The Tradegy Of Traffic Progress!

Possibly the greatest tradegy of modern man and the darkest spot on an otherwise steady story of growth in transportation is the continuing increase in traffic fatilities in our state. Traffic fatilities in Texas exceeded the 3,000 mark for the first time in history during the 1964 calendar year, the Texas Department of Public Safety reported.

Col. Homer Garrison, director of Texas DPS reported that the traffic death book for 1964 was closed at noon Monday, March 15, with a total of 3,006 fatilities on the streets and highways of Texas. "The total for last year represents a 10 per cent increase over the 2,729 lives lost in 1963," Garrison said. "Coupled with this tragic loss of life is the staggering economic loss of almost \$487 million.

One of the reasons for the increase in traffic accidents from 399,917 in 1963 to 454,762 during 1964 was the increase in the number of miles driven. The number of miles driven in the state increased from 52.3 billion in 1963 to slightly over

But the truly tragic aspect of the picture is that the death rate (the number of fatilities for each 100 million miles of travel) was 5.4 during 1964, compared to 5.2 during 1963. The 1964 figure was the highest death rate since 1957, when it reached 6.0.

And citizens cannot expect the picture to get any better. But we are reminded of the story of the man who was worried and heartsick because things were not going as he felt they should. A friend of his told him to cheer up, things could get worse. He cheered up and sure enough, things got worse.

We are well into the 1965 driving year, and statistics indicate that fatalities are far ahead of last year's tragic record. Unless each driver accepts the responsibility of operating a figured in national news a couple motor vehicle properly, we can only look forward to an even of years ago. greater total of death and suffering for the present year, Col.

Garrison said that acceptance of responsibility and the resolution on the part of each driver to follow the rules of safety could aid materially in reducing tradegy during 1965 and the years

Modern man has progressed in transportation to a point undreamed of by our forefathers, but with this progress has come death, injuries, and heavy property damage. Will we ever limits on police invasions of privbe able to reverse the trend of increasing death rates, year acy. And the uses of electronic year? Not unless the driving public accepts the responsibilities. Only the driver behind the wheel can avoid accidents. We must remember every time we put the key in the ignition that the majority of accidents happen within five miles of our home, if we are involved.

This sort of electronic evidence is becoming more and more a factor in court proceedings. To a still greater degree, where the results of wiretapping are not directly admissable, they give the police leads from which they are able to pick up offenders.

But obviously there need to be listening are not limited to the police. Manufacturers of concealed listening devices report an extensive market not only for official purposes (such as counter espionage) but also by private tectives and the security forces of commercial firms.

Careful establishment of the rights of individuals in this area is important. For "the right of the people to be secure in their persons, houses, papers, and effects" include security from wiretaps and hidden microphones.

Ever since we have been in Spearman the cry from the high chool crowd has been for a teen town or something to do.

No one was apparently able to work up enough concern among the parents to get an old-style teen town off the launch pad, so the need was never filled.

Now, a local man has gone a ong way out on a limb and opened up one of the new, strictly supervised teen clubs.

It is a club where teen agers may dance, have Cokes, and snacks, no-cooked food, and have that entertainment they have been complaining about.

Mrs. Bob Gordon brought a very unique and inspiring meditation, "God's Post Office", in which she compared the life of a Christian to a post office. One would hardly connect a post office with anything exciting or romantic, but through that little window come messages that change lives. Any day's mailbag may be packed with joy, sorrow, despair, or delight. A post office is not a source of messages; it is a medium. The post master does not keep the mail, but sends it out to others. Christians are post offices for God, receiving and conveying messages for Him.

The friend and neighbors for their chief rating method employed is that of the Audimeter which, when ing our sad bereavement. Our apconnected to sets across the country, is supposed to record a cross section of what the nation is watching. It records only that the set is tuned to a station, not wheher it is being watched, or whether it is enjoyed or is hated.

Mrs. Rayford Hutcherson's subect was "Communications In Today's World." She stated that language is the most important element in any culture. It is one of man's most triumphant accomplishments. Yet this wonderful gift of language often goes unapperciated. We communicate in a world surcharged with tensions, whose very destiny may well depend on the wise and juidicious use of language. To meet the demands of this Herculean task of communicating, man has set in motion countless machines and devices. such as the IBM machines. Hall County District News Soil Conservation

A recent irrigation survey in Hall County portion of the Hall County Soil Conservation District shows that approximately 19,729 acres are irrigated. All but 700 acres are irrigated by sprinkler method using 154 sprinkler systems. In 1958, approximately 8827 acres were irrigated. 8,177 acres were irrigated by sprinkler method using 110 sprinker systems.

Sprinkler systems are well adapted to the conditions found in the Hall County Soil Conservation District. Sprinkler systems systems can be used on the more sandy soils that would be impossible to irrigate using other methods. They can be used on rolling topography where land preparation for surface irrigation would be uneconomical. Sprinkler systems are also well adapted where infrequent supplemental irrigation is needed to meet crop re-Federated Club women are turnquirements. Read your BIBLE daily GO TO CHURCH SUNDAY

Can this reversal of the ancient commandment really make sense to any reasonable man?

Yet look around you. Doesn't it seem as if this is the rule that too many people are living by these days? The result? Selfishness, bigotry, hatred for groups and individuals . . . war.

Is it really possible for you to "Love thy neighbor as thyself?" Take this question with you to the place where you worship. There are no guarantees of "instant goodness"-for you or anyone elsewhen you step inside. But you will find people searching there, as you are, for truer values in an uncertain and troubled world. This week, worship with your family in your church or synagogue. nd put your Faith to work all week long.

If you think you're seeing more and more Plymouth Furys on the road, you're right.

This is the hottest-selling Fury in history.

Here's why:

and more Plymouth Furys on the road.

Fury for '65 is the biggest, plushest Plymouth ever ... but still solidly in the low-price class.

Big on the outside, its wheelbase is a whopping 119 inches. Big on the inside, plenty of headroom, legroom and hiproom. And new curved-glass side windows add to Fury's contemporary styling. The plush part is the beautiful interior. There's rich upholstery to compliment the exterior finish, wall-to-wall nylon carpeting and a smart, readable instrument panel. No wonder you're seeing more

Band Booster Club Makes Plans For Salad Supper

The last regular meeting of the Band Booster Club was held Thursday evening, March 18, at the Band Hall. By unanimous vote of the members present, meetings were changed from a regular monthly status to "called meetings", date and time to be set by the Executive Board. The Executive Board will continue to

meet regularly. The business meeting was presided over by the newly-elected president, Mrs. Gerald Knight. Folowing routine business, the club discussed additional plans for the band's trip to the "Six Flags Over Texas Band Festival" in May.

The club voted to sponsor Salad Supper for the public early in April. This will be a repeat of the highly successful salad supper of last spring. Mrs. H. R. Stevenson was elected General Chairman and definite plans will be announced later.

I believe that the good work done by the FBI in its school would be vastly complemented by providing a training academy to school a large number of police officers new to the profession and whose work will be on the "beats" and in patrol cars before they may expect promotions into administrative ranks.

The fight against crime requires trained police officers. I feel very strongly that the problems created by crime and delinquency have reached the point in this country where affirmative action must be taken to provide better training.
