25 Applications Received for CC Labor Survey Here

Twenty-five applications were received by this morning for the labor survey that is being conducted by the Chamber of Commerce...

and officials of the civic organization feel that ladies in this group may have hesitated to send in applications, thinking they lack experience in garment work...

Local Softball Teams Play Close Contests

All teams in the summer Little League softball program here saw action last week, according to Ted Myers, summer recreation director...

One of the matches pitted the Cardinals against Parnell on the latter's diamond Saturday afternoon. The Cardinals came out on top, 10-8...

Jimmie Winters, Tommy Snowdon, Jerry Burnett, Swayne McCauley, Charles Massey, Roger Crooks and Morgan collected hits for the Cardinals...

In another contest, the Eagles defeated the Chiefs by a narrow 7-6 margin. Perry Wright, Bennie Spear, Bunky Adcock, Teddy Barnes and Kenneth Allison scored for the Eagles...

Area Weather Crop-Growing Kind Weather during the past week in this area has generally been the kind to get crops up and to keep them growing...

At other points in this section, showers Sunday night were said to have ranged from around one-half to three-quarters of an inch...

Most farmers have finished planting their cotton, and many have either planted feed, or are doing so. On the other hand, some do not expect to plant their feed before next week...

Temperature extremes, as recorded by McMickin, were as follows: last Thursday 68-96 degrees; Friday 67-83; Saturday 67-109; Sunday 72-98; Monday 68-94; Tuesday 69-98; and Wednesday 68-98...

Injured Break Mishap Day Morning persons suffered minor injuries Sunday morning in an accident involving three automobiles...

Two Memphis boys and one Lakeview boy returned home Saturday after attending the annual week-long Boys State meeting in Austin, Hubert Dennis, commander of Simmons-Noel American Legion Post, said this week...

Paul Wilson and Mike Montgomery attended the state-wide gathering from Memphis, and Ronnie Bailey from Lakeview.

The bus in which the youths made the trip to Austin, stopped at Childress to pick up boys from Wheeler, Canadian and Childress, then continued on to the Capitol City by way of Brownwood...

After being assigned to dormitory rooms at the University of Texas, Wilson's group visited the Capitol building, which in the Memphis boy's words, "really was beautiful inside..."

Activities Sunday included getting acquainted and organizing the Longhorn and Pioneer parties, the two mythical political groups into which the boys were divided...

Farmers Receive Over \$167,000 in Conservation Pay

Five hundred and thirty-three of the 1,103 farms in Hall County participated in the Agricultural Conservation Practices Program in 1955...

County farm land totaled 661,484 acres, and 401,096 acres were included in the ACP program. The latter figure was composed of 163,072 acres of cropland and 238,024 acres of pasture...

Money earned in major conservation practices, total work done, and number of participating farms were as follows: Terracing: \$52,573.92 for 7,612,593 feet on 270 farms...

Deep plowing: \$39,922.00 for 79,844 acres on 271 farms. Brush control: \$3,599.57 for 773.6 acres on 11 farms...

Livestock water dams: \$2,778.21 for 15 structures on 11 farms. Diversion terraces: \$2,074.56 for 51,864 yards on 19 farms...

Plans for the second annual Fourth of July fireworks display in Cyclone Stadium here are progressing satisfactorily...

Edwards said that approximately \$400 had been collected by Jaycee members and that all of the money will be used for fireworks...

This year's exhibition is expected to be bigger and better than the previous one because of experience gained in staging last year's event...

The show is free to the public and is scheduled to start as soon as it becomes dark enough. A concession stand will be in operation for those who want cold drinks, candies, and other refreshments...

Last year, an estimated 2,500 to 3,000 persons were in the stands and on the field at the stadium, to witness the pyrotechnical display. An unknown number of automobiles jammed the nearby baseball park and lined the highway...

Mr. Cope was a member of a pioneer Hall County family, and his father was a Baptist minister. He had been with the utilities company for more than 30 years...

Thursday in the work of their offices, and that night heard University of Texas representatives explain how to enter college, then spent a while at a Senate meeting...

Friday, Wilson's group marched to the Capitol building, where they occupied the Senate chambers for a meeting in the evening. Boys State delegates enjoyed some special entertainment...

Saturday morning, a closing program was held before delegates checked out prior to returning home. A total of 519 boys from all parts of Texas attended the Austin meeting...

The gathering is held annually to train better leaders for better governments of the future. Not all activities were on the more serious side, as the program included song fests, band concerts, and football, softball, basketball and volleyball contests...

Firman Haynie, former Wellington resident, was chairman and director of Boys State, and Ernest I. Kelly was assistant director. The boys spent more time

County A.S.C. Office Here Releases Soil Bank Data

Invited Area Golfers To Participate in Tournament Here Golfers from five area towns have been invited to participate in the Memphis Country Club Invitation Tournament here Sunday...

According to Homer Tucker, chairman of the local tournament committee, approximately 80 men and boys are expected to enter the one-day, 18-hole contest...

Starting at 7:30 o'clock Sunday evening, all men who play in the tournament will be guests of the local club at a dinner in the club house. Members who do not play in the tournament have been invited to be present at the social affair...

Ace Gailey will be in charge of registration, and his committee will contact all local golfers prior to Sunday. Other members of the tournament committee are Lee Brown, Frank Foxhall, Louis Saied, Jim Beeson and J. W. Coppedge...

Plans for the second annual Fourth of July fireworks display in Cyclone Stadium here are progressing satisfactorily...

Cotton Growers Must Make Applications July 2 to 20

Hall County cotton producers who wish to participate in the 1956 Acreage Reserve Program under the Soil Bank Act have from July 2 through July 20 to submit applications...

According to McKown, 15 cents a pound will be paid on not more than 150 pounds of cotton per acre. On wheat, the payment will be \$1.20 a bushel on a maximum of 9.7 bushels per acre...

Community ASC committees will meet next week to determine the yield factors for all farms in Hall County, the ASC official said. Maximum cotton and peanut acreages that can be included in the program, cannot exceed 50 per cent of the allotment, or 10 acres, whichever is larger...

Elmont Branigan New Lion Head Elmont Branigan headed the group of new officers who were installed at the regular Wednesday noon luncheon of the Memphis Lions Club...

Others taking office during the ceremonies were W. E. Leslie, first vice-president; Lynn L. McKown, second vice-president; H. E. Craig, third vice-president; Billy Ray Jones, secretary; Doyle Fowler, treasurer; and R. A. Massey, Lion tamer...

A tail twister will be appointed at a directors' meeting Wednesday. Those who put land in the acreage reserve must control the spread of noxious weeds, specified by the state ASC committee, without compensation...

Mr. Phillips, 36 years old, died Sunday morning at his home near Muleshoe. He was engaged in farming at the time of death. Born in the Harrel Crapel community, April 7, 1920, he grew up there...

He was married to Miss Jennie Bell Harper, and the couple made their home at Esteline several years before moving to Sudan, from where they moved to Muleshoe two years ago...

Mr. Phillips was a Hall County resident for 32 years before going to the Plains. A member of the Baptist Church since the age of nine, he was a deacon in the Muleshoe church...

Among survivors are: his wife; a daughter, Kathy Phillips of Muleshoe; and his parents, Mr. and Mrs. O. D. Phillips of Memphis...

Also surviving are: five sisters, Mrs. Roy Widener and Mrs. J. N. Helm, Jr., both of Memphis, Mrs. W. O. Clark of Lakeview, Mrs. B. T. Henderson of Kirkland, and Mrs. Bill Elsberry of San Diego, Calif.; and five brothers, Cecil, Orval, R. B., Ray and Troy, all of Memphis...

Fourteen Scouts of Troop 36 at Hedley arrived back home Saturday evening following a week of outdoor activities at Camp Ki-o-Wah near Canadian, Scoutmaster Ted Myers said Tuesday...

While at the camp, the boys enjoyed boating, canoeing, fishing, archery, marksmanship, hiking, nature and camp craft. At a Court of Honor on Friday night, Don Cox received a Life Scout award, and merit badges in swimming, nature, citizenship in the home, and citizenship in the nation...

Lloyd Messer was awarded a merit badge in scholarship, and Leonard Mullins was presented with one in grasses, legumes, and forage crops. Scoutmaster Stotts and Scout Cox both received the Brotherhood honor in the "Order of the Arrow." This is one of the highest Scout honors awarded by a region...

Saturday, all troops participated in a variety of events. Troop 36 won first place in boating, and fourth place in archery. Don Cox was the only Scout from his troop entering and swimming the Aqua Mile, which as may be inferred, is a one-mile swim...

Scouts attending the camp, other than those previously mentioned, were: David Moreman, Roger Messer, Rusty Mosley, Johnny Brown, Doyle Baggett, Dickie Moffitt, James Younger, Monte Paul Rogers, Doyle Clendennen, and Tony Jenkins. Scoutmaster Stotts and the Scouts wish to thank those who provided transportation for the group...

Murder Charge Filed Against Former Resident

Dr. E. H. Boaz, former longtime Memphis resident, was charged with murder with malice Sunday, after a 29-year-old Army sergeant was found shot to death Saturday night in the physician's home at Mineral Wells...

The dead man, Sgt. 1/C Elmer Shaffer, died from a rifle bullet wound through the heart. Shaffer, who was stationed at Wolters Air Force Base near Mineral Wells, was shot in the living room of the Boaz home...

The two families apparently had been together all day Saturday, according to an official. Boaz started drinking, the official continued, and when he became unruly, Shaffer attempted to reason with him, and moments later was mortally wounded by a bullet from a .32 caliber rifle...

The bullet crashed through the serviceman's right side, heart and left arm, but as he slumped to the floor, he cried to the women and children to get away, officers said. All escaped unharmed. Boaz surrendered without resistance and was placed in the Mineral Wells city jail...

