

Board Further Vests Power in Political Hands

By SAMUEL B. PETTINGILL
Ex-Senator from Indiana

Instead of building up the power of government over labor unions, we should build down the power of unions over government.

President Truman has acted with courage, but it is not likely that his course will long please anyone, himself included.

He wants the fact-finding machinery of the railway labor act applied to big industry—steel, petroleum, automobiles, etc. On the face of things, this looks smooth and shiny, but below the surface there are vital differences.

The railroad labor brotherhoods are old in the game; their leaders are experienced, responsible and American. None, like Reuther of the Automobile Workers and Hillman of the C. I. O., served an apprenticeship in Russia.

In addition, the railroads are public utilities. Their prices (freight and passenger rates) are controlled by the interstate commerce commission. The trains must run. They cannot postpone their service.

Now has the act been a howling success from the standpoint of fairness and impartiality. Quite the contrary. Most of its fact-finding boards have been pro-labor and were intended to be.

Thousands say famous doctor's discovery gives blessed relief from irritation of the bladder caused by excess acidity in the urine

Who suffers endlessly from backaches, run-down feeling from excess acidity in the urine? Just try DR. KILMER'S SWAMP ROOT, the renowned herbal medicine. SWAMP ROOT acts fast on the kidneys to promote the flow of urine and relieves troublesome excess acidity. Original formula created by a practicing physician, Dr. Kilmer's is a carefully blended combination of 16 herbs, roots, vegetables, balsams. Absolutely nothing harsh or habit-forming in this pure, scientific preparation. Just good ingredients that quickly act on the kidneys to increase the flow of urine and ease the uncomfortable symptoms of bladder irritation.

ten upward.

A railway strike was threatened two years ago. We witnessed the unifying spectacle of President Roosevelt and congress acting to overrule the decisions of the presidential boards and of Economic Stabilizer Vinson himself.

Does Mr. Truman, as President, think that other senators will not follow the precedent which he established as senator? It is a vain hope.

No, the Truman move is in the wrong direction. If further concentrates economic power in political hands, which is the essence of fascism. If congress passes his bill, it will have brought down on its head (and on the White House) intolerable pressures that will sink

them up to their necks in every major wage dispute from now on.

Wake questions will enter every campaign in congress. Congress and the White House will be impetioned to "pack" the fact-finding boards, to pressure them when appointed, to overrule them when they have acted.

In the frame of the present political picture, I have small confidence that the new "fact-finding" bodies would command public confidence—the only justification for them at all.

Take the questions whether corporate profits should be assigned by compulsion to labor, and to what extent, if at all.

No, this is one more step away from American Jeffersonian democracy and toward European socialism, fascism, or communism.

Texas Today

By JACK RUTLEDGE
Associated Press Staff

This is a day commonly known as New Year's Eve. Tomorrow is New Year's Day, usually full bowl games, resolutions, and handovers.

Also, today is the last day you can use the "I-won't-get-another-haircut-until-next-year" gag.

State police won't be able to celebrate tonight, but everyone else probably will. The police have to take care of those who plan to have fun.

They warn that a heavy traffic jam is anticipated, maybe heavier than around Christmas, and plead with those who have taken on too many rum and coca colas not to drive automobiles.

After all, others may want to live a while and see what 1946 is going to offer.

Among things that can be depended upon definitely are income taxes (due in a couple of months), new telephone books, and new automobile licenses.

The New Year is an election year, too. Fireworks.

The fond dream among women is that 1946 will bring nylons. They'd rather have nylons than anything else the bright postwar world has to offer.

The year starts off as a year of peace and everyone hopes fervently it will stay that way. Even women pining for nylons want peace more than anything.

The year 1946 looks good, with only one slight shadow—a possibility of unemployment.

But that's looking to the future—today and tomorrow let's have fun.

And don't forget—when you sign checks tomorrow, it's Jan. 1, 1946.

There is a difference in cleaning. Try us and be convinced.

Texas Production Boosted to Meet Shortage of Fuel

Texas daily oil production was boosted sharply last week by the railroad commission to meet an acute shortage of fuel oil for heating.

The commission set the January daily production at 2,077,175 barrels and indicated that the allowable production would be increased during the month if demands were not adequately met.

The commission's January proration order permits a maximum daily output of 2,122,000 barrels of crude oil, but estimated under production of 4.5 per cent of the allowable

would reduce the probable average production of 2,037,175 barrels. Indicated production of 160,250 barrels daily of natural gasoline and distillates would increase the state's total liquid petroleum production to 2,187,434 barrels.

The next proration hearing was set for January 11, early enough to hear and act on reports of whether or not the increase was enough to meet fuel oil demands.

The allowable increase for January was issued by the commission in face of a sharp decrease in the estimate of the bureau of mines. This estimate was 1,775,000 barrels daily, a reduction of 165,000 barrels daily from December, and 252,175 barrels less than was ordered for the month of January by the commission.

Women Make Good Financiers, Says Head of Colorado Brokerage Firm

By ABELAIDE KERR
AP Newsfeatures Writer
The twentieth century offers women a big future as investment counselors if they will take time to train adequately and work hard enough, says one who has spent the last 25 years in the field.

She is Mrs. Arlene Hughes, head of E. W. Hughes & Co., Colorado Springs, brokers and investment counselors, which maintained a Wall Street branch office until Mr. Hughes' death in 1939. Mr. Hughes, who is also director of a dozen utility and general service companies in New York and the west, comes to New York about four times a year.

"Women have certain qualities which fit them peculiarly for the investment field," she said during a recent New York visit. "If a person's funds are to be wisely invested and handled, his personal life and problems have to be considered. That means such matters as his health, the way his marriage is going, the way the children are behaving, etc. These matters can present some thorny questions, but there is always a way out, if you will take the time.

"That is the reason I think women can be of special value. They are generally more painstaking and patient, more inclined to bother with the problems of human nature than men. People bring me a lot of personal problems they would not talk over with a man. I have as many men clients as women and I find they have as many of these problems as women do.

sizeable such as cash available to use if he needs it. If a man has an irresponsible son, it is better to leave his inheritance in trust, rather than to bequeath it to him outright."

Mrs. Hughes warns, however, that both courses of study and long of office experience are necessary to fit an investment counselor for the job and that women who consider entering the field must be willing to give years to preparation.

Mrs. Hughes is a handsome woman with dark eyes and pink cheeks. Jewels flash on her fingers and in her ears. She came to her present position via the road of hard work. She was working as secretary-stenographer in Denver and planning to go to South America, when a friend told her that E. W. Hughes, broker, was looking for a secretary and suggested she apply for the job. She did—and got it.

A few years later, in 1923, she was married to the boss, and in 1928 he opened his own firm in Colorado Springs. Gradually the brokerage business extended to investment counseling and banking. After the firm's Wall Street branch was opened, Mrs. Hughes ran that and Mrs. Hughes concentrated on the western office. She hasn't reached South America yet.
