TEMS OF INTEREST OFFICERS ELECTED FOR **FROM OVER THE STATE** CHAMBER OF COMMERCE

Denison .- Ethel Snow, 17, and Elmer Schults, 23, Coffey Bend, Okla., were killed Sunday night in an automobile accident near here, and were buried in the same grave here Tuesday.

Pecos .-- Charred remains of W. G. Paddock, who for 12 or 14 years has run the Patrol Store, 12 miles north of Pecos, was found Tuesday in the ruins of his combined home and store, which burned Monday night.

Laredo.-A. B. Beardell, Frank Lawson and Frank Cellie, charged with violation of the narcotic act, were bound over to the Federal grand jury Tuesday. The men were alleged ping and buying supplies. to have had a quantity of narcotics in from Mexico.

Austin .- The first State banks making report of condition as of Dec. 31, 1925, under the Banking Commissioners' call, show that the State banks are in a very strong position, it was declared at the Banking Department Tuesday. The reports of condition indicate an increase in deposits, an increase in resources and as having strong cash reserves.

Fort Worth .- Suit for damages was filed in District Court here Tuesday by Dr. H. T. Allison, a chiropractor, against C. M. Rosser of Dallas, M. D. president of the State Medical Assoclation. The suit is based on a speech alleged to have been delivered by Dr. Rosser in his campaign for enforcement of the State . medical practice act.

San Antonio, - Police Tuesday sought a band of expert diamond thieves following robbery of W. S. Wells, who lost diamonds valued at \$1,000 and a wallet containing \$71. Working with gloves, the thieves entered Wells' room by the use of a skeleton key and left no trace of a

sea during the war. And according was mostly hot air.

Macaulay says: "A politician must often talk and act before he has thought and read. He may be ill-informed regarding a question, but speck he must."

The political pot is beginning to bubble a little around the edges in this county. Several candidates have let it out casually that they expect to enter the race.

When Sunday morning comes a lot of us have influenza and are afraid to get out, but during the week when a good show is on we merely have a wold in the head and need to get out for a little fresh sir.

"Every dog has his day," is an old saying. According to a professor in socialary, men once wore the paint and feathers and the women did the work. But "them were the good old days."

Jamuary and February are the two most designments months for fires and etter-one and the cooperation of evere within abould be extended to redur both to a minimum. Fire departments are maintained to prevent tires and tight tires when they hapsen; health departments are designwit to prevent sickness and, to, comtrol preventable or contagious diseaswe which they appear. STRONG CHICKS

. The condition and health of the parent stock largely determine the condition and health of the offspring. No within any state boundary. question is more important than that of constitutional vigor.

The actions of the fowl indicate to a considerable extent its physical condition. A weak bird is usually inncfrequency of the crow of the male and the cackle of the female are indications of strength. The large, brightred comb and wattles indicate health. The eye is the mirror of the body and is a good indication of either health up for passage, I sought to eliminate good, bright, clear eye, while the diseased bird's eyelids droop and present a sleepy appearance.

The brightness and brilliancy of the plumage are indications of constitutional vigor. Feathers on a fowl of low vigor usually grow slowly and appear to be dull and ruffled, as compared with the close-fitting, smooth. fully developed, bright plumage of the vigorous fowl. The strong bird also has a good appetite and a large crop. The causes of loss of vigor may be

summed up as follows: First-Inbreeding without knowledge

of the principles of breeding. Poultry raisers sometimes have a bird with exceptionally fine plumage, and for that reason mate the bird in their breeding Commerce Commission to absolutely The spreading viper or puffing addpens regardless of its vigor or its relation to other birds in the same pen. There is a distinction between linebreeding and inbreeding.

Second-Use of pullets and immature male birds. As a rule, pullets lay more eggs than hens, yet it has been proven by experiments that the chicks from hens are larger when hatched and that they mature more and upon written briefs that are filed, quickly and produce stronger and more the Commission must depend for invigorous specimens than those hatched formation as to the course of action from pullets. A half-grown cockerel to be pursued. All of this informashould never be used for breeding purtion, therefore, is necessarily second poses. hand.

Third-Increased egg production. Forcing fowls to lay by continuously feeding heavy, rich foods tells upon the health of the females and often injures their breeding qualities.

Fourth-Crowding. Poultry raisers make a mistake too often of crowding ditions and the people through which a great number of birds into small quarters and then expecting the best results from the flock.

anxious for the construction of new Fifth-Lack of exercise. If strong, lines, to require such company or orhealthy chicks are desired, the fowls in the breeding flock must be required ganization to get down on its knees to exercise by being forced to scratch to a Washington commission is wholly for part of their food in a litter, or indefensible.

Representative Marvin Jones-is after the Interstate Commerce Commission, insofar as that body has the power to stop the building of railroads

"I have introduced a bill to repeal that portion of the Transportation Act which authorizes the Interstate Commerce Commission to pass on the tive and droopy. It does not scratch question of whether or not new railor forage actively. The loudness and ways or extensions of railways may be constructed when such building or construction is wholly within the borders of any state," he said:

"In 192\$ when the present act was or disease, the healthy fowl having a this provision, believing as I did that when struck and reassemble itself the outer end until a passage is made later if its head has not been captur- through the ice when the thaw pipe it would materially hamper railway development and kill construction in ed or destroyed. This animal is really the outlaying sections of the various a legless lizzard, which, like many states. The amendment which I of other lizards, has the power of dropfered at that time was defeated by a ping from a pursuer. Because of its very small margin. Events have fully food habits, this reptile is of considjustified the correctness of the poerable value to agriculture. sition. The myth of snakes sucking cows

"It is, perhaps, justifiable for the is entirely untenable. Anyone who Commission to require proof of the has ever milked a cow knows that solvency or financial responsibility of the pressure required to obtain a flow any organization which undertakes to of milk is far greater than any snake construct new lines of railway or ex- could exert. THE TAX QUESTION

Treasury department estimates American People will pay for all kinds of taxes, direct and indirect, the

round sum of 10 billion dollars in the current fiscal year. This means that about \$1 out of every \$7 of the national income goes for support of various forms of government - federal, state, municipal and county. The tax burden cannot go on increasing. It is doubtful whether it can be maintained at the present rate without ser-

ious consequences.

CO-OPERATIVE MARKETING

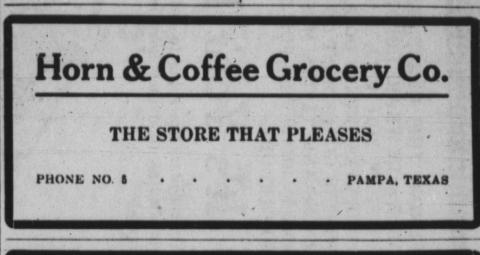

President Coolidge believes that the farmer is better able to handle his own business than anybody else. As an example he cites the growth of co-operative marketing movement