Later, in a statement to a law enforcement official, the retired doctor admitted killing a barber at Dallas about 1918 or 1919, for which he received a penitentiary sentence. He also said he served time, after he was found guilty of shooting at Sheriff W. C. Anderson and City Marshal C. B. Hume here in 1940...

Boaz practiced medicine in Memphis from 1915 to 1942. He later lived at Childress, before going to Mineral Wells about five years ago. No person will be eligible for compensation under the program on any farm where the 1956 cotton acreage exceeds the allotment, or the 1956 wheat acreage exceeds the large* of the allotment for wheat or permitted acres, or the 1956 acreage of peanuts exceeds the larger of the allotment for peanuts or one acre...

Informational meetings at which interested persons may learn more about the Soil Bank program will be held Monday night in the Lakeview grade school auditorium, Tuesday night in the district courtroom at the courthouse here, and Thursday night, June 28, in the Turkey High School auditorium. All of the meetings will start at 8 o'clock.

County Wheat Shipments Small One car of 1956 wheat had been shipped from Memphis up to this morning, according to John McMickin, station agent for the Fort Worth and Denver. It was not known definitely how many cars had been shipped at Turkey, although one source said a number had been loaded there.

Scoutmaster Stotts and the Scouts wish to thank those who provided transportation for the group. Taking the Scouts to camp were Mr. and Mrs. Robert Moffitt, Mr. and Mrs. Ray Moreman, Dr. and Mrs. D. H. Cox, and Mr. Stotts. Bringing them home were Mr. and Mrs. W. R. Rogers, M. D. Shaw, L. D. Messer, and Clifford Johnson.

Three County Youths Return From Boys State Meeting

Two Memphis boys and one Lakeview boy returned home Saturday after attending the annual week-long Boys State meeting in Austin, Hubert Dennis, commander of Simmons-Noel American Legion Post, said this week...

Paul Wilson and Mike Montgomery attended the state-wide gathering from Memphis, and Ronnie Bailey from Lakeview.

The bus in which the youths made the trip to Austin, stopped at Childress to pick up boys from Wheeler, Canadian and Childress, then continued on to the Capitol City by way of Brownwood...

After being assigned to dormitory rooms at the University of Texas, Wilson's group visited the Capitol building, which in the Memphis boy's words, "really was beautiful inside..."

Activities Sunday included getting acquainted and organizing the Longhorn and Pioneer parties, the two mythical political groups into which the boys were divided...

Friday, Wilson's group marched to the Capitol building, where they occupied the Senate chambers for a meeting in the evening. Boys State delegates enjoyed some special entertainment...

Saturday morning, a closing program was held before delegates checked out prior to returning home. A total of 519 boys from all parts of Texas attended the Austin meeting...

The gathering is held annually to train better leaders for better governments of the future. Not all activities were on the more serious side, as the program included song fests, band concerts, and football, softball, basketball and volleyball contests...

Firman Haynie, former Wellington resident, was chairman and director of Boys State, and Ernest I. Kelly was assistant director. The boys spent more time

Thursday in the work of their offices, and that night heard University of Texas representatives explain how to enter college, then spent a while at a Senate meeting...

Red-Legged Quail Tests Are Watched

AUSTIN — Red-legged partridge have been experimentally stocked in parts of West Texas without compromising scaled quail, one of the leading native game birds in the areas affected, according to E. A. Walker, director of wildlife restoration for the Game and Fish Commission.

Two shipments of the comparatively large partridge, obtained from Spain, have been released in Texas to test their adaptability to semi-arid climate, and Commission biologists have been painstakingly observing the results.

"At present," stated the latest field report, "there is no indication of antagonism or competition between the redleg and scaled quail. Instead, observations of close contact between species show no opposition and food habit studies indicate very little competition."

"The redleg is a grazer, being very fond of greens. Approximately 90 per cent of his food is green vegetation; whereas, the great majority of the food of the scaled quail is seeds. There is a slight overlap on food requirements, depending on the season, but not to a point of severe competition. And even though their

territories coincide, the fondness for greens has led the redleg to be associated with winter grain fields. This is not true of the scaled quail whose associations with these fields are less pronounced and cover their territory in true "gipsy" fashion."

Red-legged partridges are about twice the size of ordinary quail, are fleet on the wing and are considered potentially prime game birds.

Women's ROTC Due At UT Next Fall

AUSTIN — The University of Texas is one of 10 U. S. colleges where women first will be allowed to participate in Air Force ROTC programs.

Next fall, uniformed co-eds will be taking the basic courses offered to men in the ROTC program, in addition to special classes dealing with a woman's role in the Air Force.

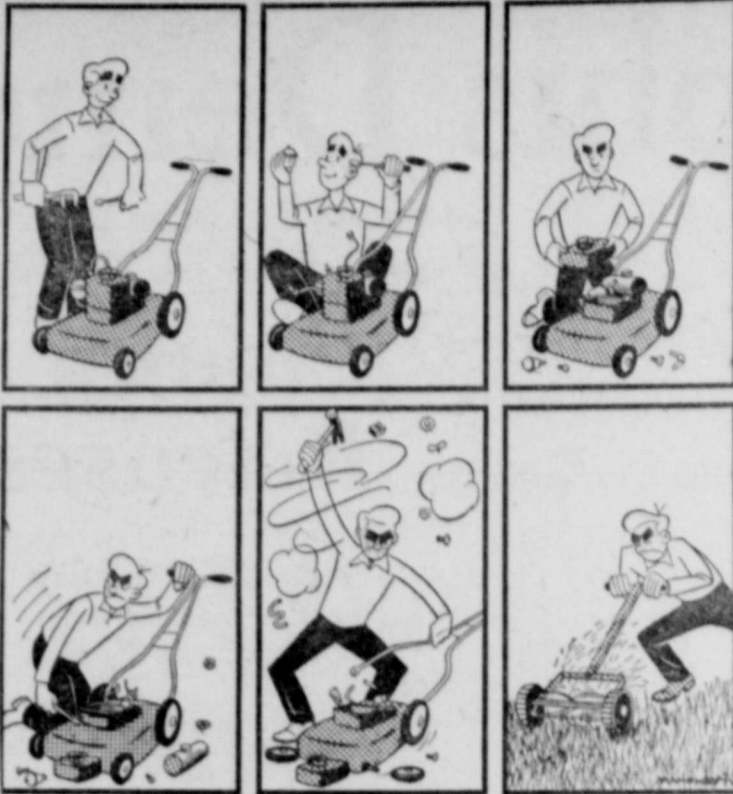

Upon completion of the program, the women will be appointed second lieutenants in the Air Force Reserve.

Texans interested in seeing their poultry industry keep pace with the national industry will get an opportunity to pick up the kind of information to help them do the job on June 20-22. The three-day poultry breeder and hatchery school and health clinic program to be conducted at Texas A&M College will bring those attending the latest findings from research and practical experience on poultry problems.

The pedestrian record reflected the 5th consecutive year of improvement for motor vehicle accidents in 1955.

New Banding Plan For Doves Slated

AUSTIN — A new five-year nation-wide mourning dove banding program brings official recognition to the pioneering work of large scale banding which Texas began several years ago, according to W. S. Jennings, assistant director of the Game and Fish Commission.

The 1956 project will be coordinated by the United States Fish and wildlife service, whereas the first dove banding in Texas

was under state sponsorship. Jennings said results of the Texas studies helped prove the usefulness of the routine, particularly in justifying the time and expense involved.

Technicians in Texas have become accustomed to dove banding reports as an indispensable aid in determining nesting, migration and feeding habits.

The banding program was dropped last year, but in the preceding five years more than 23,000 doves were banded in Texas. Slightly over three per cent of the bands were recovered, with about three-fourths of the returns coming from near the original banding place. Most bands are retrieved by hunters and then forwarded.

The assistant director said emphasis in Texas this summer will be in the extreme northern part of the state in the Panhandle and along the Red River Valley. This will enhance observations as the banded birds migrate southward during the harvest season.

Game wardens and other Commission field personnel will handle the actual banding of the young birds, with Boy Scout and other volunteers aiding in locating nests. The assistant director said prospects are for a fine mourning dove hatch in Texas this year to continue the upward trend of last year when the dove population increase in the area totaled an estimated thirty-seven per cent.

Mr. James Freeman and two sons, Dalton and Ronnie, visited relatives Friday and Saturday in Helen.

Visiting Mr. and Mrs. Kenneth Check over the weekend were Mrs. Rita Lester and Miss Darlene Cooper of Hatcher.

Mr. and Mrs. Doyle Gregory of Amarillo visited Mr. and Mrs. Elmer Check over the weekend.

Mr. and Mrs. Dewey Simmons and son visited Mr. and Mrs. George Simmons in Childress Sunday.

Mr. and Mrs. J. J. McDaniel returned Sunday from a weekend trip to Colorado.

Mr. and Mrs. Jim Beeson and Mrs. A. C. Hoffman and Ruby spent the weekend in Lubbock with Mr. and Mrs. C. L. Hoffman and family. Phillis Lynn Hoffman returned for a visit here.

Mr. and Mrs. O. L. Hoarn and family of Brownfield are visiting Mr. and Mrs. E. Gerlach and relatives. They are on vacation and will be leaving Memphis Friday.

Texas Wildlife Generally Spared In Nesting Season

AUSTIN — Only a comparatively few of the "incurably callous" have molested wildlife during the spring and early summer nesting period, according to the monthly arrest report released by E. M. Spratt, director of law enforcement for the Texas Game and Fish Commission.

Two persons were prosecuted for killing deer in closed season and the same number for shooting doves. One was taken to court for shooting ducks.

The dove hunters — one from Ballinger and the other from Fort Worth — each got \$25 fines plus costs. The deer law violators, both from Laredo, got \$50 fines plus costs. An Austin man, one of three arrested for hunting at night, paid a \$100 fine and costs. The illegal duck hunter paid a \$30 fine and costs.

