile.

Points Out Difficulties
 Esso's Duke said in an interview with United Press International the interest of the oil companies in rocket research is shown by the attendance at a recent briefing of the government's Advanced Research Projects Agency.

Present were scientists from about 40 companies of which about one-third were oil companies.

Duke says currently there are some differences among scientists about which rocket fuels—solid or liquid—are the most efficient with the sentiment leaning toward the solids.

Because of their complexity, he points out, liquid rocket engines are hard to operate and control.

The best fuel for a rocket is hydrogen, says Duke. "Although there are lots of obstacles before we get hydrogen rockets," he asserts, "these are primarily of an engineering nature which can be solved in the near future."

DEAR ABBY...

By Abigail Van Buren

DEAR ABBY: Scouting is wonderful, especially when you have two sons growing up. But shouldn't Scouting begin at home? There are screens to put up, painting to be started and yard work to be done. My husband and sons think Scouting means to pack a lunch and go for a hike. Their intentions are good but our place is a disgrace to the neighbors. What do you say to that, Abby?

DEAR ABBY: When I was a Girl Scout (Troup 36, Sioux City, Iowa) I learned that a good scout had to do a good deed every day. Charity begins at home and there is no better place to be a good scout.

DEAR ABBY: What do you think of a sister-in-law who comes to your house and starts housecleaning? She visits me once a year and I can't take much more of her. She's one of those fuss-budget types who can't stand to see a speck of dust anywhere or a dish in the sink. She has torn apart my cupboards and closets till I think I will go nuts looking for stuff she either threw away or put somewhere else. She's my husband's oldest sister and I can't tell her off. What can I do?

DEAR ABBY: This is one battle you will have to fight alone. Serve her notice before she sets foot in your door that she is a GUEST and you don't want your guests working. If you don't make it clear that you mean business you can expect this annual annoyance.

DEAR ABBY: You are VERY wrong. There is plenty of harm in LOOKING according to Matthew 5:28 and I quote: "But I say unto you that whosoever looketh on a woman to lust after her hath committed adultery with her already in his heart." end quote. Married men who gape and gawk at other women are being "mentally unfaithful" to their wives.

DEAR ABBY: Now about that woman who was complaining because her 63-year-old husband was always "looking." She should be

Project Discussed At ESA Meeting

Epsilon Sigma Alpha Sorority held its first meeting of the fall season in the City Club Room on Thursday evening at eight o'clock.

During the business meeting, a discussion was held as to the nature of the project that the club would adopt for the coming year. Inasmuch as the national sorority is urged various chapters to participate in a program of aid for handicapped children, a committee, composed of Meses. John Nutting, Norman Fulps, and Yorel Harris, was appointed to investigate the matter on the local level and present a thorough report at the next business meeting on Oct. 9.

The group voted unanimously to again sponsor Jeanne Willingham's Dance recital in the Spring.

Mrs. L. D. Maddox, who was recently moved to Pampa from Morgan City, La., was welcomed as a new member.

1958-59 year books were distributed to the members by Mrs. Charles Robison, chairman.

Door prize was won by Mrs. Harris.

Mrs. Walter Reek served refreshments to the above-mentioned and to the following, Meses. W. R. Pairs, Lucille Foster, Margaret Dall, Bruce Parker, Jack Hankla, Bill Ragsdale, Melvin Watkins, Parks Brumley, Lowell Stevens, Berton Doucette, Eugene Bentley and Gwen Gray.

Mmes. Lucille Foster, Guy Le Mond and John Nutting will be hostess to the chapter on Sept. 25 for a program entitled "These Teen - Agers . . . Or Problem Parents."

Confidential To "Mister Five By Five": What you need is a lesson on Girl Control . . . and that was no misprint.

For a personal reply, write to ABBY in care of this paper. Enclose a self-addressed, stamped envelope.

If you want a collection of Abby's best letters and answers in one book, ask your bookdealer to get "DEAR ABBY" for you.

Friendship Class of the First Methodist Church was hostess to Senior Citizens in the Center, Lovett Memorial Library on Thursday afternoon.

Plans were concluded for the club's participation in the Carson County Fair, which was held in Panhandle on September 12-13. Miss Mary McKenny was elected to be a candidate in the Queens contest and Laura Snodgrass represented the club in the Princess contest.

Following the business meeting the group enjoyed a sack luncheon with punch, coffee and fruit salad served by the club hostess, Mrs. J. M. Chapin. During the afternoon the members quitted a gift that will be sent to Boys Ranch.

Mrs. George Porter will be hostess for the meeting on Sept. 19. Mrs. A. C. Townsend of Amarillo was a special guest.

The new and neater look for hair this fall is shown in this style by New York's Julius Caruso. The hair is shaped carefully to the head and is tapered greatly at the back.

Romantic Hairdos For Fall Fashion

By ALICIA HART NEA Beauty Editor

As the bubble haircut departs, the smaller and neater head appears for autumn. The careless curls are still there but not in such profusion.

Generally, there's more shaping for the hair, a closer alliance to the outline of the head and a romantic look keeping with the new Directors' silhouette.

The basis for such a hairdo is, of course, a good permanent and expert cutting. The back will be scizzored closer to the head than was true of the bubble cut and should be tapered slightly.

This is still a hairdo without a part but if you feel happiest with a part, your hair stylist can work out a version with part for you. Length of the hair is about two inches over the head for a light and feathery look.

When you have your hair cut and set, ask for directions for setting it yourself. For every woman should know how to take care of her between visits to the salon.

YOU CAN'T WISH YOUR HEADACHE AWAY

Despite the miracle-drug cure all publicity constantly on the front pages of our newspapers, many of us are half sick and half well all the time, in bed and then up again, barely able to drag one foot before the other but grunting along and wishing for health.

Newspaper headlines frequently tell us about famous suicides. Reason, ill health!

One reason you do not read about but which is present in every Dr. Gordon case of "ill Miller D.C. health" is "disheartened and disinclined."

It is both confusing and disheartening when you have spent your money and time in a careful, diligent effort to recapture your health only to reap failure after each effort.

The difference of opinion and long line of different drugs serve to create a sort of helplessness which causes you to quite all efforts and revert to wishful thinking and despondency.

Life becomes gray and disheartening. Things lose their interest. No zest for life remains after years of defeat. We can't get our message of hope through to all of our discouraged sick folks but within a few there remains a small spark of courage that flames into action when they see or hear our message.

Hoe Down

(Editor's Note: This is the second in a series of articles on Rose Culture compiled by Mrs. Margaret Bush, former Amarillo Rose Society president, and submitted by Mrs. H. H. Boynton, Pampa Rose Society president.)

The type of understock used in our locality is important. Roses grafted on shallow roots growing close to the surface of the ground (multiflora) are not satisfactory here as they are easily killed by extremes in temperature and are easy to cut in cultivating.

