

SHOUSE

(Continued from page 1.)

"It will not fail to uphold fundamental Americanism against subversive theories and alien doctrines."

Shouse's opinions on NRA and AAA, though underscored as only his views, indicated for the first time the possible standpoints of the league. Declaring that "in many regards" NRA has served a useful purpose and that he would not "ruthlessly" sacrifice everything connected with it, he said:

Predicts AAA Failure

"That the NRA has indulged in unwarranted excesses of attempted regulation there can be no doubt. That its policy of price-fixing is detrimental to the best interests of the great mass of the people is my firm belief. That its attempts to write codes for every little business of the country was absurd and ridiculous there is small question."

Of the AAA, Shouse said: "I am not one of those who is unconscious of, or unsympathetic with the Agricultural problem. I recognize the ills with which agriculture has been afflicted. I recognize the desirability of restoring the buying power of farmers. I recognize the necessity to attempt to achieve a price for farm products that will justify their production."

"The farm board experiments of the Hoover administration did not succeed. I am unable to see that the regimentation of production undertaken by the present administration will succeed. Nor is it either justifiable or ultimately beneficial. Moreover, in the experimentation that has been undertaken in this connection there is a grave challenge to constitutional liberty."

Congress "should watch with jealous eye" any attempt to extend AAA authority, he said, and he called for repeal of the Bankhead act, which provides for drastic control of cotton production.

Of personal and property rights, Shouse said:

"Suggestion has been made in some important quarters that the American Liberty league places too great a stress upon property rights. I can offer no better answer than does the Houston, Texas, Chronicle. It calls attention to

the question of a critic of the league who said: 'But what will you do when personal and property rights conflict? And then the Chronicle goes on to comment: "What could be sillier? Rights can't conflict. That, it seems, should be axiomatic. Nor is there any such thing as property rights. A building has no rights, a piece of ground has no rights. Some person has a personal right in the ownership of the building or land. It is as much a personal right as his right to vote or to enjoy freedom unless conflicted from some crime."

"To this thought the Charleston, South Carolina, News and Courier adds: 'If the Liberty league shall serve as a defense against a government menacing private property, threatening to seize the saving of the provident, intimating that the diligent and the capable shall under compulsion support the incompetent and unwilling to work, then the debt paying and industrious people of the villages and country-side in South Carolina will be as responsive to its plans as will be the millionaires of New York.'

Quotes Oklahoman

"These are two of the outstanding democratic newspapers of the south. In the same connection, an important democratic newspaper of the southwest, the Oklahoma City Oklahoman, asks the following question: 'If this is not a radical administration and if it is strictly constitutional, why should its most loquacious friends burst into a frenzy when certain men proclaim a determined war in defense of the organic law? If the administration is loyal to the constitution it has sworn to protect and if it is altogether free from the taint of Marxian philosophy, why should it not rejoice when prominent men prepare to defend the constitution?'"

CANADIAN NEWS

CANADIAN, Nov. 20.—The Rev. J. B. McReynolds will go to Berger for the next year and Rev. Mr. English will come here from Berger.

Erbin Crowell, a student at Canyon, spent the week-end here.

Harry Rathjen and Dr. Bennett returned yesterday from a hunting trip, bringing two deer.

L. A. McAdams returned Saturday from Kansas City, where he spent most of last week.

Mr. and Mrs. G. K. Engle and family spent Sunday in Sayre.

Mrs. Mabel Coffey, Mrs. Eva Haining, and Vince Shy of Woodward visited here Sunday.

Mrs. I. S. Weeks of Lipscomb county visited here yesterday.

Miss Lavarre Sprague is at home from Canyon for a few days' visit with her parents.

Mrs. Frank McAfee is spending the week in Perryton visiting friends.

BORAH REPEATS GRAFT CHARGES AGAINST FERA

Says Million Dollars Vanished In Orte State Alone

WASHINGTON, Nov. 20 (AP)—Senator Borah of Idaho, pressed a campaign today for a congressional investigation into his charges of large "wastes" of relief funds. To these charges he added the allegation that in one state a million dollars had vanished.

In a radio speech last night in the Washington Evening Star's forum, the independent republican stood pat on his criticism despite FERA's assertions that he has offered no evidence and that the cost of administering relief amounts only to 11.6 per cent.

He said he had a report that in one western county \$572 was spent to administer \$4 worth of relief. Declaring he was not challenging the integrity of Administrator Harry L. Hopkins, he added that most of the facts he cited were known to FERA in Washington.

"I do not charge," he said, "that these matters have been brought to the personal attention of Mr. Hopkins. But the information is there and it is subject to his call."

He said he had heard there is a "no man's land" in accounting between FERA and state relief administrations, with each side believing the other responsible.

"The federal government should be responsible for the administration of federal funds," he said, "and should require a strict accounting for every dollar of this money."

Jap Hurler Almost Beats Americans

SHIZUOKA, Japan, Nov. 20 (AP)—A pitcher's battle between the veteran Earl Whitehill and 17-year-old Eiji Sawamura thrilled 16,000 fans today as Babe Ruth's homer won the first real baseball game his barnstormers have played in Japan, 1 to 0. Sawamura, recently expelled from Kyoto commercial school because he played baseball against professionals, tamed the major leagues' murderers' row and approached a brilliant shutout but for Ruth's home run in the seventh. He allowed only five hits while Whitehill limited the Nippon all-stars to three.

BELL-ANS FOR INDIGESTION

Dunbar Services Conducted Today

Funeral services for Joan Dunbar, 5 year old daughter of Mr. and Mrs. Ralph Dunbar of this city, were to be conducted at 3 o'clock this afternoon in the First Methodist church with the Rev. Gaston Poote, pastor, officiating. Burial will follow in Fairview cemetery in charge of the G. C. Malone Funeral home.

