

Kaiser Breaks Ranks; Talks With Union

By J. ROBERT SHUBERT
United Press International

PITTSBURGH (UPI) — Another of the strike-bound major steel companies may follow the lead of the Kaiser Steel Corp. today in breaking with the industry stand against "inflationary" wage increases.

Kaiser started individual negotiations in Washington with the United Steelworkers Union following an announcement Sunday night that it would negotiate separately from the other 11 big steel company members of the industry coordinating committee in-

involved in the 104-day strike. Kaiser did not announce whether any terms had been agreed upon with the union, but the industry committee which it deserted said a settlement such as Kaiser contemplated would cost the corporation 10 cents per man hour for the first year of a three year contract.

The committee said for other companies, the same package would cost 17 cents per man hour, which "clearly represents an inflationary agreement."

However, an industry source told United Press International that one of the other companies composing the industry coordinating committee may also accept an agreement on the same terms as Kaiser. The industry source refused to identify the firm.

Union representatives will meet separately at 10 a. m. e. s. t. today with the 96 steel and iron ore firms. The major steel producers will confer with union bargainers in separate rooms in the Penn Sheraton Hotel, then the four-man union-management teams will confer.

The negotiators were stalling a race with the U. S. Third Circuit Court of Appeals in Philadelphia. The court was expected to rule late today or early Tuesday on a union appeal of an 80-day back-to-work injunction issued here last Wednesday by Federal Judge Herbert P. Sore.

The hold-out companies said the Kaiser move to settle "was dictated by circumstances peculiar to the Kaiser interests which also engaged in the aluminum industry, and which must therefore deal with the Steelworkers as representatives of their employes

in both industries." In Washington, Edgar F. Kaiser, board chairman of Kaiser Steel, said:

"We believe the decision to bargain separately with the union is the only responsible step we can take in the face of the mounting national emergency caused by the 104-day strike.

"This decision came after our continued efforts with the 11 companies to reach an industry-wide settlement. It was clearly understood by both parties that we were working for such a settlement. We reported fully to both the union and the industry at all

times. "Some time ago we advised the industry that it would be necessary for Kaiser Steel to bargain separately if the industry did not reach a settlement with the union in the near future.

panies representing about 18 percent of the industry production did not go on strike. After Sunday's meeting chief industry negotiator R. Conrad Cooper said it was just "another conversation."

In addition to the 12 companies which form the industry coordinating committee, Pittsburgh Steel Co. was added to the "major" steel producing firms which will confer here.

Layoffs Continue in Steel Strike

DETROIT (UPI) — Layoffs in the auto industry caused by steel shortages stood at 117,300 today, but another 4,000 idled at Chrysler Corp., returned to their

work. The Chrysler workers, at the time a missile plant near here, returned to work on their regular shifts today. They were idled last week by a wildcat walkout by members of United Auto Workers local 1245 over unsettled grievances at the plant.

Meanwhile, General Motors workers totaled 115,000 at plants across the nation because the company does not have enough steel to build its full quota of new cars.

Steel shortages hit Chrysler last week also, forcing the layoff of 300 workers, 1,800 of them in Detroit.

Hardest hit was the Chevrolet division of GM, where eight of its assembly lines across the nation were shut down and 43,000 workers sent home.

Chevrolet assembly lines were the only ones hit so far, but Chrysler's production of 1960 models was cut by another wildcat strike, at its Jefferson assembly plant in Detroit where another 5,000 employees were idled.

GM's layoffs accounted for 10 percent of the total steel shortage.

Chrysler officials said they expected to continue operations this week but refused to make further predictions.

Ford, American Motors and Studebaker-Packard have not been affected by the shortages yet.

Trick or Treat For UNICEF Set Saturday

On Halloween night again this year some 200 Pampa youngsters in ghost and hobgoblin garb will be ringing the doorbells of city homes for UNICEF—the United Nations International Children's Emergency Fund.

As in the past six years, the familiar chant, "Trick or treat," will be "Trick or treat for UNICEF," and if you contribute you will have the satisfaction of knowing that you have helped one of the world's worst cases.

Last Halloween, with 150 young Pampa people taking contributions, UNICEF was made \$800 richer. Saturday night, according to local chairman David Mills, the drive should be twice as successful.

Sponsored locally by the Pampa Ministerial Alliance and the United Churchwomen, the United Nations Children's Halloween program will be carried out at the same time in some 10,000 other communities. Last year the amount collected was \$1 million.

The junior citizens of a Pampa participating in the night will canvass neighborhoods in small groups, escorted by young adults. They will wear orange and black armbands and carry UNICEF banks for contributions residents might care to make.

Rev. Mills, pastor of La Ma-r Christian Church, said this year's program will be aided by well over 50 Pampa High School students who will be participating in cooperation with the Student Council.

Each grade will be in competition with the seniors led by Joe Bourland, the juniors by Lucky Dunham and the sophomores under Dick Batson.

Churches cooperating in Saturday night's drive are the Presbyterian, First Methodist, H. H. H. Methodist, La Ma-r Christian, Church of Brethren, Episcopal, First Christian and St. Paul's Methodist.

WIN SWISS ELECTION BERN (UPI) — Switzerland's right-of-center coalition government was assured of another four years of control, returns from the general elections Sunday showed today.

The elections were the first in which women voted. The Communists failed to cash in when their woman candidate for Parliament lost.

Bomb May Have Caused Disaster

CHICAGO (UPI) — Investigators suspect a bomb may have been planted aboard a Braniff Airways plane which crashed in Texas killing 34 persons, the Chicago Tribune said today in a copyrighted story.

The Tribune said equipment failure appears to have been ruled out as a cause for the Sept. 30 crash of the turbo-prop Electra near Buffalo, Tex.

"There is a growing conviction that sabotage—probably in the form of a bomb concealed in the aircraft's rear baggage compartment—blew the \$2,500,000 transport apart," the paper said.

The Federal Bureau of Investigation is checking back into the life of every person aboard on the assumption that this might be the case.

"There is another sign which points to the probability of sabotage—the fact that neither Lockheed Aircraft, maker of the Electra, nor the Federal Aviation Agency has made any suggestions

or regulations for inspections or operation revisions of the 80 odd other Electra transports flying the United States and elsewhere.

"Invariably, when mechanical failure of some part is suspected after an airplane crash, at least a preliminary and precautionary letter is sent to other operators of the same type of plane. Often there is an order requiring modification or replacement of parts."

The Tribune said an investigator testified at a hearing last week that "in flight disintegration, ground impact and fire" destroyed the Electra.

The public hearing was held at Buffalo, Tex., and continued for three or four weeks before resuming.

An investigator for the Civil Aeronautics Board promised "some sensational testimony might come out" when the hearing is reopened in Dallas, the Tribune said.

Investigators termed last week's hearing the "operational phase" of their probe. Witnesses disclosed four "discrepancies" in the investigation, had been noted in the airliner before the fatal flight. However, none were considered serious enough to have affected the safety of the plane.

ATTACKER HELD — Roberto Salas Hernandez peers from behind the bars of his cell in Havana, Cuba, as Police Chief Efigenio Almejeas questions him about his alleged attempt to assassinate Cuban Premier Fidel Castro. Police say Hernandez attacked Castro during a worker's rally, but was taken into custody before he could harm the premier.

Iraq Communists Losing Support

BAGHDAD, Iraq (UPI) — The Communist Party appeared today to have suffered a serious loss of popular support in Iraq although it still retains its hold on most government functions.

Nationalism was on the rise, and political observers said a decisive battle could be expected momentarily for control of this politically-divided nation.

Premier Abdel Karim Kassem, still recuperating from bullet wounds inflicted last month by a band of assassins, undoubtedly has lost both popularity and prestige in Iraq and in the rest of the Arab world.

The nationalists have been sharply divided in the past on the issue of whether to swing in with President Gamal Abdel Nasser of the United Arab Republic but opposition to Communism was uniting them in a common front.