The most satisfactory and economical rose plants to buy are the very best No. 1 barroot, two-year old field-grown plants from a reputable nursery. There is no such thing as a bargain rose. Nurseries sell their choice plants to the retail trade rather than through local nurseries.

Control of insects and fungus diseases is best started in the dormant season with a thorough cleanup of the bed and with two or three applications of material especially designed for this purpose called dormant sprays.

In the spring do not wait to spray until bugs and diseases take over but start with a regular and thorough spraying or dusting program as growth starts and before buds form.

For most common pests, the sucking insects such as aphids and thrips, can be satisfactorily controlled by lindane or malathion. Insects do not seem to develop a resistance or immunity to malathion and fungicide early as a preventive rather than a corrective measure your troubles will be diminished. Later in the season, it is wise to determine what the pest or disease is and how it is damaging the plant and then use the type of material best suited for its control.

The most common fungus diseases of rose are mildew and blackspot. When the diseases start immediate action is imperative to check them before they spread to other parts of the garden. For blackspot pick and burn all infected leaves and spray with equal parts Captan and Orthozin (one tablespoon each to a gallon of water.) Drench the plant and all surrounding ground thoroughly. Mildew is best controlled by M-dex, Act-dione, or Kromad. Ferbam will control rust on roses.

The importance of reading labels and following very closely the directions of the manufacturer

Mary Hill Davis Week Of Prayer Observed By Central Baptist WMS

Central Baptist Women's Missionary Society observed Mary Hill Davis Week of Prayer for state missions last week with a program presented each day in the church. Mrs. Bob Callahan gave a daily devotional with a different theme.

"Banner of the Cross" was Monday's topic with Mrs. T. O. Ushaw in charge of the program. Participating were Meses. Harold McCleery, R. C. Brown, Curtis Liles and J. H. Reeves. Prayer calendar was read by Mrs. Callahan with silent prayer offered. Twenty-five ladies attended.

Hula Hoops Part Of Club Meeting

SKELLYTOWN - Skelly Schaffer Club met in the club house recently to elect officers for the ensuing six months. Mrs. L. D. Covart, president, directed the election.

Mrs. Leroy Allan was elected president; Mrs. Henry Gentry, vice-president; Mrs. V. C. Moore, secretary; Mrs. Warren Brodgin, treasurer; and Mrs. J. M. Chapin, assistant secretary and treasurer.

Mrs. R. E. McAllister was elected social chairman and reporter and Mrs. R. C. Heaton was selected as flower chairman.

Secret Pal gifts were exchanged and names revealed and new names were drawn for the next six months. Hula Hoops demonstrations were used for entertainment.

Hostesses, Meses. Leroy Allan and Henry Gentry served refreshments of salted nuts, cake, ice cream and iced tea.

Attending, other than those mentioned were Meses. L. F. Karlin, Russell Davidson, Bill Truitt, Ray Truitt, Ernest, and A. D. Dickinson. Meses. Chapin and McAllister will be hostesses for the next meeting Oct. 13.

Husbands! Wives! Get Pep, Vim; Feel Younger

Effort To Crush Steelworker Revolt

By JOSEPH HYTYNAN
 United Press International
 ATLANTIC CITY, N.J. (UPI)—A drive to crush a revolt within the United Steelworkers of America was in full swing today.

Resentment against the insurgents burst into the open Monday during the first session of the union's convention. It was high-lighted by a boisterous show of support for president David J. McDonald by sign-carrying, cheering delegates parading in Convention Hall.

The session also heard scathing denunciation of a "dues protest committee," headed by Donald C. Rarick, which is challenging McDonald's leadership.

Called "Scabs" Spurred on by loud support from most of the 3,500 delegates, convention speakers dubbed the committee members "inks" and "scabs" and urged they be thrown out of the union.

The rallying point for the demonstration of allegiance to McDonald came when the convention was asked to approve a resolution commending his administration.

It touched off the attack against the committee and the vibrant display of allegiance which gave the convention a circus atmosphere for about 30 minutes.

Rarick, a burly, soft-spoken steel worker from McKeesport, Pa., later charged the convention was "rigged" and claimed McDonald had advocated "violence" against the dissident group.

Shamrock Fair Goes On Again

(Special to The News)
 SHAMROCK — The 11th annual presentation of the Shamrock State Line Free Fair and this year's Quarter Horse Show will be ready to start on Friday morning, C. J. Van Zant is the president.

The Fair will attract scores of participants and a host of visitors. Top quality livestock, best of agriculture products and flowers and educational booths, a terrapin derby, Quarter Horse Show, Dance and other events will bring two full days of entertainment for every one.

To kick the fair off will be the presentation of "The Great Vigil" and his leading lady Julie in "Evening of Enchantment" in the Clark Auditorium at 2 p.m. and 8 p.m. Thursday. To close the fair a dance will be held in the National Guard Armory at 9 p.m. Saturday featuring the music of Clint Douglas and his Melody Boys of Wichita Falls.

are all taxable property within the city limits. Councilmen who voted unannouncedly for the election were: E. C. Hofmann, John Rindall Jr., Tracy Tapp, James R. Tindal and Dave Skidmore. The coming bond election is a solution to Shamrock's critical water problem.

Flash Floods Pour Over West Texas

Flash floods poured over the Midland - Odessa, Tex., area Monday night and along sections of the Rio Grande River following downpours of more than two inches.

The rain ranged along the edge of a cool Canadian air mass stretching from the upper Great Lakes to Texas and hitting hardest in the Texas Panhandle.

More than two inches of rain swept Midland in a brief period, sending floodwaters coursing through the streets. The high water was blamed for the derailment of 15 cars of a Texas and Pacific freight train east of Odessa, Tex. No one was injured.

The rain-gorged Rio Grande raged over its banks to a depth of eight feet, flooding 300 acres of cotton land near Presidio, Tex., and closing the international bridge leading to Mexico.

Other heavy rains along the storm front included nearly 2 inches at Kansas City, Mo., and about 1 inch at Peoria, Ill.

A small and unusual pocket of cold air pushed across eastern Colorado during the night, lowering temperatures into the 30s and sprinkling Colorado Springs with light snow.

Overnight readings ranged from the 40s over the northern Plains to the 50s in the upper Mississippi Valley and the upper Great Lakes and the 60s in the central Plains. Warmer air covered the Ohio Valley and the East with temperatures dropping no lower than 72 as far north as Lebanon, N.H., early today.

Dallas Lady Lost 21 Pounds with Barcentrate

Why starve to take off fat? Many diets are harmful. If you want to reduce safely, easily and without starvation diet, why not try the Barcentrate way, just like Mrs. Lola Ellis, 2704 Alabama St., Dallas, Texas, did?

Mrs. Ellis wrote us as follows: "I have lost 21 pounds taking Barcentrate. I highly recommend it to anyone for losing weight and it is also a wonderful tonic."

