

Oil Slick Believed From Lost B-36 Sighted

Husband of Pampa Girl Said in Crew

SEATTLE — (AP) — An ominous oil slick was sighted today in the hunt for an Air Force B-36 bomber missing since Monday. Planes and ships are to inspect the oil slick, sighted in the Queen Charlotte sound area some 400 miles northwest of here, where the B-36 vanished with 17 aboard.

The slick was sighted from the air, but first reports did not give its exact location. A wireless Services Public Relations Office at Seattle, which announced the development, said searchers did not place too much credence in the report. It was pointed out that ships are to inspect the slick, following that a B-36 might leave oil traces.

Lt. Ernest O. Cox, Jr., son-in-law of Mr. and Mrs. H. B. Knapp, 209 Sunset Drive, and husband of the former Billie Knapp, an engineer on the ditcher bomber.

Mrs. Cox is at her home in Fort Worth, anxiously awaiting word from the international rescue mission. They have two children: Gene Howard, 5, and Vickie, 3.

Lt. Cox, according to Mrs. Knapp, has been in service seven or eight years and is stationed at Carswell Air Base, Fort Worth.

Nor word has been heard from the B-36 since the last of three messages reported at 1:40 a. m. CST Tuesday: "Going to let down . . ." At Fort Worth, Eighth Air Force headquarters said it had a report today that a wireless signal was received for an hour and a half after the last radio message.

The signal was reported to be a continuous tone, as though someone had tied down a wireless key.

Earlier the huge bomber with 16 crewmen and an Air Force lieutenant colonel aboard, had messaged that one engine was ailing and asked searchers to "keep a careful lookout for flares or wreckage."

Searching airmen and surface craft yesterday and last night found no trace of the wreckage in the area, some 460 miles northwest of here.

Royal Canadian Air Force headquarters in Vancouver, B. C., said it held scant hope that the big plane could remain aloft long in the gale-swept, icy strait.

Survival of the 17 aboard would depend on whether they launched their life rafts in time.

The RCAF said it planned to send nine planes into the search during the forenoon, when the (See HUSBAND, Page 2)

GREAT FALLS, Mont. — (AP) — Eight men were killed and seven escaped today when an Air Force B-29 bomber crashed into the prairie off from the Air Force base here about 7:30 a. m. (CST) today.

The big four-engine plane, which had been searching for a missing B-36, plummeted to the prairie about three miles southwest of the local base from a low altitude. It burned shortly after it hit one side of U. S. Highway 87, and careened over the road, the Air Force information officer said.

Survivors were being questioned this morning. Their names and method of escape were not known immediately.

The B-29 from Spokane Air Base landed here last night after searching for the B-36 which was missing with 17 men aboard. The B-29 was to resume the hunt this morning.

Cause of the crash was not known. The Air Force information officer said the scene from Spokane were enroute here to investigate. An investigating board probably will be set up as soon as they arrive. They were identified only as Capt. Mayfield and Major Weaver.

The Great Falls base information officer said the seven survivors were taken to the base hospital for observation. Their injuries were believed slight. All seven walked away from the crash.

A cordon of military policemen surrounded the flaming wreckage for a time, while ammunition and flares exploded in the plane. Newspaper reporters, photographers and others were kept away at first. The information officer said this was "for their protection."

State Real Estate Men to Visit Here

Hugo Lowmestern, president of the State Real Estate Association, will discuss state and national real estate laws at a meeting at 8 p. m. Monday at the County Court Room.

Members of the local real estate board and others who deal in real estate work have been asked to attend.

T. Oaks, secretary of the State Real Estate Board, will accompany Lowmestern.

(By The Associated Press) — It was crisp and clear over most of Texas today. Temperatures were expected to climb with a brilliant sun.

The lowest minimum was 21 degrees at Dalhart. Brownsville had the highest morning minimum, 47 degrees. In most other sections temperatures were in the 20s.

Mineral Wells reported a 27 minimum. Junction, Pampa and Wink 28. Clarendon 29. Lufkin and Texarkana 30. Austin, Fort Worth, Bryan, Alice, San Antonio and Waco 34. Dallas 35 and St. Houston 38. and Corpus Christi, Galveston and Laredo 42.

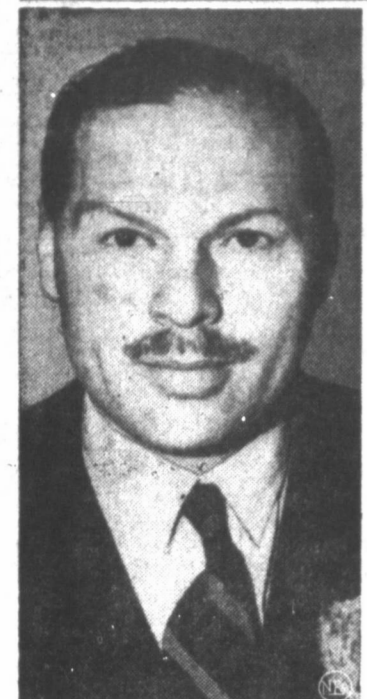

No overnight rain was reported. The Weather Bureau said no important changes were indicated the next 36 hours, except for rising temperatures and possibly some cloudiness by Friday.

