Economic Education. This organization is the soundest organization that I know of in the United States. It is working diligently and intelligently to get those people who think they believe in free enterprise and unhampered market and a definite limited government to really understand what free en-

terprise is. I will let Mr. Read tell the story: A Growing Danger

"There were six hundred at the banquet. Not less than a total of 10,000 years of formal education had gone into the makeup of these people to whom a distinguished American addressed himself. The speaker-informed, intelligent, and courageous, and manifesting the deep convictions which he felttold of the growing dangers of socialism and communism. He documented his statements. He named names. The dangers were real, all right. The speech was received

with obvious approval. "The dining room was quickly imptied. The ladies in evening gowns and the men in dinner jackets returned to their homes bearing a new concern for the future of their country. They had, quite properly, misgivings as to what the future held in store for their children. But what to do? How does one get at these socialists and communists? Where do they get their Ideas? How does one go about setting them straight If only the masses could be made to see things intelligently, like the six hundred

at the banquet! Communism Is Not Geographic

"The sun rose as usual the next morning. The birds ushered in the day, singing as sweetly as ever. Besetting problems of home and office were as numerous as before. Breakfast was about as usual. The children continued to be mischievous, acting in ways thought unwise by their elders. The morning paper told of battles with the commun ists, reporting approvingly of the thousands that had been killed, and something to the effect that the United Nations Forces-or the keds — had moved one or the other beyond or behind some parallel-as though the problem were

geographic. All Except One

"There was a small item in the paper about the banquet of the

when there had also been a good speaker. The affair came to be only a faintly recollected event to

all of the six hundred-all except An Honest Man There was one who pondered. What the speaker had said linger-ed on and disturbed him. Socialism and communism are not conjured-up hobgoblins. There is something very real and very evil

The E. Browning airport bond measure should be defeated.

The Decter Says BY EDWIN J. JORDAN, MD. Bill R. is a lawyer. Last summer his son went into the Marines and in the fall was sent to Korea. At about the

same time a "friend" for whom he had signed a note skipped, leaving Bill with a considerable financial obligation: In the fall, too, he had several difficult law cases which worried

him more than usual. By early November Bill was having trouble with his stomach. He went to the noctor who tested him, took X-ray films and told Bill he had an ulcer. This kind of story goes on all the time, many people showing the first signs of ulcer when they are going through a period of great nervous and emotional strain. But this isn't all. Once a person has an ulcer the symptoms practically always get worse whenever things ge wrong.

A quarrel, a difficult interview, a long period of strenuous work will bring on an ulcer or make one worse. Undoubtedly public ac-countants have more trouble between Jan. 1 and March 1 than at other times of the year. Nowadays some of the rest of us are more than ever likely to have the

Senate. Now, however, the very fact to the one life or one destroyed that a load of homosexuals have been dismissed from the State Department proves McCarthy was rom town when a completely right when he said they were working there. Obviously a man has to

be working some place I took a lot of slapping around, too, for defending McCarthy at the time he was up to his ears in trouble, One reader thought I had dropped far below my usual level

tremes in trying to embarrass the Nude-Felers and Truman administration. He said, "That sort of

thing could happen under any ad-ministration." Well, it didn't. It picked THIS ONE to happen under. About everything else has happened under it, why not that? I notice, too, that the loyalty case of John S. Service, the State Department far east diplomat, has been reopened because of "new information" about him. Yet, when McCarthy exposed Service. the State Department and its political pals raised a horrible yell, Serice was promptly scrubbed clean by the Department's lovalty board and all McCarthy could do was to

grit his teeth and "take it" Tm going to watch this Service busiless with keen interest.

THANKS I appreciate very much the clipping from the SATEVE POST sent me by a Costa Mesa, Cal. reader. It was about an air force recruit, an independent young chap who refused to be vaccinated After some cajoling, the medical officer lost patience and asked the recruit if he didn't realize that his refusal to be vaccinated might lead to smallpox, not only for the fly-boy, but for the whole regi-ment. The recruit didn't think so BECAUSE ALL OF THE OTHERS HAD BEEN VACCINATED. .. That's one on me, but thanks,

anyway.

same experience. The close relationship between the nerves and ulcers is well known and generally accepted by the medical profession even though exactly how it all works is not entirely clear. Some students of the disease have even built up a kind of personality into which most ulcer victims fit.

