Convention Is Told of AFL Member Loss

By MAX B. SKELTON HOUSTON — (AP) — The AFL with 98,867 less unionists than a year ago, opened its 69th annual convention today by urging its unions to expel all Communists. A report from the federation's executive committee also called for all-out preparedness against the Communist menace and warned of new wage hike demands late this year. The report was handed to the convention delegates as they filed into the city auditorium to hear a keynote address by William Green, now in his 26th year as AFL president. The council report gave the AFL's membership, as of August 31, as 7,142,603, compared to a year earlier 7,241,290. No explanation of the decrease was offered but the council recalled a goal of 1,000,000 new members had been set for 1950. A note of optimism came from a report on negotiations for the International Association of Machinists to reaffiliate with the federation. The council said the machinists' executives have recommended re-affiliation and that a membership referendum will be held soon. The machinists were estimated to have 600,000 members. In making a call for all-out preparedness against communism, the AFL council said such a program must have "first call" on the nation's production facilities. "We must turn to the task all the manpower and resources needed for it," the council said. In suggesting a membership ban on Communists, the council wrote: "They (Communists) should not have equal rights with other citizens whose allegiance is (See CONVENTION, Page 2)

Agreement Clears Path for Tax Bill

WASHINGTON — (AP) — A compromise pledge that Congress will act later to tax excess profits apparently cleared the way today for approval of a \$4,508,000,000 tax boost and the start of a vacation for lawmakers late this week. But it may mean that Congress will be back in November. Agreement on the knotty corporation excess profits issue was reached at an unusual Sunday session of a House-Senate conference committee. The conferees, now smoothing out differences in the House and Senate versions of the general tax bill, approved — subject to House and Senate approval — that Congress will act either later this year, or early next, on a levy on excess corporation profits. This levy is to be retroactive to Oct. 1 or July 1 of this year. This is intended to postpone the profits issue and enable quick approval of the general tax boosting bill in time for higher levies to become effective Oct. 1 on the incomes of more than 50,000,000 individual taxpayers. The Senate had gone on record as favoring action on an excess profits bill next year. But the House overwhelmingly called for action this year. The conferees agreed on a compromise which calls for enactment of such a tax if Congress is in session after the November elections — otherwise, next year. But Senators Connally (D-Texas) and O'Mahoney (D-Wyo.), leaders in the fight for immediate excess profits legislation, said they will insist on a definite understanding that the lawmakers return after the elections to act on the matter. The tax bill is one of the major items in the way of congressional recess or adjournment this week. Its major provisions: Individuals — A \$2,700,000,000 increase in levies on incomes of over 50,000,000 persons, effective Oct. 1. On that date the withholding from wages and salaries, after personal exemptions, will go up for most taxpayers by one-fifth. Corporations — An increase of \$1,800,000,000 a year in normal corporation income taxes, to apply to one-half of 1950 income. The measure embodies numerous other provisions, many of them dealing with the plugging of tax law loopholes. Some of these provisions still are being considered. (See AGREEMENT, Page 2)

U.N. Assembly Ready to Meet

LAKE SUCCESS — (AP) — Diplomats of the 59 United Nations converged on New York today for the crucial fifth general assembly opening tomorrow afternoon at Flushing Meadow. Headed by foreign ministers of the big three and the North Atlantic council who have been studying for a week how to reorganize Germany, assembly delegates gathered for the meeting as news of the U.N. collective security action in Korea continued bright. The Atlantic council ministers meet today in New York expecting to announce before nightfall full agreement on the creation of an international army to defend Western Europe. There were no indications last night, however, that they had found any compromise formula for including German units in this force. While U.S. Secretary of State Acheson has asked agreement in principle on German participation, French Foreign Minister Schuman so far has been unwilling to agree. Allied diplomats remained hopeful that the problem could be worked out within a few weeks. The big three — Britain, the United States and France — will meet again after the council winds up to complete discussions on ending a state of war with Germany. The meeting may be tonight or tomorrow morning. Tuesday's assembly is scheduled to be called to order about 2 p.m. by Carlos P. Romulo, Philippines foreign minister and retiring president. Late arrivals will include Ford (See ASSEMBLY, Page 2)

SISTER SHIP REACTIVATED—The Navy announced today that the battleship New Jersey would join the battleship Missouri (above), making two battlewagons now on active duty. The Big Mo is seeing service off the coast of Korea. The New Jersey has been in the mothball fleet.

Fall of Big Red-Held City Is Expected Momentarily

By LEIF ERICKSON TOKYO — (AP) — American Marines stabbed to within three miles of Seoul today at the head of 40,000 massing allied troops ordered to make the Red Koreans surrender or die. The leathernecks spearheaded the 10th corps liberation force now rolling in a crushing tide on the Red-held South Korean capital. Seoul's liberation appeared to be at hand. The Marines vanguard was about one mile from Yongdongpo, Seoul suburb on the south bank of the Han River. The allied force must cross the Han to take Seoul. Fifteen miles northwest of the city, a second Marine column hurled back five pre-dawn assaults and secured Kimpo airfield. Then it drove north to the banks of the Han. Kimpo airfield already is in operation as an allied base with an excellent paved runway. Official reports Sunday that Marines were fighting in the outskirts of Seoul proved premature. Red Koreans seized the city June 28, three days after they invaded the United Nations-sponsored republic. South Korean forces blew the Han's rail and road bridges then. Allied planes repeatedly mangled the bridge remnants. As the big offensive mounted at both ends of South Korea, allied warplanes showered the Reds with 3,000,000 leaflets warning them they must give up or die now. On the old Southeast Korean beachhead, an American battalion crossed the Nakdong River and set up a firm bridgehead on the west bank. Allied forces had withdrawn to the east bank Aug. 15. U. S. second division troops made the crossing west of Changnyong. The Reds drove back three U. S. patrols which tried to cross at another point. On the northeastern front of the 125-mile southeast perimeter, U. S. battalions crossed the north bank of the Kyongang River. The river runs just south of Pohang port on the east coast. Allied forces mostly made steady progress all along the 125-mile southeast perimeter. But the Reds resisted fiercely at several points. There were indications the Reds — caught in the allied net — were pulling forces from the southeast front to defend Seoul. AP Correspondent Belman Morin, in the Inchon-Seoul beachhead, reported evidence of suicidal resistance by surprisingly weak and wild-eyed Red forces. Allied fliers spotted a fast Red motorized column racing north from Taejon, 90 miles south of Seoul. Warplanes blasted the column. The Navy in Washington reported Marine pilots now are able to fly off carriers and land at Kimpo. The Navy said belated reports from the Inchon-Seoul sector said 17 Russian-made tanks were destroyed by Marine ground weapons and 18 others were knocked out. (See SEOUL FALL, Page 2)

Terrorist Raid in Saigon Blocked; Over 100 Arrested

SAIGON, Indochina — (AP) — More than 100 terrorists were arrested today after French and Vietnamese police smashed what they called a Communist plot to make a general attack within the city. The outbreak was timed to start last night, authorities said. Informed of the plan, they blocked it yesterday. Authoritative sources were quoted as saying the plot was cooked up by Ho Chi Minh, Moscow-trained leader of the rebel Vietminh. Police said the captured terrorists, described as "volunteers of death," admitted the plot. They said they were hired to infiltrate the city and begin a grenade and small arms attack. Some terrorists were still at large. Only one grenade was thrown by a terrorist who was caught trying to hide 20 grenades in a water car to smuggle them into the city. Sixty other grenades were found in vehicles checked yesterday, a French police spokesman said. The planned attack was not regarded as an all-out effort to seize the city, which is heavily garrisoned. Even regular Vietminh units are not strong enough to do that. The terrorists said they had been directed to operate in terms of five, to make their way to public places, under protection of armed associates, and toss their grenades and open up with the small arms. The police said they learned of the plot three days ago when they arrested a terrorist captain. They said he admitted he was ordered to reorganize the Vietminh underground terrorist and propaganda cells. The captain said reorganization became necessary after successful police action against the organization weakened it considerably. Police said other Red terrorists may try to make a second attempt next Thursday through Sunday, anniversary of the Vietminh uprising in Cochinchina, the southern province of the French-sponsored Vietnam state.

Two Are Crowned At Conclusion of PHS Howdy Week

Crowning of the king and queen of Howdy Week concluded the week's activities Saturday night at Pampa High School. Doris Jean Qualls, daughter of Mr. and Mrs. L. C. Qualls, 802 W. Foster, was crowned queen and Edward Dudley, son of Mr. and Mrs. Ray Dudley, 700 N. Somerville, was crowned king. Carl Kennedy, president of the student body, was in charge of the ceremony. He also presented the royalty with certificates enabling them to receive the 1950 issue of the Harvester yearbook and this year's subscription to the Little Harvester, school newspaper.

Graves to Address Knife-Fork Meeting

John Temple Graves, II, will speak to members of the Top of Texas Knife and Fork Club following a dinner at 7:30 p. m. Tuesday in the high school cafeteria, according to J. B. Massa, president. Graves is a newspaper columnist, public speaker and commentator; will speak on free enterprise and the renewed discovery of what America means. The speaker is an economist by preference, a lawyer by education, a historian by training, and a writer and speaker by profession. He is the author of "The Fighting South" and several other books and was formerly economist for the Federal Trade Commission. He served with the heavy artillery during World War I. Members are requested by Massa to get their tickets at Clyde's Pharmacy in time to attend the banquet and speech to follow.

Loyalty Board Suspends Lee

WASHINGTON — (AP) — Commerce Department officials said today a department loyalty board has made an adverse finding against Michael Lee and he has been suspended from his \$10,000 a year job in that agency. The finding, handed down without announcement September 8, already has been challenged by Lee. His attorneys are preparing an appeal to Secretary of Commerce Sawyer, officials said. Before the adverse loyalty board ruling, Secretary Sawyer had asked Lee to resign or be fired "on grounds that his continued employment was detrimental to the department aside from loyalty questions." The Iowa was the last of the three to go into reserve, leaving the Pacific active fleet in August, 1948. World War II saw in service the greatest number of battle-ships ever operated by the United States — but it also relegated the big, heavily-gunned and armed vessels to subordinate roles in naval warfare. Carriers then emerged as the major ships around which fleets and task forces were built. The mission of the battlewagons became primarily one of serving as protection for the carriers and as great, floating gun platforms for bombardment of enemy strongpoints ashore. They were used repeatedly for those purposes in World War II. The Missouri now has taken up the same job in the Far East, roaming the east coast of Korea to hammer Communist positions and transportation routes with the fire of her main battery of nine 16-inch guns and twenty five-inch weapons. She and other battlewagons in her class are heavily armed against aircraft attack, mounting more than eighty 40-millimeter guns which are used with the five-inch dual purpose weapons against enemy planes. Aside from the fact that the battlewagons had lost their onetime prime position in naval strategy, a major factor in the decision to lay them up, with the exception of the Missouri, arose out of the high operating cost. Even under peacetime conditions, it cost the Navy about \$600,000 a year to run the Missouri as a training ship and part of the active fleet. (That didn't include the cost of pulling her off a Chesapeake Bay mud-bank earlier this year.) The \$6,000,000 figure provided for only a peacetime complement of 1,466 men and 73 officers, instead of a wartime crew of about 2,700. Under wartime service, the cost mounts swiftly. The Missouri is losing tons of ammunition against the enemy daily, using huge amounts of fuel to steam along the coast (aside from the quantities needed to take her 11,000 miles from the Atlantic coast to Korea). However, Navy officials consider the investment in operation cost worthwhile. The huge battlewagons, they contend, are ideal for training purposes. Admiral Ernest P. Sherman, chief of naval operations, in testifying before a congressional committee last winter, said of the Missouri's training function that "we can get a much larger return per dollar for that type of ship than we can on any other."

