VOL. 16 NO. 24 JUNE 15, 1989 BRACKETTVILLE, TEXAS

LIGHTNING STRIKES TOWNHOUSE

At approximately 9 p.m. Tuesday night, during the electrical display, a loud boom was heard. It was a cause for alarm for the people in the Townhouses on Fort Clark Springs. Lightning had hit the Townhouse of Mr. & Mrs. H. C. Barker.

The chimney on the north side of the townhouse was struck, but the wiring for an air conditioner right next to the chimney was also hit causing a power surge to the other side (south side) of the building. The fire was contained by the BVFD to the upstairs section of the townhouse causing damage to only two bedrooms.

Mr. & Mrs. Barker were in San Antonio at the time and returned immediately after being informed of the incident.

BRACKETT JUNIOR HIGH CHEERLEADERS ATTEND CAMP

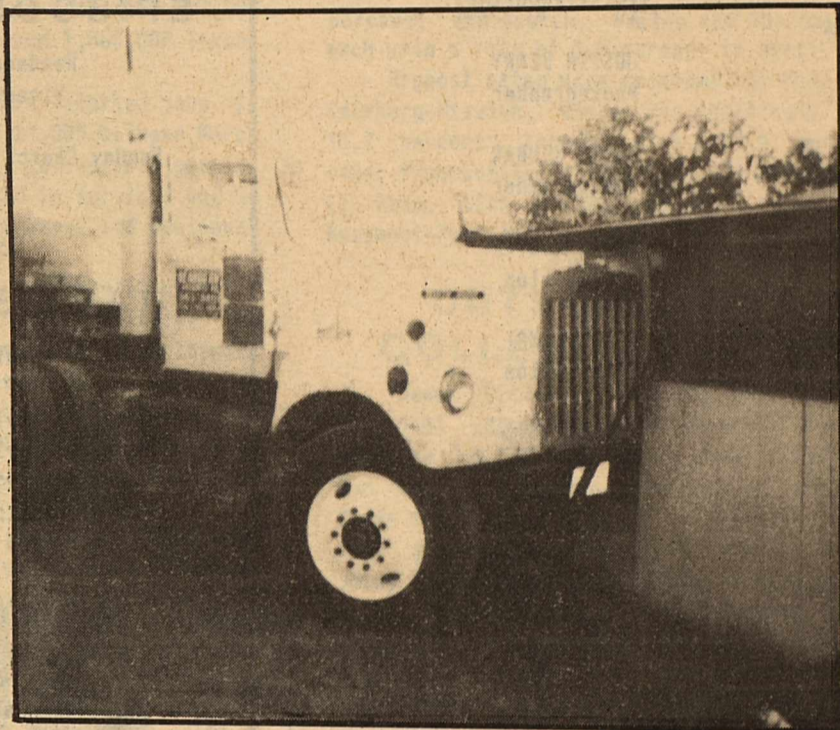

The Brackett JHS Cheerleaders attended camp June 4 - June 11, 1989 in Del Rio at the Eagle Room. They were under the direction of Melba Elder Studio of Dance and Cheer. With the supervision of Mary Lou Retton, and the University of Texas Cheerleaders.

This camp is mainly a weeks training for girls Pre-K age through High School. It is directed each year by Melba Elder who has directed Gymnastics, Dance, and Cheer for the past nine years.

This year the camp had girls come as far away as Crystal City, Cotulla, San Angelo, Mission, Del Rio, and Brackettville.

It has been a very exciting and learning experience agreed all the cheerleaders. They are all hoping and looking forward to be able to attend camp again next year.

University of Texas Cheerleaders.

18 WHEELER HITS HOUSE

Friday morning at approximately 3:30 a.m., one of the 18-wheelers at Seargeant Concrete with trailer intact decided to loosen its brakes and roll down the hill and hit the back of Merced "Menchi" Flore's home. No injuries occurred.

DEL RIO FLEA MARKET UNEMPLOYMENT RATE REVERSES TREND

Del Rio will welcome another new business this week-end June 17th and 18th when "Del Rio Family Flea Market" opens its doors to patrons and vendors from 9:00 a.m. to 6:00 p.m. Saturday and Sunday.

Tom A. Notestine, formerly of San Antonio, is the General Manager of the business. He is building at 1800 Avenue G. The market will front on 3 streets and is only a block off Avenue F. Mr. Notestine is well experienced in this type of business having owned several shops featuring antiques, jewelry and sports memorabilia in various Flea Markets in San Antonio over the years.

The Del Rio Family Flea Market will carry everything from children's toys and clothes to tools for the man of the house, etc. Also new items will be featured and at the opening will be original Arts and Crafts items, such as hand painted tee shirts and beaded kerchiefs.

Call 774-0187 for your reservation to insure one table or a dozen tables and pick up extra money to buy that Dad a super Father's Day present, or find the present at the Flea Market. Better yet come by and pick out whether you want an Inside Large Space or shady space.

Mr. Notestine is a Vietnam veteran having served in the Marines on D.M.Z. and being awarded the Bronze Star.

The downward spiral of unemployment rates in Texas reversed itself last month and climbed upward for the first time in many months according to Mary Scott Nabers, Commissioner on the Texas Employment Commission. An actual unemployment rate of 7.0% was recorded in April. That is up from 6.3% in March.

"While we certainly do not like to see unemployment rising," Commissioner Nabers said, "the current rate is no higher this year than it was this time last year."

In 1989, there were an estimated 575,900 unemployed in the STATE, and 7,666,000 Texans were employed.

The count of nonfarm salaried jobs in Texas increased by over 21,000 between March and April, due primarily to seasonal growth. The largest gains occurred in services and in trade, particularly restaurant and amusement industries.

Among the 27 major metropolitan areas for which data are currently available, the majority mirrored the statewide unemployment trend, with higher rates in April. Only two MSA's had April rates which were lower than their March rates. Nine MSA's had rates below 6.0 percent in April, and only four areas had rates above 10 percent.

The areas with the lowest unemployment rates in April were Bryan-College Station,

with a 4.6 percent rate; Lubbock, at 5.0 percent; and Austin, Dallas and San Angelo, each with a rate of 5.6 percent in April.

