By BOB KELLY  
QUESTION: "WHAT ARE YOUR PLANS FOR LABOR DAY?"

DUANE NOKES, 1301 Stark weather: "Mostly leisure, but I might take my children to Lake McClellan."

MRS. A.E. PENNINGTON, 1515 N. Faulkner: "I just had company and I am planning on company next weekend so I am going to clean house."

OCIE STEWART, 705 Lowry: "I am just going to work around the house."

MRS. WILLIS WATSON, 101 N. Dwight: "We visited a dairy at Shamrock Sunday so we are going to stay at home."

**Wisconsin Man Injured At Canadian**

CANADIAN — A Big Bend, Wis. man, Dean Charles Brunn, 39, was transferred to St. Anthony's hospital today following a car-pickup collision early this morning.  
According to Hemphill County Hospital authorities Brunn suffered lacerations and a head injury in the collision, which is believed to have occurred north of Canadian.  
Brunn was apparently the only injury and after receiving emergency treatment was taken to the Amarillo hospital.

**After Hijacking Syria Silent On Fate Of Two Israeli Travelers**

DAMASCUS (UPI)—Despite increasing pressure from Israel Syria kept silent today on the fate of two Israeli men aboard the Trans World Airlines jetliner hijacked to Syria.  
A chartered jetline of the Italian airline Alitalia flew to Damascus to bring out of the four Israeli women on the TWA flight.

Aboard the Alitalia plane were TWA President F. C. Wiser and Vice Presidents Thomas Huntington, Richard Wilson and Gordon Gilmore.

A TWA spokesman said the four officials planned to remain in Damascus to discuss the hijack with Syrian authorities. They were expected to press for the release of the Israeli men.

Israel had demanded the immediate and unconditional release of all six Israelis detained in Damascus after the TWA plane was diverted there Friday while en route from Rome to Athens with 113 persons aboard.

The official Syrian Sana news agency, in announcing Sunday the planned release of the Israeli women, said: "The authorities concerned today completed their interrogation of the detained Israeli women. The necessary arrangements are being made for their departure to Rome."

Sana made no mention of the Israeli men, who were identified in Tel Aviv as Prof. Shomlo Samueloff, 48, a lecturer in medicine at Hebrew University in Jerusalem, and Salah Mousalem, a travel agent from Tel Aviv.

The Israeli women were identified as Mrs. Hava Freud and her daughter Dalia, 15; Mrs. Victoria Shamash, and Mrs. Ardit-Hana Arditi.

In Tel Aviv, there was speculation Syria intends to hold the two Israeli men as hostages to trade them for two Syrian jet pilots who landed Soviet-built MIG-17 jets in Israel last year.

But the Israel government said Sunday night after a cabinet meeting in Jerusalem that there would be no bargaining for any Israeli citizens held in Damascus.

In a hint at possible retaliatory action, the Israeli state radio warned Syria that Damascus is less than 30 miles from Israeli-occupied positions on the Golan Heights.

**JAMES FRANCIS BYRNES**

**90-Year-Old Gov't Official Near Death**

COLUMBIA, S.C. (UPI)—James Francis Byrnes, 90, a self-educated man who became Franklin D. Roosevelt's "assistant president" and Harry Truman's secretary of state, lay near death in a hospital today.

"The outlook is not good," Dr. A. Izard Josey, Byrnes' personal physician, said late Sunday night. "His condition worsened during the day and he lost ground."

"His heart action has deteriorated to some extent," Josey said. "He is not as responsive and his temperature remains elevated."

Byrnes, whose 40-year political career carried him from solicitor of a small rural circuit to the arena of cold war international bargaining, was stricken by a heart attack Friday evening at his suburban home. He showed a slight improvement shortly after evening.

**WEATHER**  
PAMPA AND VICINITY — Mostly cloudy through Tuesday morning. Partly cloudy and warmer Tuesday afternoon. Chance of showers during the period. HIGH TODAY, Lower 80s. LOW TONIGHT, Upper 60s. High Tuesday upper 80s. Variable winds around 12 miles per hour. Probability of rain 20 per cent this afternoon; 40 per cent tonight; and 20 per cent Tuesday. .32 inch of moisture.

**State Employees Pay Raise Goes Into Effect Today**

**Increase May Last For Only Two Months**

AUSTIN (UPI) — State employees officially got a pay raise, but nobody was certain it would last longer than two months and legislators still could not agree on where to get the money to pay for it any longer than that.

Senate tax writers were scheduled to meet this afternoon to consider the \$380 million tax plan voted by House members.

**Texas Holiday Deaths Near DPS Prediction**

By United Press International

The Texas holiday death count for the Labor Day Weekend inched closer today towards the figure predicted by the Department of Public Safety with the thickest traffic still to come.

The roads will become their heaviest today when thousands return home from weekend outings or visits.

But law enforcement officers have a new weapon at their disposal today to help combat the rising death toll. The so-called "implied consent law," which makes breath tests mandatory for persons believed to be driving while intoxicated, went into effect at midnight.

Drivers who do not submit to the tests can have their licenses suspended.

At least 45 persons died violently throughout the state, 37 of them in traffic accidents since the holiday death count began at 6 p.m. Friday. Four (See HOLIDAY, Page 2)

**Pampans Are Restricted To Parlor Picnics**

Pampans awoke this morning to overcast skies and light intermittent showers that restricted their final holiday fling to parlor picnics.

The U.S. Weather Bureau said today the rains would end in far West Texas and would be confined to the Panhandle late this afternoon and tonight posing extreme hazard to motorists returning from Labor Day weekend outings or visits.

Sprinkles started in Pampa mid-afternoon Sunday and have continued intermittently during the past 24-hour period registering an official 32 of an inch as of 10 a.m. today.

Only a tenth of an inch of rain fell in El Paso proper today, but in the surrounding area rain was heavier and caused flooding most notably in the canyon areas. A few roads were impassable.

Showers also fell along the Coastal Plains with the Houston Intercontinental Airport reporting a tenth of an inch. Rain also was reported today in the Panhandle around Amarillo and Dalhart.

The only shower activity reported as the day wore on was in the Panhandle while the remainder of the state had clear to partly cloudy skies and temperatures in the 60s and 70s, but expected to climb.

Scattered showers were predicted for later today in North-west Texas and along the Coastal Plains. Mild temperatures were forecast over the Panhandle and portions of West Texas with warm temperatures seen for other regions.

**Rocky Marciano Killed In Crash**

NEWTON, Iowa (UPI)—Rocky Marciano, former world heavyweight champion who retired from the ring undefeated, died Sunday night in a light plane crash in Central Iowa.

Marciano who would have been 46 today, and two other men were killed when their single engine Cessna 172 lost power, struck a tree and crashed into a pasture.

The other victims were identified as Frank Farrell and Glen Beltz, both of Des Moines, Iowa.

Jasper County Sheriff Darrell Hurley said Farrell and Beltz apparently had flown to Chicago to pick up Marciano for a speaking engagement in Des Moines.

Marciano's body was trapped in the wreckage of the plane. The bodies of the other two men were thrown clear.

"The only thing we can find out so far was that the engine conked out and they went down," said Hurley.

The crash occurred about 17 miles from the new municipal airport in this community 23 miles east of Des Moines.

Part of the wreckage ended up about 200 feet from a small farm pond. One wing was ripped loose and came to rest 200 feet from the wrecked fuselage. The engine was 20 feet from the main wreckage.

RAINY DAY GOLF means umbrellas and rain suits for the golfers and a safe hiding place for the spectators. Spectators were scarce early Monday morning when the final round of the Top O' Texas Golf Tourney started. But golfers like Tommy Herring, Waco, and his caddy, Richard Back, McLéan, continued with their golf despite the weather.

**AT 61st ANNUAL MEET**

**Governors Ask For More Money Without Rules On Spending**

COLORADO SPRINGS, Colo. (UPI) — Tax-troubled state governors clamored today for more federal money with fewer or no regulations on how to spend it.

