(NEA Service)

PRICE FIVE CENTS.

## LEGION TRAIN PLOTS REVEALED

### Rainfall of Two Inches Ties Up Traffic on Highways

#### COLORADO AND WYOMING GET SNOW TODAY

Temperature in Pampa Drops to 4 Degrees Above Freezing

#### HAIL BLOCKS MANY MOTORISTS

Scores of Cars Await Along Road For Daylight

DENVER, Sept. 26.—Fed by freezing temperatures from the Rocky mountain states that brought the first snow of the season to Wyoming and Colorado prairies, a cold wave today swept eastward with the prospect that it would continue into the upper Mississippi valley.

The cold wave struck northern Wyoming yesterday to change rain to snow after one of the hottest days of the week.

The dripping hand of an early winter spread a deluge over the Panhandle Sunday and followed it with near-freezing weather today.

The temperature stood at 35 degrees, just four points above freezing, early this morning.

And for the first time this year the Daily News' government rain gauge overflowed into the reservoir, making two measurements necessary to obtain the exact total, which was 2.02 inches for the heaviest 24-hour precipitation of the year.

White Deer and Panhandle had as their guests many Pampans who despaired of reaching this city last night. The road was flooded with water at many places over the running boards of cars, and many local motorists struggled in mud for 24 hours making the trip to Amarillo.

Near White Deer, hail and debris were washed into the road to a depth which cars could not pass. Scores of motorists, despairing of going further before daylight, slept in their cars along the road, and many more unfortunate ones were in ditches awaiting aid. Several tried the south detour from White Deer and managed to get through. The roads were reported better today.

In Pampa, considerable damage was done by roof leaks, but the hail was not heavy enough to do much damage.

Among those who got stuck in the mud and hail last night or who weathered the storm to Pampa were Porter Malone, John Studer, P. O. Sanders, H. W. Johns, L. L. Lavender, J. M. Dodson and many more who have not yet reported to the lost and found bureau of the Daily News. In fact, some of the Pampa residents had not arrived home at noon.

#### Jewish Stores To Close Tomorrow

Jewish merchants of Pampa will close their stores tomorrow in observance of Roshashona, or Jewish New Year. According to the Jewish reckoning, it will be the year 5788.

A number will go to Amarillo, where special services will be held. The New Year will begin at dusk this evening.

Sergt. Alvin C. York, of Nashville, Tenn., World War hero, has filed suit for \$75,000 damages against the Bank of Jamestown, Tenn., and ten residents of Fentress county, charging interference with his plan to establish the Alvin C. York institute for mountain children.

#### Japan's Hero

In the United States for a visit of one week on a mission of promoting good will between this nation and Japan, Admiral Kenwa Kanna, famous naval hero of the Russo-Japanese War, is shown as he arrived at Los Angeles. The admiral is a candidate for the National Assembly of Japan.

#### GIRL KILLED IN REVENGE PLOT

Enraged Parent Blamed for Death of a Child

(By The Associated Press.)  
NEW YORK, Sept. 26.—While seven-year-old Angelina Constance was asleep at her home today she was shot and killed by an unidentified man who escaped.

Police later said that revenge was the cause of the shooting.

According to the police Blaggio Arsenio was being sought as the slayer. Relatives of the murdered child told the police that Arsenio was enraged over the recent elopement of his daughter with a young man introduced by the slain child's parents.

#### Panhandle Crude Production Drops 766 Barrels Daily

Another decline was recorded in Panhandle crude oil production last week, the drop being 766 barrels a day. There were three new wells.

The total production was 97,736 barrels from 1,336 wells, compared with 98,502 barrels for the previous week. The average per Panhandle well was 71.54 barrels.

The production by counties: Hutchinson—77,842 barrels from 1,010 wells for 76.87-barrel well average.

Gray—9,763 barrels from 155 wells for 62.98-barrel well average  
Carson—8,871 barrels from 160 wells for 55.44-barrel well average.  
Moore—Three wells, production not reported.

Potter—One well for 35 barrels  
Wheeler—1,425 barrels from 37 wells for 38.51-barrel average.

#### TELEPHONE LINES RUSHED

The telephone and telegraph poles along the Empire pipeline from Ponca City to the booster station have been set and the wire strung as far as the Canadian river. The wire from the river to Pampa will not be strung until the anchor has been set at the Canadian river where the line crosses the stream.

Work on the erection of the towers where the long span of cable crosses the Canadian is being rushed forward so that the line may be completed before the cold weather settles.

#### GIRL KILLED IS BILLY OWENS OF CRANE CITY

Body Is Identified By Mrs. Eva Owens, A Sister

HAD DISAPPEARED 3 MONTHS AGO

Sheriff Follows New Clue In Mystery Case

SAN ANTONIO, Sept. 26.—The body of the young girl found buried in a shallow grave 10 miles from Fredericksburg Tuesday was identified shortly after midnight by Eve Owens of Crane City as that of her sister, Billy, who has been missing from home for three months.

A ruby ring worn by the dead girl, Miss Owens said, was one purchased by her sister before she left home as a good luck piece. The girl's other sister is enroute to Fredericksburg to view the body.

From the identification, Sheriff Alfred Klaerner is following a new clue which he hopes will lead to the arrest of the slayer.

#### Pampa Men Say Tunney Won Fight Without a Doubt

"Gene Tunney won the big fight fair and square," says Jim King, who returned to Pampa yesterday from Chicago.

Dr. McKean returned last night, and Sam Fine is expected today. Pete Post went to his home in Virginia for a vacation before returning to Pampa.

King states that Tunney had Jack whipped after the fourth round and that in the seventh when the ex-champ landed the blow that sent Tunney to the mat, Jack was so groggy that he didn't know which was a neutral corner. He went to his own corner and had to be led to a neutral corner by the referee. He says that the count was long, but that Tunney could have been up before the count ended.

Dempsy was cut badly about the face towards the end and his body was covered with blood from the cuts above his left eye and under his right eye. His nose was badly swollen and bleeding in the last round.

It seemed to be just too much Tunney all the way through," Dr. McKean said this morning. "When Gene went down in that seventh he was ready to get up at the count of four. He turned his head and assured his seconds that he was all right, but looked a little sheepish at leaving his feet."

#### Mrs. Moody Has Honor of Presenting Lindy At Abilene

(By The Associated Press.)  
ABILENE, Sept. 26.—Colonel Charles Lindbergh flying the Spirit of Saint Louis, arrived this morning at Kinsolving field.

The largest crowd that has ever assembled in West Texas was here to greet him. Throngs from all parts of West Texas heard Lindbergh's speech at Federal Lawn.

Mayor Thomas Hayden introduced Mrs. Dan Moody, wife of the governor, herself an Abilene girl, who introduced Colonel Lindbergh.

He left at 11:18 a. m. for Fort Worth.

#### Like Mother, Like Daughter

So successful has Mrs. W. H. Pasell of Oklahoma City, Okla., been in a career as a working woman that her 13-year-old daughter Ferris has forsworn society life to follow the painting trade. Mrs. Pasell for several years has "lived in overalls," starting with a truck garden, buying and renting houses, then starting a motor car painting business. Mother and daughter are shown above.

#### No Word Is Received In Last 48 Hours From German Flier On Long Distance Trip In Turkey

(By The Associated Press.)  
LONDON, Sept. 26.—More than 48 hours had passed today without any word of Lieut. Otto Koenecke, German long-distance flier, and his companions in the biplane Germania, who left Angora Saturday for Basra.

Koenecke is attempting a flight from Cologne, Germany, to America by way of the Orient. There are many miles of desert between Angora and Basra and if the airmen had been forced to alight they might be some time reaching a point from which reports might be received.

#### Great Britain Takes Schneider Cup With Plane

(By The Associated Press.)  
VENICE, Sept. 26.—Great Britain today captured the historic Schneider cup, emblematic of supremacy among high-speed planes, from Italy, which had wrested it from the United States last year.

Lieut. Webster was the victor.

#### Two Robbers Get \$85,000 From Big Los Angeles Firm

(By The Associated Press.)  
LOS ANGELES, Sept. 26.—Two men held of three officials of the Los Angeles Water and Power company just after the office opened for business today and escaped with what is estimated as \$85,000 in cash.

#### New York Man Killed On Railway

(By The Associated Press.)  
WICHITA FALLS, Sept. 26.—The body of Arthur Wood of New York, was found mangled on the Fort Worth and Denver tracks near here today, by a section hand.

#### WRECKS ARE AVOIDED ONLY BY VIGILANCE

Inspection Gangs Find Traps and Warn Engineers

SACCO-VANZETTI CASE INVOLVED

Good-Will Trips To Many Cities Are Continued

NICE, France, Sept. 26.—Sacco-Vanzetti sympathizers are believed by police today to have been behind two attempts to wreck American legion good-will trains enroute here from Paris.

The plots were made in the Riviera section, and only prompt work by the track inspection force avoided disaster in all three cases.

These were the first attempts to carry out threats voiced during the late days of the Sacco-Vanzetti case, and it had been hoped that the calm of the convention would be continued as the Legionnaires scattered over the continent on their good-will trips.

#### Pampa Man Dies Of Heart Disease At Panhandle

R. L. Mann, local dealer in second-hand furniture, died suddenly of heart disease in Panhandle at 8:30 o'clock last night.

Mr. Mann and his family were returning from Amarillo when he decided to leave his new car at Panhandle and come the remainder of the distance by train. He complained of severe pains in his arms and shoulders, and stopped the car in front of the city hall at Panhandle.

Noticing his distress, the city marshal helped him into the city hall and called a doctor. Later he was taken to a hotel accompanied by the physician. There, according to information from Panhandle, he continued in pain until he collapsed.

It is said this was the third death in the family in the last three weeks, Mrs. Mann's mother and his father having died recently.

The body is at the Stone funeral parlor in Panhandle, and probably will be sent to Oklahoma for burial. Mr. Mann was about 30 years old.

#### Further Delay Is Sought Today In Girl Bandit Case

(By The Associated Press.)  
GEORGETOWN, Sept. 26.—Two hours was granted the defense today to prepare a motion for a continuance after the state had announced ready in the trial of Rebecca Rogers, charged with arson in connection with the burning of a vacant residence at Roundrock.