Highest rates were recorded in: McAllen-Edinburg-Mission, where the April rate was 16.7 percent; Laredo, with a 13.4 percent rate; Brownsville-Harlingen, at 11.8 percent; El Paso, with a 10.3 percent rate; and Beaumont-Port Arthur, at 9.6 percent.

OUTSTANDING COLLEGE STUDENT

James Bitter was recently selected for the 1989 edition of "Outstanding College Students of America," based upon scholastic and extra-curricular activities at Southwest Texas State University at San Marcos. A May 1989 graduate majoring in Finance at SWTSU, James had been selected by the Faculty of the School of Business for a scholarship award presented on April 28 at the Business School Awards Ceremony at Southwest Texas. Scholarship awards are presented to Senior students who have attained a minimum grade point average of 3.5 out of 4.0 at SWTSU.

James is the son of C.J. and Pat Bitter of Dallas and the grandson of Willie Jo Dooley of Brackettville.

James is well-known in Brackettville having worked as a Paramedic with the Kinney County Ambulance Service since 1982. He continues working with the Spring Branch Volunteer Ambulance Service in the Bulverde area where he resides.

THANK YOU!!

A personal THANK YOU!!! to the mothers who took the time out of their busy schedules to make sure the Brackett Junior High Cheerleaders made it back and forth to camp in order to be their best this coming school year!!!!

BRACKETT DROP-OFF AT NASH-JEAN'S

COUNTY EXTENSION AGENT-AGRICULTURE

BY ALAN L. MCWILLIAMS

Well, we received some much needed rain over the weekend. I had just over an inch at my house but would be interested to hear from those of you out in the county if you had more or less.

I am still getting around to meeting everyone in the county, but if you are in the courthouse, feel free to come by the office for a visit if you have the time. We are never too busy that we can't sit down and discuss a few things.

For those of you who fancy yourself as a "green thumb", I was over at Mr. Sterling Evans home in Fort Clark Springs with our District Extension Horticulturist, Loy Shreve, from Uvalde, the other day and we spent the morning grafting persimmon trees. We also checked the progress of some walnut trees that were grafted last year. These walnuts look great this year. They are planted from native trees and then cut off and an improved variety is grafted on the main trunk. The trees do so well due to the adaptability of the native root stock. But given time (approximately 3 years) they will produce a superior quality nut. Mr. Evans has planted these also on his ranch north of Brackettville.

Did you know that cats, dogs, people and more oftenly, cattle can be susceptible to danger of drinking too much water in extremely hot weather? The danger arises when dehydrated cattle are given unlimited access to water. Water intoxication can be fatal and results when thirsty cattle drink more water in a short period of time than their bodies can handle.

Sheep and goats are also susceptible to water intoxication, but cattle are particularly susceptible because of the large capacity of their upper digestive system and the inability of their bodies to switch quickly enough from conserving fluids to getting rid of excess fluids.

Extremely thirsty cattle may, in a very short time, drink far more water than they need to replace that which they lost since their last drink. Ordinarily, the kidneys would eliminate the excess, but simply cannot handle the load. When this happens, water accumulates in the tissues.

One of the first signs of water intoxication, especially in calves, is red urine due to blood pigment in the urine. Other signs may include muscle tremors, a wobbly walk and excessive licking of the body. The animal may also walk with its head and neck extended upward as though staring at the sky. Cattle usually recover with no assistance, but extremely dehydrated cattle who consume large quantities of water usually die.

As a rule of thumb, on a cool, overcast day, a calf weighing 350 pounds or less, would probably need no more than a gallon or so of water. On a hot, dry day and with little or no shade, that same calf would probably need about five gallons of water.

The best solution for water intoxication

is prevention. It is best not to let dehydrated cattle have all the water they can drink until their bodies have had time to adjust.

If you need more information, please feel free to contact the county extension office in Kinney County at 563-2442.

SHRINE CLUB NEWS

BY BRUCE CLEMENTS

On Tuesday, June 6th, Dorothea and I left for El Paso for the Texas Shrine Association Competition. The rest of the Alzafar Red Roadster Unit joined us on Wednesday. They were Marge and Jack Taunt, and Jeanette and Kenneth Hildreth of Del Rio and six members and their ladies from San Antonio. We had been practicing for this competition each Sunday evening for the past 5 weeks and felt we were ready to compete against the best.

Thursday we unloaded our cars and were allowed to make one practice run on the course. We walked out and looked it over, then started our cars and went thru our maneuvers. The rest of the day we spent cleaning and polishing our cars and giving them a last minute tune-up. Prior to the competition each unit is inspected, both personnel and vehicles. This is usually done by Army Personnel, but this time it was by the Border Patrol, which was much stricter than the Army.

Our inspection time was 11:41 a.m. Friday morning. By 10:00 a.m. we were ready for it, and we had to stand there and sweat while waiting our time. We were afraid to sit down for fear of wrinkling our uniforms. Slowly the time passed as we watched other units being inspected. Finally, 11:41 a.m. arrived and the two Border Patrol Inspecting Officers informed us they were ready for our unit. One officer inspected the personnel and the other the vehicles. I guess practice in their profession made them experts in this line of work, for they didn't miss anything. However, we passed with flying colors.

Following the inspection, we had 30 minutes to get our vehicles serviced and out to the arena as we were to ride at 12:11 p.m. Everything was scheduled to the minute. There was a penalty if you were not on time.

At 12:11 the head judge said, "Alzafar Red Roadsters are you ready?" Our unit colonel signaled we were and we entered the arena, and began our maneuvers. Here the sweating stopped and the driving began. You are allowed not less than 8 minutes or more than 10 minutes to complete your maneuvers. You draw penalties for being too fast or too slow. There are seven judges on the field, and after completing the maneuvers the judges total their points then an average is made for the total score. This is added to the inspection score to arrive at a winner. Winners would not be announced until 3:30 p.m. Saturday during the awards ceremony. This may seem foolish to drive to El Paso, spend 4 days just to ride for a maximum of 10 minutes.

