"Although I am not a candidate for the office in the Democratic primaries, I am still just as interested in the success of a well balanced farm program.

"It is my honest belief that LeRoy LaMaster, of Perryton, is the best qualified candidate in the race to represent the agricultural interests of the district, and I would like to recommend him to the voters of the district who are keenly interested in the type of representation Mr. LaMaster is capable of rendering.

"I feel so strongly that Mr. LaMaster is the best qualified candidate that I may, at a later date, take time from my farm and ranch duties, to actively campaign in his behalf."

Its not recommended for everyone, but Mrs. Louella Gallagher has a "sure fire" method of teaching discipline to her children. She throws knives at them—or, rather, all around them.

Mrs. Gallagher and her three

daughters are feature attraction at the Alamo Exposition Show which is in Memphis this week. The three girls are: Connie Ann, 8 years of age; Colleena Sue, 6, and Carrol Kay, 4.

This family act has attracted national attention. Memphians might recall seeing Mrs. Gallagher in action with her knives in a Universal International newsreel which ran at a local the-

Light Wheat Harvest Expected In Hall County

Hall County probably will produce only one-fourth as much wheat this year as was harvested in 1949.

With harvest activities scheduled to begin around June 5, latest estimates indicate that the county yield this year will be between 125,000 and 150,000 bushels—perhaps less.

The county has 30,196 acres of wheat planted. Allotment for this year was 32,285 acres.

A record crop of about 549,000 bushels of the grain were harvested in 1949 on 42,000 acres.

PMA Secretary Lynn McKown said this week he doubts if the average yield will be over five bushels per acre and may fall down to four.

"The unfavorable weather dur-

ing the late winter and spring plus the fact that there are some 11,000 acres less wheat this year is bound to make the harvest fall far below the 1949 level," he said.

McKown estimated that about 20 percent of the seeded acreage has already been abandoned in Hall County. County and state agricultural officials predict that this area will produce only 50 percent of the seeded acreage.

The Wheat Harvest Control Office of the Texas Employment Commission says that Texas will have the smallest harvest since 1936.

Total production is estimated at from 15 to 24 million bushels as compared to 102 million bushels in 1949.

"The area comprised of Hall, Childress, Donley, Collingsworth and Wheeler counties will harvest approximately 50 percent of the seeded acreage," TEC officials say. High plains Panhandle counties have suffered worst this year and abandonment in many areas here runs as high as 90 percent, according to the TEC.

The harvest is scheduled to begin about June 1 in the Dallas and Wichita Falls areas and work north. The TEC warns all harvest workers that outside will be needed only in the Wichita Falls area and that very little of it will be needed there.

LAKEVIEW GIRL TO GRADUATE AT WAYLAND

Miss Addie Fisher of Lakeview will be one of 23 August degree candidates at Wayland College, Plainview, it was announced this week.

Graduates from Wayland this year during the mid-term, spring and summer exercises will include some 66 students, college officials said.

Dean R. E. Mendenhall announced the graduate list.

THE MIDDLES By Bob Karp

SMOKING BANNED AT WAYLAND; PROF LASHES AT IMMORALITY

How're your morals, high school graduates? Better check 'em closely if you plan to enroll in Wayland College at Plainview. Officials of that college issued some strong statements on the subject this past week.

Dr. R. L. Dodson, head of the Wayland Bible department, took a verbal poke at sexual immorality in chapel on May 19.

"We must desire to be saved from sexual immorality and its terrible results," he said.

"To be saved from this great sin we must abstain from attending immoral movies, from reading sexy, trashy literature and must absolutely stay away from modern dances."

Dr. Dodson said that to remain pure and clean, we must abstain from promiscuous kissing, "petting," and "necking" which have become so popular and common-time or place.

The college is also tightening its standards on its students personal habits.

Students who smoke will be asked not to enroll at Wayland, the college trustees announced this week. This action was taken following a recommendation by President J. W. Marshall.

They also voted to bar the employment of any teacher who smokes, drinks, dances or gambles.

"We are not infringing on students' freedom or asking them not to smoke," Dr. Marshall declared. "We simply are saying that they are free to go to some other college if they want to smoke."

The trustees last year voted to ban smoking on the Wayland campus. This latest action goes further by requiring that no student, teacher or staff member of Wayland College smoke at any time or place.

McKown, Hooser Attend District Cotton Meeting

County Agent W. B. Hooser and PMA Secretary Lynn McKown were in Childress attending a two-day conference of agricultural agencies of this area Wednesday and Thursday.

The meeting was concerned with the procedure to follow in the cotton measurement work which will begin on June 1 they said.