East Central Louisiana, with thousands fleeing their lowland homes, braced for what may be the worst flood threat since 1927. More than 1,400 families were evacuated by floodwaters of secondary rivers.

The floods, caused by seepage and backing up, engulfed more than 650,000 acres over a rough triangle from Natchez, Miss., to Alexandria, La., to a point near Baton Rouge. The lands are mostly those expected to give under heavy water at high river stages.

The U. S. Weather Bureau said the sleet and snow storm which swept across the Midwest and Eastern states was diminishing. It left a blanket of snow throughout the Northern states and an abundant rainfall from the Gulf to the North Atlantic states.

It also left a heavy toll in property damage and ice-coated highways. Many communities re-

Woman Gets \$193 Fine

Mrs. Pearl King, a Shamrock woman, was fined \$175 and costs in County Court yesterday afternoon after pleading guilty to a charge of transporting liquor in a wet area without a permit. With the evidence that was found in her possession, she could hardly do otherwise. When arrested by City Police at 9:30 a. m. yesterday, she had 52 half-pints of whiskey, six half-pints of gin, three pints of grain alcohol, and one case of beer in her automobile. She was arrested by Officers Dyer and Goffrey in the 800 block of E. Tying. She and her husband have been convicted twice in Shamrock on similar charges, the police record showed, and her husband has a bootlegging and gambling record in Shamrock. Mrs. King said that she and her husband were separated. Her total fine came to \$193.05. It was the first time she had to pay her own fine. Whenever she and her husband had been arrested, he always paid the fine, she said.

Ruling Passed On Negro Schools

DALLAS (AP)—A school district has to provide its own school for Negro children. District Judge Dick Dixon ruled yesterday. If higher courts upheld his ruling that a school district cannot legally send Negro pupils to another district at least a dozen Dallas County districts could be affected. School men said it's possible the ruling could affect hundreds of other districts in Texas. Dixon made the decision in ordering the Pleasant Grove Independent School District, southeast of here, to give its 150 Negro pupils a separate school. The district has been sending 118 Negroes to the Wheatley Negro School in South Dallas.

Texas, Oklahoma Say HST's Plan Would Harm Finances

WASHINGTON — Oil and gas industry leaders in Texas and Oklahoma today said they would oppose a House bill which would allow the federal government to take over the production of oil and gas in the states.

The House Ways and Means Committee today reported on the administration's tax plan, which also includes provisions for the oil and gas industry.

Rep. J. Turner, Democratic governor of Oklahoma, said the bill would be a "disaster" for the state's economy.

He said the bill would take away the state's right to regulate its own oil and gas production.

He said the bill would take away the state's right to regulate its own oil and gas production.

Oil Drilling Stepped Up in Texas; 326 Permits Issued

AUSTIN — Oil well drilling in Texas last week and week ended Feb. 12, 1950, showed a decline from the week ending Feb. 5, 1950, according to the state Railroad Commission.

The state Railroad Commission granted 326 regular and 47 special drilling permits the past week. The week before, the figures were 238 and 36.

Totals for 1950 have climbed to 1,652 regular and 196 special, while those for the same period of 1949 totaled 1,287 regular and 86 special.

Texas operators reported the completion of 363 oil, nine gas and 86 dry holes during the last week. This was a decline from the previous week, when the totals were 211 oil, 12 gas and 80 dry completions.

First American-built locomotive to make a successful demarcation run was Peter Cooper's "Tom Thumb" on Aug. 28, 1825.

Production in U.S. Declines; Texas Is Down

TULSA — Crude oil production in the United States fell off 4,230 barrels on its daily average for the week ended Feb. 12, the Oil and Gas Journal reported yesterday.

Total daily average production, the journal said, was 4,870,800 barrels. Another setback in Texas down 5,238 barrels to 1,916,200 barrels.

Oklahoma had the greatest gain, up 5,600 barrels to 437,000. The daily averages included: Arkansas, 702,700 down 300; Louisiana, 501,400 up 1,275; New Mexico, 350,800 down 275; Oklahoma, 436,400 up 5,600; Texas, 1,916,200 down 5,238.

Permit Granted For Reservoir

AUSTIN — The State Water Board granted a permit for a water storage reservoir to supply the town of Robert Lee, Cooke County, 20 miles north of San Angelo.

A dam will be built on Mountain Creek, a tributary of the Colorado River, to back up 260 acres of water.

Estimated cost of the dam to be built by the Upper Colorado River Authority is \$80,000. E. C. Cooper, consulting engineer from Lubbock, said its construction would begin immediately.

Robert Lee, with a population of 1,500, now depends on two shallow wells for its municipal supply. The dam will be 48 feet high and 2,200 feet long.

The board also granted permission to Arthur Davis of Con Can to take 225 acre-feet of water per year from the Frio River in Uvalde County for irrigation.