But for the opening-business session of the 61st annual meeting of the National Governors' Conference, one of its standing committees endorsed, with one notable exception, President Nixon's plan to start sharing federal revenues with the states without strings.

Nixon himself was due to address the governors tonight, presumably about his "new federalism," with a revenue sharing system offering more federal help to finance state welfare programs and a new job training plan.

A committee headed by Gov. Nelson A. Rockefeller of New York was reported ready to ask the conference Tuesday to call for complete federal financing of state welfare programs. However, Gov. Ronald Reagan of California and Gov. John A. Love of Colorado, both Republicans, indicated reservations.

Love appeared in line to become chairman of the conference for the coming year. Governors in both parties were loaded with questions about the Nixon plan to allot \$4

billion more a year to the states for welfare.

And after a caucus Sunday, the Democratic governors indicated they were eager but not yet ready to try to dump the

political fallout from inflation and the Vietnam War on the Nixon administration. They were asking questions about (See GOVERNORS, Page 2)

**Nixon Resumes Effort For More Cooperation**

SAN CLEMENTE, Calif. (UPI)—President Nixon, after a restful weekend, resumed his sales campaign today in behalf of a greater degree of cooperation between federal, state and local governments.

The President and his wife planned to spend Labor Day at the National Governors Conference in Colorado, flying from the western White House to Colorado Springs and returning to Southern California late tonight.

The Chief Executive was scheduled to leave the El Toro Marine Air Station not far from the western White House at 10:30 a.m. PDT, arriving at Colorado Springs, home of the Air Force Academy and the North Atlantic Defense Command (NORAD), about 90 minutes later.

Then would follow a crowded day—a top security briefing at NORAD headquarters, a private dinner for the governors hosted by Gov. John Love of Colorado at the Broadmoor Hotel, then a presidential address to the governors and their guests at the International Center of Colorado Springs. Nixon was not expected back much before midnight, Pacific time.

The trip to the governors meeting in Colorado came after the President spent a recrea-

tional weekend in California. Friday night he flew by helicopter to San Diego to watch a professional football game between the Los Angeles Rams and the hometown Chargers. Los Angeles won, 24-

14. Sunday the President decided not to rush into Labor Day crowds on nearby golf courses and devoted some of the afternoon to the beach at nearby Camp Pendleton. The ocean was cold and the President spent only about 20 minutes in the surf.

Nixon's speech before the governors tonight was expected to be an energetic pitch for what the administration has called "new federalism." This is a term that remains to be tightly defined, but it means essentially a diffusion of federal power in order that states and municipalities have a greater share in their own destinies.

The President is attempting to link revenue-sharing on a limited basis with a massive welfare program which will end up costing the states more money than they are now spending in this field. His welfare program has run into some explosive opposition during the current congressional recess and he was expected tonight, before the governors, to push his ideas strongly.

**State Employees Pay Raise Goes Into Effect Today**

**Increase May Last For Only Two Months**

AUSTIN (UPI) — State employees officially got a pay raise, but nobody was certain it would last longer than two months and legislators still could not agree on where to get the money to pay for it any longer than that.

Senate tax writers were scheduled to meet this afternoon to consider the \$380 million tax plan voted by House members.

But no one expected the Senators to accept the House plan as the solution to the state's financial problems.

The largest revenue raisers in the House tax bill, a half cent increase in the sales tax and a four and a half cent hike in cigarette levies, are direct consumer taxes and the Senate has insisted business bear a larger share of the tax load.

Senators also have demanded new taxes on beer, but the House bill has none. And the Senate has rejected proposals for an entertainment or admissions tax which is one of the provisions included in the latest House plan.

Although the emergency appropriation bill which went into effect today gives legislators two months to agree on a tax plan, state workers are less than cheery about the prospects.

Legislators failed to break the tax stalemate in the first 30-day session called by Gov. Preston Smith, and differences—if any—appeared to be increasing in the second special session.

If the legislators cannot agree on new taxes to support state government by Oct. 31 when the stop-gap appropriation bill runs out, they will have to slash spending to stay within available revenue.

Incredulous state workers saw that in the closing hours of the first special session. If the Senate had not rejected that proposal, most state employees making \$5,000 or more a year would have faced salary cuts. Most state agency heads faced budget cuts of 21 per cent.

The emergency appropriation bill signed by the governor Saturday authorized a 6.8 per cent pay increase for state employees for two months.

Smith sharply criticized legislators for "patchwork financing" but said he had no choice but to sign the bill, without his signature there would have been no funds to pay any state worker anything or to operate state government at all.

"Everybody's been sweating it out whether they were going to get a raise or not," one state worker said.

## Washington Report

BOB PRICE

Congressman Bob Price (R-Texas) today announced that the Justice Department has awarded the State of Texas over \$200,000 to assist the State in its war on crime. Price reported that the grant would be utilized to improve and strengthen State and local law enforcement.

Price declared that the grant was a timely one as it followed the heels of the F. B. I.'s annual report bearing the alarming news that crime in the United States last year increased considerably faster than the population.

The Texas Republican stated that the 16 percent rise in crime during 1968 was contributed to by the tendency of previous Administrations to coddle criminals and encourage lawlessness by a permissive attitude toward social disorder. In Price's view, social disorder and lawlessness cannot be tolerated. "Without law and order, Price warned, citizens will not be safe on the streets or in their homes. The hate and mistrust of our fellow man that this condition will breed will be fatal to freedom as we know it."

Price stated that the responsibility for halting crime in America belongs to every citizen; and for this reason, the cancer of crime could best be eradicated if a concentrated effort were made on the state and local levels to fight crime.

"The Nixon Administration has recognized this fundamental truth, Price declared, and is channeling financial and technical assistance to the cities and the states so that the war on crime can be waged more effectively."

Price also announced that the Office of Education in HEW had informed him that it had made a grant of almost \$9 million indirect assistance to the Texas Education Agency in Austin.

The Republican Congressman reported that HEW advised him that the funds will be used for educational and auxiliary services; instructional equipment and materials, and other services and materials necessary for providing quality education to the disadvantaged. HEW officials estimated that over 4,000 children will participate in the program and that the educational emphasis would be placed on the younger children. Price was assured by HEW spokesmen that the impact of the grant would be spread throughout the State, and concentrated in areas with large numbers of disadvantaged children. Panhandle counties which will benefit from the grant are: Bailey, Castro, Deaf Smith, Hale, and Lamb.

HEW officials declared that the Texas grant reflects the Agency's desire to give the children of migrant laborers compensatory education designed to provide equal educational opportunities for all Americans.

## Crazy World Of Washington

COLORADO SPRINGS, Colo. (UPI)—State governors are meeting again to make their perennial call for a greater voice in the federal system, to wait about red tape in Washington and to moan about their own budget and tax problems.

President Nixon's proposal to start sharing federal revenues with state and local governments—to spend as they see fit—gets a more enthusiastic reception at this National Governors' Conference than from the Democratic majority in Congress.

The same is true of his proposal to consolidate federal aid to spending by the states and their cities and other local subdivisions. The freshest Census Bureau calculations, completed in August, cover state and local government spending for fiscal 1969—the year that ended June 30, 1968.

Those figures showed such spending had risen to \$102 billion, up 9.7 per cent from the previous year and up more than 100 per cent over a 10-year span.

Federal government spending also more than doubled during that decade and federal aid to state and local government almost tripled—from \$6.7 billion to \$18.6 billion. Federal grants for fiscal 1970—the year that ended June 30, 1969—totalled about \$20 billion.

During what is called a period of taxpayer revolt, raising states taxes means taking political risks. So the governors began eyeing the U.S. Treasury in 1965 as a possible tax collection agency for their states.

## Hollywood Reports

HOLLYWOOD (UPI)—Men would you strip to the buff in a roomful of females for \$7,000 a week?

Tex Barnum wouldn't.