Horace Leggett, field officer for PMA, and Peggy Mitchell, P-

MA performance clerk, also attended the meeting.

Mr. and Mrs. Wyley Whitley were among guests who enjoyed an outing Sunday at the Bob

Glenn ranch near Wadley. The group enjoyed fishing the day and a bounce served at the noon hour. Democrat Want Ad

Coon Hunters Find Variety In The Sport

Sportsmen, if you want a little variety, try coon hunting. There's no telling just what you might end up bringing back.

At least, this has been the experience of several local young men during the past few weeks.

Four of them made their first unusual catch several weeks ago. Jack Monzingo, Jack Childress, Robert Haney and James Morris were coon hunting on the Finch Ranch near Hedley when they found a large nest which they investigated.

They discovered two young birds which they believe to be Golden Eagles. The mother was in the nest at the time but was scared away by them. The young birds were taken to Monzingo's farm south of Memphis where they now have them in captivity.

Morris and Monzingo actually found the nest several weeks prior to this capture, soon after the birds were born or hatched, depending on the way you look at it. Therefore, they can fairly accurately judge their age at several months.

One of the birds has a wing span of approximately seven feet and the other—a week or so younger—is slightly smaller. The birds have dark feathers with white spots on their heads and neck.

The latest victim of their coon hunting is a bobcat which Monzingo and Morris killed on the Finch Ranch May 23. The big cat was found by their hunting dogs. None of the dogs were killed although Monzingo said one of his was injured by the bobcat.

VET PROBLEMS AND ANSWERS

Q—My husband, a World War I veteran, receives a pension for nonservice-connected total disability. He has an income of about \$2,000 and I have an income of about \$3,000. Must I include my income with his in reporting to VA?

A—Your husband will report only his income. Yours has no bearing on his rights.

Q—I have completed a course as mechanic under the GI Bill but my health is bad and I now wish to use the balance of my education and training entitlement in a course to be a farmer. Can I do this?

A—Since the two courses are

in unrelated fields, you will have to undergo advisement and guidance by VA to determine your aptitude for, and need of, the new course.

Q—My estranged wife was granted an apportionment of my World War I compensation. Can I do anything to stop payment of the apportionment?

A—You may apply for relief by means of a special apportionment to be adjudicated to the basis of

undue hardship. Your nearest VA office will assist you in preparing a communication for your signature. It should explain fully the reasons for your objection.

Q—Does the age of the wife of a Spanish-American War veteran have any bearing on her eligibility for pension as a widow?

A—If she married the veteran prior to January 1, 1938, and meets all the other eligibility requirements, her age has no bearing on the entitlement to pension.

MEMORIAL Day

As the Stars and Stripes dips in tribute to those who died, and the bugle blows its mournful "taps", we pause to honor once again the brave sacrifice of those who fought so gallantly to preserve the freedom we hold dear. WANT TO PAY FRIENDS HADACOL DOESN'T HELP

HADACOL HELPS SUFFERERS OF VITAMINS B₁, B₂, NIACIN AND IRON DEFICIENCIES

Wallace tells her granddaughter, Maynell Wallace, over the HADACOL brought relief to her.

Wallace, 449 Formosa, W. Atlanta, Ga., is a mother of five children. She has brought her that recommended HADACOL to her friends. She would pay for their HADACOL if it didn't help. She explains with a smile that she hasn't had to pay for her friends, because HADACOL has helped them.

Wallace, who is 74 years old, has seven children, seven grandchildren and two great-grandchildren. She was suffering from a deficiency of Vitamins B₁, B₂, and Iron, which HADACOL cured.

Wallace said: "I couldn't sleep until I started taking HADACOL. I'd lie awake and toss and turn for hours. I was highly nervous. I even thread a needle. I've been taking HADACOL for several months and my nerves are as steady as a rock. I couldn't eat because my stomach would puff and fill with gas. I am now eating as much better."

Appetite Good
I have a good appetite and my stomach does not bloat or fill up like a log. I recommend HADACOL to all my friends and have had it for several months. If it didn't help me, I wouldn't have taken it. I know because HADACOL is better than anything else I have taken."

People who want to get around the cotton acreage restrictions by raising long staple cotton had better think about it a while first. First of all, you have to get permission from the PMA, which wants to be sure the cotton you plant will produce staple of 1 1/2 inches or longer. Already it is too late for most of it, and it takes special ginning, too.

QUININE

The old Peruvian word for the Cinchona tree is Quinine—and that is the name Pierre Pelletier and Joseph Caventon, two French scientists, gave to the chemical which they isolated from the bark of the Cinchona tree in 1820. It is one of the five most important alkaloids obtained from this bark and since its discovery has been largely used in the cure of Malarial Fevers.