Get Barcentrate from any Texas druggist for just \$1.69. If the very first bottle doesn't show you the way to take off ugly fat, return the empty bottle for your money back.

Monday Comito received two \$10 bills in the mail, along with a note that said: "This is yours. I took it from your grocery store back in the thirties. Forgive me."

WANT THEIR MONEY'S WORTH
 PEGU, Burma (UPI) — Moviegoers here are not the sort who'll let a little thing like a flash flood disturb them.

When steady rains sent rivers over their banks and put the whole town under a foot of water, patrons at the local movie house simply sat on the back of their seats and saw the picture through the bitter end.

DIDN'T HOLD TRUE
 WINDSOR, England (UPI) — The earl of Winchelsea, 21, pleaded guilty and paid an \$11.20 fine for illegal parking Monday despite his family motto, "Conscious of no guilt."

Sheriff's Posse Elects Officers

Shamrock's Wheeler County Sheriff's Posse met and elected officers for the 1958-1959 session.

The Sheriff's Posse was organized on September 6, 1955 with Sheriff Bus Dorman as president. A position he has held since that time, and in the election of officers he was named honorary president. Cortez Barnett was elected president; Dr. O. M. Roberts, vice president; Wallace Fields, secretary; Glyn Bell, treasurer; and Dee Kincannon and Clois Hanner parade marshalls. C. G. Cantrell Jr., and Harold Williams elected to the Board of Directors. Succeeding Bit Mayfield and Buford Brown. Hold over directors of the board are, Duke Morgan, Bill Bush and L. B. George.

The group has attended 10 rodeos this season all at the requests of the towns to ride in their parades. They have taken their share of honors and now are looking forward to the Southwestern Exposition and fat stock show in Fort Worth in January. The posse has a palomino polo team that practices each Thursday night and Sunday afternoon. They now boast a membership of 42 active members.

Nine Cars Of Train Derail

MINNEAPOLIS, Minn. (UPI) — Nine cars of the Soo Line's "Winnipeg" passenger train jumped the track west of Minneapolis Monday night, injuring 16 persons.

The crash occurred near the community of Hamel, 16 miles west of here. Two ambulances and sheriff's cars shuttled the injured to North Memorial Hospital at nearby Robbinsdale.

All of the injured were treated and released except one, who was reported in fair condition at the hospital.

The first six cars of the train were mail and baggage cars, and only three of the derailed cars carried passengers.

The train was traveling at high speed, and the jolt of the derailment telescoped several of the mail and baggage cars.

The train derailed along a stretch of level track which parallels a highway. The engine and cars left the roadbed and plunged into tall grass along the side of the track. The engine and five cars overturned.

Six other passenger cars remained on the track and were pulled from the scene by a switch engine sent from Minneapolis.

Soo Line officials said the cause of the crash was not immediately determined.

The train was in two sections, one bound for Winnipeg and the other for Portal, N.D. The sections were to have been separated at Glyndon in northwestern Minnesota.

A football can be described as an oblong spheroid made of pigskin and inflated with oxygen.

This spheroid can be a tricky thing capable of taking many a crazy bounce when you least expect it.

Pampa High's young Harvesters were not expected to beat Wichita Falls last week.

This, they might have been able to accomplish, although there are surely worse sufferings than 34-2, had the Big Green and Gold parleyed meanness with desire and played together as a unit.

Harvesters' Big Chance!

Only four short days lie ahead, in which time the Harvesters must sit down, take stock of themselves and then do a massive job of re-grouping their battered hides.

any other club on the Harvesters' 1956 schedule, for that matter. And simply because the Pampans haven't got the "hosses" to do the pushing.

But, let it be written, "The Harvesters shall improve." What's that? You giggle like a flirtatious school girl and say, "they can't get any worse."

That's up for debate, right now. They could get worse. But won't. The United Press International's board of state schoolboy coaches rated Wichita Falls as the No. 2 outfit in the state, behind Abilene.

"It's not that the kids aren't willing to learn," Curfman says. "What we need is time. With a few more games under our belts we could come around. One of our weaknesses is getting used to each other. Lot of these kids never played together before. I didn't know them, and they didn't know me before last spring, and they didn't know any of my offensive and defensive formations before that either."

The Arlington Heights outfit Pampa smacks into down in Fort Worth Saturday night will not, of course, be a push over. Nor will

Whose An Old Timer?

How about that Frank Kempa drilling out a home run in Potter County Stadium Sunday afternoon. Playing second base for the Old Timers against ex-Amarillo Gold Soxers, Kempa teed off on a homer his first trip to the plate in the initial inning with Joe Bauman on first, after he had singled.

Kempa's circuit clout was the margin of victory, the Oldtimers winning, 2-0.

Bauman, of course, was the big guy who hammered 72 homers at Roswell, N. M., in 1954. Other familiar Pampa faces dotting the Oldtimers lineup were Joe Fortin, Jack Venable, who opened on the hill for the Sox and gave up the homer to Kempa, and T. J. Johnson.

Flake's Still Around

Arian Flake, who's been the starting quarterback at Monterey ever since the school opened three years ago, may be the first, last and only Plainsmen athlete to win four varsity letters.

Flake, played with the Plainsmen as a ninth grader, since the

GARTON SNUBS TCU FOR ETS

FORT WORTH (UPI)—Texas Christian's dream of fielding one of the nation's fastest sprint relay teams faded today.

The fourth member of the "super" freshman spring quartet signed to TCU letters of intent didn't show up for registration Monday.

Instead, the missing youth, Sidney Garton of New Boston, state sprint champion, turned up at East Texas State at Commerce.

Despite a 32-28 loss to Fort Worth Paschal last Saturday night in Lubbock, the Monterey Plainsmen may still be the big threat to Amarillo High's District 3 AAAA title.

Monterey led in first downs by a whopping 29 to 10 and in yards rushing by 280 to 126.

Tulsa Central, the Saturday night foe for Borger's Bulldogs, will work out on the Harvester Park playing field here Friday evening.

Inter-scholastic League rules allow freshmen to play if the 9th grade is situated in the same building that houses the high school students.

Two Monterey baseball players, Jim Harris and Donnie Bumpass, earned diamond monograms as freshmen, and could earn four varsity letters.

And then there was the gal with a million dollar smile. She only smiled at guys with a million dollars.

Abilene Shades Wichita Falls As No. 1 4A Schoolboy Outfit

DALLAS (UPI)—Houston Lamar was the only new team to break into the top 10 Class AAAA football ranks this week as opening game results reshuffled the pre-season ratings except for top-rated Abilene and third-ranked Port Arthur.

The Houston school's 6-0 victory over previously 10th-rated Baytown boosted the Cardinals from 17th into 8th place in the balloting by the 16 coaches who make up the United Press International rating board.

