Tuesday. High yesterday,

ANTIQUE BURGLAR TOOL - Police are looking for the owner of this "antique" cabinet maker's wood chisel which was used in the burglary of Sam Houston School last week. "As near as I can make out the date on it." Lt. John Thomas said, "it looks like it was dated in 1884." Thomas said he believed that the chisel might have been the treasured relic of some family in this area and that the identity of the owner "might

help us somehow solve this burglary and others."

mechanical engineering. And not only has Japan taken the lead on the world's great racing courses, as evidenced by their new 450cc double overhead camshaft Honda, they take a back seat to no one in the standard roadster field. Today the Honda factory must certainly be considered as the world leader for gasoline-burning, unsupercharged, four-stroke engines, and they are living proof that racing can and does improve the breed.

The Japanese motorcycle industry is very young, but today it leads the world in both sales and World Championship trophies. Honda is the leader, as Japan's largest producer; back in the mid-fifties they began an active racing campaign in their homeland to gain both technical experience and advertising prestige. The factory had the goal in mind of becoming the world's best selling motorcycle, and so in 1959 they sent a team of riders to the famed Isle of Man TT. 125cc (7.5 cu. in.) twins,

that quickly reveals just who The 125cc and 250cc models Honda. has enough horsepower and who again won the world titles, and corners and uphill downhill also won them the 350cc crown. stretches put a premium on The 50cc model didn't fare well, braking, handling, and reliabil, though, and so a new twin that

spinning to 13,000 rpm, proved reliable, but their handling left something to be desired and speed was lacking. Not easily discouraged, the team returned the following year with both Japanese and European riders and a new 250cc four cylinder model.

The new racing Hondas were redesigned with a new frame, forks, and brakes, as well as a featured a gear train instead of 13.5! the bevel gears and vertical shaft. During 1960 the team contested most of the European classical races, demonstrating titude. reliability and enough speed to

The Quasar is designed to stay at home, working, instead of taking expensive trips to the repair shop. The works themselves are

quite different, too. They are modules that plug in and plug 10 Easy-To-Replace Modules

Each module is a mini-circuit with its own job to do. There is a picture module, a sound module, and so on. No other Color TV you can buy has exactly this kind of modular design. Motorola gain-

ed experience in this concept with designing modular electronic systems for America's Space Program. It seems to be the way of the future-because it offers solid advances in dependability, and fast, easy, low cost maintenance.

Why Transistors? Vaccum tubes, like candles, burn themselves up as they weak and inefficient.

ves out.

Color TV.

The Quasar is designed this

Motorola Quasar as the stay-at-Easy Fine Tuning

The Quasar makes Color TV easier to fine-tune right than black and white. You don't even have to look at the picutre. Just turn a dial until the "fine tune" light goes out. That's all!

tuning controls are out By using calibrated sliding for you to preset controls for good color reception.

Instant Sound, Color Pure Picture in Just 5 Seconds The Motorola Quasar's all Roaches

As you watch, you will notice the color is remarkably faithey could hire. The 125cc twin starting, front and rear direc- in over a hundred thousand No-Roach is clean and easy to ful. This is because Motorala has included an innovation for true to pets. Available at: Ward's, is made up of a lot of little things. We've tried to include them all in our Quasar.

Why Motorola is First With All-Transistor Color It's logical, when you stop and think about it. While Motorola isn't the largest manufacturer of Color TV, Motorola is the American television industry's largest most experienced ed producer of transistors and solid state devices. For example:

Motorola systems have worked error free on every manned American space flight. Motorola communication devices have played an important

role in transmitting electronic pictures from outer space. Motorola guidance and communciations equipment is participating importantly in the

A Watchful Newspaper EVER STRIVING FOR THE TOP O' TEXAS

The Pampa News it dedicated to furnishing information to our readers so that they can better promote and preserve their own freedom and encourage others to see its blessing. Only when man is free to control himself and all he produces, can he develop to his utmost capabilities.

TO BE AN EVEN BETTER PLACE TO LIVE

We believe that freedom is a gift from God and not a political grant from government. Freedom is neither license, nor anarchy. It is control and sovereignty of oneself. No more, no less. It is thus consistent with the Human Relations Commandments, the Golden Rule and the Declaration of Independence.

Political Actionists Analyzed