#### Plans Made For Big Water District

AUSTIN, Sept. 26.—The creation of a giant water district, to include the entire Brazos river valley, was started tentatively in a meeting of the executive committee of the organization with the state board of water engineers today.

D. G. Giddins, of Brenham, chairman of the committee, laid the plans before the board.

The St. Louis Public Library issued 199,702 books during the month of August.

#### Ducks Numerous, But Season Will Open October 16

The old-timers of the Pampa district report wild ducks to be more numerous this year than ever before. The numerous small lakes in the community are well populated with ducks and hunters are eager to get out the old blunderbus October 16, when the duck season opens.

Many are the complaints of the hunters that the duck season commences too late. They state that the young ducks are old enough for hunting by the latter part of August, and that by the middle of October, when the season opens, the young ducks are becoming tough.

Although the season is three weeks off, many of the local hunters are getting their guns out of storage and hibernating up for the first day of the season. The merry honk of geese and the call of wild ducks may be heard over the city these nights, and the hopes of the hunters are high at the present time.

#### New Location Is Made; Well Plugged

The Shamrock Oil company will drill a well on the E. V. Back property in section 24, block 25, Gray county. This well will be near the Travis brothers discovery well.

The Pampa Development company's No. 1 Mary Leopold, in section 141, block 3, Gray county, is being plugged. The well was drilled to more than 3,600 feet.

#### Bad Weather Puts Cotton Prices Up

(By The Associated Press.)  
NEW YORK, Sept. 26.—Reports of the weather being unfavorable for the development of late cotton resulted in increased demand here today and the prices rose \$3.50 a bale.

# The BENSON MURDER CASE

by S. S. VAN DINE © CHARLES SCRIBNER'S SONS

### Characters of the Story

- PHILO VANCE
- JOHN F. X. MARKHAM, District Attorney of New York County.
- ALVIN H. BENSON, Well known Wall Street broker and man-about-town, who was mysteriously murdered in his home.
- MAJOR ANTHONY BENSON, Brother of the murdered man.
- MRS. ANNA PLATZ, Housekeeper for Alvin Benson.
- MURIEL ST. CLAIRE, A young singer.
- CAPTAIN PHILIP LEACOCK, Miss St. Claire's fiancé.
- LEANDER PFYFE, Intimate of Alvin Benson's.
- MRS. PAULA BANNING, A friend of Pfyfe's.
- ELSIE HOFFMAN, Secretary of the firm of Benson and Benson.
- COLONEL BIGSBY OSTRANDER, A retired army officer.
- WILLIAM H. MORIARTY, An alderman.
- GEORGE G. STITT, Of the firm Stitt and McCoy, Public Accountants.
- MAURICE DINWIDDIE, Assistant District Attorney.
- ERNEST HEATH, Sergeant of the Homicide Bureau.
- BURKE, SNITKIN, EMERY, Detectives of the Homicide Bureau.
- BEN HANLON, Commanding Officer of Detectives assigned to District Attorney's office.
- PHELPS, TRACY, SPRINGER, HIGGINBOTHAM, Detectives assigned to District Attorney's office.
- CAPTAIN CARL HAGEDORN, Fire-arms expert.
- DR. DOREMUS, Medical examiner.
- FRANK SWACKER, Secretary to the District Attorney.
- CURRIE, Vance's valet.
- S. S. VAN DINE, The Narrator.

### THIS HAS HAPPENED

Benson has been shot while reading. In the room are a woman's gloves and handbag. A policeman reports having seen a big gray automobile outside the Benson home at midnight. Markham traces the handbag to Miss St. Claire and tells Vance he is going to arrest her. Vance protests that she is innocent.

### NOW BEGIN THE STORY

#### CHAPTER XI

"It's quite simple, y'know," Vance replied, with a quizzical twitch of the lips. "You haven't your eye on the murderer for the reason that the person who committed this particular crime was sufficiently shrewd and perspicacious to see to it that no evidence which you or the police were likely to find, would even remotely indicate his guilt."

He had spoken with the easy assurance of one who enunciates an obvious fact—a fact which permits of no argument.

Markham gave a disdainful laugh. "No law-breaker," he asserted, oracularly, "is shrewd enough to see all the contingencies. Even the most trivial event has so many intimately related and serrated points of contact with other events which precede and follow, that it is a known fact that every criminal—however long and carefully he may plan—leaves some loose end to his preparations, which in the end betrays him."

"A known fact?" Vance repeated. "No, my dear fellow—merely a conventional superstition, based on the childish idea of an implacable avenging Nemesis. I can see how this esoteric notion of the inevitability of divine punishment would appeal to the popular imagination like the fortune telling and ouija boards, don't y'know; but—my word!—it degrades me to think that you, old chap, would give credence to such mystical moonshine."

"Don't let it spoil your entire day," said Markham acidly.

"Regard the unsolved, or successful crimes that are taking place every day," Vance continued, disregarding the other's irony, "—crimes which completely baffle detectives in the business, what? The fact is, the only crimes that are ever solved are those planned by stupid people. That's why, whenever a man of moderate sagacity decides to commit a crime, he accomplishes it with but little difficulty, and—fortified with the positive assurance of his immunity to discovery—scarcely submitted Markham, "result, in the main, from official bad luck—not from superior criminal cleverness."

"Bad luck"—Vance's voice was almost dulcet—"is merely a defensive and self-consoling synonym for inefficiency. A man with ingenuity and brains is not harassed by bad luck. . . . No, Markham old dear, un-

"You haven't your eye on the murderer," said Vance, "for the reason that he was sufficiently shrewd to see to it that no evidence which you or the police were likely to find would ever remotely indicate his guilt."

solved crimes are simply crimes that have been intelligently planned and executed. And, d'ye see, it happens that the Benson murder falls into that category. Therefore, when, after a few hours investigation, you say that you're pretty sure who committed it, you must pardon me if I take issue with you."

He paused and took a few meditative puffs on his cigaret.

"The factitious and casuistic methods of deduction you chaps pursue are apt to lead almost anywhere. In proof of which assertion I point triumphantly to the unfortunate young lady whose liberty you are now plotting to take away."

Markham, who had been hiding his resentment behind a smile of tolerant contempt, now turned on Vance and fairly glowered.

"It so happens—and I'm speaking 'ex cathedra'—he proclaimed defiantly, "that I come pretty near having the goods on your 'unfortunate young lady'."

Vance was unmoved. "And yet, y' know," he observed drily, "no woman could possibly have done it."

I could see that Markham was furious. When he spoke he almost spluttered.

"A woman couldn't have done it, eh—no matter what the evidence?"

"Quite so," Vance replied placidly "not if she herself swore to it and produced a tome of what you scions of the law term, rather pompously, incontrovertible evidence."

"Ah!" There was no mistaking the sarcasm in Markham's tone. "I am to understand then that you even regard confessions as valueless?"

"Yes, my dear Justinian," the other responded, with an air of complacency; "I would have you understand precisely that. Indeed, they are worse than valueless—they are downright misleading. The fact that they occasionally may be correct—like a woman's preposterously overrated intuition—renders them just so much more unreliable."

Markham grunted disdainfully.

"Why should any person confess something to his detriment, unless he felt that the truth had been found out, or was likely to be found out?"

"For my word, Markham, you astound me! Permit me to murmur into your innocent ear that there are many other presumable motives for confessing."

"A confession may be the result of fear, or duress, or expediency, or mother-love, or chivalry, or what the psycho-analysts call the inferiority complex, or delusions, or a mistaken sense of duty, or a perverted egotism, or sheer vanity, or any of a hundred other causes. Confessions are the most treacherous and unreliable of all forms of evidence; and even the 'holy' and 'scientific' law repudiates them in murder cases unless substantiated by other evidence."

"You are eloquent; you're wring me," said Markham. "But if the law threw out all confessions and ignored all material clues, as you appear to desire, then society might as well close down all its courts and scrap all its jails."

"A typical false conclusion of legal logic," Vance replied.

"But how would you convict the guilty, may I ask?"

"There is one infallible method of determining human guilt and responsibility," Vance explained; "but as yet the police are as blissfully unaware of its possibilities as they are ignorant of its operations. The truth can be learned of its operations. The truth can be learned only by an analysis of the psychological factors of a crime, and an application of them to an individual."

"The only real clues are psychological—not material. Your truly, profound art expert, for instance, does not judge and authenticate pictures by an inspection of the under-painting and a chemical analysis of the pigments, but by studying the creative personality revealed in the picture's conception and execution."

"He asks himself: Does this work of art embody the qualities of form and technique and mental attitude that make up the genius—namely, the personality—of Rubens, or Michelangelo, or Veronese, or Titian, or Tintoretto, or whoever may be the artist to whom the work has been tentatively credited."

"My mind is, I fear," Markham confessed, "still sufficiently primitive to be impressed by vulgar facts; and in the present instance—unfortunately for your most original and artistic analogy—I possess quite an array of such facts, all of which indicate that a certain young woman is the—shall we say?—creator of the criminal opus, entitled 'The Murder of Alvin Benson.'"

Vance shrugged his shoulders almost imperceptibly.

"Would you mind telling me—in confidence, of course—what these facts are?"

"Certainly not," Markham acceded. "First: the lady was in the house at the time the shot was fired."

Vance affected incredulity.

"Eh—my word! She was actually there? Most extraordinary!"

"The evidence of her presence is unassailable," pursued Markham. "As you know, the gloves she wore at dinner, and the hand-bag she carried with her, were both found on the mantel in Benson's living room."

"Oh!" murmured Vance, with a faintly depreciating smile. "It was not the lady, then, but her gloves and bag which were present—a minute and unimportant distinction, no doubt, from the legal point of view."

"Still," he added, "I deplore the inability of my layman's untutored mind to accept the two conditions as identical. My trousers are at the dry-cleaners; therefore, I am at the dry-cleaners, what?"

(To Be Continued)

Because the practice of receiving men callers on Wednesday nights interfered with the entire week's study, co-eds of the Kansas State Teachers' college at Emporia, have voluntarily banned Wednesday night dates.