The Nueces County Water Improvement District Number 3 sent a letter of protest to the board, saying the pumping by Davis would lessen the flow of the Nueces River into which the Frio flows. However, the board noted that between Con Can and its junction with the Nueces, the Frio goes underground for miles, and pumping above that level would have no appreciable effect.

National Business Failures Decline

NEW YORK — Commercial and industrial failures dropped slightly totaling 295 in the week ended Feb. 9, Dun & Bradstreet reported. This compared with 299 in the preceding week, 302 in the similar week a year ago, and 238 in the like week of 1949.

Permanency Asked for Four Fields

WASHINGTON — Senator Lyndon B. Johnson (D-Texas) today urged the Defense Department to designate four more Air Force fields in Texas as permanent installations.

They are Goodfellow Field, San Angelo; Perrin Field, Sherman; Reese Air Base, Lubbock, and Ellington Field, Houston.

Such designations, Johnson said, would make the fields eligible along with other permanent military centers for federal housing aid under the Wherry Act.

Johnson criticized the present operation of the Wherry Act as it is now being administered by the armed forces.

He said he had urged Secretary of Defense Louis Johnson to transfer the direction of the Wherry Act program to the Housing and Home Finance Agency.

Johnson also said: (1) A moratorium labeling bill, similar to the wool truth-in-labeling bill, may be necessary to stop false representation in the textile field.

(2) The announced plan of the Defense Department to discontinue letting the Veterans Administration use some of the Corpus Christi, Texas, naval hospital beds will result in a waste of taxpayers' money because veterans will have to travel longer distances to get treatment.

He also said more beds are needed in the veterans hospital at Amarillo, and at El Paso.

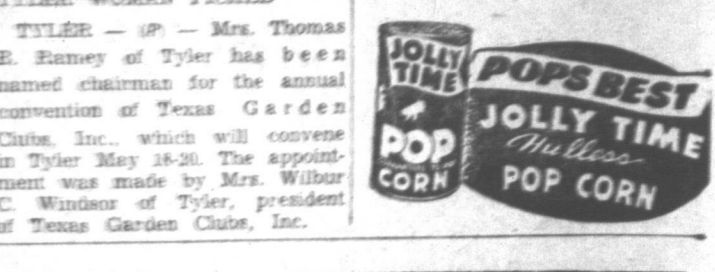

(3) He will support the natural gas act amendment proposed by Senator Kerr (D-Okl.), calling for a continuing study to determine the question of jurisdiction by the Federal Power Commission over intrastate producers of oil and gas.

TYLER WOMAN PICKED — Mrs. Thomas E. Finney of Tyler has been named chairman for the annual convention of Texas Garden Clubs, Inc., which will convene in Tyler May 18-20. The appointment was made by Mrs. Wilbur C. Windsor of Tyler, president of Texas Garden Clubs, Inc.

50,000 Miles - No Wear!

1. Driven "Twice Around the World!" For 50,000 killing miles, six brand-new cars raced over the hot desert along the Mexican border... testing the wear-fighting qualities of amazing Conoco Super Motor Oil. At the end of 50,000 miles of continuous driving, engines showed no wear of any consequence... in fact, an average of less than one one-thousandth of an inch on cylinders and crankshafts. Startling proof—factory finishing marks were still visible on piston rings!

2. New-Car Mileage for 5 Years! This punishing road test—equal to 5 years' normal mileage—proved, as nothing else could, that Conoco Super Motor Oil, with proper crankcase drains and regular care, can keep your new car new! Gasoline mileage for the last 5,000 miles of the test was as good as for the first 5,000 miles... actually there was an average difference for the fleet of only 4/100 of a mile per gallon!

3. New-Car Power! Quicker Starts! Yes—the extra protection of Conoco Super Motor Oil keeps that factory flash... that showroom smoothness... year after year after year! Conoco Super Motor Oil's exclusive ability to OIL-PLATE metal surfaces makes your engine last longer, perform better, use less gasoline and oil! Conoco Super Motor Oil virtually stops wear before it starts... keeps your engine new and clean. Conoco Super Motor Oil has proved itself to be the great new modern wear-fighter!

Grace Friend...

TIME WILL HEAL HER BROKEN HEART

Dear Mrs. Friend: My heart is breaking for I am in love. I have been going with this boy for over a year, since I was 16, and I have always adored him.

We started right out loving each other and promised to go steady and even felt as if we would be married some day.

Now I regret to see this boy anymore or at least not very often.

My friends ask him what is wrong and he always says nothing that he is just awfully busy now with all the extra work at college.

I feel like just sitting home and waiting for him to ask me out again but a sort of nice boy is asking me for dates and my mother thinks that I should accept.

Do you think that I would be untrue, Grace, if I were to have dates with this second fellow?

Dear Mary: I don't see how you can be untrue to a boy who is ignoring you. I think you would be very foolish to sit moping at home when you might be out having fun with the nice boy who is asking you for dates.

Your first love will be much more apt to become interested in you again if he knows that you are out with your new boy friend. He certainly won't be much intrigued with you if you stay at home obviously having no fun.