"We have had remarkably few complaints this spring about illegal hunting," said Spratt. "The shoot-em-off-the-nest trace certainly gives wildlife a break since birds and beasts are busy raising their young."

The largest single group for the month involved 129 persons fishing without a proper license. Several substantial fines were levied for taking fish by illegal means, principally by shocking through hand cranked magneto sets.

Mrs. Douglas Shelton of Ash-tola visited here Saturday with her parents, Mr. and Mrs. L. W. Stanford.

Mrs. Wendell Harrison and Rosemary left Wednesday of last week to visit her mother, Mrs. Ed Beck in Sylvester.

Dr. and Mrs. Russell E. Baldwin and son Byron of Tyler and Bob Heaton visited in the Byron Baldwin home Sunday.

Mr. and Mrs. Eugene Brannum have moved to Memphis from Childress to live on North 18th. He is employed in the Ford Tractor House.

HOW TO BE A BETTER COOK... and save money too!

by *Mary Blake*
Home Service Director Carnation Company

Five to ten-year-olds can be a real problem at mealtime. And sometimes they go on an "I don't want my milk" spree. I have found the best way to combat those times is plenty of milk in the diet. Try this children's favorite. It's made extra smooth with double-rich Carnation too!

COTTAGE CHEESE CUSTARD
(Makes 6 medium custards)

- 4 eggs
- 1/2 cup sugar
- 1 cup cottage cheese
- 1 1/2 cups (large can) Carnation Evaporated Milk
- 1 cup water

Beat eggs with sugar until fluffy. Mix with well-drained cottage cheese, which has been lightly mashed with a fork. Stir in Carnation and water until thoroughly blended. Pour into medium custard cups. Sprinkle with nutmeg or cinnamon, if desired. Place cups in pan 2" deep; surround with water. Bake in moderate oven (325°F) about 40 minutes. Cool before serving.

McMurry-Eidson Nuptial Vows Are Solemnized in Austin Rites Sunday

Nuptial vows were solemnized Sunday afternoon in the chapel of the Austin Presbyterian Theological Seminary for Miss Shirley Lee Eidson of St. Louis, Mo., and Russell W. McMurry, Jr., of Austin. The Rev. John W. Lancaster, pastor of the First Southern Presbyterian Church, officiated at the double ring ceremony.

The bride is the daughter of Mr. and Mrs. James Roy Eidson of St. Louis, Mo., while her bridegroom is the son of Mr. and Mrs. R. W. McMurry of Memphis and Austin.

Given in marriage by her father, the bride wore a ballerina-length gown of white lace and tulle over taffeta. Her fingertip veil of illusion fell from a pearl crown, and she carried a bouquet of white carnations centered with a white orchid. Her only jewelry was a pearl necklace, a gift of the bridegroom.

Attending as maid of honor was Miss Jeanne House of Tyler and bridesmaids were Miss Gloria Eidson of St. Louis, sister of the bride; Miss La Rue McMurry of Austin, sister of the bridegroom; and Miss Frances Nettles of Washkom.

They were identically attired in ballerina-length dresses of pink pique, trimmed in pink embroidered lace. Miss House carried a bouquet of American beauty red carnations and the bridesmaids' bouquets were of pink carnations.

Second Lt. William D. Bryce of Shreveport, La., was best man and groomsmen were James Eddie Eidson of Memphis, Tenn., James Brille of Houston and Scranton Peevey of Austin. Ushers were Joe Fulton Luling and Lionel Blomquist of Austin.

Immediately following the ceremony a reception was held in the home of Mrs. David Quinn, 2309 Nueces. Attending the table were Miss Sally Griffin and Miss Susie Tapps, presiding over the guest book was Miss Pat Gargas.

Both the bride and bridegroom are graduates of the University of Texas and are doing graduate work at the University this summer. Mrs. McMurry is affiliated with the Zeta Tau Alpha sorority while Mr. McMurry is a member of the Phi Kappa Sigma fraternity. He is employed as a junior high school coach in Breckenridge.

For a brief wedding trip to Kerrville before establishing summer residence at 1819 Travis Heights Blvd., Austin, Mrs. McMurry chose for traveling a navy blue cotton dress with white accessories.

Out of town wedding guests included Mr. and Mrs. E. A. Neiman, Mr. and Mrs. Bruce Cun-

ningham and Miss Pat Gargas of Dallas, Mr. and Mrs. W. D. Turner, H. R. Potter, and Mr. and Mrs. Jan Cobb of Waco; Mr. and Mrs. Tom Brown of Kileen and Mr. and Mrs. Ferrell of Breckenridge.

Pre-Nuptial Courtesies

Included in the prenuptial entertainment was a miscellaneous shower given by Mrs. R. W. McMurry and La Rue McMurry in their home, 1819 Travis Heights; a Spinster's Brunch at the Driskill Hotel given by Miss Jeanne House, and the rehearsal dinner given by the bridegroom's parents at El Toro.

Parnell Club Holds Regular Meeting Wednesday

The Parnell Club met Wednesday, June 13, with 18 members in attendance. The meeting was held in the club house with Lena Hill, Nel Burk and Annabel Boney as hostesses.

The afternoon's devotionals were given by Lois Weatherly. Members responded to roll call with "Think It Over."

A pattern was chosen for the next club quilt and plans were made to start work at an early date.

Those present were Bessie Latham, Roxie Orcutt, Leona Burk, Nelda Ferrel, Bertha Moorehead, Jo Ann Potts, Rita Hedrick, Myrtle Weatherly, Lois Weatherly, Marie Johnson, Nell Burk, Lena Hill, Lena Freeze, Fern Mullin, Lucille Cope and Dot Damron.

Mrs. Geo. Greenhaw returned recently from a two weeks vacation trip to New York, Washington D. C. and other eastern cities. She was accompanied by her son and his wife, Mr. and Mrs. Reginald Greenhaw of Amarillo.

Mrs. Seth Palmeyer has returned home after spending the past four months in Georgia where she was house mother at Brenau College.

Monta June Saye Is Honored with Birthday Party

Monta June Saye, daughter of Mr. and Mrs. O. R. Saye, was honored at a surprise birthday party given Monday afternoon in the Frank Garrett home.

A gift of a desk lamp was presented to Monta June from all the girls attending. The hostess, Mary Frank Garrett, served cokes, peanuts and cookies to the following: Joy Beth Parks, Billy Jean Stroehle, Jean Foxhall, Betty Lemons, Jo Ann Odum and the honoree, Monta June.

Stitch and Clatter Club Meets in Home Of Mrs. Richburg

Members of the Stitch and Clatter Club met on Tuesday afternoon, June 12, in the home of Mrs. Willie Richburg.

The meeting was called to order by the president, Mrs. Byrdie Holland. Eula Adams led the group in prayer after which minutes of the previous meeting were read and approved.

The remainder of the party hours were devoted to copper craft and needlework.

Frosted drinks were served to Mmes. Jewel Marcum, Myrtle Darby, Edna Winkler, Lura Eddleman, Jessie Orcutt, Byrdie Holland, Eula Adams, Ada Jones, Willie Richburg and a new member, Mrs. Berryman.

The next meeting is slated for June 26 at 2 o'clock in the home of Mrs. Edna Winkler.

Mr. and Mrs. E. J. McKnight and children Joey and Deanna of Stinnett spent the weekend at Lakeview with Mrs. McKnight's parents, Mr. and Mrs. Ott Bevers. Joey remained to spend a few weeks with his grandparents.

Wesleyan Guild Meets Monday in Regular Session

The Wesleyan Service Guild met Monday, June 18, in the church annex with Mrs. Barney Burnett and Mrs. Lillie Messer as hostesses.

The four steps in the "Fruit of Discipleship" were presented by the program leader, Mrs. George Greenhaw. The steps listed by Mrs. Greenhaw were as follows: one, each must find the

place of spiritual need in her own life; two, each must grow in the spiritual way of life; three, each one must accept the price of discipleship; and four, each must take her part in bringing fruits of discipleship.

The following members were present: Mmes. Mary Jameson, Mildred Stephens, John Fowler, Hester Bownds, Rhupert Wynn, A. O. Gidden, H. B. Bennett, W. V. Coursey, Lillie Messer, George Greenhaw, Mary Owens, Barney Burnett, the co-ordinator, Mrs. M. G. Tarver and two new members,

Mrs. Terry Brooks and Mrs. David Binkley.

Clair Beth Bryant To Wed Bob Adams In July Rites

Mr. and Mrs. A. A. Bryant of Estelline announce the engagement and approaching marriage of their daughter, Clair Beth, to Bobby Lee Adams, son of Mr. and Mrs. Cecil Adams, also of Estelline.

The bride-to-be is a student of

Estelline high school received his degree Technological College.

The wedding will be at the First Church in Estelline where vows will be exchanged.

Report From Washington

By Walter Rogers
Congressman, 18th District

President's illness... Washington's reaction... When you look for political reaction, you certainly come up with wide and divergent views. Some in the President's own Party were very disheartened. They honestly feel that the President is somewhat of a political one-man's band. That unless he is on the ticket there would be no band and, therefore, little need for a wagon. Others feel that the name has some degree of magic and that Milton Eisenhower, the President's brother, could fill the vacancy on the November ticket very well. His recent resignation as President of Pennsylvania State College brought forward some speculation about his political aspirations. Many felt that the operation would serve to strengthen the President, physically. One man went so far as to say that the President would be stronger after recovering from his heart attack and the operation than any opponents who could appear against him. I have never had a heart attack or an abdominal operation, but I seriously doubt the soundness of this man's statement. No one could be led to believe that the fountain of youth lies in physical ailments, cured or uncured. Looking at the situation realistically, no one in official Washington is underestimating the political significance of the President's illness. Everyone is praying for his quick, complete recovery, but no one for a minute doubts that, politically speaking, the situation is one of touch and go at the present time, as to what can or may happen during this year.

