Congressional Group To Probe Pearl Harbor Disaster

TRUMAN ASKS 'EMERGENCY' POWER

PAAF Will Go On Inactive Status by September 30

Gen. M'Arthur To Lead Unit In Occupation

(By The Associated Press) General MacArthur will lead the U. S. First cavalry division—15,000 strong—into Tokyo Saturday, (Friday afternoon, U. S. time) raising over his headquarters in the U. S. embassy the historic flag that flew in Washington on Pearl Harbor day and since has been unfurled at Casablanca, Rome, Berlin, and Tokyo Bay.

In China, American army planes began today their 40-day task of moving 80,000 Chinese troops to China coastal areas they will occupy—the world's greatest airborne troop movement. Every transport plane available will be utilized.

Allied commanders in Singapore today reported that surrendered Japanese forces there include 85 generals, an unknown number of admirals, and 85,000 troops.

An American amphibious force led by the veteran Vice Adm. Daniel E. Barbey, meanwhile, neared the coast of Korea, fully armed and alert although expecting no trouble in occupying the north central coastal town of Jinsen. Some reports indicated Koreans had been attacking Japanese, who would welcome the American arrival.

Taking time out from name-calling over who lost the war, the Tokyo press today disclosed one virtual revolt of Koreans had occurred in mid-August at Seoul (Keijo) as Russians approached. Demonstrators welcomed the Soviet forces and seized control of the local government from Japanese, the newspapers Mainichi and Nippon Times reported. They also dis-

School Bells To Ring on Monday

WHITE DEER, Sept. 6.—(AP)—McHenry Lane has announced that the White Deer-Skellytown schools will begin the fall session with a faculty meeting and breakfast Saturday morning at 9 o'clock in the high school cafeteria, and registration of the seniors, will begin Saturday afternoon.

All other pupils in both high school and grade schools will enroll Monday morning, Sept. 10, at 9:30. Enrollment will probably be completed and students dismissed by noon. Buses will make their usual routes Monday.

The faculty includes: Skellytown—H. H. Nicholas, principal; Mrs. Marion DeFever, Mrs. Earl New, Mrs. E. H. Nicholas, Celestine Wheeler, Jimmy Slack, Naomi Billings, and Margaret Stewart, primary grades; Mrs. Kathleen Francis, Mrs. N. E. Lamb, Larue Shadle, and Charlene Knox, intermediate grades.

White Deer grade school—Tyson Cox, principal; Mrs. Charles Hall, Mrs. Fred Mullings, Mary Lee Davis, and Mildred Cole, primary grades; Mrs. R. Y. Corder, Mrs. W. H. White, and Mrs. McHenry Lane, intermediate grades.

Resolution Submitted By Barkley

WASHINGTON, Sept. 6.—(AP)—The senate voted unanimously today for a joint congressional inquiry into the Pearl Harbor disaster.

Action came on adoption of a resolution which senate Democratic Leader Barkley (Ky.) said he offered with the full approval of President Truman.

The resolution now goes to the house. Barkley told his colleagues Speaker Rayburn had promised speedy consideration there.

Under the resolution the inquiry would be made by five house members named by the speaker and five senators appointed by the Senate President McKellar (D-Tenn.).

Six of ten would be Democrats, the remainder minority members.

A report to congress on the findings would be required by next Jan. 3.

Barkley told the senate the investigation should be made "so complete and so fair that no person could doubt the good faith of the report and the findings of those who make them."

Barkley's action apparently assured a congressional investigation See RESOLUTION, Page 4

Other Fields Also Are To Be 'On Shelf'

The Pampa News was informed by the Associated Press at 12:30 today that Pampa army air field would go on an inactive status not later than Sept. 30.

Speculation has been running high since the end of the war as to whether the field would close or would be one of the "chosen few" to remain open to train fliers for a peacetime army air force.

In its August 31 issue, the Pampa Five, post publication, asked all current rumors when it said that Col. James Rinin, commanding officer, had received no official word as to whether the field would remain open.

The local flying school was activated as an advanced flying school in November, 1942, with Col. Daniel S. Campbell, now in Italy with the 15th air force, as commanding officer.

From the date of its activation until November of last year, aviation cadets were trained in various types of twin-engine aircraft mostly in UC-78's and AT-17's but last fall, these types were replaced by B-25 Mitchell bombers as training planes.

Since 1942, the field has sent more than 5,000 officers and flight officers to join air forces fighters in every part of the world. The field has maintained a permanent Hall of Fame in honor of those who have distinguished themselves in combat and those who have died while fighting the bloodiest war this world has every known.

Every month since the field was opened, Pampa has opened its homes and extended its hospitality in every way to the hundreds of families who have come to see their sons, husbands and sweethearts receive their silver wings. The city has received nation-wide acclaim for the way it has welcomed these visitors.

Ultimate disposition of Pampa field, along with the others being closed, is yet to be decided by the

Bandit Search Is Near State Line

LUBBOCK, Sept. 6.—(AP)—A search for two bandits who robbed the First State bank of Morton on the \$17,692.46 centered last night in the Big Bend area of Southern Cochran county, Texas, near the New Mexico line.

The two herded five employes and some 15 customers into the bank vault at pistol point shortly after noon yesterday, took the money and fled with a third man who had been waiting outside in a maroon convertible coupe.

W. W. Williamson, vice president of the bank, announced the amount of the loss. He said the victims were told by the men to remain in the vault for 30 minutes or "we'll kill every one of you," but that they left within five minutes and notified Sheriff Mac W. Hancock.

Rangers and highway patrolmen, county officers from the South Plains in Texas and from New Mexico, and FBI agents joined in the search.

Five-One Garage, 600 S. Cuyler, Phone 51. (Adv.)

THE NO. ONE MATTER:

DISCHARGE OF RELATIVES IS MOST FOLKS' CONCERN

WASHINGTON, Sept. 6.—(AP)—Texas congressmen say they are convinced after a visit home that the folks right now are concerned primarily about getting their sons and husbands out of the armed forces.

Rept. Albert Thomas, describing a situation which other Texas members said also held true for them, declared:

"I was beset by people wanting me to help get their boys out of the army. They came to see me about a lot of matters, but that was the No. 1 matter on their minds." Rep. Lyndon B. Johnson, relay-

Railroad Movement Controls Lifted

WASHINGTON, Sept. 6.—(AP)—The office of defense transportation announced yesterday that all wartime controls over the shipping of liquid products, including petroleum, by railway tank cars, highway tank trucks and pipeline will be ended Sept. 30. The ODT's liquid transport department will be discontinued.

'COMPENSATION'

SAN FRANCISCO, Sept. 6.—(AP)—American prisoners of war have sent gifts of cash, flowers and food as "compensation" by Japanese families bereaved by the deaths of several persons hit by bundles of plane-dropped American supplies, the Domei agency said today.

Wheel aligning service. Call Mel for night appointments. — Pampa Safety Lane, Phone 101. (Adv.)

DOOLITTLE FLIERS COME HOME

Three liberated American fliers, who were captured after their planes went down during the Doolittle raid on Tokyo in 1942, arrive at National airport, Washington, today. They will be nursed back to health at Walter Reed hospital. Left to right: Staff Sgt. Jacob DeShazer, bombardier, Salem, Ore.; Lt. Chase J. Nielsen, navigator, Hyrum, Utah, and Lt. Robert Hite, co-pilot, Earth, Texas.

Pearl Harbor Attack Is No. 1 Problems Facing Congressmen

WASHINGTON, Sept. 6.—(AP)—Congress met today to hear an S. O. S. from the White House in a time of emergency. (See President's message on this page.)