Go out with this new boy, and you'll be astonished at how your heart will start to heal and you may even meet another boy that you like better than either of the two you like now.

IT IS UNWISE TO LET BOY RISK HIS HEALTH Dear Mrs. Friend:

I am real worried at a situation which has arisen in our home. My brother, who lives with me and my young son, 11, has offered my boy \$10 if he finishes the school year without missing a day.

The boy is determined to win the money and won't stay home even though he is suffering from a very bad cold with a cough, which I feel should be treated in a warm house.

I have begged him but he refuses to skip a single day if it means he loses the money. My brother thinks that it is good for him to go to school even when he is sick with a cold and that it is making a man out of him and keeping me from coddling him.

What would you do? Worried Mother

Dear Mother: Of course you are right. A child with a cold should be kept home the first few days where he can be given extra attention and where, most important of all, he cannot spread the germs among his school mates.

Going to school with a bad cold is condemning many of his friends to similar illnesses and should be discouraged for that reason alone.

Such promises to children as your brother has made nearly always ends this way. A child goes off to school when he is ill enough to be home in bed because he feels that he cannot lose the coveted prize.

I would discourage a repetition of the promise as it could be very dangerous for your child's health. He might even hide early symptoms of serious illness in order to keep up his attendance. It is far better to wait until the end of the year and then surprise him with a suitable gift if he has had a good attendance record and has not been tardy.

Tea-Shower in Compliment to Mrs. Boyd Brown

Mrs. Boyd D. Brown, the former Miss Donnie Lee Stroope, was honored recently with a tea-shower in the country home of Mrs. George Montgomery.

Attending Mrs. Montgomery were Mrs. Joe Massengale, Mrs. W. B. Jackson and Mrs. Polk Valliant.

The honoree was presented with a corsage of gardenias encircled with pink carnations. Her mother, Mrs. J. L. Stroope, was presented with a white carnation corsage.

Halle Martin, wearing a corsage of pink carnations, poured hot spiced tea from the silver tea service. Arrangements of pink roses were used throughout the rooms.

Guests registering were Mrs. Noah B. Cude, Mrs. H. A. Holtman, Mrs. James S. Stroope, Mrs. Minnie Hogan, Mrs. A. E. Carruff, Mrs. R. E. Montgomery, Mrs. J. H. Byers, Mrs. H. A. Talley, Mrs. L. H. Greene and Mrs. W. F. Taylor.

Mrs. Doyle Osborne, Mrs. Tom Clayton, Mrs. Ewing Leech, Mrs. Skeet Roberts, Mrs. Ruth Good, Mrs. C. L. Thomas, Mrs. W. D. Benton, Miss Mary June Montgomery and Miss Nita Jo Massengale. Several gifts were received from those who could not be present.

Mrs. Cedric Slack Is Hostess to Magazine Club

HIGGINS — (Special) — Mrs. Cedric A. Slack was hostess to members of the Magazine Club for their Federation Day program given recently in her home.

Mrs. Clyde R. Patton, president, called the meeting to order. Roll call was on assigned items. The Club Woman's Litany was read by Mrs. Baxter C. Hurn.

Miss Nancy Feugh gave piano numbers, "Ballade" by Friedrich Burgmuller and "Spinning Song" by Albert Ellmenreich. In her discussion of "Through Union Strength" Mrs. Roy Landers stated that each small club is unable to accomplish much, but by union through federation of the clubs much can be done.

Mrs. Adolph Bissant told the story of the flag, and led the Pledge of Allegiance, which was followed by a report of the Federation counselor, Mrs. Frank Ewing.

After critic's report and current event, the club adjourned for the social hour. Those attending were Mmes Roy Landers, Baxter Hurn, E. B. Roberts, Alex Barton, Pearl Boyd, Charles G. Newcomer, Adolph Bissant, Cedric Slack, Paul Trenfield, Hollis Cortelyou, J. N. Millhollon, Frank Ewing, Ansley M. Winsett, Clyde R. Patton, Johnnie H. Weis, Walter Word and Charlie H. Hyde.

Members and guests were Mesdames Franklin Feugh, Miss Nancy Feugh, Austin Eggleston, David Kellin, Carl Wassenniller, and Robert Smith. The next meeting will be with Mrs. Paul Trenfield.