Experienced political observers here estimated that at least eight out of every ten Iraqis now oppose the Kassem government for a variety of reasons, both political and economic.

Last month's execution of 13 nationalist army officers and four civilian officials of the old regime permanently alienated the nationalists, observers believed.

The executions touched off the first public demonstrations against the Kassem regime and Communist Party appeared today to have suffered a serious loss of popular support in Iraq although it still retains its hold on most government functions.

(Reports in Beirut, Lebanon, disclosed that the Iraqi government closed its borders after the Oct. 7 attempt on Kassem and that scores of foreigners and hundreds of Iraqis were held virtual prisoners until this week end.)

(The Beirut reports said Iraq was turned into a vast internment camp by a total exit ban that accompanied a light curfew. Three Americans were permitted to leave Iraq Sunday—the first since the ban was imposed.)

Forty Building Permits Issued

City Building Inspector Jess Taylor reports that October has been a "terribly slow month" for area builders. Only forty building or remodeling permits have been issued to date this month, compared with 50 at this time in September.

Many of the permits issued to date are for the movement of residences from one section of Pampa to another. One of the permits was for the tearing down of the old Fox Rig and Lumber Co. yard at Rham and Hobart streets.

Fox Rig recently erected a new yard at 1425 Alcock. Also torn down this month was the Charlie Burton service station on E. Brown where plans call for the erection of an ultra-modern Standard station in the near future.

Cubans Flock to Havana For Anti-American Rally

By JOSEPH A. TAYLOR United Press International

HAVANA (UPI) — Peasants and workers by the tens of thousands streamed into Havana today for an anti-United States rally called by Premier Fidel Castro.

The bearded revolutionary leader called for one million Cubans to mass before the presidential palace at 4 p. m. e. s. t. today to protest what he said were "economic and military threats" of the United States against his

country. Castro, his leftist brother Raul, now defense minister, and President Osvaldo Dorticos are expected to address the crowd-massed in the plaza below from the balcony of the palace in the heart of Havana.

Castro's supporters went all out to ensure a massive turnout in Havana and at similar rallies in provincial capitals throughout Cuba.

Castro, in a five-hour television appearance which lasted from Thursday night into the early hours of Friday, charged that a plane from the United States "bombed" Havana last Wednesday night. Newspapers said U.S.-based planes also "machine-gunned" Cuba.

Planes dropped anti-Castro leaflets on Havana late Wednesday. Cuban warplanes were sent up to intercept the raiders and anti-aircraft guns also opened up. Two persons were killed and about 50 wounded with most evidence pointing to stray machinegun bullets and fragments of anti-aircraft shells as the cause for the casualties.

Castro charged that the raid was masterminded and carried out by former chief of the Cuban air force Maj. Pedro Diaz Lanz. Diaz Lanz broke with Castro and took refuge in the United States over alleged Communist influence in the Cuban government.

Ike Welcomes Guinea Chief

WASHINGTON (UPI) — President Eisenhower, back from a five-day golfing holiday in Georgia, today welcomes Sekou Toure, president of the new African republic of Guinea to Washington.

Vice President Richard M. Nixon, Secretary of State Christian A. Herter and other dignitaries planned to greet him at the airport.

Toure's 16-day tour of the United States includes stops at Chicago, Los Angeles, Wheeling, W. Va., and several cities in North Carolina. While in Illinois Friday, he will confer with Adlai Stevenson.

Another highlight of the trip will be a bi-racial dinner for the Negro president at Raleigh, N.C. Wednesday. Host at the affair will be Gov. Luther B. Hodges of North Carolina.

President Eisenhower will entertain the visitor with a dinner at the White House tonight.

He and Mrs. Eisenhower planned to greet Toure this afternoon shortly after his arrival from New York.

KASSEM OKAY

BAGHDAD, Iraq (UPI) — The Ministry of Health today contradicted rumors that Premier Abdul Karim Kassem had died and said Kassem "enjoys most excellent health."

An official statement, issued to clarify an announcement that no more medical bulletins would be released on Kassem, said "the healing is progressing normally" of the wounds Kassem received in an assassination attempt Oct. 7.

2 Americans Get Nobel Physics Prize

STOCKHOLM (UPI) — Two American physicists were awarded the Nobel Prize for Physics today for their research into the nature of the atom and the discovery of the anti-proton.

Dr. Emilio Segre, 54, and Dr. Owen Chamberlain, 39, both of the University of California, will share the \$42,610 prize for their discovery of the anti-proton in 1955.

Czechoslovakian chemist Prof. Jaroslav Heyrovsky, 62, won his nation's first Nobel prize for discovering the polarographic method of chemical analysis by electro-mechanical means.

Segre, born in Italy, and Chamberlain both worked on the World War II project that created the atom bomb. Their peacetime work, clear research gave the United States its second Nobel Prize this year and its 18th physics prize in the 55-year history of the awards.

Biochemists Prof. Severo Ochoa of New York University and Dr. Arthur Kornberg of Stanford won the medicine prize last week.

Detectives said Mrs. Arness told them of having "difficulties with her husband at home the last three years." However, she insisted that she wants a reconciliation.

The couple married in 1948 after meeting at the Pasadena Playhouse where they snarled leading roles in a production of "Candida." They have two boys and a girl, one of the boys by a former marriage of Mrs. Arness.

United Fund Vignettes Where Is Floyd Watson Today?

United Fund Campaign Chairman Floyd Watson may be a hard man to find during the next few days. With this year's UP drive moving into its final week, collections are just barely over the halfway mark.

Watson is not only in charge of a successful campaign, but he must make arrangements for a victory report luncheon with the Pampa Jaycees at the drive's completion.

At the moment Watson is reviewing lists of donors, checking completion calls and holding conferences with volunteer leaders.

Somewhere the needed funds to reach the \$63,900 goal will have to be found. There will be little rest for Floyd Watson.

Will the goal be reached? Not unless some good people get busy, fast.

Wheels not balanced cost you money. Our Bear equipment can spot the trouble. Come to Pampa Safety Lane. 411 S. Cuyler.

Lawyer Seeks Extradition Of Diaz Lanz

MIAMI (UPI) — A Miami attorney representing the Cuban government, said he would begin extradition proceedings today against Fidel Castro's former air force chief.

Cuban Premier Castro has charged Maj. Pedro Diaz Lanz, his former air force commander, led an exile-based air raid over Havana last week in which anti-Castro leaflets were dropped on the Cuban capital.

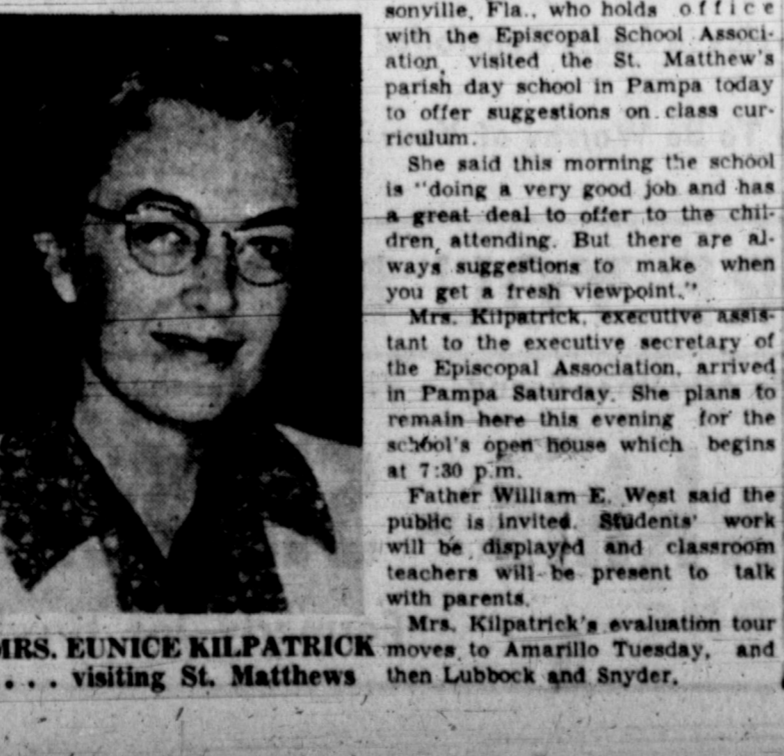

Attorney J. Edward Worton said he would file action today for the arrest and extradition to Cuba of Diaz Lanz. Worton said Diaz Lanz now living in Miami, probably would be allowed to post bond until the courts decide if he will be sent back.