Center Line Is Important For Driving Safety

Motorists!

resulted in an estimated economic loss of \$34,710,600 during the year 1949. Taking note of this tremendous toll of human lives and property, a safety-conscious Highway Commission has decreed that every possible measure within the power of the Highway Department be applied to make Texas highways as safe as possible for all who use them. The decree of the Highway Commission was not on idle one; it was backed by an appropriation of \$500,000 for center lines, lane lines, and barrier lines for no-passing zones during the year 1950 alone. This sum will be applied on some 25,000 miles on the State Highway System on which the center lane lines marked and about 23,000 miles on which the barrier stripes for no-passing zones are marked. These lines are just one of many weapons the Highway Department is employing in the battle for traffic safety.

Have you as a motorist ever thought of the meaning a center line on a pavement should convey to you? It should tell you that the right-hand half of the road is yours; it should tell you that it was not put there as a challenge to your driving skill to keep one wheel on it; and it should tell you that when you cross it to overtake and pass another you should be sure the other half of the road ahead of you is clear.

Failure to observe the simple but important meaning of the center line can result in a tragic end for you. Last year (1949) on rural highways there were 3,625 accidents caused by thoughtless drivers who were on the wrong side of the road, and they were not even in the act of passing another car—just driving on the wrong side of the road for no good reason whatever. These needless "on-the-wrong-side-of-the-road" accidents cost the lives of 253 people; maimed and injured 2,316 others; and caused property damage of \$7,927,400. Take a good look at that center line when you drive and think what it can mean to you.

An what happened to those who made a mistake in passing another car when the road ahead was not clear? These mistakes cost the lives of 46 people, maimed and injured 462 others and added more thousands of dollars to the toll of property damage. It is

Liberty Bell Will Be Here For Two Hours

An exhibit of historic importance will be shown in Memphis on Wednesday, June 7, when a full scale replica of the original Liberty Bell will be shown.

This exhibit is a feature of the Independence Drive for United States Savings Bonds, James F. Smith, Hall County bond drive chairman, said.

The bell's appearance here will be sponsored by the Simmons-Noel American Legion Post and will be on display from 9 until 11 a. m.

Smith said the exhibit will be held on the square and that the exact location will be announced soon.

This is a nationwide exhibit with 52 bells being shown in the United States and its territories. At the conclusion of the drive, the bell will be given to the states in which they are on exhibit for permanent display.

The Ford Motor Co. is co-operating with the Treasury Department in furnishing transportation for each of the bells on display. Eddie Foxhall, local Ford dealer, said he will give Smith and the Hall County bond drive committee all the assistance possible in order to make the exhibit a success.

HERE'S THE BUICK SPECIAL 4-door Sedan, de luxe finish. The same body type is available on SUPER Series.

"YOU HARDLY KNOW THE ROAD IS THERE!"

You won't be the first to say that—not by a long shot.

One of the first things you notice, when you step from another make of car into Buick, is the wonderful difference in the Buick ride.

There are good technical reasons, if they interest you...

Soft coil springs all around, the gentlest type of spring man knows how to make.

A stout torque-tube, acting like the husky keel of a battleship to steady the whole carriage.

Low-pressure tires on wide, Safety-Ride rims, that stop heel-over and sway on curves.

Firm, sure, quick-acting shock absorbers, promptly snubbing the after-bounce of the bigger bumps.

The important thing is what these all add up to.

Freedom at last from jounce and jiggle. A level, floating, road-free passage over almost any kind of road, with even the worst of them tamed and gentled as never before.

Add Fireball power to all this—the roominess of wide, deep seats—the lightness of Buick controls and the liquid silkiness of Dynaflo Drive*—and you have a car just too good to miss.

Come try one, won't you? Your Buick dealer will be delighted to demonstrate without obligation—delighted to show you that if you can afford a new car, you probably can afford a Buick.

*Standard on ROADMASTER, optional at extra cost on SPECIAL and SUPER models.

ONLY BUICK HAS Dynaflo AND WITH IT GOES: HIGHER-COMPRESSION Fireball valve-in-head power in three engines. (New F-263 engine in SUPER models) • NEW-PATTERN STYLING, with MULTI-GUARD forefront, taper-through fenders, "double bubble" taillights • WIDE-ANGLE VISIBILITY, close-up road view both forward and back • TRAFFIC-HANDY SIZE, less over-all length for easier parking and garaging, short turning radius • EXTRA-WIDE SEATS cradled between the axles • SOFT BUICK RIDE, from all-coil springing, Safety-Ride rims, low-pressure tires, ride-steadying torque-tube • WIDE ARRAY OF MODELS with Body by Fisher.