There still was no doubt that Abilene, unbeaten through 51 straight games, was their choice for the No. 1 spot as the Eagles gained 13 of a possible 15 first-place ballots (coaches do not vote for their own team) and were rated No. 2 on the other ballots for 144 out of a possible 150 points.

Port Arthur's 20-20 tie with Louisiana's No. 1 team, Baton Rouge

istrouma, did nothing to mar their support, taking third with 100 points.

No 3 4A Club On Top 10 List

DALLAS (UPI)—Tabulations of the United Press International Texas High School Football Coaches Board Class AAAA ratings (first place votes and pre-season ratings in parentheses):

Table with 2 columns: Team, Points. Lists top 10 teams including Abilene (131st), Wichita Falls (3rd), Port Arthur (3rd), Dallas Jefferson (tie 8th), San Antonio Jefferson (7th), Highland Park (2nd), Corpus Christi Ray (6th), Houston Lamar (17th), Galena Park (5th), Austin High (tie 8th).

OTHERS—Corpus Christi Miller (17 points), Odessa (16), Baytown (15), Texarkana (14), Amarillo High (10), Big Spring, Waco, Orange and Houston Milby (8 each), Spring Branch and Lubbock High (7 each), Port Neches (6), Beaumont and Fort Worth Paschal (5 each), Dallas Sunset (4), San Angelo (3), Lubbock Monterey (2), Garland and Temple (1 each).

But, the Wichita Falls Coyotes were breathing down the Eagles' necks with 135 points earned with three first-place votes and no ballot for less than fifth.

Three Votes

LUCKY DURHAM gets promotion

RUBEN STRICKLAND fractures wrist

LOOK OUT 'JACKETS

Harvesters Hard Nose It Monday

By RICK PEZDIRTZ Daily News Sports Editor

Except for losing a fourth string halfback, there was nothing but good news out of the Pampa Harvesters' Camp Monday, and that may mean bad news for Fort Worth's Arlington Heights High School this week.

"They've never looked better since I came here last spring," said Coach Babe Curfman, summing up a long and rugged Monday workout, in which his young Harvesters exploded with power and precision all over the place while locking horns in a heated scrimmage with the Pampa High B-team or Shockers.

Only severe casualty of the Monday scrimmage was the loss of fourth team right halfback and outside linebacker Ruben Strickland. The 134-pound junior suffered a fractured wrist as he was throwing a tackle at reserve left half, Sherill Miller, running with the ball.

The loss of Strickland put the score at two for sub Pampa High backs who have been sidelined with injuries during the past six days. Third team fullback, Keith Yager, was put out of commission in last Tuesday's drills, absorbing pulled ankle ligaments.

Curfman quickly sent a call for help to replace Strickland, bringing little Lucky Dunham, a 124-pound sophomore who was the leading ground gainer in last week's 19-12 Shocker win over Perryton's B-team, back up from Blyrd Dog Trice and Deck Woldt's Pampa B-squad.

No serious injuries resulted from Pampa's 34-2 loss at Wichita Falls Friday night, which may be a big blessing in disguise. So often, polished clubs like the Coyotes not only run up a big score on younger teams, but knock the whey out of their opposition at the same time, many times crippling front line players up for the entire season.

Curfman and his two varsity aides, Duain Lyon and Eural Ramsey, did some wholesale switching around Monday, after viewing the first half film of Friday night's Wichita Falls reversal.

Starting center, Dickie Watkins, who showed up poorly at a defensive end position has been moved into the middle of the Harvester line, replacing Guard Bailey Clements as the middle man over "the offensive center on a five-man line setup."

In a backfield move, expected to give the Big Green a better offensive punch, Rex Williams, almost fully recovered from a pulled knee muscle and a preseason attack of the flu, was inserted into the No. 1 team's backfield at halfback.

Williams, who was the top Pampa runner in last spring's Future-Exes game, however, is only being given a look as a first stringer. "If he doesn't buckle down and work hard, he may have a lot of trouble staying on the first unit," Curfman commented.

In another move, that brought signs of surprise from just about nobody, Terry Haralson was moved up to the second team. The scrappy 170-pound junior, whose best was in the band ever since the eighth grade, was the sharp-looking Harvester back on the field at Wichita Falls, Friday night. He raced for 27 yards in six carries to spearhead a 54-yard second half drive that bogged down on the Coyote 11, and also latched onto a 14 yard pass.

"He'll be a tough kid to keep out of the starting lineup after a couple more games like that," Curfman said of Haralson. The addition of Williams to the first team backfield, if nothing else, adds a considerable amount of speed. He replaces Gary Willis, who had a bad night against Wichita Falls, and has been moved from halfback to fullback, behind Mert Cooper and Clovis Shipp. In Monday's scrimmage, two linemen were impressive on defense. Harold Stokes and Don

Other changes saw Corpus Christi Ray drop one notch to 7th with 39 points after a 22-20 verdict over Spring Branch, Galena Park skid from 5th to 9th with 34 points after a scoreless duel with Houston Milby and Austin High drop from its tie for 10th to 10th with 28 points despite a 42-0 walloping of San Antonio Highland.

Corpus Christi Miller, Odessa, Baytown, Texarkana and Amarillo High headed up the remaining 19 teams getting support in the voting.

This week's schedule is topped by Wichita Falls' clash with Class AAA's No. 1 outfit, Breckenridge

Pampa Jr. High Elevens, Rebels & Reapers Ready

Phillips Has 45 Gridders In Training

The Robert E. Lee Junior High Rebels, newest addition to Pampa football, don't make their home debut until October 2 when they entertain Dumas, but the youngsters of Coach Norman Phillips and Lester Ramsey figure to be seasoned veterans by then.

The Rebels launch their first season in Amarillo against Bowie Junior High Thursday and return the following week to face Sam Houston Junior High.

With a beefy 45-man squad on hand for pre-season workouts, Phillips and Ramsey, hope to have a conference contender this year.

Of his Rebel squad, Phillips says, "We've been looking pretty good in our early workouts. But it's hard to tell right now just how they'll do in a game. I lost one kid from the squad. Said he was going to concentrate on basketball, because when he dropped the football, it didn't bounce straight back up to him!"

ed in the cellar since 1945, climbed to within two games of the seventh-place Chicago Cubs when they beat the St. Louis Cardinals, 6-2, Monday night. The Milwaukee Braves trimmed their magic pennant-clinching number to four with an 8-3 victory over the Los Angeles Dodgers in the only other day or night activity in either league.

Roberts, who seemed over the hill after 19-18 and 10-2 won last records the past two years, pitched a seven-inning game to raise his current mark to 16-13. It was his 19th complete game of the season and his five strikeouts raised his total to 123 for 252 innings.

