WINTERTIME, U. S. A. - Traffic crawling through snow, pedestrians hurrying to get out of the weather, Christmas decorations showing through snow-bleary lights ... this was the picture as Allentown, Pa., was hit by its first major snowstorm of the year. It was a scene duplicated in many cities as record snowfalls and a numbing cold wave swept the nation. (NEA Telephoto)

How Labor Unions Depreciate The Dollar And Destroy The American Way Of Lif-

Here is more of an address made by Philip Cortney before the Third Virginia World Trade Conference, as reported in the Commercial and Financial Chronicle under the heading of "Worldwide Consequences of American Labor Unionism." I quote:

World Needs Economically

"More than gifts the world needs prosperous and relatively stable American economy and a sound dollar. Monopolistic labor unionism and collective bargaining as practiced in the United States makes both impossible. It is not my job tonight to explain how the bvious remedy to this situation in the United States can be administered. I shall endeavor, however, to make clear that unless we destroy the monopolistic power of labor unions and do abolish collective bargaining as practiced in the United States, our country and the rest of the free world will drift into regimented controlled economies which will finally mean the loss of our liberty. Organization of workers along occupational industrial lines and our labor laws will push our country into some kind of corporative (guild system) totalitarian system.

"Strange as it may seem to you, he truth about the evils of collecive bargaining is being told lately mainly by professors who are outspoken New Dealers. Two of them have recently written books to prove that unions and capitalism are incompatible, Professor Slichter of Harvard calls our government a 'laborite' government, Unions and Employer - Employee

hat have both unionized and nonnionized employees. Invariably relations with the non-unionized employees are excellent, while those with the workers who are unionized are extremely difficult. The main reason for this situation is to be sought in the very nature labor unions. The basic principle of labor unions is antagonism between interests of the employer and those of the workers. Collective bargaining, says Mr. James Lincoln, President of the Lincoln Electric Company of Cleveland, is nothing but 'civil war.' The labor laws of our country order management and labor to fight until one or the other gives in and signs a contract dictated by the winner. There is no criterion but power to guide contending parties during the negotiations. Since the strike is the weapon that the government plan gives labor, it will be used. Together with the strike go threats violence and picketing. If

By advocating uninstructed deleations from Texas and other outhern States to the National Democratic convention, Representative Wilson asked for a bolting of the party leadership while standing by time-tested Democratic princi-ples. Above all, he made it plain that the voice of the South will be of no force and effect until Southern people vote for the prin-ciples in which an overwhelming majority of Southerners believe.