Second Battleship Due Active Service

WASHINGTON — (AP) — The Navy said today that the 45,000-ton battleship New Jersey is being de-mothballed for return to active fleet. She will be the second battleship in operation. Her sister ship, the Missouri, arrived in the Far East last week to start shooting duty in the war. The "Mighty Mo," aboard which the Japanese surrender documents were signed to end World War II, had been in the Atlantic fleet, used merely for training purposes. Two other 45,000-ton battleships remain in the reserve fleet — the Wisconsin tied up at Norfolk, Va., and the Iowa at San Francisco. The de-mothballing of the New Jersey has started at the Brooklyn, N. Y., Navy Yard where she has been in storage. She was commissioned soon after the Iowa, first of the class, went to sea in May, 1943. Both the New Jersey and the Wisconsin were withdrawn from the active fleet at about the same time, December, 1947. The Iowa was the last of the three to go into reserve, leaving the Pacific active fleet in August, 1948. World War II saw in service the greatest number of battle-ships ever operated by the United States — but it also relegated the big, heavily-gunned and armed vessels to subordinate roles in naval warfare. Carriers then emerged as the major ships around which fleets and task forces were built. The mission of the battlewagons became primarily one of serving as protection for the carriers and as great, floating gun platforms for bombardment of enemy strongpoints ashore. They were used repeatedly for those purposes in World War II. The Missouri now has taken up the same job in the Far East, roaming the east coast of Korea to hammer Communist positions and transportation routes with the fire of her main battery of nine 16-inch guns and twenty five-inch weapons. She and other battlewagons in her class are heavily armed against aircraft attack, mounting more than eighty 40-millimeter guns which are used with the five-inch dual purpose weapons against enemy planes. Aside from the fact that the battlewagons had lost their onetime prime position in naval strategy, a major factor in the decision to lay them up, with the exception of the Missouri, arose out of the high operating cost. Even under peacetime conditions, it cost the Navy about \$600,000 a year to run the Missouri as a training ship and part of the active fleet. (That didn't include the cost of pulling her off a Chesapeake Bay mud-bank earlier this year.) The \$6,000,000 figure provided for only a peacetime complement of 1,466 men and 73 officers, instead of a wartime crew of about 2,700. Under wartime service, the cost mounts swiftly. The Missouri is losing tons of ammunition against the enemy daily, using huge amounts of fuel to steam along the coast (aside from the quantities needed to take her 11,000 miles from the Atlantic coast to Korea). However, Navy officials consider the investment in operation cost worthwhile. The huge battlewagons, they contend, are ideal for training purposes. Admiral Ernest P. Sherman, chief of naval operations, in testifying before a congressional committee last winter, said of the Missouri's training function that "we can get a much larger return per dollar for that type of ship than we can on any other."

Marshall Measure Signed by Truman

WASHINGTON — (AP) — President Truman signed today the bill allowing Gen. George C. Marshall to become secretary of defense. The White House said Marshall's formal nomination to the post would be sent to the Senate for confirmation at once. Presidential Secretary Charles G. Ross said Marshall has asked that he be sworn into office at the Pentagon without any special ceremony. He can't take the oath, of course, until the Senate approves him or before Lt. Col. Johnson steps out as defense secretary tomorrow. Ross said Mr. Truman also signed a bill authorizing him to appoint Gen. Omar N. Bradley as permanent officer in the grade of general of the Army. It took a special law to make Marshall eligible for the defense post because of a ban in the armed forces unification act. This act says no one who has been a permanent officer in the past military services within the past 10 years can be defense secretary. Congress made an exception in Marshall's case.

North Korean Peace Feelers Are Rumored

ROME — (AP) — Rome's independent Giornale D'Italia said today in a London dispatch that North Korean authorities are seeking to negotiate for peace. The dispatch attributed the information to non-official Indian circles at London and said it came from New Delhi. According to it, China and India would serve as mediators. There was no confirmation from any other source.

WOMAN DIES

GLEN ROSE, Texas — Mrs. G. W. Sandlin, 84, grandmother of Weldon Hart, secretary to Gov. Allan Shivers, died here yesterday.

Plan to Stop Help To Nations Trading With Reds Opposed

WASHINGTON — (AP) — Administration leaders today looked to the House to kill a proposal for shutting off economic aid to countries which sell militarily useful goods to Communist countries. This plan, sponsored by Senator Wherry (R-Nebr.), was passed as a Senate amendment to a \$17,000,000,000 emergency appropriation bill to expand U. S. military power and help arm friendly nations abroad. Over the weekend, House members of a Senate-House conference committee declined to accept the amendment. They insisted on taking it back to the House for vote, expected Wednesday. Rep. Cannon (D-Mo.), chairman of the House appropriations committee, told a reporter he is against the Senate provision and probably will urge the House to reject it. He said it would be almost impossible to administer. Paul Hoffman, head of the Economic Cooperation Administration (ECA), had come out against the provision. In a letter to Cannon, he said: "The amendment would create problems for us and for the European countries." In an earlier letter to Senator Lucas (D-Ill.) he said the Western European countries are getting through normal Eastern European trade channels, a number of strategic materials like copper, bauxite, iron, steel, coal, timber, and food. James C. H. Bonbright, deputy assistant secretary of state for European affairs, told a House committee last Friday 24 hours after the Senate adopted the amendment that the provision would have a "very damaging" effect on relations with friendly European countries. Both Hoffman and Bonbright said that unquestionably certain strategic goods which directly feed the Communist war machine could be denied to Iron Curtain countries, and that the western countries have already reached substantial agreement on those items. But Hoffman said the Wherry amendment would cut off all items having any direct or indirect military value — and differing interpretations might be made on what that includes. Senator Wherry said he is confident the House will accept the amendment. (See PLAN OPPOSED, Page 2)

Construction on Highway, Streets Resumed by Crews

Highway and street crews were back on the job today after an unrelenting one-week layoff due to rain. Most important — to city dwellers was the sight of renewed street paving activity; started up with stabilizing of two blocks on S. Sumner Sunday and topping preparations on stabilized streets this morning. Tuesday morning — weather permitting — topping operations will get underway on Williston and Georgia. But it was still too muddy to run curb and gutter and stabilizing work on the four blocks on N. Sumner — the last to be stabilized this year. City Engineer Ray Evans estimated that those four would be ready for the asphalt topping by the time the other 22 blocks are finished by the pavers. In the meantime, construction crews were back on the job on Highway 70 refilling Chicken Creek embankments for bridge approaches that were partially washed out during last week's rains. Although no progress report was available today on Highway 66 construction crews there were back on the job, grading and moving dirt on the 17 mile stretch through Gray County.

Over-Easy Credit Buying, Hoarding of Scarce Materials Officially Halted by Government

WASHINGTON — (AP) — The government put "stop" orders in effect today against over-easy credit to consumers and over-eager buying by businessmen. Marking the first actual use of the new home front control powers, the orders had two aims: to check inflation and to conserve scarce and essential materials for defense purposes. The Commerce Department forbids businessmen to accumulate lumber, cement, steel, copper, aluminum, tin, rubber, nylon, yarn, certain chemicals and certain other materials, beyond a "practical minimum working inventory." Enforcement by penalties as stiff as a year in prison or a \$10,000 fine, the order applies not only to the firm that buys but also to the firm that delivers the goods. The ban on over-easy installment credit was put into effect by the Federal Reserve Board after a 10-day advance notice. Terms for autos, household ap-

Area Barber Shops Increasing Prices

Barber shops in the Pampa area are increasing prices on haircuts and shaves, effective today, it was announced. Shops in Pampa, White Deer, Skellytown and Lefors have increased prices to one dollar for haircuts and 75 cents for shaves. Barber shops stated that increased costs of operation and the rise in living costs has forced rise in prices. These prices are in line with those being put into effect over the entire state, they said. (See PLAN OPPOSED, Page 2)

400 Texas Medical Reservists Called

AUSTIN — (AP) — More than 400 medical reservists in Texas have been ordered to report for physical examinations. Col. T. V. Sheldon of the Texas Military District said here yesterday. Of these, 24 reserve officers will be called up as Texas' quota. Sheldon spoke at a conference of medical leaders and representatives of the Texas Military District, called as a result of new legislation which provides for registration of all physicians, dentists and veterinarians under 60.

Campaign-Conscious Solons Juggle Hot Political Issues

WASHINGTON — (AP) — Congress juggled a handful of hot political issues today as lawmakers generally looked longingly toward a pre-election vacation before the week's end. Senator O'Mahoney (D-Wyo.) reminded his campaign-conscious colleagues of the Senate that the controversial issue of statehood for Alaska and Hawaii — on which President Truman has asked action — still is hanging fire. He said in a speech prepared for the Senate that action on House-approved statehood bills would counter Russian propaganda that the United States is fostering "colonial imperialism" in the Pacific. The statehood issue — likely to be debated at length — was only one of several which all eyes were turned to getting out of Washington while there is still time to convince the folks at home that they ought to be re-elected. A Senate - House conference committee was about ready to

Quarterback Club Will Meet Tonight

The Pampa Quarterback Club will meet at 7 o'clock tonight in the county courtroom. The meeting was moved back one hour because of the Oller-Lobo baseball game, which is scheduled to start at 8.

ALEMAN TRIP

Lucas Says Korean Step May Prevent World War III

PEORIA, Ill. — (AP) — The United Nations fight in Korea may have prevented World War III, Senator Scott W. Lucas (D-Ill.) said today.

There can be no doubt that U. N. action to defend South Korea has "shaken the bloody bunglers of the Kremlin," he said.

Lucas, who is campaigning for reelection, made his remarks to the Peoria Advertising Club.

The United States has the greatest collection of atomic bombs and secret weapons ever assembled by a nation, Lucas said.

"We have borne the brunt of battle in Korea because we are the largest and strongest free nation in the world. But we have stirred the hearts and won the support of free men and women everywhere," he said.

Lucas declared that the 81st Congress has taken "the boldest steps in history" to stop war and prevent Communist domination.

European Assembly To Meet Nov. 17

PARIS — (AP) — West Europe's consultative assembly will resume meeting at Strasbourg Nov. 17.

Assembly President Paul-Henri Spaak and four of the organization's six vice-presidents representing West Germany, Britain, Sweden and Turkey also agreed yesterday which of the assembly's 30 resolutions, approved at Strasbourg last month, are to be placed before national parliaments by the assemblymen. They did not announce which resolutions had been picked.

Mangiest of Bulls To Bring \$100 Prize

OKLAHOMA CITY — (AP) — The mangiest of all bulls will be worth \$100 to his owner at the Southwest Livestock Clinic here Nov. 8-9.

The second most miserable-looking critter will win \$75 weekly prize money.

The idea is to improve herds, since all bulls will be killed and marketed.

One hundred entries are expected from Texas, Oklahoma and New Mexico.

Mock Atom Raid Made on Chicago

CHICAGO — (AP) — A theoretical A-bomb attack was made on Chicago today as a lesson in the study of civilian defense.

The National Security Resources Board planned the maneuver for governors of 16 states and Alaska and Hawaii, and mayors and officials of 17 cities.

The observations will be the subject of a critique on the problem at a meeting of civil defense heads Sept. 25-29.

The problem called for an imaginary bomb over the northwest side of the city, one over the southwest side, and another in railroad yards of the near southwest side.

Previous similar studies have been made in Washington, D. C., and Seattle, Wash.

Texas League Clubs Defeated at Gate

DALLAS — (AP) — The Texas League drew 1,648,828 paid admissions during the season just closed, thus went over the million mark for the fifth time in its history, but it was 359,699 below last year and 392,215 under the record year 1948.

Only one club, Beaumont, exceeded last year. The Roughnecks, who led the league over the full-season route, had 170,536 attendance, a gain of 84,272.

Shreveport showed the biggest loss — 104,477. Oklahoma City was next with 99,867.

League Secretary Milton Price, in announcing the decrease to a number of factors, one of the most important being that the two largest cities — Houston and Dallas — were in the second division.

Makeup Men Should Get Oscar Award, Actor Says

By BOB THOMAS

HOLLYWOOD — (AP) — An actor's best friend is his makeup man, says Jeff Corey, who asks for an Oscar to reward the craftsmen of the greasepaint and toupee.

"Sometimes the makeup man contributes 50 percent of an actor's performance," said Corey, who is perhaps the busiest character actor in town. "He is just about the only creator in motion pictures who is not given an Academy Award. I think it's time he received some recognition."

"Makeup men are creators in every sense of the word. Many of them are fine sculptors and painters. They study the script carefully and devise the right makeup for the historical period and the dramatic effect."

"The art of makeup is more than just slapping on some coloring and a beard. The makeup man has to know the physiognomy of the face; he must know about all the muscles and which ones sag with age."

Just started a role as a bearded Moslem.

"In some roles, I have so much makeup on that you can't recognize my real face," he said. "In that way the public doesn't get too tired of my face and I can play as many roles as I want."

The actor said that movie makeup men have reached the height of a craft that began in the Sixth Century B. C. In the days of Thespis, presumed originator of drama, Greek actors sought ways to project themselves to the lonely seats.