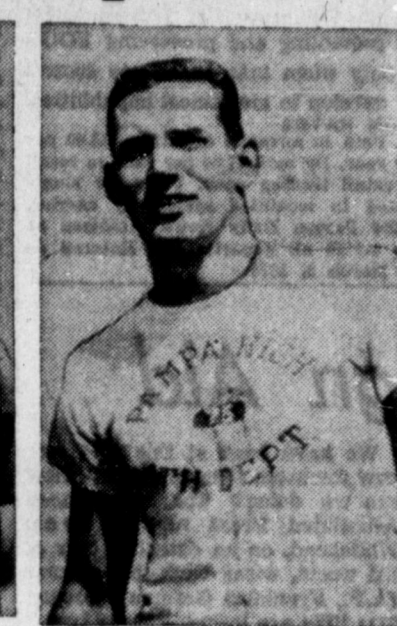

Ashburn, who set a club record by playing in his 1431st game, raised his league-leading average to .343 when he smashed a triple and a single. He now holds a five-point lead over St. Louis' Stan Musial, idle again Monday night.

Doubles by Harry Anderson and Jim Hegon plus a sacrifice fly by Ted Kazanski gave the Phillies a 2-0 lead in the second inning and they added single runs at the expense of Vinegar Bend Mizell in the fifth and sixth.

An eighth-inning error by Don Zimmer paved the way for the Braves to score five runs and beat the Dodgers for only the eighth time in 22 games. Zimmer's error followed a single by Casey Wise and the Braves then raked Fred Kipp and Clem Labine for four more singles and a walk. Joe Adcock had two singles and his 19th homer to pace the Braves' 11-1 hit attack which brought relief pitcher Bob Rush to his ninth victory.

Snuffy Killed In RR Crash

BAYONNE, N.J. (UPI)—George (Snuffy) Stirnweiss, former New York Yankee second baseman and American League batting champion in 1945, died in the wreck of a Jersey Central Railroad commuter train Monday. It was officially confirmed today.

His wife and six children in Red Bank, N.J., had feared the worst since he turned up missing after being seen boarding the fatal train.

Stirnweiss had a luncheon appointment in New York Monday but boarded the ill-fated 9:16 a.m. train because, as a neighbor explained, "George always liked to be ahead of time."

North, both dealt out plenty of punishment to backs running in the general vicinity of the positions they were patrolling.

More rock-ribbed combat is on tap for the Harvesters Tuesday and Wednesday, before the squad tapers off with lighter drills Thursday, prior to leaving for Fort Worth Friday.

Pampa plays in Fort Worth's 20,000-seat Farrington field against the Yellow Jackets of Arlington Heights High School Saturday night.

Kickoff is set for 7:30 p.m.

Babe Talks To QB Club Tonight

Babe Curfman, head football coach at Pampa High School, will preview the Harvesters' chances of topping Arlington Heights in Fort Worth Saturday night, when he speaks before the Pampa Quarterback Club here tonight.

The club, in the process of re-organization, will meet at 7 p.m. in the gymnasium of Sam Houston Elementary School.

All supporters of the Harvesters, who would like to help develop interest here in the grid sport, are urged to attend tonight's meeting.

The Pampa Daily News

YOUR FREEDOM NEWSPAPER

We believe that freedom is a gift from God and not a political grant from government. Freedom is not license. It must be consistent with the truths expressed in such great moral guides as the Golden Rule, The Ten Commandments and the Declaration of Independence. This newspaper is dedicated to promoting and preserving YOUR freedom as well as our own. For only when man is free to control himself and all he produces, can he develop to his utmost capabilities.

Our Foreign Aid

Dean Clarence Manion has sounded a note that ought to have the full attention of those who are interested in the future of our nation. He tells us that "it is essential for our survival that we check our compass periodically lest we lose our sense of direction."

This sense shortage of liberty cannot be cured by a spate of soaring Soviet Sputniks. It cannot be overcome by Communist military might nor by any real or conjured superiority in the field of Soviet education, Soviet medicine or Soviet industrial production.

The thickening wilderness of our confusion is essential for our survival that we check our compass periodically lest we lose our sense of direction. We are at war with Communism because Communism by its nature and in its practice is at war with human liberty.

FBI Chief Lashes Out

"One hundred years ago — on January 6, 1859 — a prominent newspaper in the nation's capital, under the head, 'Rude Boys,' sternly rebuked a group of youths for misbehaving. What, in that age of Victorian discipline, constituted delinquent behavior which could evoke press comment? Two country boys wearing newly purchased shawls were annoyed by a group of city youths who followed after them shouting, 'Indians!' and executing a mock war dance."

The exuberance of youth, at one time a matter of high spirits and rudeness, has degenerated into rape, armed robbery and murder. Mr. Hoover lashes out at both home and school. He cites as one of the major causes for the rise in juvenile crime, the abandonment of his position as head of the household by many a male parent.

BETTER JOBS

By R. C. HOILES

Competition Spreads Prosperity

XII. Bastiat continues his explanation of how competition spreads prosperity in this manner:

"In fact, were it possible for an individual, a family, a class, a nation, possessed of certain natural advantages, of an important discovery in manufactures, or of the instruments of production in the shape of accumulated capital, to be set permanently free from the law of Competition, it is evident that this individual, this family, this nation, would have forever the monopoly of an exceptionally high remuneration, at the expense of mankind at large. In what situation should we be if the race of Cadmus alone could read, if the direct descendants of Triptolemus alone could handle the plough, if printing were confined to the family of Gutenberg, cotton-spinning to the children of Arkwright, and if the posterity of Watt could alone work the steam-engine? Providence has not ordered things thus, but, on the contrary, has placed in the social machine a spring whose power is only less surprising than its simplicity — a spring by the operation of which all productive power, all superiority in manufacturing processes, in a word, all exclusive advantages, slip from the hands of the producer, having remained there, in the shape of exceptional remuneration, only long enough to excite his zeal, and come at length to enlarge the common and gratuitous patrimony of mankind, and resolve themselves into individual enjoyments always progressive, and more and more equally distributed — this spring is Competition. We have already seen its economical effects — and it now remains for us to take a rapid survey of its moral and political consequences. I shall confine myself to the more important of these.

"Superficial thinkers have accused Competition of introducing antagonism among men. This is true and inevitable, if we consider men only in the capacity of producers, but, regarded from another point of view, as consumers, the matter appears in a very different light. You then see this very Competition binding together individuals, families, classes, nations, and races, in the bonds of universal fraternity.

"Seeing that the advantages which appear at first to be the property of certain individuals, become, by an admirable law of Divine beneficence, the common patrimony of all; seeing that the natural advantages of situation, of fertility, of temperature, of mineral riches, and even of manufacturing aptitude, slip in a short time from the hands of producers, by reason of their competition with each other and turn exclusively to the profit of consumers, it follows that there is no country which is not interested in the advancement and prosperity of all other countries. Every step of progress made in the East is wealth in perspective for the West. Fuel discovered in the South warms the men of the North. Great Britain makes progress in her spinning mills; but her capitalists do not alone reap the profit, for the interest of money does not rise; nor do her operatives, for the wages of labour remain the same. In the long-run, it is the Russian the Frenchman, the Spaniard; in a word, it is the human race, who obtain equal satisfactions at a less expense of labour, or what comes to the same thing, superior satisfactions, with equal labour.