Yesterday congressmen came back to meet in a new world of peace—the nation-wide congressional situation was this:

1. Pearl Harbor remained an unfinished chapter. Senate and house republicans got together, pooled their forces, and demanded a full congressional look-see into the 1941 disaster. It seemed as though they'd get it.
2. A senate committee began considering Mr. Truman's request for power to streamline the executive branch of the government. A house committee has just ended hearings on the same subject and will come up with its own proposal in a few days—probably to give Mr. Truman part of what he asks, but not all.
3. The unemployment compensation bill hit another bump in the senate. This is a bill—backed by the President—to use federal funds to boost payments made by state governments to the jobless. The senate finance committee, considering it.

One Strike Ends As One Begins in St. Louis Plants

ST. LOUIS, Sept. 6.—(AP)—Ralph Blagdon, managing editor of the St. Louis Star-Times and spokesman for the St. Louis Newspaper Publishers association, said today the three-week-old strike of newspaper carriers has been settled but that resumption of publication of the city's three daily papers will be delayed further pending negotiation of a new contract with members of a typographical union.

Charles Bond, business agent for the AFL paper carriers' union, said the carriers' picket lines have been withdrawn from around the three newspaper plants.

"The strike of carriers was ended by agreement of the publishers to purchase routes of union carriers," Blagdon said. "The publishers now are in a position to bargain with the carriers as employees for wages, hours and working conditions."

Approximately 200 carriers, adult supervisors of newspaper distribution routes, set up picket lines Aug. 16 protesting refusal of the publishers' association to recognize their union for collective bargaining purposes. Pressmen affiliated with the union would not cross the picket lines.

William Gibbons, president of the St. Louis Typographical union, said typographers have been negotiating with publishers of the three newspapers since October, 1944. Their contract expired last December. He declined to say what demands the typographers were making.

Henry Cales To Be Released from Navy

Henry C. Cales, motor machinist's mate, first class, USNR, Pampa, just returned to Treasure Island, Calif., from the Pacific battle front, and is en route to his home naval district for a discharge under the navy's point system.

He arrived in the States for leave and reassignment but the point system was announced before he was given new orders.

CORRECTION

It was erroneously stated in yesterday's edition of The News that Harold Wright, ex-serviceman who has announced his candidacy for city commissioner, would return to the insurance firm of Wm. T. Frazer and company where he worked before going into service.

He said today he did not plan to return to that concern, but planned a business of his own.

M'Arthur Preserves Trophies of Battle

YOKOHAMA, Sept. 6.—(AP)—General MacArthur today ordered the surrendered swords of Gen. Tomoyuki Yamashita and Vice Adm. Okochi, commander of the Japanese imperial army and navy forces in the Philippines, sent to the U. S. military and naval academies.

United States To Get Little From Beaten Germany

FERLIN, Sept. 6.—(AP)—The American share of German reparations, it was predicted by financial experts today, is likely to be the smallest of any of the four occupying powers.

The American's eventual recompense from the defeated enemy is expected to be about five per cent of that of the Soviet union, about one-half of Britain's and somewhat less than that of France.

The first major United States proposal before the Allied control council is a decree which would vest ownership of all of Germany's external property in the council.

According to preliminary American estimates, the Germans have cashed assets of \$989,867,000 among five neutrals. Switzerland is believed to have \$600,000,000.

All machinations known to high and low finance were used by Nazi capitalists to hide the trail of the wealth they sent abroad. A simplified example is an account opened under a Swiss name in a Swiss bank, transferred to a Dutch bank, retransferred to a Swedish bank and ultimately placed in either the United States or Britain.

American interest in uncovering all of Germany's foreign holdings is acute because these offer what is described by financial experts as "the only feasible form in which we can get some real reparations."

Unlike the other Allies, the United States shows little desire to obtain physical resources from Germany.

SCIENCE MOVES IN:

ARMY EXPERTS PLAN TO STUDY A-BOMB RESULTS

YOKOHAMA, Sept. 6.—(AP)—A secretive group of American army experts arrived here today en route to Hiroshima to study the devastation wrought in the world's first atomic bombing.

Japanese simultaneously made elaborate reports of results of their own inquiry and asserted that many persons, including those who rushed in after the bombing to aid in relief work, were slowly dying.

Names of the men were not made available.

Japanese reports said that since Aug. 30, a group of 30 experts have been at work at Hiroshima, headed by Dr. Masao Tsuzuki, Tokyo uni-

'Limited' Cut in Taxes Is Promised

WASHINGTON, Sept. 6.—(AP)— President Truman called upon congress today to keep his war powers in force for the reconversion "emergency" as he laid down a 21-point legislative program. It included "limited" tax cuts next year and proposals to achieve full employment.

Mr. Truman told the legislators, assembled for their first peace time session in four years, that the war will not be over on the home front until its economic impacts have been eased. **WOULD BE 'GREAT CONFUSION'**

Hence, he said, proposals to abolish war-time controls by declaring the war officially at an end would lead to "great confusion and chaos in government."

The 16,000-word message, which Mr. Truman sent to Capitol Hill, promised a lifting of controls, one by one, as fast as possible. But it cautioned that their overall abandonment would leave the chief executive powerless to prevent "bottle-necks, shortages of material and inflation."

"The time has not yet arrived," the President asserted, "for the proclamation of the cessation of hostilities, much less the termination of the war. Needless to say, such proclamations will be made as soon as circumstances permit."

Tempering his warnings with expressions of confidence, Mr. Truman declared that prompt and vigorous congressional and administration teamwork can usher in an era of unprecedented prosperity. **SEES POSSIBLE ERA OF PROSPERITY**

"A vast backlog of orders may soon make possible the greatest peacetime industrial activity that we have ever seen," the President said, adding at another point:

"In this hour of victory over our enemies abroad, let us resolve now to use all our efforts and energies to build a better life here at home and better world for generations to come."

Recommending immediate enactment of a transition revenue bill to provide "limited tax reductions" for the calendar year 1946, Mr. Truman stressed that the reductions should aim principally "at removing barriers to speedy reconversion and to the expansion of our peacetime economy."

TAX REDUCTION NOW IS LIMITED

He emphasized that the \$66,000,000,000 the government expects to spend during this fiscal year will exceed anticipated revenue by \$30,000,000,000, and added:

"We must reconcile ourselves to the fact that room for tax reduction at this time is limited. A total war effort cannot be liquidated overnight."

Mr. Truman expressed hope congress would follow the transitional bill with one to modernize the whole federal tax structure. This, he said, would encourage business incentives and expansion and stimulate consumer buying power.

Point by point, the chief executive recommended:

1. Enactment of "full employment" legislation;
2. Federal emergency benefit payments to provide weekly unemployment compensation up to a maximum of \$25 throughout the country;
3. Amend the fair labor standards act to substantially increase the minimum wage level of 40 cents an hour which he described as now "obsolete";
4. Extend the provisions of the second war powers act to preserve "the powers necessary" to keep the economy stabilized and "permit us to enter into the difficult period of readjustment without the threat of a disastrous price collapse." Mr. Truman added it would be necessary for the government also to resist "pressures for increases in wages which would imperil price ceilings;"
5. Legislation making permanent the President's authority to reorganize administration agencies "to permit him to lay out the machinery" for carrying on peacetime responsibilities. He said "executive initiative," which he suggested be subject to congressional veto, "is an effective approach to governmental reorganization."

FAIR EMPLOYMENT PRACTICE COMMITTEE

6. Legislation previously asked creating a permanent fair employment practice committee to prevent employment discriminations involving race, religion and color.

7. Legislation strengthening the department of labor and giving it supervision of collective bargaining, conciliation and voluntary arbitration. The President added that the war labor board should be abolished "as soon after the conclusion of the forthcoming industry-labor conference as the orderly disposition of the work of the board and the provisions of the war labor board disputes act permit, and after facilities have been provided to take care of the wage stabilization functions under the act of October 2, 1942."

8. Continuation of the employment service under federal control "at least until the expiration of the war mobilization act—June 30, 1947." He asked that the employment service appropriation for the current fiscal year be increased by \$10,000,000 to help find jobs for demobilized veterans and displaced war workers.