## Dick Wick's Niece Carries On; Gives Hollywood Laughing Gas

By WADE WERNER  
(Motion Picture Feature Editor)  
HOLLYWOOD, Cal. (AP)—The sunny philosophy of Dick Wick Hall, "editor and garage owner" of Salome, Ariz., did not die with him. It survives in the gay personality of his niece, Fritzi Ridgeway, actress and service station proprietor of Hollywood.

Fritzi started in pictures with the old Essanay company in Chicago, when Colleen Moore and Virginia Valli were getting their start there; and she was being starred in her own productions years before her uncle's mimeographed "Salome Sun" brought him nationwide recognition as a humorist. But she quit the screen to become a headliner in vaudeville, and when she came back after three and a half years the High Gods of Hollywood had forgotten her. As a vaudeville entertainer she admitted she was good; but as a screen possibility—well, they let her sit at home and wait for the phone calls that did not come.

That was barely a year ago. Unlike others who have tried to come back and have found Hollywood hard-bolled toward the has-been, Fritzi did not spoil her disposition or complexion by grieving. Instead, she took a leaf out of her uncle's book and leased an automobile filling station with the savings of her vaudeville tour, calling it a "laughing gas" station and aiming to give a chuckle with every gallon.

Then, with the gasoline sales mounting satisfactorily, she turned

the station over to a manager and sallied back into celluloid—as an extra. Gayly throwing into the discard her previous status as a star, she mingled with the movie mob and took what "bits" she could get. She soon rose out of the \$15-a-day class, the \$25 a day class, and then the \$50 a day class, by which time the directors began to see the light and cast her in regular parts. Her most recent role was the featured feminine part in support of Lillian Gish in "The Enemy."

But the joke which Dick Wick Hall would have enjoyed is that Fritzi's laughing gas station and other business interests—her latest is a six-story apartment house deal—have been keeping pace with her progress on the screen. She is as busy with a pencil and pad in her spare moments figuring costs and profits, as the average film flapper is with her powder puff, and when she is not on her way to a studio with her make up box she is headed toward or away from the bank with a bulky check book under her arm. She is coming back into Hollywood prominence and making Hollywood like it.

Fritzi's favorite amusement, however, is to write "beauty hints" for the papers and send copies to her mother. For Fritzi was born in Montana, raised on a ranch, and had such a wealth of freckles and such a turned-up nose that when she first broached her ambition to become an actress her mother could not stop laughing for the rest of the evening. And now folks ask her for beauty hints.

## Explains How Depleted Ranges Can Be Saved by Grazing System

(By The Associated Press.)

WASHINGTON (AP)—Depletion of forage resources in this country has reached such a stage that definite and earnest effort is urged to solve the problems of forage on ranges and to develop satisfactory utilization practices for this type of land.

Attention is called to this situation by W. R. Chapline, Inspector of Grazing in Charge of Range Research of the U. S. Forestry Service.

"As early as 1890," Chapline says, "range grazing lands were stocked to their capacity, while some were already overstocked. Continued overstocking over enormous areas reduced the carrying capacity both by

cutting down the quantity of forage produced and by increasing the erosion of the productive surface soil."

"Continuing research is essential to meet fully the needs of the range livestock industry. Open herding and the bedding-out system of handling sheep, and the deferred and rotation system of grazing, have resulted in increased carrying capacity of depleted ranges."

It is estimated that 26,000,000 sheep, goats, and swine, and 13,000,000 cattle, horses and mules of the eleven Western states obtain 70 per cent of their feed from range land. The value of the livestock is approximately \$800,000,000.

## Langley Feared War Plane Use Early In '90's, Mates Recall

(By The Associated Press.)

WASHINGTON—Samuel Pierpont Langley, the astronomer who first demonstrated the feasibility of mechanical flight, died in 1906, but the shadow of his greatness as a scientific seer and a man remains a vigorous influence 21 years later in the Smithsonian Institute, which he served for 19 years as secretary.

A number of the men who worked with him during the years he labored to develop his flying machine—the aerodrome, he called it, are still attached to the staff of the institution. Their memories of him are vivid today. As boys or young men, they were profoundly impressed by the knowledge and foresight of the reserved scientist they served.

One whose contact with him was particularly intimate recalls that in the early nineties, long before his Aerodrome No. 5 made the first successful flight of a heavier-than-air machine driven by its own power, on May 6, 1896, Langley put into words his fear that the flying machine might become an instrument of death and destruction.

Dictating to his secretary, he expressed hope that an international convention would be devised to prohibit the use of "aerodromes"—in time of war to attack cities and industrial centers.

He saw the great possibilities of heavier-than-air flying machines as instruments of war, for reconnaissance and quick communication, and as engines of peace. But he dreaded the thought that anyone should die in them or because of them. For that reason, he insisted upon conducting his flight experiments over water.

Associates frequently urged him to obtain patents on his "aerodrome" inventions, but he was a scientist at heart as well as in fact, and he was secretary of an institution founded to assemble and develop knowledge for the benefit of all. When the time came to honor his memory, with a tablet at the entrance of the principal building of the Smithsonian group, his attitude, phrased in his own words, was printed in raised letters on the bronze, after demonstrating the possibility of flight he had written:

### FRENCH TO REMOVE BAN ON SCHOOL SPORT

PARIS, Sept. 26. (AP)—Games of exercise doubtless soon will be permitted in French schools under a proposed law relieving teachers from direct responsibility for accidents. The Chamber of Deputies passed the bill and the Senate is expected to ratify it.

French teachers now are criminally and financially responsible for all accidents to children at school, whether the teachers are at fault or not. All carry insurance but they save themselves trouble, generally, by forbidding all but the simplest games, such as marbles and "catch" with a rubber ball. Some teachers permit nothing but walking at recess.

Sports have thus been held in check. In the large schools where there are gymnasiums, the program of exercise has been limited to calisthenics and work with apparatus that gave no chance for accidents.

# SEEING THE BIG WORLD NEWS EVENTS FROM THE CAMERA MEN'S VIEWPOINT

## At the Trial of Mayor Duvall

An amazing story of bartering of city-hall jobs, was related on the witness stand at the opening of the trial of Mayor John L. Duvall of Indianapolis. Duvall, shown above between his attorneys in the courtroom, was accused by William H. Armitage, first witness (shown below on the witness stand), of accepting \$14,500, and then breaking campaign pledges.

## The Wm. K. V.'s

Presenting you to the new Mrs. William K. Vanderbilt II, who was Mrs. Rosamond Lancaster Warburton! She's photoed here with her husband just after their Paris marriage; it followed his divorce from the former Virginia Fair.

## New Jersey's New Murder

These are principals in the latest murder mystery in New Jersey, home of the famous Had-Mills case: Dr. William Litendahl, 62, of Millville, and his wife, Margaret. She said that he was shot and killed and she had been attacked by two negroes who held up their automobile on a lonely road near Hammonon.

## Held As Slayer

Lyle Messner, 14, of Cedar Rapids, Ia., is held for the murder of six-year-old Kathleen Forrest.

## Meet Death In Spokane Air Derby

Wreckage of the Ruhl biplane in which two of the flyers in the New-York-Spokane air derby met death at Morristown, N. J., is pictured above. The flyers, Pilot Richard E. Hudson (left) and Jay Radike (right) are shown below, with the takeoff at Roosevelt Field, Long Island, pictured to their right. The plane, the first to leave in the Class A division, struck a tree.

## Home Again

President Coolidge, Mrs. Coolidge and Rob Roy stroll inspectively about the White House grounds upon their return to Washington from the Black Hills. They heartily approved the results of the extensive work or renovation and repair done during their absence.

## Jensen Gives Young Husbands Hint

Martin Jensen, winner of the \$10,000 award in the Dole fight from San Francisco to Hawaii, seems to be offering a hint to husbands here. Mrs. Jensen is in the cage in which Jensen aims to carry a lion across the country, via airplane. The lion is the famous "Leo" of the movies.

## Commandant

Captain Frank McCrary is the new commandant of the naval air station at San Diego. Captain McCrary formerly commanded the Shenandoah and the naval air station at Lakehurst, N. J.

## Accused Nurse

Here is a new photograph of Mary Atkinson, Enid, Okla., nurse who faces a murder charge in connection with the mysterious deaths of the wife and daughter of Rev. Bailey, Episcopal minister of Enid. The picture was taken since her arrest. Authorities investigating the case say Miss Atkinson was infatuated with the pastor.

## Sportsman's Wife Is Sportswoman

Mrs. Frank J. Nevin, wife of the owner of the Detroit American League baseball team, entered several horses at the Michigan state fair and she knows how to ride them herself, as this picture of Mrs. Nevin taking a hedge indicates.

## Cross-Continent Air Racers

One of the flying teams entered in the non-stop New York-to-Spokane air race is composed of Fred Koehler (left) and Eddie Stinson, veteran of the air. This picture was made at Roosevelt Field, Long Island, just before the hop-off.

FOOTBALL—This is the time of the metamorphosis of the diamond into the rectangle. A broad-shouldered, helmeted figure is looming in the background as the striped sox-flit around the bases hurriedly as if to get one more measure of acclaim before the finale.

Baseball will take one more big spurt then leave the picture in one big burst of interest as the world series is decided. For some sport fans, however, particularly old football men, the gridiron already has their interest.

Not much has happened thus far on the gridiron. Favorites have come through as expected by defeating lesser rivals. In Texas there is a tear for Baylor's football dead, and the remaining athletes failed Saturday, against Southwestern, under the mental urge of the memory of a captain whose body was broken by the collision of a fast train with the basketball team's bus, to emerge with victory.

Looking over the football world, however, is seen an outstanding development. The Missouri Valley conference, one of the big loops of the nation, is definitely on the rocks. Missouri, Nebraska, Kansas, Oklahoma, Kansas State Agricultural college, and Iowa State college (Ames), have withdrawn and started organization of another conference.

Queerly enough, in football, this leaves the champion Oklahoma Aggies out in the cold, along with Grinnell, Drake and Washington university of St. Louis. This will mean a division of interest in the Middle West and the necessity for forming and advertising two new conferences. The bigger group may profit, but the smaller one surely will lose. The Oklahoma Aggies, however, might be taken into the Southwestern conference.

The Missouri Valley break-up was wise, we are informed, in that "the conference as now constituted is unwieldy, making the business of drawing a suitable schedule that would be fair to all impossible, that the round robin schedules compel the athletes to spend too much time away from the classroom; and in that there is too great a difference in the size and enrollment and inequality of athletic prowess and plants of the school."