"I have spoken only of the advantages — I might say as much of the disadvantages — which affect certain nations and certain regions. The peculiar action of Competition is to render general of what was before exclusive. It acts exactly on the principle of Insurance. A scourge visits the fields of the agriculturist, and the consumers of the bread are the sufferers. An unjust tax is laid upon the vines of France, and this means dear wine for all wine-drinkers. Thus advantages and disadvantages, which have any permanence, only glance upon individuals, classes, or nations. Their providential destination in the long-run is to affect humanity at large, and elevate or lower the condition of mankind. Hence to envy a certain people the fertility of their soil, or the beauty of their harbours and rivers, or the warmth of their sun, is to overlook the advantages in which we are called to participate.

"Hurling Others Injure Ourselves. It (envy) is to condemn the abundance which is offered to us. It is to regret the labour which

of their resentment against a world made up of adults who have, in too many cases, failed to mature. Irrationally, and childishly, they fancy that it is mature to use force and violence whenever their wills are crossed. It is inevitable that they will think this because no one has taken the trouble to assure them that maturity comes with the abandonment of violence.

As Mr. Hoover puts it, we will either have a disciplined society, or we are well on the way to barbarism.

It is saved to us. Hence national jealousies are not only perverse feelings — they are absurd. To hurt others is to injure ourselves. To place obstacles in the way of others — tariffs, coalitions, or wars — is to obstruct our own progress. Hence bad passions have their chastisement just as generous sentiments have their reward. The inevitable sanction of an exact distributive justice addresses itself to men's interests, enlightens opinion, proclaims and establishes among men these maxims of eternal truth: that the useful is one of the aspects of the just; that Liberty is the fairest of social Harmonies; and that Honesty is the best Policy."

Which Shall He Hand Down?

Robert Allen Reports:

New Approach To Major Cancer Research Question

Robert S. Allen is on vacation. During his absence, his column today is on a highly significant development in the titanic research battle against cancer. Dr. Kaiser, 20-year veteran of the Public Health Service, is Chief of Field Investigations and Demonstrations Branch of the National Cancer Institute. He is also a founder of the Inter-Society Cytology Council, that fosters the cytological method in cancer detection.

Washington — A brand new approach to a major question in cancer research may explain some ancient notions about what causes cancer, and may result in an intensive nationwide program to find the factors that produce cancer in man.

The theory that natural environment influences man in hundreds of years old, and the idea that human cancer is somehow related to environmental factors was recorded a thousand years ago. "Cancer houses" and "cancer families" are familiar superstitions to students of world literature and folklore.

But there is modern evidence to show that these ideas may not be so unreasonable. From a number of widely scattered observations, the idea has developed that cancer occurrence varies in different geographical locations. However, though numerous scientists have speculated on the meaning of the discovery, few studies on the underlying reasons have been pursued in the United States.

For some time, the National Cancer Institute, the cancer research arm of the Public Health Service, has been investigating cancer occurrence among workers in certain industries, studying exposure to industrial materials known to be specific causes of cancer.

Now, for the first time, an opportunity has arisen to extend the National Cancer Institute studies to include investigation of the many normally unsuspected factors that may have some effect on cancer occurrence in all groups of people, regardless of their occupation.

The long range objective of the study is to find a "common denominator" in what may be an explosive chain reaction leading to cancer. For although cancer kills many persons each year, the puzzling question is, why do the majority of persons not have cancer, when most people are exposed to similar environmental factors? What factors may protect some, and make others susceptible? The answers to these questions might lead to the development of cancer control measures and, of course, the ultimate goal of the entire cancer effort is prevention.

Fair Enough

Lawyers Impose Supremacy Of The Supreme Court

by WESTBROOK PEGLER

A chain of thoughts, beginning with the indictment of Frank Costello in his income tax case, has led to the tacit admission by all authority in this country that the Supreme Court is supreme over Congress, over the Executive Department and over the people.

Lawyers will lecture with patient tolerance and cite textbook Latin to belittle this disclosure as old stuff and not really true in the practical sense. But it is absolutely true. The Supreme Court could decide that two-times-two equals five and that would be the law of the land until Congress could rally and pass a law repealing the court's decision. The court then could nullify that and so on forever.

Lawyers all are members of a cabal which has imposed the supremacy of the Supreme Court on the people and on the governments of this aggregation of sovereign states. Lawyers have a special interest, their own livelihood, at stake which disqualifies them as trustworthy authorities. Lawyers rarely squeal on other lawyers or attack judges or the courts. The judges, in turn, stick together in defense of their power, and though individually, like lawyers, they may abuse one another informally, one judge will not attack another.

I will return in a minute to the chain of thoughts beginning in the Costello indictment, but while I am under momentum let me proceed in my own way. A lawyer who should speak as frankly in the open as he speaks in private would expose himself and his clients to the malice of not only the particular judge concerned but of all judges. They have a terrible power to wreak malice, and lawyers grudgingly admit that this is so when they are driven into the last corner. That is, they admit that a judge, though guilty of the most flagrant hatefulness in abusing a victim at his bar, cannot be punished by any authority. He can be reversed by superior judges, but those superiors would not rebuke hatefulness. They would hold that

The Costello indictment was based on hearsay evidence given by agents of the treasury. Costello's appeal was foredoomed because deep in the background of the grand jury as an institution stands the old English custom of crediting hearsay even in trials before the bar. We have tended to discredit hearsay in trials, but the solemn court judgment in this case that hearsay was good ground for indictment was a startling reminder that grand juries have terrible powers inherited from England. The grand jury originally was an aristocratic institution, but the American grand jury is democratic. Thus malice and the selfish interests of the individual juror and their cousins and their aunts may be served without the slightest more sensitive and honorable, aristocratic are sensitive and honorable.

We come to the fact that the Supreme Court has power to rely on tea-leaf readings or gaze into a crystal ball for its authority. This was laid down in the miscellany integration case where the court pulled down a book by a Swede who had spent only a short time in this country and culled a bunch of Communist tracts and used all this as authority for its decision, absolutely ignoring all that had come to pass before the bar. The highest authorities now throw it in our faces that by inheritance from Rummeyde we are absolutely bound to regard with the awe that oafs accord royal majesty whatsoever the Supreme Court decides. It may quote Captain Billy's Whizzbang, the Police Gazette or the Bartender's Guide and that shall be the law of the land.