Man Acquitted in Death of Father Weds Fellow Student

PORT CHESTER, N. Y. — (AP) — The former Carol Ann Paight, who was acquitted in the mercy slaying of her cancer-ridden father, was honeymooning today with a fellow college student.

The 22-year-old Stamford, Conn., girl and Robert Anderson, 25, were married here Saturday.

The Rev. Frederick W. Dear, assistant rector of St. Peter's Episcopal Church, disclosed yesterday that he performed the ceremony at his home.

The couple attend New England College at Henniker, N. H., where Carol Ann returned after her acquittal by a jury at Bridgeport, Conn.

The girl was charged with second degree murder in the shooting of her father, Stamford Police Sergeant Carl Paight, with his service revolver as he lay dying in Stamford hospital last Sept. 23. She claimed she had a mental blackout.

Her mother and brother, Carl Paight, Jr., attended the single ring ceremony here. Both of them stood by her during her trial.

Friends of the couple said they did not know whether the bride would return to college to complete the last semester of her senior year.

George Washington had his domestic problems, too. His ad for a cook, placed in the papers in 1789, ran for more than two months.

HILLS BROS COFFEE

TRY IT AND SEE FOR YOURSELF WHY HILLS BROS COFFEE MAKES—AND KEEPS—FRIENDS!

Control...that has no equal!

Take this beautiful car out on the road... and you'll discover the most important driving difference in cars today. For here is the only automatic gear shifting that gives you full control of your car at all times! Here is the only automatic transmission that takes its orders from you... that shifts when you want to shift... that can't shift you up and down when you'd prefer another gear. See... feel... and hear the difference in slow moving traffic. You cruise smoothly along in high, even at 12 miles an hour... saving gasoline... saving wear and tear on your engine. But at 12 miles an hour, other automatic shifts drop you down into lower gears—and there's nothing you can do about it. Try Chrysler's Fluid Drive and automatic transmission... learn how Chrysler has kept far ahead of all others. And discover the built-in value all the way through that has no equal today!

Chrysler Imperial 4-Door Sedan
... the car that has no equal at any price. One of 21 beautiful Chrysler body-styles.

See it—drive it... there's built-in value all the way through!

Advantages of Chrysler's Fluid Drive
Automatic Gear Shifting—with full control of your car! Better traction—safer on slippery roads. Convenience of clutch for easier parking. Slower Engine Speeds—reduced noise, wear. Saves gasoline! Drive in high while others drive in low in traffic.

Advantages of Chrysler's High Compression Spitfire Engine
Waterproof Ignition—prevents stalling in rain or high water! Chemically Treated Cylinder Walls—for greater wear. Floating Power—helps eliminate vibration. Superfinished Parts—reduce friction, last longer. Exhaust Valve Seat Inserts—reduce need for valve grinding! Full Flow Oil Filter—keeps oil clean longer!

Chrysler's Advantages in Comfort and Safety
Functional Design—full room for your head, legs, shoulders. Easy to enter and leave! Safe Guard Hydraulic Brakes—smoother stops. East-Loak Parking Brake—holds car on any hill. Electrically Operated Windshield Wipers—constant speed all the time! Chair Height Seats—no crouching, you sit naturally! Safety Rim Wheels—won't throw tires after blowout at normal speeds. Double-width Arm Rest—for arm chair comfort.

One of Texas' Two Most Consistent Newspapers

Published daily except Saturday by The Pampa News, 321 W. Foster Ave., Pampa, Texas. Phone 666. All departments... MEMBER OF THE ASSOCIATED PRESS.

SUBSCRIPTION RATES: By carrier in Pampa, 25c per week. Paid in advance (1st office) \$2.00 per 3 months, \$6.00 per 6 months, \$12.00 per year.

Someone's Memory Poor on Controls

The return of price controls in pictures and to advocate it cheerfully is like volunteering to sleep with a python. Every indication is that price control is needless. President Truman's program for extra armament spending, about \$15,000,000,000 — is not big enough in itself to create many shortages.

THE AMERICAN WAY

FREE MEN PROCLAIM By George Zeck

In looking through the July 5 issue of the Green Spirit (O.K. ECHO), I was electrified at a page advertisement which appeared therein — an announcement spontaneously sponsored and signed by 410 employees of Basic Refractories, Inc., plants located at Maple Grove and Bettsville, Ohio.

OUR BELIEF in the divinity of God, the dignity of man and the destiny of our country. OUR BELIEF that "man shall live by the sweat of his brow." OUR BELIEF in a "fair day's work for a fair day's pay."

Washington.....by Peter Edson

By DOUGLAS LARSEN (For Peter Edson who is on vacation)

WASHINGTON — (NEA) President Truman's ill-advised letter charging that the Marine Corps had a "propaganda machine almost equal to Stalin's" hasn't been forgotten with the apologetic to the corps.

It has focused attention on the fabulous collection of highly-paid information specialists, public information directors, news analysts, media men, public relations directors, publications advisers, writing assistants, editorial experts, research specialists and just plain press agents who comprise the propaganda staff in the federal government.

Fair Enough Pegler

By WESTBROOK PEGLER

NEW YORK — James Roosevelt, the eagle of the dynasty, is running for the office of governor of California and his mother is campaigning for him.

Mr. Roosevelt raised last spring the issue of profiteering through his late father's position as president. He denied that he had exploited his presidency. He referred particularly to his insurance business and was reticent about the profits he had previously admitted sending a wire to his father's secretary, Miss Marguerite Le Hand, requesting that special courtesies be shown a prospective visitor who was important to him in a business way.

Frank Bielski, the detective who as an agent of the O. S. S. made the Amerasia raid and broke the espionage case which brought the Truman administration to trial, offers information concerning Jimmy Roosevelt's connection with the National Grain Yeast Corp., of Belleville, N. J.

THE BIRTH OF A SCIENCE

By DAVID HARTER

Having briefly explained how the Koch treatment works in our last column, we now come to a few newspaper clippings I'd like to quote from. Listen to this one by Edgar A. Guest, Jr.: "KOCH DRUG CURED BABY, SAYS DOCTOR. Glyoxylyde, one of the drugs manufactured by Dr. William F. Koch's laboratories and which the Government charges is branded in violation of the Food and Drug Act, cured a 27-month-old baby of eczema which covered practically its entire body."

Dr. William F. Koch, a Canadian physician who admitted he had killed a patient today credits his product with the power to generate a new lung, new kidney and even new brain tissue. This was the testimony of Dr. Omer G. Hague, radiologist of Winnipeg, Ont., who told of using Koch remedies on 77 patients, including himself.

THE BIRTH OF A SCIENCE

By DAVID HARTER

Some other clippings read: "CANCER DOCTOR SAYS KOCH CURE REPLACED X-RAY. Dr. William Henry Mick, Cleveland roentgenologist, testified he abandoned X-ray in the treatment of cancer, turning instead to the Koch remedy." "KOCH'S MEDICINE CURED ASTHMA, DOCTOR TESTIFIES." Dr. Marvin R. Eby of San Diego in this story presented accurate case records.

THE BIRTH OF A SCIENCE

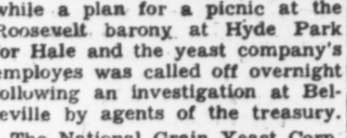

By DAVID HARTER

Within the last few weeks there has been delivered to me from this department (the Reich and Prussian ministry for sustenance and agriculture) a letter with the notation "for attention" which was mailed from the German embassy in Washington to the foreign office in Berlin. The writing was personally signed by Dr. Luther and informed him that there have been rumors that two evidently important witnesses for the defendant (National Grain Yeast) apparently refused to testify because the defendant is considered as a Jewish firm.

National Whirligig

news behind the news

By RAY TUCKER

WASHINGTON — Edwin W. Pauley, California oil millionaire and presidential crony, has again resumed an important but unofficial post in the White House as a family after a period of seemingly strained relations with Harry S. Truman.

Despite their World War II experience, many industrialists have little or no understanding of how procurement divisions operate today in obtaining materials. Government officials are too busy to talk to them at the moment but Mr. Pauley's return to the ground and special knowledge helps in facilitating contacts between them and the defense effort.

TAX — Mr. Pauley is also placating conservative interests in individuals in another way: He has promised that there will be no excess profit tax at this session, a pledge that has been underwritten by Mr. Truman and Speaker Rayburn. In fact, he suggests that there may never be need for such a levy.

The new argument runs that, once the Korean struggle has been won by the United Nations forces, and assuming that Russia will be kicked out elsewhere, there will be no need for the raising of additional funds. Higher taxes on individual incomes and corporations will finance new rearmament expenditures, according to this theory.

Mr. Pauley's return to the fold can be a tremendous asset to the Democrats. With National Defense Secretary Johnson, he was one of the party's ablest money-raisers in the 1948 campaign, and earlier years when Mr. Truman's political stock was far below par.

BLOCKED — The politically profitable Truman-Pauley relationship seemed to have foundered a few weeks ago because of the petroleum promoter's resentment over major administration oil policies. The president favored federal ownership of oil tidelands, and for months Mr. Pauley's request for an oil loan to Mexico had been blocked.

To their mutual friends' astonishment, the Californian recently testified on Capitol Hill that he had warned the White House of a Communist invasion of Southern Korea as early as 1946, after his return from the Far East. It looked as if Mr. Pauley were "needing" both Mr. Truman and Secretary of State Dean Acheson.

CREDIT — Although there may have been no connection, it was only a few weeks after the damaging Pauley statement that the Export-Import Bank granted a \$150,000,000 credit to Mexico. Although \$150,000,000 money will be used for needed power, irrigation, highway, railroad and communications projects, the grant will free an equivalent amount of Mexican pesos for development of Paokey oil.

It is not possible to cavil at would force him into socialized medicine is not good for him. He is likely to give some moral support to those of us bucking organized monopoly (collectivism), and offering a much better treatment. But it is not good for him. He is likely to give some moral support to those of us bucking organized monopoly (collectivism), and offering a much better treatment.

Let me suggest that you read a splendid book, "THE BIRTH OF A SCIENCE" by Albert L. Wahl, M.D.; Bessie L. Rehwinkel, M.D., and Lawrence Beilly, A.B., B.D., D.D., and published by Lutheran Research Society. Price \$1.00. Worth a million. I am glad to plug this book as a public service and to document many statements on the Koch treatment.

WASHINGTON — Although the Marine Corps League made a fuss over President Truman when he appeared before their convention here to apologize personally for his reflection on them, there is solid, internal evidence that the men who fought at Guadalcanal have not forgotten him. Nor is their conclusion based only on their formal demand for Louis A. Johnson's dismissal.

The officer who delivered the most eloquent pro-Truman statement at closed sessions was ex-representative Melvin J. Mass of Minnesota, an extremely popular figure. His associations on Capitol Hill enabled to do a good job for this unit when, as Secretary Johnson once proposed; it was scrapped.

Mr. Mass quailed an incipient revolt against the Pacific or allowed to rust or rot away in the jungles instead of being turned

KING'S COMM

PRESIDENT TRUMAN WOULD YOU CARE TO ANSWER THESE QUERIES?

Mr. President, here are a number of questions pertaining to the Asiatic situation — questions which many thoughtful Americans would like to have answered. Since the close of World War II, your cabinet has undergone many changes. But, all along, you have been our Chief Executive. It therefore appears that no one else is in as good position as you are to answer these queries authoritatively.

Ever since 1917, it has been obvious to all intelligent, patriotic Americans that what Soviet Russia has stood for has been entirely antithetical to American ideals. Such being the case, many of our citizens would like to know why Russia was asked to declare war against an already defeated Japan; why Russia was allowed to occupy Manchuria and part of Korea; and why Japanese war material and prisoners were turned over to Russia. Could it be by any chance possible that this action was inspired by Russian sympathizers occupying influential positions in our State Department.