Consideration of the facts in the case do not support these reasons, except the last one, to an appreciable degree. Bennie Owen of Oklahoma, for example, tried desperately to

The Last Straw

save the Oklahoma Aggies. Furthermore, a growing tendency to match inter-sectional games belies the desire to give the athletes more time to study. This has not been the worry of coaches, as long as the deans let the men play.

The real reason appears to be more of this desire to schedule only the runner-up teams, then to arrange games with distant leading colleges. Internal friction also was a factor. The conference was unwieldy, however, and the split probably is for the best.

BOOKS—Bookmaking isn't what it used to be, unless you are writing or publishing one of the best sellers or catering to the textbook or other sure demands. The American people simply are not taking to books as the publishers desire.

One big reason is the growing educational power of the large newspapers. Some of the best of fiction is now having first runs as serial or Sunday newspaper matter. Huge sums are being paid by newspapers for first runs, and syndicates are releasing new fiction to client papers. The Benson Murder Case, now running in the Pampa Daily News, for example, was bought from Charles Scribner's Sons, book publishers, and probably never will be a good seller in bound form.

Another good example is apropos: The first authentic, complete biography of Woodrow Wilson, compiled by the man commissioned and aided by the war president himself, will not appear in four big volumes until it has appeared serially in several large daily newspapers. Thus is the newspaper beginning to dominate the publishing field, and is offering these great works to the masses for not one cent above the small subscription price.

Ten tons of manuscripts not available to any other biographer were studied by Ray Stannard Baker, the author of the new volumes, for long years before finally released.

The greatest price ever paid for a newspaper right was commanded by this great work.

Not only is a newspaper subscription not great enough in price to pay for the paper and ink used by the average daily, but the serial stories are worth in themselves many times the price of a subscription. No other institution is willing or able to offer as much service above that expected of any business as the daily newspaper, and those who would criticize the profession without comparing it with others are so narrow in their view that their words are almost meaningless.

That the newspaper, like other public institutions, is still far short of its possibilities is very true, but until it receives a return from the subscriber more nearly equal to the service rendered, it cannot financially employ men of the training and education necessary to put out a superior product. But it is making progress, from the country weekly to the metropolitan daily. In between, of course, are publications which specialize on some peculiar demand, which is inevitable and not alarming.

TWINKLES

Lindbergh is a high flyer too, but we are going to desert pugilistics for aviatics for our hero stuff hereafter.

Indifference, rather than sarcasm, is the most cutting weapon of the present age. Publicity at any price smirks at criticism.

What's on our community chest? There is a small sum in the treasury of the tentatively formed Associated Charities. Pampa should start the new year right by completing this organization.

Sex equality will never be impressive as long as girls have to wear trousers to rob a train.

WASHINGTON LETTER

BY RODNEY DUTCHER
NEA Service Writer.

WASHINGTON.—The Rev. Arthur James Barton of Atlanta can succeed Wayne B. Wheeler as legislative superintendent of the Anti-Saloon League if he wants the job. Dr. Barton is known in the south as "the Baptist pope." He is chairman of the league's executive committee and of the social service commission of the Southern Baptist church. He is one of the most important figures in the movement in the south on the parts

of dries and Protestants to defeat the presidential hopes of Governor Al Smith of New York. Inasmuch as the anti-Smith campaign is regarded by the Anti-Saloon League as its biggest imminent problem, Barton is in an excellent position to take up the anti-Smith work which Wheeler carried on so vigorously until his death.

Barton has a reputation as an organizer and was one of the most influential of the lobbyists for the eighteenth amendment. He helped frame most of the national prohibition legislation in conjunction with Wheeler and others. At the age of 60, he is still active, capable and shrewd.

Primarily a churchman, Barton is a strong bond between the church and the league. He is widely known among church members, though not to the rank and file of the country.

For all his religion, he is regarded as a fighter. He is of the heavy-set, bulldog type in appearance, and he fights the same way, with tenacity, his admirers say. Like Wheeler, he makes friends easily. He has done most of his work — except for Washington forays — in Arkansas, Texas, Tennessee, Missouri and Louisiana.

The question is, according to leaders of the league, whether or not Barton will accept Wheeler's job with all its troubles and responsibilities. Unless he declines or sentiment changes, he will be elected to it in December. His sentiments are not now known. He has never been an employee of the league and it may be that he does not enjoy rough-and-tumble fighting as Wheeler did.

The league is talking over its other timber, of course — but always one hears the pious question arise as to whether such and such a man would accept. Most of the league's workers are men with moral urge and sacrificial temperament; personal ambitions are not necessarily predominant in them. An example was Wheeler, who worked for \$6,000 a year — before he was raised — when he could have had \$25,000 or \$50,000, perhaps, more, as a lobbyist for one of the trusts.

F. Scott McBride, who has been doing some of Wheeler's work, is regarded as a likely

Mr. and Mrs. J. Schalk of Amarillo are visiting in Pampa, where Mr. Schalk is transacting business.

G. C. MALONE Ambulance Service. Phone 181.

Miss Mary Hobart, Bride-Elect, Honored At Luncheon Here

Miss Mary Hobart, bride-elect, was honored with a 2 o'clock luncheon in the beautiful dining room of the New Schneider hotel Friday afternoon.

Mrs. Mack Graham and Mrs. Clinton Henry were the charming hostesses of the occasion.

The table was beautiful with a center-piece of rose buds, surrounded by chrysanthemums arranged in a large circle. A novel feature was the miniature railroad made in silver effect with silver cars laden with after-dinner mints in front of each plate. On the top of each carload of mints was a little roll tied with white ribbon, which, upon investigation, revealed the names of the contracting parties in the coming wedding, namely:

"Mary Hobart—Guy Hutchinson. October 19, 1927."

Then engine and car which stood in front of the honoree's plate carried something which proved to be of more value than that of the others—twenty-five dollars in gold and the following note:

"All the freight cars in the country if you place them end to end, won't carry half the wishes, That with this gift we send, The names of the guests were attached.

Before the last course was served Mrs. Purviance, as one of the most successful housewives and homemakers present, was called upon to give some timely advice to the bride-to-be, which she did in a few well chosen words.

Mary Hobart, the daughter of Mr. and Mrs. T. D. Hobart, is to become the bride of Guy Hutchinson, of Arkansas City, Kans.

Those enjoying the delightful occasion were Mrs. T. D. Hobart, Mrs. Clyde Fatheree, Mrs. M. K. Brown, Mrs. A. H. Doucette, Mrs. John V. Andrews, Mrs. Dave Pope, Mrs. P. C. Ledrick, Mrs. W. Purviance, Mrs. DeLen Vicars, Mrs. B. E. Finley, Mrs. George Gill, Mrs. Mack Graham, Mrs. Clinton Henry, Miss Margaret Buckler, and the honoree, Miss Mary Hobart.

Mrs. J. L. Logan has returned to her home in Lubbock after a visit in the home of her mother, Mrs. I. F. Rider.

William T. Fraser and W. C. Upton visited Mr. Fraser's father on his ranch at Boydston Sunday.

Mrs. Bessie Cox of Jayton, is visiting with Mrs. Claude Powell and Mrs. H. W. Johns.

Mr. and Mrs. Jack Vincent of Amarillo spent Sunday with Mrs. W. P. Vincent.

Mr. and Mrs. Ralph Chisom and son of Miami spent Sunday in Pampa with relatives.

Ben Breeding of Wheeler transacted business in Pampa Saturday.

H. C. Gamble, president of the Gamble-Martin Motor company of Amarillo, distributors of Willys-Knight and Whippet cars in the Panhandle, was a visitor in Pampa today.

E. P. Bass, Wichita Falls drilling contractor, is in the city on business this week.

Mr. and Mrs. Fred M. Boso of Tulsa are visiting in Pampa for a few days.

Mr. and Mrs. J. Schalk of Amarillo are visiting in Pampa, where Mr. Schalk is transacting business.

Social Calendar

The El Progresso club will meet with Mrs. V. E. Fatheree Tuesday afternoon at 3 o'clock. The subject of study will be "The Islanders" by Helen Hull.

The Friday 13 Bridge club will meet with Mrs. Ashby Friday afternoon.

The Thursday Bridge club will meet with Mrs. P. B. Carlson Thursday afternoon.

The Methodist Missionary society will hold a social and business session with Mrs. J. G. Noel as hostess Wednesday afternoon. She will be assisted by Mrs. Jim Bodkin and others. The officers are asked to prepare written reports on the quarter's work and all members are urged to be present.

Circles Number 1, 2, and 4 of the Baptist W. M. U. will hold sessions at the church Wednesday afternoon, while Circle No. 3, will meet with Mrs. Tom Rose.

Military Men Study Confederate Tactics

(By The Associated Press.) WINCHESTER, Va., Sept. 26.—Shades of the hosts of gray, if they return to tramp again through the Valley of Shenandoah, may feel the satisfaction of work well done in seeing the famous "Valley Campaign" a subject of study by military students more than 60 years later.

Their maneuvers under the leadership of "Stonewall" Jackson, still masterpieces of military strategy, are being studied by 60 officers of the 343rd United States Engineers, O. R. C., accompanied by a detachment of regulars. The area extends from Winchester, which was captured and re-captured 83 times during the Civil war, to Staunton. The officers' report will be made to the war department.

General Von Mackensen, a high ranking German officer, made a study of this campaign just prior to the World war, and many officers claim to have noted its influence in his later successful movements in Europe.

NEW WATER SYSTEM TURKEY, Sept. 26. (AP)—A new water system will be installed in Turkey soon, as the Orman Construction company, who has the contract for installation, is now sinking the well for the supply of water.

The foundation has been laid for the new 50,000 gallon reservoir which is to be 100 feet high.

Young Kansans Are Married Here

Willard Sage of Pampa and Miss Marguerite Marie Finical of Parsons, Kans., were married here at 3 o'clock Sunday afternoon.

The ceremony was performed by the Rev. D. H. Truhitte at the First Baptist church in the presence of friends of the couple.