BROADER PEACETIME MARKETS

9. Enactment of additional measures to strengthen the machinery for carrying out price support commitments to farmers and "for laying the basis for broader peacetime markets for agricultural products." He recommended that the \$500,000,000 of lend-lease funds which congress set aside for farm commodity price support be made available to the commodity credit corporation on a continuing basis.

10. Continued inductions of men 18 through 25 for periods of two years, since "we cannot rely on voluntary recruitment as the sole method of procuring the necessary replacements" and it would be an "unforgivable discrimination" to suspend inductions now at the cost of requiring continued sacrifice from veterans "who have already done their part."

11. Enactment at an early date of a "broad and comprehensive housing" bill involving the cardinal principle that house construction and financing for the overwhelming majority of Americans "should be done by private enterprise." "For those low income groups, representing but a small portion of the total housing need, our prewar program of federal aid to communities for

Worse Atrocity Stories Coming

HONOLULU, Sept. 6.—The probability that previously-told stories of Japanese atrocities to Allied war prisoners will be dramatically supplemented in the near future was indicated here as eight United States generals liberated Aug. 18 from prisoner of war camps in Manchuria passed through Hawaii en route home.

A formal press conference was held for them—gagard and haunted eyed though they were—but not one word was permitted to be written concerning their treatment while prisoners.

Maj. Gen. Edward P. King Jr., who spoke for the group at Fort Shafter, indicated that Lt. Gen. Jonathan M. Wainwright would report direct to the war department on this subject soon.

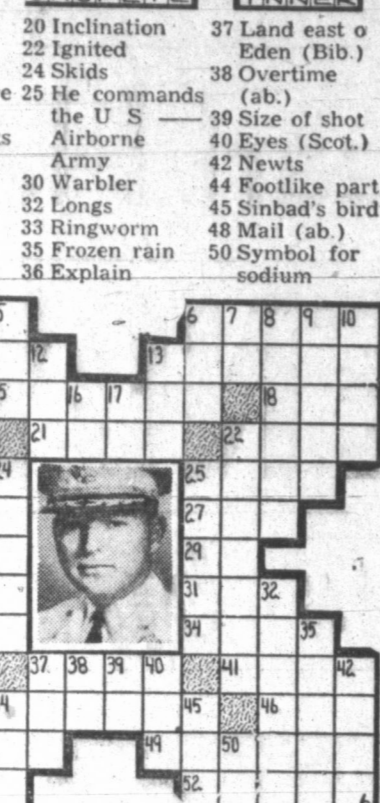

There was a tense atmosphere of repressed wrath at Japan surrounding the party of generals wherever they went here. It was not that they appeared to feel they had been treated worse than thousands of other prisoners, but rather the fact that they too had been subjected to torture pointed up how far the Japanese had gone in their floating

FURR FOOD STORE

Downtown Store To Hold Formal Opening Friday

MRS. GRACE HODGE

Bentley's Ladies' Ready-to-Wear, Pampa's newest downtown business house, will celebrate its formal opening heretomorrow, Clarence Solnick, manager, said today.

The store will feature the finest quality merchandise that is available, Solnick said. All though many of the nationally advertised brands are not available as yet, the manager said, the store is buying only the best and will continue to increase the quality as conditions permit.

Solnick, a native of Alabama and a graduate of the University of Alabama, has been in the ladies' ready-to-wear business for 11 years. In addition to the Pampa store, he is operating stores in Amarillo and El Paso.

A veteran of world war II, Solnick was a member of the Junior Chamber of Commerce, the Lions Club and the American Legion in Abilene, where he was formerly located.

He was chosen by the Abilene Jaycees as the outstanding young man of the city.

Mrs. Grace Hodge, assistant manager has been in the ready-to-wear business for 25 years as buyer and manager for various stores. At the outbreak of world war II, Mrs. Hodge volunteered to recruit women and girls for the United States Marine Corps as a member of the famous Texas Bluebonnet platoon of the WAVES.

Mrs. Hodge is a member of the Business and Professional Women's club, Amarillo, where she has lived for the past 29 years. She is also a member of the American Legion auxiliary, and is commander of the newly created Disabled American Veterans auxiliary of Amarillo.

While a resident of Amarillo, Mrs. Hodge was also connected with the City of Amarillo as juvenile officer. Speaking of her WAVE recruiting work, Mrs. Hodge said:

"It was a great pleasure to help to enlist girls in the navy and outfit them with uniforms but it is going to be an even greater pleasure to see them in civilian clothes now that peace has come."

Resolution

(Continued From Page 1)

of the circumstances surrounding the Japanese sneak attack. Republicans have demanded such a probe and House Speaker Rayburn indicated he thought it inevitable.

Asserting that what is needed is "a thorough, impartial and fearless inquiry," Barkley said:

"This inquiry should be of such dignity and authenticity as to convince the congress, the country, and the world that no effort has been made to shield any person who may have been directly or indirectly responsible for the disaster, or to condemn unfairly or unjustly any person who was in authority, military or naval or civilian."

Barkley said the president not only approved but urged that "I not be dissuaded in any way" from offering the resolution.

He had talked to Speaker Rayburn, who promised house consideration of the resolution immediately after the senate acts, Barkley said.

Discharge

(Continued From Page One)

state agencies, coupled with expansion plans of many private companies in Texas, was expected to make the job situation less acute in the southwest than in many other parts of the country, some said.

Reflecting the views of many Texans, particularly farmers, Rep. Poage introduced a resolution in the house proposing an end to the daylight-saving war time, effective Sept. 30.

A move to speed up the movement of meat to civilian consumers was undertaken by Rep. Wright. Patman who called agriculture department officials before the house small business committee over which he presides.

Tax Cut

(Continued From Page One)

low rent housing should be resumed," the President added. He also recommended that "we quicken our rate of progress in rural housing."

12. For carrying on scientific research and development, the President asked congress to set up a single federal research agency to promote and support research in basic sciences, social sciences, medicine, public health and allied fields. This agency would aid in all projects pertaining to defense and security and make available to commerce and industry the fruits of government-financed research.

13. Enactment of the transitional tax bill, which he said "must not lose sight of the budgetary situation and our obligations to 85,000,000 bondholders." He suggested that after passage of such a bill congress consider modernizing the tax structure with a view of encouraging business incentives and expansion and increasing consumer purchasing power.

14. Creation of a single surplus property administrator in place of the board of three operating under legislation enacted last year.

15. Aids to small businesses to enable them "to obtain adequate materials, private financing, technological improvements and surplus property."

16. That congress expedite legislation giving additional aid to veterans to carry them over from military to civilian activities through better organization and over-all planning along the lines recommended by the veteran's administration dealing with vocational readjustment, education and training. The President asked congress for legislation giving veterans social security coverage credit for the period of their service in the armed forces.

17. A public works program call for (1) reclamation, rivers and harbor, flood control and conservation projects; (2) construction of necessary federal buildings throughout the country; (3) the release for immediate expenditure of postwar highway spending authority voted by congress to become effective at the rate of \$500,000,000 a year for each of the first three postwar years; (4) appropriation of \$25,000,000 to continue the construction of the Inter-American highway through Central America to the Canal Zone; (5) the construction of 3,000 new airports and the improvement of 1,500 others; (6) grants to state and local governments for public works and (7) the provision of federal grants for the construction of hospital and health centers.

18. To take up where lend-lease left off, the President recommended (A) repeal of the Johnson act barring private loans to nations in default on previous lending, (B) appropriation of the remaining \$550,000,000 authorized by congress for United States participation in UNRRA and consideration of an additional commitment of \$1,500,000,000 recommended as the United States' additional share by the recent UNRRA council meeting. The President foresaw the need also for additional interim lending power to insure a rapid and successful transition to peacetime world trade and said that appropriate recommendations would be made later "when we have completed the exploratory conversations already begun with our associates."

19. The President recommended that congress take early steps to increase the salaries of its members from \$10,000 to \$20,000 per year.