The child died Monday night in a Waco hospital following an illness of several weeks. Her parents and Mr. and Mrs. Frank Culbertson, uncle and aunt, were at her bedside. The body was brought to Pampa last night.

Besides her parents, Joan is sur-

vived by two grandmothers, Mrs. Annie Dunbar of Hubbard, and Mrs. Annie Culbertson of Las Vegas, N. M.

Flower bearers named were Neil McCullough, Dr. R. A. Webb, F. A. Howard and Otto Geppert.

Flowers will be in charge of Mrs. R. A. Webb and Mrs. Homer Elliott.

WEST GETS HORSEY

NEW YORK, Nov. 20 (AP)—Mae West the movie actress has decided to enter the light harness racing game in earnest. Already owner of Elizabeth Heberling 2:06 1/2, and Senator Leon, 2:00 1/2, she has instructed her trainer, Art Blackwell, of Iowa, to bid in several promising trotters at the Old Glory auction sale next week.

Foolish Children?

No More So Than Panhandle Adults --- If They Permit "STRIPPING PLANTS" to Destroy Our Gas Field!

The throwing to the winds of a BILLION cubic feet of our Panhandle natural gas each day by "stripping plants" DOES have some temporary benefits. These mushroom industries employ a few people, pay out a little royalty and tax money, and do a certain amount of business with Panhandle concerns.

But the real situation of the people of the Panhandle is that of the little girl with her balloon. It's fascinating to watch the pin being stuck in it . . . but the grief and remorse are soon to come!

These "Stripping Plants" are sticking so many big pins in our natural gas balloon in so many places, that . . . big as these gas reserves once were . . . they are now being destroyed with appalling speed. Whereas the pressure once was 430 pounds to the square inch, it is now down to 200 in a long strip from LeFors to Stinnett.

If we don't stop this destruction . . . and do it quickly . . . we will be sitting here with only the shell of the world's largest natural gas field and second largest oil reserve. It's a question of self-preservation . . . and everyone should do his or her part to insist that the legislature stop . . . and stop quickly . . . this WASTING INTO THE AIR of our irreplaceable natural gas!

WASTED INTO AIR EACH DAY
PANHANDLE NATURAL GAS equal to domestic consumption of entire UNITED STATES!

Act Now — Or You, Too, Will Be Sorry!

You can help stop this gigantic waste! Your new governor and representatives in the State Legislature would like to know your views. So communicate immediately with Hon. Jas. V. Allred, Austin, Tex.; with your State Senator, Hon. C. C. Small, Amarillo, Tex.; and with your State Representative. (The names and addresses of State Representatives in the Panhandle are: Hon. H. K. Stanfield, Amarillo, Tex.; Hon. B. L. Rogers, Farnsworth, Tex.; Hon. A. B. Tarwater, Plainview, Tex.; Hon. Eugene Worley, Shamrock, Tex.) Ask that immediate legislative steps be taken to stop this colossal destruction! Also write to us today for additional facts.

THURSDAY Mrs. Rufe Thompson will entertain the Thursday bridge club at her home, 2:30.

SATURDAY Beta Delta chapter of Delta Kappa Gamma will meet for a breakfast at Schneider hotel, 9 a. m.

Loveliest Little 'Gadgets' to Accent

New Costume-Collars, New Sleeves, Gloves and Beret

By ELLEN WORTH Stretch your budget! Individuality lies entirely in attractive accessories.

Here are some lovely hints to "dress-up" your last year's clothes. A beret is both smart and practical and may be worn with numberless costumes; matching beret and gloves are exceedingly smart—velvet for afternoons and in rabbit's hair for sports.

A new draped monk-like collar will lend glamour and completely disguise your last year's dress. For ordinary day wear, you'll like the shirtwaist collar with tailored plaited jabot.

The pattern also includes two smart sleeves, besides the other items illustrated.

Style No. 862 is designed for sizes small, medium and large. See pattern envelope for material requirements.

The Guide to Chic You can have a very smart wardrobe at little expense of time and effort—our attractive Fall and Winter BOOK OF FASHIONS is just bulging with ideas that you can turn into chic wearable clothes. Send for your copy today.

Price of BOOK 10 cents. Price of PATTERN 15 cents in stamps or coin (coin is preferred).

To order, address New York Pattern Bureau, Pampa Daily NEWS, Fifth Avenue at 23rd Street, New York City. Write name and address plainly, giving number and size of pattern wanted.

Recipes Given by Mrs. Beulah Yates

Two recipes recommended by Beulah Mackey Yates, director of the Daily NEWS' cooking school, are especially good for these fall days are given below:

- Mystery Cake. 1 tablespoon shortening 2 cups flour 1 cup sugar 1 teaspoon cinnamon 1 teaspoon nutmeg 1-4 teaspoon salt 1 tablespoon butter/milk 1 can tomato soup 1 cup chopped nuts 1 tablespoon chopped lemon peel or citron 1 cup raisins 1 teaspoon K. C. baking powder.

Work shortening and flour together well with a blender or fork. Add sugar and remaining ingredients, mixed together all at once. Add tomato soup, and beat until mixture is smooth and creamy pink. Add fruit. Beat and mix well. Pour into greased loaf pan and bake at 350 degrees for about an hour.

Believe-It-Or-Not Icing. 1 package cream cheese 2 cups powdered sugar 1-4 cup top milk 1 teaspoon vanilla. Mash cheese, and work in the powdered sugar a little at a time. Add vanilla; add milk until of the right consistency to spread.

Cooking Schools use and recommend ADMIRATION COFFEE

Housewives, hostesses, students of cookery, will have a treat for several days this week, if they attend the sessions of the School of Cookery, conducted under the auspices of this newspaper.

As times get better and better, you will want to know what foods contain the highest food value, and how to prepare them so as to get the real value for the money you pay for them.

