Experts Striving to Make Television Fit Pocketbook

A lusty young scientific giant—Television—strains at the chains that bind him. What are the links in this chain—what are the obstacles that prevent you from immediately enjoying visual radio in your home?

By MORRIS GILBERT, NEA Service Staff Correspondent. NEW YORK, Aug. 17.—American television, if it is to fulfill its promise, must first kick over a pretty big set of obstacles—the cost of programs, the cost of receivers, the broadcasting limitations of shore waves and man-made static.

If television could be commercialized as readily as was sound broadcasting in its crudest stages, the other obstacles would resolve themselves in short order. Immediate commercialization is impractical because of the difficulty of insuring advertisers an audience. This is due to the cost of receivers (in England they sell for \$300 and would cost approximately the same here in the beginning), and because the short waves that have to be used for transmission can be received only within a 20-mile radius. Television networks are impractical because present landline facilities, which do a magnificent job of linking sound transmitters, just won't do to carry pictures from city to city.

There are two possible methods of overcoming the transmission barrier. One is by installation of special cables, called "balanced cables," like the present "coaxial cable," which links Philadelphia and New York

The make-up of performers for appearance before the television camera has been simplified over the black-painted lips and hideously calomined faces of earlier days. Here Mme. Elizabeth Rethberg of Metropolitan Opera receives a special television make-up prior to an experimental demonstration in New York.

Broadcasting Corporation faced with the same problems? How is it that it can broadcast regularly, but Americans cannot?

First, the B. B. C. is not concerned with making a profit. It operates on funds provided by listeners' license fees and is government subsidized. In America it must be self-supporting. Furthermore B. B. C. has an audience of only 2,000 receivers, most of which it has sold "on approval."

Second, the transmission problem is less complicated than in the United States. The one transmitter at Alexander Palace serves nearly one-third of the population in the British Isles. A single transmitter at New York, for instance, would serve only an eighth or less of the United States population.

If conditions here were so simple—and there were enough fans who would plunk down \$300 for a receiver and take whatever programs a government subsidized agency put on the air—the metropolitan areas of the United States could have television tomorrow. Since television will have to pay its own way, it can't be put to the public until it can be done profitably for every one concerned.

vision cameramen regularly will bring into the home moving pictures of important occurrences—while they're occurring!

success—and other entertainment features, all geared to television with the same skill which modern man has used in gearing similar affairs to radio. Adult education should have its place, "skills" and techniques could be taught. There's a wealth of material for the television field to pioneer.

The Status of Static. Another obstacle: static. At present horrible blizzards suddenly gust across the television "silver screen." The picture is dotted with a fiercely whirling effect that looks like snow. Reason: An automobile idling at the curb within 100 feet. Best cure so far conceived: The "damping" of all spark plugs. Best place to do this: At the automobile factories. Not only the plugs but all other electrical apparatus on motor-cars must be bridged, too. It's a large order, but not impossible to fill.

Worse than the static produced by cars is man-made static. Fever-machines and other devices in doctors' offices make every patient temporarily a radio antenna, and he knocks the television pictures within range galleywest.

A minor obstacle is the torture of actors before the eye-mike. The heat is ferocious. The glare attacks the eyes with violence. These obstacles are being gradually overcome. So is the matter of make-up, the black-painted lips, the hideously calomined face. The pretty girls who have blossomed forth as television's answer to broadcast announcing are less offensive to the naked eye in the studio than they were a short time ago.

Britain Has Advantage. But, you ask, isn't the British

This first portable German television camera, shown recently at a Berlin radio exhibition, gives you a glimpse of the future when television

for other purposes. Such cables might carry television between great communities. But the cost would be almost prohibitive.

The other possible method is a "booster" system, by which programs might be relayed a hundred miles on a beam, rather than a broadcast channel, by intermediate stations. Pictures so transmitted would lose a great deal of sharpness.

Either system is so expensive that much of the delay in television today is due to the question whether commercial programs in limited areas would pay their way.

Programs Must Change. Program problems also must be solved. Television is the cruelest of all dictators to the subjects before the apparatus. With sightless radio, a singer, a speaker, or an actor in a play can read his lines, mop his brow, receive instructions by gesture from directors close at hand. In television, die is cast. Once in front of the blazing lights and the mike, the performer is on his own—and there can be no retakes! The consequence is that rehearsal costs in television are enormous.