RAIN OR SHINE . . . This trio of Florida's Cypress Gardens mermaids wear combination hat-and sunshade, preparing them for any kind of weather.

Coccidiosis Said To Be Leading Poultry Threat

COLLEGE STATION — "Coccidiosis is one of the most destructive diseases of poultry, and is a continuous threat to the flock of every poultryman," says Ben Wormell, Extension Poultry Husbandman, Texas A&M College. Eight species of coccidia are found, though only four cause real difficulty in chickens. The disease is intestinal, with each species of coccidia attacking a particular part of the intestine. The disease organisms go through their life cycle largely in cells of the intestinal lining, causing severe hemorrhages when infection is heavy. Mature coccidia, called oocysts, are spread to other birds through droppings. Symptoms of the disease develop slowly in a flock. Chickens show evidence of weakness and ruffled feathers. They huddle together as if cold and there is a drop in feed consumption. Early diagnosis by a competent laboratory is necessary if corrective medication is to be applied soon enough to head off disastrous losses, says Wormell. Drugs for medication are now available from hatcheries, feed mills and veterinarians. Recommendations for treatment should be followed exactly as outlined on the container, cautions Wormell. Chickens' quarters should be kept clean and dry and all wet areas should be removed and replaced with dry litter. It is possible that only enough coccidia organisms may be picked up to cause a light infection. This does little harm and helps the chickens build up resistance to the particular species of coccidia that caused the infection. "Use of preventative drugs called coccidiostats is widespread, to prevent severe losses, and at the same time allow light infection that will develop immunity. This protection is provided by using low preventative levels of certain drugs in feed till birds are eight or nine weeks old. Some poultrymen feel that a preventative level of these drugs should be fed to pullets during the first two or three weeks after they have been moved into floor type laying houses," says Wormell.

LIKES U. S. . . . London-born Pamela Guard is now world-famous as "Yana", Europe's top TV star and highest paid BBC actress.

Dry Cow Called Most Neglected Animal on Farm

COLLEGE STATION — "The dry cow is the most neglected animal on the dairy farm," says R. E. Burleson, dairy husbandman, Texas A&M College. In a study made of 3,599 dairy cows at Michigan State University, records prove that cows produce more if they have at least six to eight weeks of rest between lactation periods. "Results of the study show that cows dry two weeks or less produce 9,511 pounds of milk and 347 pounds of butterfat," says Burleson. "Cows dry two weeks to a month produce 10,838 pounds of milk and 390 pounds of butterfat, while those dry four to six weeks produce 11,218 pounds of milk and 404 pounds of butterfat." Burleson recommends that cows have six to eight weeks of rest between lactations. Cows in this category of the study produced 11,507 pounds of milk and 413 pounds of butterfat. Though the study was run on Holsteins, production figures for other breeds would be in the same proportion. Average production for cows given eight to ten weeks vacation was slightly higher, but the difference wasn't great enough to pay for the extra feed involved.

Warning Issued On Dangers of Sleeping Sickness

A warning against the dangers of sleeping sickness in horses and mules has been issued by the American Foundation for Animal Health. "This condition is spread by biting insects, and with a build-up in insect numbers occurring now because of warmer weather, prompt action should be taken to protect horses and mules against this disease," the Foundation says. Vaccination by veterinarians is the only sure way of preventing the disease. Horses of all ages should be vaccinated each year, since firm protection lasts for only one season. In addition to the vaccination program, veterinary medical officials suggest keeping the animals away from low, swampy areas and instituting good insect control programs. "The symptoms of sleeping sickness resemble those of heat stroke, rabies and some other ailments, making accurate veterinary diagnosis of great importance," the Foundation says. "Losses may run as high as 60 per cent in a group of unvaccinated animals. Afflicted horses and mules should be isolated under insect-free conditions so mosquitoes and other carriers cannot spread the disease further."

Legal Notices

Notice is hereby given that the Commissioners Court of Hall County, Texas, will receive bids for the purchase of one Used 7-D Crawler Type Caterpillar Tractor, equipped with Power Unit on back, with dozer, or other similar Tractor with such equipment, until 10:00 o'clock A. M. on the 5th day of July, 1956. No trade will be made. All bids must be in writink and may be left in the office of County Judge Tracy Davis, in which office further information may be obtained concerning the equipment to be purchased. Seek Better Ways To Kill House Fly

COLLEGE STATION — As warm weather begins in earnest, an all-out effort should be made to control the population of house flies in dairy barns. Texas A&M entomologists have been conducting a series of experiments for the purpose of finding more effective controls of the flies.

Experimentation with various insecticides began in 1953, states Manning A. Price, Assistant professor, department of entomology, Texas A&M College. Several different insecticides were used with different methods of application in determining most effective control. Treated strings suspended from ceilings, syrup baits and residual sprays were all considered.

Results indicated residual sprays to be most satisfactory, while diazinon, malathion and chlordane were the most effective materials used. To determine the most effective of these insecticides and most satisfactory concentration, experiments were conducted near College Station in 1955. Results were based on average number of days protection given by each application at various concentrations of each insecticide.

The insecticides were used as wettable powders and emulsions at various concentrations, says Price.

Malathion emulsified concentrate diluted to two and one-half and five per cent gave protection for 47 and 87 days respectively. As an emulsified concentrate diluted to one-half of one per cent diazinon gave 74 and 48 days protection, respectively.

Diazinon was used at one per cent concentration only in barns where sanitation was extremely poor and where there were numerous nearby fly breeding areas.

Chlordane emulsifiable concentrate at one-half of one per cent averaged 20 days protection.

The considerable variation in number of days of control in individual barns resulted from differences in extent of sanitation and presence of adjacent areas for suitable fly breeding, Price states. In barns of poor sanitation, adjacent to suitable fly breeding areas, effectiveness of the control was understandably lower

than in barns of good sanitary conditions.

Cleanliness of dairy barns, good sanitation practices in fly breeding areas, and effective control measures will greatly decrease this year's fly population.

Official Discusses Disability Under Social Security

A surprisingly small number of applications have been filed in this area for the purpose of establishing a period of disability, according to John R. Sanderson, manager of the Amarillo Social Security office.

Sanderson feels that the low number of applications is because there are no cash payments paid upon a worker's proving that he is disabled. In many cases, however, Sanderson says that the establishment of a period of disability will make eventual social security payments much higher, on the death of the worker or upon his reaching age 65, than they would have been otherwise. In some cases no payments will ever be possible unless the period of disability is established.

Any worker who can answer "yes" to the following questions should contact the Amarillo Social Security office about establishing a period of disability: Are you now under a serious disability which prevents you from engaging in gainful employment? Have you been disabled for at least 6 months? Did the disability begin before you became 65 years of age? Did you work in employment or self-employment covered by the Social Security Act for at least one-half of the 10 years before the disability began and for one-half of the 3 years just before it began? Sanderson urges any one who can answer "yes" to each of these five questions to contact the Amarillo office and get full particulars about this phase of the Social Security law.

A representative from the Social Security Administration office at Amarillo will be at the courthouse Monday afternoon, starting at 1 o'clock.

GAZA TROUBLE . . . Egyptian Premier Gamal Nasser (left) talks with his national guardsmen and commandos (Fedayeen) during visit to turbulent Gaza strip.

TRAINED CIVIL DEFENSE rescue workers can play just as important a life-saving role in peace as in war, as these men in tornado-devastated Standale, Mich., a suburb of Grand Rapids, recently demonstrated. Rescue volunteers are taught how to reach trapped victims safely and quickly through the Federal Civil Defense Administration's Olney, Md., rescue school. (F.C.D.A. Photo.)

More than 78 per cent of the vehicles involved in fatal accidents in 1955 were traveling straight ahead.

Aphids Threatening Alfalfa in Texas

COLLEGE STATION — The spotted alfalfa aphid is posing a serious threat to alfalfa in all areas of Texas.

Freeman F. Fuller, Extension entomologist, Texas A&M College, says the spotted alfalfa aphid is whitish yellow. It is 1-1/4 to 1-3/4 inch long, or about 1-2 the size of the pea aphid. They have four to six conspicuous rows of dark spots on their back and the winged adults have smoky areas along the wing veins.

These insects, says Fuller, can be found to some extent in alfalfa fields throughout the year. At first, aphids can be found on lower portions of plants or in debris on the ground. As populations increase, they may be found on all parts of the plants. Aphids feed in groups, usually on the underside of lower leaves, sucking juices and often causing leaves to turn yellow and shed.

Heavy infestations of aphids cause a reduction in stand and yield of hay, adds Fuller. Honey dew produced by aphids supports sooty mold on hay causing poor quality while making it difficult to dehydrate, cut or to bale the crop.

Control measures should be

started as soon as signs of aphids are found in the crop by using malathion or parathion, the only recommended insecticides. In some cases an application of one of these insecticides may be effective for a period of only 7 to 14 days.

A large initial kill may be obtained with the insecticides but the insects have a tremendous capacity to build up after poisoning, states Fuller. It may require two or more insecticide applications to protect plants between cuttings or to produce a seed crop.

Forage crops treated with parathion should not be grazed or cut for hay for 15 days after treatment while those treated with malathion may be grazed or cut for hay 7 days later, says Fuller. This time lapse is necessary to assure the absence of any poison residue when the crop is cut.

July Plentiful Foods Announced

COLLEGE STATION — Feature foods for the month of July are listed by the U. S. Department of Agriculture as broilers, and ice cream. Production of both is expected to reach record heights during the month.

The total list includes more than a dozen foods. Cantaloupes and watermelons are expected to dominate the fresh produce markets along with fresh summer vegetables. Movement from the areas or heavy production is stepping up and supplies increasing, say the marketing experts.

Fresh and processed lemons and limes are the only fruits listed on the July plentiful foods list.