Among beverages, coffee still holds the place of America's favorite drink. Among coffees, Admiration is still the choice of most people in Texas, because, "it tastes better."

BAPTIST GROUP WILL SEW FOR ORPHANS HOME

ONE CIRCLE VISITS ANOTHER FOR STUDY

An all-day meeting next Monday to sew for children of Buckner orphanus home was planned by Lily Hurdley circle of First Baptist Missionary union yesterday afternoon.

Mrs. Fuller Barnett was hostess to Lily Hurdley group at her home. Mrs. E. T. May was in charge of the business session.

Others present were Mmes. R. L. Young, D. C. Campbell, E. L. Trammell, E. W. Markington, A. A. Day, T. B. Robertson, C. L. Stephens.

Members of the visiting circle present were Mmes. C. E. Lancaster, J. F. Henderson, Tom Duval, Wilson Hatcher, R. E. Gatlin, Mary Binford, and Prigmore.

Mrs. John Peacock was hostess to Elkin Lockett circle. Mrs. W. B. Henry gave the prayer and devotional, and Mrs. F. E. Leech led a study of the book, Signal Fires on the Mountains.

Present were Mmes. Chester Williams, J. E. Reeves, R. C. Wood, H. C. Wilkie, C. J. Hamn, A. A. Steele, L. A. Baxter, H. K. Beard, Lech, Henry, and the hostess, Mrs. Williams gave the closing prayer.

MERTEN H. D. CLUB Merten Home Demonstration club will meet Thursday afternoon at 2 in the home of Mrs. Alva Phillips, for annual election of officers.

The United States was the 37th country to accept Germany's invitation to the 1936 Olympiad. Invitations were sent to 55 countries.

Recipes From Cooking School

Because the attendance at yesterday's session of the Daily News cooking school was even larger than expected, and copies of Mrs. Yates' recipes ran short of the demand, the recipes are reprinted here.

Enough recipe sheets will be prepared for the classes today and tomorrow so that each woman will receive them, and they will not be published in THE NEWS.

FIRST DAY'S PROGRAM

The menus given below are "A Matter of Time Not a Matter of Courses." Broiling (or grilling) is the quickest way to cook a meal—and how it brings out a food's real savorness! Build menus around foods that need practically the same cooking time. Choose only tender foods; cook fatty ones on a rack, others in a pan.

"Come out of the Kitchen," these grilled meals cheerfully urge. Do accept their invitation—you'll be saved hours of needless work!

Tomato Juice
Minute Steak, Broiled Eggplant, Glazed Carrots

Morning preparation: Put tomato juice in refrigerator to chill. Parboil carrots; split large ones lengthwise. Peel and cut eggplant in slices 1/2 inch thick; soak in salted water.

At dinner time: Heat broiler. Drain water from eggplant; dry slices and dip in salad oil or melted butter. Dot carrots with butter, sprinkle with salt, pepper, and a little sugar. Arrange minute steaks,

Things Just Seem To Be Getting All Mixed Up

EGG-NOG PIE
Crust: 18 old fashioned ginger snaps, crushed, and mixed with 1/2 cup softened butter. Press into a pie pan.

Filling: 1 tablespoon gelatin, 1/2 tsp nutmeg, 1/2 cup cream, whipped, 2 eggs, separated, 1 cup sugar, 1 cup sweet milk, 1/4 tsp salt, 3 tablespoons cold water, 2 tsp rum flavoring.

Soak gelatin in cold water, heat milk. Beat egg yolks with sugar and salt and stir hot milk into them. Return to double boiler and cook until thickened. Remove from fire, add gelatin and flavoring. Cool. Beat with rotary beater, then fold in stiffly beaten whites, and whipped cream. Pour into pan lined with crum mixture and chill for 2 hours in refrigerator.

BANANA MUFFINS
1 cup and 2 tablespoons flour, 1 1/2 teaspoons K C Baking Powder, 3 tablespoons brown sugar, 1/2 teaspoon salt, 1/4 teaspoon each of cinnamon and mace, 1/2 cup raisins, 1/2 cup chopped nuts, 2 tablespoons melted shortening, 3/4 cup washed bananas, 1/4 cup milk.

Method: Cream shortening, sugar, add egg, and mashed bananas and milk. Then add all dry ingredients and last nuts and raisins. Bake in well greased muffin tins for 15 to 20 minutes at 400 degrees.

TUTTI FRUTTI MARLOW
20 marshmallows, 1 cup milk, 1 cup cream, 1 tsp vanilla, 1/4 cup butterscotch or marshmallow cherries (cut in pieces), 3 slices pineapple, 1/2 cup pecans.

Heat milk and dissolve marshmallows in it. When thoroughly dissolved, cool and add cream, whipped until stiff. Add vanilla, cherries, pineapple, cut up fine, and nut meats. Pour into tray of refrigerator. Allow to freeze for half an hour. Stir mixture and return to refrigerator until frozen.

ASHEVILLE SALAD
1 can tomato soup, 3 pkgs. Philadelphia cream cheese, 1 cup mayonnaise, 1/2 cup celery, 1/2 cup green pepper, 1 thin sliced onion, 1/2 cup stuffed olives, 1 envelope gelatin, 1 cup cold water.

Dissolve gelatin in cold water. Heat tomato soup. Add cheese and gelatin. When slightly cold add mayonnaise, celery, pepper, olives and onion. Turn into molds and chill. Unmold, then garnish.

OVEN STEW
2 slices salt pork, 1 1/2 lbs dried beef chuck, 1 1/2 cups water, 1 large onion, chopped, 1 can tomato soup, 1 tsp salt, 1/2 tsp pepper, 1/2 tsp paprika, 6 small onions, 6 medium carrots, 6 medium potatoes.

