around Muleshoe

Bob Graves, manager of the city swimming pool, said the pool will close for the year at 7 p.m. on Thursday, August 18. Up to that date, the pool will operate at regularly scheduled hours.

Two Muleshoe students are among the 785 University of Texas engineering students recognized as honor students for the 1977 spring semester by Dean Earnest F. Gloyna of the College of Engineering. They are Randy Lynn Gregory and Larry Dale Vinson.

Judge and Mrs. Ignacious Lester of Key West, Fla., Monroe County, were visitors in the M.D. Locker home. They were very impressed with the farms, crops, land and the Birdwell Ranch in and around the Muleshoe area.

They were travelling the United States and reported temperatures of 120 and 125 in Nevada and Arizona.

Miss Marie Engelking of Teec Nos Pos, Ariz., was a guest in the home of Mrs. Vera Engelking. Miss Engelking is a teacher in Red Mesa, Ariz., and just recently returned to the United States from a 35 day National Education tour of Russia.

While here, she visited her brother, E.E. Engelking and family.

Nelda Mayse, of Muleshoe, is among the 350 West Texas State University students who graduated in summer commencement on Saturday, August 13.

The ceremonies, held in the Amarillo Southwest Church of Christ, recognized 237 bachelor degrees and 127 masters degree graduates. Ms. Mayse received a master of education degree.

Fire Department At Lazbuddie Plans Meeting

The Lazbuddie Fire Department plans an ice cream social at 8:30 p.m. on Monday, August 15. They said they would like for as many of the community residents as possible to attend the event in the school cafeteria. Steve Kumrow, representative of Motorola Communications and Electronics Inc., will show film strips of their line of pagers and communication equipment. The Lazbuddie Fire Department is considering purchasing pagers for the firemen.

Ice cream will be served, at no charge, to the persons attending the meeting which has been called for better fire protection for the Lazbuddie community. Applications will also be accepted for potential firemen during the meeting.

HOW TO HIT...Head football coach Don Cumpton and his staff have been busy with football practice, with nearly 100 boys out for varsity practice. He said the Mules are progressing 'very well' and they will show their enthusiasm during two scrimmages. The scrimmages will be August 18 and 25.

'Followers' Perform At First Baptist

This week, Rev. Kenny Carter announced, "A delightful Gospel singing group from Fort Worth will be in concert for the evening services at the First Baptist Church in Muleshoe this Sunday, August 14, at 7 p.m."

"The group, known as the 'Followers' will be sharing in song and testimony about their Savior. Out of a revival in Parkdale Baptist Church, came a burning desire which molded a family into one unit, giving their lives in an effort to win the lost to Christ. There was also a desire to strengthen the lives of Christians through testimony and song," he added.

"Heading the family group is Pop Sinclair," continued the First Baptist youth minister. "A leader in the Christian Evangel-

istic music field for many years, he has been involved in teaching the word and leading music in churches all over Texas.

"Next is Larry, oldest of the Sinclair sons. Larry sings lead

School Board Budget Meet Monday Night

Two items are on the agenda for a special meeting for the Board of Trustees for the Muleshoe ISD at 8 p.m. Monday in the school administration office.

A public hearing on the 1977-78 budget for the school will be conducted and board members will consider the employment of personnel to fill vacancies.

for the group and will not hesitate to share his testimony with everyone. Going on down the line, we find the younger son, Terry. A voice major in college, he is a tremendous teacher of Christian music. Working with Terry is his lovely wife, Mona. Also holding a degree in voice, she has dedicated all her talents to the Lord. A third generation of the Sinclairs, Tony, has recently joined the group. Larry's oldest son, he adds to the instrumentation of the Followers on the bass guitar. The other person associated with the group is the talented

PEACE Justice Report

Speeders who got 'foot heat' on the accelerator paid for their mistake in Justice of the Peace Court during the past week. A total of 13 speeders who were cited by the Texas Department of Public Safety, appeared in court.

Next on the list was no driver's license, as a total of five persons were cited into the same court. One person was charged with turning when unsafe and one person was charged with no Texas registration.