The FBI disclosed Saturday that Diaz Lanz had admitted leading the leaflet-dropping raid last week which brought sharp criticism against the United States from Castro.

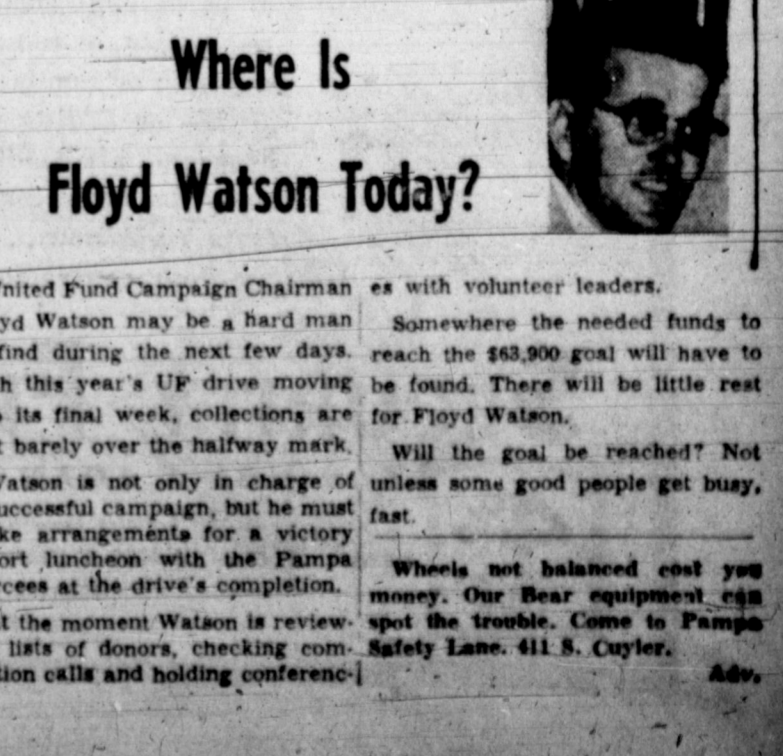

Worton asserted if the FBI report is true there was "no question that Diaz violated the U. S. Neutrality Act, an indictable offense," and therefore would make him a candidate for extradition.

Diaz Lanz challenged Castro Sunday to meet him face-to-face on a Miami television program Nov. 8 at which time he said he would prove the Cuban Premier patterned his government after Russia.

Coronado Inn Will Host 1960 Meeting Of Credit Association

Pampa's new Coronado Inn will be the site of the 1960 conference of the Panhandle and South Plains Credit Association, Wynn Veale reported today.

Veale, manager of the Pampa Retail Merchants Association, said Pampa was named at a weekend conference in Wichita Falls.

Attending from here were Vena Riley of Behrman's; Ethel Stillwell and Ruby Crocker, both of Security Savings and Loan; Lucian Young of White's; and Ronald Hollingshead, of the Credit Association.

Four persons from Pampa were elected to posts at the Panhandle conference. Veale was named to the board of directors of Region I, Associated Credit Bureau of Texas; Young was elected to the board of the Region I Retail Credit Executives of Texas; and en-

Episcopal Official Praises Job Done By St. Matthew's

Mrs. Eunice Kilpatrick of Jacksonville, Fla., who holds office with the Episcopal School Association, visited the St. Matthew's parish day school in Pampa today to offer suggestions on class curriculum.

She said this morning the school is "doing a very good job and has a great deal to offer to the children attending. But there are always suggestions to make when you get a fresh viewpoint."

Mrs. Kilpatrick, executive assistant to the executive secretary of the Episcopal Association, arrived in Pampa Saturday. She plans to remain here this evening for the school's open house which begins at 7:30 p. m.

Father William E. West said the public is invited. Students work will be displayed and classroom teachers will be present to talk with parents.

Mrs. Kilpatrick's evaluation tour moves to Amarillo Tuesday, and then Lubbock and Snyder.

Meelings Of Credit Association

The annual meeting is a combination conference of credit bureaus, retail merchants and the Lone Star Council to discuss common credit problems, Veale said.

Attending from here were Vena Riley of Behrman's; Ethel Stillwell and Ruby Crocker, both of Security Savings and Loan; Lucian Young of White's; and Ronald Hollingshead, of the Credit Association.

Four persons from Pampa were elected to posts at the Panhandle conference. Veale was named to the board of directors of Region I, Associated Credit Bureau of Texas; Young was elected to the board of the Region I Retail Credit Executives of Texas; and en-

They'll Do It Every Time By Jimmy Hatlo

COLD FRONT TO BRING COOLER TEMPERATURES

United Press International

A fast-moving cold front expected to bring cooler temperatures to most of Texas by nightfall had reached a line extending from Fort Worth southwestward to Wichita by 7 a. m. today.

Weather forecasters said the front would bring temperature drops of 10 degrees or more to North Texas and Panhandle areas but its effect on South Texas temperatures will be less.

Gusty winds up to 25-30 miles per hour came behind the front and spawned a few isolated dust storms in the South Plains, where visibility in some areas was cut to 1-3 miles. Wind warning flags will be displayed on all North Central Texas lakes today.

Air along the front and to the south of the frontal system was dry, and no rain was expected to develop.

No measurable rainfall was recorded to any part of Texas Sunday.

Overnight low temperatures showed a 23-degree spread. Daltown had the low of 44 degrees and Laredo had the overnight high of 67.

Presidio—usually the hottest city in the state—again had the top temperature Sunday with 93 degrees. El Paso and Lubbock had 89 and 91 degree readings Sunday—both of which were records for those cities so late in the fall.

Japan, Europe Asked to Take U. S. Exports

By EDWARD COWAN
United Press International

WASHINGTON (UPI)—Japan and Western Europe came under new pressure today to quit discriminating against American exports and help the United States check the outflow of its gold and dollars.

The pressure came from the International Monetary Fund. It said in a formal statement Sunday that other countries should lift restrictions on dollar imports "with all feasible speed."

The fund policy declaration followed concerted U.S. criticism of countries which have not yet dropped post-war curbs on their citizens' purchases of goods which must be paid for with dollars.

A rise in U.S. exports would bring back to this country some of the billions of dollars paid out each year for imports, foreign aid and overseas investment by business. An excess of these outpayments over receipts is called a deficit in the U.S. balance of

international payments. U.S. officials have launched a broad attack on the problem. One thrust is criticism of "dollar discrimination."

Only last week the government made a major revision in its foreign economic aid program. It decreed that loans to other countries must normally be spent in this country, not in other nations.

This, too, is expected to bring home many of the millions of dollars the government pours in to foreign aid each year. Since the end of World War II, the United States has loaned and given away about 67 billion dollars of economic and military aid.

Engineers Will Meet Thursday

The regular October meeting of the American Institute of Chemical Engineers will be held Thursday evening at 8 in Dumas; publicity chairman, R. W. Dingman reported today. The meeting will be in the Phillips Chemical company's Cactus plant at Dumas.

A tour of the plant will be preceded by a discussion of various plant processes. Light refreshments will be served following the meeting; visitors are welcome.

ToT Girl Scout Council Meeting Slated Tuesday

The last meeting for the Top O' Texas Girl Scout Council, before dissolving into a ten-county council, will be held Tuesday at 8 p. m. in the Lovett Memorial Library, according to M. H. Taylor, council president, who will preside at the meeting.

Senior Girl Scout Troop 17 will be meeting-hoostesses and will show slides of the Girl Scout Round-Up held this summer in Colorado.