This is not lawyerlike discussion, but we may thank God for the right not to be confined to the cant and casuistry of law school scholars in this gathering storm of hatred against the federal courts and their wily henchmen of the learned profession of the law.

There are a good many people who have a modest amount of trouble with the circulation in their legs. Often it is difficult to put a name to it. Sometimes the situation improves after stopping smoking, improvement in the general health or change to a warmer climate. But there are also two important diseases which have to be considered and which, if found, require treatment.

One of these is Burger's disease, which is an inflammation of the lining of the arteries and veins, generally in the feet and legs. Naturally this interferes with the circulation and may block a vessel entirely so that the pulsation of the foot artery is completely lost.

For some reason this is much more common in men than in women and almost invariably in excessively heavy smokers. In addition to smoking, infections, and a poison known as ergot, are sometimes considered to play a part in the development of Burger's disease. This is a really serious condition. Smoking must be completely stopped and other measures carried out faithfully. If the blood circulation becomes completely shut off the victim may have to lose a toe or a foot.

Another related disease is called Raynaud's disease. In this disorder the blood is not cut off entirely, but the vessels develop spasms. When such contractions of the blood vessels occur — often from cold water — the fingers, hands, or feet turn white. Whatever brings on such spasms of course, should be avoided, and smoking has to be prohibited as in Burger's disease. The treatment of blood vessel disorders is quite complicated. In some cases of Burger's disease, for example, drugs to delay coagulation of the blood are used. Sometimes also, favorable effects are obtained with a machine applied to the leg which varies the pressure much as a milking machine would do. If the blood supply to an entire foot or toe has been cut off it may be necessary to perform an amputation.

Looking Sideways

By Whitney Bolton

NEW YORK — If there is anything wrong with our foreign policy, and some people say there is, it would seem to be the man and women who put some dollars together last June and sailed off freely away to Europe. They are all back now, or most of them, and to hear them yacking at dinner parties and other controlled assemblies is to go out of your mind with confusion.

I don't know how it is with the folk in Indianapolis or Dalonega, Ga., but here in New York the air is filled and shrill with the commentary of the 90-day experts on what is wrong with Europe, with us, with Europe in relation to us and with us in relation to Europe. One man, who passed four days in Rome, has the Middle East situation all buttoned up and ironed out and to hear him speak you would think that if he could only reach the ear of Dulles, we'd have things made in that boiling area. Another man who passed three days and a half in Paris, feels that if he had been able to get to De Gaulle he could have seen the general straight for all time. A fellow table-mate tried to point out that, after all, this man was there less than four days and in France for the very first time in his life, so how could he be so positive? The man replied: "That's the thing. I have a fresh, clean point of view untrammelled by experience." That's the way they talk: "I can't help it."

"I was in Istanbul for five days, an enchanting place," a lady said, "but I didn't let grass grow. I can tell you, I dug right into things and I certainly could tell the Turks where they are wrong. It's so obvious I'm amazed they don't see it."

Do you think she was embarrassed or self-conscious to be so direct in her estimate? Not at all. She was serene in her positiveness. The Brussels Fair, or whatever it is called, struck some sort of new championship in having no Middle Ground. Our American tourists either hated it or loved it and that was that. The haters thought it was a noisy, over-decorated gyp from front gate to exit and those who loved it considered it the prettiest and most beguiling thing since the Crown Jewels of Elizabeth I.

Billy Rose, an old and much esteemed friend, came back and called our national entry a candy box filled with penny candy and implied we had thrown in the towel to the USSR. Zeida Malcom, an equally old and much esteemed friend, came back and said our pretty, effortless, soft-sell exhibit made the Russians seem gauche and sweating. There you are, take, as they say in Brooklyn, your "cherce."

About the only thing all our tourists seemed to agree upon was that it was fun to dine in a room for 60 in the topmost ball of the central theme exhibit, The Atomium. The price was right, the trip up through the connecting galleries was exciting and the food was good.

One lady who did a sort of world's tour of the eating places at the Fair said she thought the Japanese provided the most attractive dining background, the French their guests the best and the Russians offered the most discouraged and daring table manners. She said that not once but twice a male table-mate, a stranger, engaged her in conversation in which he confessed that he hated his native Russia, the communists, the exhibit, Krushchev and the MVD and openly, noisily, envied her her free return to the United States.

"I only saw him twice, though," she said. "He seemed to disappear after that."

BUICK '59

SPECIAL PREVIEW THURSDAY NIGHT 7:30 P.M.

TEX EVANS BUICK CO.

OUTWARD TO THE STARS (20)—Landing on the Moon

By Don Oakley and Ralph Lane

(1) Since the Moon has no atmosphere to support wings or parachutes, landing upon it will have to be done entirely by means of using rockets for brakes. Even though the Moon's gravity is weak (one-sixth that of Earth's), considerable force will be needed to counter the Moon ship's momentum in its fall.

The entire operation will be a delicate maneuver, probably handled by automatic instruments. Some type of radar altimeter will control the rocket motors to fire them at the precise moment and strength. Gyroscopes will maintain the ship's perpendicular attitude.

It is thought that much of the Moon's surface

is covered with fine, pumicelike dust, here being spewed upward by the rocket blast of the approaching ship. Determining the thickness of this layer of dust will be important before landing, lest the ship be engulfed by it.

(2) The first men step out upon the surface of the Moon, but still in space in terms of atmosphere and temperature. Temperature extremes, estimated by astronomers, range from 212 degrees F. (the boiling point of water) at noon, to -238 degrees F. at midnight. A step from sunlight into shadow means a difference of hundreds of degrees.

(3) A forbidding "moonscape," unrelieved by

meadow or forest or any form of life that we know of, greets the landing party. All about are craters, some as much as 10 miles in diameter. Ringed and walled plains, up to a hundred miles across, are also part of this vista, along with two-mile-wide crevices and the vast plains called "seas." Towering above all are the jagged mountains, the highest 30,000 feet above the average level. Unsoftened by wind or rain, they appear needle sharp. From the Moon, men view the Earth as no one before has seen it—remote and lovely, a blue jewel set in a black sky. It makes the Moon seem all the more harsh and lonely.

Next: The Lunar Colony.

On The Business Scene

Steelmaking operations, which rose to a 1958 peak last week, will continue to climb for at least the next six weeks, barring an auto industry strike, Steel Magazine predicted. The trade weekly said steel orders were heavier than they have been at any previous time this year largely because of continued strong demand for construction products and increased demand for automotive steel.

Housing starts during August rose to an annual rate of 1,170,000 units or 10,000 above the July pace and sharply higher than the recession low of 915,000 in February, the government reported. Meanwhile, applications for FHA insurance on proposed new homes climbed to 35,600—a gain of 1,900 over July.