Saturday morning dawned very hot and we assembled at 9:30 a.m. for our downtown parade. The street was wide but very rough, but luckily we got thru it with only one breakdown. Following the parade, not wanting to brave the heat any longer, and not waiting for the award ceremony, Dorothea and I left for Midland where we visited my son, Dennis and his family on Sunday, then on to Brackettville.

If everything goes according to plan, we will all be in Toronto, Canada July 3 thru 7 for the Imperial Shrine Competition. Here the competition will be tough. Should be about 45,000 Shriners there. Wish us luck.

B.I.S.D. ANNOUNCES ADVANCED PLACEMENT TESTING

Advanced placement testing will be conducted at the Education Service Center, Region 20, on July 29, 1989. TEA Code 21.724 states that a student in a primary grade level shall be given credit for a grade level and advanced one grade level on the basis of a board-approved advanced placement examination if the following conditions are satisfied.

- 1) The student scores in the 90th percentile or above on each section of the examination;
- 2) a school district representative recommends that the student be advanced; and
- 3) the student's parent or guardian gives written approval of the advancement.

Junior and Senior school students shall be given credit for a subject on the basis of a board-approved advanced placement examination in a subject if the student scores in the 90th percentile or above on the examination. A student given credit in a subject on the basis of an AP examination will have the examination score entered on his/her transcript.

To be eligible for advanced placement testing, a BISD student must have demonstrated a ranking of at least the 90th percentile on the 1988-89 California Achievement Test. Identification will be required of all students at the test site. To register for Advanced Placement testing, please contact Steve Mills, Jones Elementary Principal, no later than June 21, 1989. 563-2492.

PUBLIC NOTICES

COMMUNITY COUNCIL DISTRIBUTING COMMODITIES

The Community Council of Southwest Texas, Inc., will be distributing commodities on Tuesday and Wednesday, June 20, & 21, 1989 at the Community Council Office at 310-A East North Street. (Sunshine Food Co-op., Bldg.) down the street from Ray's Grocery Store in Brackettville. **PLEASE BRING YOUR OWN BAG!**

All members will be served thru the front of the building in the Brackettville office. **FIRST COME FIRST SERVE.**

If you are not an applicant authorized representative and you are picking up commodities for someone, you are required to bring a dated authorized permission statement everytime you pick up for any participant.

Rules for participation in the program are the same for everyone without regard to age, race color, religion, sex, handicap, national origin, or political belief.

NOTICE OF OPPORTUNITY

Notice is hereby given that the Community Council of Southwest Texas, Inc., is seeking financial assistance from the U.S. Department of Transportation under Section 18 Grant Program. Grant funds will be used to operate a Rural Public Transit System located at 429 W. Main Street, Uvalde, Texas, for Dimmit, Edwards, Kinney, LaSalle, Maverick, Real, Uvalde, Val Verde, and Zavala counties and to purchase at least four (4) vehicles.

Copies of the grant proposal are available for inspection by the public at 429 West Main Street, Uvalde, Texas. Any person wishing to request a public hearing on the proposed project must submit that request in writing to Community Council of Southwest Texas, Inc., P.O. Drawer 1709, Uvalde, Texas 78832-1709, prior to June 23, 1989.

VOLKSMARCH JULY 8 & 9

Brackettville -- The Volksmarch on July 8 & 9 at Fort Clark Springs is for anyone who likes to walk, swim or ride a bike. The Selma Pathfinders, a member club of the American Volkspart Association, is sponsoring six non-competitive events designed to involve the whole family in outdoor recreation. The events, 10 kilometer walks, a 25 kilometer bike ride and 20 meter lap swims, will start anytime participants choose between 7 a.m. and Noon on Saturday, July and Sunday July 9. A Saturday evening "Nite Walk" will allow hikers to start between 4 p.m. and 6 p.m. to finish before 8 p.m.

Volksparts are organized events for people who like to get outside, regardless of their age. These aren't contests of speed or endurance, but opportunities to enjoy nature, and earn a sense of pride in accomplishing an event. Participants go at their own pace, but must complete the event before the set finish time. Swimmers, for example, can pause and rest between laps, but must remain in the pool to successfully complete the event.

Anyone who pays the registration fee and completes the required distance is declared a winner, and will receive a medal embossed with the Fort Clark Springs logo. Those who complete more than one event will receive bars that attach to the medal.

Registration for the initial event medal and bar is \$5.00. Additional event bars are \$2.50 the day of the event. Participation without an award or credit is free. Dogs, on leashes, are allowed on Volksmarch trails.

Friendly Selma Pathfinder club members will operate control points and offer free candy and drinks to participants. The 10 kilometer walks will be along the wooded paths and back roads of Fort Clark Springs. The 25 kilometer bike ride on Saturday will include a stretch of Highway 131 between the Fort and Spofford. Swimming events will be in the giant, 1.5 million gallon swimming pool just past the Las Moras Inn restaurant.

The registration/start point will be the Nat Mendelsohn Activity Center on Scales Road. Food and drinks will be available all day under the shade trees directly across the road from the Activity Center.

For Volksmarch information, please contact Gus Spradling, 13635 Oak Meadows, Universal City, Tx. 78148, (512) 658-8576, or Penny Nixon, Fort Clark Springs, (512) 563-2493.

VACATION BIBLE SCHOOL MONDAY

All children from age 4 to grade 6 may attend the Vacation Bible School that starts on this coming Monday, June 19.

The Monday through Friday VBS at the First Baptist Church is from 8:30 until 12:00 noon. The activities are varied. This includes Bible stories, singing, play, mission stories, refreshments, arts and crafts and much more.

A group of 35 young people and their leaders from Salem-Sayers Church of San Antonio will be present all week to lead the children.

The High School Youth from 7th grade up will meet from 7:00 to 9:00 p.m. each night, June 19-23.

Commencement or graduation night is Friday, June 23, at 7:00 o'clock.

The Salem-Sayers group will present an interesting program this Sunday night, June 18, at 7:00 o'clock at the local First Baptist Church. The public is invited to be present to see and hear them.