Special guest will be Miss Gay Sheppard, regional advisor of the national branch office in Dallas.

Bruno Loewen of Berger, chairman of the development committee, will outline the coverage of the new council to be formed and will discuss the work that has been done to date.

Awards will be given to adult Girl Scout workers in recognition of their service to the council.

All registered Girl Scout—adult workers and scouting friends are invited to attend this final meeting of the Top O' Texas Girl Scout Council, according to Taylor.

Innocent Bystander Killed as Feud Flares in Mangum

MANGUM, Okla. (UPI)—A feud between two Mexican brothers flared against another family for years flared into violence Sunday in this southwestern Oklahoma town, and a boy not connected with the vendetta was killed. Police searched today for Manuel Capetillo, 38, Harlingen, Tex., suspicion of slaying Juan Man-

uel Hinojosa, 10, Weslaco, Tex., and wounding Adundio de Leon, 48, Nuevo Leon, Mexico.

Capetillo's brother, Nemecio, was captured shortly after the shootings, and was being held here.

Sheriff's officers here said the Mexicans were part of a cotton harvest crew in the area.

An officer said De Leon, who was not seriously hurt, told him he once was a policeman in Mexico and that his (De Leon's) brother had killed Capetillo's father. He said Manuel Capetillo blamed the death on De Leon.

The deputy said De Leon and the Hinojosa boy were riding Sunday in an auto with the boy's father and mother. The Capetillos drove up in their auto, the officer said. Officers said Manuel Capetillo pulled out a pistol and shot several times.

De Leon was shot twice and the boy seven times.

Officers said Nemecio Capetillo then lunged at De Leon with a knife, but was pushed away. The brothers then fled, and Hinojosa's father rushed the two wounded to the hospital, where the boy died.

Navy Cook Wins Bean Soup Contest

MEMPHIS (UPI)—Navy messes round the world will be cooking navy bean soup "a la Norfolk" whether they like it or not.

Ship's cook first class Edwin H. Busbee of the Norfolk Naval Air Station won first place in the bean soup contest at the Memphis Navy Station Sunday with his recipe.

It was only fitting that Busbee and the chef of the destroyer, USS PHIPPS, which operates out of Pearl Harbor and San Francisco, nosed-out an Army entry.

In third place was Johnny Weber, galley master on the Army engineers' riverboat steamer Mississippi.

The winning recipe is honored by being sent to Navy messes round the world.

This recipe serves eight:

- Two cups Michigan navy beans
- 1 1/2 pounds ham butt end
- 2 quarts of water
- 1/2 teaspoon celery salt
- 2 teaspoons salt
- 1/4 teaspoon Accent
- 1 minced onion medium sliced parsley flakes

Soak beans in water to cover overnight. Prepare soup stock by simmering ham in 3 quarts of water for about 2 hours. Add beans, celery salt, salt, pepper and Accent. Add minced onion and simmer until soup begins to thicken. Add ground ham, sprinkle each portion with parsley flakes and serve with parmesan cheese croutons cut in diamond shape.

Court Will Call Seven Suits Today

Seven suits are expected to be called in 31st District Court today, including four for compensation, Court Clerk Helen Sprinkle reported.

Three cases originally scheduled this week were settled, and two others were passed. Scheduled for hearings beginning today are:

F. M. Drake vs. C. M. Jeffries Trucking Co.; H. V. Armstead vs. The Fidelity and Casualty Co.; Fred Mead vs. Traders and General Insurance; D. M. Green vs. National Auto and Casualty Co.; John W. Whitlock vs. Allie R. Britten; C. W. Kennemer vs. Perry G. McElroy; and Ruth Gilliland vs. Vidio Independent Theatres.

Cases settled were Smith J. Meador Jr. vs. Normie Jacob Harper for negligent homicide; Donald Dorsett et al vs. Voda Davis McKee; and Russell Beckwith vs.

Shamrock Woman To Direct Census

Mrs. Vera W. Morgan of Shamrock has been assigned to direct a force of farm census-takers in Gray, Wheeler and Collingsworth counties, the U.S. Department of Commerce reported today.

Before assuming duties Mrs. Morgan will spend five days in Lubbock at a census training school. Topics to be covered include procedures for recruiting census takers, canvassing methods, preparation and submission of reports, and the supervision of census-takers.

After completing her training the Shamrock woman will return to recruit census-takers in this area. The field canvass of a area farms is set to begin Nov. 18.

Voda Davis McKee. Forty-five petit jurors were in court at 10 a. m. today prior to the selection of a jury for today's docket.

Again Skelly Says:

"You start or we pay.."

under our Guaranteed Starting Plan"

Protect yourself all winter long against costly service charges to get your engine started. See your Skelly dealer now for full details.

... AND Skelly takes the icing out of winter!

... Both Great Skelly Gasolines Have **Anti-Frost** (at no extra cost)

To Keep Your Engine From Dying... Just By Breathing Ice-Free Air!

Not just another alcohol de-icer or gasoline anti-freeze! Skelly Anti-Frost protects you against stalling due to carburetor icing.

Users of Keotane have always had Anti-Frost protection. Users of Skelly Regular get it too, thanks to a special formulation called KT-3 that gives you 3 of the 5 major benefits of Keotane:

1. Protects against carburetor icing.
2. Removes dirty, choking deposits in your carburetor by detergent action.
3. Prevents rust and corrosion all the way from fuel tank to carburetor.

Carburetor icing can kill your engine, when it's idling, by cutting off its vital air supply. Skelly Anti-Frost prevents icing, lets your engine breathe!

- Here's what your Skelly dealer will do to get your car ready for Guaranteed Starting protection:
1. Drain your old motor oil and refill with Skelly Supreme or Skelly Tagolene HD Motor Oil in the correct grade for winter driving in this area.
 2. Drain transmission and differential and refill with guaranteed Skelly lubricants recommended for winter use. (No change required for automatic transmissions or differentials with no drain plug.)
 3. Test battery. All cells must register not less than 2.09 on open circuit voltage meter, or 1.250 on mechanical hydrometer.
 4. Test radiator for anti-freeze. Put in enough Skelly Premium or Prestone anti-freeze to protect cooling system for temperatures in your area.
 5. Fill your tank with Skelly Keotane or Skelly Regular Gasoline, either of which must be used throughout guarantee period to keep guarantee in effect. (Naturally, we cannot guarantee the starting qualities of other brands of gasoline.)
- That's all there is to it! You'll drive out with your Guaranteed Starting Certificate. You can be confident your winter starting problems are over.
- How Skelly pays if you don't start
- We're so confident of guaranteed Skelly products that we're certain you'll have no trouble starting. If, however, your engine should fail to start any time during the period covered by your Guaranteed Starting Certificate (up to April 1, 1960), just call your nearest Skelly dealer. If a Skelly dealer is not available, call your nearest reputable garage. We'll pay for the service call, under the terms of your Guaranteed Starting Certificate.
- Let us take the worry out of winter starting for you. See your Skelly dealer now for full details.

It's Showdown Time In These Pasts Friday

It's time for a showdown, and three of them, in fact. This Friday, three football teams will be warned by three district race before sunrise, because "there's not room for both in this district."

Then they'll "shoot it out" on the gridiron, and well before sunrise, only three teams will be left "live" in the district race—probably.

The "probably" is used because one "duel," both may walk away without a scratch; in another, the loser will be badly "wounded," but may "live," while another "fast gun" will be around to challenge the winner; and in the first the loser will still have a slim hope of "staying alive."

McLean will be at White Deer a game which will probably decide the district 2-A championship, both teams are undefeated in top play, with 3-0 records. If White Deer wins, the Bucks will have to defeat only Panhandle and Memphis to wrap up the district title. If McLean wins, the Tigers will have to beat Clarendon and Groom to gain a clear title.

White Deer demolished Canadian, a serious threat to its domination in 2-A, by a score of 38-6 last week. McLean whipped Memphis, 12-0, Clarendon, which still has a mathematical chance in the race with a 3-1 mark, beat Lefors 9-0, and has an open date this week.