It's the young actor who refused a small role in "The Moonshine War" with Richard Widmark and Patrick McGowan because the script called for him to peel off his clothes.

"It's a matter of principle," Tex said. "It made me stop and think what Gary Cooper would have done. And I just couldn't."

Director Richard Quine had difficulty, even among the ranks of starving actors, to find a performer who would accept the part. A similar role for an actress was quickly filled. For whatever reason girls are less inhibited about disrobing in crowds.

Was Born In Lubbock

Barnum was born and raised in Lubbock, Tex. His real name is Charles Akins. He has reddish hair, a mustache and appears to be in his early 30s. Tex was given his stage name by John Ford on the set of the "Alamo" 10 years ago in Brackettville.

Akins had gone there seeking movie work when he was expelled from Texas Tech for bootlegging booze to dry Kinney County from wet Amarillo in Potter County.

"It was John Wayne who hired me," Barnum said.

"I followed him around for a week showing him my clippings from little theater work. Finally he got mad, and said, 'Get on that horse and ride at a full gallop around that tree down there and back to me.' Then he threw a dime in the dirt about a foot in front of him."

Wayne looked sore. He said, "If you stop on that dime you're hired. If you run over me I'll knock hell out of you."

Stops Horse On Dime

Barnum stopped the horse on the dime and was given work as an extra and stunt man in the picture. Director Ford who stopped by to visit changed Akins' name.

Asked if he didn't need the \$7,000 for stripping nude, Tex replied, "Sure I could use the money."

"But I'm against nudity in films. I'd be embarrassed to take off my clothes."

### SELF MIND CONTROL

Learn to control your mind. The Self Controlled Mind can move mountains, conquer disease, create masterpieces, adapt the body to stress, protect illnesses. SELF MIND CONTROL Training is affected in three basic courses.

**No. 1 - 101 CR-12 Hours**

Learn to control vitality, energy for body-increase efficiency, concentration, self-control. Correct nervous tension which sometimes causes headaches, insomnia, etc. Learn to remember to control your dreams.

**No. 2 - 202 GSI - 12 Hours**

Learn technique for improvement of memory, creativity. Learn pain control for dental work, etc. Learn habit control — such as nailbiting, over eating shyness smoking. Learn effective prayer.

**No. 3 - 303 ESP - 24 Hours**

Learn to develop intuitive sense and ESP to solve personal problems such as finding lost objects, learn to solve business problems such as investments, etc.

**INTRODUCTORY LECTURE FREE.**

First Christian Church (South Entrance) 7 p.m. September 4. — First class will begin at 8:30 p.m. and will be held each Thursday evening. For further information call Vivian Huff 669-6522 or Marjory Duenkel 669-3314.

The Choice Will Be Made By The Voters Of Pampa!

Will we take advantage of the one-cent city sales tax available to us or will we accept a 50c per hundred dollar valuation increase in "Ad Valorem" or property taxes?

There are many questions to be answered regarding the Penny for Pampa — some of which are answered here:

- Q. What items are subject to the 1% municipal sales tax?
- A. The 1% city sales tax is applicable only to those sales now taxed under the State Sales & Use Tax act.
- Q. There is a 2% State tax on automobiles. Would the city tax also apply to automobile sales?
- A. No. The 2% State tax on automobiles is an excise tax; the municipal sales tax would not apply to automobile sales.
- Q. Does a person residing outside of the city limits pay the 1% municipal sales tax?
- A. Yes, when he makes a purchase of personal property subject to the tax in city which has adopted the local sales tax. In return, he enjoys the city's street facilities, police protection and other advantages of the city for which residents pay the major share.
- Q. Is the local sales tax regressive—that is, will it cause a particular hardship for lower-income families?
- A. A sales tax has more elements of equity than any other type of tax, and this is particularly true in Texas, since so many essential items are exempt from the sales tax.
- Q. Are city sales tax payments deductible from our Federal income tax reports?
- A. Yes.
- Q. Who can vote on the 1% local sales tax?
- A. Any registered voter in the city. A simple majority is required to put the sales tax into effect.

We want to answer your questions, too — If you have a question regarding the city sales tax, please use the attached coupon or a letter and mail to Citizens' Information Committee for City Sales Tax, c/o J. M. Nation—Box 658, Pampa, Texas.

To: Citizens Information Committee for City Sales Tax  
J. M. Nation, Chairman, Box 658, Pampa, Texas

**YES,** I want to know more about a penny for Pampa!

### Wall Street Chatter

NEW YORK (UPI)—Market psychology seems to be positive, since the list continues to show durability in the face of adverse news items, says Bache & Co. Actually, a trend in the war against inflation is not readily discernible. "Multiple interpretations can be made with the same figures," and the market's lack of direction mirrors those subtleties, it adds.

Since the August lows, the equity markets have been going through a testing phase and the initial evidence has been encouraging, observes Vanden Broeck, Lieber & Co. However, a great disparity exists between the "performance of the favored few market leaders the massive list of laggards." It is clear that the investment community has decided to place its equity confidence in a limited area. "Companies in businesses which seem most likely to grow despite any economic downturn and which are well enough financed to be able to bear the stringencies of further credit pressures," the firm says.

The stock market has been discounting deflation most of this year, observes Winslow, Conu & Stetson. It should now, logically, turn its attention to anticipating the psychological inflationary effects of monetary policy reversal once the authorities see their planned business recession starting, the firm adds. "In past years it was precisely this kind of negative economic evidence, first visible after Labor Day, that brought on stock market weakness. In the upside-down world of 1969 such indications should be grounds for enthusiasm," the firm says.

TPO Inc. suggests buying leading performers at current levels for intermediate gains. Over the next two weeks the list appears likely to back and fill over a narrow range, the firm says, and many leading issues may continue to advance while others consolidate for possible future gains.

#### SHOOTS DOWN PLANE

TOKYO (UPI)—North Vietnamese armed forces shot down an unmanned U.S. reconnaissance plane Sunday about 40 miles south of Hanoi, the North Vietnam News Agency claimed today.

It said the plane was the 3,323rd American aircraft downed by North Vietnam.

### Backstairs At The Whitehouse

United Press International No Manila trip for LBJ: Plans to invite Lyndon B. Johnson and Charles de Gaulle to the inauguration next month of the cultural center of the Philippines in Manila were dropped for political reasons. Had Johnson and De Gaulle accepted, their presence side by side with Philippine President Ferdinand E. Marcos might be interpreted, mischievously by political wags as a sign Marcos is about to join Johnson and De Gaulle among the ranks of former Presidents. That's an impression Marcos wants to avoid. He is seeking a new term in presidential elections Nov. 11.

Mideast Maelstrom: Western officials are increasingly concerned about the escalation of Arab-Israeli fighting in the Middle East. But they doubt that all-out war will occur this year. All reports indicate the Arabs are not ready for such conflict and a tight hold on the flog of weapons to the Arab world. The fear remains, however, that an incident like the Jerusalem mosque fire or the TWA hijacking could send the situation out of control.

Big Four Talks: Talks on the Middle East crisis among the Big Four powers—the United States, the Soviet Union, Britain and France—will not be resumed until Russian Foreign Minister Andrei Gromyko goes to the United Nations General Assembly later this month. If the French and British foreign ministers are not there Gromyko will confer with U.S. Secretary of State Rogers and possibly even President Nixon, according to word from Moscow. Gromyko will seek to get the United States to accept the Soviet position that Israeli troops withdraw from occupied lands before the Arab world makes any concessions.

#### ENJOY HOSTILITY

WASHINGTON (UPI)—Former Cabinet member John W. Gardner says humans seem to enjoy hostility to one another. Gardner, secretary of Health, Education and Welfare in the Johnson administration and now chairman of the Urban Coalition, told the American Board of Professional Psychology Sunday psychologists should study why man seems to enjoy adversary relationships.