Cube pork and brown in skillet. Remove to baking dish, leaving fat dressing in. Add onion and water. Take 3 tbsps of oil and add a little salt and sugar. Not too much, just a dash. Add 1 good tbsps full of lemon juice and 1 tbsps of vinegar from a bottle of sweet pickled onions. Cut up 3 or 4 of the sweet onions and the pulp of 1 orange, and mix all together. Fill the hollows of the peas and serve with any salad accompaniment you choose. A pear like this is quite a luncheon in itself. But you may serve it as a salad course. Only don't go in for a rich dessert to follow.

HOMEMAKER'S JOY CAKE
1 cup sugar, 2 cups cake flour, 2 teaspoons baking powder K C, 2 egg whites, butter, 1/2 cup milk, 1/2 tsp lemon extract, 1/4 tsp vanilla.

Sift sugar, flour and baking powder together. Place egg whites in measuring cup. Fill with soft butter to one-half full. Fill remainder of cup with milk. Add to flour mixture in bowl with flavorings. Beat about 4 minutes. Bake in 2 layers at 375 degrees for 20 to 25 minutes. Frost with Apple Icing.

Marian Gordon by JEANNE BOWMAN

Chapter 38. WAB PATH

Marian stood up. Of course, even though she no longer held the evidence she could see that a state inspection took place before the building was turned over to the city. She could give details on how McSwain had proposed to thwart the city's attempt to build the safest schools possible so that the inspectors could go immediately to the weak points of the structure.

Then, how could he control her? He couldn't control her because she was afraid. He didn't dare do her physical injury for fear of the effect upon himself. The only way he could handle her was by getting control of Lon, by holding some threat such as a penitentiary term, over his head.

He would not send Lon there because that would cause her to go into action with such bitterness she would force him to spend more than he had stolen on the building, but he would come to her to make terms. He would tell her he would be lenient if she kept out of his business. And . . . he would force her to close his eyes to the inferior material going into the building. Holding the threat of prosecution over his head.

"Oh, he will, will he?" Marian asked of the mountain. Her shoulders squared back, she felt her hair tingle at the roots as a red rage swept over her.

She strode back to the house like a young warrior, undressed, tumbled into bed, and slept like a top. The morning alarm aroused her and she found Lon was already awake and dressed and out packing up and down in front of the house.

"Lon, come in here," she said. Clad in the gayest pyjamas she owned, she stood at the door. "Are

she her making imaginary stabs at the air with a bread knife, and had to laugh.

"I'm just practicing," she apologized, flushing.

out being seen? She couldn't go to the court house . . . she couldn't go to the Emergency hospital because that was too near the court house . . . she couldn't meet him at the office of the Morning Dispatch, because McSwain would be suspicious of her visits to any of these places.

She looked out of the window. Waki was lifting some shrubs from the tonneau of his car . . . that was it. She could have him drive her into town and they'd visit a nursery. Waki had a relative who ran one of the finest in town. There was an office in connection with the display room. She would meet him there.

Her letter was written hurriedly—"Please meet me Wednesday, 2 p. m., at Hashya's Floral shop. I'm being trailed; vitally important I'm not seen with you. Utmost secrecy necessary. Advise you to arrive there at least ten minutes before the hour." She hesitated over signing it, then, remembering a nickname the district attorney had given her in childhood when he was a constant visitor at her father's home, signed it, "Red Pepper."

He would be there or he would send someone she could trust if he were due to appear in court. He knew her; knew she didn't become dramatic over trifles.

The letter doubled into a small envelope, she went into consultation with Waki.

"Sometimes you go to visit your cousin Hashya in town don't you?"

"Lot time. Alla same have much fun."

"Waki, could you go to see him tonight? I have to meet a friend of my father's where no one will see us. Will Hashya let us use his office for about half an hour?"

"Tonight?"

"No, Wednesday afternoon. Tonight I want you to take a note to Hashya and ask him to send it to this man."

"Sink very good," confirmed Waki. "Sink Hashya say yes very good."

"And then Wednesday you will drive me in, Waki, and we'll pretend we're going to buy some shrubs, but in the meantime I'll talk to the man, understand?"

"Yes, sink very fine good. I go."

"And Waki, you'll keep the letter hidden while you're on the way in so if anyone stopped you and searched, you know looked all over you like this," she illustrated, "they wouldn't find it?"

He puzzled over this a moment, took his round hat from his head and scratched the thatched mop of greying hair.

Suddenly his wrinkled face broke into a radiant smile. "Take fish, mebbe put letter between fish."

Marian nearly shouted in protest mingled with hysterical laughter. "Oh, Waki, please, let's make it prunes or walnuts."

"Sink walnuts more dry," Waki agreed laughing with her.

The rest of the day passed quickly. Lon came in his face telling her she had been right in her surmise.

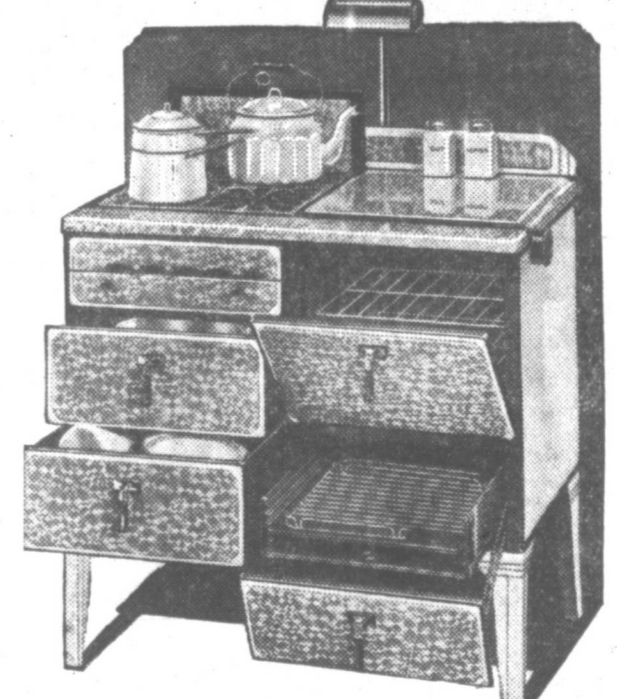

"You are psychic, Marian," he said in greeting. "McSwain did exactly as you said. He was so darned nice about it all I felt . . . terrible. Of course he's convinced it did it when I was so far gone I didn't know what I was doing."