SCHOOL BOARD MEETING

The June 12th meeting of the Brackett ISD School Board started with two board members absent. The minutes of the last regular meeting that were mailed out were approved. On the old business agenda was the calendar for the next school year. After a small discussion it was approved. School will begin August 21 for the teachers inservice and on August 28th for the students. The last day of school will be May 24, 1990.

First on the agenda for new business was Mrs. Susan Harrison, School Guidance Counselor, to explain the TEAMS first grade results and the EXIT level results. The first grade had an 86% mastery overall coming up slightly from last years first grade. This will be the last year to have TEAMS tests for the first grade because of Senate Bill 40. The EXIT level test was a make up test given to those students that failed a part of the original test or were absent for it. It is necessary that this test is passed in order to receive a diploma. Only two students passed the math portion which was taken one day; and none passed the English section taken a different day. These results are not good, but the students have two more tries to pass.

Next were discussions on the budget, a budget amendment for summer maintenance projects due to unexpected costs for hiring extra teachers this year because of student growth, the financial report and the appraisal district budget which was approved.

Tabled until a second meeting this month was the Property/liability/vehicle insurance, hospitalization insurance proposals, the bank depository bid on a CD, (three banks have bids in, with a spreadsheet for a comparison to be ready for this meeting), an audit bid with the top two companies to be invited, the bleacher repair, and an update on compliance with laws for schoolboards.

The bids for the gym floor repair is for the July 10th meeting.

A report on the statement of 1989 school trustee election recount was read with all counts the same as election day.

A discussion was held on the re-entry of home school children, children that are being taught at home by parents qualified and correspondence courses. Testing is done frequently to be sure that home taught children are on par and up to grade level. The problem with a child returning to the public school system is determining if the the correspondence school is certified with TEA and the testing to determine which grade the child will be placed in. The board is looking into what they are required to do by TEA.

The Career Ladder was discussed with 32 teachers at level 2 and 4-5 maybe will be on level 3 next year. The Career Ladder monies paid by the state is paid percentage wise monthly, but BISD opted to pay the teachers a lumpsum in July. The '87-'88 evaluations are used for the '88-'89 career ladder with the teachers paid at the end of the '89 school year.

The administrative reports were given, then public forum with all visitors quiet and into the executive session to discuss personnel resignations, new hiring and a high school principal search.

TEMPLETON SISTERS

The Templeton Singers of East Texas are one of the big attractions of Alamo Village.

The beautiful, talented trio will sing at 7:00 o'clock Sunday night at the First Baptist Church.

You'll love the Templeton Ladies' rendition of "In the Garden", "Amazing Grace," and a couple of other favorites 7:00 p.m. Sunday at First Baptist Church.

COMMISSIONERS' COURT UNOFFICIAL MINUTES

The Regular Commissioner Court Meeting for June was called to order with all Court Members present.

The minutes for May 8th and June 2nd were read and approved.

All monthly bills and officers reports were checked and approved.

Diana Zertuche gave a presentation of the Cafeteria Plan and was appointed Insurance agent of record by three votes for and 2 abstaining. Joe Garza, Tommy Seargeant and Ruben Fuentes voted for and Rose Mary Slubar and Bill Bizzell abstained.

A discussion was held with Mr. Mosley, a representative of Blue Cross and Blue Shield, about life insurance. Discussion was also held about finding a new Life Insurance Carrier.

A discussion was held about needed additional storage room. Mr. Bizzell suggested that the County build additional shelves in the Tax Collector/assessor's vault to store all of their records. This would then leave space upstairs for the County Auditor and County Clerk.

The County Clerk was authorized to purchase 5 more sets of ballot boxes.

The annual budget workshop was announced to be held on June 19, 20, and 21, 1989, from 8 a.m. until 5 p.m.

Dr. Agustin Q. Luz was appointed County Health Officer again. Since Dr. Luz is out of town, he is to come in on his return to take his oath of office.

A County representative for purchasing Texas Surplus items was appointed.

A discussion was held for purchasing a personnel carrier pickup for the County road Crew. This was approved. Authorization was approved to advertise for sealed bid for this vehicle. The budget was emergency amended within the budget line items.

Mr. Ralph Beard, President of the Fort Clark Springs Board, met with the Commissioners to discuss a storm warning siren for Fort Clark Springs. It was agreed by the Court that a warning device was needed for Fort Clark Springs. The sirens located in the city cannot be heard in some parts of Fort Clark. Some research will be done to decide what is to be done and where to put the siren and to find out what the cost will be.

Misc. line item in the amount of \$636.47 was approved to be amended from the over paid taxes line item and the truck maintenance line item.

Building rental from Lloyd Davis was discussed with Mr. and Mrs. Davis. Discussion will continue on room layout and cost of rent. No decision.

The hiring of a full time Janitor was discussed. A Contract for cleaning the County buildings with Larry Dodge was also discussed. No decision was made at this time.

The Financial Plan, Sec. 3 Plan, and the Code of Conduct for Kinney County, Texas was approved. This is for the grant for the Senior Citizens' Center. A building, the old Kinney County Jail Building, was designated

to be renovated and added too for the Senior Citizens' Center. This building is not being used and no one foresees a better future use. It is in an excellent location and has ample room for parking and expansion.

Low Income Home Energy Assistance Program with TDHS implementation of grant funds and the authorization for administration was approved. The Judge received the contract on June 12, 1989 and it required 30 day action.

Executive Session was held to discuss personnel. No action was taken when in open session.

Meeting was adjourned.

A special meeting was called June 14, 1989 to authorize the County Judge or acting County Judge to sign a memorandum agreement and to consider an interlocal agreement between Kinney County, Edwards County and the City of Del Rio regarding a Narcotics Trafficking Task Force. The agreement needed to be included with a grant application that had to be in Austin on the morning of June 15, 1989. The grant was for approximately \$273,000.00.

Also the Sheriff's budget needed to be amended for \$974.07 to pay unpaid bills. The \$974.07 was taken from several other line items within his budget.

The County Judge, Tommy Seargeant was not available so the Court appointed Commissioner Bill Bizzell to sign the agreement.