**7 For 2.99**

By Abigail Van Buren

DEAR ABBY: I am absolutely beside myself with the news my parents gave me this morning. They drove over here and calmly announced that after 44 years of marriage they are getting a divorce!

They have had their differences like all married couples, but they have never separated — not even for one day. I can't imagine what has come over them.

Dad says that he is 70, and if the good Lord gives, him another five years, he wants to live them in peace. Mother who is 69 says she feels the same way.

I suggested a larger apartment with two bedrooms, frequent separate vacations, a trial separation — anything, but divorce. But they insist they've thought it over and this is what they both want.

THEIR DAUGHTER: DEAR DAUGHTER: Your parents have a right to make their own decisions, for their own reasons, without loss of love or respect from their children and grandchildren.

DEAR ABBY: When I read the letter in your column from the man who named his parakeet "STUPID" because he couldn't get the bird to utter one word, I wondered if maybe the man wasn't stupid.

SAY VOWS

MRS. ROBERT WOLFE JR. ... nee Marilyn Giblin

Mr. and Mrs. Glenn Giblin, Pampa, announce the recent marriage of their daughter, Marilyn Marie Giblin, to Robert C. Wolfe Jr., son of Mrs. Joyce Smith, Pampa.

good for anything, except maybe laying eggs. A MALE (OF COURSE)

DEAR ABBY: I'll bet the following open letter could have been written by thousands of girls across the country.

Dear "Friends," Remember me! I'm your old girl friend. The one you used to have so much fun with before you met "him."

I'm the one who sat patiently and listened to you talk about china patterns and sterling, but you never really cared what I had to say.

Then the diamond appeared on your finger. . . and you suddenly remembered me again. You asked me to shell out \$50 for a bridesmaid's gown.

So, "friends," you may have forgotten me but I'll never forget you — or the lessons you taught me.

HURT AND BITTER

DEAR HURT: Don't cry. She'll remember you again. When the baby comes.

CONFIDENTIAL TO "FULL OF QUESTIONS:" A good marriage is not "luck." It's the result of constant and conscious effort.

County HD Agent Describes Care For Fall Fabrics

With the purchase of back-to-school clothes, fiber content in some new garments probably will be unfamiliar.

Information on hang-tags and labels tells the care story, according to Jimmie Lou Wainscott, Gray County home demonstration agent.

"Development of fabrics, blends and finishes progresses so fast, even textile experts can't always identify fibers."

Keep a small card-file box near the washer. Each time a member of the family gets a new garment, new bedspread or curtains, take off informative tags and put them in the file box — identifying each tag as "Mary's pink blouse" or "green nylon spreads."

The Women's Page

WANDA MAE HUFF, WOMEN'S NEWS EDITOR PAMPA DAILY NEWS PAMPA, TEXAS 62nd Year Monday, September 1, 1969

Autumn Beckons Rugged, He-Man Styles

With all the talk about unisex, a guy's got to work twice as hard at looking masculine. After all, when the women in your life are wearing your pants, shirt and now, even your tie — you've got to reinforce your he-man image just to keep them in line.

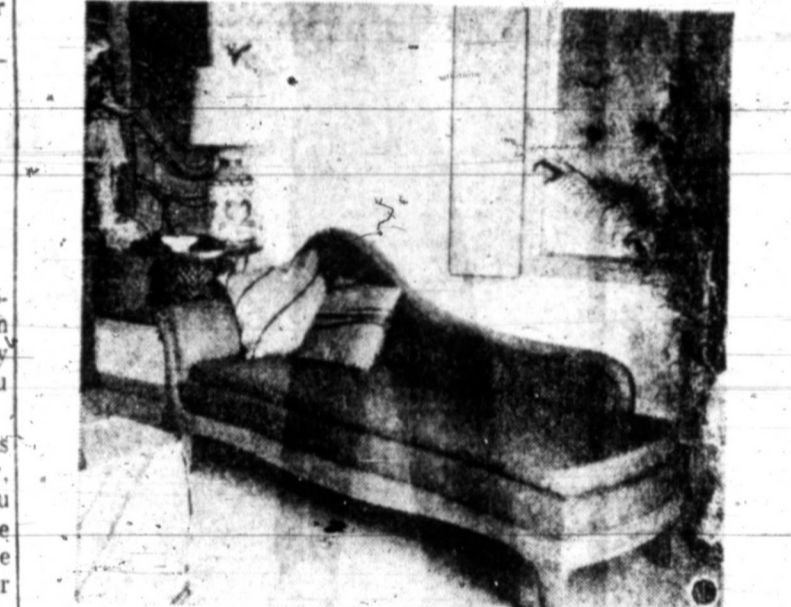

Fortunately, there are several things going for you. Fall '69 will see a return to rugged fashion: Beefy tweeds, souped-up plaids, leather, brass, . . .

For a weekend in the country you might choose an Irish Fisherman's Sweater and corduroy stopevies, a hefty cigar. In the evening, a twill country suit, a cigar of medium length and thickness — maybe one with a tip.

For a formal evening at home, a velvet jacket, close fitting tartan trousers. The cigar should be slim and not too long. For a gala evening out, an Edwardian formal suit, ascot shirt with stickpin.

STEP UP TO THE dashing cape, here in smooth melton . . . worn with casual slacks of tan knit textured twill, polyester. For the active man, support hose.

COLORFUL—Cotton can provide the bold color that gives dramatic impact to home furnishings. Here it's used in a rich shade of royal blue as the covering for an Empire-inspired sofa in the bedroom of a year round beach home. Fabric by David & Dash.

You join the new home scene buy just for show. For instance, first of all by sweeping the floor the new pajama sets are so — in the most elegant sense handsome — they are intended to — with ankle-length pants or double for hosting as well with long gowns. Nor do you as sleeping.

DOLLAR DAYS GINGHAM 89¢ yd. Fall Suitings 1.98 yd. Cotton Sportswear 99¢ yd. Assorted Fabrics, 1 table 1/2 PRICE! REMNANTS 1/3 OFF! GRAND OPENING ANNOUNCEMENT SANDS FINE FABRICS

links and tie bars and even cigars. In fact, the right cigar in the proper setting conjures up all the stimuli that have always connoted maleness: the smell of leather, wood and tobacco, the look of riding clothes, or boots, Rhett Butler and James Bond.

And — essential to any fashion prop — cigars are available in a huge variety of styles to fit your mood and the fashion occasion.

At the theatre, a striped single-breasted suit, shaped incisively at the waist. . . high vent in the back. The trousers should be angled so they just cover the back of the shoe.

Intermissions are brief so the smoke is chosen accordingly. . . a short, thin cigar, elegant enough to offer your female companion. Unless, of course, she's toting her own.

Make an investment in the youth of today as a Girl Scout leader. All you invest is yourself with the amazing profit of enjoyment, satisfaction, opportunity, leadership and recognition.

Your Horoscope JEANE DIXON

TUESDAY, SEPT. 2 Your birthday Tuesday: Your main task in the coming year is to achieve simplicity.

LIBRA (Sept. 23 - Oct. 22): Tuesday seems full of sudden pressures for new thoughts, decisions, changes of pace. Some long-term connections are delicately balanced and can be lost rather easily if you are careless.

TAURUS (April 20-May 20): After a slow start, the day brightens up and proceeds well according to what you put into it.

GEMINI (May 21-June 20): Decisions and important actions are best done later in the day when luck and sensitivity are greater.

CANCER (June 21-July 22): Conditions are improving for your long-range interests. At short range there seems a passing disappointment about financial details.

LEO (July 23-Aug. 22): Take the conservative, straightforward approach. Where the home is concerned, everybody knows things that are not on the surface to talk about.

VIRGO (Aug. 23-Sept. 22): Consolidation is the keyword for Tuesday. Any outworn or outdated belongings should be cleared out.