The potential ulcer sufferer, this theory goes, is ambitious, hard working, finds it hard to relax, and is likely to hold down several job at once. He (or she) to drive himself too hard and his good qualities are much admired hough he runs more risks than

the less strenuosuly constituted individual. UP TO YOU personalities, and if we are wor-

of this evil? He had heard many speakers inveigh against socialism, and damn communism. Always the speakers were naming names, always they were talking about someone else. How could there be the guilty 'someone else,' he asked himself, if everybody talked about someone else. This someone else had to be somebody who himself was at fault, or all this talk was absurd. Guilt must come to rest somewhere. Could some of it be in him? In honesty he had to ask himself this question, for now he understood the absurdity of the

shallow belief that all these faults belonged to 'someone else.' Most Americans Believe in Social-

"There aren't enough people in the world, he reasoned, who admit to being socialist and communists to account for all the evil attributed to socialism and communism the speaker had told about. Could the evil possibly exist in those who do not themselves comprehend it and, thus, have no basis: for admitting that they are infected? He then recalled reading a study made in 1949 by Link and Freiberg which showed that 75 per cent of the American people believed themselves to be against socialism, yet 66 per cent of them favored governmental measures that fell within their own defini-

tions of socialism. Perhaps he was one of these and had the disease himself, shocking as was this honest searching thought. "He could not avoid the question: Is there any of this inconsistency in me? What a venture in introspection his search for an answer turned out to be! Here he was, a man who had often proclaimed his faith in 'the American way of life.' He had pledged allegiance to the flag. He had sung lustily about 'the land of the free and the home of the brave.' Now he was about to inquire into his own status as a possible socialist-com-munist. He had what it took: cour-

age to make the inquiry and honesty to look at the facts regard-less of what they revealed."

PAMPA NEWS, MONDAY, MAY 21, 1951 PAGE 6

Map illustrates some of the factors described by General Marshall which, he said, moved him and the Joint Chiefs of Staff to take every precaution to avoid "incidents" that might bring Russia openly into the Korean conflict and touch off World War III. The alternate course proposed by General MacArthur (bombing Manchuria, blockading China, use of Nationalist troops in combat) might bring into the conflict Soviet forces already poised in striking distance of Korea, the Defense Secretary told the Senate Committee investigating General MacArthur's dismissal. Official infor-mation is that Russia has 500,000 men within striking distance of Korea.

basic perennials which ben efit by division every second or third year. Chrysanthemums should be divided every spring. third The laws, too, demands attention- and one thing the gardener must bear in mind is that weeds are always with us. Weed seeds are constantly being blown on the lawn from our neigh-bor's and any method calculated permanently to rid the lawn of weeds by simply eliminating the present crop is due to failure.

The secret of an apparently weedless lawn is to keep it well seeded with good seed, feed regularly, taking care not to cut shorter than one and one-half inches, and to water copiously You'll have a good lawn if you keep it well seeded and wellduring dry weather. Chemical weed killers should be used at the proper time.

Withur Shaw thinks so much of this new Chrysler, he has selected it as Pace Car for the 1951 Indianapolis 500-mile race.

WILBUR SHAW, AMERICA'S MOST FAMOUS DRIVER, DRIVES NEW 1951 CHRYSLER-REPORTS TO YOU ON REVOLUTIONARY FIREPOWER ENGINE AND HYDRAGUIDE POWER STEERING

Here are Wilbur Shaw's reactions-in his own words-as taken down by a recording machine in the car:

"The '51 Chrysler has it! With this new engine and power steering, the first on any U.S. car, it's a whale of an automobile.

"I'm completely bowled over by the ease of steering! "This steering combined with the automatic trans-

mission . . . is the nearest thing to an automatic pilot for a car I can possibly imagine. "This engine . . . I can't get over the amount of power and snap in this engine . . . it's incredible! "I drove 111 miles with the feeling I had expended no more effort than in driving around the block. "When Mrs. Shaw drove, her comments just about quared with mine. Here's what she thinks of the 1951 Chrysler . . ."

Smartly styled Chrysler convertible to pace Indianapolis 500-mile race.

Mrs. Shaw: "At first I could hardly believe the case with which I could turn the wheel. That's important ... especially in the summertime.

"Often after I have parked a car in the average parking space, I feel I should taxi home, shower and get dressed again. But with Hydraguide Power Steering I parked it with one hand. It practically drives itself." Wilbur Shaw: "It's hard to describe this new Chrysler without going off the deep end . . . it has it in every department.

"In fact, I think so much of this car, I've selected it as Pace Car of the 1951 Indianapolis 500-mile race!" (Mr. Shaw's comments are reprinted through the courtesy of Popular Science Magazine.)

*Mr. Shaw refers of course to standard passenger cars-not racing cars or special models.
