PAMPA IS STRONG AT CONVENTION

Lower Electric Light and Power Rates Are Announced

SAVING TO BE 17 PER CENT TO PAMPA USERS

Second Reduction To Be Made, Voluntarily Published

FIGURES TAKE EFFECT SEPT. 1

Economies Accomplished By Transmission Power Line

Announcement of lower electric light and power rates, declared to compare favorably with those of any other city in Texas of similar size, was made today by the Southwestern Public Service company.

A comparison of new rates with the old reveals a net saving of 17 per cent effective on all current used during September or thereafter. The new schedule, the second voluntary reduction since the company came to Pampa about two years ago, will effect a saving to local users of about \$2,000 a month.

The reduction, according to W. H. Curry, local manager, has been made possible by a larger volume of business and by economies resulting from the building of the transmission line from Amarillo.

The new rates are as follows:

Lighting schedule: First 20 K. W. H. @ 15 cents per K. W. H.; next 30 K. W. H. @ 12-1/2 cents per K. W. H.; next 40 K. W. H. @ 10 cents per K. W. H.; all over 100 K. W. H. @ 7-1/2 cents per K. W. H.

Small power rate on one to 50 H. P.: First 200 K. W. H. @ 7 cents per K. W. H.; next 800 K. W. H. @ 6 cents per K. W. H.; next 1,000 K. W. H. @ 5 cents per K. W. H.; all over 2,000 K. W. H. @ 4 cents per K. W. H.

Similar reduction, depending upon general conditions of installation, are available to large power users.

It is said several towns in this territory have higher rates than the above.

Flier Takes Off For Brazil Trying For New Records

(By The Associated Press.)

GLYNN ISLAND, Aug. 25.—The Stinson Detroit monoplane, Port of Brunswick, with Paul Redfern, Georgia aviator, as pilot, took off from here at 12:46 o'clock today on an attempted non-stop flight to Brazil.

With Rio De Janeiro 4,600 miles away as his objective, Redfern will try for a long-distance and endurance record.

ROOSEVELT FIELD, New York, Aug. 25 (AP)—Lloyd Bertraud announced today that barring unforeseen occurrences he and James Hill would take off for Rome in the Monoplane "Old Glory" at 6 o'clock tonight.

New Cotton Pest Reported From Knox County Not Hurtful

GOREE, Aug. 25. (AP)—A new variety of cotton pest for this part of the country has been reported by farmers of this community in Knox county. It is a whitish green in color, being about one fourth inch long and enlarged about the middle. The worm feeds upon the cotton bolls.

Despite presence of the pest in a number of fields, the cotton is good, and the general corn outlook is promising.

He Should Worry!

John W. Davis, Democratic presidential nominee in the last campaign, returns to New York on the S. S. Homeric from a trip abroad. Politics still interest John W. but no longer worry him for it would seem that his chances of obtaining the nomination again are somewhat slim.

Murder Trial Is Under Way In Panhandle

Trial of Archie Parker on a charge of murder in connection with the killing of Charles Blair at Roxana June 19 is under way at Panhandle.

Testimony today was that Mr. and Mrs. Blair stopped at the Carroll filling station at Roxana early on June 19. Parker drove up and stopped his car. Blair walked over to Parker and the two had sharp words over purported attentions of Blair to Mrs. Parker. After a little time the men separated. Then Parker drove his car up near Blair's and said the matter must be settled at once. Blair cursed and affirmed the remark. Parker shot and killed Blair. Two shots went wild and slightly injured Mrs. Blair. This state testimony was offered this morning by the proprietor of the service station.

Defense testimony was that Blair had often gone to Parker's welding shop and talked to Mrs. Blair. Jack Hamlin, Parker's partner, testified that he urged Blair to leave Mrs. Parker alone. He thought the attentions improper.

A special venire of 90 men was drawn for the case, which is expected to go to the jury in 84th district court late tomorrow.

Nearly Half of Telephone Growth Is In West Texas

ABILENE, Aug. 25. (AP)—Telephonic expansions are telling figures of West Texas progress. Of a year's activity and record expenditure in increasing the area served by telephones over the State, nearly one-half was made in West Texas during the past year, particularly in those regions where oil play has developed.

Though a large amount of money has been expended in the West on improvements and extensions, it is expected that good returns may be obtained during the coming months as business prospects seem very favorable.

Most noticeable telephone development has been made in the following towns, Stamford, Amarillo, Slaton, and Big Spring. The dial system is to be installed in Amarillo.

NEGROES WILL HAVE PART IN FAIR EXHIBITS

Abilene Exposition To Feature Women's Work

PAMPANS ARE ON COMMITTEE

Local Girl May Be There To Welcome Lindbergh

ABILENE, Aug. 25.—Another innovation made by the West Texas fair for this year is the introduction of a Negro Department in the Women's division. Mrs. Rupert Harkrider, general superintendent of that part of the exposition, to be from September 26 to October 1 this year, declares she is anticipating a wonderful display by the negro women in the culinary, textile, and plant and flower divisions.

Negro women are to have full charge of their part of their displays. The superintendent has already been selected and is working to interest members of her race in taking full advantage of the opportunity.

Efficiency Noted
Many negro women of Abilene and adjacent sections are highly efficient at cooking and sewing and there are numbers of homes in the negro section of Abilene which have attracted much attention on account of the beautiful flowers and well cultivated vegetable gardens.

The negro women's department will be absolutely separate from the regular women's displays and attractive premiums will be awarded on bread, cakes, pies, canned fruits, jellies and preserves.

In the textile division there will be numerous premiums and winners in the flower and plant show will also receive awards.

The regular women's department will be made more attractive and interesting than at any of the expositions held here in the past.

Pampans on Committee
When Colonel Charles A. Lindbergh arrives in Abilene on Monday, September 26 for his visit to West Texas, he will be officially greeted by a group truly representative of West Texas and of the forces impelling the development of this section of the Southwest.

Pampa will have a part in the ceremony. Honorable F. P. Reid, mayor, and Olin E. Hinkle, editor of the Daily News, have each been given an invitation to serve on the reception committee for this affair.

Mayor Reid has been asked to designate some young lady of his community to serve on the reception committee. This feminine representative will be designated as "The Spirit of Pampa," and she, together with the sponsors from other West Texas towns, will, in addition to taking part in the official welcome to be given the distinguished flier, be guests of honor at a number of elaborate social functions which will be arranged for them by Abilene people.

Miss Emily Frances Key of Lampasas, who was crowned "Queen of West Texas" at the Wichita Falls Convention of the West Texas Chamber of Commerce will attend the affair and represent "The Spirit of West Texas". Miss Mary Alice Parramore, daughter of a pioneer West Texas family, is to be "The Spirit of Abilene" and as such will be the official hostess for the visiting "Spirits".

Coming to Pampa Soon

Shown above are the members of the Moody Bible Institute quartet from Chicago, who will assist the Rev. Tom W. Brabham, local Methodist pastor, in a revival meeting to begin Sunday. Their reputation has preceded them, and many good reports have come from Panhandle, where they have been assisting in a Methodist meeting. From left to right they are: Above, George Chenot and Edwin Guber; below, Ivan Allbutt and George Webber.

SCORES DIE AS JAPANESE CRUISERS COLLIDE IN DARK

(By The Associated Press)

LONDON, Aug. 25.—One hundred and thirty lives are feared to have been lost in a collision of warships during maneuvers off the Japanese naval port of Maizeuru last night, says a Tokyo dispatch to Reuters.

The news received by the navy department at Tokyo adds that the Japanese cruiser Jintsu collided with the destroyer Warabi in the darkness. The destroyer sank in 15 minutes with a loss of 90 men. The Jintsu's bows were badly damaged and the cruiser had to be towed into port.