Cadillac presents FOUR NEW SERIES OF CARS... All Dramatically Restyled...and Powered by Cadillac's Sensational New Engine! TODAY, we are presenting, for your consideration, the finest, most beautiful motor cars we have ever been privileged to announce. They are the new Cadillacs for 1950—and we want you to come and see them. We not only want you to see them—but we think you should see them. For to see and inspect these wonderful creations will make you a sharper judge of all cars—and increase your motor-car wisdom in every respect. There are four entirely new series of cars—all with wholly new bodies, and all completely restyled. We think you'll agree that nothing so sleek and dynamic and beautiful has ever been seen on the world's streets and highways. They are arrestingly and breath-takingly gorgeous—and all are distinctively Cadillac. And not only are they advanced in beauty—but their performance is finer in every way. Cadillac's great new high-compression engine is even smoother; it is actually quicker in acceleration; and it runs so quietly that only the indicators reveal when it is in action. It is simply wonderful to drive. And—difficult as this will be for owners of 1949 Cadillacs to believe—the 1950 cars are even more economical to operate. Gasoline mileage really approaches that of the smaller, lowest-priced cars. It is no less than amazing that cars so big and luxurious should run so far on a gallon of gasoline. Comfort and handling ease are also remarkably advanced. There is far finer road balance and over-all steadiness at all driving speeds. Steering is softer and more positive. Brakes are more efficient and longer-lived. The over-all satisfaction of driving—from every standpoint—is simply "out of this world." Truly, here are cars so fine and beautiful that they deserve your personal consideration. Make your plans now to come in and see them. You will be cordially welcome at any time. Texan Heads 150-Year-Old Mammoth Library of Congress

By **TEX EASLEY**
WASHINGTON — (AP) — The Library of Congress, headed by Texas-born and -reared Dr. Luther H. Evans, celebrates its 150th anniversary this year.

It was on April 24, 1800, that Congress established the library. The sesquicentennial date will be marked by the opening of special exhibits of the most famous books, manuscripts, prints and documents on hand.

The history of the world's largest library is entwined with the lives and achievements of the men who have directed its operations. In its long history there were only nine librarians prior to Dr. Evans.

The job, now paying \$15,000 annually, is filled by presidential appointment, subject to confirmation by the Senate. There is no definite term, but the position normally is considered non-political and so does not change with changes in party control of the White House.

It took about two years to get the library actually established, so the first librarian didn't assume the position until 1802. He was John Beckley, who doubled as clerk of the House of Representatives. He served until 1807. A few years later the dual role was dropped.

The longest record of service is that of Herbert Putnam, from 1899 to 1939. He took over just two years after the opening of the existing huge granite library building, with its interior of bright marble, bronze and colorful murals.

Under Putnam's direction the library grew to such proportions that a mammoth new annex with stacks for 10 million books had to be erected across the street, just behind the main building. There are now more than 8 million books and 8 million manuscripts, in addition to countless other items, sheltered in the two buildings.

Dr. Evans took over as librarian in 1945, after six years there in various roles, including that of assistant and acting librarian. He is only 47. With a decade of service already to his credit, he stands to achieve a long career in the job.

Born near Sayersville, Bastrop County, Oct. 15, 1902, the son of a railroad section maintenance foreman, Evans spent much of his boyhood on a farm. He was graduated from Bastrop High School and obtained an A.B. Degree from the University of Texas in 1923 with a major in political science and a minor in economics. A year later he got a Master's Degree in the same subjects, then went to Europe to observe the League of Nations and study various governments.

After a teaching career in various colleges and universities, including Stanford, Dartmouth and Princeton, he directed a nationwide WPA project initiated in 1935 for assembling and compiling historical records and data of the various states and many of the larger cities.

Evans' success in this work prompted Archibald MacLellan, a month after the latter's appointment in 1939 as director of the library's legislative reference service.

The duties of this section recall the origin of the library, which had its beginning along with the creation of the District of Columbia to serve as the seat

of the national government. When the Capitol was in Philadelphia and New York the legislators had access to the libraries in those relatively large cities. Here they had moved to a sprawling settlement being carved out of the wilderness and populated largely by the laborers building the Capitol and the White House and their families.

So, one of their early steps was to authorize the library and provide \$5,000 for the purchase of books. For years virtually all were made in Europe. Gradually acquisitions were made of private collections, including the 7,000-volume collection of Thomas Jefferson. It was purchased in 1815, a year after the British had pillaged and burned the Capitol, destroying all of some 3,000 books which had been amassed up to that time. About two-thirds of the Jefferson library was burned in a fire in the Capitol on Christmas Eve of 1851.

An act of Congress in 1870 made the library the depository for copies of every publication on which a copyright has been obtained. Its collection of books and manuscripts in Hebrew and Chinese are perhaps the largest anywhere in the world.

A hundred million dollars has been appropriated for the library in its 150 years' existence; it would be impossible to place a value on its contents, which include the Declaration of Independence.

Although the Library of Congress was established principally to fill a need for the lawmakers, it now is primarily the center of research for students and scholars.

Congressmen and other federal government officials are the only ones who may take books and documents away from the library. But any citizen in the land is privileged to enter its reading rooms and have access, within the building, to its volumes.

They Don't Want No Substitutes

CORPUS CHRISTI — (AP) — Organization of the "We Don't Want Nothing Club" was announced here Saturday.

Membership is small, exclusive, and anonymous, a spokesman said. There are no assessments, no dues, and no officers.

Saturday's meeting was given to adoption and a statement of policy which boils down to this: "We don't want no substitutes. We don't want no pensions. We don't want no government loans. We don't want no government houses to live in. We don't want no bureaucrats telling us how to make our living. We don't want no socialized medicine nor no socialized nothing. We don't want to have to pay no poll tax but as long as we do have to we don't want nobody paying it for us. And we don't want nobody else getting special favors that we have to pay for."