During our long war with Japan Chiang Kai-shek was consistently recognized by our Government as a faithful and helpful ally, and his wife was lauded as the daughter of an able and distinguished family, and indeed, as the world's most outstanding woman. Who was it that, within few months after the war with Japan ended, discovered that Chiang Kai-shek and his cabinet were nothing but a lot of self-seeking, scheming grafters? Is there any possibility that this startling discovery was made by emissaries of a nation interested in grabbing China's territory — emissaries who had succeeded in obtaining positions in our State Department? The Chinese Nationalists were our loyal allies throughout World War II. When that war ended we had on the Pacific islands vast stocks of war material. Plenty of ships were at hand. Why were great quantities of these tremendously expensive articles either burned, dumped in the Pacific or allowed to rust or rot away in the jungles instead of being turned

Where a Communist Party is in power it cannot accept dictation from abroad in the form of crude economic exploitation without undermining national independence. —Marshall Tito, of Yugoslavia. The French male has never wholeheartedly accepted woman's progress. With the new French clothes creations he is giving women a shove into a sociological cliff, impairing their entire thinking processes. —Raymond Marinelli, dress designer. The Korean people won't forget their joy at being liberated by the great Soviet army. —Kim Il Sung, chief of state in North Korea.

So They Say

Every Homeowner Engaged in Constant War on Water

MONROE KENT
 WASHINGTON, D. C.—Whether it or not, you're engaged in a constant war against moisture. It doesn't matter whether you are new or old, moisture is always ready for an attack on your home.

If you have a brand-new house as well as being your own, it's the biggest financial investment you have ever made. Consequently, both your pocketbook and your pride are involved in keeping your house top-notch.

As you think your new house is "worthy." Probably it is, but there's a chance that your builder may not have guarded sufficiently against moisture hazards. That walls may be stained or paint may peel before twelve months have passed.

What's the cause? How can it happen? What's to be done about it? The villain of the piece is "dampness." Moisture. He comes in many guises as a chameleon. Sometimes he may be bland steam that rises while you boil the baby's bottles. He may also start his dirty work in your shining-clean laundry, in the kitchen, or in the green lumber that was built into your house before being thoroughly dry. In his program of devilry, he may be innocently aided and abetted by the insulation that adds so much to the modern house.

The insulating material, you see, helps to prevent heat from escaping wastefully. While it's so, it may also keep the moisture that's inside your house from making an exit in a harmless manner. This destructive moisture can get in plaster, rot wood and rust metal. It can force its way through ceiling, siding, masonry, and doors. It can even push the paint from its moorings and cause it to blister, then peel!

When you see paint that has cracked, or a stain that has appeared, or moisture that has caused the paint to peel, and you will solve your problem. Interior moisture isn't, of course, only a villainous offender. Unchecked, it can lead to rot, rain, and leaks through your ceiling, walls, and windows. Unless it's kept in good repair, additional trouble may develop. Leaky downspouts and crumbling mortar brickwork can also account for their share of trouble to wood siding that comes too close to hidden earth. The studs and siding that are next to the ground will draw up destroying moisture.

There are three important steps to take in conquering your enemy. One is to improve your facilities for ventilation. A second is to guard against excess humidity in your household. The third is to install barriers to halt the attack of moisture before it rains real headway. Still, the ways in which ventilation can be improved include installing a suction-type ventilating fan in the kitchen to draw off the

high humidity caused by cooking and washing. Another involves the simple practice of opening a window or leaving the door ajar when taking a bath or shower. When you are constructing a new building, it is of vital importance to make sure that you have adequate facilities for ventilation. Screened louvers and vents should be installed in attics. Screened openings should also be included in the foundation walls of houses that have only crawl-space beneath the ground floor. Beneath homes without basements, a heavy asphalt building paper should be placed to block the rise of vapor. In such homes, roof-proof sub-flooring and joists of concrete or pressure-treated lumber are needed, in addition to good ground drainage.

To guard against excess humidity, avoid adding moisture in connection with your heating plant, unless your home is especially built to prevent condensation. The normal moisture that gathers within a house in the process of everyday living usually provides sufficient humidity for average comfort.

The third safeguard against attack — the installation of vapor barriers — is equally important. The purpose of such barriers is to stop moisture from gaining access to the walls of the house from the room side. In a new house, such a barrier may be installed before walls or ceilings are plastered. It may also be a built-in part of the insulation or wallboard. To be wholly effective, it must be continuous. . . . unbroken. All joints must be lapped and securely fastened on studs, joists or bracing. In applying vapor barriers, such places as the space under the stairs, openings around ceiling light fixtures and cracks around attic doors must not be overlooked.

An additional protection in new homes — as well as a barrier for moisture in homes already built — can be applied in the form of paint. Your dealer can advise you regarding the merits of the various types of coatings available for the purpose. Before your paint is applied, be sure all cracks and crevices around windows, doors, and baseboards are filled with crack filler or patching plaster.

Your war with water is a never-ending one, but you can overcome the victor if you recognize moisture's insidious strategies. . . . his methods of infiltration. . . . and take all measures to withstand his attacks. First, keep the humidity low within your house. Second, install vapor barriers. Third, provide proper ventilation. Fourth, patch leaks where rain can enter.

Firemen Unable To Help Selves

TRAPP, Pa. — (AP) — When fire broke out in the fire house of this small southeastern Pennsylvania community yesterday, more than 20 volunteer firemen tried to open the electrically-controlled doors.

The fire fighters huffed and puffed — but they could get the overhead doors only a few feet off the floor. The flames had disabled the electric controls.

An ambulance was destroyed and a fire truck damaged before the fireman managed to bring the blaze under control.

Long popular for modernization and remodeling, asbestos-cement siding shingles have come into their own as an exterior finish for new homes. How well this type of siding, developed within the past two decades, harmonizes with traditional American architecture is evidenced in the home pictured above. Asbestos siding, in addition to its unique attractiveness, has the advantage of being fire-safe and practically free from maintenance expense. The roof is covered with a companion material, asbestos roofing shingles.

Asbestos-Cement Siding Shingles Play Big Role in Record-Breaking Building Boom

Nature's "magic" mineral, asbestos, is playing a starring role in the nation's current record-breaking home building boom. Siding shingles made of the fibrous mineral, in combination with portland cement, are being used on an unprecedented scale as an exterior finish for new residences, according to industry figures.

Asbestos siding, builders say, has emerged as the "Cinderella" material of the period. Introduced in the early 1930s, when the building of new homes was at a low ebb, it achieved instant popularity as a material for protecting and rejuvenating elderly houses. Applied over worn, dilapidated sidewalls, it gave youth, fire protection and attractive appearance to old homes. More importantly, from the standards of the day, it took the pressure off thin pocketbooks by eliminating the need for periodic painting.

The popularity of asbestos siding increased with the years. Manufacturers vied with one another to produce new and more attractive products. Home owners recognized its importance to maintenance economy. Safety officials advocated its use as a protection against fire. It became the outstanding material for re-siding homes.

The postwar building boom effected the transmutation of asbestos siding from a modernization material to a favored product for new construction. There were several reasons. First, with building costs running high, asbestos siding has the advantage of low first cost. Second, its natural beauty has been enhanced by new colors and surface textures. Third, it is fire-safe and practically free from maintenance expense.

Climatic conditions, too, entered the picture. In certain areas, high temperatures and salt laden air deteriorate ordinary siding. Such conditions, it was found, have no harmful effect on asbestos-cement.

Asbestos siding now is being used, either exclusively or on a buyer's choice basis, in many of the largest housing developments. An outstanding example is the Levittown development on Long Island in New York. There, 4,800 homes have been built with asbestos exteriors, and more are going up. Many individually

built houses, in all price ranges, also are asbestos sided. In 1949 alone, enough asbestos siding was shipped by manufacturers to have covered well over 300,000 homes. The popularity of asbestos siding for covering old homes has continued as well. It is more widely used for that purpose than any other material.

In the manufacture of asbestos siding fibers of the mineral asbestos are mixed with portland cement. This produces a rocklike material which, while conveniently thin, has great strength and rigidity. Once applied, the siding

becomes harder and stronger with the years. Home builders may obtain asbestos siding shingles in white and a variety of colors, including green, gray, cream and blends. Some shingles have smooth surfaces, while others are textured. Additional variety in appearance is provided by different treatments of the exposed edges. Some are "straight"; others wavy. Also available are shingles with staggered edges which give a "shingled" effect. The individual shingles usually are 24 inches wide and 12 inches deep.

Rocket Launching by Russia From Baltic Told by Paper

STOCKHOLM — (AP) — The Russians reportedly have been lobbing seven-ton guided missiles over the Baltic area during the past summer. The newspaper Aftonbladet gave this report on the situation: "The rockets were launched near Cranz in Soviet-held East Prussia and were aimed at a small island in Soviet Karelia. It is believed the island lies in Lake Onega, some 700 miles from Cranz."

The operation was labeled "silent maneuver" and was combined with radar practice. The paper said it had "reliable information" on which to base the story, but gave no specific attribution. The maneuvers began in mid-July and lasted several weeks. Their aim was to test the preparedness of the so-called "first group" of new radar stations and weapons bases.

Russia long has been reported to have experimental rocket sites along the Baltic coast areas she controls. Last April a U. S. Navy plane disappeared on a flight in the same Baltic area. The U. S. charged the plane was shot down by the Russians.

Aftonbladet said the maneuvers were "directed and led by the so-called strategic first line command with headquarters near Kalingrad, formerly the East Prussian capital of Königsberg. The report said the Russians have a string of radar stations extending from the Russian-leased base of Porkkala, 40 miles southwest of Helsinki, along the Russian-controlled coasts of Estonia, Latvia, Lithuania, Poland and East Germany, as far as Wismar in the Russian occupation zone of Germany."

Formerly run by her mother, the reinstated bureau is now under command of Carolyn Shaw. Mrs. Shaw, Washington's first female social arbiter, for 10 years the bureau shouldered the duty of a hostess' duties, with a guaranteed salary. Her goal is to make the bureau enjoy their own party.

No affair is too small, none too big, for the bureau's operation. It handled the wedding of Secretary of Treasury Snyder's daughter, Drucie. It also managed the guest list and seating arrangements for the huge gala program celebrating Washington's 100th anniversary as the nation's capital, as well as all the details of the fabulous reception for a President of Chile and President Truman at the Chilean embassy.

Certain segments of the city's population, however, are charging Mrs. Shaw with being stuffy and old-fashioned on several important points of etiquette. She staunchly believes that guests at an affair should first be invited, for instance. As a result, the social orbit of a great many Washington party-goers who long since discarded such antiquated formalities has been seriously reduced.

The bureau now insists upon a carefully checked guest list for every function it manages. You announce your name at the door, and if it isn't on the list you're politely told that you've probably come to the wrong party. If you decide to debate the point or appeal the decision, Mrs. Shaw or one of her several assistants who are always on hand will gladly take up your case. It's difficult to tell Mrs. Shaw that there is a mistake on the list, because she's the one who puts it together.

That leads up to why imbibing bachelors, as a group, are a little miffed at the bureau's work. Being a so-called eligible bachelor in Washington has become a career for scores of young, middle-aged and even old men. It has meant debut parties, receptions, formal dances and the rest. The bureau has cut short a lot of these delightful careers.

An official bachelor list has been prepared by the bureau. And it is a dwindling list. When a man lingers too long around the punch bowl, his name comes off. If he monopolizes the slickest chick and ignores the rest of the girls, he's off. Times are getting tough for the unattached males and they don't like it.

Another innovation of Mrs. Shaw's bureau is the theory that enough standing and sitting room is just as important as enough liquor and food at parties. It has been the practice, Mrs. Shaw says, to try to cram 1500 people in a room capable of holding only 600. Either a hostess is willing to go along with Mrs. Shaw's views on this important point or a hostess does her own hosting.

The bureau's specialty is arranging parties to be given by persons who only get to Washington occasionally. A senator or important government official has to be entertained by an out-of-towner in a manner to which he has become accustomed. Yet the visitor doesn't know how or where to begin.

And that's where the bureau begins. All the prospective host has to do is specify the guest, or guests, of honor, how much money he wants to spend, and

Party Bureau Deals Bookers Crushing Setback

By DOUGLAS J. LARSEN
 WASHINGTON — The party bureau's bookers have suffered a crushing setback. There's been a tragic development at the Capital's party bureau — a party bureau that has been a mainstay of the social scene for many years. The bureau's bookers have been crushed by a new social arbiter, Mrs. Carolyn Shaw, who has taken over the bureau's duties. The bureau's bookers have been crushed by a new social arbiter, Mrs. Carolyn Shaw, who has taken over the bureau's duties.

By popular demand of business hostesses the Washington Social Bureau, a war casualty, has been recreated. The post-war party pace had gotten out of their hands and they needed help desperately.

Formerly run by her mother, the reinstated bureau is now under command of Carolyn Shaw, Washington's first female social arbiter. For 10 years the bureau shouldered the duty of a hostess' duties, with a guaranteed salary. Her goal is to make the bureau enjoy their own party.