About the same time, the cruiser Naka collided with the destroyer Ashi, cutting through her after part and resulting in the loss of 27 men. Both vessels, however, made port for repairs.

Quartet Entertains Lions Club Today

Music by the Moody Bible institute quartet of Chicago featured the Lions club luncheon today. The young men sang repeated encores.

The Rev. Tom W. Brabham was chairman of the meeting. He introduced as speakers the Rev. J. S. Huckaby of Perryton, former Methodist pastor here; Edmonds Knittle, Boy Scout field executive, and the Rev. Lee H. Smith of Waxahatchie, who may become Presbyterian pastor here.

E. E. Reynolds of Pampa was another guest.

Speakers stressed the sound growth that Pampa is enjoying, and emphasized the work of the church and clubs. President H. Otto Studer of the club and Lion Catterton left soon after the meeting opened to attend part of the Chamber of Commerce meeting at Wellington.

Prayer Is Subject Of Sermon Tonight

The Rev. Lee H. Smith will preach on the theme, "Prayer as Communion With God," at the Presbyterian church tonight.

Rev. Smith will sing vocal solos, as also will Mrs. A. H. Doucette. The Rev. J. H. Bone, Presbyterian pastor at Miami, is here today and will attend the service.

MAYOR REID IS PRESIDING NOW IN WELLINGTON

Citizens Lining Up Support for Next Meeting

HEREFORD IS MAIN THREAT

Good Progress Under Way as Formally Announced

(By Staff Correspondent)

WELLINGTON, Aug. 25.—In the absence of Judge C. C. Small, Mayor F. P. Reid is presiding at the district convention of the Panhandle-North Plains Chamber of Commerce here today.

Early appearances gave Pampa the lead in the race for the next meeting, and a spirited day was assured by the efforts of Hereford to obtain the coveted prize.

More than two dozen Pampa delegates started early work for the 1928 session, and by noon had lined up Shamrock, Wellington, and Canyon as active campaigners.

Sessions are under way as scheduled, and the list of registrations was growing rapidly at noon.

Selection of the next meeting place will be just before adjournment this afternoon.

(See CONVENTION—Pg. 2, Col. 2)

WELLINGTON, Aug. 25.—Wellington is dressed up in her "Sunday's best" to receive delegates of the Panhandle North Plains District convention of the West Texas Chamber of Commerce which meets here today. Everything is in readiness, including preparations for a toothsome dinner for the gala day. Prominent speakers from a number of points have accepted invitations to appear on the informational and entertaining program provided, and are expected to arrive in Wellington Wednesday night and early Thursday morning. More than 30 towns in the north-

Search Extended In Efforts to Find Missing Aviators

(By The Associated Press.)

WASHINGTON, Aug. 25.—A second extension of the search being made to locate the missing Pacific fliers was decided upon today by the navy department.

The new plan calls for investigation of the Hawaiian Islands from a point 600 miles off San Francisco to the islands.

CROP YIELDS SHOW GAINS

Increased production of the important food and feed crops, agriculturists declare, is due largely to an increased yield per acre. During the last 40 years the combined acreage of corn, wheat, oats, and potatoes has expanded but 52 per cent while the total crop production of these crops has increased 77 per cent.

Much Oil Activity Is Expected In Brewster County Around Alpine

(By The Associated Press.)

ALPINE, Aug. 25.—Increased oil drilling operations in Brewster county are noted in the activity of promoters here recently. Several test wells are now being drilled.

In addition to a test well going down on the McIntyre ranch a few miles south of Alpine, one or two are to begin soon on the O-2 ranch below here, another test near Marathon on the Deche ranch and two more going down near Lennox, still greater drilling activity is expected to begin in the county within the next few weeks as a result of leases recently obtained by eastern operators.

D. W. Light and Asa A. Jones, who own about 90,000 acres of land in eastern Brewster county in the Texas district, recently gave an oil and gas lease on 25,000 acres of land to C. W. McCall, oil operator of Pitts-

burgh, and C. B. Schaffer of Chicago, it was announced.

Both Schaffer and McCall anticipate the commencement of drilling operations at an early date, according to information obtained here.

Schaffer opened up the great gusher field in Oklahoma, it was stated, and has large oil interests throughout the United States.

From the best information obtainable it is believed that a lease on the 60,000 acre ranch of C. P. Cox at Longfellow will be closed soon, and a well started. It is also understood that negotiations are now in progress whereby the entire holdings of T. M. Shely and Sons, I. C. Roark, and the Rackleys will be leased to oil operators. All of these leases are located in the extreme eastern portions of the county, practically adjoining each other.

Tunney Chooses Training Quarters

The CEDAR CREST COUNTRY CLUB, where Gene will train.

GENE TUNNEY The LIBRARY

Gene Tunney has chosen his training quarters for the Chicago fight—the Cedar Crest Country Club, surrounded by small lakes. Here's a view of the luxurious club to be at Gene's disposal during his training period, with a glimpse into the club library where Gene, no doubt, will while away many moments.

Iowa's Corn Crops Due to Hot Winds

(By The Associated Press.)
DES MOINES—Hot winds, the greatest of crop scourges in Nebraska and Kansas, are responsible for corn being king of crops in Iowa.

Agricultural experts of Iowa State College have come to that conclusion after a survey of each country's acreage, climatic and soil conditions.

It was disclosed that the greatest corn areas are along the Missouri river in western Iowa, where the acreage runs as high as 59 per cent. In that region, farmers have found the hot winds too great a menace to oats and other small grain crops.

A popular idea that corn acreage is uniform in the tall corn state is disputed by the survey, which discloses that some counties have less than 20 per cent of farm land in corn.

ENGINEERS SAY TERRACED LAND STOPS FLOODS

(By The Associated Press.)
ST. JOSEPH, Mich. — Land terracing is the remedy advanced by the American Society of Agricultural Engineers to prevent floods like those that spread over the country last spring.

The organization will make the spread of such a doctrine its major activity during the coming year. Raymond Olney, secretary, will direct the effort.

"Terracing to prevent erosion, as well as preserve soil fertility, has been proved sound by centuries of use in China and the Philippines," said Olney. "We plan to ask agricultural engineering departments of state universities to inaugurate terracing programs."

Let a want ad work for you.

Make Rigid Test Of Silk and Rayon

(By The Associated Press.)
WASHINGTON—Results of a scientific test to determine the relative merits of the silk and rayon stockings are set forth in a report made to the American Home Economics Association.

The tests, carried on at Iowa State College, covered nine brands of hose in two weights worn for more than a year under as nearly uniform conditions of wear and laundering as possible. They indicate that service-weight silk hose give nearly twice the wear of chiffon. Rayon gave half the wear of service-weight silk and about equal wear as compared with chiffon. The cost of rayon is about one-half that of silk.

All hose tested were fast to perspiration, but not to washing in sunlight. There were practically no adulterants or substitutes for fibre.

Former Crown Prince Of Serbia Tries To Commit Suicide

VIENNA, Aug. 25.—A dispatch from Belgrade today says it is reported from Jugo-Slavia that former crown-Prince George of Serbia has made an attempt at suicide, inflicting serious wounds from which he is not expected to recover.

George, elder brother of King Alexander, renounced his rights to the succession in 1909. He was wounded during the late war, and ever since has been in feeble health.

The better brands contained little weighting, but much crimp.

Bursting strength was slightly decreased by exposure to sunlight, but greatly decreased by perspiration. Laundering did not injure the appearance of silk hose, but made rayon less lustrous, looser in weave and harsher in texture.