The bride is the daughter of Mr. and Mrs. C. O. Finical of Parsons and Mr. Sage is a son of Mr. and Mrs. W. W. Sage of the same city.

The bridegroom today is receiving the congratulations of the staff of the Pampa Daily News, on which he is employed in the mechanical department.

Mr. and Mrs. Sage are now a home on East Francis street.

Johnston-Sellers Wedding Here

A. D. Johnston of Pampa and Miss Dorothy Sellers of Tulsa, Okla., were united in marriage at the home of the Rev. Stuckey in Amarillo Saturday night at 8 o'clock.

Mrs. Johnston is the daughter of Mrs. M. Ellis of Tulsa. She arrived in Amarillo Saturday morning where Mr. Johnston met her.

Mr. Johnston has been in Pampa for the past two years and is employed by the Republic Supply company.

Girls Work, Give Mothers Vacation

STORRS, Conn. (AP)—Reversing the usual order, a group of Connecticut farm women went on vacation this summer while their daughters stayed at home and did the housework.

Fifty or more girls, all members of the 4-H Club, decided that it was time their mothers had a rest from the arduous duties of home-making and cooperating with the extension service of the Connecticut Agricultural college, they sent them here for a week.

During their visit the mothers were the guests of the college, which arranged teas, picnics and classes in domestic science for their benefit. The plan proved so successful that it promises to be carried out again next year.

PROLIFIC TURKEY

BAKER (AP)—A turkey hen owned by Tom J. Kelly laid 110 eggs this season, her owner asserts. Last year she laid 110 eggs, which Kelly claims as a world's record.

Textile Standards Set for Consumer

(By The Associated Press.) WASHINGTON, Sept. 26.—The establishment of standards for many kinds of textiles will enable the consumer to purchase intelligently, believes Ruth O'Brien, of the Bureau of Home Economics of the Department of Home Economics of the Department of Agriculture. A report she submitted to the American Home Economics association shows that definite progress toward this end is being made.

A project for the establishment of standards for sheeting is now before the American Engineering Standards Committee to be considered this month. The purpose of this is to enable the woman who buys sheeting to specify the grade she is willing and able to buy with the assurance that the particular fabric she purchases, whether of high, medium or low grade, conforms to the minimum standards of quality for that grade.

Aid for the consumer is also forthcoming from many other directions. Attempts are being made to develop a system whereby degree of color fastness of a fabric to light and washing will be specified to the consumer. Facilities for testing fabrics are increasing.

Research is being conducted by commercial organizations to determine the effects of laundering and dry cleaning upon various kinds of fabrics.

New fabrics and finishes and new fibers are constantly being brought into use increasing the necessity for expert guidance for the consumer.

Young Girl Scales High African Peak

(By The Associated Press.) KINMANJARO, East Africa—Miss Sheila Macdonald, a 22-year-old London girl, has just won the distinction of being the first woman of the five persons who have succeeded in climbing Kilimanjaro, the highest mountain in Africa. The summit is 19,321 feet high.

Miss Macdonald is a daughter of Claude Macdonald, Lancaster Gate, London, a well-known member of the Alpine club, who has climbed many famous peaks. She began her mountaineering in Scotland and Switzerland when she was only 12.

She had to penetrate through many miles of wild and unopened country to reach the base of Kilimanjaro.

This mountain came into prominence when in 1890 the country now known as the British Tanganyika territory, was ceded to Germany. The Kaiser wished to possess the highest peak in Africa. The boundaries were drawn, therefore, to include it in German East Africa.

QUAILS IN TOWN

WEATHERFORD (AP)—Postal clerks here report having seen a covey of quail on the postoffice lawn. They were flushed by a sneeze from a hayfever victim.

Intriguing Loops

Thread lace, dyed to match the hat it trims, forms the "loop" as Paris calls the new face veil. Bottle green lace gives elusive beauty to the green velvet turban shown.

FRECKLES And His FRIENDS Really? By Blosser

Comic strip panel 1: A man with a large nose and a woman are talking. The man says, "FOR CRYIN' OUT LOUD! LOOK AT THAT SKINNY MAN, WOULD YOU!!" The woman replies, "DON'T TALK SO LOUD-HE MIGHT HEAR YOU-SEE! HE IS THIN!"

# Markets

LOS ANGELES, Sept. 26.—There continues to be a marked decline in the per capita consumption of meat foods, and ever so often it seems worth-while to stand off and look at ourselves, so to speak, to find the reason why.

In 1907 there were 2 1/2 meat food animals for each person in the United States, while in 1927 there is only 1 1/4 for each person. However, due largely to more efficient methods in production and distribution and through education work carried on, a larger actual tonnage of meat is now being produced from a smaller number of animals. Also, the female animal population represents a much larger percentage of the total animal population resulting in a substantially increased birth rate per thousand animals of livestock population.

Despite the fact that our meat food consumption is constantly on the up climb, with around 8 million pounds of beef being consumed annually compared with around 5 million pounds ten years ago, still our per capita consumption continues to dwindle. The increased figures in volume do not depict a tendency toward greater per capita consumption, but is only the natural result of increased population.

The weak spot in merchandising meat food animals and their products is the lack of concerted action toward keeping the desirability of such food stuffs in the public eye. The substitution of other food-stuffs for meat on the American table is of vital importance to every livestock producer. There is the keenest competition between all classes of food stuff, and meat, on of the most worthy items, is not receiving its just due.

The producer of livestock in days gone by has taken a rather self-sufficient attitude, feeling that his product would sell itself, being, as it is, a human necessity. To some extent this has been true, but there is a distinct spread between the point of actual necessity and the buying power of the American public. This spread is the result of advertising—largely in newspapers and periodicals—and here may be found the reason for the strides that have been made by the producers of commodities who have resorted to salesmanship and publicity in encouraging the public to use their products instead of meat.

From what has been accomplished by producers of other lines, there can be no question but that an investment in public opinion would return itself many-fold to the livestock producer. The expense would be nominal when scattered throughout the industry, and an increase of even a pound per annum in the per capita consumption of meat would roll itself into a staggering sum. Several campaigns along "eat more meat" lines are under way, and no doubt will become as successful as have similar efforts featuring other food-stuffs.

## Jury Answers Plea of Indicted Mother

(By The Associated Press.)  
MT. VERNON, Ill., Sept. 26.—In answer to her tearful plea "Give me death or send me back to my children," Mrs. Elsie Sweetin was acquitted Saturday at the second trial for the poison murder of her husband three years ago.

## SCHOOL BUYS MIMMOGRAPH

In order to follow the most approved method of distributing examination questions and class instructions, the Central high school needed a mimeograph machine.

The students and faculty members talked the matter over, then contributed the amount necessary—almost \$200—to buy the latest type of machine. A wide use for the versatile mimeograph is expected.

## OUT OUR WAY

—By Williams

WHY MOTHERS GET GRAY. SMOKED FISH.

## FEATURES FROM OTHER LANDS

### OLD FASHIONED BOOTS WON'T BE TRIFLED WITH

LONDON, Sept. 26. (P)—London's fashionable women will spend four or five days this winter doing nothing but lacing up high boots. At least, this is the significance of the fact that the old-fashioned high-laced boots which will be the fashion this winter take six minutes and 20 seconds to lace.

The manager of a department store here held a stopwatch while a salesgirl laced up a pair of the high boots. He found that it took her nearly six and a half minutes to perform this task. Adding together this daily figure he calculated that during the season four or five waking days would be consumed merely in the process of lacing high boots, not counting the time of unlacing them.

Russian boots will not be worn this winter in London, so the fashion authorities have decreed with the sentence that "Russian boots are as dead as Tutankameh." Women, they say, want a boot which will shape to the ankle.

### KING GEORGE YEARNS FOR RIDE ON BUS TOP

LONDON.—One of the ambitions of King George is to ride on top of a London omnibus some day from one end of the town to the other. If this dream is to be realized within the next few months, the King may board a bus directly in front of Buckingham Palace, as buses now stop near the Palace's front gates, which is something buses have never done before, even in the days when buses were drawn by horses.

Buses have been brought to the front door of the King's town residence owing to changes in the West End traffic due to the tearing up of Piccadilly, which is undergoing repairs for the first time in 16 years.

One of the favorite out-door pastimes of the King of Spain, when he is in London, is to mount a bus top incognito and ride about the town seeing the sights and hearing what the people are talking about.

Queen Victoria always longed to have a ride in London's underground but never did, and King Edward had hopes for years of mingling with the crowds at the races, without being recognized, and making some bet himself, but pro-

### ONLY WOMAN IN PARTY OF 833 METALLURGISTS

LONDON.—Miss C. F. Elam, D. Sc., said to be the only woman metallurgist in the world, had 252 escorts on her trip to Canada to the Empire Mining and Metallurgical Congress in Montreal.

### THREE CENTURIES ART SENT TO VIENNA SHOW

LONDON.—Some 130 paintings and 137 miniatures, together with a large number of drawings, representing the best productions of British artists during the last three centuries, have been sent to Vienna for an exhibition lasting two months. The vans containing the paintings were sealed by an official of the Austrian Legation and are not to be unsealed until they reach Vienna.

The sending of these paintings, which have been loaned by well-known Englishmen, is in answer to the courtesy of Austrians who sent their best tapestries to the Flemish-Belgian exhibition in London earlier this year. Among the pictures is Romney's portrait of Mrs. Davenport, which brought \$300,000 at an auction.

### LONDON HAIR SNIPPER LOSES HIS SCISSORS

LONDON.—Andrew McKenzie, 34, is serving his fifth sentence for snipping off tresses of young women. His most recent offense occurred in a London omnibus and brought him a penalty of six months at hard labor.

McKenzie testified at his trial that he stole 10 shillings from a man in order to buy scissors to cut off the hair of his recent victim, who lost eight inches of a plait which she wore hanging down her back. The girl had never seen the snipper before.

### STAGE SIGHT LEADS TO WEDDING BELLS

LONDON.—"Love at First Sight" might be the title of the romance of Ivor Vinton and Doris Bentley, two of the principals in the play at the Hippodrome theatre, here, they have just become engaged.

Vinton and Miss Bentley met in 1922, when they were playing in opposition pantomimes. Vinton sent a first-night congratulatory telegram to every member of the firm show but Miss Bentley, whom he did not know. When he realized his omission he wished to apologize and sought an interview with the slighted actress, which brought about their friendship.