From time to time the club will discuss and announce other things that its members want no part of, the spokesman said.

British Ship Crew Landed at Hong Kong
HONG KONG — (AP) — The 43 men and officers of the small British freighter *Wingling* were landed in Hong Kong Monday by a British destroyer after the ship had foundered on a reef. The *Wingling*, 280 tons, had been running the Chinese Nationalist blockade.

Converted Texan, Ex-GI, Is Active in Cause of Religion

By **W. F. CALDWELL**
ATLANTA — (AP) — An ex-GI holder of two Bronze Stars for bravery commutes weekly from Texas to Atlanta to broadcast the Baptist Radio Hour over a national network.

He is Charles Wellborn, 25, a student of the Baptist Seminary at Fort Worth. He makes the approximately 1,700 miles each weekend by regular commercial airline.

Currently he is speaking on the regular Sunday broadcast at 2:30 p.m. CST. This originates at the Baptist Radio Center Studios in Atlanta and is distributed through the ABC Network to over 140 stations.

Wellborn's powerful messages reaching into homes in the 32 states of the Southern Baptist territory have produced many letters of response.

Wellborn attributes his personal conversion to the loss of his best friend under fire which he was a member of the Army's Tenth Mountain Division in Italy. Until that time he says his religion "hadn't meant much one way or the other."

His Buddy's death from an enemy machinegun bullet stirred Wellborn. His friend, he says "seemed to have something I didn't have," but he had rejected this friend's efforts to get him to embrace the Christian religion.

After the war, Wellborn reentered Baylor University at Waco to continue his prewar studies in political science.

It was then that the full import of religion as a way of life got hold of Wellborn. His conversion followed and he joined the Baptist Church in Waco.

After graduation he was instructor in political science at Baylor for a year. Then in 1947 he entered the Southwestern Baptist Theological Seminary. That summer he spoke in youth evangelistic campaigns including city-wide meetings in Fort Worth, Houston and Dallas.

Wellborn will graduate this June. In the meantime he has collected two national intercollegiate debating championships. There is a fervor about him that is contagious. His watchword is action now for Christianity.

Wellborn is a native of Texas.

Red Weapons Said 2 Years Beyond U.S.

WASHINGTON — (AP) — Senator Johnson (D-Texas) of the Senate Armed Services Committee said Russia is at least two years ahead of the United States in the development of guided missiles.

Johnson told a news conference the United States may be ahead of other nations in developing the atomic and hydrogen bombs.

"But I'm afraid we are behind Russia in the ability to deliver our explosives in battle," he said, adding: "The three services each has a missile program of its own — but, as yet, no really worthwhile guided missile."

"Publicity about some of our rocket research has created a largely false impression that we have missiles which would be used in defense of this country. As of now, we have none."

The missile program, he said, is only an "obscure item" in the defense budget.

"We must not tie our future security to our past successes," Johnson added.

As a member of the armed services group, Johnson has had a chance to study the weapons programs of the Army, Navy and Air Force.

Thumb Sucking May Be Harmful

HOUSTON — (AP) — Children should receive dental attention by their fourth or fifth birthdays to prevent many dental abnormalities in later life, two visiting dental authorities said here.

Speaking before the 29th annual meeting of the Southwestern Society of Orthodontists in the Shamrock Hotel, the doctors, William B. Downs, professor of orthodontists at the University of Illinois in Aurora, Ill., and S. J. Kloehn of Appleton, Wis., said many dental abnormalities are caused by bad habits during early childhood.

Some of the bad habits emphasized by the two dentists included thumb sucking, breathing through the mouth instead of the nose, and improper chewing.

Doctor Downs said a child should receive orthodontic attention before its baby teeth start coming out.

Otherwise, he added, the facial bones may develop abnormally and the teeth grow in a crooked.

Doctor Kloehn said the manner in which teeth grow depends upon the forces surrounding them. These forces, he explained, include the lips, the jaw bones, and facial muscles.

Truman Appoints Ambassador to Burma

WASHINGTON — (AP) — President Truman chose David McK. Key as ambassador to Burma.

Key is a career officer in the State Department with 25 years experience. He is 50 years old. He has served in Belgium, Germany, Britain, Canada, Italy, Spain, and Brazil.

and his family is living at Glade-water. His father is a lawyer. His two sisters were graduated from Baylor last year.

THE *one fine car* IN THE LOW-PRICE FIELD

You'd never guess from the low price tag what a store of quality this '50 Ford offers.

FORD'S '50 WAYS NEW

Quality feature after feature puts the '50 Ford so far ahead of its class . . . take the 13-way stronger "Lifeguard" Body . . . the "Fashion Car" styling—now more beautiful than ever . . . the big car "feel" of Ford's Improved "Mid Ship" Ride, cradled in the low, level center-section of the car.

AND QUIETER, TOO!