Milk production is still running far ahead of last year and all dairy products are just about as abundant this month as last.

Turkeys, canned cranberry sauce, peanut butter, canned tuna in oil and pinto beans round out the list for the Southwestern area.

For the family picnics and week end outings, you can't beat a menu made up of foods which are now in heavy supply . . . fried or barbecued chicken, fresh vegetables, leek watermelon or cantaloupes plus dairy products.

Mr. and Mrs. E. L. Lewis are parents of a six-pound, twelve-ounce son named Millard Howell. He was born June 12.

Mr. and Mrs. Don Lee are parents of a baby girl named Lucretia Gail. She weighed seven pounds at her birth last Saturday.

Mr. and Mrs. W. A. Ward of Newlin are the parents of a ten-pound, three-ounce son, named Johnny Lee at his birth last Sunday.

Fred Allen McMurry was the name chosen last Sunday by Mr. and Mrs. Billy Fred McMurry for their son who weighed seven pounds and twelve ounces at her birth.

Mr. and Mrs. Albert Crump of Friona have a new girl named Cathy Dawn. She weighed six pounds and three ounces at her birth on May 23.

Mr. and Mrs. Jerry Hays of Amarillo have a baby girl, named Brea. She weighed eight pounds and two ounces at her birth on June 16.

Feature foods for the month of July are listed by the USDA as broilers and ice cream. The complete list includes more than a dozen foods.

Roundtree Family Holds Reunion; Honors Father on 92nd Birthday

Members of the J. L. Roundtree family gathered in Memphis over the weekend from points as far distant as California to attend a family reunion and help their father celebrate his 92nd birthday anniversary.

The family gathering was held in the V. D. Howard home at 709 Cleveland Street where Mr. Roundtree is making his home with his daughter and family.

All six of Mr. Roundtree's children and numerous grandchildren were present for the family dinner, served at noon, and the day of visiting.

Born in Austin, Texas, Mr. Roundtree came to Memphis in 1919 and was active in farming until he retired several years ago.

He was married to Mittie Agnes Garter in 1887. Five children were born to this union, three of whom are now deceased. Mrs. Roundtree died in 1899 and in 1900 he was married to Lillie Jane Driskill. Eight children were born to this union and 4 are now deceased. Mrs. Roundtree died in November, 1917.

Children present were Mrs. Mary E. Bryant of Brownsville, Mr. and Mrs. Frank Stuessi of Kansas City, Mr. and Mrs. Herbert Roundtree of Corpus Christi, Mr. and Mrs. V. D. Howard of Memphis, Mr. and Mrs. Lonnie

Roundtree of Hayward, Calif. and Mr. and Mrs. Ray Roundtree of Delano, Calif.

Grandchildren present were Francis D. Henson of Brownsville, Ralph Howard and wife of Lubbock, Martha Jean Miller, husband of Memphis, Helen G. Roundtree of Memphis, Nelda G. Roundtree and husband of Corpus Christi, Larry Roundtree of Hayward, Calif.

Great-grandchildren present were Kathy Gabbard of Corpus Christi, Rocky Gabbard of Corpus Christi, Cynthia Miller of Memphis and Dennis Howard of Lubbock.

Grandchildren who were unable to attend the reunion were L. Henson and wife of Amarillo, Lon Gaylon Roundtree and wife of Hayward, Calif.; one grandchild, Eddy F. Henson, is in the service; and Kenneth Henson and wife of Amarillo, one great-grandchild, Dr. Jay Henson of Amarillo.

Shipping losses can be cut by giving fat hogs a cool, comfortable ride to market. Using a bed for bedding and wetting it before loading will help in such a ride possible, says E. Regenbrecht, extension swine specialist.

Modern Cotton Gin Controls Pink Bollworm

COLLEGE STATION — The modern cotton gin is the effective means of controlling the pink bollworm, according to research done by USDA's Pink Bollworm Laboratory at Brownsville.

Three years ago, the pink bollworm in Texas and parts of other states demonstrated that commercial gins can be used to reduce pink bollworm to such a low level as to be negligible, if any, importance in relation to ginned seed.

Seed to be planted or otherwise used within the infested area is important in the quarantine regulations which utilized elaborate methods in the ginning process to get the best results, averaging more than a 99 per cent reduction in pink bollworms with the use of modern gins and picked seed.

Many of the individual gins resulted in 100 per cent control for the dreaded insect.

CAP CADETS . . . Vice Pres. Richard Nixon shakes hand of cadet Maj. Carroll Olney of Honolulu, at capital visit of outstanding Civil Air Patrol cadets from all states and territories.

RURAL RAMPAGE results as the Feather River cuts through a secondary levee near Nicolaus, Calif., during floods which inundated rich farmland and drowned much livestock. Federal disaster funds, administered by the Federal Civil Defense Administration, were poured into the stricken area to restore vital public facilities such as bridges, hospitals, highways, water and sewer systems.

Analysis of the cotton produced by 15 commercial gins in the pink bollworm infested area showed the lowest kill was 97 per cent; the highest, 99 per cent. The lower figure was from a gin containing much old equipment. All but one of the gins killed 97 per cent or more of the pink bollworms.

These findings are in line with data showing that the modern gin, which is widely used, kills practically all of the insect larvae that survive ginning.

Most mortality occurs during ginning and when the seed is cleaned. In planting experiments at Brownsville, no emerged bollworms were obtained from the infested area who had the unsterilized seed for crop for planting the year.

Agriculture Atom in Research Work

TEXAS agriculture is to be the atom for research, University of Texas at Austin, in the June issue of the Texas Agricultural Experiment Station Review.

E. E. Ryan and Thomas H. Egan are authors of a series of articles in "The Atom in Texas Agriculture."

It can be studied more than ever before through the use of isotopes in plant research, they say. "Fertilizers, for example, can be made radioactive to study the intricate processes of plant growth. The most important of these deal with the fundamental processes of cell growth, photosynthesis, water and carbon dioxide exchange, and the use of solar energy by the plant."

Great predict atomic energy may have far-reaching effects in Texas agriculture. Investigations of food production through the use of radioactive isotopes in the future with- out the fear of atomic energy are being made.

Have Radio Station

The University of Texas at Austin has an educational station if \$14,000 can be raised from sources other than the state. The station is to be operated by the Permanent Foundation for the University of Texas.

Some terms that the foundation has set are: \$4,250 for the station's construction; \$4,000 for the station's operation; a minimum of \$10,000 for the first five years' operation.

In 1957, meeting, the foundation will review the station's progress and make other dispositions. "If the station does not appear satisfactory, the foundation will not participate in an operating program, to be determined by the foundation. The FM station or other station, for use where the station officials feel they are not participating in an operating program, to be determined by the foundation."

Traffic Conditions Should Set Speeds

"Drive in haste, repent at leisure!"

This new version of an old proverb was voiced by E. C. McFadden of Dallas, president of the Texas Safety Association, as he urged drivers to support the speed control program of the Texas Safety Association, the Department of Public Safety, and the National Safety Council.

This program is being conducted in cooperation with the "Slow Down and Live" program of the National Conference of State Safety Coordinators.

Lack of Vitamins Can Result in Stock Losses

Drought-induced vitamin deficiencies causing livestock losses may continue through the early spring months unless livestock producers are on guard against them, the American Foundation for Animal Health warned today.

"Hay from drought-stricken areas may be low quality and may be low in vitamin 'A,'" the Foundation says. "Feeding of this low quality hay over an extended period may result in poor health for stock."

Vitamin A deficiency is especially important in cattle, but can also be a problem in swine, sheep and horses. Weak, blind calves that often die shortly after birth, and breeding failures, may result from this deficiency—even though the cows appear normal.

Cattle fed on hay or ranges low in vitamin A may show signs of shipping fever when shipped to feedlots. Those signs actually are caused by the vitamin shortage, the Foundation reports.

Rapid breathing, swollen legs, loss of appetite and emaciation are symptoms of both shipping fever and vitamin A shortage. Officials of the Foundation point out that because the two conditions require different treatment, a veterinary diagnosis is needed to determine the real cause.

Night blindness is another of the first symptoms of vitamin A deficiency. Cattle affected by this condition cannot see in dim light. The condition may progress into permanent blindness in young cattle because of damage to the optic nerve.

"Corrective rations and proper supplements, under veterinary guidance, can help prevent losses from this cause in areas where the drought has damaged the vitamin content of the feeds," the Foundation says.

Warning Given Public About Water Safety Around Surface Craft

AUSTIN — Mounting water tragedies, particularly involving surface craft, has prompted Howard D. Dodgen, executive director of the Game and Fish Commission, to pledge cooperation of game wardens and other field men in curbing the menace.

Wardens, at their annual refresher school at Bastrop State Park, were reminded of the alarming trend and were counseled on corrective measures, especially safety steps and resuscitation routine.

Dodgen pointed out that multi-fatality accidents have occurred in many state areas, even before the main aquatic sport season has begun.

"It is sometime before the swimming season opens and yet we have recorded an appalling number of drownings," he said. "One of the latest involved three fishermen on Lake Houston. This all points up the fact that the rapidly increasing popularity of watercraft is heightening dangers never before encountered."

Hilton H. Gilliam of Brownwood, representing the American Red Cross, stressed that fast motorboats and water skis, "all too often in the hands of novices," have become a major contributing factor to "the frightening drowning rate."

Game wardens were schooled about principal hazards and about safety methods as well as about first aid for water casualties.

Weekend crashes accounted for 15,730 killed and 766,090 hurt during 1955.

Going on Vacation? Don't Forget Your TRIP Accident Policy

World-wide, 24-hour-a-day protection against travel and all other kinds of accidents. A 7-day policy costs only \$2 for \$5000 Accidental Death & Dismemberment Benefit plus \$500 Medical Expense Benefit. Policies issued immediately for any period from 1 day to 6 months.