"Bosh," said Marian, "you didn't do it and don't you let anyone convince you that you did. If Dr. Steele hadn't been so fussy about your diet I'd try an experiment next week end. I'd make you drink lots more than you drink last Saturday and then watch to see the effects."

"That reminds me. What did you have for lunch?"

"Ham sandwich and a cup of coffee and a piece of banana cream pie.

GAS: A BLESSING AND A DANGER

Natural gas is a blessing which can be appreciated best by those who have had to chop wood, burn coal, or gather the "chips" from the prairie as the frontiersmen did. We have had our turn at each, and we don't feel very old.

Gas comes into our homes without attention and burns in a hot flame with invisible residue. The fumes should be carried off, but often are not. A gas stove, burning high in a small room, is dangerous even when the flames are not extinguished. Deaths from suffocation have been several in this community.

Oxidation of gas, or rather imperfect oxidation, releases the deadly carbon monoxide. This is found chiefly in garages where motors run in closed rooms, but may be developed around hot water heaters and stoves. Venting is the only safeguard. Pure gas burns in air but, mixed with air, explodes violently as was shown in the tragic accident to the Cross family living south of Pampa this week.

Gas is the more explosive form of a solid in many cases. It is a well-known fact that a flaming match can sometimes be extinguished by plunging it in gasoline—but few of us would try the trick. In most cases, the gasoline fumes above the liquid would explode and obsequies might be said for the match holder.

It is likewise true that, no matter how careless we may be in regard to fire hazards, there is still a good chance we might not sustain a fire. And millions of us willfully run the risk. Inasmuch as there is only one chance in a hundred or so of our property being destroyed, we let hazards continue or increase. When we do that we belong in exactly the same category as one who tries to extinguish a match in gasoline. The difference is simply one of degree, not of classification.

In the last year for which complete statistics are available, chance-taking with fire caused an economic loss of over \$400,000,000—and, of vastly greater importance, a loss of life of around 10,000. Because we were careless with matches, \$29,000,000 of property went up in smoke. Because we let stoves, furnaces and boilers deteriorate to a dangerous condition, \$18,000,000 was destroyed. Because we misused one of the most valuable of man's servants, electricity, \$15,000,000 was reduced to ashes. And so it goes, throughout a long list of hazards.

These figures tell only the least of the story. They represent only direct losses. Indirect loss, such as unemployment, loss of business, destruction of taxable property, and so on, amounts to several times as much.

Fire waste is a black mark on the record of American civilization. More than 80 per cent of fires are preventable—they occur because someone is careless or ignorant—because, figuratively speaking, someone tries to put out a match in gasoline.

SCIENTIST ANNOUNCES DISCOVERY OF NEW KIND OF HEAVY NITROGEN

By F. C. COLTON, Associated Press Science Editor.
CLEVELAND, O., Nov. 20 (AP)—A new step toward artificial creation of elements, the manufacture of the ordinary oxygen of the air by bombarding nitrogen, a lighter-weight element, with neutrons or parts of atoms, was reported today to the National Academy of Sciences.

This represents the most difficult kind of transmutation of the elements, the building up of heavier elements out of lighter ones, a dream of the old alchemists. It has now been accomplished on small scale by Dr. William D. Harkins of the University of Chicago. He reported it to the opening session of the academy's autumn meeting here.

He has found that neutrons, formerly used only in bombarding and breaking down atoms to unlock secrets of how they are put together, also can be used to build up new atoms by the same kind of bombardment. It is roughly like finding that the same cannon-balls used to destroy a fort can also paradoxically be used to build up a different and stronger point.

Dr. Harkins has discovered a new kind of nitrogen, slightly heavier than ordinary nitrogen, such as is taken from the air to be made into fertilizers and explosives. He found that ordinary nitrogen changed into the new kind when it was bombarded with neutrons moving at tremendous speed. The new nitrogen, however, refuses to hold together and soon disintegrates, chang-

ing into oxygen in the process.

The first formal report of the recent discovery that the speed at which light travels apparently is not always the same, which if true upsets many well-established scientific rules and facts, was represented to the academy by Dr. F. G. Pease of Mount Wilson Observatory, Calif., and Dr. F. Pearson of the University of Chicago. They were originally aided in the work by Dr. A. A. Michelson, now dead.

They have found that the speed of light seems to vary according to the position of the moon, so that apparently it is affected by the moon's "pull," the same pull that causes the tides of the sea. The speed of light is roughly estimated at 186,000 miles a second, but the scientists have found it varies from six miles per second at different times and they cannot explain the differences on the basis of errors in measurement.

DEAD OR ALIVE
COLUMBUS, O.—Wilbur Neal was called upon in court to testify that he is not dead. An insurance agent was accused of collecting \$500 on Neal's death claim.

"Are you dead?" a prosecutor asked Neal.

"I don't suppose I am."

The jury convicted the insurance agent.

GOING UP!
DALLAS—The usual escape in the traditional "high-powered" automobile was snubbed by two youthful holdup girls. After entering a gasoline filling station and lifting \$5 from the cash register, they backed nonchalantly from the station and boarded a passing street car. They escaped.

HAVE WRITTEN OF A "STAR INSIDE THE CRESCENT MOON," BUT NO ONE WILL EVER SEE SUCH A SIGHT! A STAR IN THIS POSITION WOULD BE BEHIND THE MOON, TOTALLY ECLIPSED!