"There is no doubt in the mind of any thinking American that members of the congress are grossly underpaid and have been for many years," the President said. "I think that they are entitled—and have already so expressed myself—to a salary anywhere from \$15,000 to \$20,000 a year. I recommend that the congress enact legislation providing that the salaries of its members be increased to \$20,000 per year."

At the same time he recommended repeal of legislation under which members of the house now receive an additional expense allowance of \$2,500 a year. He also recommended that congress "provide decent work scales" for the executive and judicial branches of the government, asserting the most important impediment to obtaining efficient administration in government "has been the pitiful wage scale."

20. Enactment of legislation for the normal operation of the merchant marine to re-establish the nation's foreign trade with legislation to permit the maritime commission to sell ships at home and abroad for private operation.

21. Enactment of legislation for the acquisition and retention of stockpiles and materials necessary to the national defense.

12. For carrying on scientific research and development, the President asked congress to set up a single federal research agency to promote and support research in basic sciences, social sciences, medicine, public health and allied fields. This agency would aid in all projects pertaining to defense and security and make available to commerce and industry the fruits of government-financed research.

13. Enactment of the transitional tax bill, which he said "must not lose sight of the budgetary situation and our obligations to 85,000,000 bondholders." Pearl Harbor

(Continued From Page One)

ing the measure, has discovered that several states have laws slicing their own help to the jobless if Uncle Sam should step in with aid.

4. Chairman John Rankin of the house veterans committee said he will push right ahead in his drive for a bonus to veterans. The bonus he wants would be \$1,040—paid \$20 a week for one year, whether the veteran has a job or not.

The really important work was going on in the committees.

Speeches were made in the house, but little was said that would have any effect on congressional actions.

Scores of bills were introduced. Ten representatives introduced bills to return the nation's clocks to standard time—a measure Mr. Truman advocates.

Judith Kay Jinks Services Friday

Funeral services for Judith Kay Jinks, six-week-old daughter of Mr. and Mrs. R. T. Jinks, Jr., will be held Friday afternoon at 4 o'clock in the Dunkel-Carmichael chapel. The baby died at Oxnard, Calif., and the body is being brought to Pampa for services and burial in the baby garden at Fairview cemetery.

Name Is Placed On City Ballot

The name of H. A. Wright was officially placed on the ballot for City Commissioner No. 1 today after a petition signed by 89 qualified voters of the city had been presented to the city secretary.

State law requires that at least five percent of the qualified voters who voted in the last election must sign their names to a petition before a candidate's name can be placed on the ballot.

Wright, recently honorably discharged from the navy Seabees, will be a candidate in the September 18 election to choose a commissioner to fill the unexpired term of Tom Cox, resigned.

Deadline for the placing of names on the ballot is midnight, September 8.

The vote in the last city election totaled 748. Five percent of that total is approximately 37 voters.

AGREEMENT NEAR

OKANGE, Sept. 6. — (P) — Carl White, conciliator for the U. S. department of labor, said early today that workmen off the job at Consolidated Steel corporations shipyard here and management were near an agreement ending the walk-out.

Read The Classifieds in the News

OKANGE, Sept. 6. — (P) — Carl White, conciliator for the U. S. department of labor, said early today that workmen off the job at Consolidated Steel corporations shipyard here and management were near an agreement ending the walk-out.

MacArthur

(Continued From Page One)

closed that 20,000 Korean political prisoners now have been freed.

The influential Tokyo paper Asahi also took the first public whack at Japan's army and navy in 14 years. It charged struggles between the cabinet and militarists, had contributed to Japan's defeat.

The Japanese diet ended its two-day session after receiving a final bit of bad news: Revised figures, said Domei, showed 554,350 air raid casualties in Japan. Of the total, 241,399 were dead. Hardest hit were Tokyo, atom-bombed Hiroshima and Nagasaki, in that order.

Gen. Walter C. Krueger's Sixth army meanwhile, moved smoothly across a broadening occupation zone of Kyushu, and Vice Adm. Frank Jack Fletcher's Ninth fleet from the Aleutians was off northern Honshu, ready to enter Aminato naval base after negotiations next Sunday.

Tokyo's civilian police force was expanded by addition of American-approved members from the disbanded Japanese secret police. As the city prepared for the arrival Saturday of General MacArthur and 8,000 officers and men of the U. S. First cavalry division. The

force will occupy, at first, only 40 of Tokyo's 200 square miles.

Domei also reported additional U. S. troops were expected in the Tachikawa area, northwest of Tokyo, on Friday. Already controlling the area are 4,000 Americans.

Allied prisoners freed on Honshu now total 3,996, general headquarters reported. The Eighth army headquarters announced its forces had liberated 27 per cent of all imprisoned in its occupation zone in northern Honshu.

Sixty-one Superfortresses continued mercy missions, dropping 7,000 pounds of supplies at each of 25 Honshu prison camps.

As British forces took over control of Singapore, 112 more Americans were liberated from prison camps there. Included were survivors of the lost cruiser Houston and of the 131st (Texas national guard) field artillery regiment.

Chinese under Gen. Lu Han, who will accept Japanese surrender in northern Indo-China, had reached a point four and one-half miles northeast of Hanoi by Tuesday, the high command announced today.

Oranges that receive the most sunshine as they grow have the highest concentration of vitamin C in their juice.

Millions of years ago, much of Australia was beneath the sea.

36th's Landing Is To Be Observed in Texas

AUSTIN, Sept. 6. — (P) — Texans will observe the second anniversary of the 36th division's Salerno beach landing Sunday.

In a proclamation Gov. Coke E. Stevenson urged that the day be dedicated not only to the memory of the dead and living of the 36th, first American forces to breach Hitler's European fortress; "but for all men of the Lone Star State who played such gallant roles in bringing every Axis nation to its knees."

departmental work in the intermediate grades.

High School—Fred Mullings, principal; R. Y. Corder, science; Emma Cearley, mathematics; Darleen Newton, English; Ola Mae Roberts, speech; Claudia Everly, publications and registrar James H. Gain, band; Marguerite Clayton, library; Louise Williams, home economics; Walter Thompson, agriculture; W. C. Whiteside, shop; Mary Frances Bledsoe, commerce; Charles Graham, social studies and physical education; Tyson Cox, football coach.

Australia has been a commonwealth since 1901.

Fields Close

(Continued From Page One)

war department, the Associated Press message said.

If not needed for postwar training purposes the fields are expected to be released to the surplus property board.

Other fields in this area that will be placed on an inactive status are Ardmore and Frederick, Oklahoma; Carlisbad, New Mexico; and Marana, Arizona.

Spanish Withdrawal

MADRID, Sept. 6. — (P) — Spain will withdraw her troops from the former international zone at Tangier, across the strait from Gibraltar, as requested by Britain and France, a good authority said yesterday.

According to Tangier dispatches a majority of the 2,000 Spanish troops in the zone already have been withdrawn.

Plans for reestablishment of the zone were announced in Paris by the foreign ministry in a communique disclosing the results of Paris conferences last month by British, French, American and Soviet representatives.

A yellow flag on a ship means there is contagious disease aboard.

Pumper's Services To Be Held Friday

Last rites for James Earl Mitchell, pumper for Gulf Oil company, will be held at the Central Baptist church, Friday at 2 p.m. Mr. Mitchell, who had been a resident of Gray county for 15 years, died at his home eight miles south of Pampa, Sunday evening at 6:30.

Rev. A. Myers, evangelist from the Memorial Baptist church, Waco, will officiate at the services.

Survivors include five sons, James B. Mitchell, with the armed forces in the Pacific; Robert S. Mitchell, Pampa; Walter R. Mitchell, Dunning, N. M.; Earl Jackson and J. Douglas Mitchell, both of Pampa; and a daughter, Marie, also of Pampa.

Four grandchildren, Rose Marie, Nancy Ann, James B. Jr., and Robert Earl, and one sister, Mrs. Annie Cobb, Paris, Ark., also survive.