USDA Reports On Deep Plowing and Pasture Burning

COLLEGE STATION — Moisture infiltration into the soil, an important factor in crop and pasture production in limited rainfall areas of the Great Plains evidently is unaffected by deep tillage and adversely affected by burning over native grasses, reports the U. S. Department of Agriculture. Jack Barton, extension soil and water conservation specialist, says the results of tests conducted in Kansas in 1952 disagree with a widely held theory that deep tillage with chisels and subsurface sweeps improves soil-moisture storage. Neither the amount of moisture infiltrated nor the yields of wheat produced were improved by deep tillage in these tests. Soil types studied included a fine sandy loam with a distinct plow pan, a silty clay loam with a tight subsoil, a clay loam and a very fine sandy loam with a clay pan.

Barton says the research workers also found that when native bluestem pastures were burned over, the soil quickly lost its ability to absorb or take in large amounts of water. Under conditions of simulated rain, unburned bluestem pastures absorbed water at a steady rate for nearly 80 minutes. Water absorption by burned-over sod dropped before the end of 20 minutes.

Very dry unburned pasture sod absorbed 4.6 inches of moisture

MISS URUGUAY . . . Titina Aguirre, 19, of Montevideo, will represent Uruguay at Miss Universe Beauty Pageant at Long Beach, Calif.

in the first 10 minutes and 4.4 inches for each succeeding 10-minute period until after the end of 70 minutes. Similar but burned-over sod absorbed 4.7 inches of moisture in the first 10 minutes, 3.4 inches the second 10 minutes

and only 3 inches in the third 10-minute period.

While pasture burning is not a common practice in most sections of Texas, Barton points out that the Kansas tests should further strengthen the case against pasture burning and the need for protecting pastures against fires of all kinds.

Experiments started at Texas A&M College in 1949 have shown that the wet-pad method of greenhouse cooling is practical, economical and efficient and makes year-round greenhouse production possible. Get the details in publication MP-163, Greenhouse Cooling. It's available from the Agricultural Information Office, College Station.

More than half the work on a poultry farm is taken up by collecting eggs and getting them ready for market. Dirty eggs create the greatest problem to the poultryman, says Ben Wormell, extension poultry husbandman. Clean litter will help solve the problem.

Twenty-seven per cent of all drivers involved in fatal auto accidents in the U. S. last year were under 25 years of age.

U. S. Praised For A Change

No nation in the history of the world probably has ever done as much to help other countries and peoples as the United States. This has included not only friends, but also enemies...

So, it is almost a downright pleasure when some foreign source feels we deserve some commendation and says so. One who has done this is the Manchester, Eng., Guardian...

"Why is it that the Americans get so little credit for all the help they are giving to other people? Is it that mankind instinctively resents a gift? ... Perhaps the temptation to look a gift horse in the mouth is irresistible; no one can easily believe that a rich nation will give away \$50 billion in ten years without a hidden and possibly unpleasant purpose ..."

"Foreign aid is candidly described as a great arm of American foreign policy, and it is perfectly obvious that the principal aim of that policy is to prevent a further extension of Communist influence. If we believe that the Western form of society is worth preserving, surely there is nothing wrong with trying to preserve it by sharing our wealth ..."

"American aid, for all its errors and limitations, has stood between us and chaos ... Friendly nations receiving aid were, of course, expected to remain independent of Communist domination ... On the whole ... strings attached ... have been thin and easily thrown off ..."

"The American people support year after year this large outflow of their products ... History will recognize this as one of the most humane forms ever known of exercising international leadership ..."

The average harassed taxpayer in this country probably would feel the Guardian's expression of appreciation to be completely justified, at the same time, wondering, like the newspaper, why so many are apparently ungrateful for our help.

It would seem that if we are going to continue sending billions of dollars and resources to foreign countries, our leaders should re-examine our aid program, with the view of operating it in the future in such a way that it will make more friends for us and fewer enemies.

IN HOT WATER
The naturalist says, "If a frog is put into a bowl containing cold water, and the water is then brought slowly to the boiling point, the frog is so unconscious of the gradual change of its condition that it is boiled to death when, at any moment, it might have jumped out."

Sin makes its increase and tightens its hold on men so gradually that men are unaware of their really depraved condition. The gradual process of sin is described by James: "Each man is tempted, when he is drawn away by his own lust and enticed. Then lust when it hath conceived, beareth sin, and the sin, when it is full grown, bringeth forth death."

The progress step by step is: (1) Lust, (2) Enticement, (3) Temptation, (4) sin, and (5) DEATH.

That sin gradually tightens its grip on man is indicated by the words of Paul in II Tim. 3:13: "But evil men and seducers shall wax worse and worse, deceiving and being deceived."

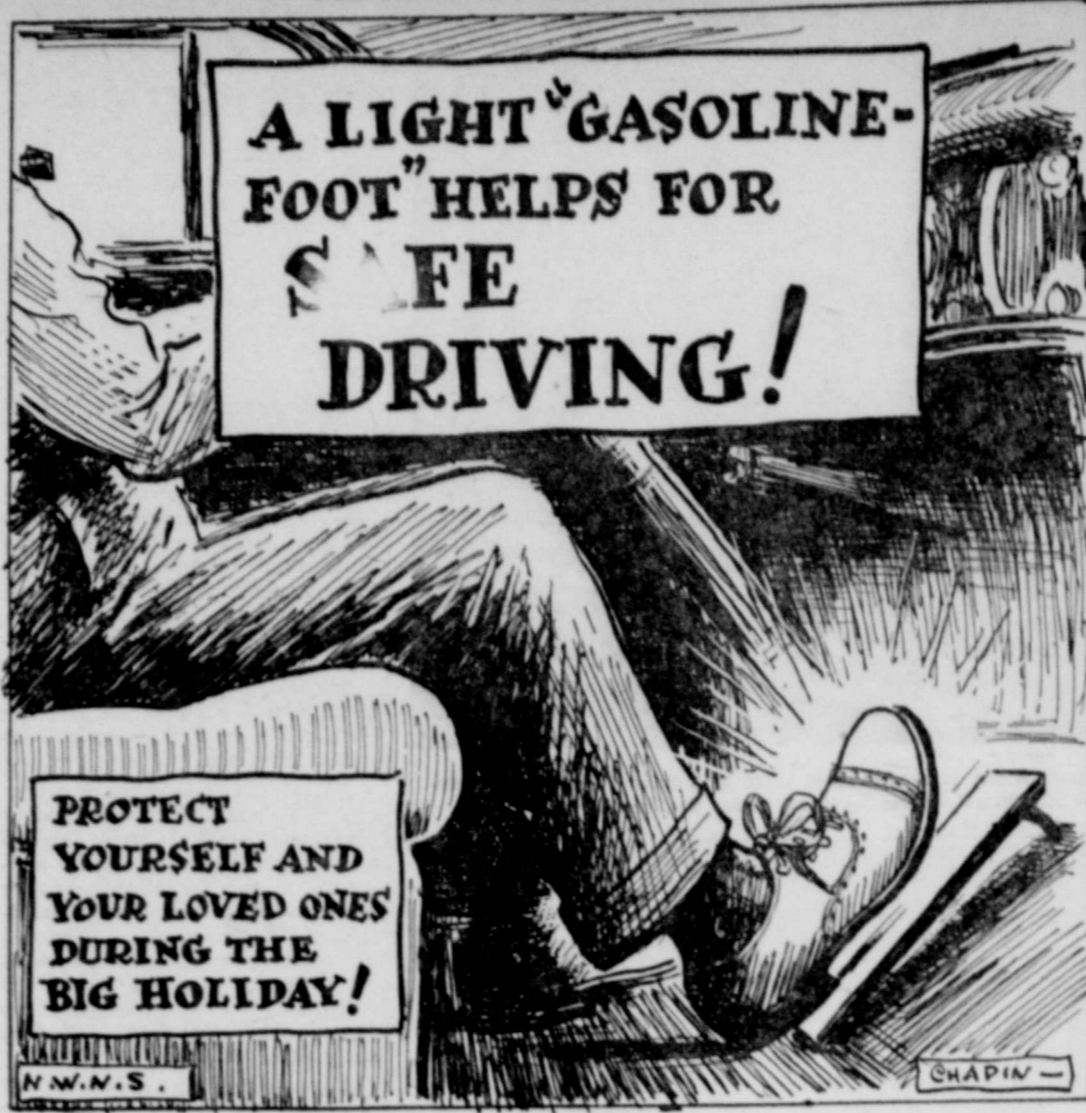

Too many are waiting until tomorrow to do right, to obey the gospel, to correct life. Sin only gets a tighter hold on them. If it is difficult to break away now, how much harder will it be tomorrow?

Thousands are concerned over-much with the affairs of this life, without realizing if they go through life with no provision made for eternity, they face old age, death and judgement.

Listen, Friend: If you have any reason whatever to suspect yourself of frog-like tendencies—jump now! Don't wait for the water to boil.

Press Paragraphs— QUOTING OUR NEIGHBORS

Bankers Probably Know
"The death knell of the small town as a farm community has sounded," a small town banker told members of the Texas Bankers Association at their recent convention.

The wire service stories of the bankers convention carried the ever recurring theme that the time has come for small towns to wake up and start doing something if they want to live and prosper like their larger neighbors.

It has been apparent for many years that a small town is going to have a hard time existing solely on an agricultural income, although some of the highest per capita income counties in Texas are in the irrigated belt of the South Plains.

As a general rule, however, the trend in agriculture is having its effect on small towns.

The days of the "family sized" farm are numbered. Modern machinery nowadays enables a farmer to adopt the practices of the modern assembly line methods. This is an era of specialists, a farmer may have \$100,000 in machinery, yet needs to employ extra labor at only a few times each year, such as plowing and harvesting.

In areas where there is much hard labor connected with harvesting there has grown the use of migrant labor, which supports a town for a few brief weeks each year.