Wheeler travels to Groom Friday for a game which may decide the 1-B crown, Groom, Wheeler, and Claude are in a three-way tie

Women Bowlers Capture Trophy In Amarillo Meet

AMARILLO (SpI) — Pampa women bowlers entered 19 teams in the Western Open Bowling Tournament, held here last two weekends, and won the trophy for most teams entered for the second straight year. A total of 66 teams were entered in the tournament.

Hawkins Radio and TV Lab finished sixth in team events with a score of 2671. Members of the team were Maxine Hawkins, Mary Ann Hawkins, Mardell Gambin, Pat Shelton, and Freddie Lowrance.

Klisse Ford was the number seven team, with a 2669. Members of that team are Dorothy Followell, Pauline Carlson, Ruth Wasell, Mary Pryor, and Evelyn Epps.

Pampa made a clean sweep in class D doubles, taking the first three places. Mary Pryor and Maxine Hawkins were first with 954; Lois Patton and Mary Merrifield second with 909; and Mardell Gambin and Freddie Lowrance third with 901.

Pampa also swept the class C singles, as Mary Pryor was first with 472. Lois Patton second with 427, and Donna Lutten third with 425.

In all events, class C, Mary Jo Merrifield was second with 1340, and Mary Ann Hawkins third with 1308. In all events, class D, Mary Pryor was first with 1409 and Freddie Lowrance third with 1283. In class D doubles, Mary Ann Hawkins and Pat Shelton were third with 908.

Wrestling Set Here Tonight

Bob Geigel and Danny Savich meet for the fourth straight week tonight in the main wrestling event at the Top O' Texas Sportsmen's Club, on Lefors Highway. The first match begins at 8:30 p.m.

Savich and Geigel have fought more outside than inside the ring in recent weeks, and neither man has won a clear-cut decision.

In the semi-final, two of the area's top ring "villains" clash. They are Ripper Leone and Nick Roberts. Tommy Phelps meets another of the top wrestling "bad-dies," Tough Tony Morelli, in the opener. Tonight's matches are sponsored by Pampa Shrine Club.

SHADOW OF THE PRESENT

Harvesters Will Open Bid For 3-4A 1st Division Spot

The Pampa Harvesters, who last week, begin their bid for a spot in the District 3-4A first division this Friday, when they meet Palo Duro in Amarillo.

Pampa is now tied with Palo Duro for sixth place in the district, a half game behind fifth place Lubbock. However, the wins chalked up by Lubbock and Palo Duro were over two of the district's weak teams — Palo Duro (by Lubbock) and Plainview. Pampa's two losses were to a pair of top contenders, Tascosa and Monterey, and the tie was with another contender, Amarillo.

The Palo Duro game will start the "downhill" half of Pampa's schedule. Pampa will probably be favored in its next three games — with Palo Duro, Lubbock, and Plainview. The final game of the season, with Borger, is expected to be tougher.

Last week, Monterey took its lumps, as the Amarillo 8 and 10 whipped the Plainmen to fourth place, with a 2-1 loop mark, and knocked the Plainmen from the ranks of the unbeaten. The win for Amarillo moved the Sandies into a second place tie with the Borger Bulldogs.

Monterey meets the Bulldogs this week. Borger will probably be favored, on the basis of last week's results. The Bulldogs romped over Lubbock, 61-0. Borger has now scored 134 points in district play, while allowing only 51. The Monterey Borger game will be a do-or-die contest for both, since each team has one district loss. Another loss will eliminate the loser from the district race.

The Sandies meet Tascosa Saturday in another vital contest. The Rebels lead the district with a 3-0 mark, but are only a half game ahead of Amarillo. A win in this game would be a big boost for either, toward the district title. The loser, however, will not be eliminated from the race.

The fourth contest slated this week will be between teams trying to stay out of the district cellar — Lubbock and Plainview. The game will be played at Plainview.

Last week, Palo Duro beat Plainview, 14-7, for its first win of the year. The loss for Plainview dropped the Bulldogs into the cellar, with an 0-3 district record. Tascosa, along with Pampa, was idle last week.

Twyman, Wilt Chamberlain Score High in NBA Games

United Press International

Jack Twyman of the Cincinnati Royals, who is handsome enough to be a television actor, started in two TV "spectaculars" during the week end to lead his mates into first place in the National Basketball Association's Western Division.

The 6-foot-6 former University of Cincinnati star totaled 77 points in a pair of nationally televised games. He poured in 39 points in sparking the Royals to a 108-103 victory over the Detroit Pistons Saturday and added 37 points Sunday as Cincinnati edged the Minneapolis Lakers, 108-102.

Twyman traveled the length of the court to score the Royals' winning basket against Minneapolis after stealing the ball from Elgin Baylor under the Lakers' basket. Baylor led the losers with 30 points, including 18 in the final period.

Wilt Chamberlain made a spectacular debut with the Philadelphia Warriors Saturday night, scoring 43 points and totaling 23 rebounds in a 118-109 triumph over the New York Knickerbockers.

In other Saturday games, the Boston Celtics crushed Syracuse, 121-109, to ruin the Nats' season opener, and Minneapolis turned back St. Louis, 94-87, despite a 33-point performance by the Hawks' Bob Pettit.

Defense Pays Off in NFL

By EARL WRIGHT
United Press International

The New York Giants, Baltimore Colts and San Francisco Forty-Niners believe the best defense is a good defense and have the first-place credentials to prove it.

New York has taken some of its worst whippings in Pittsburgh and needed its powerful defensive unit to salvage a 21-6 victory over the Steelers Sunday at Ebbets Field. The triumph, a costly one which may sideline all-league halfback Frank Gifford for two weeks, enabled the Giants (4-1) to hold their one-game lead in the National Football League's Eastern Division.

The Green Bay Packers started Sunday's action tied with the Colts and Forty-Niners for the Western lead. The Packers (3-2) scored early in the third period at Baltimore to make the score 14-0. Then the Baltimore defense, combined with the passing of John Unitas, triggered three quick touchdowns and the Colts won easily, 38-21.

San Francisco, which has allowed only 85 points, kept pace with Baltimore (each 4-1) when Y. A. Tittle's 46-yard pass to R. C. Owens in the final 65 seconds produced a 20-17 victory over the Chicago Bears.

The Cleveland Browns and Philadelphia Eagles (each 3-2) remained a game behind the Giants. Mill Plum threw four touchdown passes while sparking Cleveland to an easy, 34-7 victory over the Washington Redskins. The Eagles, aided by alert defensive play and Norm Van Brocklin's passes, erased a 24-0 deficit in the second half and edged the Chicago Cardinals (1-4), 28-24.

Last Week's Results
Quannah 41, Shamrock 22; Perryton 52, Childress 0; Wellington open.

This Week's Schedule
Perryton at Wellington; Shamrock at Childress; Quannah open.

Defense Pays Off in NFL

The Detroit Lions, 11 1/2 point-back Ray Brown stole another underdog, pulled Sunday's big McHan pass to set up a Unitas upset by downing the Rams (2-3) at Los Angeles, 17-7. It was Detroit's first 1959 victory and left it tied with the Bears (each 1-1) for last in the West.

Tommy Davis' 31-yard field goal gave the Forty-Niners a 13-10 lead with about three minutes to go at San Francisco. Ed Brown drove the Bears 83 yards in three plays, throwing 30 yards to Jim Dooley to make it 17-13 with 1:54 to go. Y. A. Tittle then sent 80, 045 fog-shrouded fans home happy by ending an 80-yard push with a pass which Owens leaped to snare in the end zone.

Plum enjoyed one of his finest days as a professional. He completed scoring passes of 76 and 15 yards to Bob Mitchell, a 12-yarder to Preston Carpenter and a 10-yarder to Ed Modzelewski. Jim Brown, who gained 122 yards in 17 rushes against the Redskins, ran 30 for the other Cleveland touchdown.