No affair is too small, none too big, for the bureau's operation. It handled the wedding of Secretary of Treasury Snyder's daughter, Drucie. It also managed the guest list and seating arrangements for the huge gala program celebrating Washington's 100th anniversary as the nation's capital, as well as all the details of the fabulous reception for a President of Chile and President Truman at the Chilean embassy.

Certain segments of the city's population, however, are charging Mrs. Shaw with being stuffy and old-fashioned on several important points of etiquette. She staunchly believes that guests at an affair should first be invited, for instance. As a result, the social orbit of a great many Washington party-goers who long since discarded such antiquated formalities has been seriously reduced.

The bureau now insists upon a carefully checked guest list for every function it manages. You announce your name at the door, and if it isn't on the list you're politely told that you've probably come to the wrong party. If you decide to debate the point or appeal the decision, Mrs. Shaw or one of her several assistants who are always on hand will gladly take up your case. It's difficult to tell Mrs. Shaw that there is a mistake on the list, because she's the one who puts it together.

Youth Takes Aunt's Savings, Sets Fire to Living Quarters

By DOUGLAS J. LARSEN
 NORTH BERGEN, N. J. — A 21-year-old student, will be arraigned on charges of arson after his aunt's savings and setting fire to the family home on fire today.

Detective Capt. Pat said Carlton, a junior at Rutgers (Pa.) College, told him he wanted the money in order to marry a blonde he knew in Pennsylvania. Her identity was withheld.

Sullivan said Carlton admitted taking his aunt's \$7,400 from a dresser drawer Saturday and then scattering burning paper bags about the room, expecting the flames to destroy the furniture and all trace of the money.

Police made a routine search of Carlton's car and found the \$7,400 under the rear seat, Sullivan said. After questioning, Carlton was charged with larceny and arson.

The apartment, over Carlton's grandfather's butcher shop, is occupied by Carlton, his grandparents, the aunt, Miss Elie Grun, and his mother, Mrs. Louise Carlton, 40.

Sullivan said the grandmother, Mrs. Minnie Grun, was almost trapped in the fire. He said the whole family had contributed to send him to college and had bought him a 1950 automobile.

About 85 percent of the Tennessee Valley has been mapped by the U. S. Geological Survey.

Lobos Rout Oilers With Home Run Attack

Phil Payne, husky, 185-pound gridster from Pampa, is holding down a guard spot for the West Texas State Buffaloes. Payne is a sophomore and stands 5 feet 10 inches. Coach Frank Kimbrough's Buffs trampled Arizona State of Flagstaff, 53-12, in a Border Conference game Saturday night at Amarillo.

Texas Football Stars Sparkle In Pro League

NEW YORK (AP) — Three former Texas football stars sparkled their teams to victory in professional games yesterday.

Bobby Layne and Doak Walker — former teammates at Highland Park High School — sparkled for the Detroit Lions.

And Sammy Baugh continued to pace the Washington Redskins.

With the season only two days old, two champions were spanked by "Old Man Upset."

The Philadelphia Eagles and Los Angeles Rams — last season's divisional champs in the National Football League — were trounced over the weekend as the "New Era" of the play-for-pay game dawned.

The Eagles were smashed by Cleveland's mighty Browns, 35 to 10.

The Chicago Bears got sweet revenge against Los Angeles, 24 to 20, last season the Rams dealt the proud Chicagoans two punishing defeats.

Bo McMillan's Detroit Lions, sparked by Bobby Layne's passing, romped over the Green Bay Packers, 45-7. The former Texas whiz completed eight of 12 passes for 173 yards and one touchdown — all in the first half.

Doak Walker also made an impressive debut for Detroit. The All-American from SMU kicked two field goals — 33 and 38 yards — and three extra points.

Sammy Baugh, the loop's senior member, paced the Washington Redskins to a 38 to 14 victory over the Baltimore Colts.

The great 35-year-old quarterback, playing his 14th pro season, flipped three touchdown passes.

New York's two entries both won. The Yanks edged San Francisco's 49ers, 21-17.

The Giants overcame Pittsburgh, 31-7.

Marshall Needs Win

(By The Associated Press)

Marshall can win the East Texas League championship tonight. It needs just one more victory over Longview.

Class AA Teams To Receive Grid Text This Week

(By The Associated Press)

Wichita Falls meets Breckenridge, Odessa tackles Sweetwater and Paschal (Fort Worth) plays Highland Park at Dallas in head-line games of the week in the Class AA schoolboy football campaign.

Defending Champion Wichita, which last week slugged Denison 39-2, will find Breckenridge more of a problem — that, is unless Wichita Falls is much stronger than anticipated.

The Coyotes lost many top hands from the 1949 team and though they were expected to be good, nothing like last season.

Sweetwater licked Vernon 19-0 last week while Odessa was whamming San Jacinto (Houston) 26-0. It's a good test from Odessa, this unheralded Sweetwater outfit.

Highland Park, which eased over Crozier Tech of Dallas 18-0 may find Paschal too much and stuff last week in crushing Woodrow Wilson of Dallas 14-6.

Another big feature of the week's schedule of 64 games in the state will be the collision of Capitol Hill of Oklahoma City, champion of Oklahoma, with powerful Port Arthur at Port Arthur Friday night. The Yellow Jackets, jibed at after a season opening in which they managed to beat Kerrville by only a touchdown, now are right back around the top after lacing Fortier of New Orleans 33-0, while Kerrville was showing it had enough to make a good game against Port Arthur by licking Thomas Jefferson of San Antonio, defending champion of the City Conference, 6-0.

Payte to Pitch Against Ten in Tonight's Game

Lamesa opened up with a potent home run attack here Sunday to rout the Oilers 11 to 6, and now lead 3 to 1 in the best out of 7 play-off series.

Manager Grover Seitz will send George Payte to the mound at 8 o'clock tonight in an attempt to keep the Oilers in the play-offs. It will also be George Payte Night for the righthander. Manager Jodie Beeler will pitch Israel Ten.

Dukes Deliver Knockout Blow To Hubs, 12-0

LUBBOCK (AP) — Albuquerque backed Don Cantrell's three-hit pitching with a 15-hit attack that blasted the Lubbock Hubbers for a 12 to 0 victory that eliminated the losers from the West Texas-New Mexico League's Shaughnessy playoffs here this Sunday.

The Dukes went down in order in the first inning, scored twice in the second and wrapped up the contest with an eight-run outburst in the third.

Cantrell gave up a single to Mike Dooley in the sixth, a double to Wiley Moore with two out in the seventh and a single to Buddy Morrow in the eighth.

Herchel Martin cracked a home run in the second inning and Don Stanford led off the third with a fourmarner. Stanford also contributed a single the same inning as 12 men came to the plate.

McMurry Faces Tough Teams in Conference Play

(By The Associated Press)

McMurry may have a tough time winning its third straight Texas Conference championship this season.

While the Indians displayed class in losing to Tulsa, 20-13 last week, other conference teams showed they had an abundance of material — with talent.

Southwestern knocked off Southwest Texas State, 28-7, and Abilene Christian blanked Eastern New Mexico, 39-0. Howard Payne fought Trinity of the Gulf Coast Conference to a 13-13 tie.

This week, Ray Morrison's Austin eleven opens against Southwestern at Denison.

Southwestern tackles San Houston State, Abilene Christian meets Sul Ross, Howard Payne plays Louisiana Tech, and McMurry tangles with Midwestern.

Favorite Face Tough Grid Foes In Class A Race

(By WILBUR MARTIN Associated Press Staff)

Class A football's rugged race may see some new favorites after this week's schedule — matching some of the toughest teams in the vast high school grid program.

Top tilt in the Panhandle pits Post against defending champion Littlefield.

Another West Texas game has the load of Class A, New Braunfels — running up against a big, undefeated Brady eleven.

Last week's heavy schedule cut some definite patterns in a few of the 32 district races.

Littlefield has rolled up 70 points to 12 for two opponents, while Post has scored 75 and held two foes scoreless. The third member of district four's "Big Three," Muleshoe, tackles Slaton.

New Braunfels slaughtered Honda, 74-0, last week.

Brady — along with Ballinger, Lakeview and Winters undefeated in District Seven — can't come close to matching this record. But the Bulldogs are no pushover.

District Five — which opened play for keeps two weeks ago — has three teams battling for the title. Wink, Kermit and Pecos protected perfect records last week, but Wink by a slender 30 win over Denver City.

Mt. Vernon walloped a good New Boston team, 27-0, and Mt. Pleasant rolled over Clarksville, 41-0, in two feature games in East Texas. Carthage's 41-12 win over San Augustine was another eye opener.

Cary, Porky Tie

ST. LOUIS (AP) — Cary Middlecott and Ed (Porky) Oliver were slated for an 18-hole playoff today to determine the winner of the \$15,000 St. Louis Open Golf tournament.

Big State All Even

(By The Associated Press)

Gainesville and Texarkana, all square again, tangle tonight at Texarkana in the fifth game of the Big State League's championship series.

Spring and Odessa tonight open the Longhorn League's championship series at Odessa.

Borger Tumbles

OKLAHOMA CITY (Special) — The Capital Hill Skins rapped the Borger 20 to 0 here Friday night.

City Conference Football Rolls Into High Gear

(By The Associated Press)

The City Conference division of Texas schoolboy football rolls into high gear. All 27 teams will be playing.

Paschal and Arlington Heights of Fort Worth, which made the top showings in opening battles last week, face acid tests.

Paschal goes to Dallas to play Highland Park, a ranking power of Class AA. Arlington Heights journeys to Austin to tackle the powerful Maroons.

Last week found Paschal crushing Woodrow Wilson of Dallas 41-8 and Arlington Heights outscoring a strong Abilene team from Class AA 33-21.

Lamar of Houston, which also looked good in downing Baytown of Class AA, gets an apparently weak Forest team of Dallas this week.

Last week Class AA eleven whipped 14 City Conference teams while the CCC boys could register only three victories.

Thomas Jefferson of San Antonio, the defending City Conference champion, took a licking from Kerrville, 6-0. This week Kerrville tries Brackenridge of San Antonio.

McMurry Faces Tough Teams in Conference Play

Browns Playing Like First Division Team

(By RALPH RODEN AP Sports Writer)

A move was reported underfoot in the American League today to move the St. Louis Browns to Timbuctoo.

For years rumors have persisted that the Browns would be shifted from the banks of the Mississippi to Baltimore, Los Angeles or other points but now those cities are considered too close — at least for the comfort of some rivals. Reading from left to right, these may be identified as: Cleveland, Boston and New York.

The Browns, a doormat for the greater part of the season, have suddenly grown ferocious, playing like champs instead of chumps.

Cleveland was the first to meet disaster at the hands of the "New Browns." St. Louis club knocked the Indians out of contention with four straight victories in Cleveland.

The Red Sox and Yankees were next on the list. The Browns took two out of three from Boston's third-place Sox and followed by splitting a doubleheader with the league-leading Yankees yesterday.

They knocked the Yanks off, 6-5, in the first game and battered the bombers tooth and nail until the last inning of the second before capitulating, 6-1. At that, it took a grand-slam, pinch-hit homer by 24-year-old Jimmy Hopp to beat them.

Despite the split the Yanks moved a game ahead of the second-place Tigers who lost a 3-2 decision to the Red Sox in Detroit.

The Browns' biggest crowd of the season, 21,062, showed up at Sportman's Park and saw Rookie Ken Wood double home Owen Friend in the ninth inning to win the opener.

Lefty Stubby Overmire went all the way for the Browns to outlast Ed Lopat, Tom Ferrick and Joe Page.

The nightcap was a mound duel between Allie Reynolds of the Yanks and Al Widmar. The Yanks loaded the bases in the

Missions Play Oilers in Texas Loop Finals

(By The Associated Press)

Tulsa and San Antonio tomorrow night's open a best four of seven game series to determine the Texas League's Dixie Series representative.

Last night Tulsa pounded Fort Worth, 9-3, for its fourth straight victory in the first round of the Class AA circuit's Shaughnessy playoff.

San Antonio, which eliminated Beaumont, first place winner in four straight games, comes to Tulsa the first two games. The next three will be in San Antonio and the final two — if needed — will be played here.

Three runs in the last of the ninth inning to shade the St. Louis Cardinals, 7-4. Pinch-hitter Jack Lohrke singled home Bobby Thomson from third with the payoff counter.