Farm Research Pays Dividend Of 50,000 Per Cent Annually

WASHINGTON, Aug. 25.—Uncle Sam pays the world's greatest insurance premium—\$20,000,000 a year. In return he is protected against wholesale destruction of human life, crops and livestock.

That, virtually, is the view taken by Dr. A. F. Woods, director of scientific research, U. S. Department of Agriculture.

"Without the research scientist," Dr. Woods declared, "our present complex life would not be possible. Disease would wipe out cities. Gradual depletion of soil and inroads of pests would mean starvation for millions. Through the work of the research man our lives are made easier, and what we have is made to last longer. He is the foundation of an intricate structure."

Research achievements in this country, recorded in the history of little more than half a century, cost the government about \$10,500,000 a year. Closely affiliated experiment stations cost a similar sum, bringing the total to approximately \$20,000,000 annually.

"This," Dr. Woods continues, "is an extremely small premium to pay for protection of an industry capitalized at approximately sixty billion dollars with an annual gross income of twelve and a half billion dollars. Careful analysis of results shows that for every dollar expended for research there is an annual yield of \$500, or 50,000 per cent. In the Bureau of Dairy Industry alone, an annual expenditure of \$500,000 for the improvement and protection of milk and its products, saves the country \$200,000,000 a year. Hundreds of other projects in as many different fields are saving billions of dollars annually.

"Soils have been analyzed and reclassified; natural enemies of pests have been imported to eradicate them; clover has been saved from the seed midge by a slight modification in cultural practices; fruits have been saved from the San Jose scale; the house fly is being conquered; bark beetles are being eradicated; means have been found for contending with the grape root-worm; the alfalfa weevil is being conquered; special poisons have been concocted for rodents and predatory animals.

"Serum and virus treatments have made it possible to prevent hog cholera; fruit quality and yield has been improved by means of bud selection; methods and poisons have been discovered for combating insects, particularly the boll weevil, which threatened the entire cotton crop. Discovery of the part played by the common barberry bush in the life of black stem rust made it possible to stop this enemy of the wheat crop.

"Danger of yellow fever and malaria was minimized when science found it to be transmitted by mosquitoes. Science found carbon

FARMERS TOLD TO PUT PRICE ON THEIR TIME

(By The Associated Press.)
ITHACA, N. Y.—Most farmers should value their time at one-half cent up to one cent a minute, advises Dr. George F. Warren, director of the farm management department at the New York State College of Agriculture.

"Probably no other single mistake on the part of Americans, and especially American farmers, causes so much loss as does loss of time," Dr. Warren asserts. "Some farmers now spend a dollar's worth of time saving a half dollar's worth of goods. One can't afford to spend ten dollars' worth of time repairing an old machine that is not worth ten dollars after the job is done."

Writes Her Novels On Baltic Islands

(By The Associated Press.)
LONDON—Madam Kallas, author and wife of the Estonian minister in London, goes to a small island in the Baltic every summer, where she does most of her writing. Madam Kallas' principal foods during her three months' stay on Kasari, near the island of Dago, are chicken, vegetables, strawberries, and blueberries.

"I never have any fish, for the natives are busy all summer with their farms, and have no time for the nets," she says.

"It is impossible for me to work seriously in London, and this little island is an ideal spot. I have no neighbors excepting an old lady who has a cottage a short distance from the bungalow where I stay. The postman calls twice a week, and I walk to the village postoffice now and then to fetch my letters. I have no time to become lonely, as I go for a swim in the morning, and write most of the day."

tetrachloride with which nearly 2,000,000 human patients have been treated for hookworm."

FOR PERMANENT PAVING — SEE — STUCKEY CONSTRUCTION COMPANY Office At ROSE MOTOR CO. Pampa, Texas

TO OUR CUSTOMERS

In line with our policy of service to our customers at the lowest practicable rates we are pleased to announce the following revised electric rate to become effective immediately. These rates will apply on all current used during the month of September, the first statements under the new rates to be rendered on October 1st.

The new rates will effect a saving to the people of Pampa of many thousands of dollars per year:

LIGHTING SCHEDULE

- First 30 K. W. H. @ 15c per K. W. H.
- Next 30 K. W. H. @ 12 1-2c per K. W. H.
- Next 40 K. W. H. @ 10c per K. W. H.
- All over 100 K. W. H. @ 7 1-2c per K. W. H.

SMALL POWER RATE

ONE TO 50 H. P.

- First 200 K. W. H. @ 7c per K. W. H.
- Next 800 K. W. H. @ 6c per K. W. H.
- Next 1,000 K. W. H. @ 5c per K. W. H.
- All over 2,000 K. W. H. @ 4c per K. W. H.

LARGE POWER RATE

AVAILABILITY—To customers who use electric energy for general power purposes, and having installations of 50 H. P. or over.

DEMAND CHARGE—\$1.12 1-2c per month per Horsepower of Demand plus.

CUSTOMER CHARGE—75c per month plus.

ENERGY CHARGE—3c per Kilowatt Hour.

MINIMUM—This rate is subject to a monthly minimum charge of the demand and customer charges.

DISCOUNT—This rate is subject to a discount of 5 per cent if bills are paid in full within ten days from date of the bill.

Demand charge under this rate is computed as follows:

50 H. P. to 75 H. P.—80 per cent of connected load.

75 H. P. to 100 H. P.—70 per cent of connected load.

Excess—65 per cent of connected load.

The average rate per K. W. H. under the above schedules will be very low as compared to other cities of similar size. It is a pleasure to us to make these very attractive rates available to the people of Pampa.

Telephone 100, all departments

WHEAT OUTLOOK—Farmers of this area should be interested in the attitude of the national department of agriculture toward the world market situation for wheat next year.

The crop in the Pampa territory for this year was far short of normal, yet statistics show that the world as a whole produced a big surplus. A new report says:

"The carry-over of old wheat into next season may be no larger than this season's carry-over, but there is a tendency to continue to expand wheat area, not only in the United States, but also in Canada, Argentina and Australia."

The report has been issued as a warning. On the basis of reported intentions of farmers to plant, and considering the 10-year average abandonment, the department estimates a winter wheat crop of about 626,000,000 bushels.

This prospective crop, and a spring wheat crop, would provide an export surplus of more than 250,000,000 bushels, the largest since 1924. This is the hope, and it favors the cow and the sow and the hen.

OIL FUTURE—The wisecracks who speak ominously of the time when Panhandle oil is gone and who see no permanency to the mineral assets may do harm through distorting the obvious facts.

In the first place, Panhandle oil is not going out of the ground at a rapid rate. As long as there are shallow fields supplying much of the market demand there'll be no frenzy to drain the Panhandle area.

In the second place, the Panhandle oil area is one of the largest in the world. Thick formations, rather than shallow, highly saturated sands, will not be drained in a decade. The potential recovery, considering the depth, will make necessary the expenditure of many millions of dollars. As the world supply lessens, the importance of this territory is sure to grow. Panhandle refineries should be long-lived.

And gas should not be overlooked. As a basis for obtaining industries of every size it is vastly significant. The gas reserves of the Plains are not yet menaced by out-going pipelines, although this movement is something to watch.

In short, by the time the oil and gas industry in the Panhandle field is on the down-

OUT OUR WAY

—By Williams

grade many communities should have built well, encouraged industries directly and indirectly pertaining to agriculture, and should have learned to look upon oil as merely a valuable natural resource. This means paved roads, more dairying, more poultry raising, more small manufactures to serve more people. But Pampa, as the oil capital, should enjoy oil activity as long or longer than any other Panhandle city. Now is the time to bring company headquarters here, to build good roads leading toward the field activities, and make Pampa the most desirable place of home and business residence in the Panhandle for officers and men of the oil industry. This requires faith and courage. Remember the experience of other cities which did not have these assets, and which saw rival cities reap the reward.

PRESS FORUM

From the New York Herald Tribune: These never-conquered, reserved, proud Indian peoples are splendid as motion picture material for posterity. As co-citizens they never have been appreciated by races desiring to supplant them. In their unconquered condition the United States found its Indians picturesque but inconvenient, and today their descendants are more reserved than ever and employ themselves in fashioning pretty presents for Mr. and Mrs. Coolidge.

Farther south the problem of indomitable native races is still fresh and troublous. Mexico has long talked darkly—and to the expressed horror of neighbors who owe their own lands to the same methods—of a "war of extermination" against the Yaquis, forever defiant in their Sonora mountains. And now a writer in "Excelsior" declares that only destruction will turn the rich possessions of the Indians of Quintana Roo into the national treasury. He suggests that as soon as the Yaquis cease to be among federal agenda something military should be done about the Mayas of remote Yucatan, and his words are vigorous beyond all English, for the theme is the loss of revenue, followed by a mordant sketch of the modern Mayan character. The whole territory which they rule and enjoy is one vast forest, full of the most precious woods—red cedar, zapote, (the source of chicle), mahogany, oak, ebony and mulberry. What right

ness of the natural resources of Texas are considered, the manufacturing activity within the state was almost insignificant compared with what most certainly will become in the very near future."

then, have these Mayas to maintain within our republic a foreign power hostile to us and friendly to their neighbors, the British of Belize?"

Secretive, inhospitable, decadent, no longer recognizable as scions of the race which attained the highest culture in pre-Columbian America and built its most splendid cities, the Mayas hang on, and neither by the war of the castes nor by Mexican disapproval nor by the peaceful penetration of archaeologists and chicle explorers have they been dislodged or won over. They are wretchedly poor, despite their golden forests, and the inheritance of the ruins of fair forgotten temples hidden there, but it cannot be denied that alone among North Am-

Highway Grader Hits Foundation Ancient Spanish Mission

(By The Associated Press.) MONTELL, Aug. 25.—Ruins of forgotten Spanish mission act as a curbstone for a section of the highway to Camp Wood several hundred yards west of this town.

Parts of the walls and foundation of the old structure were bare when the grader cut the drainage ditch for the highway, and investigation showed that the foundations were almost intact, although very little of the superstructure remains.

The bottom of some of the embankments, which once served as loopholes and windows can still be seen and the outline of the walls can be traced. Few people in the vicinity know that the ruins exist, although crumbling stones are plainly visible from the road.

The history of the mission is apparently lost. The oldest old timer in these parts has no recollection of the building and search of the historical records so far has failed to reveal the name of the mission.

Larks Lose To Texans Tuesday

AMARILLO, Aug. 25.—Campbell, Lark pitcher, was so much better than Fred Newton here yesterday that the Texans never had a chance at victory.

Gonzales was a shining exception, however, getting three safe blows in four trials.

The final score was 10 to 4.

Table with columns: Player, AB, R, H, PO, A, E. Lists players like Wickets, Allington, Comorosky, etc.

Score by innings: 104 640 100-10

Two base hits: Haley, Gunther, Harris, Three base hits: Allington, Bliss, Shupe, Gonzales.

Struck out by: Newton 3, Campbell 2, Shupe 3. Base on balls: Off Shupe 1, Newton 5, Campbell 3.

Wool Gathering Pays This Texan

(By The Associated Press.) SAN ANGELO—Wool gathering is not generally considered a lucrative occupation, but it is for Ygnacio Andrade of Del Rio. Andrade is chief of a union of sheep shearing captains who shear most of the 4,500,000 sheep and the 2,500,000 goats in Texas.

The sheep shearers' union is a thorough one. Virtually all of the shearers are Mexicans. They work under the direction of about 40 captains.

A shearer can handle from 100 to 150 animals daily and one shearing outfit will shear from 1,200 to 1,500 sheep daily.

The parents of Miss Myrtle Jarboe were reunited after twenty years of divorced life in their anxiety over her recent leap from an airplane in a parachute.

Back Home—and a Conqueror

Clarence D. Chamberlin, New York-to-Berlin flyer, returned to his home town of Dealson, Ia., in a rainstorm, but there were thousands at the depot to greet him. He is pictured here with his mother on the car platform.

Here Chamberlin is shown in the reviewing stand for the parade held in his honor. The arrow points to Chamberlin, with Governor John Hammill on his right and his wife on the left.

SOCIAL NEWS

By MRS. M. M. SMITH, JR. PHONE 72

J. F. Darnall has returned to Los Angeles after an extended visit with his sister, Mrs. V. E. Fathree.

C. T. Hunkapillar went to Wellington today.

Mrs. Jack Berry of Canadian was here yesterday.

Mrs. James Moore has returned to the J. A. Ranch.

Paul Rorrey of Borger was here yesterday.

Mr. and Mrs. Clinton Henry, Miss Mary Hobart and T. D. Hobart motored to Amarillo today.

Mrs. Jim White and daughters, Myrtle are in Amarillo today.

H. L. and Mickey Ledrick have returned home after spending a few days on the Ledrick ranch.

Mr. Geo. Walstad is an Amarillo visitor today.

Rev. J. A. Boone of Miami is visiting his daughter, Mrs. D. S. Shepherd.

The Rev. D. D. McSkimming is very ill at his home in North Pampa.

William Moore of the H. and K. Drug store has returned from Eldorado, Kan., where his wife has been seriously ill.

Mr. and Mrs. W. Masters have returned from a trip to Kansas City.

Porter Malone returned yesterday from Hillsboro, where he attended the funeral of his father.

The mayor, the city secretary, the city engineer, and councilman Lewis were the only members of the city government to appear for a meeting last night, so the session was postponed until a later date.

Miss Nina Lee Bankston of Merritt is the guest of Miss Leta Gillian.

Mrs. W. R. Silvey Greeted by Friends

Mr. and Mrs. W. R. Silvey and daughter, Miss Ruth, of Dallas and Mr. and Mrs. Bela Martin of Amarillo were unexpected visitors in Pampa yesterday.

Mr. Silvey is superintendent of the Pampa public schools for several years, while Mrs. Silvey was an active and efficient worker and leader in many lines of social and club activities, and they have many warm friends here who are glad to welcome them.

They were guests at the home of Mr. and Mrs. H. L. Ledrick. Upon their arrival, Mrs. Ledrick arranged an impromptu gathering of as many of Mrs. Silvey's former intimates as it was possible to reach, and the following ladies assembled to greet their former friend and co-worker: Mrs. P. C. Ledrick, Mrs. George Walstad, Mrs. Dave Pope, Mrs. John Andrews, Mrs. W. Purviance, Mrs. C. T. Nicholson, Mrs. Clinton Henry and Mrs. L. C. McMurtry.

The afternoon was spent in informal visiting, which was greatly enjoyed by all, and just before the departure of the guests the hostess, assisted by her daughter, Mrs. Fran Shriver, served delicious strawberry ice cream and cake to those present.

Mrs. Sanders Honors Her Sister Here

Mrs. P. O. Sanders entertained at a bridge luncheon yesterday at the New Schneider hotel complimentary to her sister, Mrs. C. H. Amacker. Mrs. W. M. Dodson won high score and Mrs. J. D. Sugg low.

The guests were Mrs. DeLea Vickers, Mrs. Finney, Mrs. O. K. Baker, Mrs. John Cram, Mrs. John Studer, Mrs. W. E. Coffee, Mrs. W. M. Lewright, Mrs. J. D. Sugg, Mrs. Neil McCullough, Mrs. Carlson, Mrs. John Willis, Mrs. C. T. Hunkapillar, Mrs. I. B. Hughey, Mrs. J. M. Dodson, Mrs. Griffin, Mrs. M. Howard, Mrs. Carterton, and Mrs. Ralph Arnold.

Big Consignments Of Books Arrive For Pampa School

The thousand dollars' worth of books for the Pampa school library have arrived and are being unpacked and shelved in the high school. These additional books will give the local schools one of the best libraries in the district.

Also the material for the chemistry and physics departments is arriving and being installed. Up until this term the local high school has had no adequate department for the teaching of chemistry and physics.

The expenditure for these departments will be approximately \$4,000, and will give the school completely equipped facilities for instructions in these subjects.

Pafford Returns From Training Camp

E. J. Pafford of the Pafford Grocery company, returned home Wednesday from a two-weeks' course at Camp Palacios. Mr. Pafford is a member of the old 36th division which was prominent in the Great War.

Each year a training school for National and Home guards is held at Camp Palacios and all branches of the army are congregated for military training. The camp this year was composed of more than 7,000 men from all parts of Texas.

On Friday, August 19, Governor Dan Moody inspected the entire personnel of the camp in all branches of maneuver and congratulated the men on their splendid showing.

Mr. Pafford is a member of the national guard at Claude, where he previously resided. This is his third year of service and the end of his present term of enlistment.

Texas Youth, 19, Is Professor With University Place

AUSTIN, Aug. 25. (AP)—Roland Andrews Egger, 19, now doing summer research work in government at the University of Texas, is believed to be the youngest University professor in the United States.

He is a professor of municipal government and will teach it at Southern Methodist University, Dallas, next season.

Egger has attended universities for only three years, but has gotten a masters' degree in that time. He entered Southwestern University Georgetown, in 1924, obtained a B. A. degree in two years, and wound up with a masters' degree from Southwestern Methodist University last spring.

He is working under Dr. Charles M. Kneier, of the government department of Nebraska University, but is studying this summer in Texas for benefit of the broader field of research available here.

Stone Walls Used To Rebuild Church

WOLCOTT, Conn., Aug. 25.—Stone walls may not make a prison, but on occasion they go a long way toward making a chapel. Units of many of the stone walls so common here have gone into the little chapel which the people of Woodtick, one of the small communities of this town, have erected after a long financial campaign to raise necessary funds.

When fire destroyed the little wooden structure which had served the settlement as a church since 1885, only one service had been held in it for many years, although it had served occasionally as a hall for lay gatherings.

After the fire, however, the neighbors decided that to have no church was not in accord with New England and Connecticut tradition. Socials, subscriptions, strawberry suppers and food sales were held, the money was raised and the chapel was built from stones taken from wall of the neighborhood.

Nurse In Washington Directs Relief In Distant Countries

WASHINGTON (AP)—An American woman sitting at her desk in Washington "travels by mail" only, yet she sends the healing power of the United States to the sick and needy in far corners of the universe.

She is Miss Clara D. Noyes, national director of the American Red Cross nursing service. Her daily mail comes from all parts of the world.

A large poster in Bulgarian characters announces a course of lectures to be given in Sofia by Miss Hazel Goff, the American director of the school of Nursing. A line states that Miss Goff will speak in Bulgarian.

Next comes a letter from a Red Cross nurse in the Philippines, who tells of riding through swamps to isolated parts of the islands upon the only conveyance available that is suitable for such a trip—a water buffalo. Miss Theda Phelps writes from Ghazi, Aintab, Turkey, that she is having difficulty persuading superstitious natives to accept medical aid, and Miss Helen Porter writes from Greece. Thus, by mail, the director of nursing passes rapidly through many lands.

The broad desk at which Miss Noyes sits is a key-board contacting nurses in all corners of this country and nursing organizations in a score of countries abroad.

Miss Noyes was asked recently if she was not "awfully busy" during the Mississippi flood. She replied:

"Why, no, not any busier than usual. All I do is press a button and things happen."

There are 196 State and local nursing committees in the United States, operating under National Headquarters in Washington and the branch offices in St. Louis and San Francisco, with a total of 48,000 Red Cross nurses listed. Of this total 29,000 listed as "active" would be prepared, if necessary, to follow the army to any part of the world or to serve in a remote section of this country.

The room in which Miss Noyes works is crowded with mementos

of the organization, many of them souvenirs of war days in France. On the walls hang portraits of nursing pioneers, uniformed for service. One is of Florence Nightingale, "the Lady with the Lamp," whose work in the Crimea established nursing as a profession. Another is of Jane A. Delang organizer and first chairman of the national committee on nursing of the American Red Cross, who died in the field during the World War.

A Rat-Free Future Predicted For U. S.

(By The Associated Press.) WASHINGTON—"Public concern" is to be America's Pied Piper.

General interest in rat control, say federal biologists has been stimulated by better knowledge of facts concerning the spread of communicable diseases.

The person who allows rats to increase on his property is directly responsible for the menace to his neighborhood. Permanent exclusion of the rodent may be brought about by a rat-proofing of all structures commonly inhabited, by removing all possible shelter, and by cutting off food supply.

Decrease in rat population is only beginning to be apparent.

Airplane Bars To Close Like "Pubs"

LONDON (AP)—Airplanes flying over England are not to have any undue advantages over the "pubs" in respect to selling liquor.

"Hereafter," says the Imperial airways, "no drinks may be served in an airplane flying over British territory during hours when public houses are closed."

Any person who wants to get a drink on an airplane while the pubs are closed from 2:30 p. m. until 5 p. m. must be at least three miles outside the territorial limits of Great Britain.

Cattle Lower As K. C. Market Is Flooded Monday

KANSAS CITY Stock Yards, Aug. 25.—Arrivals in the cattle division Monday were the largest of any day thus far this season. The run was principally grass fat classes from Kansas, Oklahoma, and other western states. Fed classes were limited in supply and fully steady. Grassers were weak to 25 cents lower. Hogs were in active demand at 10 to 15 cents higher prices. The supply was short of the requirements. Lambs were 50 cents lower and sheep were off 25 cents. The run of 12,000 exceeded the early estimate by 4,000. Receipts were 29,500 cattle, 6,000 hogs and 12,000 sheep, compared with 21,000 cattle, 6,000 hogs and 7,000 sheep a week ago, and 23,100 cattle, 6,125 hogs and 7,650 sheep a year ago.

Fat cattle prices were steady to 25 cents lower. A decline prevailed on most grassers, but the better grades that showed desirable flesh and practically all fed cattle steady. With stockers and feeders steady, as many cattle sold on last week's basis were lower. As the runs have increased there has been a corresponding increase in demand. No full fed steers arrived. Some that had been fed grain on grass brought \$12.25 to \$13.50, wintered grassers brought \$10.25 to \$12. Straight grass steers brought \$7 to \$10.50, mostly \$8.50 to \$10. Cows and heifers were steady except there was moderate weakness in the canner and cutter classes. Fed heifers were scarce and fed cows were not available in more than odd head lots. Veal calves were 50 cents to \$1 lower compared with the extreme high point last week.

Liberal receipts of stockers and feeders drew a material increase in demand and prices held close to steady. Some of the plain to medium kinds were slightly lower. More buyers were here than at any previous time this season.

Hog prices were 10 to 15 cents higher. The advance applied to all kinds, but was more urgent for weights above 225 pounds than last week. Both shippers and packers were in the competition. The 140 to 230 pound grades brought \$10 to \$10.40; 230 to 260 pounds \$9.50 to \$10; 260 to 325 pounds \$8.50 to \$9.50; packing sows and stags \$7 to \$7.50; stock hogs and pigs \$9.50 to \$10.25.

Lambs were quoted 50 cents lower and weak to 25 cents off, compared with last week's close. Trade was active as soon as the decline was established. Western lambs brought \$13.50 to \$13.75; native lambs \$12.50 to \$13.25; yearlings \$9.50 to \$10; wethers \$7.25 to \$7.75 and ewes \$5 to \$6.50. Feeding lambs brought \$12 to \$13.

Trade in horses and mules was quiet and receipts were small. Prices were quoted unchanged.

Moody Has Become Enthusiastic About Trips by Airplane

AUSTIN, Aug. 25. (AP)—Becoming an airplane enthusiast after several recent flights, Governor Moody likes to tell of his observation of the changed aspects of things from the air.

He has noticed that the natural color of the state capitol makes it more difficult to see when approaching Austin by airplane than the University of Texas Memorial stadium, which is only about one-fourth the height of the statehouse, comparing the highest points of each. It is 317 feet to the statue tip on the capitol, which is 7 feet higher than the national capitol.

"You can see the stadium before you can locate the capitol," the governor vouched.

He may fly to Fort Worth for the September 26 reception of Col. Chas. A. Lindbergh, trans-Atlantic flight hero, whom he met at St. Louis on the Texas good will tour. Although the governor took his first flight only a short time ago, going to American Legion ceremonies at Fort Worth, he has flown several hundred miles since then.

Only last week he raced a heavy wind-driven rain into Austin, and beat it to the ground in an army plane bearing him from Camp Palacios in enough time to reach shelter before the down-pour drenched the country side. His pilot made the 170-odd miles in 80 minutes.

"Railroads look very much like wagon roads and a wagon road looks like a railroad, when you are 2,000 or 3,000 feet in the air," the governor said.

"A creek looks like a dry road in a sandy country, and a fellow can't tell whether he is flying over Taylor, Georgetown or Rockdale, unless he happens to have a personal acquaintance with the structures in the city or with the territory surrounding it."

VON ELM FACES HORDE OF GOLFERS WHO SEEK TO CAPTURE HIS CROWN

MINNEAPOLIS, Minn., Aug. 25. (AP)—Over the rolling and rugged acres of the Minikahda club here, George Von Elm of Los Angeles will defend his title of national amateur golf champion the week of August 22.

Von Elm will shoot at the scintillating mark made in the same event on the same course in 1916. Chick Evans set a record of 286 for the open championship at Minikahda, never equaled in the United States and only recently bettered by Bobby Jones by one stroke in the British open at St. Andrews.

Minikahda offers a course minus freak holes and blind greens and with putting greens developed nearly to perfection. A horde of golfers, including Bobby himself, will try to life Von Elm's crown.

Against the golfing layout is a back drop of twinkling lakes, bewitching terraces and clumps of brilliant verdure that lend natural enchantment to the stretches of ominous bunkers and tricky water holes.

Harrison R. (Jimmie) Johnson will carry the hopes of the home club. Johnston, a Minikahda member, has slashed out a noteworthy record in competitive golf. His most recent exploit was leading the field for 36 holes with 144 strokes in the national open at the Oakmont club. Later he won the seventh consecutive time. He was twice a member of the Walker Cup team and western amateur champion in 1924.

Donald Carrick of Toronto, Canadian amateur champion, probably

will be the only foreign entrant.

The Minikahda club has improved its links and added 300 yards and numerous hazards to make expert shots imperative at all points. It is one of the few courses that has its fairways watered throughout.

The links run 6,669 yards, with the first nine totalling 3,138 yards and the second 3,531 yards.

Par for the out trip is 35, although the second hole, 444 yards, lacks only two yards of the normal distance for par 5, and the seventh, 455 yards, is 10 yards more than the usual par 4 limit, so that most cards would make it par 36.

The second nine has a 37 par, but the tenth and sixteenth holes are only 26 yards short of par 5 length.

While the halves are uneven by 400 yards and two par strokes, difficulties are about evenly divided and a score of par 72 is excellent golf.

National Amateur Champions.
1895—C. B. McDonald, Chicago.

SOCCER STAR A SOCKER

WASHINGTON (AP)—One of the young stars of the fast Washington Soccer League, Earl Clark, nineteen, is busy socking baseballs for the Richmond, Va., team this year. He seeks at such a rate that his friends have no doubt of the truth of the story that five major league outfits are watching him.

Clark was a sandlot phenom in Washington. He went to Richmond when seventeen for a tryout. He is now batting well over .400 and leading the league. He has useful legs, having been caught at 10 seconds in the 100-yard dash, and is a booter of considerable renown when the Monroe Soccer team goes into action with him as center forward.

BOUY WAS A ROUGH ONE

SAN FRANCISCO (AP)—Old timers who saw the fight at Point Richmond, Feb. 23, 1910, when Al Wolgast stopped Battling Nelson in round 40 to win the lightweight title, say it was probably the roughest, toughest battle ever seen in California.

Early in the bout the referee cautioned the fighters several times for butting. Finally he bumped their heads together hard and said, "Now go to it, but all you want." Right after that the door then, observers say, and the pair hit each other with every thing but the ring posts. Nelson was badly battered and Wolgast a little less so.

SUNDAY PLAYERS FINED

VAN BUREN, Me.—Sunday baseball has been played in this New Brunswick border town as long as anyone can remember, until recently when the Houlton and Van Buren teams were taken into court. Each player was fined one cent and costs.

Denny Spared Balls 12 Years Without Use Of Baseball Glove

HOUSTON, Aug. 25.—Jerry Denny, once a colorful major league baseball player, whose gentle personality merged with immortality at the home of his daughter, Mrs. N. A. Carroll, here, came down through baseball history as the outstanding barehanded player of all time.

For some obscure reason, Denny spurned the use of a glove. For more than 12 years he stopped the ball bare handed in the old National league games and for more than 10 years he caught them the same way in the minors. Denny played third base, the "hot corner," yet his hands, as photographs showed, bore no marks.

Baseball history records that when he was a member of the Providence team in 1882 he handled five put-outs and eleven assists in seventeen chances and for the old New York Giants in 1890 he took eleven assists and two put-outs in twelve chances. Denny was known in every section as the greatest fielder of his day and ranked with such men as the noted Jim McGarr, Billy Nash and Ed Williamson, which was many years before the reign of Jimmie Collins, regarded as best of the more recent third basemen.

Denny resided at Bridgeport, Conn., after his retirement from baseball in 1904. To the last he held his love for the game which gave him fame through all the years of its scandal and upheaval. He died while on a visit to his daughter in Houston, August 16.

Cisco Dairymen On Long Inspection Trip Through State

CISCO, Aug. 25. (AP) — Cisco dairymen are on a 1,500 mile tour of Texas, inspecting dairies in a special quest for information on dairy marketing.

The party is composed of R. L. Poe, vice-president of the First National bank, and chairman of the dairy committee of the Chamber of Commerce, three agricultural experts, five representatives farmers elected from the farmers at large and Secretary E. T. Peters of the Chamber of Commerce.

Peters has written other secretaries of proposed visits to their cities and has received many offers of entertainment, assistance and advice.

Taxation and Water Conservation Will Be Conference Subjects

AUSTIN, Aug. 25. (AP)—Taxation and water conservation, "outstanding economic problems," will be discussed by authorities at the fifth annual meeting of the Western States Taxpayers' conference to meet at Santa Fe, N. M., Sept. 1, 2 and 3, according to John T. Smith, executive committeeman from Texas.

Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Texas, Utah, Washington, and Wyoming will be represented.

Smith said state, county and city tax officials and all others interested in such matters should attend as the state is "vitaly interested in both questions."

Lower Farm Income Influenced by Cotton

Due chiefly to a decline in cotton prices, economists explain, the gross agricultural income for the crop year, July, 1926, to June, 1927, showed a decrease of about 5 percent compared with the preceding year.

Computed on cash sales plus estimated value of food and fuel consumed on farms, the gross income this year was \$12,080,000,000 as against \$12,670,000,000 last year. Dairy and poultry products continued to lead farm income with a total return of \$2,754,000,000.

The return for the labor of the farmer and his family declined nearly 10 per cent.

HALL KILLS SWALLOW

STEEL FALLS, Me.—A swallow flying over the baseball diamond during a game between Biddeford and Steel Falls was killed by a hot liner from the bat of John (Spink) O'Connell of Portland, playing for the local club. The course of the ball was unchanged. It was caught by the left fielder.

Champion Never Rests From Golf

SALT LAKE CITY, Utah, Aug. 25. (AP)—George Von Elm, national amateur golf champion, who wrested this coveted title from Bobby Jones last year, is a resident of Los Angeles, Cal.

Salt Lake City, however, has a claim on him. "Gix," as he is familiarly known, was reared here and caddied on the course of the old Salt Lake Country Club long before he began startling Utah with his game.

"Gix" never rests from golf. The game is bred in him. His father and mother are enthusiastic fans and are known in this city as the "parents of the golfing Von Elms."

Two of the champion's brothers are notable golfers. Leonard Von Elm, an older brother, holds the Salt Lake City championship and is champion of his home course, Fort Douglas, Utah. Roy, the youngest, recently won the junior state open championship for Utah. He also holds the Nibley Park course title.

Von Elm's hobby seems to be the breaking of course records. Recently, over the hard 72 par course of the New Country Club he shattered his own course record of 67 with a 65. Von Elm trains for all of his matches at the El Rancho Golf Club, at Los Angeles. He puts in a great deal of time on the game, but is careful not to become "over golfed."

British Hogs Taller Than 50 Years Ago

(By The Associated Press.)
 BASSALEG, Eng.—English hogs are up today—up about seven inches compared with their height of 50 years ago.

That was the statement circulated at the 86th annual show of the Royal Agricultural society on the estate of Viscount Tredegar near here.

Pig men say there is little likelihood that cheaper bacon would soon come about, however, because the demand for ham and bacon is increasing in leaps and bounds while the hogs are getting their backs up in very short jerks.

There were 664 pigs at the show. Thomas Brown, clerk of the show, who has been attending pig exhibitions since childhood, celebrated his 59th jubilee with the society this year, and remarked about the growth of hogs during his association with the business. Brown wasn't sure just how much the pigs had increased in weight during the past 50 years as he has no scales, but he has a tape measure.

"I have kept tab on pig's growth and the average pig today is seven inches taller than he was when I was a boy," Brown said.

Lower Milk Loss By Cooling Vats

"Keep milk cool!" Warm containers, or milk that is not sufficiently cool when placed in market cans, may lead to heavy financial loss by spoilage.

County agricultural agents warn against the danger of leaving filled milk cans unprotected from the sun. They suggest that wherever possible, milk ready for the market should be kept in cool water until time for delivery. Cement vats, filled with fresh changing water from a pump or spring, afford an economical means of keeping market milk cool.

Alarmed natives of Turkestan, seat of many recent earthquakes, are blaming the tremors on the wrath of Allah because the soviets allowed the Mohammedan women to unveil.

Walker County District Clerk Has Record of Longest Service In Texas

Power and Room Characteristic Of New Dodge Car

Astonishing roominess and exceptional riding comfort are outstanding characteristics of the bodies on Dodge Brothers' new four cylinder cars. The new sedan bodes measure 36 1/2 inches from the back of the front seat to the pedals—exactly the same distance as in Dodge Brothers' six cylinder sedan. The headroom in the new sedan is actually somewhat greater than in the former four cylinder sedan.

The new Dodge Brothers four cylinder sedan is built to hug the ground at the high speeds which the cars are capable of making. The over-all height is 70 3/8 inches, over 3 inches lower than in the former sedan. In the attainment of this lower height nothing has been sacrificed in the height of the seats. The front seat is 12 5/16 inches from the floor compared with 11 1/2 inches on the former sedan and the rear seat is 13 1/8 inches against 12 3/4 inches.

The powerful four cylinder engine in the new Dodge Brothers line makes these cars the fastest fours in America. This motor was developed by Dodge Brothers after months of experimentation and is said to be the best four cylinder motor Dodge Brothers ever built. It is of the L-head type with a bore of 3 7/8 inches and a stroke of 4 1/2 inches. Its displacement is 212.27 cubic inches. It has a five-bearing crankshaft made of chrome-vanadium steel machined in all and ground. On the brake block it develops from 35 to 40 horsepower and its taxable horsepower, N. A. C. C. rating, is 24.03.

Dodge Brothers' powerful new four cylinder engine is lubricated by the circulating-splash type system. The oil pump is of the gear type. It

(By The Associated Press.)
 HUNTSVILLE, Aug. 25.—The oldest county official in the state of Texas in the point of service and age—that is the record of J. B. Lee, 90, who has served as district clerk of Walker county for 30 years, claims.

Lee has been in public office for 43 years. In 1878 he served one term as county clerk of Madison county, then was elected district clerk of Madison county where he served for twelve years.

In 1890 Judge Lee moved to Walker county and was out of office for two years. He was appointed district clerk of Walker county succeeding John White. In 1898 White came back and defeated him for the office. Four years later Judge Lee regained the office by beating White once more. Since 1906 he has held the district clerk's office of Walker county, without opposition. In 43 years he has been in public service, there has not been a single complaint against him, and without a doubt can hold the district clerk office as long as he desires. Although Judge Lee is 90 years old he is in the best of health, and every morning he takes a walk over town to get in condition for his day's work in his office.

Judge Lee was born May 2, 1837, in Alabama, and came to Texas with his parents, Mr. and Mrs. John Lee in 1855. His father settled near Old Waverly in Walker county.

Judge Lee said he was one of the first to go to the Civil War and was one of the last to come out. He was in Parson's 12th Cavalry and all the time he was not fighting, he was detached to scour the country in search of corn. He was in about six or seven battles.

is located in the bottom of the crank case and is driven by worm gears from the camshaft. The pump is provided with an oil strainer and with siphon by-pass.

"Chain investments offer the best security—as possible loss of profits due to conditions in one locality are offset by added profits in others—so that the General Profit Average is maintained."

AN IDEAL INVESTMENT

From the above standpoint the Nunn-Warren Publishing Co., Inc., 7 Percent Cumulative, Participating Preferred Stock makes an ideal investment.

It is not usual that investors have the opportunity of buying stock in successful, local institutions—they are most generally "closed corporations," but the management of your "home town" newspaper believes that a wholesome effect will be created in having some of its Preferred Stock in the hands of numerous investors throughout the Panhandle.

Building Committee Named by Christian Church In Meeting

Men of the Christian church Wednesday evening in a general discussion of the question of the erection of the new building appointed a committee composed of the minister, James Todd, Jr., C. L. Thomas, Bible school superintendent; Roy McMullan, assistant Bible school superintendent; H. W. Hickman of the Hickman Construction company, and Ivy Duncan, to consider at once the plans for the type of building best suited for the program of the church, and to consider the question of raising the finances.

This committee will have the first meeting Saturday evening, and as soon as their work is accomplished will report back to the official board and later to the congregation.

SCOUTS TO ATTEND CAMP NEAR CLAUDE

Preparations are being made this afternoon to take a number of the members of the Methodist Boy Scout troop to Camp Warner, 12 miles south of Claude.

The boys will remain in the camp until Saturday afternoon.

CONVENTION

ern territory of the West Texas regional organization are going to send representatives to attend the big gathering, and indications are that the meeting will be a record one for that section. A special feature planned for the diversion of the guests is a tour of the "garden spot" of Collingsworth county.

Among those who will make the trip are: the singing mayor of Wichita Falls, Mayor R. E. Shepherd; H. J. Adair, publicity director of the Wichita Falls Chamber of Commerce; Dr. J. A. Hill, president of the West Texas State Teachers college; Col. H. H. Haines, manager of the Amarillo Board of City Development; Col. C. C. French of the Fort Worth Stockyards company, Manager Homer D. Wade of the West Texas Chamber of Commerce, and Exhibit-Agricultural Manager B. M. Whiteker of the organization, and others, all of whom will appear on the district convention program for the day.

Towns who will send delegates to the Panhandle-North Plains meeting will be: Stamford, Fort Worth, Alanreed, Tulla, Canyon, Childress, McLean, Memphis, Hereford, Dalhart, Pampa, Panhandle, Wichita Falls, Amarillo, Estelline, Clarendon, Altus, Okla.; Quannah, Wheeler, Mangum, Dodsonville, Perryton, Spearman, Wildorado, Groom, Follett, Farnsworth, Goodnight, Canadian, Glazier, Shamrock, Texline, Claude, and Chillicothe.

Five Die When Gasoline Is Poured On Cook Stove

NORWALK, Ohio, Aug. 25.—Five persons are dead here today as the result of an explosion at a farm house near Greenwich last night, caused by gasoline which was poured by mistake on a cook stove fire.

WASHINGTON, Ind. Aug. 25.—(AP)—Two early morning fires here today destroyed the county courthouse and burned the contents of several stores, causing a loss estimated at \$750,000.

Deputy and Negro Kill Each Other Through Mistake

(By The Associated Press.)
JACKSONVILLE, Fla., Aug. 25.—Son Durrance, 40 years old, Flagler county deputy sheriff, was killed today and Tom Payne, negro post office watchman, was probably fatally wounded when Durrance mistook Payne for James Smith, negro sought in connection with the death of Sheriff Parry Hall.

The negro and the officer shot each other.

Million Fascists In Japanese Union

(By The Associated Press.)
TOKYO, Aug. 25.—Fascism in Japan is attaining rapid growth, and may one day be the final bulwark against bolshevism in Asia, say leaders of the National Spirit Preservation association, formal name of the Japanese Fascists.

"Any amount of argument would avail nothing at the time of a national crisis," declared Tokuhisa Fukuda, chairman of the board of directors of the Japanese Fascists' organization. "At the supreme moment of national danger, only the strong arm of a Mussolini can save the country. This is our platform. We believe in direct action, should it become necessary in the interests of the country."

The Japanese Fascists are said to number about a million and the organization has 70 branches in all parts of the empire. At a recent meeting on National Defense Day, the organization adopted a resolution in connection with the Geneva armaments conference to the effect that Japan should refuse to accept any proposition unless it was based on an equal footing for Japan, England and the United States.

BILBO APPEARS VICTOR
JACKSON, Miss., Aug. 25.—Theodore Bilbo apparently has won the Democratic nomination for governor of Mississippi by piling up a majority of almost 10,000 votes in Tuesday's primary.

ENID, Okla., Aug. 25 (AP)—The Farmers' State Bank of Ames was robbed of about \$250 last night by men who smashed the combination of the vault and rifed a few private boxes.

Dr. C. D. Hunter has returned from a three-day visit in Dallas, where Mrs. Hunter will remain for a few weeks with relatives.

Texans Are Strong At National School Held At Evanston

(Special to The News.)
CHICAGO, Aug. 25.—West Texas has furnished nearly half of the Texas delegation to the National school for commercial secretaries now in session at Northwestern university, Evanston, Ill.

Texas has 21 secretaries in attendance of whom nine are from West Texas.

The Texans are: Scott Barcus, Pampa; Paul T. Vickers, Midland; C. T. Watson, Big Spring; Grady Shipp, Vernon; Myron Ward, Fort Worth; Carl Blasig, Brady; A. B. Davis, Lubbock; Hubert Harrison, Wichita Falls; Merle Gruver, Olney; John Boswell, Dallas; Russell Rhodes, Tyler; Jere Cason, Mexia; George Buchanan, Marlin; W. D. Moore, Nixon; Roy Christian, Corsicana; B. G. Williamson, Wortham; S. M. Patterson, Taylor; C. W. Graham Jr., Denison; Hula House and Georgia Lewis, Texarkana; Joe Leopold, Dallas. This is a greater number than from any other except the hostess state, Illinois.

Texas was signally honored in the selection of student officers. Geo. Lilly, formerly of Dallas was elected president and E. J. Novak, formerly of Jefferson, vice-president. Joe Leopold of Dallas is one of the instructors. Jere Cason, Joe Leopold, Russell Rhodes and John Boswell have committee assignments.

John Boswell was elected president of the Texas delegation; Scott Barcus, vice-president; Russell Rhodes, secretary and Paul T. Vickers, publicity manager.

Rich Deposits of Guano Are Found In Presidio County

(By The Associated Press.)
ALPINE, Aug. 25.—Reports from Presidio state that rich deposits of guano are found in Presidio county and that E. H. Nelson of Houston and W. W. Hughes of San Antonio have been in Presidio prospecting for deposits of guano, potash, and sodium nitrate. These men have staked out claims throughout the state and now have options on 20 such claims in Presidio county. They reported that all the lands held very rich deposits and that the formations were all to be found very near the surface. The potash and sodium nitrate deposits are to be found in feldspar rocks, while guano is rich in fertilizer composed of the decayed bodies of bats.

In addition to their work around Presidio, Messrs. Hughes and Nelson have done quite a lot of exploration work in Mexico. In company with Howard Peak, Jr., they recently made a trip to a cave about six miles down the river from Mulatto. According to Mr. Peak the cave extends back into the side of a mountain, and contains millions of bats and about ten car loads of guano. This claim is located on land owned by the Mexican Government and these men expect to begin trucking the deposits out at once. They also reported four other such caves which they did not visit, and say that the Mexicans claim there are any number of them located up and down the Rio Grande.

As soon as the railroad comes, they expect to open several mines and finally intend to install a crushing plant in Presidio. Nelson and Hughes plan on opening an office in Presidio and residing there.

Labor Day Golf Tourney To Draw Many to Bryan

(By The Associated Press.)
BRYAN, Aug. 25.—More than 300 people are expected here Labor Day, September 5, to attend the Central Texas Golf tournament, when \$300 in prizes will be awarded to the winners of the meet. The tourney will be held on the Bryan Country club grounds.

There will be sixteen golf organizations to send teams for the meet, among the towns to be represented being Temple, Marlin, Cameron, Rockdale, Navasota, Belton, Lampasas, Brenham, Elgin, Taylor, and Georgetown.

FOREST RECEIPTS GAIN
A total of \$5,166,609.39 come to the federal government during the last fiscal year through sales of timber, permits for grazing and other uses of the national forests. The figure represents a gain of \$10,348.57 over the preceding year. Twenty-five per cent will be turned over to counties and states.

Mrs. Etta Gillian and family of Greenville are visiting J. O. Gillian.