Although since 1909 all that is necessary is to hold the Bible in the hand while repeating the oath, most people, so say a solicitor here, seem to feel that something is missing from the ceremonial unless they have solemnly kissed the Book.

### MACHINE RECORDS BIRD-FLIGHT MOVEMENTS

PARIS, Sept. 26. (P)—How birds fly is now being determined by attaching minute recording instruments to homing pigeons. Their speed variations, wing strokes and other movements are measured.

Man himself may fly without a motor some day, think some commentators, as a result of this study. They say man can exercise more power than should be needed for flying, if that force can be utilized as the birds use it.

Three aerodynamics experts recently gave the Academy of Science a report on experiments with their tiny instruments. It is a mechanism 2 4-5 inches long, 1 1-5 inches wide and 1 1-5 inches high and weighs two ounces.

### FRENCH MUSICIANS OBJECT TO AMERICAN JAZZ BOYS

PARIS, Sept. 26. (P)—American college boys who jazz their way about Europe, playing dance music to meet their summer tour expenses, have touched off some French indignation.

French musicians say they don't mind professional competition but they balk at being crowded out of their seaside resort jobs by amateurs who cut rates and play only during the height of the summer season when the professional orchestra ordinarily have a harvest.

French musicians, so far, have made no organized protest, but have asked the newspapers to express their feelings. They hope the government may be able to frame some regulation that will prevent those who come as tourists from taking employment.

Madame Rosika Schwimmer, noted feminist and peace advocate, who was one of the leaders of Ford's peace ship, recently charged that Ford's own advisors wrecked the mission to European belligerents and then contrived to place the responsibility on her.

Henry Ford is without peer as a heel and toe polka dancer, says Bob Sherwood, ex-circus clown and an old friend of Henry's.

## Menus for the Family

By Sister Mary

**BREAKFAST**—Grapes, cereal, cream, salt codfish balls, corn meal muffins, carrot marmalade, milk, coffee.

**LUNCHEON**—Chicken souffle, graham rolls, creamed celery, baked pears with chocolate sauce, milk, tea.

**DINNER**—Roast loin of lamb, rice, potatoes, grilled tomatoes, macedolone of vegetable salad, peach parfait, milk, coffee.

The chicken souffle suggested in the luncheon menu is made from the remains of the roast chicken used for dinner the evening before. This is one of the most attractive ways to use up the left-overs of meat, fish, or vegetables and of course the eggs required in the dish add to the nourishment.

### Chicken Souffle

One and one-half cups milk, 2 tablespoons butter, 2 tablespoons flour, 1/2 cup stale bread crumbs, 1 scant teaspoon salt, 1 tablespoon minced parsley, 1/8 teaspoon pepper, 1-1/2 cups finely chopped cold cooked chicken, 3 eggs.

Melt butter, stir in flour and slowly add milk, stirring constantly. Season with salt and pepper and add bread crumbs. Bring to the boiling point and cook two minutes, stirring constantly. Remove from the fire and add the parsley, yolks of eggs well beaten, and chicken. Mix thoroughly and fold in whites of eggs beaten until stiff and dry. Turn into a buttered baking dish and bake forty minutes in a slow oven. Serve at once in the dish in which the souffle was baked.

### PAMPA SPIRITS IN DEMAND

According to Mayor F. P. Reid, there is a strong desire at this time of year for young women to attend fairs and Lindbergh celebrations to represent Pampa.

Abilene and Wichita Falls recently wrote to request the presence of a "Pampa Spirit." At this time, however, available "spirits" are either busy or are in school, and all plans to send representatives have failed.

Mayor Reid also is in demand, but cannot spare the time to attend all of the gatherings to which he is invited.

Commercial aviators flew 12,377,933 miles, carrying 395,646 passengers in the first six months of 1927, according to the report issued by the Department of Commerce.

For the first time in the history of the Dixie series, that coveted cup has been won in four consecutive games. That honor goes to Wichita Falls. The Spudders overcame a one-run lead in the seventh to take the deciding game, 4 to 2.

Try a Daily News Want Ad First.

## Spudders Are Dixie Champs; Defeat the Pelicans Sunday, 4-2

(By The Associated Press.)  
**NEW ORLEANS, Sept. 26.**—The Wichita Falls Spudders of the Texas league, crowned themselves champions of Dixie here Sunday by taking the fourth straight game of their series with the New Orleans Pelicans, Southern association pennant winners, 4 to 2.

Working with machine-like precision in every department, the Spudders satisfactorily squelched a final ninth-inning rally of the Pelicans as they had all other rallies to settle the crown firmly upon their brow.

Milton Steengrate, like his predecessors in the box for the Spudders during the series, went the entire route. He surrendered eight hits but the good work of his backers aided him in keeping them sufficiently well scattered to keep the base circles down to a pair.

Six hits were enough for the Spudders to win. Coupled with 3 errors the sextette permitted four Spudder runners to trot across home plate.

The first five innings were scoreless, "Dauntless Dave" Danforth sending the Texans down in one two three order. Steengrate trod more dangerous ground through the first five innings and seven Pelican batters found their way down the base paths only to have the road to the home plate blocked by the Spudder fielding and pitching ability.

The first score came in the sixth inning, when Steengrate, with two men on and two strikes already called, drove a long low fly against the right field fence and trotted to second. Lafayette followed with a grounder through Davis and Steengrate scored.

The Pelicans' only runs came in the sixth inning. Morgan beat out a hit to third, Davis then doubled to the right field stands and Whitney, who followed, drove a deep triple to centerfield, scoring Morgan and Davis. The Pelicans' rally died almost as suddenly as it had begun, Vick and Gardner, the next two batters being easy outs.

The rally of the Spudders was not so brief, however. The force of their

Johnny has a nice backhand return, and tennis experts predict a great future for him.

sixth inning drive, carried through up to the seventh. Benton, the first man up, drove out a double through third. Lamb singled, sending Benton to third and Jenkins followed with another single, Benson scoring. Another single by Swenson sent Lamb home and Jenkins scored on a fly to Morgan in right field. The scoring ended here, but each succeeding inning brought its threat. New Orleans piled up two hits in the eighth and pushed Morgan to third base, but Whitney went out on a fly to Turgeon and Vick grounded out to second. The Pelicans tried two pinch hitters in their half of the ninth, Wyatt hitting for Gardner and Benny Karr appearing for Danforth, but neither were effective.

## Amarillo Game Revealed Strength Of Pampa Eleven

Much credit is due Coach Verde Dickey and his Harvesters for the great battle they put up against Amarillo Saturday against the Amarillo Sandies. Fighting against great odds, the team got in there and fought to the last down with a determination that will carry them through many hard games.

Although beaten, the Harvesters were by no means trounced as the large score indicated. Comparing the two teams on straight football played the local team ranked head and shoulders over their heavier and more experienced opponents. Then the Sandies used almost three teams during the game, while the local squad used only three substitutes.

To pick a star of the game would be impossible, as every member on the team played his best. A slippery ball and a wet field made high-class football impossible, but given a good playing field the Harvesters could hold their own against the Sandies.

Amarillo sport writers, who witnessed the game from the press box, were loud in their praise of the Pampa squad. They have picked the local squad to carry away the conference title and to defeat all comers this fall.

The faithful pep squad, under the direction of Miss Carter and Lucille Mooney, is not forgotten. About 30 strong, the backers of the school team cheered their team on all through the game and more than once the Harvesters were seen to buckle down when that yell of "Hold that line Pampa" rang across the field.

## Postponed Card Will Be Presented Next Wednesday

Promoters Gober and Böien have decided that the weather is unfit to hold the big boxing card tonight, but state that the big event will be staged Wednesday night weather permitting.

Barnie Gross of Omaha, Neb., will head the bill, with Ted Hargrove as his opponent in what should be the hardest bout yet witnessed at the local bowl. Both boys weigh 169 pounds and can slug with the best.

Hargrove was a sparring partner of Jac. Dempsey's in 1926 when the latter trained for his battle with Tunney.

Reg King and Battling Walker will supply the second main event, while three good preliminaries are scheduled for the big card.

G. C. MALONE Ambulance Service, Phone 181.

## Mud and Water Diet Is Prescribed By Coach Dickey

Pampa Harvesters will soon be in shape for rice harvesting. Cold and mud may drive many squads to indoor "skull" practice, but the Central high squad is due for a stiff workout on Ayres field this afternoon.

Even in wet weather, the local field is faster than most of the grid-irons of the Panhandle, owing to the heavy turf. The slippery ball gave the locals a world of trouble Saturday in Texan park, and Coach Dickey is determined to accustom his charges to mud and water.

Wheeler will come here Friday for the first Class B conference game, and the Harvesters must not slip and lose their excellent chance at a championship. Wheeler took the short end of their opening game with Shamrock, but may give trouble. Last year they held the Pampa boys to nothing in the first half.

Another big crowd is desired Friday afternoon to keep up the pep of the local eleven. There probably will be a few changes in the game this week as Dickey tries out some of the reserves. The men emerged in fair condition from the Amarillo tussle, with the exception of Carlton, who hurt an ankle which he must shield for a few days.

## SPORT TALK

Old Man Winter arrived last night and said that it would be necessary to postpone the big fight card at the Pampa Athletic club until Wednesday night, weather permitting.

Cold weather doesn't mean a thing to the Harvesters, who are out to whip every thing that comes their way. Coach Verde Dickey has his men out for practice this afternoon to keep them from getting stiff from their strenuous game at Amarillo.

The Pittsburgh Pirates have found the old batting eye and took a double header from Chicago, 2 to 1, and 6 to 1. Aldridge allowed the Cubs only four hits in the first game, while Kremer let them down with seven safe bingles in the closing game.

A double win yesterday put the Cardinals a full game ahead of the Giants for the second place position, when the Giants played a tie game with Brooklyn.

After one of the closest races ever witnessed in the American association, Toledo won her first flag yesterday with a win over Indianapolis.

## Randall County To Collect \$6,596,385 In Taxes This Year

CANYON, Sept. 26.—Assessor J. M. Fite has completed the tax rolls for Randall county. The total valuation this year is \$6,596,385, and \$152,888.16 will be collected in taxes.