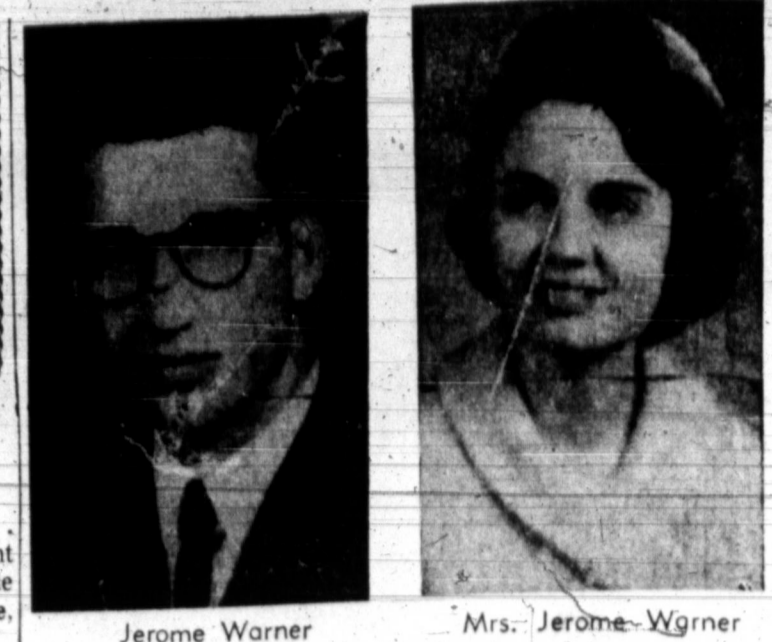

SCORPIO (Oct. 23-Nov. 21): New ideas are quite attractive Tuesday morning, but shouldn't be acted upon until afternoon. Deals which tend to help your long-range security are indicated — get busy.

SAGITTARIUS (Nov. 22-Dec. 21): The temptation Tuesday is toward too much of everything, as all seems to be going well. Restrain any urge to answer complaints with another.

Capricorn (Dec. 22-Jan. 19): You have no special advantage, but something you hear Tuesday morning could turn out later to be of spectacular importance!

Aquarius (Jan. 20-Feb. 18): Simplify matters Tuesday morning by either staying out of squabbles or by holding a single direction. The afternoon is prime for creative opportunity.

PISCES (Feb. 19-March 20): Your intuition now is mixed with imagination and baseless anxieties — remain calm. The evening is much better, good for parties.

# Other States Pattern Rates By Texas Laws

Texas auto rate-making procedures are the object of envious glances from the rest of states, according to a news release today from Kay Fancher, president of the Pampa Insurance Exchange, whose membership is made up of local insurance agents.

Speaking at a recent state-wide meeting of insurance women in Austin, Dwight W. Sleeper Jr., of Dallas, president of the Texas Association of Insurance Agents, stated:

"Texas insurance men have long believed this state has the finest system of insurance regulation in the entire country. At this time when a special committee is reviewing auto rate-making procedures, it may be well to stop and consider what outsiders think about Texas insurance regulation."

A United States Senate Committee said in 1965 after a

hearing, "The State of Texas has for many years operated with great success a state rate-making bureau."

"The South Carolina Legislative Committee studying insurance said this in 1966, 'Texas-style competition, in short, appears to enhance the welfare of the insured rather than diminish it. The Members of the Committee who went to Texas cannot believe, and do not believe, that the relative market stability found there is accidental and a matter apart from the Texas rate-making system.'"

"In November 1967, the Kentucky Research Commission published a study of state rating laws and said about the Texas method of operation, 'It is interesting to note that on appeals to the courts, the State Board of Insurance's annual automobile rate adjustments have always been upheld.' Also, 'The assigned risk plan handles about three percent of the insured vehicles in Texas which indicates pretty much that automobile insurance is readily available.'"

"Certainly it is no accident, continued Mr. Sleeper, that even though Texas is first in the number of highway miles and third in the country in the number of motor vehicles registered, there are 33 states that have higher average auto insurance rates. Just in the past three years alone auto rate increases granted by the State Board of Insurance totaled \$40 million less than the companies asked for."

"Texas has a dedicated staff that administers our insurance laws. In fact, so highly respected is the state's professional actuary that the U.S. Department of Transportation is now drawing on him for advice."

"Our rate-making system has been followed, with minor modifications, since 1927. There are numerous additional regulatory advantages that Texas policyholders receive. For example, the State Board of Insurance regularly reviews the claim paying practices of companies and enforces guidelines against cancellation," Sleeper said.

**Now You Know**

By United Press International

The French alpine village of Saint Cyrice has no inhabitants but is listed in the dictionaries of communities because the graves of its cemetery are still visited each autumn by relatives.

**WORLD ALMANAC FACTS**

The Nobel Prizes, awarded annually to those individuals selected as having made the greatest contributions in the fields of physics, chemistry, medicine or physiology, literature and peace, are funded through the will of the late Alfred B. Nobel, Swedish inventor and philanthropist. The World Almanac cites Nobel's most notable invention as being in the field of explosives, specifically dynamite.

# Kids Know More About God Than Parents

NEW YORK (NEA)—When the Rev. Tom Haggai kisses somebody, he doesn't fool around, which, more or less, is the story of how Zsa Zsa Gabor went kissless in Chicago.

It's not that the Rev. Haggai, who spends all his time roaming around the country speaking to and about (and trying to relate to) the youth of America, has anything against movie stars in general or Miss Gabor in particular. It's just that he's busy and doesn't like to waste time—even the scant few seconds it would take to plant

a lip or two on the well-photographed face of a highly agreeable Hungarian.

"I was speaking at a weekend conference in Chicago," the robust clergyman recalled the other day, sipping a cup of coffee in a crowded Manhattan restaurant while all around him the martinis flowed like martinis, "and Zsa Zsa was on the same program. One evening she was wandering around, kissing people, all in good fun, and she came to me. Being a strange bird, I refused, saying something like, 'No thanks. It

wouldn't mean anything to you and there's nothing in it for me.' If nothing else, I'll bet she remembers me."

The Rev. Haggai is a hard man to forget.

"He is," says a man who knows him, "the most non-religious minister I ever met."

But that's not quite true.

"I'm religious enough," says the Rev. Haggai, "it's just that I feel that the church as a whole has failed the young people of the nation. There are a lot of kids who never go to church who know more about God than

their church-going parents ever knew. We 'old folks' could learn a lot from them if we'd take the opportunity to try."

It's opinions like that that got the Rev. Haggai from where he was (High Point, N.C.) to where he is today—usually on his feet making a speech or 30,000 feet off the ground on his way to a speaking date.

Back in his High Point days, the Rev. Haggai, a Baptist, watched his church grow from 85 people to 800 in his seven-year stay.

# PAMPA Business News...

**COLDS AND OTHER** communicable diseases will be easily caught as cooler weather and school brings people closer together. But B & B Pharmacy can help residents through fall and winter with a complete line of drug items and 24-hour emergency prescription service if needed.

## Pharmacy Carries Needed Drug Items

Fall is an easy time to catch a cold. The widely varying temperatures and types of weather that accompany the transition from summer to winter, and students constantly coming in contact with each other in classrooms, both contribute heavily to cold-catching.

B & B Pharmacy, Ballard at Browning, has complete line of pharmaceutical needs to help keep that first sniffle from getting worse.

But colds are not the only disease people can catch as they begin spending more time indoors, though. So B & B Pharmacy makes a point of supplying every drug needed as well as keeping two full time registered pharmacists on duty.

For customers who are at home and too ill to drive or perhaps find themselves without transportation, B & B Pharmacy will provide free delivery on prescription needs.

And for emergency calls, the pharmacy has an emergency number which can be called any time of the day and on holidays.

B & B Pharmacy's service to residents does not stop with drug items.

Many top name cosmetics are available from the cosmetic counter: Frances Denney, Jacqueline Cochran, Bonnie Belle (non allergic), Dorothy Gray, Cover Girl and Revlon.