Palbearers are Homer Johnson, Roy Cay, Moore Jones, Ed Blommer, Troman Black and K. R. Young.

Dunkel-Carmichael funeral home will have charge of arrangements, and burial will be at Grant, Okla.

BILL INTRODUCED

WASHINGTON, Sept. 6. — (P) — Rep Kilday (D-Texas) has introduced a measure to stimulate volunteer enlistments in the armed forces by increasing pay scales.

Livestock and poultry cannot protect themselves against disease. One infected animal or chicken can infect an entire herd or flock. Workable disease prevention and control programs protect against this loss. We are prepared to give valuable information and assistance in setting up such a program for your cattle and chickens. Come in and "talk shop" with us—we speak the farmer's language.

National Park Service Looking To Texas for U. S. Vacationists

By **TEX EASLEY**

WASHINGTON, (AP)—The national park service, with an eye on the Big Bend country of Texas, is making plans for American vacationists.

In formally accepting from the people of Texas title to the great tract of land formed by a loop of the Rio Grande, the national park officials called it the one remaining virtually unexplored, unspoiled land left in continental United States.

A program for building highways

through the area, and construction of lodges, cabins and other recreational features such as is found in Rocky mountain and Yellowstone National parks, is planned. It is outlined in a letter Rep. Ewing Thomson of El Paso, who sponsored federal legislation establishing the Big Bend National park, received from Associate Director A. E. Demaray of the national park service.

Demaray said that a major road system in the park would start from the north entrance and fork to the east to a proposed developed area near Boquillas on the Rio Grande, and to the west to another entrance and a minor development site at Santa Elena canyon, also on the Rio Grande. Including the spur road to the partially developed basin area in the Chisos mountains, the total approximate length of the existing major roads is 90 miles.

That portion from the north entrance to Santa Elena canyon as State Highway 227 has been partially graded and graveled and is in good condition. The spur road to the basin, most of which was constructed by the CCC is a graveled road. The road from the fork of Boquillas has been maintained by the county as a partially graded, low standard road.

Alternative construction programs for building up a modern road system in the park are under consideration: one would cost \$4,250,000 a year for each of the first three years of work, the other would be double that amount. As a part of the three-year program, approximately \$8,000 would be spent for horse trails from the basin into the Chisos mountains. The construction

Tired Kidneys Often Bring Sleepless Nights

When disorder of kidney function permits poisonous matter to remain in your blood, it may cause nagging backache, rheumatic pains, leg pains, loss of pep and energy, getting up nights, swelling, puffiness under the eyes, headaches and dizziness. Present or scanty passages with smarting and burning sometimes shows there is something wrong with your kidneys or bladder.

Don't wait! Ask your druggist for Doan's Pills, a stimulant diuretic, used successfully by millions for over 40 years. Doan's gives happy relief and will help the 15 miles of kidney tubes flush out poisonous waste from your blood. Get Doan's Pills.

program includes lodges and cabins.

Around the capital: A recent WPB order restricting the amount of colored print material which could be used in the making of feed bags stirred Mrs. T. M. Ibell of Pecan Gap to write Senator Connally:

"The farm women feel that we are being handed a pretty raw deal by the WPB in their move to stop the feed mills from the use of print bags for feed. The excuse is that we use them instead of returning them for reuse.

"Any woman, farm or otherwise, wouldn't look very bright returning feed bags at 15 cents each when she can get a nice house dress out of three which would be 45 cents. If she were to buy a ready-made dress no nicer than the bags make it would cost anywhere from \$3.98 to \$7.98 or to buy the material would be 49 cents per yard, the cheapest to be found, that is when it can be found."

Col. Bob Smith of Dallas, vice president of Braniff Airways on leave and stationed with the North African division of the army air transport command, writes from Calro:

"We are having, if not enjoying real summer over her. I think I shall never complain of our Texas summer again, after this experience. This is my second summer in desert lands."

Congressman Wright Patman's Texas matches—the folder type with a complete history of Texas, map included, printed on the back and on the individual match, stems—create comment. From Mrs. Marguerite Pest in Hathboro, Pa., he received this note:

"I gave one to Dr. Kessler and he said Texas must be worth visiting if it is advertised like that. I told him it sure was. Gave another one to a girl in our office, another to a sailor in the naval hospital and one to a Texas girl and we really became friends over your matches and our liking Texas."

Salt is an important ingredient in the manufacture of rayon.

The tannin used to tan leather, both sole and upper leather for shoes, has been from time immemorial obtained from the bark of certain trees. The largest shoe leather tanning centers are in Pennsylvania and Wisconsin, these states having large forest resources of oak and hemlock, used for the tannin they contain.

Texas Today . . .

By **JACK RUTLEDGE**
Associated Press Staff

A headline in the Brownville Herald read: "Matamoros Holds Quiet Election."

The story told of a primary city election in the border city. It said one group charged it was not allowed to vote at a certain precinct and "a minor disturbance broke out." It also told of two leading citizens getting into a fight and being taken to the military garrison. It further told of a large number of men organizing a "protest parade" because of voting procedure, and marching through the main part of town. It went on and told of the police and soldiers being called out to restore order.

The Herald probably meant "quite an election."

Second Lt. Wooster Morgan of Dallas fell for Sonja Henie. In fact, he fell about 2,000 feet.

The movie actress participated in a parachute demonstration, Morgan writes his folks, and acted as jumpmaster. When she said jump, he jumped.

Lt. F. R. Birdwell of Port Arthur, home for his wedding, has completed his 58th and "worst mission"—in Texas.

Birdwell is a veteran of 57 missions over Germany was pilot of a B-26. He's home now, and he and his future father-in-law, A. E. Ellerbe, and Clifton Roy Ellerbey went on a fishing trip in Galveston bay.

A storm came up and the wind overturned the boat. The three men clung to the craft for the duration of the storm.

Nightfall came, but help didn't. They had an all-night vigil, hanging from the upside-down-boat. The

following morning they righted the skiff, tore strips of wood from it to use as paddles, and finally reached a reef. They were in the water 14 hours.

"Maybe the air corps won't credit us with another mission, but I've never been on a raid that scared me half as much," the lieutenant said.

The world crop of tobacco for the 1945-46 season has been estimated at 6,346,000 pounds, about two per cent below the average production for the 1935-39 period.

Board Is Issued Restraining Order

ABILENE, Texas, Sept. 6.—(AP)—Chief Justice Clyde Grissom of the 11th court of civil appeals has granted a temporary order against a requirement that Abilene senior and junior high school students sign an anti-sorority and anti-fraternity pledge when they enter

school for the session opening Sept. 10.

The temporary restraining order, granted by the judge at Eastland, was against the Abilene school board, superintendent and school district.

Judge J. R. Black of 42nd district court had denied a petition for injunction filed by four school patrons. Judge Grissom issued a temporary order which will be in force until the court hears on Sept. 21 an appeal from the district court ruling.

Food production in the United States was 32 per cent greater in 1943 and 37 per cent greater in 1944 than in the prewar years.

MEN! GET PEP. Do you want to feel young again? Why feel old at 40, 60 or more? Enjoy youthful pleasures again. If added years have slowed down your vim and vitality, just go to your druggist and ask for Casella tablets. Many men are obtaining remarkable results with this amazing formula.

Rear Engines, Flexible Glass Tops, Built in Jacks---Prevue of New Car

Fugged competition is going to be the keynote in the postwar automobile industry and the new cars, within just two or three years, will likely boast as many as 14 structural changes and new gadgets, Walter Davenport, associate editor of Collier's, reports in a signed article in the current issue of the national weekly.

On the basis of a recent study in Detroit of the industry's post-war plans, Davenport declares that it is now impossible to forecast with accuracy what new features will be incorporated in any specific car but that the 1947 or 1948 models as a whole probably will boast the following new designs and innovations.