SIAMESE TWINS ARE NOT UNCOMMON IN THE MUSHROOM FAMILY!

CEDAR BIRDS WILL LINE UP ON A LIMB AND PASS A PIECE OF FRUIT, OR A WORM, BACK AND FORTH FROM ONE TO ANOTHER.

THE crescent of the new moon is only that part of the moon on which the sun is shining. The unlighted side usually is invisible, and tends to give the observer the impression that he is looking through empty space between the two horns of the crescent.

especially valuable as a food for under-nourished children and invalids. Health authorities everywhere recommend a liberal use of milk, urging the consumption of at least a quart a day per person.

And of course, there is no age limit for drinking milk. Because it is so good for children, many have the notion that it is just "kid's food." Nothing could be farther from the truth. Recent medical discoveries by the foremost nutritionists have established the fact that milk is perhaps the finest food that an adult can have. They have learned that milk is Nature's most complete food, containing 34 of the 36 food elements which we need to keep healthy—proteins to build and repair tissue—the right fat for fuel—sugar for energy—vitamins and mineral salts.

Continued lack of any of these essentials often forms the starting point for many middle-age diseases. Milk brings balance to meals by supplying the things that so many diets lack. It promotes a clear mind in a healthy body.

Plenty of pure country milk with meals is one of the safest health-habits that can be formed.

For many of us these are times when we must make an effort if we are to balance the family budget. We must remember one thing. More than at any other time, perhaps, we must keep health as our first consideration—particularly the health of our children.

We urge mothers especially to study the way in which milk can help them to do this.

For every cent we spend, milk gives more vital food value than any other article of diet. It makes certain that the building of bone and muscle will go on. It is a safeguard against illness—a source of energy. It is possible to cut our total food bills and actually increase the health value of our meals by increasing our use of milk.

Very Much Improved After Taking Cardui

"I have suffered a great deal from cramping," writes Mrs. W. A. Sewell, Sr., of Waco, Texas. "I would chill and have to go to bed for about three days at a time. I would have a dull, tired, sleepy feeling. A friend told me to try Cardui, thinking it would help me—and it did. I am very much improved and do not spend the time in bed. I certainly can recommend Cardui to other sufferers." Thousands of women testify Cardui benefited them. If it does not benefit YOU, consult a physician.

HAPPY KITCHEN CHATS BY Beulah Mackey Yates

Milk—One of the Essentials of Health

One of the most vital things in the family life of any community is a good supply of milk. But constant vigilance is necessary to protect this supply. It is also necessary that you know and realize just what an important part milk as a food plays in your life. As a food milk contains all the nutritive compounds necessary for

a growing child in the correct proportion of a scientific diet. It is one of the most digestible of all animal foods and, with other dairy products, forms over 22 per cent of the great American diet. Milk constituents, as with other food material, may be classified as fat—carbohydrates—proteins, vitamins and mineral content. It is

Mail the certificate from a can of K C Baking Powder with your name and address and your copy will be sent postage paid.

Address: JACQUES MFG. CO., Dept. C. B., Chicago, Ill. Name: Address:

K C is economical; Because of its high leavening strength only 1 level teaspoonful to a cup of flour is sufficient for most recipes.

It is a time saver. That's due to the double action. One action in the mix and the second, a stronger action, in the oven. You can prepare dough for biscuits, muffins, etc.; hours in advance, set in a cool place and bake when desired; No need for hurry when using K C.

MILLIONS OF POUNDS HAVE BEEN USED BY OUR GOVERNMENT

SYMPHONY IN SHIRTSLAVERS NEW YORK. (P)—Werner Janssen' swallow-tail coat sleeves went on a tear in sedate Carnegie hall

just between the Molto Moderato and the Presto of Sibellus' fifth symphony. Janssen, directing the Philharmonic Society orchestra, was putting fortissimo energy into his work when suddenly the right coattail sleeve ripped along the seam, starting from the shoulder, and showed several inches of the maestro's shirtleeve. He finished the symphony, sublimely unconscious of the accident.

Tomorrow---Last Day OF THE COOKING SCHOOL

...don't miss it!

The Pampa Daily News FREE COOKING SCHOOL WEDNESDAY

2:30 to 4:30 P.M.

CITY HALL

One of the red-letter events of the year for women is almost over. A cooking school it is, to be sure, but what a cooking school! This year's cooking is done in a kitchen much different from that of grandmother's day. There are hours and hours less time needed in cooking—there's less work and more fun. Today's kitchen is a real "Happy Kitchen,"—or ought to be. If your three-meals-a-day seem just a succession of toast and eggs and potatoes and roast beef and pie, our cooking school is made to order for you! And if you've already found the secret to pleasure and fascination in mixing dainty new dishes and dressing up the old stand-bys in colorful new fashions—you'll love the cooking school just as much.

There will be romance—mapping of uncharted seas of the kitchen—at the cooking school. Each session will glow with new ideas, appetite thrillers, the simple secrets that make cooking happier and easier. We invite you to hear dozens of practical suggestions that make kitchen hours more fun and more joy—to see demonstrated before your very eyes those inspired touches that raise the meal and its preparation to the realm of a happy adventure.

Remember—everything shown in our cooking school has been tried and tested by a whole staff of "Happy Kitchen" experts. Months of planning have gone before.

The Cooking School is under the personal supervision of Mrs. Beulah Mackey Yates, noted "Happy Kitchen" expert.

Set Tomorrow Aside Now!

PROPOSED LAWS DESIGNED TO CUT SIZE OF POWER GIANTS

REGULATION OF HOLDING FIRMS IS OBJECTIVE

LEGISLATIVE PROGRAM TO BE SUGGESTED BY HEALY

BY J. R. BRACKETT.
(Copyright, 1934, by The Associated Press.)
WASHINGTON, Nov. 20 (AP)—An authoritative source disclosed today that laws to limit the size and might of giant holding companies in the power business will be recommended to President Roosevelt by his power experts.