B & B Pharmacy supplies smoking needs, too. They have pipes, tobacco, cigarettes, and an especially large variety of cigars for the cigar fan to choose from.

The store also sells film and film processing and will give away a free roll of film with each eight good negatives developed.

At their soda fountain customers can have a delicious meal or stop for a cup of coffee on a chilly morning.

And with every purchase, customers at B & B Pharmacy receive their choice of S&H Green Stamps or the new United States Savings Stamps with which United States Savings Bonds can be purchased.

B & B Pharmacy is open Monday through Saturday from 8 a.m. to 8 p.m.

**SCHOOL AND ART** supplies are both available at one stop at The Hobby Shop, 112 E. Francis. The Hobby Shop has supplies for artists, scientists, model-builders — everyone who has a hobby. They also offer experienced advice and "how-to" books for those entering a new hobby field.

## School And Art Supplies Available at Hobby Shop

Amid the frantic search for school and art supplies there is one place both can be found — the Hobby Shop, 112 E. Francis.

The Hobby Shop has notebooks, paper, pencils — all school supplies — as well as every art tool.

Art has transcended language barriers in its ability to communicate. With art man seems to find the medium to express feelings for which there are no words.

The Hobby Shop, 112 E. Francis, can supply the artist with everything except possibly the inspiration.

Oils, Simmons artist brushes, canvas board, canvases and stretcher frames — all are available at The Hobby Shop. And for the finished product, the store sells ready-made frames in all sizes or will custom build frames from its huge open stock of molding.

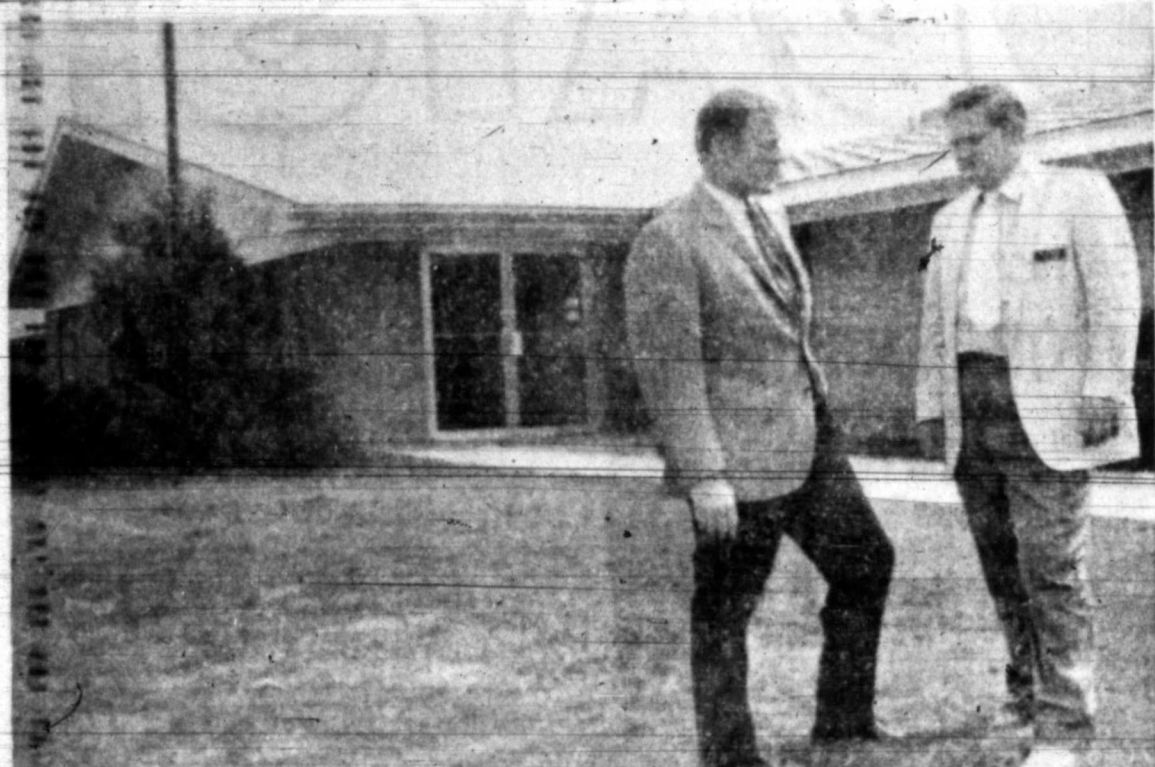

The store also has pastels, supplies for tote painting, leather crafting kits, wood and leather carving kits. And it has a large supply of hard-to-find balsa wood.

The Hobby Shop is also for the hobbyist.

Unfinished box purses come in a large stock and variety of sizes and shapes at the store. And it sells all the trim and finishing items so that the "do-it-yourselfer" can add her own personal touch to it.

Furniture refinishers find base paint, toner and protective coat, gold leafing and experienced advice at The Hobby Shop.

The Hobby Shop is for the spare time scientist as Pampa's supplier for chemicals and lab equipment.

**EXPANSION AND IMPROVEMENT** are two important words at Casa Del Nursing Center. Ken Jennings, left, district director, and Fred Williams, manager, pause a moment near the entrance to the center to discuss future plans.

## Casa Del Nursing Center Looks Toward Expansion

Improvements to Casa Del Nursing Center on West Kentucky continue to be made and projected.

Ken Jennings, director for the company which recently purchased the home, was in Pampa last week to discuss expansion of the home with Fred Williams, manager.

Tentative plans call for as many as twice the number of rooms the home now has, Williams said.

"We will continue expanding as long as the need for space is there," he said.

The goal of Williams and the new owners of the home is to make Casa Del Nursing Center a part of Pampa and Pampa a part of Casa Del Nursing Center.

"Our resident guests are the people who make Pampa, and their children are committed leaders now," he said.

Casa Del Nursing center is the modern approach to nursing homes, he said. People do not have to be ill to reside there. They move out here when they don't want the trouble of keeping up a house any longer.

The public is invited, and encouraged, to visit Casa Del Nursing Center.

Casa Del Nursing Center will work 100 per cent with any church, service or social groups who wish to come out to visit or present a program.

Anyone desiring information on the home can drive by and talk to Fred Williams or Steve him a call, and he will come out and see them.

Those seeking consultation on Medicare policies are also invited to come and use Casa Del's free Medicare counseling services.

Fred Williams and Casa Del employees are anxious to answer any questions anyone has and to show Pampans the new concept in nursing homes.

## Addington's Headquarters For Western Clothing Of All Types

Back-to-school usually means new clothes and, Addington's Western Store includes one of the largest stocks of all types of western clothing in the area.

Carrying Tem-Tex, Miller and Pryor shirts, the store has one of the largest stocks of western shirts in this part of the country.

It also has the largest stock of jeans in a 32-county area.

The once common phrase "blue jeans" has fallen into disuse somewhat as long-lasting, sharp-looking jeans now come in almost every color imaginable.

And Addington's Western Store, 119 S. Cuyler, has all the latest styles and colors. They see flare bottoms, bell bottoms, and ranch style in regular or permanently pressed versions in the Levi, Lee Rider and Wrangler brands.

Addington's Western Store is the second-largest dealer in jeans in a 32-county area.

The store has been serving Pampans since 1926 supplying clothing needs, leather goods and other accessories.

Saddles, saddlery, bridles, and blankets made by the Tex-Tan Western Leather Company can be found in the store.

Addington's Western store sells Justin and Cowtown boots and is the exclusive dealer for Tony Lama boots.

The store is also the exclusive dealer for Bradford hats, Haskins gloves, Case knives,

and Lassoe and Prior women's wear.

One of the newest additions to the store is a complete ladies' and children's department carrying the latest in women's and children's western fashion.

At Addington's Western Store there is a complete stock of western items.

# PHS Grads To Attend School At Goodwell

Three Pampa High School graduates have enrolled for the fall term at Goodwell State College in Goodwell.