Van Brocklin completed touchdown passes of 29 and 22 yards to Tommy McDonald, the second winning the game in the final minutes at Minneapolis. Bill Barnes scored the other two Philadelphia touchdowns on plunges. Bob Pellegrini and Chuck Weber stole John Roach passes to set up two Eagle scores.

Earl Morrill, playing quarterback for the Lions because Tobin Rote has a broken bone in his hand, directed the club to its first victory of the season. Ken Webb ended with a three-yard pass to Alan Ameche. Linebacker Bill Pellington stole a McHan pass and ran 30 yards to score. Half-goal, Ollie Matson plunged a yard after three third period touchdowns.

John Sample ran a punt back 25 yards to start a drive that Unitas ended with a three-yard pass to Alan Ameche. Linebacker Bill Pellington stole a McHan pass and ran 30 yards to score. Half-goal, Ollie Matson plunged a yard

Ignorant Freshmen

The degree of ignorance which ordinary high school graduates are causing quite a number of college professors to utter cries of anguish. Recently, Professor (of English) Robert H. Zoellner of Colorado State University gave a general information test to a random group of 154 freshman students at his school. The results, according to the professor, were little less than "appalling."

For example: When asked to name any five planets of our solar system, 27 percent could not name any. Ten percent named either the sun or the moon as planets. Nine students listed a planet called "Pluto." The ancient Greek socialist would have been happy to learn that he had gone into planetary orbit.

Almost half of the students quizzed could not name Newton as the formulator of the law of gravity. Over one out of three could not name any of the Great Lakes. Ten percent could name only one. Some listed the Wisconsin, Salt Lake, Lake Tahoe, Lake Champlain and Lake Mead.

Thirty-six percent did not know that continent the Andes Mountains are on. Answers such as "East Continent," "West Continent" and "Italy" suggest that some of the students don't even know what a continent is. When asked, "Where is the Eiffel Tower located?" 19 percent (almost one in five) had no idea.

More important, a number of students listed "Pizzo, Italy." Perhaps they were thinking of the famous leaning tower at Piza, Italy. Apparently these students had Pizzo, the Leaning Tower and the Eiffel Tower all mixed up in their minds in one indescribable mush, with Pizzo floating on top.

Eighty-one percent of the students questioned did not know what the word "Hellenic" means. Many, who had apparently vaguely heard of "Pan-Hellenic," thought that Hellenic had something to do with "togetherness" or with "fraternity."

When asked to identify Pablo Picasso, 71 percent could not write "artist" or "painter" after his name. Eighty-one percent could not identify Leonard Bernstein. Some thought he was a labor leader. A few thought that he had recently been run out of the country on a narcotics charge.

And labor union control of work-ers in factories and processors and in stores that buy the farmer's produce have forced cannery and merchant to exert strong pressure to keep agricultural prices down.

The farmer - employer would probably be the first to concede that farm wages are not generally higher than he does. He would like to compete with the factory and the store in the labor market for the better quality of labor even if it was more expensive labor but the prices he can pay for labor are governed by the prices he can get for his product.

The farmer knows as well as the worker does that for years labor because he has avoided farm labor wages in other fields of endeavor and - to be brutally frank - some workers draw from government higher unemployment benefits than he can get from farm work.

The farmer's attitude toward paying higher wages is not altruistic. He knows as well as anyone that the best labor produces most of the wages they don't pay to the employer.

It is through efficiency and new techniques in the post-war era that the unsubsidized farmer has made what profit he has. It has been through increased production through farm workers.

One reason some farmers have sought a solution to their labor problem is the importation of foreign labor has not been a high road to profit. Only labor union propagandists refuse to admit what cold figures prove - that a foreign labor per unit of worker is more costly than domestic labor regardless of how the cost is distributed. What the farmer needs is the handling of a seasonal harvest.

Who is to blame for this? The grocery store customer? The broker? The canner? Certainly, not the farmer. He would gladly take as much as he could get.

As a matter of fact, for the general run of citizens, it is fortunate that the price of food hasn't spiraled as high in the inflation of the last 15 years as the prices of other factors in the American economy. If the rise in food prices were comparable, the American housewife would be pushing a wheelbarrow full of dollars to the grocery store to purchase her weekly food order.

It really doesn't make much difference who is to blame for the price of a product when it comes to determining how much wages can be paid out of its production. The end value in the market place how much will be available for wages.

BETTER JOBS

By R. C. HOILES Why Governments Have Adopted and Approved The Fraud Of The Goldsmiths

In several issues I have been quoting Frederick Nyemeyer's essay on the causes of booms and busts. Now Mr. Nyemeyer explains why the government has adopted laws that bring about booms and busts.

I am always extremely interested in why things happen. The fact of the matter is, it seems to me that that is the only part of history that is of interest and use to mankind. This is the way Nyemeyer puts it:

"There is an interesting historical question: How did it come about that the dishonesty of goldsmiths (in issuing more certificates than they had gold on hand) became an integral part of the monetary system of England, the rest of Europe, and the Western Hemisphere?"

"When goldsmiths who took too great risks became bankrupt, the victims were not the common man, but men of large affairs, especially the big merchants. The rich are, of course, no more pleased than poor people are about the loss of money, and so they were undoubtedly vigorous in their complaints. It was demanded that something be done. What was demanded obviously was (1) a prohibition against issuing fiduciary media and (2) announcement of penalties for violation of the prohibition - penalties equal to the penalties for theft and fraud."

"Instead of prohibiting the issuance of fiduciary media, the government came up with another idea - regulate the business of issuing fiduciary media. No 'solution' more characteristic of interventionism could have been found. The essence of interventionism is regulation."

"Interventionism is the great hope of many modern 'Capitalists,' but they should look at the banking industry as an example of what interventionism means. Banking is the most regulated industry in the United States. It is also the industry already regulated for the longest period of time. Because of that, banking ought to be the ideal industry in the United States. But it is the contrary; although completely regulated, it is the most disturbing industry in the country - the cause of booms and depression. This is not the fault of individual bankers. It is the fault of incorporating into the law of the land - with the approval of practically all citizens including nearly every orthodox Capitalist - the privilege of issuing fiduciary media, which are really fraud certificates."

"The effect of government action has been to aggravate the situation in regard to fiduciary media. By setting out to regulate the issuance of fiduciary media, the government in effect popularized them. A bank could say: 'We are regulated; we are operating according to the law of the land; our fiduciary media has government approval.' And so today we have 'bank notes' popular with the common man as well as the big merchants."

"There are two reasons why the government encouraged dishonesty rather than providing a penalty for dishonesty. Those two reasons were: (1) the government realized that it could help finance itself by authorizing banks to issue fiduciary media and (2) the government was dependent on the supply of such workers has been dwindling year by year.

"There is no question it has been dwindling because the pay is poor but the realities of agricultural economics are that the market value of the product doesn't provide the wherewithal to pay high wages."

"For that condition the farmer has to be the last one to bear the blame if anyone should unless you want to blame him for not being able to solve problems that have baffled the world for ages."

"Prices that farmers in many parts of the country are receiving for the most part this year for their crops compare unfavorably with prices that a few years ago were paid as World War II. The U.S. Department of Agriculture shows on its cost index that prices received by farmers this year are 21 percent points less than they were in the 1947-49 period."

"Who is to blame for this? The grocery store customer? The broker? The canner? Certainly, not the farmer. He would gladly take as much as he could get."

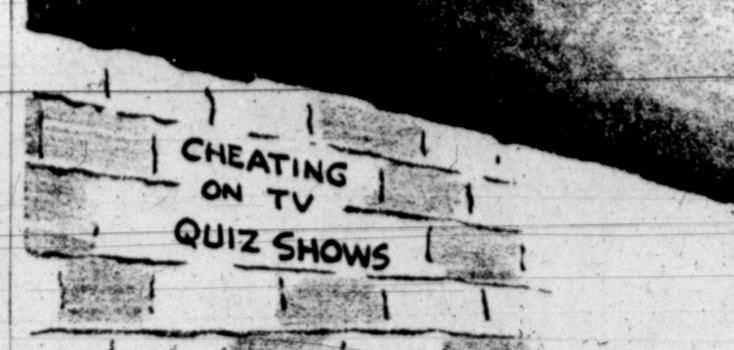

"As a matter of fact, for the general run of citizens, it is fortunate that the price of food hasn't spiraled as high in the inflation of the last 15 years as the prices of other factors in the American economy. If the rise in food prices were comparable, the American housewife would be pushing a wheelbarrow full of dollars to the grocery store to purchase her weekly food order."