1. Engines will be over the rear axles in at least two cars, with space for your luggage, fuel and spare tires up front.
2. Windshields will curve around to the lintels of the forward doors, abolishing the solid posts at either end of the current windshields and giving motorists greater visibility.
3. Car tops, from the stiffs of the windows up, will be made of unbreakable and flexible glass, some of which will be opaque "so that you won't have the feeling of riding around in an aquarium."
4. Solid metal tops, when retained on cars, will fold up and telescope back into the luggage department.
5. Engines will be smaller but give more power.
6. Cars will be fendless, suggesting "the offspring of the union of a fiatiron and a beetle."
7. Rear windows will be wider and deeper and equipped with wipers.
8. Water sprayers will wash mud off your car as fast as it accumulates.
9. Seats will adjust upward and downward, as well as backward and forward.
10. Glass fibers and plastic weaves—neither cold in appearance.

nor contact will be used as interior fabrics.

11. There'll be sand spreaders for slippery going.

12. There'll be built-in jacks—just "push a button and the jack will come down and the car go up."

13. Radios will be turned on and off by foot.

14. There'll be refrigerators for beer.

Davenport reports other improvements in the offing, improvements that probably won't come with either the 1947 or 1948 models, as follows: two-way radio phones, Diesel-powered passenger cars (to be manufactured by at least two companies), supercharged engines and air conditioning.

And the "almost fabulous jesp," Davenport says, "will be trimmed here and there to meet the softer exactions of peace," so that "it will be a sort of cross between station wagon and utility truck."

The new cars will cost 15 to 20 percent more than the prewar models due to the increase in the cost of materials and labor, according to Davenport, but Ford and Chevrolet are said to be preparing to offer junior models of their cars, with fewer expensive innovations, at about the same price as their prewar models.

Davenport contends that the wartime discovery of new processes and uses of materials has "nurtured anew the spirit of competition" within the automobile industry and that, with the reported entry of aviation manufacturers into the automobile field, a price war is possible.

Every automotive laboratory has become "the repository of fact and theory," he says, "with which to produce something revolutionary for you and me to jam the highways with on postwar week ends."

With the growing army of unemployed, there would seem to be little reason why it should be necessary for any workers to work longer hours while other workers have no jobs.

—Edward Corsi, New York Industrial Commissioner.

Giant Japanese Subs Are Taken

—ABOARD AN AMERICAN NAVY TRANSPORT, Sagami Bay, Japan, Sept. 5.—(AP)—Two lone gray Japanese submarines, one termed by U. S. naval officers the largest in the world, lay moored alongside the American submarine tender Proteus here.

The subs, first surrendered Japanese undersea boats, were being inspected by navy experts.

A submarine prize crew under Commander Hiram Cassidy, of Brookhaven, Miss., brought the 5,300-ton submarine "I-400," into this port within sight of Fujiyama after taking it over from a boarding party from the destroyer Blue.

Both submarines are capable of carrying planes and are equipped with catapults for launching aircraft. But they were principally used to carry supplies to Japanese garrisons on by-passed islands and as anti-submarine boats against the Allies.

First Lt. Harold Martin, of Atlanta, Ga., marine combat corres-

pondent, reported the giant sub is nearly twice as big as America's largest undersea craft, the Nautilus. It has a 10-inch anti-aircraft gun mounted on deck, is powered by four 2,500-horsepower engines and has a cruising range of 50,000 miles.

The giant submersible carried a crew of 21 officers and 160 men when it was taken over by the prize crew.

Both subs were flying black surrender flags when taken. The "I-400" had jettisoned her torpedoes and thrown her planes overboard.

Alert Attention to Personal Cleanliness Helps Curb Polio

(Editor's note: This is the fourth in a series of articles on polio (infantile paralysis) and measures to take in safeguarding against it.)

By ROLAND H. BERG
Written Exclusively for AP
Newfeatures
"Pay careful attention to personal cleanliness such as thorough hand

washing before eating," warns the National Foundation for Infantile Paralysis in its lists of precautions against serious attacks of the disease.

Research indicates the organism can enter the body through the mouth. Previous research disclosed infantile paralysis virus could be found in the bowel eliminations of

many patients. What was not known was how long the virus could be excreted from the human body and whether there might be chronic carriers of the disease similar to "Typhoid Mary" who innocently spread typhoid to hundreds of victims.

Three scientists from Yale university, Doctors Robert Ward, Joseph L. Melnick and Dorothy M. Horstmann, tackled this problem. Stool specimens from 61 patients were prepared and inoculated into monkeys. If the monkeys developed infantile paralysis after injection it meant that the virus was still present in the patient's body. After six months of experiments made possible by the financial support of the National Foundation, the scientists reported that many patients continued to excrete virus from their bodies for as long as two months.

Other scientists demonstrated that virus was excreted in the stools of persons who had merely been in contact with patients and had no symptoms themselves. They estimated that for every person actually ill with the disease there might be ten or more healthy contacts who, despite the lack of symptoms, had the infantile paralysis virus in their bodies and were capable of spreading infection.

At the Polio Research Center established by The National Foundation for Infantile Paralysis at Johns Hopkins university, investigators determined that the virus was frequently present in the throat discharges of patients, Doctors Kenneth F. Maxey, Howards A. Howe, Herbert A. Wenner and David Bodian rubbed cotton swabs against tonsillar areas of polio patients. The material from these swabs produced infantile paralysis in monkeys.

French Women Express Thanks to Pampans for Clothing Donations

Two letters of appreciation were received by the local Red Cross chapter from Frenchwomen who had received wearing apparel through the American Red Cross. The letters were forwarded to the local chapter from St. Louis where they were first received. Since the Pampa chapter was referred to, the letters were sent here.

Persons who have participated in been in contact with patients and had no symptoms themselves. They estimated that for every person actually ill with the disease there might be ten or more healthy contacts who, despite the lack of symptoms, had the infantile paralysis virus in their bodies and were capable of spreading infection.

At the Polio Research Center established by The National Foundation for Infantile Paralysis at Johns Hopkins university, investigators determined that the virus was frequently present in the throat discharges of patients, Doctors Kenneth F. Maxey, Howards A. Howe, Herbert A. Wenner and David Bodian rubbed cotton swabs against tonsillar areas of polio patients. The material from these swabs produced infantile paralysis in monkeys.

The virus may pass from one person to another in droplets of throat secretions loosed in the air by coughing, sneezing and spitting of polio victims. Contamination of food, drink, objects and hands with the intestinal eliminations not only from those frankly sick with infantile paralysis but also from the many persons without signs of illness may be the means of spreading infection.

foreign relief work will enjoy knowing what disposition has been made of the war relief garments contributed by this chapter.

The letters received from the two women were translated by Mrs. Betty Hastings of the local chapter and a Frenchwoman living in Pampa at the present time. She came to the United States in 1939 when war broke out.

One of the letters was written with deep purple ink and was extremely neat, indicating great effort had been made in writing the letter.

The local chapter has had no information as to the part of France from which the letters were written.

The following is a copy of one of the letters after translation: "Thanks to the city of Pampa, Texas, for the package of clothes which was given in the name of the American Red Cross and the French committee.

"In exchange for that, I make the best wish for the children of that generous city and expect they will always be preserved from distress which the war has put to every mother in France.

"At the same time, I express my feeling of gratitude and thanks." This letter was signed Madame Vve Hermeur. According to Mrs. Hastings this would mean Mrs. Hermeur is a widow as Vve in French means widow.

'Pearl Harbor' Has Its Sequel

WASHINGTON, Sept. 6.—(AP)—The army air force lieutenant who told a private to "forget it," when the private detected a fleet of planes approaching Pearl Harbor on Dec. 7, 1941, has been promoted three times since then.

He is Lt. Col. Kermit A. Tyler of Long Beach, Calif., who, the war department said, is now on duty with the 99th AAF base unit at Orlando, Fla., army air base.

Colonel Tyler's promotions: the air force says, were based on his record which has been "excellent and superior in all the jobs he held, including combat."