Tommy Jack Davis, son of Thomas J. Davis, 1514 N. Faulkner, plans to major in business administration. His activities in high school included football in his sophomore year; Distributive Education Club; and homeroom vice president in his senior year.

Johnny Ted Knight, son of Mrs. Christine Knight, 1929 N. Wells, has enrolled in pre-engineering courses. At PHS, he was active in football and baseball for three years; was an honor student in Spanish and was a member of Future Teachers Association.

Joe Allen Grayson, son of Mr. and Mrs. George Gray, 605 N. Sumner, has enrolled in business administration.

# The Lighter Side

By DICK WEST

WASHINGTON (UPI) — In a tentative examination of the Apollo 11 rock collection has given scientists a pretty good idea of what the moon is made of.

Once that project is completed, I hope science will then endeavor to solve one of the other great mysteries of the universe: Namely, what are hot dogs made of?

It was vital the moon rocks be examined in a pristine condition before being contaminated by man. This also is true of hot dogs. And time is of the essence.

The Agriculture Department decreed last week that hot dogs henceforth may contain up to 15 per cent chicken meat, and in some cases chicken skin.

The last hot dogs I bought already contained beef and pork; water, salt, corn syrup, xanthine, flavorings, sodium erythorbate and sodium nitrate. Once chicken is mixed in with

the other stuff, it may become impossible to analyze them.

Even when the component parts of frankfurters are listed on the labels, percentages are omitted from the table of contents. The consumer therefore does not know how much of what he is eating.

The manufacturers presumably know, but they aren't talking.

Moves by consumer organizations to open up the hot dog see what's inside, thus far have failed. It is known, however, that some hot dogs are more than 50 per cent fat.

I had a talk about the matter this week with Dr. Wiener von Wurst, the German World War II hot dog expert who had become a driving force behind the American frankfurter program.

"Dr. Von Wurst," I said, "why is it important to determine the composition of hot dogs?"

# Private Industry, Government, Education Need Economists

Economists are concerned with the problems which arise in utilizing limited resources of land, raw materials, manpower and manufactured products so as to meet, as well as possible, people's many unsatisfied wants.

Some may analyze the relation between supply of and demand for goods and services and the ways in which goods are exchanged, produced, distributed and consumed; some are concerned with such practical problems as the control of inflation, prevention of depression and the development of farm, wage, tax and tariff policies; others develop theories to explain causes of employment and unemployment or the ways in which international trade influences world economic conditions; and still others are engaged in collection and interpretation of data on a wide variety of economic problems.

Some economists are employed as teachers in colleges and universities, and as researchers in government agencies, private industry and nonprofit organizations.

Most economists in the federal government are in the fields of agriculture, business, or labor economics, or in international trade and development. They may plan and carry out studies involving

the collection of basic data in these fields, use these and other data to analyze the need for changes in government policy, assess the economic condition of the nation, write reports on their findings and present these reports before policy-making bodies.

Economists employed by business firms provide management with information to be used in making decisions on such matters as the markets for and prices of company products, recommendations regarding government policies affecting business or international trade, the advisability of adding new lines of merchandise.

REFUELED IN FLIGHT  
WASHINGTON (UPI) — The Air Force C-5 Galaxy has become the world's heaviest aircraft to be refueled in flight, according to the Pentagon. The huge transport took on 1,000 pounds of fuel from an Air Force KC135 tanker aircraft after both crafts took off from Edwards Air Force Base, Calif., Friday afternoon. Adv for ams sun aug 31

BEGINS NEW POLICY  
NEW YORK (UPI) — The Transit Authority began a new policy Sunday of accepting only exact fare from passengers on its buses to discourage holdups of drivers.

The 20-cent fare is put in a locked strongbox which the driver cannot open.

BUY — SELL — TRADE WITH CLASSIFIED ADS

# Aerospace: Star-Studded Career

By ERNIE HOOD

Distributed by NEA

Aerospace engineers are concerned with all phases of the development of aerospace products from the initial planning and design to the final manufacture and testing, usually specializing in a particular area of work such as structural design, guidance and control, instrumentation, etc.

Employment opportunities for these people are expected to be favorable all through the 1970s. Continuing developments in supersonic, subsonic and vertical-lift aircraft and advancement in space and missile activities should result in a moderate increase in requirements for aerospace engineers and additional job opportunities will also arise from the need to replace engineers who transfer to other fields, retire or die.

The level of defense expenditures is an important determinant of the demand for aerospace engineers because the majority of these engineers are engaged in activities related to national defense. If defense activity should differ substantially from the level prior to the Vietnam build-up, the demand for aerospace engineers will be affected accordingly.

Average (median) annual starting salaries for engineering graduates with the bachelor's degree in the aerospace and defense industry were more than \$8,450, according to a recent survey conducted by the Engineering Manpower Commission. Graduates with the master's degree and no experience usually received from \$1,000 to \$2,000 a year more; and salaries for graduates with the doctor's degree were generally between \$11,000 and \$14,500.

A bachelor's degree in engineering is the generally required for entrance into engineering positions. Well-qualified college graduates with training in physics, one of the other natural sciences, or in mathematics may qualify for some beginning positions in engineering. Some persons without a degree are able to become engineers after long experience in a related occupation—such as draftsman or engineering technician—and some college-level training.

Advanced training is being emphasized for an increasing number of jobs. Graduate degrees are desirable for beginning teaching and research positions, and are helpful for advancements in most types of work. In some engineering specialties, such as nuclear engineering, training is generally available only at the graduate level.

Education leading to a bachelor's degree in engineering is offered by about 250 colleges, universities, and engineering schools located throughout the country. Although curriculums in the larger branches of engineering are offered in most schools, some of the smaller engineering specialties are taught in relatively few institutions.

Conferences with high school counselors are suggested for those contemplating an aerospace engineering career.

General information on engineering careers—including student selection and guidance, professional training and ethics, and salaries and other economic aspects of engineering—may be obtained from:

Engineers' Council for Professional Development, 345

East 47th St., New York, N.Y. 10017.

Engineering Manpower Commission, Engineers Joint Council, 345 East 47th St., New York, N.Y. 10017.

National Society of Professional Engineers, 202 K St., N.W., Washington, D.C. 20006.

Information on engineering schools and curriculums and on training and other qualifications needed for entrance into the profession may also be obtained from the Engineers' Council for Professional Development. Information on registration of engineers may be obtained from the National Society of Professional Engineers.

In addition to the organizations listed above, other engineering societies represent the individual branches of the engineering profession. Many are listed in the following publications available in most libraries:

Engineering Societies Scientific and Technical Societies of the United States and Canada, published by the National Academy of Sciences, National Research Council.

Some engineers are members of labor unions. Information on engineering unions may be obtained from:

The American Federation of Technical Engineers (AFT-EO), 900 F St., N.W., Washington, D.C. 20004.

The Pampa Daily News

A Watchful Newspaper EVER STRIVING FOR THE TOP O' TEXAS TO BE AN EVEN BETTER PLACE TO LIVE

The Pampa News is dedicated to furnishing information to our readers so that they can better promote and preserve their own freedom and encourage others to see its blessing.

Our Capsule Policy

The News believes each and every person would get more satisfaction in the long run if he were permitted to spend what he earns on a volunteer basis rather than having part of it distributed involuntarily.

Farewell, Welcome

The calendar, of course, tells us otherwise. Three weeks of summer remain. But somehow, Labor Day has come to mark the end—and the beginning.

There quite this sense of pause, of time out, from the relentless march of hours, days and seasons. Labor Day has another, official raison d'etre, of course. We salute with good reason the nation's workers.

Perverved Viewpoint

We must look for and want all kinds of viewpoints when assessing the value of President Nixon's welfare plan. But the most perverted viewpoint so far advanced—in our opinion, is that of President George Meany of the AFL-CIO.

of jobs during the vacation period this summer. A half million young Americans lost an opportunity to learn by doing. More hundreds of thousands of people are on welfare because they are not trained for modern work.