"It really doesn't make much difference who is to blame for the price of a product when it comes to determining how much wages can be paid out of its production. The end value in the market place how much will be available for wages."

"We report on and comment on farm problems because agriculture still is a major contributor to the county's economy. Fundamentally, we are not attempting to arouse sympathy for anyone. Our function as a newspaper is to report good, bad and indifferent news, and comment conscientiously on such news with the sincere hope that those who read will be fully informed and make efforts to improve conditions that will benefit everyone."

(To be continued)

Humpty-Dumpty

ROBERT S. ALLEN

The Allen-Scott Report

WORLD BANK REFUSES SUEZ LOAN WHILE ISRAEL SHIPPING IS BARRED

WASHINGTON - President Nasser is facing new international pressure to end his blockade of Israeli shipping through the Suez Canal.

The World Bank has informed the United Arab Republic President that there is little chance of his receiving the \$40,000,000 loan request for improving the strategic waterway until the ban is lifted.

In frank but cordial discussions in Cairo, President Eugene R. Black told Nasser that a majority of the directors of the international lending agency are opposed to any loan unless the UAR recognizes "the principle of freedom of transit through the canal for all ships."

Black also has notified the House Banking and Currency Committee of the lifting of the loan with the lifting of the blockade. In answer to a committee inquiry, he wrote: "We are fully aware of the issues that have arisen in relation to passage of vessels and cargoes through the canal, and I have personally been in close touch on this subject with Secretary-General Hammarskjold who is endeavoring to bring about a solution."

"I have taken note of the views expressed in your letter and assure your committee that they will be given consideration when the matter of loan for improvement of the Canal comes before the bank for final decision. In meantime, I am sending a copy of your letter to the executive director representing the U.S."

The committee was informed from other World Bank sources that the directors representing the U.S., Britain, France, Nationalist China, and the Netherlands (for Israel) are against the loan until the blockade is lifted.

MAJOR BLOW - The World Bank's warning comes as a major financial blow to Nasser. His United Nations diplomat just recently reported to other delegations in New York that Nasser hoped to begin the widening and deepening of the canal early in 1960 to handle the large tankers now being built for the major oil companies.

Outside of the Soviet Union, the World Bank is the last credit source for Nasser. The major private enterprise believed it could decrease the interest rate by legislating in such a manner that the quantity of money would be increased. These motivations were dishonest and hypocritical, or, as a minimum were folly. Certainly, by regulating - and thereby approving fiduciary media - the government was contributing to a direct violation of the Ten Commandments: It was approving theft and fraud.

"Let us consider the government's objective of artificially lowering the interest rate. 'Increasing the quantity of money does not lower the interest rate. Even today nearly everybody believes that the interest rate is determined by the quantity of money. A specific increase in the quantity of money will have the very short-term effect of lowering interest rates; and vice versa. But so the long term the quantity of money has no effect on the interest rate. The famous philosopher David Hume (1711-1776) who in his day was a remarkably good economist, wrote as follows (The Essays of David Hume, Great Richards, London, 1903, page 303):

"Lowness of interest is generally ascribed to plenty of money. But money, however plentiful, has no other effect, if fixed, than to raise the price of labour. Silver is more common than gold, and therefore you receive a greater quantity of it for the same commodities. But do you pay less interest for it?"

"What Hume said was, in more modern language, this simple idea: increasing the quantity of money does not lower the interest rate but only raises prices (that is, causes inflation).

Florida has the longest coastline of any state in the Union, with California ranking second in this respect.

Hankering's

HENRY McLEMORE

Englishmen Would Love TV Commercials

LONDON - Englishmen would love our television commercials. That is, if they haven't changed a great deal since I have been away. The commercials, I mean.

When I left some six months ago a major portion of our TV ads, or so it seemed, featured remedies for ailments, especially those which cause distress to the human stomach.

Nothing interests an Englishman more than his stomach. He is born with the notion that it is out of whack, and as soon as he starts eating an allowance from his family - usually around the age of eight - he starts buying the first of a million stomach remedies that he will purchase before he dies. I learned long ago never to mention to English friends, when they asked in the morning how I felt, that I was not quite up to par, to sniff or was just fair-to-middling. For such an admission is to have them cry right off that it is your stomach that is at fault; and to wait just a minute and they'll be back with something that will tone it right up.

There is no shaking them, no putting them off. They do scurry away, and they do return with all sorts of things. Fruit salts, bile beans, stabilizer tablets, pale pills, pink pills, large pills, small pills, anti-acid pills, anti-salt pills, anti-everything pills.

In my day I have traveled many a mile with Englishmen, and shared many a room with them, and all were one - man pharmacies. Well, medicine kits are the first thing unpacked and the last to be put away.

How they would relish our TV commercials showing the stomach as a furnace filled with raging flames. Such a picture would only confirm what they have known all along - that unless a man rushes firemen down the gullet in the form of medicine, his stomach will not be around for long.

One of the fittest men I ever knew was the late Sir Malcolm Campbell, one-time speed king. Wiry, as hard as nails and without a nerve in his body, he never worried about the dangers of driving his Bluebird across the sands at terrific speeds.

But his stomach was a constant source of dismay. He would as lief have driven Bluebird at 400 miles per hour as ever to step in it without first loading his stomach with remedies.

Right behind his stomach, the Englishman rates his liver. Indeed he usually takes something for his liver at the same time he swallows his stomach aid. It is a safe bet that when Prime Minister Macmillan goes to the next Summit Conference one of his bags and not a small one, will contain enough stomach and liver soothers to placate both these organs.

Last night, when the elevator operator of my hotel asked how I felt, I foolishly admitted that I felt a little tired.

Ten minutes later he knocked on my door with a box of pills. "Your stomach," he said, "that's what is bothering you. Take two of these now, and two more first thing in the morning, and you'll feel full of beans."

I did and I did.

Ask one of the candidates recommended to you for a meeting at his convenience. Tell him you are looking for a family physician. If you don't feel comfortable in his presence try another doctor. If he inspires you with confidence, trust and a feeling of warmth, chances are that he's your man.

A unique method of choosing a physician was employed by one of my patients some years ago. During an epidemic of influenza he was in a foreign country supervising the construction of an industrial plant.

Seized by fever and the characteristic discomforts of grippe, he remembered reading a newspaper account of the death of the mayor. He phoned the mayor's home, learned the name of the doctor who attended him during his fatal illness, and summoned the physician.

"How did you obtain my name?" the doctor asked. "I read that you took care of the mayor," my friend replied. "But the mayor died," the physician sputtered, "that is hardly a recommendation for a doctor."

Fair Enough

WESTBROOKE PEGLER

The Current Whisker Cult Found Revolting

NEW YORK - Abe Lincoln, General Grant, the New England poet and Moses may be cited in extenuation of revolting current experiments in whisker-culture, but Carl Sandburg, among the poets who had completely overlooked Lincoln favored - unless it be the d e t e r m i n e d woman who head lay on the Other F low was responsible. It was he that Lincoln's gaunt and hollow features were altogether so ugly, but that is debatable. Bear are unsightly and in the present version close to indecent, will many elaborate effects which suggest the art of the English gardener who create roosters on be hedges.