Brady — along with Ballinger, Lakeview and Winters undefeated in District Seven — can't come close to matching this record. But the Bulldogs are no pushover.

District Five — which opened play for keeps two weeks ago — has three teams battling for the title. Wink, Kermit and Pecos protected perfect records last week, but Wink by a slender 30 win over Denver City.

Mt. Vernon walloped a good New Boston team, 27-0, and Mt. Pleasant rolled over Clarksville, 41-0, in two feature games in East Texas. Carthage's 41-12 win over San Augustine was another eye opener.

City Conference Football Rolls Into High Gear

(By The Associated Press)

The City Conference division of Texas schoolboy football rolls into high gear. All 27 teams will be playing.

Paschal and Arlington Heights of Fort Worth, which made the top showings in opening battles last week, face acid tests.

Paschal goes to Dallas to play Highland Park, a ranking power of Class AA. Arlington Heights journeys to Austin to tackle the powerful Maroons.

Last week found Paschal crushing Woodrow Wilson of Dallas 41-8 and Arlington Heights outscoring a strong Abilene team from Class AA 33-21.

Lamar of Houston, which also looked good in downing Baytown of Class AA, gets an apparently weak Forest team of Dallas this week.

Last week Class AA eleven whipped 14 City Conference teams while the CCC boys could register only three victories.

Thomas Jefferson of San Antonio, the defending City Conference champion, took a licking from Kerrville, 6-0. This week Kerrville tries Brackenridge of San Antonio.

Class AA Teams To Receive Grid Text This Week

(By The Associated Press)

Wichita Falls meets Breckenridge, Odessa tackles Sweetwater and Paschal (Fort Worth) plays Highland Park at Dallas in head-line games of the week in the Class AA schoolboy football campaign.

Defending Champion Wichita, which last week slugged Denison 39-2, will find Breckenridge more of a problem — that, is unless Wichita Falls is much stronger than anticipated.

The Coyotes lost many top hands from the 1949 team and though they were expected to be good, nothing like last season.

Sweetwater licked Vernon 19-0 last week while Odessa was whamming San Jacinto (Houston) 26-0. It's a good test from Odessa, this unheralded Sweetwater outfit.

Highland Park, which eased over Crozier Tech of Dallas 18-0 may find Paschal too much and stuff last week in crushing Woodrow Wilson of Dallas 14-6.

Another big feature of the week's schedule of 64 games in the state will be the collision of Capitol Hill of Oklahoma City, champion of Oklahoma, with powerful Port Arthur at Port Arthur Friday night. The Yellow Jackets, jibed at after a season opening in which they managed to beat Kerrville by only a touchdown, now are right back around the top after lacing Fortier of New Orleans 33-0, while Kerrville was showing it had enough to make a good game against Port Arthur by licking Thomas Jefferson of San Antonio, defending champion of the City Conference, 6-0.

Favorite Face Tough Grid Foes In Class A Race

(By WILBUR MARTIN Associated Press Staff)

Class A football's rugged race may see some new favorites after this week's schedule — matching some of the toughest teams in the vast high school grid program.

Top tilt in the Panhandle pits Post against defending champion Littlefield.

Another West Texas game has the load of Class A, New Braunfels — running up against a big, undefeated Brady eleven.

Last week's heavy schedule cut some definite patterns in a few of the 32 district races.

Littlefield has rolled up 70 points to 12 for two opponents, while Post has scored 75 and held two foes scoreless. The third member of district four's "Big Three," Muleshoe, tackles Slaton.

New Braunfels slaughtered Honda, 74-0, last week.

Brady — along with Ballinger, Lakeview and Winters undefeated in District Seven — can't come close to matching this record. But the Bulldogs are no pushover.

District Five — which opened play for keeps two weeks ago — has three teams battling for the title. Wink, Kermit and Pecos protected perfect records last week, but Wink by a slender 30 win over Denver City.

Mt. Vernon walloped a good New Boston team, 27-0, and Mt. Pleasant rolled over Clarksville, 41-0, in two feature games in East Texas. Carthage's 41-12 win over San Augustine was another eye opener.

Husband and Wife Form a Team On Mystery Stories and Marriage

By GAIL DUGAS
NEA Staff Writer

NEW YORK — (NEA) — To the millions of Americans who settle down nightly with a good mystery, the story's the thing. But the story is bread and butter to Frances and Richard Lockridge, who successfully combine marriage and a partnership in mystery writing.

Wives who think (secretly) that it would be a nuisance to have a man underfoot much of the time might like to know that the Lockridge household operates smoothly. That, perhaps, is because things are accomplished with a system: so much time for writing, so much for gardening, so much for visiting with friends. Work is planned, too. Frances thinks up plots and characters and Richard presides at the typewriter keys.

Many people believe that Pam and Jerry North, the famed sleuths who appear in many of the Lockridge novels, are in reality the Lockridges themselves. The authors maintain that this just isn't so. They say that the Norths, whether on stage, radio or between book covers, are purely fictional. They even say that they can only guess at the age of the Norths but think that they are somewhere around 35.

The three Siamese cats who share the Lockridge home in Ridgefield, Conn., are easily recognizable, however, as Martini and her two daughters. The cats sink in and out of the pages of many a Mr. and Mrs. North mystery and were the springboard for "Cats and People," the only non-mystery which the team has produced.

Because the Lockridges have written over two dozen mysteries together, the question naturally comes up: how did they become a writing team?

"I was doing a series of sketches for the New Yorker back in 1932," Richard Lockridge explains. "The Norths appeared in these pieces with regularity. About this same time, Frances got an urge to write a mystery. It seemed not only natural, but economical, to transfer the Norths, who were characters al-

Lefors AC Club Starts New Year

LEFORS — (Special) — Mrs. Edwin Atkinson was hostess to the Lefora Art and Civic Club Tuesday night for a buffet dinner which began the new year.

After dinner was served a book review was given by Mrs. Raymond Carruth, Borger, a former member of the club. Mrs. Carruth reviewed the book "Especially Father," by Gladys Taber.

During the short business session, the club voted to sponsor a bake sale Saturday, Sept. 18, at the Cut Rate Grocery in Lefors.

Two new members were accepted into the club. They were Mrs. Jake Leggett and Mrs. Mack Winters.

The roll call was answered with "Vacation Memories" by Misses Bobbie Koschekie, Jean Upham, Iris Barron, Mildred McPherson, Faye Nichols, Alta Brown, Edythe Watson, Faye Turnbo, Louise Brown, Jennie Smith, Fern Bull, Cleo Spence, and Alma Cumberledge.

And Alma Cumberledge, Virginia Archer, Tommie Jordan, Velma Carter, Raymond Carruth and the hostess.

ready created, to this mystery. We did, and have been writing about them, off and on, ever since. But Frances never did find a body in the bathtub, even though some of our friends persist in thinking, to this very day, that she did."

The Lockridge marriage, pre-dating the Lockridge writing partnership, took place in 1922 in Kansas City, where both were newspaper reporters. They came to New York in 1923 and Richard Lockridge continued in the business. On general assignment, he covered famous murders, including the Hall-Mills and Snyder-Gray cases, and from them plucked a sort of inside knowledge of murder.

Napoleon celebrated victories with fireworks.

Canned Grapefruit Is Useful Item

LIVELY RING MOLD SALAD is made from canned grapefruit sections, juice and stuffed olives.

By GAYNOR MADDOX
NEA Staff Writer

In your attempts to cut food costs, be careful not to cut the foods that are rich in vitamin C. Your family must have them to stay well and vigorous.

All the citrus fruits—oranges, grapefruit, tangerines and lemons—are leading vitamin A carriers. So, of course, are tomatoes. Fresh, canned or frozen concentrated, they are all essential factors in balanced menus.

Canned grapefruit sections make vitamin-rich fruit cups, salads and desserts. There is no waste, remember. That is an important consideration in a food purchase today.

GRAPEFRUIT RING MOLD
(8 Servings)

One No. 2 can grapefruit sections, 1 No. 2 can grapefruit juice, 2 envelopes unflavored gelatin, 8 stuffed olives, sliced.

Drain grapefruit sections well. Add drained syrup to grapefruit juice; measure. Add water to

make 3 1/2 cups. Soften gelatin in 1/2 cup of the cold liquid. Heat remaining liquid. Add softened gelatin; stir until dissolved. Chill until consistency of unbeaten egg white. Arrange some of the drained grapefruit sections and sliced olives in the bottom of 4-cup ring mold. Spoon over enough of the chilled mixture to cover sections and olive slices. Chill until almost firm. Repeat procedure. Chill until firm. Unmold on serving platter. Fill center with salad. Surround grapefruit ring with salad greens and grapefruit sections. If desired, garnish with additional olive slices and grapefruit sections.

Here's another good combination: Combine sour cream and cottage cheese. Season well with garlic sauce and freshly ground black pepper. Serve on individual plates on a bed of crisp lettuce and garnish liberally with canned grapefruit sections. Serve French dressing in separate bowl.

Cross Stitch Fruit

By MRS. ANNE CABOT

These giant fruit designs make such cheerful decorations for kitchen linens, you'll wonder what you ever did without them. Big six and eight inch pineapple, oranges, bananas, grapes, strawberries and peaches worked in rhythmic "gingham" cross stitch are easy embroidery and fun too!

Pattern No. 5110 consists of lot iron transfer for 7 motifs, measuring from 6 to 8 inches, color chart, stitch illustrations and material requirements.

Send 20 cents in COINS, your name, address and the PATTERN NUMBER to ANNE CABOT (Pampa Daily News), 1180 Ave. Americas, New York 18, N. Y.

NEEDLEWORK FANS — Anne Cabot's BIG new ALBUM is here. Dozens of fascinating new designs, gifts, decorations and special features. PLUS 4 gift patterns and directions. 25 cents.

A few crushed mint leaves added to pineapple juice make a delicious summer cooler. Serve strained over ice cubes and add a mint sprig and a maraschino cherry to each glass for a pretty garnish.

Kappa Kappa Iota Plans Rush Party

Members of the Kappa Kappa Iota Sorority planned the group's annual rush party at a meeting held recently in the home of Mrs. Ben Ogden, 1808 Christine. Mrs. Ogden, assisted by her mother, Mrs. W. E. Fountain, was hostess for the called meeting of the club.

The rush party, according to plans laid by members, will be given Sept. 25 in the City Club Room. A liberal gift will be given in honor of the special guests. The affair will begin at 7:30 p.m.

The following members were present at the meeting: Misses B. G. Gordon, C. W. Stowell, W. C. Griffiths, J. L. Spencer, Charles Meech, O. T. Mangold, B. R. Neukolb, W. L.

Hadacol Helps Relieve St. Louis Man's Leg Pains

He Suffered Deficiencies of Vitamins B-1, B-2, Iron and Niacin

Elmer Prater, 3619 North Broadway, St. Louis, Mo., having tended bar for a good many years says a man has to work mighty hard these days to make himself a passable living. Gone are the days when you could buy a good lunch for 15c. But he says the good old days of healthful living are today. That is because he found out how worthwhile life really can be. Gone are his days of suffering, thanks to HADACOL. Mr. Prater had been suffering a deficiency of Vitamins B-1, B-2, Niacin, and Iron.

Read Mr. Prater's statement: "I had been bothered many years with neuritis pains in my legs—the pain was so bad I couldn't sleep at night. My appetite was way off, too! I just couldn't seem to get any enjoyment out of food and what I did eat didn't agree with me at all. I had just about given up hope when my brother and sister persuaded me to take HADACOL. What did HADACOL do for me? ... Why, after taking HADACOL for only 2 weeks I was able to go back to work. You think I don't rate HADACOL First Place? ... I recommend HADACOL every time."

Wonderful for Both Old and Young!

This new HADACOL is simply wonderful for men, women and children of all ages who are sick and ailing because their systems are lacking these important Vitamins B-1, B-2, Iron, and Niacin.

The important Vitamins and Minerals in HADACOL come to you in special liquid form so that they are more quickly absorbed and assimilated in the blood stream, ready to go right to work at once. HADACOL even builds up the red blood cells (when Iron is needed) to carry these precious

Grace Friend

GOSSIPY NEIGHBOR SHOULD BE IGNORED

Dear Grace Friend:

I suppose I am one of many who are going to have my problem to deal with, so I thought I'd write you and ask if you think I've done right.