Stealing To 'Help The Poor'

A retired thief has appealed to the Yugoslavian government for a pension. The petitioner is Sevk Zahirovic-Revo, who is 83 years old and claims the state should pension him because, like Robin Hood, he stole from the rich and gave to the poor.

after schools, which is the top in our state budget. The federal government spends each year on welfare in all its categories we've forgotten, but the latest proposal alone—the Nixon guaranteed income—would add \$2 1/2 billion to the total.

The American Way

By D. R. SEGAL THOSE LEGAL PITFALLS When nuttier and nuttier laws are passed, the nutty Americans will pass 'em. That slogan will never make it big with the American Bar Association, but you know what I mean.

Well, not to be unpleasant about it, some of the gross national legal product does not measure up. Okay, so you can say the same thing about the gr.bss national-journalistic product, counselor, and that doesn't prove much except that the kettle is just as black as the pot.

Still, I have sort of a warm glow for certain little statutes which burst upon us rather like the bright sunshine after a summer storm.

For example, Texas has a law which forbids a citizen from being "drunk and down." Presumably, the vertical drunk is of a higher social order than the horizontal ones, which, I submit, is a nice distinction. It is more expensive to be drunk and down than, well, err, drunk and UP. In Texas, that is.

There is another statute which penalizes the man who engages in "displaying a weapon rudely." The mind reels. You may put whatever interpretation on this one you wish. May it please the court, this citizen is of the opinion that the state which punishes rudeness has, indeed, proceeded to the outermost limit of its police powers.

When President Nixon was in Vietnam recently, he appeared considerably impressed by South Vietnamese President Nguyen Van Thieu. The President described Thieu as a "very capable man and excellent politician who should not be underestimated." He called him "probably one of the four or five best political leaders in the world."

I once had to bail out a printer who had gotten drunk and passed out in a cemetery. There was a great deal of solemn deliberation among the local Blackstones as to the style and number of laws this transgressor had outraged.

Another time I got a call from he was holding one of our Mexican general who said braves for "polluting the public water supply." I thought I had figured (so do you) but I was wrong. He had had an auto wreck and the gas from his tank had run into the city's reservoir.

The public appears willing to accept a judiciary that contains a distressingly high percentage of the second rate. —Theodore Voorhees, chairman of the Judicial Selection Committee of the American Bar Association.

A new generation is being raised—with DDT in their fat, carbon monoxide in their bones, and lead in their blood. —Dr. Barry Commoner, professor of botany at Washington University, St. Louis.

A free screen is absolutely essential to creative progress... We are not 'arbiters of community morals.' —Jack Valenti, president of Motion Picture Association of America.

American are too complaining. They sing the blues instead of "Moon over Miami." —Terence Cardinal Cooke, Roman Catholic arch-bishop of New York.

Inspected and Approved

PAUL HARVEY NEWS

H. L. Hunt Writes

By PAUL HARVEY Congress is contemplating taking more taxes from oil companies. There is no way. Whatever tax increase is levied against any industry—you will pay. Industry pays its higher taxes with higher prices. Only people pay taxes.

Some of the specific reforms presently under consideration by Congress are admittedly overdue. Some of those so-called "loopholes," however, were originally allowed for very good reasons—to encourage important industries, to stimulate contributions to charity, to make it easier for states and cities to borrow money, to encourage exploration for new resources and so on.

As the Thieu-Ky government is becoming as great a threat to democratic self-determination in that country as the Vietcong, was the recent comment of a Republican Senator of "liberal persuasion."

Another Senator, a leading Democrat states, "So long as we equate our security and our interest with the political survival of the Thieu-Ky regime, we are on a hazardous course."

It would be foolish in any negotiations, if we would deal away the present government of South Vietnam, as in a game of cards. Fortunately, it appears that President Nixon realizes that Thieu could be our "Ace." HLIH

The morning stars are Venus and Saturn. The evening stars are Mercury, Mars and Jupiter. On this day in history: In 1878 a woman was employed—as a telephone operator for the first time when Miss Emma Nutt took over the switchboard in Boston.

In 1923 at least 150,000 persons died when an earth quake shook the areas around Tokyo and Yokohama. In 1939 World War I broke out as Germany invaded Poland. In 1965 Pakistani troops moved into the Indian controlled area of Kashmir and a border war began. The U.S. subsequently obtained a ceasefire and sent in an observer team.

A thought for the day: Hector Hugh Munro said, "Women and elephants never forget an injury."

Inside Washington

JOHN GOLDSMITH ABM Debate—Scientists Can Be Wrong: The Record ROBERT ALLEN

WASHINGTON — Senate bipartisan "peacenik" leaders are set to trot out an imposing array of big-name scientists when the week-long battle over the \$20 billion military procurement bill resumes this week.

During last month's summer recess, strenuous backstage efforts were made to marshal an extensive list of high-powered scientists and PhDs whom the "peaceniks" could loftily invoke in continuing their acrimonious fight against the Safeguard anti-ballistic missile system and other controversial weapons.

In reality, their strategy is extremely vulnerable. Scientists are no more infallible than anyone else—despite all their degrees and imposing titles and awards.

The record is indisputable that scientists goof and err as often and badly as others. In fact, frequently they miscalculate worse than "lesser" mortals.

Even a cursory study of history conclusively proves that. Following are a few highlights in this age-old record of scientist bloopers:

1933 — Dr. Ernest Rutherford, noted English scientist and Nobel Prize winner, emphatically proclaimed it would be impossible to control atomic energy in a useful manner that is, in atomic weapons and for producing electric power.

White Caske NG T

WASHINGTON — Sonate epic Armstrong Aidrin moon Wash. in the forefront of the fight for the ABM, the opinion of scientists should be only one consideration in making decisions.

"We all recognize the right scientists to speak their minds," says the veteran legislator. "Scientists have made notable contributions in their professions and discipline. But it must always be kept in mind that exact predictions on scientific matters defy absolute assertion; also, that even great scientists can and have been wrong.

The six major appropriation bills so far approved by the House, he discloses, exceed budget recommendations by more than \$735 million.

These increases, Mahon says disapprovingly, "are in the face of the action of Congress only a month ago in adopting an overall expenditure ceiling for fiscal 1970 of at least \$1 billion below the \$192.9 billion expenditure budget projected in President Nixon's April 15 budget revision."

Mahon also notes that Congress is lagging far behind in the enactment of major appropriation measures.

Workers in about 23 building trades, numbering 100,000 are expected to get raises equal to that received by drivers of concrete trucks, 1300 of them won an increase of 57.60 a WEEK. The new contract raises the pay of truck drivers in building trades to about \$2.63 per week.

WORLD ALMANAC FACTS The origin of coffee is obscure. The World Almanac says. One story has it that either an Arabian or Ethiopian gathered it, around A.D. 850, noticed his flock became frolicsome after having fed upon some red berries on an evergreen bush.

The Almanac

By United Press International The moon is approaching its last quarter. The morning stars are Venus and Saturn. The evening stars are Mercury, Mars and Jupiter. On this day in history: In 1878 a woman was employed—as a telephone operator for the first time when Miss Emma Nutt took over the switchboard in Boston.

Question Box

(We invite questions on economics and the proper functions of government which will not injure anyone.) QUESTION: —What causes wars? Answer: There is no one simple answer as to what causes war. But it seems to us that most wars are struggles between those who want to have power to control other people, with the winner having gained the power to rule, to impose a religion, to confiscate wealth and property, and to control and tax property and to control trade.

Workers in about 23 building trades, numbering 100,000 are expected to get raises equal to that received by drivers of concrete trucks, 1300 of them won an increase of 57.60 a WEEK. The new contract raises the pay of truck drivers in building trades to about \$2.63 per week. This will increase the costs of building by about 85 percent. Where will the increase come from? Rents and increased interest with government being forced to subsidize new housing if it is to be done at all.