They talk of automation displacing labor in the factories of the nation — especially automobile factories — the farming industry has some time ago been converted from a man labor proposition to one of automation — with machines.

And perhaps this is why there is a constant migration from farms to cities as farm hands and displaced farmers seek different types of employment. This is why the 1950 census in the Panhandle, for example, showed a rise in town populations but a corresponding drop in farm populations.

Small towns which depend entirely upon agricultural income with a smaller number of farmers to spend that income must now look about for something else to afford some sort of stability to their economy.

A nice balance of small industry (drouth proof) and agriculture is what all small towns, and even some large ones, should seek.

We think the bankers are right. We have always found them to be exceptionally sensitive when it comes to money. — Ochiltree County Herald, Perryton

Take Easy Way

Local high schools have just graduated another crop of seniors, who will now begin seeking a vocation, trade, or certain path of life to follow. This is a time of decision for a graduate. Will it be to help Dad on the farm, become a laborer, go on to college, or what?

We're afraid that too many will overlook the advantages of a college education. "Why go to college, when Dad is going to give me so many acres to farm," might be the decision of one, while another might say, "Why go to college when I can earn \$60 a week working as a 'gas pump jockey'?" Also, one could say, "I can't go to school because Mom and Dad can't afford to send me, and I

won't be able to work enough part time to pay my way through."

These are just several of numerous reasons high school graduates will give for not going on to an institution of higher learning. To them, they are legitimate reasons, but little do they stop to think of just what a college education can do.

On completion of high school, a graduate many times thinks he "knows it all." The conclusion of high school is a major accomplishment to some and they feel that there is not much more they can learn.

One semester or year in college will prove to him that he doesn't know a thing, and should give him an incentive to learn more. To an individual who wants to make something of himself, one semester in college is all he needs to understand the value of a college degree.

To the one who is going to be a farmer, he can find better and

more efficient ways to produce his crops, and the laborer can find a vocation that will afford him a much better opportunity to be successful in life.

To the one who thinks he cannot afford to go to school, college may be more of a challenge, but the benefits he will receive will be far greater than those of one who goes through with no worries whatsoever. He may have to lighten his load and take an extra year or so to finish, but his appreciation will be far greater than that of the one who had no monetary troubles.

In college today, there is more social life than ever before. While everyone enjoys a certain amount, it is overemphasized in colleges today. The one who cannot afford to participate is far better off than one who does. In many social fraternities of American colleges today, the ability to consume more alcoholic beverages than the next frat brother is the dominating goal.

When working one's way through college, such social life has to be eliminated, but as far

Memories Turning Back Time From The Democrat Files

19 Years Ago Sept. 3, 1937

\$124,000 APPROPRIATED FOR STATE HIGHWAY HERE — The Texas Highway Commission has set aside an appropriation of \$124,000 for construction of a farm-to-market road from Memphis east to State Highway 4, which connects with Highway 138 from the southern part of Oklahoma.

Surveys and estimates of road construction are expected to be started in the near future, and actual work on the highway will likely begin shortly after the first of the year.

It has been pointed out that a state highway from the Oklahoma line west through Memphis would prove to be an important artery of travel, as it would open a direct route to the west.

LOCAL YOUTHS IN STATE BAND — Three youths in the Memphis area have been selected by the state Future Farmers of America as members of the state band which will play at the National FFA convention in Kansas City, Oct. 18-20.

The boys are: Bill Joe Boren, son of Mr. and Mrs. Hollis Boren of Memphis; Edward Smith, son of Mrs. Ada Smith of Memphis; and Robert Moss, son of Mr. and Mrs. Grover Moss of the Eli community. All three are graduates of Memphis High School.

DELINQUENT TAXES ARE UP IN THIS COURT TERM — Twenty delinquent tax suits will be included on the docket of the September term of district court, which opens here Monday morning.

The City of Estelline has filed suit against 18 persons for back taxes, and the City of Memphis

as gaining knowledge is concerned, social life plays no part.

In this day and age many more people are obtaining a college education than ever before, and when the better jobs are passed out, the person with only a high school education will have to take a back seat. Demands are great for specialists in certain fields but only people with degrees in these fields can fill them.

A college education today helps an individual to better understand the problems of the world as well as those of his fellow man. Above all, it helps him to better fill his capacity, as he takes his place in the American way of life. — State Line Tribune, Farwell

has filed two.

the Sharp Trader

buys at better than wholesale

...because he buys where his bread is buttered

A REAL sharp trader doesn't need "connections" or "special discounts" or catalogs, or any other gimmick to get what he buys at **BETTER** than wholesale.

Maybe you think we're kidding?

Not at all. It's a fact. When you BUY in the community you LIVE in, you know that every cent you pay for goods and services above wholesale cost stays here at home with you. By staying here, it can

get around to buying MORE good things for you and your family.

It's trading material . . . and TRADE ALONE builds communities with better opportunities, better schools, better churches, better neighbors.

Any ONE of these advantages could bring you returns beyond measure in a BETTER LIFE, as well as real CASH returns in the form of increased business,

improved property values, a better job, more people to help you carry the load of normal community expense.

All of this — which you don't get for your money when you buy somewhere else — makes the cost of the actual GOODS very low . . . when you buy them at home.

That's how the SHARP TRADERS get BETTER than wholesale values.

These Memphis firms are the only business establishments in the world who are sincerely interested in YOUR future and in the future of this community in which YOU live . . .

Around and About

by Helen Combs

When we heard the rain pitter, patter on our rooftop Sunday night we thought how wonderful...

Mrs. Henry Hays called Monday to tell us she has a double reason now for being a "Silly Ole Grandma"...

How can we mention grandmother without telling you our grandchild, Susan, was here to spend the weekend with us...

that in all likelihood she would change!

Congratulations to Billie Jean Stroehle who has been awarded a vocal scholarship to Chicago Sherwood Music School...

"After more than forty years you have worn our floors until we find it necessary to put in a new one. We are grateful to you for doing this and hope you'll wear it out again..."

Speaking of improvements, we all like nice places in which to do our shopping...

Improvement is possible... Remember a dollar spent out of town is lost forever!

It seems that one of Hollywood's greatest comedy teams, Dean Martin and Jerry Lewis, are going to dissolve their partnership after 10 years.

Mr. and Mrs. Lonnie Roundtree and Mr. and Mrs. Ray Roundtree, visiting here from California, met with an unexpected and unwelcome visitor last week...

Our friend, Mrs. J. W. Stokes, underwent major surgery at 8 o'clock this morning in a local hospital...

Shirley Ariola Is Party Honoree On 17th Birthday

Miss Shirley Ariola was honoree recently at a slumber party on her 17th birthday anniversary.

Enjoying this occasion were seven friends of the honoree including Diana Fowler, Glynda Lewis, Orvilla Hubbard, Elizabeth Castee, Ann Ariola, Maricene and Evelyn Revell.

BILLIE JEAN STROEHLE

Billie J. Stroehle Gets Scholarship to Sherwood School

Billie Jean Stroehle, daughter of Mrs. Clarence Stroehle, 315 South 7th St., has been awarded a summer and winter vocal scholarship to Sherwood Music School...

Billie Jean has been a music pupil of Miss Lilly Larsen for three years and was valedictorian of the Memphis High School graduating class this spring.

Miss Larsen is presenting Miss Stroehle in piano and voice recitals in Memphis and also at her summer home in Central City, Colo., during the summer.

Newlin Mother's Club Meets Here In Kesterson Home

Mrs. Bill Kesterson was hostess to members of the Newlin Mother's Club at her home on 618 South Seventh Street Thursday afternoon.

Mrs. D. C. Messick was in charge of a short business session after which the afternoon was spent visiting.

Delicious refreshments were served to Meses. Leo Koeninger, M. E. Ellis, Ralph Scott, D. C. Messick, D. W. Lawrence, P. E. Gardenhire, Fred Hemphill, Miss Isabelle Walker and visitors.

The next meeting will be in Memphis in the home of Mrs. Leo Koeninger. Mrs. Frank Ellis will serve as co-hostess.

Lemons Home Scene for Class Meeting Tuesday

Mrs. R. C. Lemons was hostess Tuesday morning at her home on South Sixth Street to members of the Friendship Sunday School Class of the First Methodist Church.

Mrs. N. A. Hightower, teacher, presided during the business meeting at which the officers for the coming year were selected.

Plans were made at this meeting to make scrapbooks for shut-ins to be given at Christmas time.

Mr. and Mrs. C. A. Crow had as house guests the past week their daughter, Mrs. Mae King of Fort Worth, Mr. and Mrs. Oscar Culwell of Childress and Mrs. Sid Bush of Las Cruces, N. M., who came up to attend the Giles picnic.

Sunday visitors in the home of Mrs. Donna C. Lane were Mrs. Mellie E. Foster, Mrs. Donnitia Jones and Mrs. Darwin Nix, all of Wellington.

Misses Shirley Miller, Peggy Evans and Elizabeth Wilson are vacationing this week in Denver, Colo.

We Replace AUTO GLASS while you wait! Foxhall Motor Co.

Lovely Bridal Shower in Allen Home Compliments Miss Marjorie Morrison

The home of Mrs. M. C. Allen, 1321 Bradford, was the scene Monday evening for a lovely bridal shower honoring Miss Marjorie Morrison, bride-elect of Ray Crawford.

Co-hostesses for the courtesy were Misses Jan Goodnight, Patsy Moore, Tanya Fletcher and Meses. Clifton Burnett, Allen Monzingo, Frank Monzingo, Bill Miller, Thurman Ellerd, Ernest McMurry, Roger Monzingo, Claude Hickey, Foy Young, J. C. Rogers, Johnnie Brewer, Will Goffinet, Harry Graham, Bob Stephens, Garvis Davis, Monte Alewine and Myrtle Howard.