CHAMBER OF COMMERCE

Thursday's Chamber of Commerce started a few minutes late, but traditionally with the minutes of the last meeting being read and approved first.

President Jim Runyan stated that he would make his opening remarks later in the meeting and explained to all members present that any person that is a member of the Chamber of Commerce may vote.

The first item on the agenda was replacing delinquent board members. Article 2 section 6 of the bylaws states that those persons delinquent in dues shall be removed after notification in writing. A letter will be sent to those members notifying them that they are delinquent.

The Chamber of Commerce has been invited to participate in the Seminole Indian Scout Parade on June 17th. A discussion was then held on who could help get the float ready (the Chamber has one in storage) & who could get a pickup to pull it. Members in attendance volunteered to help.

Next on the agenda was a proposal on the waste site that was held over from the last Chamber Board meeting. Jim Runyan stated that the majority would rule. This item was left for this meeting to be voted on so that all members would have a chance to discuss it amongst themselves. Mr. Hirsch reports that he has a discussion with his Commerce and Industry committee members and at present

would like to withdraw the motion for a resolution stated at the last meeting. It was voted on and passed. With this Mr. Hirsch motioned that he would like to send a letter to Senator Judith Zaffirini stating that we approve of her resolution to make rules and regulations for the (NORM) waste disposal sites. It was passed unanimously.

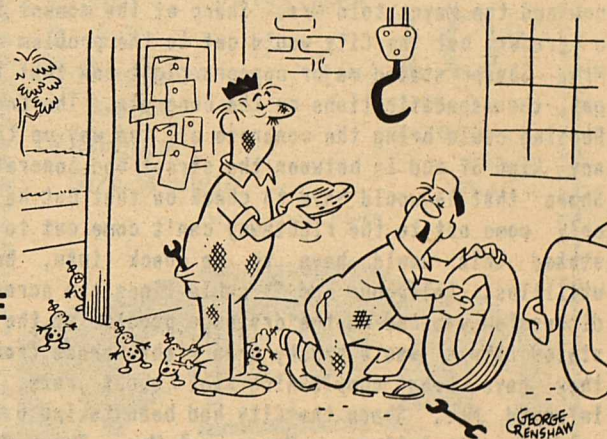

President Runyan now states his opening comments saved especially for this by saying he would have had trouble voting on the resolution as he felt the Chamber of Commerce should not be considered a political committee, but was pleased with the way it turned out with us giving support to Senator Zaffirini.

A note of interest was brought to the members attention that Texcor has an option to buy 900 acres south of their present site until 1991.

A discussion was held on putting out a guide book of some sort to bring newcomers to Brackett. A tourism committee with Glen Seaver and Penny Nixon to start it was formed.

A discussion was held about contacting the Park System about the State Park and hurrying it along.

Items for a Budget draft will be at the next meeting.

INSPECTIONS DUE FOR June

CITY COUNCIL MEETING

Mayor Vito La Gioia called the Regular Council Meeting to order at 4:30 and ask for roll call. All Council members were present. Mayor La Gioia announced there would be a public hearing later on in the meeting on Central Power and Light rate increase. The minutes of the regular and special meeting was approved. Also approved was the City and Utility financial and operational reports. Mayor La Gioia gave a report on several items.

The first item on the Mayors report was the Enterprise zone but due to the absent of Mr. Charles Trost and Mr. Ted Connors the Mayor table this item till later on in the meeting. The next item was Utility bill late charge. Mayor stated this late charge had always been in effect just not enforced, but as of August 1, 1989 the late charge would again be enforced. Late charge will be 1.8 of the utility bill.

Mayor next item was on water usage he stated "we seem to be having a problem all over and a drought. We are trying to conserve water and we are asking everyone to cut back on their water usage as much as they can and try to help us out a little bit". Next item was concerning the purchase of some more software to put the rest of the Citys operation on computer which will be the bookkeeping and Mayor stated he would be checking into that. Councilmember Saenz ask the Mayor if water usage had been advertised to let customers know what is expected of them and the Mayor answered "Not yet we just brought it up and it will be in this weeks paper. Flyers were suggested, asking to help conserve water, these flyers will be handed to customers as they come in.

Housing Authority report was given by Mrs. Linda Sharp, Housing Director. Mrs. Sharp mention that drainage was a main concern right now and the Mayor told Mrs. Sharp at the moment the City did not have a grader, but the City would get to the problem as soon as possible. Mrs. Sharp stated major concern right now that the Housing has is to get the specifications on the concrete. The Engineer asked if the Housing could bring the concrete all the way up to the street to avoid any kind of mud in between the street and concrete. Mayor told Mrs. Sharp that he would have to check on that but he thought they could only come out to the rightaway can't come out to the street. Mayor stated this would have to be check into, but thinks that the utilities, telephone and TV cable lines ran across the front. More discussion was had on the drainage problem at the Housing. Mrs. Sharp stated there was a brushy area right across from unit 28 and 29 and they have been complaining alot about rats, field rats. Mayor informed Mrs. Sharp the City had been taking a few lots at a time, sending out letters. Mayor ask Mrs. Sharp to give the City the location and they would send out a letter. Mayor said we have to take that a step at a time until we can get the owner to cooperate to clean it and if they don't then the City would clean it. Mayor informed Mrs. Sharp the Housing Authority owed the City in lieu of taxes since 1982. Mrs. Sharp said the Housing Authority was given an extention till next year on the taxes if they would agreed to pay \$100.00 on the arrears. Mayor stated he would go back and check the minutes but this needed to be resolved that it had been carried on for quite awhile. Mayor La Gioia asked Mrs. Sharp if there was anything else and Mrs. Sharp replied, "Yes, one problem that we been having lately, there's a lot of conflict, I don't know if you can call it conflict, but its very hard for me to perform with the tenants the way I should when they are coming to the City with their problems; and instead of refering them back to me, there is a lot being said. I really feel if anybody was to come with any problems, they should be referred back to Housing Authority; and if the Housing Authority does not meet their satisfaction and does not meet their needs, maybe some other action could be brought up. I feel it would make it a lot easier to do my job if I could handle the problem as it happens, instead of having a third party involved." The Mayor asked Mrs. Sharp if she had a third party that she referred to and she answered, "Not one in particular, there are several of them." The Mayor told Mrs. Sharp that he would check into that at a later time.