Ford's 100-horsepower V-8 shows its authority in power, yet keeps its voice down to a refined whisper. And new "sound conditioning" keeps road noises out, too. You're even insulated from bumps by Ford's "Hydra-Coil" and "Para-Flex" Springs. They virtually "soak 'em up!" Best of all, the price is hundreds less than you'd guess . . . even Ford's powerful V-8 sells for hundreds less than most "sixes."

YOU CAN EVEN "hear" ITS QUALITY!

End of a Chapter

By Edwin Rutt Copyright 1950 by NEA SERVICE, INC.

THE STORY: Alice Pine, literary secretary to the popular writer Mrs. Muriel Hallock, is mystified by Brent, Muriel's artist husband. At first he infuriates her, then she adapts to his whims. Finally Alice suspects him of kidnapping his four-year-old adopted son Rick. Chuck Wisner, who describes himself as the village loafer, says Brent is "a very fine guy."

her own left arm. "Oh," Muriel said, caressing the muscle above the elbow. "Nasty, isn't it?"

wondered from whence he had summoned the energy. Brent appeared to be somewhat wilted now, however. He wore a pale-green sports shirt and white drill trousers.

AT Molly Tremayne's mention of Chuck Wisner, Alice Pine started to say that she had recently met the man, but didn't. Alice was feeling suddenly guilty.

DESPITE Alice's doubts and a heat wave that followed, Muriel seemed delighted to serve on Molly Tremayne's committee.

THE beach was the most comfortable place she had yet discovered. There was still no wind, but the sun felt good.

HOW IT WORKS—Above is an artist's conception of how the "H-bomb" might work, using a super-powerful atomic bomb as a mere "trigger" to generate heat enough to set up the H-bomb's "thermonuclear fusion" process.

Not a feather of breeze stirred off the flat torpid sand. The leaves of trees and shrubs stood still. Flowers seemed to hang in heavy suspension on the lifeless air.

She knew at once that it was Brent by his unmistakable, drooping shoulders. She stopped splashing and stood motionless, crouched down slightly. Brent approached from the direction of the road and she hoped he would go on without noticing her, and without seeing her robe on the sand.

THE grand parade Thursday will be comprised of twelve locally sponsored floats, high school bands from most of the towns of the valley, the Nuevo Leon state band, a cadet marching unit from Monterrey, Mex., and marching units from the Alzarar Temple in San Antonio and from Valley Shrine clubs.

Development and use of the hydrogen bomb, he says, possibly could cause "annihilation of any life on earth" through radioactive poisoning of the atmosphere.

ASKS HANDOUT—Roman Rybarski, 55, veteran coal miner, proposed at Conansburg, Pa., that John L. Lewis and his aides contribute one pay check apiece to relieve distress among needy miners now on strike.

THE international celebration will open at 10 a.m. with a terrific yell, called a "Grito," and will end "with a sigh" Sunday night, Feb. 19, at the conclusion of "Noche Mexicana," Mexican night, to be held across the Rio Grande at the neighboring Mexican town of Matamoros.

Arms Agreement With Reds Now Called Unwise Move

WASHINGTON (AP)—Former Undersecretary of State Will L. Clayton told senators that an arms agreement with Russia at this time would be "unfortunate because it would only lull the United States into a false sense of security."

Clayton said the Western powers never could fully trust Russia. He urged that any such agreement should come only after the

only way to meet the threat of communism, Clayton argued, is for the United States to take the lead in forming a union which would have a single foreign policy, a single currency, and no trade barriers.

The U. N. is not organized to deal with the cold war, Clayton said.

He added the United States must decide now what to do when the Marshall Plan spending ends in 1952.

He said this country can't continue subsidizing the world. And he insisted the United States can't maintain a free enterprise system if all Europe goes to

communism. Clayton said Russia will start a shooting war until the Soviet leaders believe they can win. Right now the Russians are building up their military power, he said, and he added:

"Where two great powers compete to see which can be better prepared, war is inevitable in time."

The threat of such a war will hang over the world, Clayton said, until the United States takes the lead for full Western unity.

Dangerfield Not Hurt Yet

DAINGERFIELD — (AP) — So far the coal strike hasn't affected production at Lone Star Steel's Daingerfield blast furnace. "We're operating at pretty close to full capacity," operating manager W. R. Bond said. "We have about 15 days supply of coal on hand, and we're getting more coal regularly." Bond said Lone Star is getting coal in both Oklahoma and Arkansas, some from non-union mines and some from mines where the union has reached agreements with operators.

Higher Quota Set For Navy Recruits

James C. Mashburn, recruiter in charge of the Navy station at the Post Office, Amarillo, has announced that the Navy's quota for enlistment has greatly increased since the first of the year. Openings are available, he said, to many applicants who were unable to enlist earlier because of previous small quotas. Ex-service men who can qualify will also be accepted, he said. All those who are interested should contact the Amarillo station.