Regulation of holding companies—corporations which hold the shares of operating utilities and usually control those utilities—is an objective of the national power commission.

A commission sub-committee studying this subject is headed by Robert E. Healy who directed most of the federal trade commission's 6-year inquiry into utilities and who is now on the securities and exchange commission.

Though a legislative program has not been drafted and the president's attitude has not been disclosed, the sub-committee was authoritatively reported to be thinking along these lines:

1. No more than one holding company should be supervised on a group of operating companies. At present some holding companies are in turn held by other holding companies. The experts believe this pyramiding is uneconomic.

2. The power resources which one holding company may control should be limited.

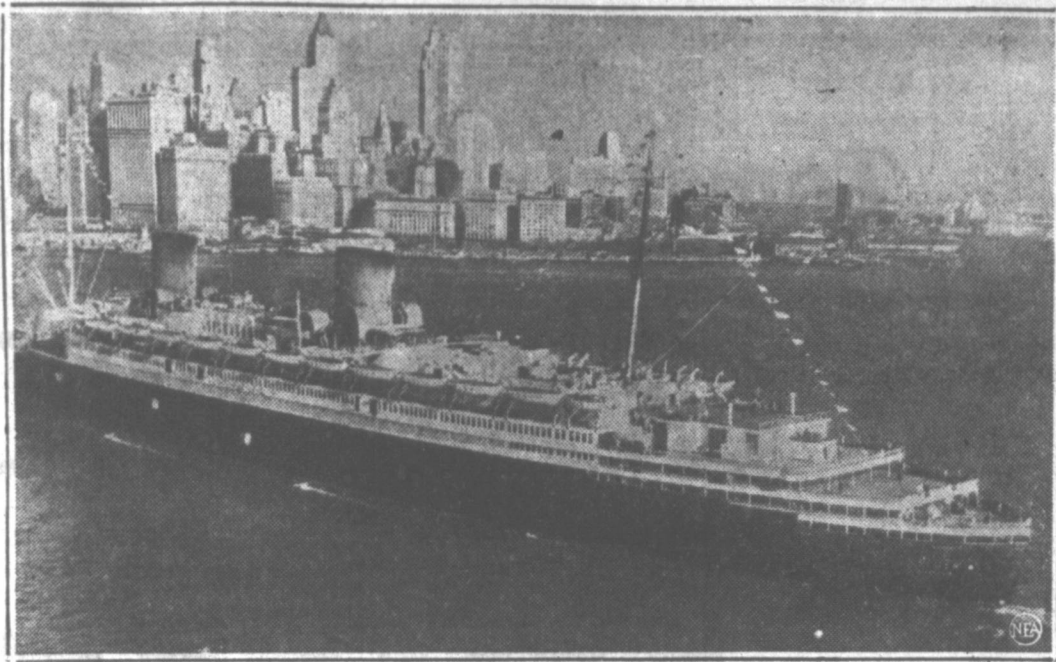

3. Natural gas and electric companies should be divorced. In many cases holding companies control both kinds of utilities jointly. This leads, in the opinion of the experts, to reduced use of the great natural gas resources.

The federal trade commission, which is preparing a utilities report for congress, is seriously considering recommending that holding companies be licensed. Then they would not be permitted to operate in interstate commerce without a federal license. Such a plan might be used to attain objectives like those outlined above.

Healy's associates represented him as being convinced the trade commission has proved the uneconomic nature of holding companies as now constituted and the necessity of government supervision.

The trade commission's report on United corporation, a concern holding minority interests in a large group of other utility holding com-

At End of Record Atlantic Crossing

A race against time to save a baby's life brought the Liner Bremen across the Atlantic from Cherbourg in record time—4 days, 14 hours and 27 minutes. This is 21 minutes faster than the trip ever has been made before. The Bremen is shown steaming into New York harbor, toward the famous skyscraper skyline, at the end of the record run. The baby was too ill to be moved from the ship's hospital, but the attention of specialists was provided.

panies, was prepared while Healy was still directing the commission's study. This report found that the United group represented 27 per cent of the nation's 25 per cent of the installed generating capacity, and 30 per cent of the hydro-electric capacity.

Declaring such a group may have influence on economic progress over vast areas, the investigators said: "Highly intelligent abilities must be coordinated with even-handed justice when such power is exercised over the general public. Human history strongly implies that qualified representatives of the public must supervise such concentrated power to prevent its abuse."

Other examples which the commission's record includes are Cities Service company, described as representing a billion dollar empire controlled by Henry L. Doherty with an investment of only \$1,000,000, Electric Bond and Share, Associated Gas and others.

The effect of the three-point plan would be to limit the influence of holding concerns to so-called economic areas. The plan also would aim to prevent holding companies from charging "excessive" management fees, and curb the "pyramiding" of security structure.

OAKLAND, Calif.—It's still a world of opportunities for youth. Instead of sitting idly at home when rain pattered on his roof, 14-year-old Donald Conover got out his bicycle and made a few dimes, ferrying pedestrians across a flooded intersection on his handle bars.

Another Kansas woman, Mrs. May Frazee, above, has snatched up the hatchet from where the militant Carrie Nation laid it down and is heading a brigade of 50 women pledged to keep the state dry, using hatchets on illegal bars if necessary, following the recent prohibition election victory. Mrs. Frazee is head of the Arkansas City W. C. T. U.

Mrs. Frazee is head of the Arkansas City W. C. T. U.