My husband has gone back into the service, and I miss him in many ways. Beside the loneliness I have the problem of carrying on alone where I have him to help me before. We have two small children and I am busy with them and do not leave them except to go to a movie with either a girl friend or my sisters and their husbands.

But my sister's husband and some of my friends' husbands have been very kind in helping me with things a woman cannot do. I had a stopped-up sink the other day and by girl friends' husband came over and fixed it after I met him on the street and happened to be going to help me. My sister's husband takes me to the market to do the heavy shopping.

No one seemed to think a thing about it until I noticed my neighbor's curtain twitching every time I leave the house with one of those men, and she has made some very pointed remarks both to me and my mother.

So I told the fellows I guess I'd better be more than careful and I'll just have to call a taxi to do the shopping and a plumber to fix the sink is stopped-up. They said "pooh," but I think I'd better stick to it in order to avoid gossip.

Have I done right?

A. P. S.

In your place, I believe that I would just ignore the gossiping neighbor who spies on your comings and goings.

In any case she can't make much of your friends' husbands helping you out when they can, as in all probability the women are the ones who suggested that their husbands give you a little assistance.

If your sister's husband wants to drive you to market and your sister is aware that he is doing it, then let him.

It is natural that these men who are home would want to do what they can for the wife of a friend in the service. Don't spoil their joy in their good deeds by forbidding them to come. Instead, if the gossiping neighbor really worries you, ask their wives to come along too and visit with them while their husbands are busy with your heavy chores. Or arrange for the men to come before dinner and invite their wives and youngsters to come along and plan to get dinner together. Certainly none could criticize that.

CHICKEN SALAD

To make a "different" chicken salad mix diced cooked chicken with celery, olives, diced pineapple and bananas; moisten with mayonnaise. Serve in crisp lettuce cups accompanied by brown bread and butter sandwiches and potato chips.

When using raisins wash them under hot tap water and drain them well. They are easy to wash if you put them in a strainer.

Call, Misses Alene Weathered, Frances Huff and Edna Daughette and Mrs. Ogden and Mrs. Fountain.

Try This Tomato-Cheese Special

By GAYNOR MADDOX
NEA Staff Writer

It's a hard job to feed the family well today, isn't it? Take a lot of money — an awful lot. But there are ways to ease the strain.

By planning meals several days in advance, you can avoid wasting foods. Last minute planning and buying is too often expensive.

Study market reports before you plan menus. Use as many of the plentiful and locally abundant foods as possible. Re-read your recipe book. Seek out sturdy low-cost protein dishes and use them frequently in place of high-cost meats. Use eggs, cheese, milk, dry beans, wholewheat products and fish liberally. They provide protein economically.

Tabasco Tomato Cheese Rabbit
(4-6 servings)

One can condensed tomato soup, 1/2 cup water, 1 medium onion, sliced, 1/2 pound American cheese, grated, 1-2 teaspoon dry mustard, 1-2 teaspoon paprika, 1-2 teaspoon salt, 1-4 teaspoon tabasco, 1 egg, separated.

Combine tomato soup and water in top of double boiler. Add sliced onion and cook over direct heat until onion is tender, about 10 minutes. Add cheese and seasonings; stir until cheese is melted. Remove from heat and slowly stir into beaten yolk. Beat egg white until stiff; add cheese mixture, stirring to blend well. Return to double boiler and cook

over boiling water five minutes longer. Serve on toast or crackers.

These carefully planned budget menus may help you:

Dinner: Broiled lamb patties, broiled stuffed tomatoes (using corn as a filler), snap beans, cucumber and onion relish, bread, butter or fortified margarine, butterscotch pudding, coffee, milk.

Dinner: Braised chuck steak, braised potatoes, buttered beets, molded carrot and pineapple salad, bread, butter or fortified margarine, plain cake, coffee, milk.

Dinner: Braised pork chops, stewed tomatoes and corn, wilted lettuce, bread, butter or fortified margarine, easy chocolate cake with sauce, coffee, milk.

SALAD DESSERT

You can combine salad and dessert if you serve peach halves on watercress with cream cheese; the dressing may be mayonnaise or sour cream. Caraway crackers are delicious with a salad of this sort.

Also Helps Build Up Red Blood! Do female functional periodic disturbances make you suffer pain, feel nervous, irritable—at such times? Then, try Lydia E. Pinkham's TABLETS to relieve such symptoms. Pinkham's Tablets are also very effective to help build up red blood in simple anemia. Lydia E. Pinkham's TABLETS

5 THINGS

you should know about our request for higher telephone rates

1. A new, modern dial system will be installed in Pampa at a cost of \$2,122,600 if new telephone rates are approved.

The new dial system will provide fast, accurate, dependable service at any hour of the day or night.

2. Telephone rates in Pampa have not been increased in 22 years.

3. The Pampa telephone exchange was operated at a loss in 1949.

We spent	\$266,452
We collected	224,867
We lost	\$ 41,585

Since 1940, telephone revenues have increased 125 per cent because there are more telephones in Pampa. But costs of furnishing service have gone up 233 per cent. As a result, telephone service is being furnished here at less than cost.

4. Good telephone service depends on good earnings.

The telephone company cannot grow and meet its obligation to furnish a continuously improving service here unless it is financially healthy.

5. Growth of Pampa brings large demands for more telephones.

We've spent more than \$700,000 improving and expanding the telephone system here to keep pace with Pampa's growth. We need to spend \$2,122,600 more for a new dial system in Pampa to improve and expand service. Expenditure of the additional millions to bring Pampa the kind of telephone service this city needs cannot be justified without approval of a schedule of rates that will permit operation of the telephone system here on a sound financial basis.

We can't balance our post-war costs with rates that have not been increased in 22 years. We don't like to ask for higher rates, but if we are to meet the telephone requirements of the people of Pampa, there is no other choice.

"Back to School" Is Theme of Meeting

"Back to School" was the theme the Skelly-Kingsmill Club carried out at a meeting in the home of Mrs. G. I. Harkrader recently.

The living room was appropriately arranged in schoolroom fashion with blackboard, McGuffey's readers and the Blue Back speller. Included in the day's entertainment were a spelling bee and a ciphering match. Several "students" were punished and had to sit on the dunce stool and wear the dunce cap.

Refreshments consisted of sandwiches, cookies, orange drink and chewing gum, served in paper sacks.

Students enrolled were Lyle Zolomony, Gladys Mayo, Virginia Mitchell, Lorene Price, Cerdia Adair, Jewell Lane, Violet Durham and the teacher, Mrs. Harkrader.

Two visitors were present, Jesse Craddock and Gladys Muns. The next meeting will be held in the home of Jewell Lane Sept. 22, at 2 p.m.

Jo Austin's Is Crossroads of Pampa Trails

If there is a single place in Pampa that can be given the name "Crossroads of the Town," it's Jo Austin's Cuyler place. The Crystal Palace, located on the West side of Cuyler, near the corner of Kingmill is rapidly becoming one of the most popular meeting places in the town.

The major reason for this sudden influx of popularity for the Crystal Palace is the personality of the entrepreneur and her staff. Pampa has had quite a long time to become acquainted with Jo Austin. For those of the uninitiated, a word of warning: "You don't know Pampa until you know Jo Austin." The only way to get to know Jo is to spend a little time at the Crystal Palace.

The "palace" is noted for the outstanding coffee served at all hours the establishment is open. Next to the fine coffee is a high grade "quick" lunch service. If you aren't interested in lunch, you'll find many other delightfully delicious things to attract you.

A quick rundown of offerings by Jo includes: home-made candies of every variety and description, soft drinks, ice-creams, coffee, rolls, doughnuts, and a pleasant selection of sandwiches. In addition, you may purchase your favorite brand of tobacco, cigars and cigarettes while browsing through one of the most complete news and magazine racks in town. Drop in and get acquainted with Jo Austin.

It could be said, with considerable accuracy, that it's a far cry from the stick of a ship at ten thousand feet to the helm of an automobile agency at street level in Pampa. Literally it is true. Figuratively speaking it doesn't make a lot of difference to Wesley Lewis, the popular vendor of automobiles from 219 North Ballard. Whether it's in the air with his 'hot' A-24 ship, on the ground with one of those smooth Studebaker automobiles, or at home with his fine family 'Wes' Lewis is never out of place.

Southard And Shuler Get 'Em Wired Rapidly

That word 'supply' is sometimes used pretty loosely in some circles of business. However, when used in its true light, it designates a house of commerce or business prepared to satisfy the needs of customers indulged in business requiring a specific type of item. Such is the case at Electric Supply Company, the big company, with the small front across from the Pampa News Building.

Shuler and Southard haven't been the noisy type of supply house. They've gone quietly about their business, doing a top-rated job of dispensing electric supplies for home and business, office and industry in addition to doing some of the more important electrical wiring jobs for new construction around the town. You'll hear a lot more from this hard-working pair, as time goes by.

In addition to operating a firm contracting for wiring and electrical installation work, Shuler and Southard carry on a retail business in the electrical appliance field. Recently they've been tending a toaster or two out for public consumption at a pretty reasonable price — nationally known makes, too. Toasters, however, aren't the only thing the gentlemen have to offer in the electrical line.

Rather than bore you with a long list of appliances, wire sizes, fixtures and such like an invitation is extended to visit the Electric Supply Company and make personal inspection of the wares displayed. Remember! It's directly across from the "News."

There aren't many people in the country, young or old, who can't identify the sleek and futuristic lines of one of Wes' 1950 Studebaker Champions, Commanders or Land Cruisers. Such is the case with Wes. He's known in Pampa by young and old alike. A chap with his personality is bound to be a pretty popular sort.

Lewis Motors can hardly be characterized as a fly-by-night organization. Wes has spent considerable time in the automotive field at preparing himself for the present position he maintains. Prior to his entrance in the Studebaker field of work, he was engaged, for an eight year period, in learning the business of automobiles at various of the important tasks therein encountered.

Although the blood of the salesman was strong within him, Wes tried his hand in the oil fields during 1928, '29 and '30. The oil field industry didn't suit him so he entered into a partnership with a white-whiskered uncle of his. The old boy is related to the rest of the country in a rather large way. Uncle kept Wes busy for quite a spell. Seems there was a double edged frasca to be settled and Wes was engaged at jockeying aeroplanes around the 'wild blue yonder.' It might have been an epidemic sort of operation — 12,000,000 other guys joined the firm — because Wes is still exercising a penchant for the thrill of the skies with his AT-24. The excitement is often seen taking a high-altitude jaunt in his ship. Whenever weather permits, he'll take to the air without much urging.

and salesman for an average car family of twenty-five cars. Used Cars on the Lewis lot range from a few 'junkers' to a large number of mighty fine used cars. All of the Lewis used cars are sold with the same backing and integrity in deals as the new Studebakers handled at the up-town location.

Wes could hardly expect to be anything but a success at this business. He has the backing of a well operated home and family institution. When Mrs. Lewis isn't busy as Mrs. Lewis, she and Wes are occupied at being mother and father to three personable offspring — Jean, 17, Glenna 9 and Monty 2. The family holds forth at 425 Hazel when they're lucky enough to find time to be together, all at once.

Almost as an afterthought while discussing his hobbies of flying, race cars and hunting, Wes mentioned that the '51 Studebakers are likely to be quite a surprise.

Lewis Motors Used Car lot, 1200 W. Wilks, is rapidly becoming one of the outstanding used car lots in Pampa. Wes Lewis has left no stone unturned to give the best in used cars to his customers. Each car is backed by the spotless reputation of this respected dealer.

WHOLESALE DISTRIBUTION PLAYS A LEADING ROLE IN PAMPA'S ECONOMIC DRAMA OF BUSINESS EXPANSION

When the town is appraised of the opening of a new business there is usually quite a stir, i.e., if the business is the retail variety and is located on the 'main drag' of the business district. Such is hardly the case with the wholesale club. These boys go about the business of supplying the retailer, unsung, unheralded, but giving the primary steps of distribution the attention so necessary to the success of the retail institutions. Such a firm is Thompson Wholesale Distributing Company of 1418 E. Francis.

Supply Is A Big Word In Lives Of Radcliff Brothers

A night or two ago, a few of the boys were tossing the 'ox' in one of the more reputable gathering places of the town. An argument arose concerning the various industries in Pampa and their position in the local economy. Such discussions, although more personal amusement than educational, usually high light some one firm inclined to be constantly in the public eye. One of the lads, with a large ken of the general structure of business and industry, brought up the subject of supply to heavy industry. His argument being that the supply house should receive a hand comparable to that given the primary industry.