World production of cotton is expected to resume its upward climb and create new surplus problems, the International Cotton Advisory Committee reported. The Committee said the U.S. during the last two years had trimmed its cotton stocks from a 1956 peak of 14,500,000 bales to 8,700,000 bales last Aug. 1. This was accomplished by intensified acreage control and stimulation of exports.

The government announced work has started on a new rocket engine with 1,500,000 pounds of thrust—eight times greater than the largest in existence now. Work on the engine is being carried out by the Rocketdyne division of North American Aviation, Inc., which received a \$2 million contract.

The board said any Negro student "whose enrollment is forced upon this university enters as an unwanted matriculant." In a unanimous resolution, the board said that a Negro's "continued presence will serve as a symbol of defiance to the traditions and customs of the university."

Sixty nine Negro students enrolled this week at the New Orleans branch of Louisiana State University under the preliminary injunction issued Monday by the Federal District Court Judge Herbert Christenberry. Friday, a three-judge panel of the Fifth Circuit Court of Appeals upheld Christenberry's injunction and denied attorneys for the state and LSU a stay of the injunction.

GETTING A LIFT—Unable to stand upright after an injury, "Rani," 19-year-old elephant at the Nuernberg, Germany, zoo, is lifted to her feet with block and tackle. Unable to stand, "Rani" was also unable to eat and nearly starved before zoo workers came to the rescue.

Prosecution Of Goldfine Scheduled

WASHINGTON (UPI)—The administration expects to begin prosecution of Boston millionaire Bernard Goldfine for contempt of Congress in the next few weeks, it was disclosed today. A spokesman for the U. S. attorney's office here told United Press International he expects the contempt citation voted by the House to be turned over to a grand jury "within a matter of several weeks."

The grand jury would then decide whether to indict Goldfine, gift-giving friend of Presidential Assistant Sherman Adams. An indictment would be followed by a trial. If convicted, Goldfine is liable to a year in jail and a \$1,000 fine.

Goldfine was cited for contempt of Congress for refusing to answer 22 questions about his financial dealings posed by the House influence - investigating subcommittee.

Obituaries

THEY RE-GREW HAIR IN 9 MONTHS IN 6 MONTHS

Mr. H. Newhouse, Woodale, Illinois Mrs. H. Haller Miami Fla. Noted Hair Expert Warns: Don't Put it Off Until It's All Off!

Hair Specialist Here Wednesday Will Show How To Save Hair And Prevent Baldness

CORAL GABLES, Fla. — New home treatment methods for saving hair and improving its growth will be demonstrated in Pampa, on September 17, Wednesday only.

Trichologist J. J. Stalteri will be in charge representing the dynamic Harlow Hair Experts organization. He will personally examine hair-worried men and women from 1:00 to 8:00 p.m. Wednesday at the Pampa Hotel.

This new treatment is neither "mail order" nor "cure-all." It is adapted to the individual after a personal examination and progress is checked personally at regular intervals by a Harlow expert who can be helped.

For many years now Harlow Hair Experts have been checking the hair of thousands of people across the country. They have encountered and dealt with hundreds of cases of every kind of hair trouble. From this experience has grown the body of scientific knowledge leading to the development of the new Harlow home treatment.

Will the new Harlow treatment cure baldness? "No!" For we cannot help men and women who are slick bald after years of gradual hair-loss. But if you still have fuzz and your scalp is creating hair, you can at least save and thicken what you have. Some conditions, such as "spot baldness" usually have complete coverage if caught in time!

Scientist Argues Against His Cohorts

By DELOS SMITH
UPI Science Editor
NEW YORK (UPI)—According to Sir Ronald A. Fisher, you can take the statistics which are said to show cigarette smoking can cause lung cancer and make just as good a case for supposition that inhaling cigarette smoke will help prevent lung cancer.

Sir Ronald's is a respected voice in world science. He is professor of genetics at Cambridge University and often is called "the father of modern statistics." His view, repeatedly stated, is the statistics show only an "association" between cigarette smoking and lung cancer but fall far short of showing one causes the other.

Newly challenged by scientists who believe "cause" has been statistically proven, he has now returned to the argument. His scientific opponents should also believe "the practice of drawing smoke in bulk into the lungs" has a protective effect," he said, since the same statistics show smokers among lung cancer patients are less likely to be inhaling than healthy smokers.

See Other Causes
"To believe either is, however, to run the risk of failing to recognize, and therefore failing to prevent, other and more genuine causes," he continued.

For instance, what are the hereditary influences on both the development of cigarette smoking and of lung cancer in any given individual? It is an unanswerable question at the present stage of knowledge. But the science of genetics contends ancestral genes can form any individual in such a way he is susceptible both to cigarette smoking and lung cancer.

In a previous round of the argument, Sir Ronald had used some statistics on identical twins as opposed to "fraternal" twins. Identical twins develop from the same fertilized egg and their ancestral patterns are identical, but fraternal twins develop from separate eggs and they can be as unlike in heredity as brothers resulting from separate births.

Has New Statistics
These statistics showed the identical twins were very much alike in their smoking habits whereas fraternal twins were not. Sir Ronald's opponents assailed this argument on the ground identical twins influence one another, more than fraternal twins. Parents dressed them alike; their identicalness was impressed upon them at every turn.

To that, Sir Ronald has now replied with a new set of statistics — on 53 identical twins and 18 fraternal twins. Of the identicals, 44 were alike in smoking habits and nine were unlike; of the fraternal, nine were alike and nine were unlike. This, he said, merely "confirmed" his previous statistics. Then he added his kicker.

Of the 53 identical twins, 27 had been separated soon after birth and had not been reared together. Nevertheless, 23 of the 27 were alike in their smoking habits.

The LSU board of supervisors adopted this policy at a meeting called to formulate new legal weapons against integration of the university's new commuter branch in New Orleans. The main LSU campus is still segregated except in the graduate

Quotes In The News

United Press International

LITTLE ROCK, Ark. — Mrs. L. C. Bates, head of the state chapter of the National Association for the Advancement of Colored People, on the closing of Central High School: "I have heard of no Negro parents who plan to take any of the children to Central or any of the high schools. As it looks now, we'll have to wait until it opens."

HOLLYWOOD — Debbie Reynolds' agent, on the breakdown of her marriage to singer Eddie Fisher: "She'll probably file for divorce next week."

NEW YORK — Arthur Larson, former presidential speech writer, on President Eisenhower's intellect: "The President is a man of not only deep intelligence but very great wisdom."

EXETER, England — Pamela Gant, whose husband is divorcing her because she reduced from a 47-35-54 figure to a 38-26-38: "My life has changed now that I no longer feel like a barrage balloon. Only older men made passes at me. But being normal has changed everything."

Negroes Are 'Unwanted' At LSU

BATON ROUGE, La. (UPI)—Louisiana State University asserted Saturday it would admit only those Negroes it was compelled by the courts to admit. It warned such Negroes they were "unwanted" and would be considered symbols of defiance to the university's customs.