Guests calling between the hours of 8 and 9:30 p. m., were greeted by Mrs. Clifton Burnett and presented to a receiving line composed of the honoree, Miss Morrison; her mother, Mrs. E. S. Morrison; the bridegroom-elect's mother, Mrs. R. H. Crawford and his grandmother, Mrs. C. W. Crawford.

Mary Karen Crawford, sister of the bridegroom-to-be, presided at the guest register.

Miss Tanya Fletcher and Mrs. Roger Monzingo played appropriate piano selections throughout the party hours.

In the dining room, the table was laid with a cut work linen cloth and centered with a miniature bride and bridegroom backgrounded with a double-wedding ring arrangement.

Carpets Accent Tweed More Color This Summer

TV production, more is seen with carpets behind the scenes in front of the camera. The winter market produced a rich crop of exciting new patterns — which still continue to be in technical improvement. In technical improvement, a widening of color range and all the lines, and flexibility of choice for the carpet.

The real news in the picture lies in technical advances. The carpet manufacturers are busily trying to create the best carpet possible in terms of serviceability. Sure steps are being taken to bring a better than ever product to the homemaker in terms of beauty, design, wear, and easy care.

Paper De-Inking Process Patented

AUSTIN — A University of Texas chemist and a former student have patented a de-inking process that may help solve the critical newspaper shortage.

The method of de-inking waste paper was developed by Dr. Norman Hackerman, chemistry department chairman, and William J. Krodel, now employed by a Los Angeles, Calif., chemical company.

The new process is both economical and efficient. The price of de-inking waste paper would average well below the cost of new paper, the chemists say. Processing would be done at paper mills.

The resulting product is equal in color, brightness and strength to original pulp, and can be used in making more newspaper or other cellulose products.

JOE C. DARROW

Gas Company Official Promoted

A Lone Star Gas Company vice-president, Joe C. Darrow, has been placed in charge of all distribution properties of the company, according to an announcement by Chester L. May of Dallas, senior vice-president. The properties consist of company-owned and operated gas systems in Memphis and 450 other cities and towns in Texas and Oklahoma, May said.

Darrow took over his new assignment Saturday, with headquarters in Dallas. He served as general manager of the Fort Worth Division of Distribution from 1951 until January, 1954, and had been vice-president in charge of the division since then.

Darrow's successor in Fort Worth is A. P. Rowland, recently elected vice-president, who began his career with Lone Star in 1924.

Visiting in the T. J. Spry, Sr., home over the weekend were Mr. and Mrs. Paul H. Durham. Mrs. Durham was the former Ima Ruth Spry.

Mr. and Mrs. Tommy Spry and son of Alvarado visited over the weekend with Mr. and Mrs. T. J. Spry, Jr.

Miss Freddie Star Johnson and Miss Pat Goodnight visited in Dumas with Mr. and Mrs. Darrel Johnson and family over the weekend.

Visiting here with relatives over the weekend were Mr. and Mrs. Ernest Ballard of Lubbock.

LOCALS

Mr. and Mrs. L. E. Rydell and children, Helen and Robert, of Walla Walla, Wash., spent the weekend visiting in the homes of Mr. and Mrs. Gerald Knight, and Mr. and Mrs. Burl Smith. Mrs. Rydell is the former Mildred Baker, who resided with her parents, the late Mr. and Mrs. Walter Baker, on their farm northwest of Memphis on the Amarillo highway. She is also a sister of Morgan Baker of Memphis.

Mrs. C. B. Hickey is in Quitaque where she is visiting her mother, Mrs. W. C. Eddleman. Mrs. Eddleman fell recently and broke her arm.

Mr. and Mrs. E. L. Pritchard and family of Carlsbad, N. M., arrived here Sunday for a four or five day visit with his parents, Mr. and Mrs. Wiley Whitely.

Mr. and Mrs. Roy McClure visited in Wichita Falls from Thursday until Saturday with Mr. McClure's sister, Mrs. Rudolph Miller and family. Rene Gayle Miller accompanied them home.

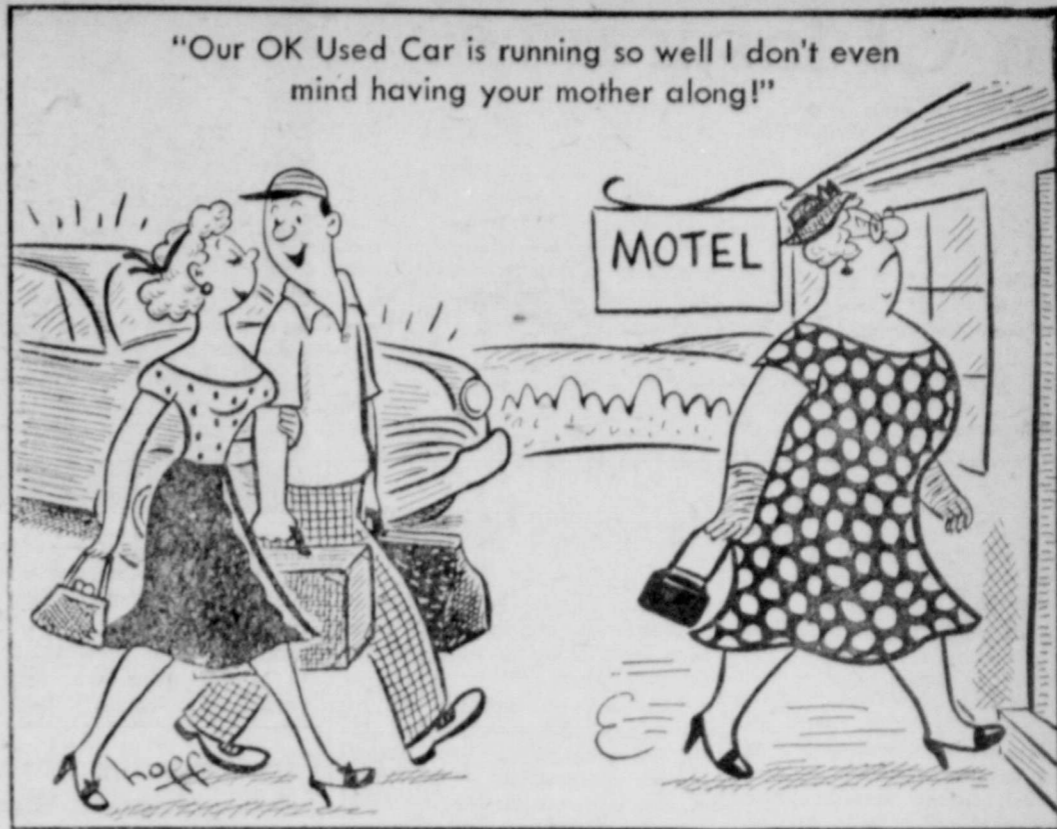

Visiting in the Herschel Combs home Saturday evening were Mr. and Mrs. J. E. Norman and daughters of Lubbock, Mr. and Mrs. L. A. Dickey and Mrs. Paul Brewer and Glenda Lou, all of Wellington.

Mrs. A. J. Welch and daughter Susan Lynette of Borger visited here over the weekend in the home of their parents and grandparents, Mr. and Mrs. Herschel Combs. Mr. Welch was in Tulsa where he served as an usher in a friend's wedding.

Mr. and Mrs. J. E. Roper left Sunday morning for Stovall Wells where they are vacationing.

Mrs. Marjorie Batson of Amarillo visited over the weekend with her sister, Mrs. Mary Bownds.

Marie Cocanougher returned home Saturday from Idalou where she has been visiting.

Whether you're headed for motoring or marital bliss, a feeling of confidence is "half the battle." That's why so many people rely on OK Used Cars. They drive them with confidence because they're inspected, reconditioned and dealer-warranted in writing. Their Chevy dealer's volume trading means extra savings and selection, too!

CAN YOU ESTIMATE THE PRICE OF YOUR VISION?

You can't put a price on good vision. It's worth a lot to see well, so you probably wouldn't hesitate to spend whatever necessary to make certain you'd go on seeing properly. The fee you pay for this certainly would be for professional services—not for the glasses alone. Don't be satisfied with anything less than thorough eye care. Seek professional advice—not glasses at a price.

There's More To Good Vision Than Glasses at a Price

LOOK FOR THIS SEAL

Be sure the optometrist of your choice displays the seal of the Texas Optometric Association. Members are pledged to a rigid code of ethical practice. The seal's purpose is to protect the visual welfare of the public.

See for yourself... only the '57 Servel

gas ICE-SERVER REFRIGERATOR

gives you all these exclusive advantages

- ICE CUBES WITHOUT TRAYS**
Only Gas Servel Iceserver freezes ice cubes automatically and stores them in a basket. Just reach in — take one, or a bucketful — they're so handy! No trays to fill, spill or refill. A truly modern miracle of automatic ice-making!
- NO MOVING PARTS**
Only Gas Servel utilizes a tiny gas flame to give you constant, balanced cold. There's not a single moving part in the entire freezing system! Nothing can wear out, nothing to cause trouble or repair expense.
- NO NOISY VIBRATION**
Only Gas Servel is truly silent. No motor to start and stop, no on-and-off cycles, nothing that can cause noisy vibration. A Gas Servel is fun to live with... and never a whisper throughout its long life!
- 10 YEAR WARRANTY**
Only Gas Servel offers a full ten year warranty! Five years longer than any other refrigerator. Servel can make this assurance because these refrigerators are truly trouble-free. Nothing to wear out, nothing to break down!
- DEPENDABLE GAS FUEL**
Only Gas Servel gives you the dependability of this really modern fuel. Continuous cold, without annoying on-and-off fluctuations. Constant service through all weather — even when power lines fail. And thanks to the silent flame of gas, you enjoy year after year of efficient, economical service.

Step up to a Servel GAS REFRIGERATOR and SAVE
at **LONE STAR GAS COMPANY**