Mayor La Gioia asked Mr. Trost or Mr. Connors for a quick rundown on the Enterprise Zone. Mr. Connors explained that Grant money and low interest loan for State or Federal Government was a plus. It was also to encourage existing businesses to reinvest and expand, creating jobs. It's a tool to use to get State & Federal Funds for Beautification projects around the City and to encourage outside

business establishments to come. The Mayor thanked Mr. Connors.

Mayor read a petition to vacate, abandon and close portions of Gove Street in the City of Brackettville, Texas submitted Sterling Evans and Sharon Toft Trant. Council approved closing portion of Gove Street.

After the executive session, 2 employees received a raise, uniforms were approved for the office girls, some outside equipment and tools for the crew, and a dental plan for the employees, the Mayor and Councilmen will be added to the City Health Insurance Plan.

Mr. Kevin McMann, CPL representative, made his presentation on the CPL rate increase. He explained CPL proposed a 4 step plan: 1990 - 16% increase, 1991 - 11% increase, 1992 - 7% increase and 1993 - 6% increase. From 1993 to 1998, keeping rates flat for those years except when fuel goes up or down. Those will be adjusted. Since 1983, CPL has not raised rates, but decreased them 26% since then. Mr. McMann went on to explain why CPL needs a rate increase in detail.

Mayor LaGioia read Ordinance #262 approving the rate schedule to be charged by Central Power and Light Co. and the City of Brackettville, Tx. providing for schedules, conditions, severability: and repeal of conflicting ordinances. Council passed and approved this ordinance.

Mayor LaGioia reported that Chief Fritter went to a Crime Scene Search Course at Southwest Community College in Uvalde.

Meeting adjourned at 5:33 p.m.

ENTERPRISE ZONE PROGRAM

The City of Brackettville is currently working on an Enterprise Zone Program. The Enterprise Zone Program would provide meaningful and practical incentives to promote urban and economic development, creates jobs, and stimulate capital investments.

The Enterprise Zone Program is derived from the following principles.

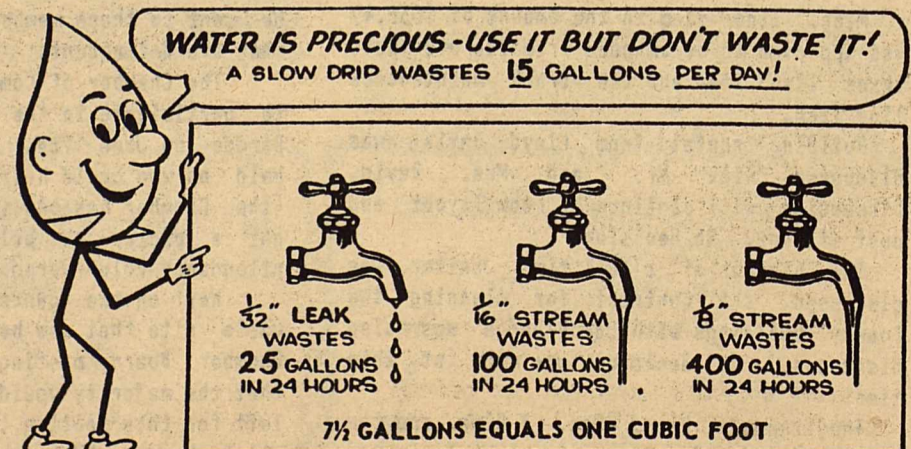

1. To encourage business investment and job creation, with an emphasis on the retention and expansion of existing businesses.
2. To improve the general appearance of the City and quality of life by providing incentives that promote economic growth.
3. To enhance, expand and diversify employment opportunities.
4. To develop a management tool that coordinates and facilitates capital investments and removes unnecessary government regulatory barriers in the City.

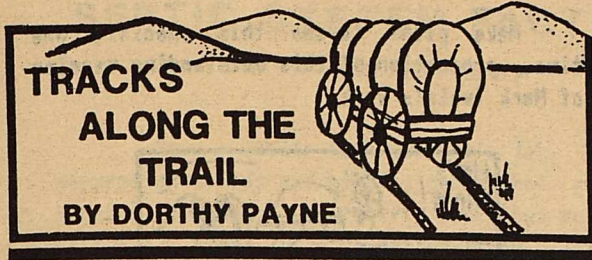

S/S Vito LaGioia, Mayor

NOTICE TO ALL WATER USERS

The City of Brackettville needs your cooperation in conserving water as much as possible. We are pumping water from the Edwards Aquifer and the water level has been dropping due to usage. We have not had enough rainfall to recharge the Aquifer.

Please check for leaks at your water faucets, toilets, and etc... Avoid watering lawns at the hottest part of the day. Try and cut down on everyday use of water. Now is a good time to get into the habit. Please help us, help you.

The southwest Juniper is a scraggly shrub-tree with ragged bark and drooping branches. Not much notice is paid to the Juniper because most people favor the pinon, fir, spruce, or the ponderosa pine.

The Junipers back ground is clouded, sometimes it is called a cedar, and sometimes a cedron. They are really members of the cypress family. Because their wood is resistant to rot and insects these trees are favored for fence posts.

Alligator juniper is known by its checkered bark, and gnarled appearance. This tree usually lives five hundred to eight hundred years and some will live a thousand years and have measured sixteen feet or more around.

Another common species is the Juniper Communies which is more sturdy than the others. There are more than one hundred seventy varieties of juniper which will grow in all kinds of soil, and usually pinon and juniper are found growing side by side.

Rodents, fox, elk, antelope and domestic animals feed on juniper and in the mountains of New Mexico these trees house more than forty species of birds.

The cones of the juniper doesn't look like most pine cones, more like a berry. The second season growth of green shiny fruits are called "French Genievre" and used to flavor gin.