Behind that problem is the question: What kind of programs will interest and audience 365 days a year? It can't be purely drama, because drama itself can function better in its natural element. It can't be purely movies, because movies also have their own perfected sphere. A community does not produce a daily pageant or other public function which is interesting and available.

No doubt it will be a combination of these things, plus such matters as fashion display—which R. C. A. has already produced with much

TRUCK DRIVER SOUGHT AFTER CRASH DEATH

WICHITA FALLS, Aug. 17 (AP)—A Wichita Falls man was killed, six were injured, and officers sought a driver of one of two trucks following a collision early this morning three miles west of the city on Highway 35.

Joseph Ireland, 27, unemployed oil field worker, died almost instantly when he was thrown from the sedan he was driving. Four other Wichitans in the machine were not seriously hurt. They were returning from a roadhouse dance.

The accident occurred when Ireland's car met a truck passing a second truck going in the same direction. Officers took conflicting statements regarding whether the passing truck was hit by the automobile before striking the side of the other vehicle.

The driver of the passing truck stopped, got out of the cab, and then stepped back in and drove on westward, officers were told.

Two of four in the other truck were slightly injured. Walter Wood, 28, driver, said they were en route from Houston to Salt Lake City, Utah, to find farm work. Their home is in Seattle, Wash.

Huber Defeats Oilers; To Play Here Tomorrow

The count in the Panhandle championship baseball series between the Pampa Oilers and Huber Blackfaces of Borger stands even after last night's debacle in Borger, won by Huber, 17 to 11.

Play will turn to Pampa tomorrow night promptly at 8:30 o'clock when the two teams meet in the third game of their nine-game series.

Errors almost equalled base hits. Borger led in all three departments with 17 runs, 14 hits and nine errors while the Oilers registered 11 runs, 13 hits and seven errors.

It was decidedly an off night for both teams. They will probably settle down to baseball here tomorrow night after getting all the bad ones out of their system last night.

The winner of the Firechief-Rig Service game will be eligible to attend the state tournament at Overton with expenses paid.

NATIONAL ANGLERS OUT FOR CASTING RECORDS

BUFFALO, N. Y., Aug. 17 (AP)—Half a dozen expert anglers, some already sporting casts as much as 30 feet over national record, today set out to unseat Marvin K. Hedge of Portland, Ore., as distance champion with a 53-ounce rod.

The battle opened a four-day casting tournament among members of the National Association of Scientific Angling clubs.

Also at stake in the distance competition in the 53-ounce class was a mythical world title picked up by Hedge last month in Paris, along with an all-around casting championship.

WOLFF BEATS EL PULPO IN BEST WRESTLING MATCH AS HADDOCK, JOHNSON DRAW

Pampa wrestling fans were assured that a big time would be had by all at the Pampa Athletic arena last night and they weren't disappointed as Frank Wolff whittled Senor Pancho El Pulpo down to his own size.

Several times which irked the former bullfighter, he jumped Clements and first flew for a minute with Wolff standing back encouraging the Mexican. When he figured the Mexican had worked himself into a white heat, Wolff took a hand.

San Antonio's second-place Missions helped their cause by defeating the lowly Dallas Steers, 3 to 0. Pitchers Woods of the Cubs continued the good work of their series predecessors.

Budge Expected To Take Honors

NEWPORT, R. I., Aug. 17 (AP)—The belated arrival of Don Budge, America's Davis Cup hero, threatened today to steal the Newport tennis spotlight from Bobby Riggs, the 19-year-old Californian youngster who dominated the eastern turf season in Budge's absence abroad.

The Cubs carried into action today with a three-game losing streak. Elsewhere along the big league wheel, the Giants visited the Bees, the Dodgers were at home to the Phils, the Cards were at Cincinnati, the American league-leading Yanks met the Senators, boasting an eight-game string, in a doubleheader, the Red Sox were at Philadelphia, the Tigers at Chicago, and the Indians at St. Louis.

Cubs Start Long Road Trip Enthusiastically

By BILL BONI (Associated Press Sports Writer) Manager Charley Grimm, leading his stumbling but still first-place Cubs into Pittsburgh today to open a three-game series with the Pirates, believes that on September 4 the Bruins will have as good a margin in the National League race as they now command—four games.

September 4 is the day the Cubs return to Wrigley field, with 17 road games behind them and a balance of 21 at home and 10 away ahead.

Grimm might, off the records, have put a shorter time limit on his forecast—until the end of this series with the Pirates and the subsequent one with the Reds, in fact.