The lad's comments brought to mind that this town has some fairly large supply houses of fair-to-middlin importance to the local economy. Such a firm is Radcliff Brothers' Supply. This reputable institution, located on highway "60" is one of the busiest spots in town. The boys are working like beavers, the year 'round, to supply the vast oil fields of the Panhandle with the vital materials necessary to successful operation of the oil industry.

From tiny tubes to large diameter industrial pipe and oilwell casing, small drive belts to multiple use gears for heavy machinery you'll find exactly the thing you want at Radcliff Brothers' Supply house. The name is an old and reliable one in the field of heavier industry. If you aren't well aware of the important part these lads play in keeping Pampa on even keel, it's time you learned and gave Radcliff a big vote of thanks. Timely action by Radcliff in supplying emergency materials may have saved your paycheck at one time or another.

NORMAN SOUTHERNER

10-YEAR GUARANTEE

This modern design forced air gas furnace can be quickly installed in attic or closet, under floor, ceiling or stairs, or on outside porch. ASH approved for this type installation. Easily suspended from basement ceiling joists. Replaces the old conventional type furnace which takes up floor space.

The Norman Southerner assures dependable gas heat and lasting satisfaction. It is guaranteed for 10 years. Thousands of home owners enjoy efficient, economical gas heat from their Southerner gas furnaces. We can install it immediately on small monthly payments. \$20 complete details phone or write.

Staid Old New York Philharmonic Symphony Follows in Berle's Footsteps; Makes a Hit

NEW YORK — (NEA) — The earthiness of the usual Roxy presentation, would rebel. "We are amazed," says Maestro Mitropolous peeling his pre-concert orange. "The reception here is often warmer than that we get at Carnegie Hall. Yes, we are amazed here."

The Roxy itself isn't quite so amazed. It kind of expected the show would be a success. Its executive director, A. J. Balaban, says his stage policy is "elastic," and the appearance of a symphony orchestra is just stretching the elasticity a bit.

But even Balaban and the other Roxy officials were slightly worried about Saturday night. Usually, the audience then is a little louder, a little less tolerant of anything highbrow. The first

New Butane Adapter Cuts Costs in Fueling Airplanes

stand. But here I wanted to make sure they understood everything." Mitropolous popped an orange section into his mouth. "It's known," he said, "it is like old and new acquaintances. With old friends, you can sometimes be a little difficult and they'll understand. With new friends, you must be more careful. That is the same thing with old and new listeners."

The idea to bring the orchestra to the Roxy came originally from Spyros Skouras, president of Twentieth Century-Fox, the company whose pictures are shown at the Roxy. Skouras is on the Philharmonic's board of directors.

He wanted to give the musicians employment during the concert off-season, and also he felt the appearance at the Roxy might bring good music to a new public. The Roxy officials liked the plan at once.

Statistically, the idea has been successful. The Philharmonic broke the Roxy's 3-year-old record, by grossing \$90,303 for the four-day Labor Day week-end.

The orchestra is presented as an act, not in the usual orchestra pit. They are behind the curtain when the stage show is announced. An organist sets the mood with a little Bach. An announcer gives a 60-second talk about the Philharmonic's century-old history, ending with the words, "The time or the place doesn't matter — it's the music that counts."

Then the curtain parts, revealing the 104 men in their white jackets. "In the spotlight," says Balaban, "with their white jackets glistening, they make a mighty impressive picture."

They play three or four numbers — the program changes twice a week — and Elton Farrell, a soprano, sings one or two songs. The audience sometimes applauds between movements, which just isn't done by true concert lovers. "But sometimes they do at Carnegie Hall, too," says Mitropolous, "and, anyhow, that's a logical place for applause."

Public response to the innovation has warmed the Roxy's heart. The theater had to hire a special telephone operator to answer the flood of calls, asking information about the engage-

By NEA Service
OKLAHOMA CITY, Okla. — (NEA) — Landrum L. Hughes flew to Dallas the other day for 63 cents.

That's what it cost him for fuel for the 188-mile hop in his four-place, 145-horsepower plane, and he hopes that some day automobiles and trucks, as well as other airplanes, will be traveling on the same cheap fuel.

The Oklahoma City inventor does it by using butane gas, which costs from five to seven cents a gallon, instead of gasoline at 22 cents a gallon.

The trick is in his adapter device, which feeds the butane from a tank installed behind the pilot's seat into a conventional carburetor. After two years of work to perfect the device, he's now seeking patents, and the Civil Aeronautics Authority has granted him a certificate to use it in planes.

Although airports aren't likely to have butane on hand at the moment, Hughes was able to refuel on his flight to Dallas by utilizing a tankful used at the field for heating buildings. Otherwise, however, he could have switched to gasoline in his plane's regular tanks.

Since butane is lighter than gasoline, it compensates for the weight of the extra tank. But he is perfecting a method of sorting the gas in the wings of small planes to eliminate the tank.

Hughes says his butane adapter has been tried out on cars as it trucks, and works as well as it does in his planes.

More than 86 percent of the enlisted men in the U.S. Army in the Far East Command, who become eligible in 1949, re-enlisted or extended their overseas tours.

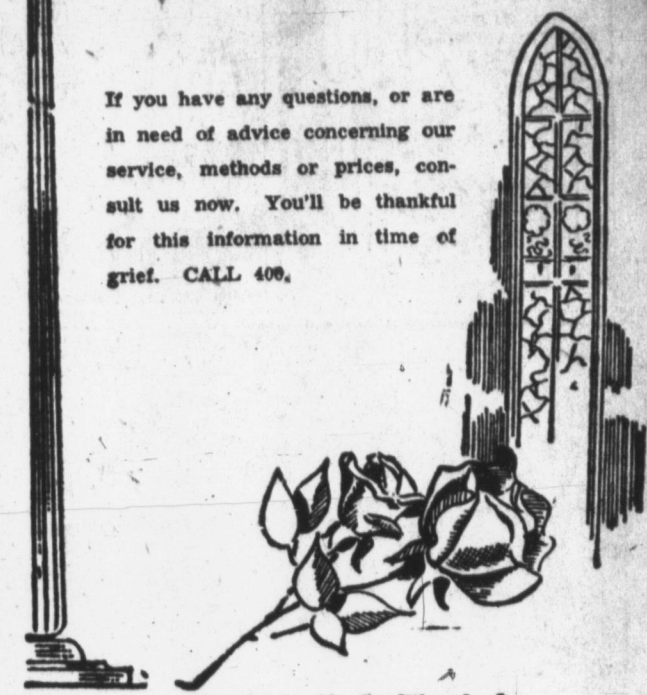

White-Bearded Chief Sways Pakistan State

KARACHI — (AP) — A 70-year-old white-bearded divine who denounces western ways and demands a theocratic state is winning new followers for a political party whose origin was a religious group. Moulana Abul Ala Maudoodi's party is the Jamaat-e-Islami, or Theocratic Islamic Party. His theme is that while Pakistan is an Islamic state, the government of Prime Minister Liaquat Ali Khan is "un-Islamic and far from Islamic ideal."

He would give no place in the administration to non-Muslims. The present government includes a Hindu cabinet minister and there are Englishmen in civil and military ranks.

Announcing

The Appointment Of Pampa Steel & Erection Co.

As Dealers In Pampa And Vicinity For

QUONSET

ALL STEEL — ALL PURPOSE BUILDINGS

Quonsets

FOR THE FARM!

Here are three all-steel, arch-rib buildings that are "naturals" for many farm uses. Tested and proved under widely varying conditions by the armed forces throughout the world, these "Quonsets" provide fire-safety and freedom from rot, sag, warp and termite destruction. They are economical to buy and maintain. Constructed with Stran-Steel nailable framing members, these highly flexible buildings are easy to erect, can be added to simply and economically.

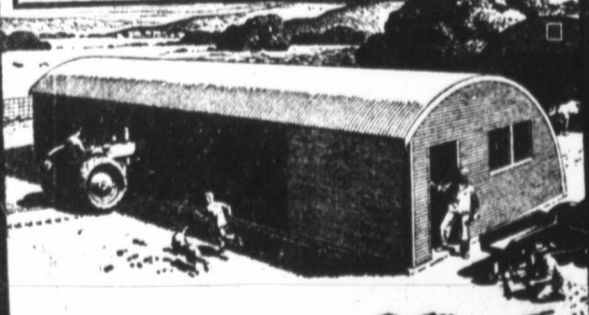

THE "Quonset 40"

40' wide by any length desired, in extensions of 20'. Fire-safe, sag-proof, rot-proof, warp-proof. Quick and easy to erect, maintain, and add to when required. 12'x12' sliding door, four windows and ventilating louvers in each end-panel are standard. Additional windows can be installed in sides, if desired.

THE "Quonset 20"

If a smaller building will meet your requirements, the all-steel, arch-rib "Quonset 20" should fill the bill. 20' wide by any length, in extensions of 12'. Physical properties are identical to those of the "Quonset 40." Walk-door, two windows and ventilating louvers in end-panel are standard. Side windows are available, if desired.

THE "Quonset 24"

An ideal building for implement, auto, truck or farm produce storage. 24' wide by any length, in extensions of 12'. The "Quonset 24" is available with or without front sliding doors or solid front panels. Walk-door and windows for end-panels, as well as solid steel interior partitions for any 12' section, are also available, if desired.

Let's talk over your building needs today!

QUONSETS STAND
READY TO BRING YOU
THE BUILDING YOU
WANT WHEN YOU
WANT IT

QUONSET buildings provide farmers and industry with flexible applications of Stran-Steel arch-rib construction. They make available a lot of space at low cost. They are efficient in design. They are fire-resistant, sturdy, permanent.

Farmers are finding QUONSETS to be ideal for grain storage and miscellaneous farm buildings. They are easy to erect and the protection they give is unparalleled. They are inexpensive to erect, and to maintain.

Industrial concerns large and small are finding QUONSETS well suited for various plants and associated buildings such as warehouses and shipping rooms.

Get in touch with us today and see how these modern buildings can be "tailored to your needs" for farm and industry.

Stran-Steel Construction
Sets the Pace in Economy

Secret of the speed of erection and economy of the QUONSETS is the Stran-Steel framing. It features a patented nailing groove in arch ribs, purlins, studs and trimmers. Building materials are nailed directly to the frame, and the nail is clinched securely in a "grip of steel" by the Stran-Steel nailing groove. The QUONSET combines the strength of steel, the economy of arch-rib construction and the flexibility of nailable construction to give industry and farmers a better building at lower cost.

GET DELIVERY NOW
ON THE FAMOUS STRAN-STEEL

"Quonset 40"

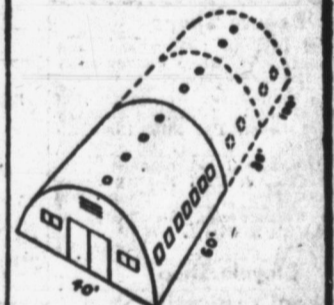

AN EASY-TO-ERECT, ECONOMICAL, MANY-PURPOSE
BUILDING TO INCREASE YOUR PRESENT FACILITIES

You've read about what the Navy did with Stran-Steel military "Quonsets," converting island after island in the Pacific into livable, workable bases through the general usefulness of these many-purpose buildings. Warehouses, living quarters, machine shops, radar stations, laundries, kitchens, canteens, bomb assembly sheds these and scores of other building needs were met by tens of thousands of "Quonsets" produced by Great Lakes Steel Corporation.

Now the famous "Quonset 40" is ready to meet your building needs. It offers you space at low cost, adaptability demonstrated by the hundred and more uses found for it by the Seabees, durability proved by wartime service under extreme conditions of weather and climate. Fire-safe, sag-proof, warp-proof, rot-proof, termite-proof the "Quonset 40" is being produced in volume to serve you well. Put this low-cost low-maintenance building to work in your operations. Obtain complete information now.

AVAILABLE IN ANY
LENGTH TO MEET YOUR
REQUIREMENTS

Simplified and adaptable Stran-Steel construction. The same span, 40' wide "Quonset 40" can be supplied in any desired length - increments of 12' such as 40', 52', 64', 76', 88', etc. Steel ceiling and roofing as well as interior partitions may be constructed, as shown through a Stran-Steel framing member in view of the Stran-Steel nailing groove.

Stran-Steel "Quonset" Buildings and Stran-Steel Framing are products of Great Lakes Steel Corporation a unit of National Steel Corporation