I had thought this enormity would to my own beloved but oft-mystifying country, but I found otherwise in Stockholm where, also learned, the cult of the beak is thriving and often ridiculous. I learned Swede with working acquaintance in police circles said one night in a luxurious cobbler called Rich's that many adolescent girls had been caught up in the wild swirl which has been noted in American cities, London and Liverpool. They were indifferent to moral verbiage but to minimal and standard, an promiscuous episodes had occurred in public parks involving numerous members of both genders around the age of 16, which were to say the best that could be said of them, deplorable. And - the Swedes are not loo prompt to deplore, either, having a surprising patience with youth which wane all too soon and all too permanent ly.

There were four young speedsters in Rich's that night, dining sedately enough and sipping burgundy with an air rather precocious - Swedes, who generally prefer schnapps and glug. They all had beards clipped in the manner of a Park Avenue poolie, two of them in reddish hue which, along with their eyebrows, seemed to have been touched up with beauty stuff. Even worse, they all had brushed their hair forward and down. Inward their eyes in uneven sprigs like Brigitte Bardot's. I observed the same departure from conventional connections in Moscow told me he tion in Oslo, but not in Finland, where life is much more real and earnest under the guns which have blasted Helsinki four times since '17. And, although I cannot myself bear witness, a reputable Norwegian was known to have seen and had seen them go frantic in a seizure of rock 'n' roll.

In the Civil War a full stand of force was regarded as the mark of manhood and the proportion of 16-year-old soldiers in the Union Army was much higher than the ratio of old men, 35 and up. But though our cavalry captains of the period down to '17 wore handlebars and one Colonel Dodd used to raise his to arm's length to spit tobacco, the first order a cadet learns at West Point forbids him to possess and horse, dog, mouse, tache or wife.

Even worse, the Soviet equivalent of the bearded beatnik in a rather restricted luxurious resort not

Classified Advertising is an investment, not a cost.

CERTIFIED ECONOMY—The rugged dependability being displayed by this 1960 Ford T-950 at the Ford heavy truck testing center is only a portion of Ford's

1960 truck story. For complete details on the "truck story" be sure to call at Kissee Ford Co., 701 W. Brown.

Trucks No Longer A 'Country Cousin'

Kissee Ford is Pampa's largest Ford dealer, and its truck service department is the largest in the Panhandle. In its 19,000-sq-ft. factory trained mechanics service not only Ford products, but all other makes of trucks and automobiles.

In equipment items such as saddle tanks, grain beds and stake bodies, Kissee, at 701 West Brown, takes a position second to none. They have a complete line of truck parts and accessories. Just ask and they can produce it in short order.

Trucks are no longer the "country cousins" they once were, and that fact was never more evident than in the 1960 Ford truck-line, explained George Kleeburg, general manager.

"What's more," says Kleeburg, "styling improvement and particularly the brightening of truck interiors has added greatly to the comfort, convenience and security of the driver — factors which in turn contribute to the safety of operation by lessening fatigue."

Although basic utility is a far greater factor in selecting a truck than a passenger car, the truck's

functional appearance has become more and more important to truck owners in recent years.

"The owner's investment in the truck he purchases is a major consideration," Kleeburg says. "This is true not only of the vehicle's initial value in terms of its usable workpower, but also of its resale value. And the resale value of a truck with modern functional yet enduring styling is considerably higher than the resale value of one designed with only functionalism in mind.

"If the truck has an already proven yet advanced styling concept and has so stimulated pride of ownership that it has been well maintained, the vehicle obviously will command a higher resale price."

"The evolutionary process that has led to the ultimate in utility and distinction represented in the Ford Truck design has been a long one. It may have begun more than 50 years ago when the Runabout — one of the popular passenger car body styles of the day — was adapted for use as a "delivery wagon."

Despite advancements in payload capacities and engine and chassis design, trucks for many years remained largely unchanged in their over-all appearance. They were considered to be, merely workhorses. No one cared particularly how they looked, as long as they were capable of doing a specific job.

Perhaps one of the first big milestones in truck styling was the use of the curved windshield. This was followed by the full-wrap windshield and the wrap-around backlight, a lower over-all height, enclosed running boards and an increase in the width of the cab. The next big step forward came when Ford brought the pick-up box out to the full width of the cab and the hang-on fenders were eliminated. Efforts to achieve maximum engine accessibility eventually led to the development of an entirely new front end organization with a full-width hood.

PROUD OF THEIR PRODUCT—John B. White, sales manager; George Kleeburg, general manager, and Ramon Ammerman, dealer, seem justifiably proud as they gathered in front of one of Kissee Ford Company's fastest and most popular sellers, the new 1960 Ford F-500 series. This particular truck is equipped with a grain bed, is rated 1 1/2 tons, 25,000 lbs. gross weight and has a 172 h.p. engine. It is on display today at Kissee.

Fast, Safe Cleaning Of Rugs, Upholstery

Summer is gone and winter is coming on — with more indoor living — more cleaning care for the busy housewife. Thanks to Blue Lustre, her biggest task is now the easiest one. It is available at Pampa Hardware Co.

It used to be that cleaning rugs and carpets was either a back-breaking job or an expensive one — sometimes both — but that's not true anymore since women have discovered Blue Lustre Carpet and Upholstery Cleaner.

Blue Lustre is a premium quality liquid concentrate which when mixed with water creates a billowy foam. The cleaning action of this foam when brushed into carpets or upholstery instantly brightens colors dulled by soil separating the dirt particles from the fabric to allow easy removal by vacuuming. Since all the carpet soil is actually removed, housewives have found that carpets and upholstery stay cleaner longer because there is no oily or gummy residue to cause rapid re-soiling.

Since Blue Lustre can be applied with a long handled brush or used in any type of shampoo

rug applicator, it has become a first choice among women who want to give their floor coverings the finest cleaning care and appreciate the very small cost involved with the professional like results they obtain.

There is no other piece of home furnishing that covers such a large area as carpets and rugs and is subject to so many soil hazards. With Blue Lustre, however, it is possible to go over only those soiled pathways on the carpet when they appear without the necessity of cleaning the entire carpet again. That's why so many housewives keep Blue Lustre on hand always for little cleaning emergencies.

Quotes In The News

United Press International
MOSCOW — Transplant surgeon Vladimir Demikhov displaying a dog in which he had transplanted a second heart:
"You can feel the pulse of a second heart here."

BA DEN-BADEN, Germany — West German Chancellor Konrad Adenauer on a proposed summit conference:
"We are not inclined to accept the result of a summit conference which does not serve German interests."

MIAMI BEACH — The State Department commenting on a proposal by a Miami Beach hotel to exchange chorus girls for French follies beauties which was turned down:
"The idea is an interesting one, and if carried out should serve to underscore cultural ties in a field commanding a high degree of public attention."

CHICAGO — Sir Charles Darwin, grandson of the evolutionist, on the status of man:
"Man can now aspire to the complete mastery of nature, but subject to the one condition that he can master himself."

ECONOMICAL TO USE — Cleaning carpets with Blue Lustre costs very little because it is concentrated. A half-gallon of Blue Lustre is sufficient to clean 3 9x12 rugs. It is also available in quarts and gallons at Pampa Hardware Co. Blue Lustre is non-flammable, odorless and is safe to keep around the house.

'This I Saw'

"I looked out across our congregation and saw people. These were fine citizens of a wonderful city. There was compassion, kindness, and yet, firm purpose in the gazes that met mine. I knew that every minister in Pampa was enjoying, or had already enjoyed, a Sunday urged a national full policy. The conference said Russia already is outpacing the United States in cost and is rapidly catching up in oil and gas.

RELATIONS NOW NORMAL
CAIRO (UPI)—Cairo newspapers Sunday proclaimed a "return to normalcy" in relations between Communist China and the United Arab Republic. They said the U.A.R. charge d'affaires would return to Peiping soon.

like pleasure, each in his own church.
"It came to my mind that our United Fund campaign should have no great difficulty in reaching its goal with people — such as these. Still I knew much work to be done to attain the goal. I wondered if there were any dangers of our failing to meet this obligation.
"I know this... if Pampa and Lefors do fall short, it will be failure of energy and head, not of sympathy and heart. As I stood before our people, This I Saw:
