PRICE FIVE CENTS.

BRITAIN BREAKS WITH RUSSIA

SHATTUCK BOY DIES OF AUTO CRASH HURTS

Ford Coupe Wrecked Monday On Miami Road

MANY FLOWERS ARE RECEIVED

Young Man Had Been Selling Bibles In This Section

Dwight Gibbs, 20-year-old Shattuck youth, died here late yesterday afternoon of injuries received Monday when his Ford coupe overturned on the Miami road.

The youth had been selling Bibles in this territory and was driving toward Pampa when the steering gear of the car broke. He was badly crushed and the car was demolished.

The parents, Mr. and Mrs. O. G. Gibbs, came here immediately after the accident and remained with their son. Mr. Gibbs is a farmer, and lives 2 miles west of Shattuck.

Brothers of the accident victim are K. R. Gibbs of Muskogee and G. L. Gibbs of Shattuck, and Mrs. S. Sabel of Denver and Misses Gladys and Kiehlum Gibbs of Shattuck are sisters.

The young man was known by several local people. Many flowers are being sent here. Burial will be in Shattuck.

City Brings In New Well—It's Water, Though

The city of Pampa brought in a well yesterday, but it was a water well making 120 gallons a minute. This is the sixth well the city has drilled to supply water needs. Another well is being spudded in today.

The present six wells supply 520 gallons of water a minute. Five of them are 18-inch and the new one 10-inch. H. H. Heiskell drilled the first wells, and G. Burnett the last two.

NEW SIREN ARRIVES

The new fire siren arrived in the city yesterday and will be placed as soon as a suitable location can be selected. The siren is one of the largest made and will be heard for miles.

When the present one was located on the water tower, it was struck by lightning and after being repaired had not had the volume necessary for a city of this size.

Senator Norbeck Says Coolidge Will Go To Black Hills

(By The Associated Press.) WASHINGTON, May 27.—A definite prediction that President Coolidge would go to the Black Hills of South Dakota for his summer home was made today by Senator Norbeck.

The statement was made after the senator had made the second call in two consecutive days.

May be found by a small Classified Ad placed in The News. The "Want Ads" are read by thousands of people every day.

Balloon Boss

Herbert W. Maxson is manager of the 1927 national balloon race that begins at Akron, O., May 30. Maxson participated in the national and international events last year.

King George To Receive Lindbergh In Palace Tuesday

(By The Associated Press.)

LONDON, May 27.—It was officially announced today that King George will receive Captain Lindbergh at Buckingham palace Tuesday morning.

PARIS, May 27. (AP)—Captain Lindbergh flew over Paris in a French plane for more than an hour today.

During the flight he paid homage to the unknown soldier of France, flying over the tomb in graceful curves and descending at one time within about 150 feet of the hallowed spot.

Poppy Sale Will Be Held Saturday

While Pampa has no Legion Auxiliary, prospective members of a unit to be organized here soon will have a poppy sale Saturday. It will be directed by Mrs. J. A. Pearson.

The city will be divided into districts, and the women expect to sell 500 poppies during the day. The flowers will be worn on Decoration day, and are expected to be the motif of window decorations.

Half of the proceeds will be retained by the Auxiliary, and the remainder will be sent to the state department at Austin. All of it will be used for rehabilitation work among veterans. About 20 veterans are dependent upon the Amarillo Auxiliary, which Pampa is now contributing.

Miss Todd Improves Of Accident Wounds

The condition of Miss Della Todd who was injured in an automobile accident here Wednesday morning, was greatly improved today and she was able to be taken to her home in Shamrock.

L. G. Lunsford and Leo Parker, other occupants of the car, are reported to be improving.

SHERIFF BUYS SPEED

Speed artists, car thieves and bandits need not come to Pampa unless they want to be apprehended. Sheriff E. S. Graves is driving a new Hudson sport roadster, the fastest stock car built, and is sure he can catch anything in the Panhandle. The car was purchased from Bonnie Rose.

LOTS OF BUSINESS

WICHITA FALLS, May 27. (AP)—Installation of officers and action on the flock of resolutions which failed to reach the convention floor Thursday, together with reports from numerous committees constituted the business of the thirtieth annual convention of the Texas Federation of Labor today.

FIFTH DEATH RESULTS FROM WELL BLAST

G. C. Petty Succumbs From Burns—Nelson Badly Hurt

WILL SHOOT FIRE TONIGHT

Blazing Monster Lights Big Area Over Night

(By The Associated Press.)

BORGER, May 27.—Like a volcano, the McMillan gas well at Sanford, 15 miles west of here, which yesterday caught fire and fatally injured five men, last night lighted up the entire sky with regularly recurring flashes as the flames of the huge gasser spouted 200 feet into the air.

Tonight Tex Thornton, who yesterday donned a fireproof suit and descended into the flaming cellar to look for bodies of two missing men, will shoot the well with explosives to stop the flames which have been threatening Sanford.

G. C. Petty died last night, bringing the known dead to five. Those killed yesterday were Jack Daniel, E. L. Stillwagen, Eddie Evans and Elmer Richards. Lester Nelson is in a serious condition.

Many buildings have been moved back on skids. A high wind hampered work yesterday.

The well is in a new area making great gassers, and is near the place where a Phillips refinery is to be located.

Borger police are keeping crowds back from the roaring furnace, which is shaking the ground with its heavy flow. The gas has been estimated at 80,000,000 cubic feet.

Altercation Results At Rendition Hearing

R. R. Osborne was found "not guilty" of charges of loud and profane talking and other similar disturbances by a jury in police court today. The charges grew out of an altercation at a board of equalization hearing.

J. S. Wynne voluntarily paid a fine following the incident. He is one of the board members.

Meat Cleaver Used In Attack On Family

(By The Associated Press.)

TAMPA, Fla., May 27.—Buddy Merrell, 3 years old, was killed and five members of his family were injured so seriously they are not expected to live by an unidentified person who entered their home some time during the night and attacked them with a meat cleaver.

The injured are Herman Merrell, 43, carpenter and father of the boy; Mrs. Herman Merrell, 35; Ralph, 11; Mildred, 5; and a three-month-old baby.

Girl and Boy Drown In Dallas

DALLAS, May 27.—Miss Hallie Gaston, 19 years old, a school teacher, from Palacios, and Lawrence Jones, 14-year-old son of T. W. Jones, were drowned in different parts of Dallas last night.

Miss Gaston's body was recovered today from White Rock lake, where she was drowned when a boat capsized.

The youth drowned while swimming in the municipal pool at Fair park.

EXTEND RENDITION TIME

The board of equalization has extended the time of the oil companies and supply houses to place their valuations. The complete findings will be ready about the second week in June.

Zimbalist's \$10,000 Violin Found

When Herman Schevill (left) walked into a Chicago music store and asked the violin expert how much "this" was worth, he was held for police. For the instrument was recognized as the \$10,000 violin stolen in Los Angeles from Etrem Zimbalist the internationally famous violinist. The violin was made in 1743 by Laurentius Gueagnini. Schevill said he bought it from a music teacher in Kansas City. He was held. Sergeant John Carter is shown with Schevill.

NEW-BORN BABE FOUND IN BOX UNDER CULVERT HERE

A new-born babe, evidently but a few hours old, was found in a box under a railroad culvert in the west part of town, within the city limits, about 6:30 p. m. yesterday.

A section worker discovered the box, which was neatly nailed up, and on opening it found the baby, which apparently had been dead when placed within. It was a normal boy, and had received no professional attention at birth.

The little body was wrapped in strips of a bed sheet and placed in a pillow case. The wooden box was marked "12 Jack handles," but there were no other distinguishing marks about.

Officers held the body until today, when it was given to G. C. Malone for a decent burial. A thorough investigation is being made, but clues are meager. It is said, however, that a car was seen in the vicinity a short time before the box was found, and it is believed that the persons who placed it there intended to return for it after nightfall.

House Engrosses Education Bill; Slashes Defeated

(By The Associated Press.)

AUSTIN, May 27.—Dragging through a morning of defeated attempts at slashes, the House engrossed the educational appropriation bill carrying about \$7,000 more than recommended.

The original bill carried \$16,181,000. Lack of a quorum developing at noon prevented suspension of the rules and final passage is expected to be secured this afternoon.

U. S. Captain Kills Nicaraguan General

(By The Associated Press.)

CHINANDEGA, Nicaragua, May 27.—Captain William Richards, United States marine, shot and killed Liberal General Cabulla today. Self defense is claimed.

NAMES ARE SIMILAR

O. B. West, held in Fort Worth on charges of purported issuance of "dry" checks here, is not Oscar B. West, local rig builder and contractor, it should be understood.

Similarity of the names might result in misapprehensions, and the News hereby makes the distinction.

The other West will be brought here by Deputy O. T. Smith, who has gone to Fort Worth after the man.

An imperfect seal, or lack of sterilization will cause catsup to spoil. Bottles should be sterilized and filled while they are boiling hot, with boiling catsup, and then processed in the water-bath canner for 30 minutes.

SOVIETS ARE GIVEN NOTICE TO LEAVE NOW

Few Will Remain To Complete Business Affairs

"DOESN'T MEAN WAR"—BALDWIN

French Minister Says Communism Menace To Republics

(By The Associated Press.)

LONDON, May 27.—A note severing relations between the Soviet and British governments was delivered to the Soviet legation today.

The note requests official Soviet representatives to leave and specifies who shall remain to wind up affairs.

It is expected that the Soviet and British trade delegations will be called home by their respective governments immediately.

LONDON, May 27. (AP)—Premier Baldwin made the emphatic declaration today that breaking of diplomatic relations with Moscow does not mean nor imply war against Russia.

PARIS

Salvation Army Asks Funds For Its Rescue Work

The Salvation Army is campaigning in the city for funds to carry on its work. Local men are receiving donations today to assist Texas Panhandle and Oklahoma vision. The division has spent available funds in flood relief and is in need of help to support their homes and other institutions.

They have 32 rescue and maternity homes in the country. In 5,000 cases were received in homes, 500 of them at Dallas, Antonio and Wichita, Kan. per cent of these cases were under 18 years. Two girls Pampa.

The Army also supports employment bureaus, men's home, working girls' home, finding for delinquent air camps, Christmas family relief and emergency departments.

Cadet Ryan is in charge local campaign. The work is at the Adams hotel coffee.

Texas Poet May Be Man Who Committed Suicide

(By The Associated Press.)

NEWARK, N. J., May 27.—A man who shot and killed himself after sitting several hours in an automobile parked on a local street here is believed to have been W. E. Hartzles, writer of verse, of Bexar county, Texas.

Pampa inducts shows that there are 1,778 pupils actually on the records, of whom 274 are in the high school department. The recent school census shows 1,742 eligibles for next year. There are now in Pampa about 1,600 children of school age, it is estimated by Supt. R. C. Campbell.

Bargain Days Are Here

Temporary subscription rates to the Pampa Daily News, announced when the paper began daily publication March 10, are being replaced under the masthead today with a more permanent schedule.

And bargain days are here for readers of Pampa's own daily newspaper, and prospective subscribers. The following bargain rates will be in effect until June 15:

Daily News by mail, one year \$3, in advance.

Daily News by local carrier, one year \$4, in advance.

Turn to the Editorial Page and see the big saving to be made during the bargain period. These prices put the daily news of Pampa, accurate, complete information about local happenings, within reach of every citizen and resident of the Pampa trade territory.

In this age of magic progress, everyone wants his news while it is new. Only the Pampa Daily News can bring you the local news as it happens, and the newspaper gets Associated Press news and N. E. A. features first for Pampa readers. Turn to the subscription blank elsewhere in this issue and profit by the bargain day rates.

Those who take advantage of this offer, and wish also a weekly resume of local events, may receive the Pampa Weekly News a year for \$1 extra, to the same address. Readers of the weekly will like especially the Associated Press farm features and articles about the home.

Wizard of Little Theatre to Teach Principles of Art

(By The Associated Press.)

DALLAS, May 27.—The stage wizardry which three times has brought to Dallas the Belasco cup is to be revealed to Little Theatre enthusiasts by Oliver Hinsdell, director of the Dallas Little Theatre.

Following the close of his fourth successful season, Hinsdell will direct the laboratory school of the Little Theatre, wherein will be taught the craft which makes little theatres successful.

The school will start here June 13 and will last four weeks, continuing through July 10.

Organization, management, play casting and producing, scenic design and stage craft will be covered from the practical standpoint and the laboratory method will be used, whereby the student will have opportunity to put into actual practice theories relative to the selection of plays, casting, directing, acting, building of scenery, lighting and makeup.

All work will be personally directed by Hinsdell. He will be assisted by Lester Lang and Louise Britton, also of the Dallas Little Theatre, who will conduct classes in designing, construction, decoration of scenery and publicity.

Mr. Hinsdell is one of the pioneers in Little Theatre work in the United States. He was for two years director of Le Petit Theatre du Vieux Carre in New Orleans. For the last four years he has been director of the Dallas group, three times national champions.

Previous to becoming a director, he spent eight years on the professional stage, playing in support of some of the leading actors here and abroad. In 1917, after leaving the stage, he established the play-production department in the School of Speech, Northwestern university, Evanston, Ill.

The work of the director's associates, Mr. Lang and Miss Britton, have aided him materially in the enviable success of the Dallas group. In making the announcement, Mr. Hinsdell referred to the need for professional training as follows:

"Scattered over Texas and the southwest are numerous groups of amateurs working to set up definite standards of the theatre outside the city. These little theatres are

Eclipse of Sun By Moon Is Nature's Big Event On Varied June Program

(By The Associated Press.)

WASHINGTON, May 27.—June, ordinarily a month of weddings but few other elaborate entertainments, has been appropriated by the great feminist impresario, Dame Nature, for a demonstration of her virtuosity.

Her repertoire, as made public through the American Nature Association, includes, for that month, the following spectacles:

June 15 — Total eclipse of the moon, visible in North and South America.

June 22—The sun will reach its greatest distance north of the Equator, thus inaugurating Summer with the longest day of the year in the Northern Hemisphere.

June 26 — The small Pons-Winnecke Comet will approach within 3,500,000 miles of the earth, which is closer than most comets ever come.

June 29.—Total eclipse of the sun, visible in England, Scandinavia, and, partially, in other sections of Europe, Northern Africa and Asia.

The grand climax of the program will be the eclipse of the sun since 1724, which will be visible here until 1999. Even so, the eclipse will have to be in its early, for the show will begin at 5:25 a. m., and will last but a minute.

Professional reviewers, who are commonly called astronomers, will take up their position in Alaska and Sweden, where they will sleep a few minutes longer before the curtain rises—or, more accurately, descends—and get a better view because the sun will be a little higher over the horizon when it is eclipsed.

Alaska will glimpse the spectacle as it ends, at sunset, over the Pacific, after passing over the Arctic Ocean to northeastern Siberia, and across the Bering Sea to the Aleutian Islands. At Nome the magnitude of the eclipse will be only 86 per cent, that is, 14 per cent of the sun will be visible around the edges of the moon. At Liverpool, the moon will completely blot out the sun for a few seconds, while at London, four per cent of the great globe of light will be visible at the moment of maximum eclipse.

The McCormick-Chaloner Expedition of the Leander McCormick Observatory of the University of Virginia, in charge of Prof. S. A. Mitchell, director of the observatory, will observe the eclipse at Fagernes, Norway, where it will be visible for 34 seconds. J. A. Chaloner, of Virginia, is financing the expedition, which hopes to bring back valuable records.

FLAG REPLACES BELL
TRENTON, N. J.—The old-time practice of calling the legislature into session by ringing a bell is perpetuated in the custom today of flying the American flag on the state-house only while the legislature is sitting, and on holidays and special occasions.

Udenominational Churches Reported Making Headway

SAN FRANCISCO, May 27.—Udenominational and inter-denominational churches are making sure headway in the United States, according to an official report to be presented tomorrow to the Presbyterian general assembly by Dr. J. Ross Stevenson of Princeton, N. J., chairman of the department of church cooperation and union.

Chairman Stevenson will report that the "undenominational and interdenominational type of church appears to be slowly but steadily increasing in numbers. It is found for the most part in small communities and is frequently organized as a protest against denominational rivalries in new communities. This type of church often is organized before any of our denominations have formed local units."

"The udenominational and interdenominational type seems to be successful," the report continues, "so far as the meeting of purely local religious needs is concerned. However, it is the almost unanimous opinion that neither the udenominational nor the interdenominational church meets its responsibilities in the wider range of obligation."

"There does not seem to be anything that can be done wisely so far as modification of our fundamental law is concerned to adjust our Presbyterian form of government to this present day movement. It is clear that when a church is udenominational in character, it is impossible for us to have strictly official contacts with it. With reference to the interdenominational organizations, our form of government as recently amended would seem to give us all the latitude in this connection that is advisable."

"As to local organizations which are known as community churches, but which are in reality Presbyterian churches duly organized by our presbyteries and officered according to the requirements of our form of government and are upon the roll of one of our presbyteries, these, of course, are as definitely related to us in theory, and in most cases in practice, as if they bore the name of Presbyterian. They carry the name Presbyterian in their charters, although the name may not be brought to the fore in the church's publicity."

RADIO IN DAIRY

LIBERTY, Mo.—Arnold Schwarz, dairyman, has installed a radio set in his cow lot near here.

Schwarz tunes in and listens while milking his cows. He says he acquired the habit of milking to music in Switzerland years ago when members of his family used to gather around and yodel and play the accordion at milking time.

CHEAP PAINT IS POOR INVESTMENT

In a recent advertisement in one of the leading magazines you may have read that "there is a 'joker' in the 'cheap' paint can."

A joker is something hidden — which you don't see—which bobs up at some unexpected moment and catches you unawares.

In the advertisement it was explained this way: The low price paint is offered you as a paint which is just as good as, say, Sherwin-Williams famous SWP—the leading quality paint. It is offered as a paint that will give you a fine looking job at a big saving in cost per gallon—sometimes as much as \$2.00 per gallon. It looks like paint and it smells like paint. On the face of it, the inexperienced buyer might easily fall for the arguments.

But here is where the "joker"—the part that you cannot see—comes in. And it is a double-faced joker.

The "cheap" paint is, of course, cheap in quality. That's the only way it can be made to sell at a low price. It contains only a little bit of

real paint material. For example, where a high grade Outside Glass white contains 90 per cent of finest white lead and zinc oxide, the cheap white paint will contain only 50 per cent and in many instances less. Even if you bought direct from the manufacturer, a good paint would cost more than this cheap paint.

Then another feature which does not show in the paint and is not printed on the label or in the literature of the cheap paint is that the "cheap" paint job is always sickly and can't stand the outdoor climate. In a year or two it cashes in—and you are compelled to scrape or buff the remainder off and do it all over again. That's the other side of the "joker."

A good paint job lasts about five years before repainting is needed. It not only costs no more in the beginning than the "cheap" paint, but it saves you in cold cash the money you have to lay out for two or three repainting jobs.

These are just a few of the facts about paints. Call at Panhandle Lumber company for more of them.—adv.

Where weather and wear put varnish to trying test

Devoe Aquaspar comes through with flying colors

AQUASPAR will give unusual service in kitchens, on boats, or wherever a varnished service must resist severe wear or exposure. It is durable, easily applied and will not turn white in either hot or cold water.

We guarantee it to give satisfaction when applied according to directions.

For Your Decoration Day Trip and All Season—Enjoy the Safety, Comfort and Economy of

Firestone GUM-DIPPED TIRES

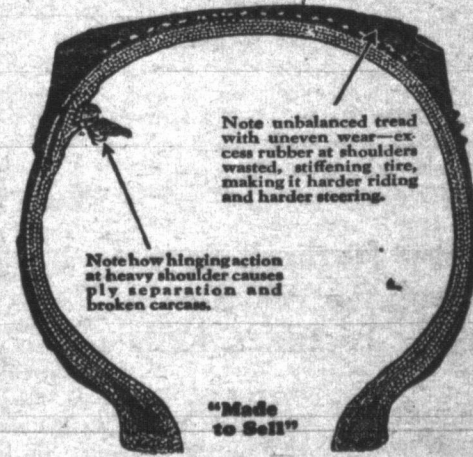

Firestone Round Tread Balloon

MANY Firestone Dealers are prepared to take in your old tires, offering you a liberal allowance on a new set of Gum-Dipped Balloons.

Firestone Dealers are given the advantages of attending Tire Educational Meetings held throughout the country, where tire design and construction are discussed. The sections of used tires reproduced here are a part of this program. Study these two sections and you, too, will understand what Firestone means by tires built for service and tires made to sell.

OLDFIELD TIRES	
at Low Cash Prices	
30x3	Fabric . \$5.85
30x3 1/2	Fabric . 6.85
30x3 1/2	Cord . 7.35
29x4-40	Balloon 8.40
32x4	Cord . 13.40
31x5-25	Balloon 15.35
33x6-00	Balloon 18.35
Oldfield Tubes also priced low	

Flat Tread Balloon

The Firestone Gum-Dipped Balloon with its scientifically designed tread permits free flexing, easier riding, extra comfort and safety.

The balloon tire with heavy, flat tread design is obviously stiffer and rides harder. The excess rubber, placed for appearance at the edges of the tread, is not only wasted but produces hinging action causing ply separation and "shoulder breaks."

Firestone designed and manufactures Oldfield Tires and Tubes, distributing them direct to Firestone Dealers only, through 148 Factory Warehouses. This efficient and economical distribution assures tire buyers everywhere, clean, fresh stocks of Firestone and Oldfield Tires in all types and sizes, and has helped to make possible today's remarkably low prices—the lowest in tire history. See the Firestone Dealer today.

Oil Production Shows a Slight Drop For Week

(By The Associated Press.)
 NEW YORK, May 26.—The daily average gross crude oil production in the United States decreased 8,700 barrels for the week ended May 21, totalling 2,478,000 barrels, says the weekly summary of the American petroleum institute recently. The daily average production east of California was 1,850,300 barrels, a decrease of 1,100 barrels.

Daily average production and difference:

- Oklahoma 736,700; increase 1,150.
- Kansas 114,500; increase 600.
- Panhandle Texas 134,100; decrease 1,400.
- North Texas 89,450; increase, 1,050.
- West central Texas 188,000; decrease 3,150.
- East central Texas 39,350; decrease 500.
- Southwest Texas 34,900; decrease 300.
- North Louisiana 48,450; decrease 150.
- Arkansas 113,400; decrease 150.
- Coastal Texas 132,550; decrease 2,450.
- Coastal Louisiana 15,600; increase 400.
- Eastern 115,000; increase 1,500.
- Wyoming 64,550; increase 3,650.
- Montana 13,750; decrease 300.
- Colorado 7,450; decrease 450.
- New Mexico 2,550; decrease 600.
- California 627,700; decrease 7,600.
- Totals 2,478,000; decrease 8,700.

Daily average imports of petroleum at principal ports for the week ended May 21, were 180,429 barrels compared with 202,143 for the previous week.

Daily average receipts of California oil at Atlantic and Gulf coast ports for the week ended May 21, were 90,000 barrels compared with 32,000 for the previous week.

TULSA, Okla., May 26.—(AP)—Despite the manifest concern of government officials and leading producers of the nation, the daily average crude output climbed 818 barrels higher during the week ending May 21, the Oil and Gas Journal says.

The estimated daily average production for the week as compared with the previous week follows:

	May 21	May 14
Oklahoma—		
Tonkawa	22,515	22,785
Barbours	43,180	43,440
Other Osage fields	33,730	33,805
Cushing and Shamrock	21,440	21,400
Bristow and Eastern	27,035	27,010
Cromwell	12,710	13,000
Garber	15,015	15,700
Blackwell-Braman	13,070	13,180
Seminole	851,480	848,550
Wovoka	19,455	19,760
Northern Miscellaneous	110,190	108,570
Southern fields	66,475	66,600
Total Oklahoma	736,635	734,180
North Louisiana (L.)	39,975	38,965
Heavy	3,455	3,705
Arkansas (light)	23,945	24,305
Heavy	39,440	39,240
North Cen. W. Texas	169,970	169,115
West Texas	119,600	111,440
Texas Panhandle	131,240	130,855
East Cen. Texas	36,844	36,014
Kansas	114,310	113,760
Total Mid-Co. (L.)	1,371,310	1,368,204
Gulf Coast	97,927	98,345
Heavy	198,092	194,015
Southwest Texas	33,070	33,555
Eastern	118,000	114,250
Rocky Mountain area	89,755	84,625
California (light)	411,000	421,500
Heavy	217,000	218,500
Total U. S. (light)	1,985,274	1,980,570
Heavy	501,687	500,264
GRAND TOTAL	2,486,961	2,485,834

The Seminole field produced a total of 358,235 barrels in the 24 hours ended Monday morning, showing a slight gain of 934 barrels, the total for the preceding period being 357,301 barrels, the same number of wells producing.

One of the most important features in the way of new showings was the report of a showing in Prairie Oil and Gas company's test, in the center SE NE NE of 22-10-6, which, if it proves a producer, will extend the Hunton line production of the Searight pool, over 2 miles to the north and about 1/2 mile to the east. The Hunton was topped at 4,251 feet, where the test is shut down while the casing is being run.

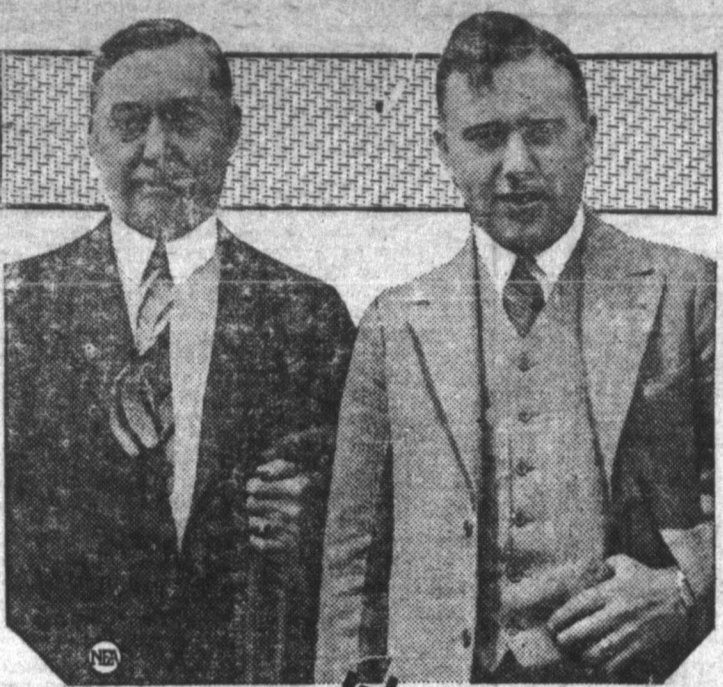

Turkish Teacher Is Peace Advocate

CANTANTINOPLE—The first apostle of peace in a land famous chiefly for its warlike virtues is Efsaish Yasouf Hanem, graduate of the American College for Women at Constantinople, who once represented Turkey at the American convention of the Women's League for International Peace and Freedom. She is now writing articles on international peace for Turkish periodicals.

Since there is no peace organization in Turkey, she works through the Stamboul Women's Club and through the public schools in which she teaches. She is the daughter of Youasouf Pasha, formerly court physician to Abdal Hamid.

The University of Chicago has abolished compulsory attendance at chapel services.

Mayor of Indianapolis Arrested

Mayor John L. Duvall (left) of Indianapolis and his brother-in-law, William C. Buser (right) are out on \$5000 bonds each following their arrest on charges of conspiracy to make a false affidavit concerning Duvall's campaign fund. Duvall was elected with the backing of the Ku Klux Klan, and it was charged he failed to list certain contributions received.

DOG'S HAPPY HUNTING GROUND NOW LOCATED IN HOLLYWOOD

By O. E. WADE WERNER (Motion Picture Feature Editor)
 HOLLYWOOD, Cal., May 27.—There is a heaven for dogs, too. It is in Hollywood.

Here the four footed enemy of cats has reached a pinnacle of social prestige and economic importance in the long history of man's domestication of animals.

Film folk, with few exceptions, devote on dogs, and the growth of the motion picture industry here has been accompanied by a corresponding increase in the dog population and the number of individuals and establishments devoted to canine care and cure.

In Hollywood and Beverly Hills alone, exclusive of other motion picture residential districts in the Los Angeles area, there flourish five dog hospitals and 37 practicing veterinarians. Major operations, therapeutic light treatment, X-ray diagnoses, microscopic blood tests, manicuring—in fact, everything but face-lifting,

is offered the aristocratic dogs of filmdom.

One establishment advertises that a "lady nurse" is in attendance; others make it a point to have an office girl who can be femininely sympathetic when some celebrated screen actress breaks down and weeps over the illness of her Pomeranian.

The day-book of such a hospital reads like an all-star cast. The patients may include a Springer Spaniel from Wallace Beery's kennels, a wire-haired fox terrier belonging to Mary Pickford, one of Jack Dempsey's and Estelle Taylor's Doberman Pinschers, Lois Wejler's police dog, Violet Dana's Chow, Adolph Menjou's Sealyham terrier, one of Francis X. Bushman's Great Danes or Bebe-Daniell's Schnauzer.

Practically everyone in pictures has at least one dog, exclusive of many dogs which earn good money for their owners by acting in pictures. For some unknown reason a dog seems to be necessary to complete

Revised Plan For Merger of Railroads In Southwest Made

(By The Associated Press.)
 WASHINGTON, May 27.—A revised plan for the merger of Southwestern railroads will be presented to the Interstate Commerce Commission within ten days, L. F. Loree, head of the railroad group involved, announced today.

The new plan, which involves the Kansas City Southern, Missouri-Kansas-Texas, and Cotton Belt railroads, will have a new financial set-up, but otherwise will be virtually the same as originally presented to the commission, Loree said.

The original proposal was disappointed.

London Brides Like Weddings In May

LONDON—Scores of popular young society women in England are defying an old proverb "marry in May and rue the day" by arranging weddings in May.

Lady Diana Duncomb and Greville Worthington are to be married May 31. Miss Cicely de Bunsen, daughter of Sir Maurice de Bunsen, has chosen May 30 as the date for her marriage to Archibald V. Campbell Douglas, of the Scots Guards. A May honeymoon which takes the bride away from London during many of the most interesting events of the London social season, some say is the basis for the adage.

Other May brides include Miss Marcella Duggan and Miss Mary Ashley, one of the wealthiest heiresses of England.

OLD AGE FORMULA

TAMPA, Fla.—William Mack Lee, 89, negro body servant to General Robert E. Lee, has a new formula for attaining old age. "I 'bey de law of man, de law of nature and votes de democratic ticket," he says.

the green player's ensemble. As soon as the struggling extra can afford to eat regularly, he or she gets a sporty looking dog. A long-term contract means an additional dog or two and stardom means a kennel.

Even Peter the Hermit, eccentric hatless and shoeless seer of filmdom, sports a greyhound.

Kimono Sleeves Aid Japan's Shoplifters

(By The Associated Press.)
 TOKYO—The kimono with its wide, flowing sleeves is the Japanese shoplifter's best friend, in the opinion of police.

The officers are lying awake nights trying to devise means to prevent numerous gangs of department store thieves in Tokyo, Osaka, Kobe and other large cities from looting the counters of great quantities of merchandise each year.

The department store, copied after those of America, is one of the most popular institutions in modern Japan. The largest stores are in Tokyo and Osaka, and they compare favorably with those of New York, Philadelphia and Chicago. They seemingly are crowded at all times and most of the customers are garbed in the national kimono costume.

The kimono sleeve is large enough to hold silks, brocades and almost everything else in a department store except kitchen stoves and pianos.

Recently the police arrested one ambitious shoplifter with two pairs of shoes, a pair of trousers, a bolt of fine silk, two shirts, two gold watches, an alarm clock and six graphophone records concealed in his kimono sleeves. The clock was his undoing. It sounded a strident alarm just as he was leaving the store and the plain clothes men took him in charge.

While some of the expert shoplifters are Japanese, the police say that most of the thieves are Chinese who work most successfully in gangs. One department store in Tokyo now has more than 100 private detectives employed to thwart the shoplifters, but the losses still run into hundreds of thousands of yen a year.

203.8 miles an hour

on

DUNLOPS

AT FLORIDA, on Daytona Beach, A Major H. O. D. Segrave, in his giant Sunbeam car, shot over the ground at a rate of 30.8 miles an hour faster than any human being had ever done—203.8 miles an hour!

The tires formed the big question mark as to whether this could be done. Such speed attacks tires with the heat of a fiery furnace. But they were Dunlops! They withstood the speed—they withstood the heat.

They were Dunlops! . . . Dunlop Tires and Dunlop Circular Tubes. Put Dunlops on your car. Ask us about them now.

PREVENTION MEANS CORRECTION ALSO

"It is not enough to find and punish the offender—a good officer will do much to prevent the conditions out of which crime grows."

It was a judge speaking. Perhaps he was thinking of the repeated appearance of criminals before him—the habitual offenders. Organized welfare agencies, organized as a part of the law enforcement program, are doing much to prevent repeated appearances.

Public welfare work has never been necessary in the Panhandle, but conditions have changed. The Lions club does well to consider formation of some kind of organized charity. Promiscuous begging is undesirable, yet there are families in the city who are needy at this time. Public subscription, which does not evenly distribute the burden, should not be necessary in emergencies which develop frequently.

Blackwell, Okla., furnishes an example of a small oil city which organized to handle charity and welfare cases. The Associated Charities, publicly supported, and directed by a large board which meets monthly, has its own building and a full-time, paid secretary or commissioner—a woman of mature judgment and experience in welfare work.

Cooperating with the medical association, the city physician, and the police department, she cares for everything from down-and-outers to victims of epidemics, from lost babies to juvenile delinquents. When police apprehend a juvenile, she is called as a consultant. Complete records, kept on large printed forms, are made of each individual. If a medical examination is necessary, the physician enters his findings upon the same form. If the offender is from another city, a duplicate of the records are sent to police and welfare headquarters there. The beneficial results have attracted wide attention.

Such organizations are not quickly perfected, and are not always possible to complete in detail. Yet every city, regardless of size, can make a beginning. A little interest, sustained over a few years, will accomplish lasting results.

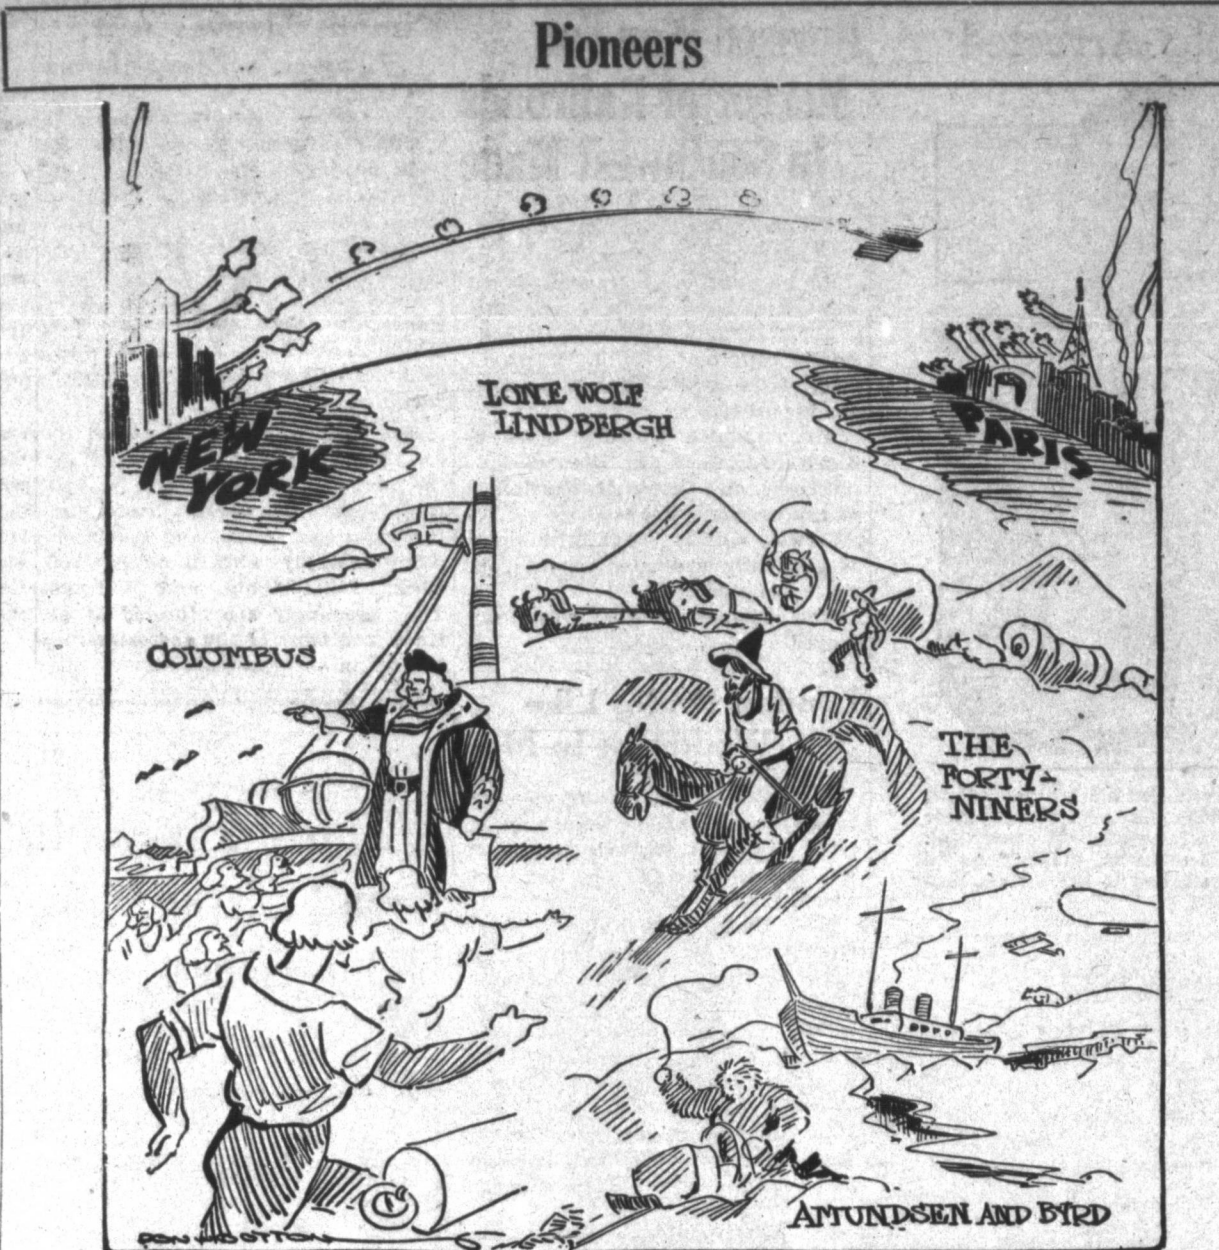

Pampa is ready to make a good start, and by using some of the modern, scientific welfare methods can quickly win an enviable reputation in this section.

TWINKLES

If oil gets any cheaper, how about some on our streets?

Borger police have machine guns and a Missouri force uses airplanes to chase bank robbers. That's a prophecy—bandits are never far behind the scientific advances.

Metropolitan newspapers get away with lots of things, but seldom murder, and we doubt that Amarillo's new effort is guilty as ballyhooed. It looks like a pretty respectable sheet, so far.

WASHINGTON LETTER

BY RODNEY DUTCHER, NEA Service Writer.

WASHINGTON. — Senator William Cabell Bruce of Maryland told the Senate last session that you could put all the personally dry senators in a taxi cab.

If a fellow were to believe all he heard in these precincts, he would admit that Bruce had exaggerated. The popular impression is that you could put all the personally dry senators on a bicycle.

Giving no more notice to such base canards who leave every senator fighting for the seat on the bicycle for the sake of the folks back home, it must nevertheless be said that some politically dry senators fully appreciate the fact that there are at this moment no more filibusters and all night sessions during which the sergeant-at-arms may be ordered to break into their diversions and bring them into the chamber.

That happened one night during the Boulder Dam filibuster in the last session, to the great embarrassment of perhaps a half dozen senators who were dragged in unexpectedly.

The aforesaid situation calls to mind the case of a very illustrious politically dry senator who was poured into the chamber to help vote for war against Germany. A woman who had two grown sons and hadn't raised them to be soldiers was in the gallery, and she had her eye on this senator.

She was convinced that the public interest required everyone to have his full mental faculties at such a time. She wrote a scorching letter to the unfortunate man. And then she sent a copy of the letter to every member of Congress!

One of the most eminent dry senators of the present day recently officiated at the awarding of golf tournament prizes in one of Washington's most fashionable and exclusive country clubs. Without blinking an eye, he presented with more or less appropriate remarks a silver flask, a cocktail shaker and a lemon squeezer. That is to say, he gave the winners everything necessary for a lively party—except the bottle of gin.

Science is "on the threshold of amazing discoveries." And apt to get kicked off of several thresholds, too.

Civic progress: Mexico City has barred burros from the streets on the ground that they give "an undignified aspect to a civilized city."

PRESS FORUM DISSOLVING PARTNERSHIP

Pampa News: The world has always been a hard thing to conquer. First it took centuries for ships to successfully circumnavigate it. Then globe trotters of all kinds began trying to set records. The airplane recently came into use. But the other night another new record was set. At the close of a brilliant Journalism Week at the University of Missouri, a telegraphic and cable message was sent around the world in eight minutes. Think of it. Within this short space of time the whole world became kin, knowing almost before the words died from the echo of the speakers. South America was circled by telegraph and cable in four minutes.

You can girdle the globe with a message before you can eat a breakfast of three courses beginning with hot mush. You can even fly bodily around the world in the space of a few weeks. You can navigate the sea under its surface, you can float on its bosom, you can flit over it on wings. You can drive a self-motoring motor across the continent, ride across it behind a steam locomotive, or walk across it, whichever you choose. A few

years ago you had no such choice. You could cross it on a wagon drawn by beasts, or on the back of a beast, or afoot. Mankind is getting away from brute kind. The beast is still needed for beef, but synthetic steak is already a possibility, and milk can be made out of vegetables. Factory eggs were accomplished some time ago. Dissolving partnership with beasts does not come without a pang. Since the dawn of human consciousness man and the animals have worked together, or rather the animals have worked for man, under his yoke and whip. Without his animal wealth, man would have had a desperately difficult time of it. Probably he couldn't have made it through. Adam and Eve, we are reminded, had to rely on animals for their dress when the fig leaves failed, for food after the fruit of the garden was denied them. But the animals made a good deal of trouble. They were insatiable. Maybe the partnership can be dissolved profitably. — State Press in Dallas News.

Whiskery has won the Kentucky derby, which proves that a name is not necessarily a handicap, and speaking of names, one wonders whether or not this one should have the "r" omitted or the "y" changed "s." Either of these terms is more or less familiar both in Kentucky and Oklahoma. — Ponca City News.

Flies and Mosquitos

NOTICE AN ORDINANCE To provide for the construction, regulation, maintenance, inspection, and operation of privies in the City of Pampa, Texas, and area of Police Jurisdiction thereof, and to provide a penalty for the violation of said Ordinance, or any Section thereof.

Be it ordained by the City Council of the City of Pampa, Texas, as follows: SECTION 1. That on and after May 16, 1927, it shall be unlawful for any person, firm or corporation, to own, maintain, or operate in the City of Pampa, Texas, or in the area of police jurisdiction thereof, a privy or dry closet for the reception of human excreta, unless said closet is built, rebuilt, or constructed as hereinafter provided.

SECTION 2. It shall be unlawful for any person, firm, or corporation to permit a privy or dry closet of any kind or description for the reception of human excreta, to be maintained or exist on any property in the City of Pampa, Texas, or in the area of Police Jurisdiction thereof, where any of said property is within 200 (Two Hundred) feet of the public sewer system of said city, and provided connection is physically possible.

SECTION 3. It shall be unlawful for any person, firm, or corporation to throw out, deposit, or bury within the City of Pampa, Texas, or in the area of police jurisdiction thereof, any excreta from human bodies, solid or liquid, or to dispose of such excreta in any manner than into a properly sewered water closet or a properly constructed improved privy.

SECTION 4. It shall be unlawful for any person, firm or corporation to construct, maintain or permit a privy to exist on any property or properties under their control where sewer connection has not been made, unless said privy is of an improved type constructed as hereinafter provided.

SECTION 5. Minimum requirements for an improved privy are that it shall be constructed, built, or rebuilt so that:

- (a) The excreta deposited therein shall not fall upon the surface of the ground, but enter into a compartment or excavation shall be inaccessible to flies, fowls, or small animals at all times.
- (b) The compartment shall consist of an excavated chamber conforming to the following dimensions: Minimum width inside curbing, 3 feet; Minimum length inside curbing, 4 feet; Minimum depth from ground surface, 5 feet.
- (c) There shall be constructed about said compartment or excavation an embankment of dirt at least six (6) inches high and at least 24 (Twenty four) inches wide about said compartment or excavation and closet so constructed as to prevent the access of surface waters into said pit unless the same shall be of a depth of more than 6 (six) inches over the general level of the surface of the surrounding ground.
- (d) Over the pit shall be placed a fly-tight seat box with hinged lid or cover which shall be ventilated by a wooden flue of 1x6 material extending from the pit to eight (8) inches above the roof of the building and screened at the top with 16-mesh screen wire.

SECTION 6. Proper sizes and methods of construction shall conform to the following sizes which will render this ordinance effective: Pit shall be at least five (5) feet deep, three (3) feet wide, sloping to a width of two (2) feet eight (8) inches at the bottom, with a length of at least four (4) feet.

SECTION 7. All sanitary privies in the said City of Pampa, Texas, and area of police jurisdiction thereof, shall be kept in a clean condition at all times, and the lids closed at all times when not in use, and so used that all the excreta deposited therein shall fall in the pit provided. Such pit shall be used only for the purpose of a privy and no wash water, garbage, or other refuse matter other than human excreta shall be deposited therein.

SECTION 8. Two pounds of lime shall be put into each pit once each week to prevent an acid condition of the contents and attendant odors.

SECTION 9. In case the pit should cave at any time it shall be repaired promptly. All repairs necessary to make the pit fly-proof shall be made whenever needed.

SECTION 10. All privies existing or maintained in the City of Pampa, Texas, or the area of police jurisdiction thereof, after the date on which this ordinance takes effect, which do not conform to the requirements of this ordinance shall be, and are hereby declared a nuisance, dangerous to public health, and the City of Pampa, Texas, shall proceed to abate said nuisance in accordance with the law, in accordance with the ordinance of said City of Pampa, Texas.

SECTION 11. The local health or sanitary officer of the City of Pampa, Texas, or his duly authorized agent, shall personally inspect all of the privies in the City of Pampa, Texas and area of police jurisdiction thereof. The health officer or his duly authorized assistant is hereby empowered to enter all premises in the discharge of his duty at any reasonable hour during daylight. Upon finding an unsanitary condition he shall notify the tenant, owner, in writing, and unless such condition is immediately remedied within twenty-four (24) hours the City of Pampa, Texas, shall proceed against said tenant or owner or occupant for maintaining a nuisance.

SECTION 12. It shall be unlawful for any person, firm, or corporation within the City of Pampa, Texas, or area of police jurisdiction thereof, to maintain a pit, cesspool, or unapproved privy within 150 (one hundred and fifty) feet of a water well. It shall be unlawful to maintain or operate a privy or closet other than the concrete vault or chemical type or a type where the deposits may not come in contact with the soil in a location being within 150 (one hundred and fifty) feet of a water well.

SECTION 13. Any person, firm or corporation who violates, or refuses, or fails to comply with any of the provisions of this ordinance in the City of Pampa, Texas, and area of police jurisdiction thereof, shall be punished by a fine not exceeding \$100.00. (One hundred dollars). It is herein provided that each day any person, firm or corporation permits an unsanitary condition of a dry closet, or violates, or refuses, or fails to comply with any of the provisions of this ordinance, shall be guilty of a separate offence, and shall be punished upon conviction in any sum not exceeding \$100.00. (One hundred dollars).

SECTION 14. All ordinances and parts of ordinances in conflict herewith are hereby repealed.

Approved: F. P. REID, Mayor.

Attest: C. H. FISHER, City Secretary.

Helpful Information For Home Builders

When seeding a new lawn, it's a good idea to put on about 4 bushels of well rotted manure for each 100 square feet of ground. Work it into the soil well. Then—before sowing the seed—work from 2 to 3 pounds of some good commercial fertilizer into each 100 square feet of soil. If you can't get any manure, use about twice as much commercial fertilizer. This will speed up the growth of the grass and furnish plant food for several years.

Milk helps chicks in a lot of different ways. It stimulates growth. It helps prevent disease. If you can, give the chicks milk to drink the first 6 or 8 weeks.

Bad eggs give other eggs sold with them a bad reputation. That gets egg eaters wary of all eggs in the summer time. That cuts down the demand. The decreased demand lowers the price of all the eggs.

The brown rat, probably brought to the United States from England in about 1775, has spread until it now infests every State in the union. Says the United States Department of Agriculture. The last state to become afflicted with this pest is Montana.

If chicks get too cold, they crowd together in the hover and try to get nearer the heat. They should settle down in an even ring around the outer edge of hover. If they crowd

to one side, put them around evenly. If they insist on crowding to one side, look for the trouble. It's often a strong draught or a direct light.

Cows don't run a very high temperature with milk fever. In fact, fever is usually absent. More often than not the body temperature of the cow goes down instead of up. The disease is in reality a form of paralysis incident to calving. It generally comes on within a couple of days after the birth of the calf. The most common method of treating milk fever is by injecting sterile atmospheric air into the udder. This air treatment is not only simple, but it's highly effective.

The term cull potatoes is usually applied to those that are small, misshapen or those that are over-size, and therefore, not suitable for the market. If these are from healthy and productive plants, they may safely be used, providing that the tubers used for seed be not less than 1 1/2 inches in diameter. When the percentage of the so-called cull potatoes is not known, they should never be used for seed.

The saying "carrots will make you beautiful" is indirectly true because they are an excellent source of mineral matter used in regulating body processes and building tissues. They are especially rich in calcium and are a good source of at least three vitamins.

While hens will live and even keep in fair health on poor rations, well-balanced, palatable feeds are essential to good egg production. The additional cost of a good ration compared with a poor one is repaid many times by the extra eggs produced.

An easy way to prepare eggplant is to bake it in lengthwise halves with strips of bacon laid over the top. Gash the flesh so the flavor will be well distributed.

Boiling water, poured from a teakettle held at a height of two or three feet, often will take out a fresh coffee stain, and some fruit stains.

Select the dairy herd sire by the records of his daughters rather than those of his dam.

Some persons have raised the point whether the purple meat inspection mark is harmful. The purple dye and all other ingredients of the marking fluid as applied by the federal meat inspection service are entirely harmless.

The color of canned salmon indicates the variety rather than the quality. There are several kinds of salmon and these vary in color from a bright red to almost white.

A clearing house for agricultural information from 90 countries is the International Institute of Agriculture at Rome.

Poisoning and trapping are the best means of checking the ravages in a growing crop of alfalfa, of gophers, ground squirrels, prairie dogs, and mice.

The hard central core of a cabbage has a sweet and peppery flavor which makes it especially good when chopped and used in salad.

T. R. Gardner of the bureau of Entomology, has left for Yokohama, Japan, to resume the work that he has been carrying on in that country for three years in collecting and shipping to this country all kinds of Japanese beetle parasites for study.

Says Fried Food Injurious Because Of Its Tear Gas

DENTON, May 27.—Much has been written and more has been said about the injurious effects of fried foods. While this may be true the fault lies more with the cook than with the method, according to an expert in the household arts department of the College of Industrial Arts. Fat in itself is a wholesome food. Burned fat contains acrolein or tear gas which is very harmful and for this reason it is well to break away from fried foods as it is very difficult to fry foods without producing this gas very often. Fried foods are also very unwholesome and usually there is quite a bit of waste in the preparation of them.

Breakfast—Cream of Wheat and dates; Poached egg on toast buttered. Toast; Milk; Coffee.

Luncheon—Scalloped cabbage; Pea, Celery and Cheese salad; Biscuit; Butter; Milk; Cake.

Dinner—Chicken a la King; Baked Sweet potatoes; Parker house rolls; Celery; Pickled Beets; Baked Apple and raisins; Hot tea.

Chicken a la King
2 c chopped chicken.
1 c mushrooms.
2 egg yolks.
1 t salt.
1/2 green pepper.
2 c white sauce.
2 T butter
Length t paprika.
Chop mushrooms and saute in a little butter. Add to the meat. Beat egg yolks and add to the white sauce with the butter. Beat the sauce while adding the egg yolks. Add the meat and beat thoroughly. Serve hot.

Escalloped Cabbage
Cut one-half of a boiled cabbage in pieces put in a buttered baking dish,

POLITENESS FOR CHILDREN
Courtesy is as "catching" as profanity. Say "Excuse me", "Thank you" and "If you please" to your child every time there is occasion for it and you will have no trouble teaching him good manners. The same is true of good grammar. We are creatures of environment, and the easiest way to teach a child is by example, to fill the atmosphere with the kind of thing we want him to take on.

SAVE YOUR STRENGTH
Labor saving devices in a factory save merely money. In a home, they save woman's strength and enable the housewife to devote more time to her children, be a companion to her husband, and cultivate that atmosphere which is the soul of the home.

WHEN BUREAU DRAWERS STICK
If the bureau drawers do not slide easily, plane off the sides and on the bottom of the drawer and then rub the runways with paraffin, soap or tallow. Never plane off the top, especially if it is finished with stain.

Can you afford to spend 25¢ a week — to save 50¢?

It is reliably estimated that it costs on the average \$20 per year for removing carbon from a six-cylinder motor. This does not include the cost of necessary repairs due to the wear and tear which carbon causes.

That's why you save money when you use Conoco Ethyl Gasoline even though it costs 3c more per gallon than ordinary gasoline. It costs you about 25c more a week—\$13 a year—but it saves you double this amount by reducing carbon removal and wear and tear bills. Isn't that wise economy?

OWN BOOK REVEALS FAULT TO BOB MACDONALD
—KEELER RELATES FUNNY GOLF STORY—
HE HAD BEEN SWINGING WRONG FOR TWENTY YEARS

BY O. B. KEELER

They call him Wee Rab MacDon-ald because he is a statuesque Scot more than six feet tall, and last spring at the Southern Open Championship in Atlanta I caught Bob out in the funniest golf story I've heard in a long time.

Big Bob—that's what he really ought to be called—Big Bob for 20 years, almost, has been one of the most stylish players of golf in the world, and the only reason he hasn't accumulated a flock of major championships is because of a singularly unco' habit of performance on the putting surface.

Big Bob can do everything with a golf ball except get it into a four-and-a-quarter inch hole. He has a swing that is well nigh classic; despite his size, he is a model to delight the eye of a sporting sculptor; and if the man who did the celebrated Fighting Gladiator had only seen Big Bob playing golf first, the Gladiator would have been selling papers instead of posing in the Louvre.

Withal, Bob has a whimsical humor. He knows golf and the value of golf and its limitations. He teaches golf at a big school in Chicago and sings a mean tenor at many a tournament. But when he was south last winter on the Dixie-Cuba golfing pilgrimage, Bob told me he wasn't going to enter the Southern open.

"I'm not playing so well," said Bob, not at all mournfully. "And I'm cutting down on the tournaments. They're pretty hard work, anyway."

And almost the first noted professional I saw at East Lake, in the preliminary practice for the championship was Big Bob.

I recalled his original decision. Bob blushed.

"You know," said Bob, "I wrote a golf book that has lately been published, telling everybody how to play golf. Well, I got to reading that book over on the train, on that last trip, and I discovered I'd been swinging wrong for nearly 20 years. I'm going well, now."

Bob did well in the championship.

So it seems some doctors do take their own medicine—and it may do them good.

Years ago, Macdonald was reputed to use the lightest clubs of any eminent masculine player in the game. I had heard he once used a driver of 12 1-2 ounces, lighter than the average ladies' club. Yet he was one of the game's longest hitters.

"I've a fast swing," says Bob, "and it is speed on the club head and not weight that drives the ball. But I never used as light a club as that. Still, they were on the light side. It's speed, not heft, that gets the distance."

This motto may be worth pondering.

CARE OF THE HANDS

Raw winds, hot sun, soapy dish-water and the preparation of vegetables are all hard on the hands. To keep them soft and attractive, one should rub a heavy oil into the skin once or twice a day. Plain olive oil will do. Cheap cotton gloves, worn at night, will protect the bedding and keep the oil from rubbing off.

SPORT TALK

Our local baseball and mitt artists will have a busy week-end, playing ball Sunday and Monday and boxing Tuesday night.

Even though the Grays go to Lubbock for games over the week-end, the newly organized Oilers will provide a holiday attraction when they meet the fast-traveling White Deer nine.

Wind and all local tennis enthusiasts are out on the new courts every day and some players of note have been in action. The club will play challenge matches in the near future.

Dick Morgan, new pitcher for the Amarillo Texans, has four brothers who have made names for themselves. "Slick" Morgan pitched against the Grays in Wheeler. "Slick" has been "up", but is past the age of fast company now.

The local baseball team will play at the Fort Elliott anniversary next Friday. They will hook up with a strengthened Wheeler team at 4 o'clock.

Prize Ring Gives T. B. Fund \$128,000

ST. PAUL, Minn.—Boxing, legalized in Minnesota in 1915, has contributed to the state's tuberculosis fund \$128,992.57. The fund gets 10 per cent of the receipts.

St. Paul has been the fight center, and has produced new pugilistic aspirants in the wake of the Gibbons brothers—Mike and Tommy. It has paid \$70,075.57 to the tuberculosis fund; Minneapolis, the larger city, \$44,254.95, and Duluth, the third city, 14,662.05.

The greatest attendance at a Minnesota fight was that attracted by the "all St. Paul" mix between Mike Gibbons and "Big Boy" O'Dowd in 1919. It attracted 10,000 house.

Farm Loan Group Would Raise Sum To Be Borrowed

The National Farm Loan association of Pampa was represented in Houston last week at the celebration of the first ten years of service to Texas farmers and agriculture by the Federal Land Bank located in that city and the 350 National Farm Loan associations in the State by Secretary-Treasurer L. B. Hughey. In the last decade the lending agency which these officials represent has made more than 50,000 loans amounting to approximately \$156,000,000.

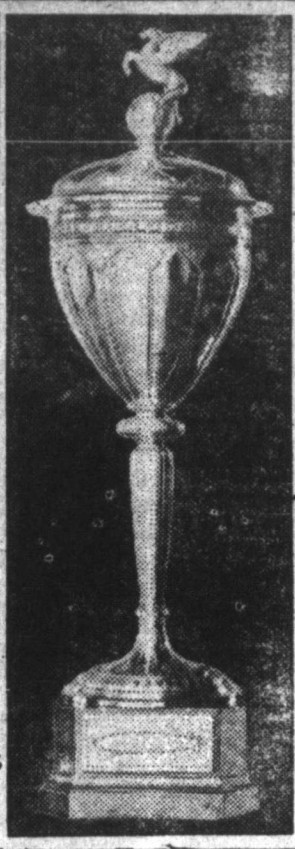

Among the more important resolutions passed at this meeting was one which petitions Congress to increase the maximum loan which farmers would be permitted to borrow from their local national farm loan association, from \$25,000, the present limit, to \$50,000. This was done in order to help ranch men to the advantages of the long-time, low interest rate, amortized loans.

The subject of terracing farm lands was given a good deal of thought since in some parts of the State it is a paramount issue and one which vitally affects the Federal Land bank as well as the farmers, since the rapid erosion of soils quickly depreciates the security offered for loans. Secretary-treasurers unanimously approved of the new activity recently instituted by the bank, known as the Conservation of Soil Terracing department.

The officers petitioned the Federal Farm Loan board to change its ruling so as to permit Federal appraisers when in the field to tell secretary-treasurers whether they will recommend a loan or not and for how much.

With a view to still further increasing the collateral back of Federal Land bank bonds and also to assisting the borrowers, it was recommended that associations utilize part of the dividends received from the bank to set up a reserve fund, which would eventually be as large as the total of the borrowers liability, or 5 per cent of the amount borrowed. This fund is to be kept working, however, to be loaned in exigencies to borrowers who are not able to meet their installments promptly.

Balloon Race To Commemorate War Dead

Left top—Carl K. Wollam; Center—W. R. Van Orman; Right—The Litchfield Trophy; Lower—P. W. Litchfield.

AKRON, Ohio, May 27. (AP)—Fifteen huge gas bags will take the air here on Memorial Day for a distance flight dedicated to the world war dead of the United States.

The pilot of each bag will seek favorable air currents which will carry his craft far from the starting point and win for him the Litchfield trophy, symbol of victory in the event, a share in the prize money, and the right to represent the United States in the international balloon race to be held this fall in Denver.

The Memorial Day event is the 1927 national elimination balloon race. In keeping with its patriotic dedication seven United States army and navy craft have been entered and a hundred airplanes will participate in an army, navy and marine corps flying program preceding the balloon take-off.

Another symbolic touch has been added with the selection of Mrs. Martha Ables of Akron, four of whose sons died in the world war, as sponsor for the balloon entered by The Akron Beacon-Journal. She has been designated by Gov. Vic

Donahy of Ohio as the state's war mother.

Balloonists finishing first, second and third in the distance flown will win the right to compete for the international championship in bags of 80,000 cubic feet capacity. The minimum bag capacity permitted in the Akron race is 35,000 cubic feet.

The Litchfield trophy, put up by P. W. Litchfield, will become the permanent property of any chapter of the National Aeronautic association whose representatives win the race three successive times. Akron balloonists have won it for the past two years, and a victory by any of the three Akron teams this year would bring the cup here for all time.

Prize money is divided into

awards of \$1,000, \$800, \$300 and \$200, and each pilot entered receives \$100.

Entrants in the contest include: Akron Beacon-Journal, Carl K. Wollam, Akron pilot; Goodyear Tire and Rubber Co., W. T. Van Orman, Akron, pilot; Scripps-Howard Newspapers, Jack A. Boettner, Akron, pilot; Capt. Harry E. Honeywell, St. Louis, piloting his own bag; Robert P. Lehr, Los Angeles, piloting his own bag.

U. S. Army No. 1, Lieut. Paul Evert, pilot; No. 2, Lieut. James F. Powell, pilot; No. 3, Capt. William E. Kepner, pilot; No. 4, Lieut. Frank M. McKee, pilot.

U. S. Navy, No. 1, Lieut. T. G. W. Settle, pilot; No. 2, Lieut. G. V. Whittle, pilot; No. 3, Lieut. Charles E. Bauch, pilot.

Three other bags entered have not been announced.

good nature and boyish enthusiasm. He has become as popular among fans on this side as has Charleyaddock, the California speed king, among Europeans.

Megan Lloyd George, daughter of the war premier, has made her political debut in London. She expects to become a parliamentary candidate in the next general election.

Tobacco Tax Is Not Yet Dead

(By The Associated Press.)

AUSTIN, May 27.—Despite the reported unfavorable attitude of the administration, the much discussed proposed tobacco tax may again bob up in this session, several members of both houses believe.

When appropriation bills are finished and a free conference committee report is made, appropriation yet will not be within the states prospective revenue, they predict, and an additional revenue raising measure, probably the tobacco tax, might be levied on the ad valorem rate raised.

A bill seeking to impose a tobacco tax was barely killed in the senate in the closing days of the regular 40th legislature when "parliamentary maneuvers" were invoked.

Former Governor James E. Ferguson is one of the strongest proponents of the proposed levy. In a recent issue of his weekly newspaper, Ferguson scored the "big daily newspapers" for what he termed an antagonistic feeling toward the measure, declaring that "big flaming cigarette advertisements show where their patriotism is coming from." Governor Dan Moody, he added, "has taken up the slogan of the daily newspapers."

Oilers Will Play Claude Sunday and White Deer Monday

Pampa Oilers, who Sunday took the small end of a 9-2 score at Wheeler, will go into action again next Sunday, journeying to Claude for a game.

The will play here Monday to provide a holiday attraction, and the White Deer nine, reputed to be powerful in the field and weak on pitching, will furnish the opposition.

Pitching has been a weak part of the Oiler machine, but with Robinson and Nichols getting into better condition, the locals expect to make a good showing.

WANT DOORBELLS REVIVED
NORFOLK, Va.—The "park and hook" motorist is persona non grata here. Police are insisting that automobile drivers renew their acquaintance with door bells and abandon the habit of sitting in their cars blowing horns.

Plans to send a native Canal Zone baseball team aboard one of Henry Ford's vessels depended today upon the skill shown by the players.

Present Gasoline Called Too Good for Use in Auto

AUSTIN, May 27.—The full fuel value of present day gasoline cannot be attained at the present time because the gasoline now being sold is too good for the average automobile, declared Dr. Gustav Egloff, noted chemist of Chicago, while visiting on the University of Texas campus recently. Dr. Egloff delivered several lectures while at the University on various phases of motor fuels. He is director of research of the Universal Oil Products company of Chicago.

Dr. Egloff explained that the automotive industry has not kept pace with the advanced technique of the oil industry. "Many engineers," he said, "are not alive to the fact that they should build higher compression motors to utilize efficiently the more powerful fuel which has been produced for them."

Pointing out the astounding saving which results from a more equal development of motors and motor fuels, Dr. Egloff continued: "Whereas the average motor fuel of today would function best in a 100-pound or more compression motor, the average pressure of combustion in motors today is about 80 pounds. If we could use the higher compression motors and obtain the increased mileage of 25 per cent, we would require only approximately 10,000,000,000 gallons of motor fuel this year instead of 12,000,000,000 gallons. This would mean a saving in our gasoline bill of over \$250,000,000 for the industry of which Dr. Egloff spoke was year 1927."

Another phase of the petroleum industry that of the production of synthetic commodities such as alcohols, rubber and a host of other substances useful in our economic system. "Once the economic need becomes apparent, it may well develop that edible oils or fats will be produced from petroleum," he said.

TAXI MOUNTAIN CLIMBING
ST. MORITZ, Switzerland—Mountain climbing fans are aghast at the prospect of an airplane taxi service from St. Moritz 10,000 feet up to the top of the Alps to save tourists from the arduous of mountain climbing.

Sam Bernard, noted comedian, died recently aboard ship on the way to Germany.

A "two-faced" bank note has been found with \$100 on one side and \$50 on the other.

TITLED ENGLISHMAN MENACES AMERICAN OLYMPIC PROSPECTS

By ALAN J. GOULD

(Associated Press Sports Editor)
NEW YORK, May 27.—Lord David Burghley frankly admits he doesn't take his athletics "too seriously," but this titled British college student, plinked cheeked and 21, nevertheless cherishes a consuming ambition—to win an Olympic hurdles championship at Amsterdam next year.

In three trips to America in the past few years, twice to compete in the Penn relays and the other time with the combined Oxford-Cambridge track and field team, Lord Burghley has impressed critics with his steady development as a timber topper. He is the present British champion at both high and low hurdles, has more than held his own in competition on this side, losing only one race in a half dozen, and figures to be a keen rival for America's best talent in Holland.

Yankee hurdlers have dominated the Olympics since their revival in 1896. They have lost only one race over either the high or the low sticks. That was in 1920, when Earl Thompson, the famous Canadian, who is still holder of the world's records, flew home first in the 110 meter high hurdles. But Thompson, although he wore the maple leaf in Olympic competition, was a Dartmouth College student, developed by Harry Hillman, American coach and former Olympic title holder. Thompson is now an assistant coach at Yale.

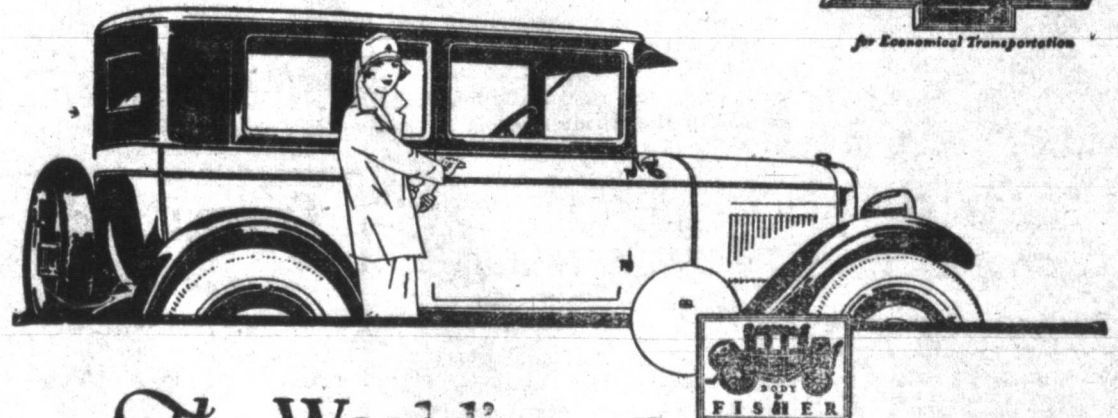

Lord Burghley, or "Davy," as his Cambridge University teammates and American friends call him, is a fast performer over any of the hurdle routes, but he probably will concentrate in a bid for the 400 meter Olympic title, now held by F. Morgan Taylor of the Illinois Athletic club. Taylor won the 1924 final at Paris in the world's record time of 52.6 seconds, but this mark was overlooked by international authorities, who still retain the standard of 54 seconds, made by Frank Loomis in 1920, on the books.

"Davy" wasn't discouraged by his failure to win the 400 meter hurdle event at the Penn relays, where he bowed to Johnny Gibson of Fordham. In that race he partially stumbled over one hurdle, lost his stride and the inside lane, yet had enough reserve to get up to within a yard of Gibson at the finish.

Great Britain has had as much difficulty developing hurdlers stars as America has had in discovering distance running talent, but Lord "Davy" may break the spell in he

keeps up his present pace.

Win or lose, however, the titled Briton has won the affection of a considerable portion of American fandom by his sportsmanship, care-free

The World's Lowest Priced Cars with Supremely Beautiful FISHER BODIES!

Chevrolet is the only car in its price class offering bodies by Fisher—built as only Fisher can build, and styled as low-priced cars were never styled before!

Bodies by Fisher are everywhere acknowledged to represent the highest order of beauty, luxury, and safety—and never was the superiority of Fisher craftsmanship more evident than in the Most Beautiful Chevrolet.

Despite the lowness of Chevrolet prices, there is not the slightest compromise in design, construction or finish. All embody exactly the principles employed on the highest priced cars—a composite

construction of selected hardwood and steel. All are finished in beautiful colors of lustrous, lasting Duco.

Enhancing the beauty of the bodies themselves are numerous features of distinction previously considered exclusive to the costliest cars—features typified by heavy full-crown, one-piece fenders and bullet-type headlamps.

Only the economies of Chevrolet's great volume production make possible such quality at Chevrolet prices—value so outstanding that comparisons cease to exist. Ask for a demonstration!

A delicious salad course was served to the following guests: Mesdames Raymond Harah, Robert Gilchrist, P. B. Carlson, John Studer, Wade Duncan, Ivy Duncan, Marion Howard, Harry Younger, Sherman Pierson, DeLea Vicars, Woodson Coffee, Henry Dickens of White Deer, H. Twiford, J. D. Sugg, Jack Gatton, Finney, and the hostess, Mrs. Walter Coffee.

"INSIDE" INFORMATION

Use pineapple juice sometimes in making the dressing for cabbage and pineapple salad.

Graham Truck Exports Heavy

Retail sales of Graham Brothers trucks and commercial cars together with overseas shipments during the first two weeks of May broke all previous records for the year, according to figures just released by the company. The record figure for this period of 12 working days is a total of 2,957 units—2,354 retail deliveries to customers by dealers in the United States and Canada and 603 shipped overseas.

Graham Brothers truck sales throughout the world have shown increasing volume since the first of the year which demonstrates the growing popular demand for high quality transportation equipment of the speedy, pneumatic-tired type with a medium load capacity. This trend is also indicated by National Automobile Chamber of Commerce figures just released which show that 91.9 percent of all trucks produced in the United States and Canada during 1926 were of the 3/4, 1, 1-1/2 and 2-ton capacities. These are exactly the same capacities in which Graham Brothers trucks are built.

M SYSTEM BRINGS BIG ORGANIZATION HERE

Pampa will have representatives of two of the largest chain store grocery organizations in the world when the M. System Store opens on West Foster Street tomorrow morning. B. Kersey, formerly of Amarillo, is manager.

The self-service grocery plan has received much popularity and has enjoyed considerable growth in the last few years according to Mr. Kersey.

M System stores do not "sell" anything, in the sense that "selling" means bargaining and trading. The customer who is M System wise merely enters the store, passing through the turnstile and makes his or her selection at his or her pleasure.

The customer is let severely alone to pick precisely what is desired in the quantity wanted, and no selling arguments are used because there are no salesmen. M. System stands for a big clean store, well-stocked with the highest grade of goods in the widest possible array.

NOTICE TO THE PUBLIC

Oren W. Harrah, formerly of Miami and Pampa, has just completed his new two-story brick building, 35 by 80 feet, in White Deer and has installed a modern ten-chair barber shop, beauty parlor, with ladies rest room, baths and tailor shop and extends an invitation to all his former friends and everyone else to visit him in his new home. 68-1tp

Woman Seeks Seat In State Assembly

NORFOLK, Va.—One of the first women in Norfolk county to become

publically identified with woman suffrage, Miss Bianche Culpepper is the first woman here to become a candidate for the state house of delegates. She is running subject to the Dem-

ocratic primary in August. Six other candidates are expected to enter the race within the next few weeks and the indications are that a few more will be added to the roster of Virginia's woman delegates.

"PAMPA'S PLAYGROUND"

OPEN ON OR ABOUT

MAY 31

Although the work on Pampa's only recreation park has just begun. The swimming pool and temporary dressing rooms will be open for your enjoyment Tuesday, May 31, if possible. Work will proceed in all haste to make your park the Beauty Spot of the Panhandle. In the near future you will be able to enjoy—in addition to swimming—dancing, boating and many other kinds of wholesome amusement.

Season and Monthly Tickets at Greatly Reduced Rates Now on Sale at Ledbetter Drug Store, and From Individuals — Ask Your Friends.

"PAMPA'S PLAYGROUND" IS LOCATED IN THE TALLEY ADDITION, AT THE WEST SIDE OF PAMPA