Juniper is used all over the world for many purposes, like shrimp boats, pencils, incense, and to vine grapes in vineyards. The Pueblo Indians use the wood for drums, clubs, bows, and to build fires to smoke skins. They are also cooked and eaten as greens as a side dish with chicken. The twigs and berries are made into a dye of soft camel brown. The wood is very good for stoves and fire-places but keep it screened because it will always pop.

The Juniper Monosperma is a one seeded tree and can grow as tall as fifty-five feet and sometimes as wide at the bottom as it is tall.

The Pueblo use its greens for sour stomach, for eye, ear and throat washes, and for skin rash. It is used in some prescriptions in modern medicine.

REFLECTIONS

BY PRESTON TAYLOR
FIRST BAPTIST CHURCH

I've met a man who owns a house that cost him ten million dollars. That's his once a month "week-end" shanty. The man has a couple of other houses where he "hangs his hat" which he calls home.

The wealth that one has in this life is temporary. We don't hold earthly possessions long. Eternal wealth is far superior to

earthly riches. Would you be interested in knowing how you may be wealthy forever?

The beginning place of wealth is with Jesus. We must all repent of sins and trust Christ as the Savior and Lord of life. The Bible says all the riches of God are in Jesus (Col. 2:3).

The Christian must be faithful to the Church if he would have eternal wealth. Jesus loved the Church and gave Himself for it. Since Christ paid the supreme price for the life and fellowship of His people, I certainly need to love the Church. Other members need me even as I need them.

We can increase our wealth beyond this life by giving financially to the support of God's work. My wife and I give one tenth of our income to the local church. Then we give beyond this amount to other causes. A long list could be given of specific areas of contribution, but that's not needed here.

We can be helpful, kind, and encouraging to others. People everywhere are hurting. We share life with those who have to walk through the dark days of life and God will reward us for it.

We will have a richer life in the glory land if we "do all things to the glory of Christ." In fact, the Bible says the Christian is to do everything for the glory of Christ. We don't need to worry about any "credit" for ourselves. The only abiding glory is that which honors God.

Jesus is building mansions in heaven today. The "only stuff" that He can put in that building is that which we send up ahead of our arrival. Are you and I building up a bank account in heaven for our future eternal well-being?

Two truths are undeniable. One is that whatever we have on this earth is going to be left behind when we die -- every bit of it. Secondly, one day the earth is going to have an "Universal conflagration" and everything that man makes and stores up is going up in flames. Heaven is the only safety vault that will withstand the ravages of death and time.

CENTRAL POWER AND LIGHT COMPANY

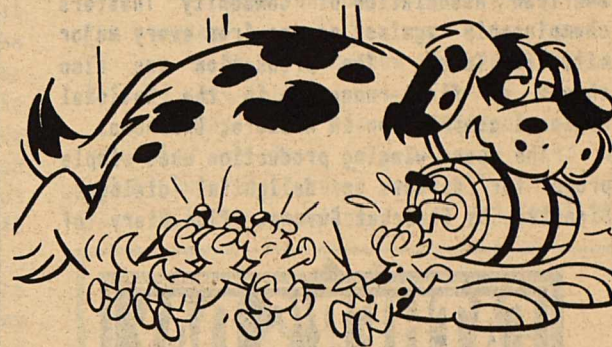

Unit 2 of the South Texas Project Electric Generating Station reached 100 percent power late Saturday evening, June 10. It is currently generating over 1,260 net megawatts of electricity of which Central Power and Light Co. customers are receiving approximately 317 megawatts. CPL owns 25.2 percent of the nuclear power plant.

"A little less than a year ago we welcomed Unit 1's operation at 100 percent power. Unit 2's 100 percent power achievement marks the completion of STP's construction and testing era," said Tom Shockley, CPL president and chief executive officer.

On Sunday afternoon, Houston Lighting & Power Co. officials began the crucial 100-hour nuclear steam supply acceptance test. The consecutive 100-hour test must be accomplished for warranty information and

before the plant can be considered for commercial operation. A reactor trip, which drops the plant from full power to zero output instantaneously, will also be performed at the 100 percent power level.

Upon successful completion of all 100 percent power tests, STP's managing owner, HL&P, is expected to declare Unit 2 available for commercial operation. The Public Utility Commission also must make a declaration of commercial operation before CPL and HL&P can include the plant in their rates. Commercial operation is expected in mid-to late June.

ONE TIME PERFORMANCE

by Penny Nixon

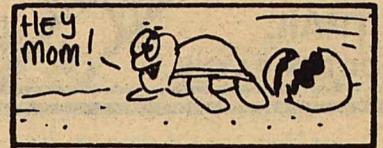

"The Diary of Adam and Eve," an award-winning, one act musical production will be performed in the Old Quarry Amphitheatre at Fort Clark Springs at 8:00 p.m. on Saturday, June 24. The play is based on a fictionalized story of events in the Garden of Eden written by Mark Twain. Sponsored by the Del Rio Upstagers, this production of "The Diary of Adam and Eve" won the state American Association of Community Theaters championship against groups from every major city in Texas. The production was also chosen as first-runner-up in the National Regional competition in Ardmore, Oklahoma.

The award-winning production uses simple props for a focus on delightful dialogue. Directed by Cricket Gwynne. "The Diary of

Adam and Eve" features Bruce Black as Adam, Nikki Holtgrewe as Eve, and Russell Lummus as The Snake.

This family-oriented musical production will play for one night only under the stars in the Old Quarry Amphitheater at Fort Clark Springs. Sponsored by the Old Quarry Society for the Performing Arts, tickets cost \$3.00 for adults, \$1.50 for children under 12 years old. Tickets are available at the Fort Clark Springs Adult Center, or from Old Quarry Society members. For more ticket information, please call Marjorie Love at 563-9543.

Make plans to see this special, one time, production of this outstanding version of Mark Twain's work.

Turtles give their young no care at all. The mother sea turtle digs a hole on a beach and lays her eggs, covers them with sand and then returns to the sea. The sun hatches the eggs.