Their latest cub-caging feats came in the just-concluded engagements at Chicago, where the Pirates won two out of three and the Reds three out of four. Between them, they forced Grimm to toss 20 pitchers in to the seven games. Only one, Clay Bryant, managed to go the route, pitching a five-hitter that beat the Buccaners.

From the Giants, to be met twice on this trip, and the Dodgers with whom three games are scheduled, the Cubs have won 11 of 17; from the Phils, whom they will play twice, 11 of 18; from the Bees, to be faced three times, 11 of 16 and from the Cards, whom, much to their disappointment, they don't play at all this time around they have won 10 out of 12.

WELL, JUST BETWEEN US PREXIES, I THINK

CHICAGO, Aug. 17 (AP)—President William Harridge of the American League offered President Ford Prick of the National League a friendly little tip on the coming world series today—and it sounded suspiciously like "don't forget to duck."

Prxy Harridge let it be understood he looks for (1) an interesting series (2) a swell turnout by the fans and (3) an enjoyable time for most everybody concerned.

He then wound up and burned in a warning to Mr. Prick that the National League champions very likely aren't going to enjoy themselves one bit when they run up against those terrible American league New York Yankees.

John Austin Defeats Four Champions To Win Tourney

Three city golf champions and a senior champion fell before Pampa's John Austin Sunday and yesterday when he won the Clarendon Invitation Golf tournament. The Pampa city champion came through the tournament 13 strokes under par.

Austin opened play on Sunday morning against Dick Gentry, Clarendon city champion, and won 6 and 4, shooting sub-par golf.

On Sunday afternoon, Austin drew W. Pendleton, Shamrock city champion, whom he dropped 5 and 3 with another round of sizzling golf.

Going back yesterday morning, Austin saw that he had drawn B. F. Holmes, champion of the Tri-State Senior Golf association. He downed the veteran Shamrock champion, 7 to 6, again shooting three under par.

Austin met J. D. Webster, Memphis city champion, in the final round of play yesterday afternoon, winning 5 and 3 with another score three under par.

Webster entered the finals by nosing out Jimmy Richesin of Pampa in 19 holes.

Another Pampa youngster, Kenneth Brown, was runner-up in the first flight, losing to B. Gentry of Clarendon, 2 and 1.

At least six Pampa golfers will enter the Shamrock invitation tournament which opens on Aug. 26.

Marriage vs. Career For Girls? Spitalny Will Bet on Marriage

Phil Spitalny has an excellent opportunity to study at first hand that modern-day feminine problem—Marriage vs. Career. This, because he leads an all-woman band.

By PHIL SPITALNY.

NEW YORK, Aug. 17.—Recently one of the young ladies in my orchestra occasioned quite a bit of excitement by breaking the three-year no-marriage clause required in my musicians' contracts. Cupid will always compete with Career, I suppose, but it's my belief that, in most cases, it's old man Career who stages a losing battle.

Thus far, the girls in the orchestra don't agree with me, but we shall see. According to our previous agreement, any girl who broke the contract by breaking into matrimony automatically lost her position. Thus she forfeited any further profits in the co-operative band.

But the three years the orchestra has been organized have brought the girls to the conclusion that a no-marriage clause is too severe. Since, in almost every other question of policy, we work co-operatively, a group decision made it plain that girls very strongly favored revoking the anti-marriage clause.

And so I have bowed to the will of the majority. Believe me, they felt quite strongly about it. If I had refused, a certain malicious look in those usually gentle eyes implied that they would be firm in their determination to give up even the orchestra—if it meant giving up freedom to marry whenever they please.

A Mere Man? Never! But such strong feeling on this point only convinces me more firmly than ever that I'm right in thinking that nothing can hold the intensity of interest for a woman that her home will command after her marriage.

In questionnaires they once filled out, only six of the girls, signified willingness to give up altogether careers for home making. Even the others, who said they might possibly give up their musical pursuits for a husband, indicated they would only do so for a male-paragon, possessing almost super-human qualities. One youthful player, who is now a sure-enough bride, will make an interesting test case. These are the questions that are uppermost in my mind, now that she has been reinstated.

1. Am I right in thinking that the attention required by husband, home and in-laws becomes increasingly absorbing?
2. What about the fact that, all

BRIDE'S PENNY SAVES SITUATION FOR CUPID

FORT WAYNE, Ind., Aug. 17 (AP)—A prospective bridegroom gave Miss Theima Smith, deputy clerk, a bag full of pennies and asked for a \$2 marriage license.
