## DONALD REDDELL ELECTED TO "FELLOW" BY ASAE

Knoxville, Tennessee... Donald L. Reddell, Professor, Agricultural Engineering Department, Texas A&M University, College Station, has been elected a Fellow of the American Society of Agricultural Engineers (ASAE).

He was honored during the Society's annual Summer Meeting, June 24-27, at the University of Tennessee, Knoxville.

Election to Fellow is one of the highest distinctions an ASAE member can achieve. Fellows are elected annually by ASAE's Board of Directors, and they are chosen for their unusual professional distinction and extraordinary qualifications.

A minimum of 20 years active practice or teaching experience in agricultural engineering and 10 years

membership in ASAE is required for nomination.

Election to Fellow is a distinction earned by only about 2 percent of ASAE membership.

In naming Reddell the Fellows Committee states "Reddell has assumed the position of leadership and demonstrated an outstanding ability to carry a heavy load in his research programs in agricultural waste, management and groundwater modeling. Results of his research has been widely applied by Great Plains farmers and feedlot managers. His current work in surface irrigation promises to substantially reduce water losses in irrigating crops and thus stretch our vital water resource."

## SWIMWEAR CALLS FOR PROPER CARE

The bathing suits of 1984 are dramatic and bright. But to preserve their good looks, swimsuits need proper care.

Whether you swim in the ocean, lake or in a pool, remember to wash your bathing suit after swimming each time. Salt, sand, chemicals, tanning lotions and perspiration are hard on the garment. When left in a bathing suit, they weaken the fibers and dull bright colors.

You can prolong the life of your swimwear by laundering according to label instructions. Make

sure you are using enough detergent to remove the residues. If you can not launder it immediately after swimming, at least rinse out the bathing suit and thoroughly wash it later.

Details for 1984 swimwear include skirts, ruffles and shirring as well as belts and sashes. Many bathing suits have matching jackets or skirts that can be bought separately. Care of these accessories as you would the bathing suit, washing soon after exposure to salt, water and lotions.

## WASH SNEAKERS FREQUENTLY

Sneakers and running shoes are not just for sports anymore. Some people wear them all day long for work, school or play. Whatever way canvas shoes are worn, they should be

washed frequently to prevent bacterial buildup. Only shoes with molded or vulcanized soles can be machine washed. Sports shoes with cemented soles must be hand washed.

4-H ers ATTEND ELECTRICITY CAMP

Seven Borden County residents were among 125 4-H'ers who spent five days, June 18-22, in the Sacramento Mountains south of Cloudcroft, New Mexico, learning about electricity. Southwestern Public Service Company (SPS) hosted the camp and SPS employees provided the instruction. SPS has sponsored the camps for 26 consecutive years. Front row, right to left, are Will Phinizy, Mickey Burkett, and Gerry Smith. Back row: Samantha Porter, Kristi Stone, Cathy York, and Borden County Extension Agent Kandy K. McWhorter.

### FAILED CROPS

You are reminded that any acreage which is planted and later destroyed by a natural disaster should be reported. You must file an application for disaster credit before replanting to some other crop.

### EMERGENCY HAY AND GRAZING

Due to the recent drought conditions, Borden County producers have been approved for emergency haying and grazing of ACR. If interested, producers must file a request with this office prior to haying or grazing ACR. The rules are as follows:

1. Only ACR owned or operated by the applicant may be grazed or baled.
2. Only livestock owned by the applicant prior to April 18, 1984 will be eligible to graze ACR for the remainder of the non-grazing period or receive benefit for baled hay off ACR.
3. No baled forage or grazing from this ACR may be sold or given to another person.
4. Applicant will need to provide us with the number and type of livestock to receive benefit from the

emergency haying and grazing of ACR.

### CROP CERTIFICATION

July 16th is the final date to report Spring and Summer seeded crop acreage and designate the 1984 Acreage Conservation Reserve Acreage.

July 16th is also the final date to request and pay for the aerial measuring service.

If you request measuring service for the crops and not for the ACR, you must designate the ACR acreage by July 16th.

### ACREAGE CONSERVATION RESERVE

It is strongly recommended that an adequate cover be established or maintained to control wind and water erosion.

Land designated as ACR that is in a 4-row skip is no longer required to have two rows planted to an approved cover.

ACR must be cropland that was planted to a small grain or row crop in 2 of the last 3 years. (Land designated as set-aside in 1982 or 1983 may be

considered as having been planted that year.)

Land tillage operations may be used that control the growth of weeds, enhance soil moisture collection and conservation, and prevent wind and water erosion. This includes, but is not limited to, stubble mulching, mechanical or minimal tillage, chiseling.

Emergency tillage may be used to protect the soil from wind erosion in the event cover crops fail to develop adequate cover for soil protection.

The area designated for conservation use must be a minimum size of 5 acres and have an average width of 1 chain. (66').

### FOREIGN INVESTMENT DISCLOSURE

The Agriculture Foreign Investment Act requires that foreigners who purchase agriculture land to file a report within 90 days of the transaction. The report should be made in the county office in which the land is located.

### HOLIDAY!!!!

This office will be closed Wednesday, July 4th in observance of Independence Day.

Ann Richards, State of Texas Treasurer, signing autograph for Helen Price, Borden County Delegate.

## AIR FORCE SEEKING COLLEGE GRADS

Fort Worth...The United States Air Force is seeking highly qualified female college graduates to meet the Officer Training School Female Pilot Selection Board in September 1984, according to Master Sgt. Stucke, Air Force Recruiting Supervisor here.

Qualified female pilot applicants must be available to enter Officer Training

School by February 1985. "Because of the limited number of vacancies, we anticipate competition being tough," Sgt. Stucke said. "Last year's selectees all had private pilot's license."

Interested individuals may obtain more information from Sgt. Stucke at (817) 429-5079.

## SAD NEWS FOR CHOCOLATE HOUNDS

Chocolate has been blamed for many things over the years from obesity to acne, from hyperactivity to infertility, and now pet death.

In a report from the Texas Veterinary Medical Diagnostic Laboratory (TVMDL) published in a recent Texas Veterinary Medical Journal, chocolate was reported to be the cause of death in a Springer Spaniel dog. The dog died in

seizures one day after eating two pounds of chocolate chips.

The ingredient in chocolate toxic to dogs is theobromine, a caffeine-related stimulant. The stimulant is cleared from the blood at a much slower rate in dogs than in man.

Agitation and loss of bladder control can be symptoms of theobromine poisoning in dogs when seen after they have eaten a large amount of chocolate.

Also reported by TVMDL is the toxicity associated with ingestion of excessive amounts of raw or cooked onions in dogs.

## Borden County INVITATIONAL SHOOT

The Borden County 4-H Shooting Sports Club is going to sponsor the 2nd Annual 4-H Invitational Trap and Skeet Shoot in Gail on July 5th and 6th. Shooting will begin each day at 9:00 a.m. and will last throughout the day.

Teams and shooters from a 250 radius of Gail have been invited to participate. Trophies and shooting tack awards will be given to high placing teams and individuals.

A noon meal will be served each of the two days and a concession will be ran all day.