**Home, Sweeter Home
 The Centsable Way**

You like your home, your neighborhood and the people who live around you. True, you probably wouldn't mind living in a newer, energy-efficient home. But, you're comfortable where you are.

Now get even more comfortable.

Central Power and Light has developed a program that can make your present house more energy efficient. It's called the **Centsable Home Program.**

What they'll do is run a **Free** Centsable survey on your house and then analyze the data. Then, they'll give you specific recommendations on how to lower your energy bills.

The recommendations involve steps like adding more attic insulation, caulking around windows and doors and putting an insulated blanket around your water heater. And installing a new properly sized central heat pump or air conditioner will qualify you for a Centsable Home Certificate from CPL.

You can either call a contractor or do the work yourself. Either way, you'll get a lower energy bill every month. And a more comfortable home.

If you're interested in the Centsable Home Program, give CPL a call. And get Centsable about your home energy use.

SEPTIC SYSTEM FACTS

by Mark Essary

How a septic tank does it's job, by separating solids and killing germs that are harmful to humans, is briefly described most of the time as "Configuration That Separates Solids From the Liquid" or "The Mechanical Devices in the Chamber" or "Baffles That Separate the Solids" or according to our infamous Texas Department of Health's construction standards "The Inlet and Outlet Devices". After seeing the real thing installed in a tank, it is hard for the laymen to visualize how they work.

The old metal tanks that were about four feet across and about five feet deep had a strip of metal shaped like a half round pipe welded in front of the inlet and outlet pipes. The curved piece of metal acts as a curtain in front of the pipes that hang down about 2 feet into the liquid. A tank is full of water all the time. When the liquid in the tank is still, it separates into three levels like water and oil acts. The light paper and grease floats on top while the heavier material like dirt and sand settle to the bottom, leaving clear water in the middle of the tank. This clear water area is where the metal curtain hung down in the tank. When more waste water is added to the tank in small doses such as washing your hands in a sink, the curtain acting like a siphon, removes only clear, separated water out into the drain field where it is seeped into the soil.

This is how the old metal tanks fail: The metal baffles rust away in about ten years leaving a path for the paper and grease to enter the drain field and eventually stopping it up. Shortly after the metal baffle rusts away, the lid and sides decay leaving only soil and grass roots supporting the roof. The problem normally shows up about two or three inches over a few days. To prevent the mistakes from being repeated in the future generations, we need to pass on to our future home builders the information that by taking the lowest bid to construct your septic system, like using the old rusting tanks, is not always the best price.

The modern tanks of today are made of concrete or fiberglass. The devices are made of rust proof pipe fittings that hang down into the clear area of water.

Engineers and sanitarians expanded the baffle theory into another chamber. This chamber is used like the first chamber except it is used primarily to let particles that are suspended in water to settle to the bottom of the calmer second chamber thus the new construction rule of two tanks or chambers for a septic system.

All the time the wastewater separating process is going on, the beneficial bacteria in the tank is digesting solids and killing harmful germs. There are two recognized processes with bacteria that go on inside the tank that depends on how much oxygen is present in the liquid. Some bacteria function without oxygen and work in a septic condition while others are more active in the presence of oxygen and does the

job quicker. A lake of river with plenty of health fish and odor free is a balance between the two bacteria. Too much of one bacteria makes a stream as lifeless as a bath tub and too much of the other is a polluted green lake or river. It all depends upon how much food we dump in the water for the bacteria to feed upon from sewer plants and trash.

CHILD CARE

By Eubie Smart

Let's face it, Moms and Dads. Just finding a childcare program for kids can be stressful enough without wondering whether they're getting a good head start in the world. Kids learn in different ways, and we want to pick the program that's best for each one. And what about the more basic questions like, "Will my kid be safe here for 8-10 hours every day?"

Stories about childcare are everywhere. We all hear about long waiting lists and how expensive childcare can be. And every once in a while, one of those awful stories comes out about a child who was injured or abused while in someone else's care.

Politicians, businesses and government all have suggestions for solving childcare concerns. But what can parents do?

I decided to look into this, and it turns out that parents have more choices than I thought. And I found that the more informed parents are when they choose, and the more attention they pay to a program after that, the more eager childcare operators are to do what parents really want.

What kinds of options are out there? Well, there's family care in the home of a relative or neighbor: there are 200,000 licensed, for-profit childcare centers; and there are religious programs, too. Many parents hire a nanny, or use plans paid for by their employers.

Just because a program is expensive doesn't mean it's good. Experts say making the best choice means asking other parents how their kids do in a program, and visiting the program yourself - you are the best judge of how your own child will do. And never use a program unless you can drop in anytime, unannounced.

I came across many checklists for comparing options. Some of the questions they include are:

1. Are first aid kits filled? Do fire extinguishers and smoke alarms work? Are cleaning supplies and poisons locked away?

2. Do caregivers have references? Special training? How many kids per adult? (Many programs are licensed: most aren't. A license doesn't guarantee quality, but they do mean certain rules must be met. Call a local consumer office - in the blue pages of your phone book to see if a license is required.)

3. Is the playground fenced? If it's a large center, do visitors and children sign in and out?

4. Is food stored and prepared safely? Do kids and adults use good

cleanliness skills?

5. Do sick children stay home?

6. How much of each day is filled with planned activities?

7. What about fees for half-days, overtime, sick children?

And here are questions care givers say you can ask while your child is in a program.

1. Are kid's pictures or projects hung up and changed often.

2. Do care-givers tell you what your child did that day? How he or she is doing overall?

3. Does your child talk happily about the program?

4. Do you know new employees? Do they talk to your child?

Many state consumer offices can help you find childcare in your area. And the Labor Department has a new hotline for all your childcare questions. Call 202/523-4486.

Pete and Rachel Van Maren are proud to announce the birth of their new daughter, Leah Pierce on Sunday June 4th. She weighed 7 pounds and was 21 inches long.

She has a proud big sister, Kara, 2 1/2 years old.

Her maternal grandmother is Ms. Allen May of Rivera, Texas.

Her paternal grandparents are Mr. & Mrs. James Van Maren of Corpus Christi.