The city valuation of Canyon is placed at \$1,276,000.

Telegraph and telephone lines in Randall county are valued at \$40,540. Among the taxes to be collected will be \$25,766.39 in the form of school taxes.

MARCELLING 50 cents, Phone 2677.

## Twelve in Row

Phil Corbett, a Cleveland featherweight, is being hailed quite a bit for bigger and better opponents on account of a run of 12 wins in a row in the past few weeks. Corbett included Phil Seiler in his victories a few weeks ago.

## TRAVELING HEALTH UNITS AID INFANTS IN RURAL DISTRICTS

Dr. Elizabeth M. Gardiner

DR. GARDINER WATCHES OVER THE WELFARE OF UP STATE NEW YORK'S 100,000 BABIES

FOR THREE YEARS HERE ASSISTANTS TRAVELING THROUGH RURAL DISTRICTS, HAVE ADMINISTERED AID TO 75,000 MOTHERS AND BABIES

ALBANY, N. Y., Sept. 26. (AP)—A woman watches over the welfare of up-state New York's most important crop—its babies.

She is Dr. Elizabeth M. Gardiner, director of the Division of Maternity, Infancy and Child Hygiene. It is her duty to see that thousands of mothers and children, who might otherwise go without proper care, have the benefit of the right kind of medical advice at the right time.

Dr. Gardiner has placed her task on a business-like basis. How her work is accomplished she explains as follows:

"When a state tries to improve its apple crop it usually begins in one of several localities, and keeps the other apple growers of the state informed about the progress made."

"This is exactly the way New York has gone about improving the crop of babies. At the present time up-state New York has more than 100,000 babies a year, and in New York City the number is even greater."

In three years Dr. Gardiner and her assistants have reached about 75,000 women. Aid is administered through demonstration units that travel in the rural districts, and through community health centers headed by public health nurses. These are financed by local, state and federal funds.

"Mothers are given attention and advice during the prenatal period and also at the time of birth and in the nursing period," explains Dr. Gardiner. "Children are examined during infancy and early childhood and their mothers are instructed in accordance with the findings. Nurses are supplied to supervise the 'follow up' work, placing the children under the care of the family doctor and seeing that necessary treatments are instituted and health defects corrected."

Each case is referred back to the attending physician for proper treatment.

## Pioneer Carbon Black Firm Has New Method In Plans for Plant To Be Erected in Pampa Field

An innovation in carbon black manufacture is embodied in the plant to be erected by the Cabot company, one of the largest concerns of its kind in the world. The huge plant will be on the Schafer ranch in section 86, block 4, of the I and G. N. Survey, Carson county, about a mile east of Skellytown.

Houses for the workmen have been erected and the excavation work for the buildings completed. The huge plant will consist of four units of a different type from any now under construction or already completed. The buildings will be of steel, are welded throughout.

Each of the four units will consist of 40 hot-buildings, or houses where the carbon is made. The plant will be the first ever electrically driven. The units will be equipped with small motors instead of the usual centrally driven shaft.

Instead of having several collecting houses for the carbon, the company will erect one large building for that purpose and will use different methods of collecting and packing.

The gas used for the making of the carbon black will be obtained from the Schafer gas plant No. 1 of the Skelly Oil company. The line conducting this gas will have a capacity of from 40 to 50 million cubic feet a day. It is planned by the company to have the plant in operation by November of this year. The buildings alone will cover 13.6 acres.

It is not generally known for what

purpose carbon black is used. Practically 75 per cent of the carbon black manufactured is used in the making of automobile tires. As early as 1900, English rubber makers were using carbon black manufactured by the Cabot company. The first carbon black used in tires in the United States was in 1916 when the Goodrich people commenced using it in their Silvertown tires. Since that time all rubber tires are made with carbon black as one of the ingredients.

Another use for the carbon black is in the making of printers' ink. The blocks of carbon used in carbon lights are made from carbon black.

The Cabot company has a large plant at Brockton, but has moved its office to Pampa, from which both the local plant and the Brockton plant will be controlled.

R. G. Allen is in charge of the local office. Godfrey L. Cabot, president of the company with offices in Boston, Mass., was a visitor in Pampa Thursday and Friday. He made a tour of inspection of the works and the local field. He was much pleased with conditions in Pampa.

A prose version of Oliver Goldsmith's "Deserted Village," antedating the poem by eighty years, has been reported found by Prof. Randall S. Crane of the University of Chicago.

# BILLY EVANS Says

**Ruth Is Record-Breaker**  
 Breaking records has become almost a part of Babe Ruth's daily routine. In any game that he fails to do some of his copyrighted hitting, he sends the fans away disappointed.

During the greater part of the season, he has kept part of the season, he has kept fanning wondering if he would be able to shake off the challenge of the youthful Lou Gehrig, for the title of "Home Run King."

As I write, Ruth has 55 circuit swats to 45 for Gehrig, a margin of 10 home runs with about two weeks to play. It begins to look as if the Babe is still supreme in the art of "slugging."

Now, with the Gehrig challenge practically answered, baseball fans are pondering over Ruth's chances to break his 1921 mark of 59 home runs. That looms as quite a task.

It was rather fitting that when Ruth made his 50th home run of the present season it gave him the honor of breaking a record that has stood since 1884, a matter of 43 years.

When Ruth reached the half century mark, it made New York's total of home runs for the 1927 season 141, one better than the mark of the Chicago Nationals in 1884.

### Played in Most Series

No player in all the history of baseball ever carried the responsibility that Ruth does in a world series. Random looks for him to come through with a homer or two and failure to do so makes a lot of folks regard him as a "bust," which, of course, is very unfair.

In a glance over Ruth's record as a world series performer, I find some very unusual facts, not only to his batting prowess but pitching as well. Ruth holds the record for long-time services as a world series veteran. When he starts the 1927 classic, it will be the eighth world series championship in which he has played.

In three world series he has starred as pitcher. In the others, he has played the outfield and featured with his home run hitting.

If Ruth is fortunate in being in a hitting mood this fall, he will have established a bunch of records that should stand for years to come.

### Some of His Feats

Here are a few of the world series feats that carry the name of Babe Ruth:

He holds the record for most home runs made in a game with three. These were made last fall against the St. Louis Cardinals.

He holds the record for the most home runs hit in a world series competition with eight.

He holds the individual record for the most runs scored in a world series game with four, the most extra bases on long hits in total series with 90; the most extra bases on long hits, one series, with 12; the most extra bases on long hits in one game with nine, which was on the day Ruth made three home runs.

Not only does he hold these unusual batting records but he goes to the other extreme with 11 bases on balls in one series and 26 passes in a total series.

### A Pitcher, Too

Then for a minute consider these worth-while pitching feats:

Ruth is credited with pitching the longest world series game ever played, a 14-inning victory over Brooklyn by a 2 to 1 score.

Incidentally he is one of the few pitchers to have scored a 1-0 shut-out, beating the Chicago Cubs by that score in 1918.

The Babe has pitched the most innings in which no runs have been scored by the opposition, 29.

These are the outstanding feats of Babe Ruth as a slugger and pitcher which readily show why he is baseball's most colorful player.

"All the Screen Can Offer" MARIE PREVOST IN "MAN BAIT" ISN'T THAT GREAT?

SOMETHING TO THINK ABOUT

By F. A. WALKER

THE OLD HIGHWAY

IT STRETCHES out before you packed hard by the millions of tired feet that have climbed its hills as you are climbing to reach the goal; far off there in the hazy distance.

You sometimes strain your eyes in looking forward, and wonder whether your strength will endure until the end of the monotonous journey.

In such moments there are evidences of weakness in your heart, lack of faith, and inclination to loiter a while in the luring shade of the trees by the wayside, where the birds are singing in sheer joy of existence.

Then comes the thought that this is not the time for rest, but the hour for serious endeavor, so you hold your place in the waying throng, call again upon your vanishing courage and press forward determined to win.

You vision the worn, resolute, dust-covered humans who before you were born passed along this same old highway, refusing to falter in their march until they had clasped to their breasts the coveted prizes they were seeking.

You remember how as a boy or a girl you thrilled with eager ambition as you read the stories of these humans' achievements—how you then resolved to emulate their examples and write your name beside theirs.

But now that your dreamings are over you begin to doubt your ability to do.

You realize that to make way along the ancient highway must call up all your power of will, your patience and hold firmly to your high purpose. You must work, work, work!

There is no other way by which you can attain your pictured goal. There are no back doors through which you can sneak and grab your prize, for the world is on guard taking note of your smiles and frowns, your deportment and fervor, or laxity and possible craftiness.

And the world and the old highway, in spite of all sayings to the contrary, will give you liberal reward, provide you hold steadfastly to truth, honor, loyalty and diligence, as did the great men and women whose bodies have mingled with the dust, but whose names still live to shine resplendently till the end of time.

FOR THE GOOSE

IT TAKES more than honeyed words to give you a sweet taste in your mouth.

A lover makes life a jewel box for a woman, but he keeps the key.

A woman likes to see the lovelight creep into a man's eye. But she likes to have her best friend see it, too.

FOR THE GANDER

The guy that wants to chase another fellow over three fences has got to climb over at least two himself.

No man feels he can really understand a woman—especially if he is married to her. But every woman thinks she can understand a man—particularly if she is married to him.

A lion's skin may be useless, but it ain't cheap.

Why is it the parts of a newspaper written for women is full of articles on How to Hold a Husband, but nobody ever saw a column on the men's page devoted to holdin' a wife? (Copyright.)

MOODY TO SPEAK

DENTON (P)—Governor Dan Moody accepted an invitation to deliver the principal address at the celebration of the opening of the new Denton municipal building and city auditorium October 11. The building, to be completed this month, will cost \$125,000.

SON OF BEAUTY IS SUSPECT IN O'HIGGINS CASE

(By The Associated Press.) DUBLIN, Sept. 26.—Eleven years after the execution of her husband for treason, Mrs. Maude Gonne McBride, noted beauty of a generation ago and the inspiration for a famous poet's verse, has come again to public attention with the arrest of her son in connection with the murder of Kevin O'Higgins.

In her girlhood, when she was Maude Gonne, Mrs. McBride was the toast of all lips. W. B. Keats made her the subject of several poems.