ELEVATOR STRIKE
NEW YORK, Nov. 20 (AP)—Manhattan's elevator men may walk out today, and unless substitutes walk in, New Yorkers must walk up to the peaks of the skyscrapers. A city-wide strike of elevator operators and other building service employees was declared a certainty by James J. Bambrick, local president of the Building Service Employees International Union. He promised an announcement later today.

X MARKS THE SPOT
LONDON—Little Rose Goss will have a lot of fun in future years showing her playmates where she was born. Rose's mother, 28 years old, was on her way to the hospital afoot when she collapsed right in the middle of Bow Road in London's busy East Side. Traffic was halted, and then diverted, while a police surgeon attended the mother. Latest reports from the hospital to which mother and child were taken indicated both are doing nicely.

U S PROPOSES PLAN TO CURB ARMS TRAFFIC

TREATY PRESENTED BY AMBASSADOR HUGH WILSON

BY JOSEPH E. SHARKEY, Associated Press Foreign Staff.
GENEVA, Nov. 20 (AP)—A bold attempt to bottle up the arms trade, from revolvers to battle-ships, was made today by the United States in sweeping proposals laid before the steering committee of the World Disarmament Conference.

Power to investigate the arms manufacture and trade of any country signing a convention for a rigid license system and full publicity for all arms orders were provided in the most complete munitions document placed here in almost 3 years of disarmament argument.

A permanent commission would be created at Geneva under the plan advanced by Hugh R. Wilson, American minister to Switzerland, on behalf of his government.

The commission would be given automatic powers to investigate private or public manufacture and sale of arms and to keep the world regularly informed as to what was going on behind the scenes.

All arms—rifles, machine-guns, grenades, bombs, torpedoes, mines, warships, airplanes and ammunition—come within the scope of the disarmament proposal.

Wilson also presented the draft of a plan creating a permanent disarmament commission.

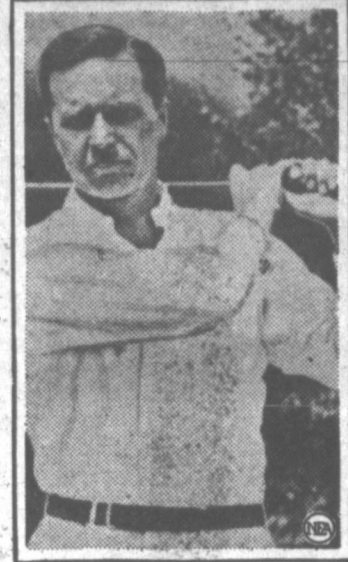

The treaty, Wilson declared, "would tend to lessen between states that constantly increasing fear of the unknown—a fear which is one of the most profound causes of anxiety and distrust between nations."

"I will go even further," Wilson continued, "and state the adoption of such a text would greatly facilitate the eventual adoption of a general disarmament convention. An agreement upon such a document by the states of the world would mean a lessening of anxiety and the increase in confidence might even be the turning point of the present deplorable situation."

Wilson emphasized that the United States "firmly believes that without disarmament there is no sound basis for peace. It has never wavered from that conviction and it will work earnestly for the final success of this conference."

Lew Wentz, Oklahoma millionaire sportsman, once ran a bathing beauty contest "for unmarried ladies under five."

NEW GOLF PREXY

Prescott S. Bush, above, of Greenwich, Conn., is to be the new president of the Professional Golfers' Association in 1935. Bush was the selection of the association's nominating committee, which is equivalent to election. He is to succeed Herbert Jacques, of New York, in January.

High School PTA Board Is Called

An executive board meeting of High School Parent-Teacher Association is called for 4 o'clock Wednesday afternoon in the high school library, Mrs. J. B. Townsend, president, announced today.

All chairmen of standing committees, as well as all officers are asked to be present. This board meeting will precede the regular monthly general session, which is scheduled for Thursday evening.

Knocked out of a tie for the Big Ten title last year by losing to Michigan and Ohio State by a single point, Illinois this year beat both of them by a point.

Oklahoma Senator And Priest Agree On Money Matters

DETROIT, Nov. 20 (AP)—Asserting that "the paramount issue is the money question," Senator Elmer Thomas (D., Okla.) and the Rev. Fr. Charles E. Coughlin will urge upon the president and congress further reevaluation of the dollar and its subsequent stabilization at the 1926 level.

Senator Thomas said he and Fr. Coughlin would work for ultimate dollar stabilization at 100 cents, which he said was the 1926 level.

They plan a meeting at Washington next month of representatives of farm organizations, the committee for the nation, the sound money league and Fr. Coughlin's national union for social justice. From this meeting the program which they will present to President Roosevelt will emerge in finished form.

Here's the ABC of COLDS-CONTROL

A To Help PREVENT Colds
At the first sneeze or nasal irritation, quick!—a few drops of Vicks VapoRub. Its timely use helps to prevent many colds—and to throw off colds in their early stages.

B To Help SHORTEN a Cold
At bedtime, just rub on Vicks VapoRub, the mother's standby in treating colds. All through the night, by stimulation and inhalation, VapoRub fights the cold direct.

C To Build RESISTANCE to Colds: Follow the simple rules of health that are part of Vicks Plan for Better Control of Colds. The Plan has been clinically tested by practicing physicians—and proved in home use by millions. (You'll find full details of this unique Plan in each Vicks package.)

VICKS PLAN FOR BETTER CONTROL OF COLDS

Beulah Yates Says "Squinting Causes More Crows-Foot Than Old Age"

Does the lighting in your kitchen, dining room, or other parts of the house cause you to squint? If so, better shades or diffusing bowls should be provided. A bare lamp in any part of the home is a constant source of annoyance.

When you visit the cooking school, be sure to examine the new Student's Lamp, which was scientifically designed by The Illuminating Engineering Society. This lamp will give you more even, glareless, light for the same amount of money spent for electricity.

Don't make your children squint. Give them proper lighting for their studies.

Southwestern PUBLIC SERVICE Company