Bankers Asked To Be Leaders

DALLAS — (AP) — Fifteen hundred Texas bankers heard a plea here from an Arkansas industrialist for bankers to lead the nation out of "the worst confusion in the history of our country." The speaker was C. Hamilton Moses, president of the Arkansas Power & Light Co., Little Rock, who addressed the district meeting of the Texas Bankers Association. "Bankers are natural community leaders," Moses said. "We people look up to you. When you are lost, everybody is lost. We are now in the worst confusion

ever in our history." Moses lamented that "it appears that our own business is on trial and our system of living is making its last stand." Pointing out that the government actually is the people themselves, Moses said that "it is time to quit cussing Washington, because Congress and the White House both are doing what they think the people want done." "The citizens of Texas must realize that they can't eat their cake and have it too," Moses said. "Every time Texas begs a dollar in a grant from the federal government the citizens of Texas put up \$2.40 to pay for that \$1 grant." Henry M. Bell, president of the Citizens National Bank, Tyler, spoke on "small town banking" during the session. The program included addresses by Tom E. Acker, president of the Texas Bankers Association

Hint That Truman May Run Fosters Democratic Smiles

WASHINGTON — (AP) — A hint from a California political leader that President Truman is thinking of reelection in 1952 was welcomed by Democrats generally — as at least likely to stir up party interest. Politicians generally considered the hint too vague to be any real tip-off on Mr. Truman's plans. The Democrats figured that anyway, it should whet the public's appetite for the President's Jefferson-Jackson dinner speech here Thursday night. and chairman of the board, Texas State Bank, Jacksonville, and R. A. Porter, executive vice president of the State National Bank, Denison, and district chairman of the association.

George Luckey, vice chairman of California Democrats, visited the White House Monday and on his exit quoted the president as saying: "If we should have the same team next time, maybe we could do something." He told reporters the president meant the people who supported the Truman ticket in 1948. A new Republican squabble over campaign policy was indicated meanwhile. Gov. Alfred E. Driscoll of New Jersey was the latest to join GOP dissenters to the statement of party policies fashioned here recently under the principal guiding hand of Senator Taft (R-Ohio). Driscoll told a New York au-

dience Monday night that to win elections the Republican Party must become "vital, liberal and progressive." He complained that the GOP statement of principles seemed to take a "defensive attitude." The New Jersey governor has been mentioned as a possible candidate for the GOP presidential nomination in 1952. Republicans looked to a Massachusetts congressional district special election today to bolster their morale. In the sixth district of that state the GOP hoped that Lieut. Comdr. William H. Bates would win the seat left vacant by the death of his father, George J. Bates, killed in an air crash here last Nov. 1. He is opposed by former Rep. Richard M. Russell, onetime Democratic mayor of Cambridge and former member of the House from the ninth Massachusetts district.

TOMORROW'S MAN?—The classical influence predominates in this conception of what the "Man of Tomorrow" may wear. The creation by Tina Leser was exhibited at the New York Metropolitan Museum of Art. Besides the plaid skirt, there were backless, collarless, tall-less shirts with ruffled sleeves and pleated bosoms among the things women think men will wear in the future.

CCC Feared as Grain Competitor

WASHINGTON — (AP) — Midwest grain elevator representatives told senators they are fearful that the huge Commodity Credit Corp. will run them out of business. They accused the CCC of "bypassing" normal trade practices and of "incredible inefficiencies" in operations. The delegation from Minnesota, Iowa, and North and South Dakota put their case before the Senate Agriculture Committee. The committee is considering a bill to increase the CCC's borrowing power from its present \$4,750,000,000 to \$6,750,000,000. "Gentlemen, if you let the grain all pass into government channels, you are going to socialize it as has been done in Canada, England, and many other countries," Oscar Olson, president of the Farmers Elevator Association of Minnesota, warned.

U. S. cotton production has moved West in recent years so that Texas, Arizona and California now account for nearly half the crop. Gunpowder is a mixture of saltpeter, sulphur and charcoal.

SERVICE

IS WHAT WE SELL, YES-SIREE, but have a heart, folks, your neighborhood service station sells OTHER THINGS, too...

Ever stop to think the guy that services your tires and keeps you humming down the highway without the service station, what would happen to your tires... and did it ever occur to you that your battery wouldn't keep that "he-man" power long if it weren't for his old pal the service station man (HE SELLS BATTERIES, TOO, YOU KNOW)... No kidding folks, you would not buy a suit from one merchant and demand the merchant down the street after it, now would you? ... Your service station man is a darn nice guy, he fills the radiator, cleans the windshield, services the old bus from stem to stern, and when Junior wants his water toys, football or bicycle fires inflated, where does he go? ... Junior's smart... it's the corner service station for him... and did you ever hear of anyone starting out on a trip without a FREE map from the service station---in some cases they'll plan a super-duper trip for you free gratis... just a little 'extra' services for those few pennies your service station man gets off of each gallon of gas his trusty pump puts in your car. And how about that wash job! Why a service station wash and polish job would put a mother cat to shame... That's our story, folks, we'll continue to give our customary "smiling" service and help keep you flying down the highway, but HOW ABOUT A BREAK?