She married Major McBride, who was second in command of the Irish Brigade which fought against the British in the Boer war, and she attained note as one of Ireland's most fiery revolutionaries, although she is an Englishwoman. Her husband was executed after the Irish uprising of Easter Week, 1916, but his beautiful wife continued her revolutionary activities, and her attractiveness and dash won her recognition everywhere.

Now her son, Sean McBride, has been arrested under the new public safety act as a suspect in the O'Higgins murder.

Postcard Reveals Miner's Decalogue

(By The Associated Press.)

SACRAMENTO, Cal.—An illustrated post card of gold rush days, dated 1854, one of the first written to "folks back east," has come into the possession of Miss Eudora Garoute, state historian.

"Ten commandments for the Argonauts" are illustrated by Charles Nahl, pioneer artist. Among them are these:

"Thou shalt have no other claim than one.

"Thou shalt not go prospecting before thy claim gives out; neither shalt thou take thy dust to the gaming table, for monte, roulette, faro, lansquenet and poker will prove to thee that the more thou puttest down the less thou takest up.

"Thou shalt not remember what thy friends at home do on the Sabbath Day. Six days thou mayest dig or pick all thy body can stand. On Sunday washest all thy dirty shirts, darnest all thy stockings, tap thy boots, makest thy bread and boll thy pork and beans.

"Thou shalt not grow discouraged nor think of going home before thou hast made thy pile.

"Thou shalt not steal pick or shovel from thy fellows, nor pick out specimens from the company pan and put them in thy mouth.

"Thou shalt not tell false tales about good diggings in the mountains to thy neighbors to benefit a friend who hath mules and provisions to sell.

Russia's Pompeii Undermined by Sea

(By The Associated Press.)

KERCH, Crimea.—The ruins of Kerch, the site of the ancient Greek Panticapeum, often called the Russian Pompeii and Herculaneum, are rapidly decaying, and the Black Sea is gradually undermining the remnants of ancient Greek and Roman towers and walls.

In the fourth and fifth centuries before Christ the city was a flourishing trading center, the envy of northern barbarians and greedy merchants from Italy, Asia Minor and even Egypt. The city was seized in turn by Mithradates and Barbarians before succumbing completely to Rome. In the fifteenth century it became the prey of Turks and since has fallen into decay.

No excavations have been made since 1914. The ancient city occupies a beautiful site, as all Greek cities did, overlooking the Black Sea and is strewn with ancient Greek foundations, remnants of Roman baths, blocks of white and rose marble, and towers and walls of a later origin.

Legal documents of federal court transactions between the years of 1855 and 1860, showing that Abraham Lincoln was associated with more than 100 cases were unearthed in the federal building of Springfield, Ill., by Paul M. Angle, secretary of the Illinois Centennial association.

James Henry Higgins, who was elected governor of Rhode Island at the age of 30, died at his home in Pawtucket, R. I., in his 52nd year.

Twenty-four hour aerial passenger service between New York and Rome is possible, says Signor Caproni, of Milan, Italy, designer of airplanes.

Mother's Cook Book

With the same letter heaven and home begin. And the words dwell together in the mind: For they who would a home in heaven win Must first a heaven in home begin to find. —Joseph Vary.

SUITABLE FOODS

AS THE apple is now almost a year-round fruit, because of cold storage and better transportation, it finds a place in some form in almost every day's menu.

Cover the bottom of a buttered baking dish with a layer of sliced apples, sprinkle with one tablespoonful of cinnamon well mixed with one-half cupful of brown sugar, dot with bits of butter. Alternate these layers until the pudding dish is full. Cover and bake until the apples are soft. Remove to brown the top. Serve hot or cold with lemon, hard or elder sauce.

Springtime Sandwiches

Press the yolks of four hard-cooked eggs and finely chop the whites. Chop fine small red radishes unpeeled—there should be one-half cupful—also chop enough green onions to make half a cupful. Season with salt and pepper and moisten with salad dressing. Spread thin slices of bread with butter, cover with a lettuce leaf that has been dipped into French dressing and drained. Spread an equal number of slices of bread with the egg mixture and put together in pairs. Trim off the edges and cut into triangles.

Dates, Fig and Prune Sandwiches

Remove the stones from dates and large fancy prunes. Have an equal weight (one-half pound of each) dates, figs and prunes. Pass them through the meat chopper. For each cupful of the mixture allow half a cupful of walnuts, chopped. Moisten with orange marmalade and use as a filling for buttered brown bread sandwiches. Cut into triangles and serve with afternoon tea.

College Girl's Sandwiches

Grate rich cheese or mash three Neufchatel cheeses with a wooden spoon and mix with enough creamed butter to make a paste. Add one dozen finely chopped olives, chop three pimentoes and put through a sieve; add the pulp to the cheese mixture. Now add one-half cupful of outmets, season with salt, paprika and cayenne. Spread on white bread, trim and cut in any desired shape.

GIRLIGAG

"Americans want more money for chewing gum than for books," says Lowbrow Loretta, "but after all that isn't strange. Chewing gum doesn't leave a bad taste in your mouth."

Chinese Fail to Find Promised Prosperity

(By The Associated Press.) FOOCHOW, Fukien Province, China.—The people of Fukien are wondering where is to be found all the prosperity promised by the Nationalists when they swept across this province some months ago.

Taxes are higher than last year. Poppy planting and opium production is as widespread as it was twelve months ago. In the cities the labor unions have forced higher wages, but the ordinary coolies and peasants are no better off than before.

Since last December there have been five changes in the provincial government as administered by the Nationalists. At present an admiral of the Chinese navy heads the Fukien commission, but the military general formerly in charge has refused to move out until he receives a million Mexican dollars and so far the Fukienese have paid him only one fifth of that amount.

General Lu Hing Bang, former bandit chief, is in control of several coast counties.

French Chefs Cut High Cost of Living

(By The Associated Press.) TOULON, France, Sept. 26.—The world can cut down the high cost of eating by the adoption of the Provencal scheme of cooking. This is the informal decision of the chefs of southern France.

The one maxim of the Provencal cuisine is that one well-cooked, savory dish makes a meal. Economists agree that an average household in Provence eats better and spends less than in any other district of France.

"The economic arguments is favor of the Provencal scheme are unanswerable and therefore not worth treating," said one famous chef. "Everything in the world revolves around the question of food. It seems, however, that there are many people in the world who claim they can not afford to eat well. The true gourmets and epicures say that a Provencal one-dish meal is the height of perfection. Provence knows that the cost is minimum. But the preparation of a genuine Provencal pot-au-feu is a task as difficult and painstaking as the preparation of the finest dish served in any restaurant in New York, London or Paris. The dish not only must be tasteful, but also as nutritious as a three-course meal."

At the chefs' dinner each person was allowed one small appetizing dish, which was followed by his one-course meal a la Provencal.

Provencal onion soup made with a duck base and thickened with toasted bread, browned onions and cheese was one of the most popular dishes. assoulet, a la Languedocienne was another. This dish is made of white beans, goose, onions, tomatoes, beef stock, fresh pork and sausage. Other typical Provencal dishes included pot au feu de la Midi, flet de boeuf a la Provencale, rabbit pilaffe and aligoussau, the true Provencal bouillabaisse.

TO COUNT LIVESTOCK

DENTON (P)—A census of the livestock in Denton county will be taken by the Farm club, aided by other agencies of the county. The census is expected to form a working basis for the future development of livestock raising in Denton county.

SCHOOL DAYS

Sweden's Light Bills Dwindle In Summer

(By The Associated Press.)

STOCKHOLM, Sweden, Sept. 26.—Summer night in Sweden favors economies in the municipal gas and electricity departments. From May 30 to July 10 the nights in Stockholm are so bright that there is no need for artificial street lighting, except in the busiest downtown thoroughfares where every second lantern is kept burning.

The sun is out of sight only for four or five hours, and even at midnight it is not darker than ordinary twilight. It is quite possible to sit in one of the parks and read a newspaper until 11 o'clock in the evening.

Belgian Will Sound American Carrillons

ALBANY, N. Y., Sept. 26.—Joseph Denyn, famous carollineur of

Malines Cathedral, Belgium, will be master of ceremonies at the debut of Albany's municipal carillon of 60 bells this month.

Denyn, sometimes called the "Faderewski of the bells," is to play in several cities during his first visit to America. He will give concerts on the Rockefeller chimes of the Park Avenue Baptist church, New York, at Andover, Mass., Morristown and Princeton, N. J., and perhaps at Ottawa.

Thirty thousand residents of Albany contributed to the city's new carillon. Each bell is a memorial. The bells will sound first on September 18, the sesquicentennial of the first battle of Saratoga.

LeFors Petroleum Co., Inc. Capital Stock \$100,000

LOCATION—

Shaw No. 1 Travis Leach Survey 150 Acres Gray County, Texas. Elevation is 2834. Well Drilling 1900 feet.

Table with 2 columns: Elevation, Top Lime, Lime Above Sea Level and values 2834, 2000, 834.

We are submitting the names of the following reputable well known citizens of the Panhandle who manage the LeFors Petroleum company:

OFFICERS:

- DR. A. W. COFFIELD President
J. M. SHAW Vice-President
GEO. M. CLARDY Treasurer
MEL B. DAVIS Secretary

DIRECTORS:

- A. W. COFFIELD
J. M. SHAW
GEO. M. CLARDY
MEL B. DAVIS
GEO. THUT
E. B. HEDRICK
CHAS. THUT
F. H. BOURLAND
E. GUBLEMANN
B. E. FINLEY
E. R. GLASS

Indications geologically are most promising for a big producer. This property is in the trend of production now being sought by the major oil companies. LeFors Petroleum Company lease is offset by leases owned by Prairie Oil and Gas company, Gulf Production Company and Texas Oil Company.

LeFors Petroleum Company is under capable management and well now drilling is due for early completion. We are offering a limited amount of stock at par \$10.00 per share. This offer is subject to cancellation by LeFors Petroleum Company.

CLIP THIS COUPON NOW!

Gentlemen:

I hereby subscribe for \_\_\_\_\_ shares of LeFors Petroleum stock at \$10.00 per share. Find check or money order enclosed to cover same. Please forward shares to my address given below.