The private who gave him the warning, Joseph L. Lockard, of Williamsport, Pa., is now a first lieutenant on duty at Port Monmouth, N. J.

At 7:02 a. m. on Dec. 7 the misfortune. My best thanks and gratitude to the persons who gave us this."

Mrs. Hastings said additional workers are needed to help in the making of approximately 900 garters which must be completed and sent to the Philippines in two months.

The local chapter urges anyone interested in making these garments to contact the production chairman, Mrs. R. J. Epps.

Red Cross production rooms in the post office will be open from 1:30 to 4:30 p.m. Tuesdays and Fridays.

"Thanks to the American Red Cross Pampa, Texas, chapter for the package of clothing that was given to me for my children." "It is a very big pleasure to know we are not forgotten in our

radar screen Lockard was watching showed a large formation of planes approaching the island. Lockard checked and rechecked because he was certain there was no flight of planes like that in the air. At the time the planes were 135 miles distant.

He called the information center, reaching Tyler.

"Tyler's answer proved to be a disastrous one," the army board

related. "He said in substance, 'forget it.'"

What is believed to be the first cog railroad in the world was completed on Mt. Washington, N. H., in 1869.

QUICK, HENRY, THE FLIT!

Buzzing flies and mosquitoes are put out of business for good . . . when you spray 'em with Flit!

This efficient insecticide not only kills many nagging household pests . . . but is sure death to the dread, disease-laden malaria mosquito as well!

Detroit Tigers Lead Looks More Formidable As Time Runs Short

Prim and Passeau Pitch Cubs to Double Triumph Over Giants

By JACK HAND
Associated Press Sports Writer

Time is running out on the American League Tiger chasers with Detroit's 2 1/2-game lead looming more formidable with each passing day as the opposition begins to get short on games to play.

It was the old sopher ball that helped Detroit ruin the Yankees yesterday in the first game after they had rallied for three runs in the eighth inning at the stadium. The largest weekday crowd of the season, 51,511 (44,705 paid) watched in awe as Eddie Mayo unloaded a three-run homer off Floyd Benxes, the Yank ace who had been called on to relieve Millman Jim Turner.

After absorbing that disheartening 10-7 pasting in the opener after they thought they had it put away, the Yankees found the Bengals' weakness in the second game. Lefty Joe Page hurled his first complete game of the year, a gaudy three-hit effort that completely bamboozled the leaders, 5-1.

St. Louis and Washington split a pair at Griffith stadium, the Senators taking the opener, 2-1, in 11 innings on Mickey Haefner's five-hitter. The Browns won out, 4-3, in the second game.

Boston all but eliminated Cleveland from serious contention, by beating Bobby Peller, 2-1, in the first of two although the tribe bounced back behind Allie Reynolds, 5-2, for an even break.

Chicago took both ends of a twilight double from Philadelphia, swamping the A's, 15-6, and skinning through, 6-5, in 14 innings.

Lefty Ray Prim and Claude Passeau boosted the Chicago Cubs' National League advantage to 4 1/2 lengths by whipping the New York Giants, 5-2 and 10-2.

Harry (the Cat) Brecheen, St. Louis Cardinals left hander and top hurler in the national loop, earned his 11th victory to three setbacks, by dumping Boston, 4-2.

Brooklyn widened its third place margin over New York to three games by nosing out Pittsburgh, 5-3. Cincinnati gave Mike Modak his first big league decision, 1-0, at the Phillies' expense but the Reds couldn't stand prosperity and bowed, 8-4, to Charley Schanz in the after-dunk half.

Alabama Eleven May Be Football Power This Year

AP Newsfeatures
TUSCALOOSA, Ala.—Alabama's Crimson Tide is expected to take its old place on the gridiron this year with two of the pre-war coaches joining head boss Frank Thomas.

Last year Thomas had rather a rough time of it although he kept the tide rolling with an assortment of 17-year-olds and others "unfit for military service."

Now that aides Hank Crisp and Red Drew are back from the armed forces, football fans are talking of another "Bow!" for bama. They remember that Thomas teams have been in five of the New Year's day classics in 14 years.

Frank's record at Alabama is second to none in the nation. He won 98 games, lost 20 and tied eight. The big fellow smilingly predicts he will have a 15 to 25 per cent better ball club than the one which went into the Sugar Bowl the first day of the year.

Three veterans of the great 1942 team are back, plus 15 boys who performed last year. And Thomas is expecting more military discharges. Watch them go.

BALL PLAYER GETS DFC

Under Secretary of War Robert P. Patterson pins Distinguished Flying Cross and Air Medal on chest of Lt. Bert Shepard at Griffith Stadium. Shepard is a member of the Washington pitching staff despite the loss of a leg in a mission over Germany.

Shamrock Offers Postwar Program

From the day Am-torg, the Russian trading company, placed a frantic rush order with the Shamrock Oil and Gas corporation for trainloads of Iso-pentane to be used by the U. S. S. R. in starting off the German push of 1941, to the more recent conversations to meet requirements of the United States government, the Shamrock refinery has been engaged primarily in producing war fuel needs.

The facilities, technical advancements, and experience developed by this independent corporation during war years are now being converted to the production and improvement of Shamrock's new gasoline and other motor fuels, according to Shamrock officials. These products are handled by independent Shamrock dealers here in Pampa and elsewhere.

To back up its postwar marketing program, Shamrock has released an extensive newspaper advertising campaign. First insertion of which appeared in yesterday's edition of the News.

Scrapping Plans Is Perplexing Board

WASHINGTON.—The biggest problem of the surplus property board is not one of merchandising as might be expected, but the development of a wholesale and efficient scrapping program. Aviation News, McGraw-Hill publication asserts.

"It seems apparent in Washington that there will be pressure with the return of congress for changes in the surplus property act to facilitate surplus disposal," the article says. "The question of whether the present set-up of a three man board should be preserved or a one-man administrator empowered is certain to be a thorny one. It also seems apparent that there will be numerous personnel changes in the surplus property disposal organization to meet one of the biggest and toughest of all postwar problems."

Half a pound of dehydrated carrots is equal to 15 to 20 fresh carrots.

A little ammonia in the water will do the trick if grease and dirt cling stubbornly to your window panes.

Lions, Kiwanians Will Battle Tonight in Climax of Year-Long Feud Between Clubs

Had it not been for a solemn oath on the part of a local Kiwanian that the Sports Editor of The News would get in free, the following piece of libelous literature would never have been made public.

In the softball game of the year, the Kiwanian club of our city will battle the Lions club in a thrilling climax to a year of feud to decide which club will remain in Pampa and which one will be sentenced to 10 years in Amarillo.

The "game" starts promptly tonight at 8 o'clock at Roadrunner park, and despite the first paragraph of this missile, it's all free to the public.

There is only one thing that both clubs agree on. That is that each fan must bring his own pop bottles to throw at the Rotarian umpires—namely Walter Rogers, Dick Hughes and any other member of that organization who thinks he is fleet-footed enough and can out-talk L. N. Atchison and Jack Johnson.

Because we are late today, we must dispense with the formalities and go down the pages of the Social Outcast Register and Who's Who in the penitentiary to give you the names of the "over-21's" that will play for the respective clubs.

Managers Weathered, Atchison and Lawson, of the Kiwanis have released the following names as those who will play:

Droop Troop, Flowsare Weiss, B. V. D. Myatt, Shylock Caylor, Chief Rankin, Dollar Down Goldfine, Blind Tom Fischer Skinny Altman, Morge Langston, Tail Pipe Thorapson, Muddy Waters, Gabby Atchison, Second Best Buckingham, P-TA Laycock, Tank Wells and Bashful Weathered.

For the Raging Roarers Con Man Michel and Big Iron Hickman, managers, have reluctantly released their line-up but have withheld all weights and past performances—they're still remembering the 17-10 pasting they got last year.

Wrong Pit Zachary, Dummy Dickey, Short-tem-up Ben Brown, Slasher Brown, Almost Nasty Bill Hagerman, Songbird Wedgeworth, Carbon McCune, Preacher Bourland, Ragweed Parker, Peachie Teed, Wrong Number Johnson, Lil' Abner Roberts, Lindberg Culbertson—sometimes called Wrong Way—Lodge Brother Hefner, Pedagogue Kelley, High Pocket's Phelps, Gasoline Dunbar and Bat Boy Little Denver Webb.

Knights Capture Softball Circuit Championship

In a game that was protested by Bill Parker, captain of the Pampa Merchants, the Knights of Pythias won the city softball league title with a 6 to 5 win over the Merchants last night.

It is not known at this time whether the game will be played over.

At the end of three innings of play last night, the Merchants and a 2-1 lead over the Knights but after each had scored once in the third, the Knights came back in the sixth to push across three runs and take the lead.

In the seventh and last inning, after the Knights had scored one run in their half, the Merchants pushed across a run and after two were out, protested a decision by an umpire that a runner trying to steal home was tagged out when he attempted to go back to third.

Gage hurled for the Knights and allowed the Merchants eight hits as he struck out five and walked four. Ripley was in trouble most of the way as he walked seven men while striking out two and allowing five hits.

Legislation To Urge Enlistment

WASHINGTON, Sept. 6.—(AP)—Legislation intended to encourage enlistments in the regular army was approved Wednesday by the house military committee.

It probably will come before the house for a vote next week.

Generally, it contains these provisions:

Permits enlistments for two or three-year terms.

Enables men re-enlisting to obtain their mustering-out pay immediately without waiting for their new term to end.

Provides for 90-day furloughs home for men re-enlisting, with the army paying travel expenses of five cents per mile.

Extends benefits of the G. I. bill of rights to men enlisting for the duration of the new enlistment period.

Continues the 20 per cent bonus for overseas service and liberalizes existing reenlistment bonus incentives.

Allows army personnel to retire at half pay after 20 years of service, the same as the navy now allows. The army heretofore has permitted retirement only after 30 years, and then at three-fourths pay, except in exceptional cases. The legislation retains the present 30-year retirement plan.

In approving the legislation, the committee sidetracks indefinitely proposals to end or curtail the draft before its normal expiration date of next May 15.

Jap Envoys Remind Boyle of Gilbert, Sullivan Characters

By HAL BOYLE
 USS MISSOURI, Tokyo Bay, Sept. 4.—There were tingling moments of high drama in the 18-minute ceremony during which Japan bound herself to lay down her arms unconditionally and bow to the dictates of the Allies.

when General MacArthur walked up the gangplank and moved across the deck with a stride lithe for a man of his years. You could feel the intensity of this man stimulate the crowd like a current of electricity. It was MacArthur's hour of a lifetime and he had prepared for it by almost half a century of military service.

The next moment of emotional impact was the arrival of the Japanese delegation — four in civilian dress, seven wearing navy or army uniforms. They stood waiting MacArthur's pleasure like stone gargoyles. To the Western eye they looked like cartoon characters from Gilbert and Sullivan's "The Mikado."

Their stolid features showed neither guilt nor regret, pain nor resentment — only an abiding, watchful animal-like patience. You felt that only time would reveal what that patience stood for.

"How did those little men ever think they could get away with it?"

one white-uniformed sailor whispered. Next highlight was when MacArthur began signing the surrender document. He turned to General Wainwright with a warm smile and handed him the first of the six pens he used. Then he looked deliberately, steadily and coldly at the Japanese before going on with the signing. That gesture was for Bataan, for Corregidor — and the Japanese caught its significance fully.

Silence fell over the spectators as the two Japanese signatories put their names to the document. They signed with Oriental slowness. Doffing his black silk topper, Foreign Minister Mamoru Shigemitsu sat with his wooden leg stiffly extended before him.

The right hand of Gen. Hoshijiro Umezo, Japanese army chief of staff, shook slightly as he added his signature. Noting the rainbow row of ribbons on his dress uniform, one American spectator wisecracked: "Whipped everybody but the United States."

"Let us pray," said MacArthur, "that the peace be now restored to the world and that God will preserve it always. These proceedings are closed."

The worldwide blood bath at last was at an end.

Next came the spine-tingling climax. Forty-six great-winged superfortresses swept over the fleet like high, graceful birds. And behind them roared the Third fleet's fighters, dive bomber and torpedo planes.

They flew over the massed decks of the Missouri in wave after wave after wave, until the whole bay throbbed. The battleship almost seemed to rock with the sound of their passing. There never was a more stirring flight and it shook the hearts of the sailors and soldiers.

It choked them with the pride of kinship in victory and made them feel as if they were swallowing their stomachs.

You felt, in your whole being suddenly, how peace had been grandly won — by the toil and blood of those airmen in the sky and their anonymous battle brothers of the earth and of the waters, lying in land graves and sea graves around the world.

The planes came on and on relentlessly. You felt that the nation that produced them could send them on and on forever, until it achieved any noble purpose, any peace, however difficult.

SIDE GLANCES

BY GALBRAITH

"Everything happens to me, mother — hay fever season, and so many service men coming home!"

English Ration Not Increased, It Is Lessened

Britain's most impatient queues form at pushcarts for purchases of ice cream, cherries and strawberries, munching which Englishmen forget the disappointment of less food after victory in Europe.

As in most of Europe the British people looked forward to the day of peace as the turning point from scarcity to plenty. It was felt that carefully hoarded war stocks could be released and a better flow of supplies maintained.

There was undisguised disappointment when rations were reduced rather than increased after VE-Day. Europe had to be fed.

Britons are an uncompromising breed. They look the cut, voiced their disappointment and queued up for the luxury of ice cream and native-grown fruits. They felt better then.

When I left London recently the British were eating the same tasteless sausages, heavily breaded hamburgers, dried beans and cabbage or brussels sprouts that formed their diet when I first arrived during the days of blackouts and air alerts.

Fresh fish had become more plentiful because trawlers were back on the fishing grounds instead of on patrol. The apple crop in the extensive Kent orchards was coming along fine, and pears promised to flow plentifully to market despite a late snow that reduced the prospective yield.

But in the shops the people re-

ceived smaller rations of meats, margarine and other "coupon" foods. Under the British rationing system, however, everyone received his due.

In the United States grocery shoppers may spend their points at any store. In Britain a shopper must register with the store of his choice and do all his food buying there. The store is allotted supplies to meet the needs of all registered customers, however, so each is assured of his full ration, a helpful situation which American housewives complain isn't true in the United States.

Luxuries are lacking in Britain. There are no fruit juices, nothing like bottled olives. Coffee and cocoa are rationed but tea is frequently scarce and always tightly rationed. There is enough sugar. British fathers are sometimes

heard to describe to their offspring how a banana looks and tastes, and why the skin can't be eaten.

Pushcart vendors sometimes offer peaches for sale.

Guatemala is the northernmost of the Central American states.

Motor Industry To Handle Vets

AUSTIN, Sept. 6.—The motor transportation industry in Texas has prepared itself to handle the return of more than 10,000 experienced employees from the armed forces without any reduction of current personnel schedules, Lynn B. Shaw, general manager of the Texas Motor Transportation association, said here today.

"The industry has worked short-

handed throughout the war years," Shaw said, "and motor carriers are confident that the employment situation will rapidly stabilize itself with the return of war veterans who, because of their military experience, will be better prepared to face the reconversion period."

Shaw said plans were being worked out to guide and counsel the returning veterans and bring them up to date on the industry's postwar problems and opportunities.

Fleet supervisors courses will be held next March at Texas A. & M. college in conjunction with other motor transportation organizations, intensive safety programs are to be staged, and T. M. T. A. is cooperating with the University of Houston in planning for driver training courses to be held in December.

More than one-tenth of the output of sulfuric acid in the United States is produced in the New York City area.