Late week activity at the Bailey County Law Enforcement Center included the arrest of two illegal aliens and one person for worthless checks.

Farm Bureau Asks Input On Resolutions

September 1 is the final date set by the Bailey County Farm Bureau for members to adopt Farm Bureau policies. Persons who are members of the county organization are asked to make their recommendations.

Resolutions adopted will become Bailey County Farm Bureau policies for 1978, explained a spokesman for the local Farm Bureau office. They said that approved resolutions dealing with state and national issues become recommendations for the Texas Farm Bureau convention.

Resolutions approved at the state convention dealing with state matters become state policies, and likewise, national resolutions adopted become recommendations to the annual meeting of the American Farm Bureau Federation which will be held in Houston in January.

Deadline for making the recommendations in Bailey County is September 1. Make the recommendations in writing to Bailey County Farm Bureau, P.O. Box 408, Muleshoe.

Crops Aided By Rain, More Moisture Needed

Weather Programs Started In 1946

Weather modification was first started in 1946 in Yellowstone National Park by three men. Dr. Vincent J. Schaefer, Tom Henderson and a Dr. Vonegut started the experimentation by taking a beer can, building a fire in it, and tying a string to it. They swung the can around over their heads over a clear, warm pool of water. The smoke particles

instantly produced a cloud. According to a paper by Dr. Schaefer, if moisture is available, particles to help produce it will form a cloud.

County, Area Record Rain Friday Night

In the Progress and West Camp areas of Bailey County and on through the Lazbuddie area, rain produced up to an inch and a quarter of needed moisture Friday night.

Ben Roming, just west of Progress reported amounts of one to one and a quarter inches.

Southwest of his home, .9 fell at the Joe Sinnacher farm, while Charles Farmer, on to the South of the Sinnacher home, received only a good shower.

Shanks Ivy in the Lazbuddie community traced down amounts of up to an inch in that community and Foster Fertilizer at Lazbuddie said they received .3 with up to an inch in Lazbuddie and north of the community.

Muleshoe received only a good shower from the rain during the night Friday.

initial experiment, several years of experimentation followed. They experimented with smoke, particles, dry ice, eventually settling for silver iodide as the best basis for weather modification programs.

After 29 years of experimentation, Dr. Schaefer said he had concluded "since it is unlikely that anyone would object to such an operation and since such operations would have dramatic economic and social benefits, such activities would have an educational value that would benefit everyone."

He added, "I strongly recommend adoption of such activity by the agricultural communities as soon as possible. There are so many benefits that would occur that it is unlikely that any serious problems would occur."

Don Bryant of Better Weather Inc. brought the paper to the Journal and also gave additional information.

According to figures, he said that the U.S. Government has boosted the use of weather

cont. on page 3 col. 4

Hail Damage Hits Around 5,000 Acres

Bailey County Agriculture Agent Spencer Tankley has been through the area that received rain this week and reports, "All the rain has been good for us. It will help in a lot of ways. However, it apparently will not especially help the cotton where the rain was heaviest, as there was a lot of

Three Way Registration, School Set

Registration and classes will both begin on Monday, August 29, at Three Way Schools at 8:20 a.m., according to a spokesman for the school. Buses will run and lunches will be served at the school.

Faculty in-service will be on August 23 at 9 a.m.

Football scrimmage is scheduled on August 18 and again on August 25. Thursday, August 18 at 6 p.m., Three Way Eagles will scrimmage Whitharral at Three Way. They will scrimmage the same team on the Whitharral football field on August 25.

The county agent predicts a possible 1,000 additional bushel yield for some \$6-\$10 additional water on the crop at this time. Harvest for corn is expected to be in approximately 30 days, although some ensilage cutting is being done now. He said Birdwell is approximately one-third through with their ensilage cutting at this time.

A better than average corn crop is expected, along with a 'bumper' cotton crop, he added.

Irrigated cotton is probably past the need for water, said Tanksley, although watering was conducted past the time irrigation is usually needed because of the dryness. Any watering of the crop would probably be detrimental to the crop now, he said.

Dryland cotton is presently expected to produce an average crop, although dryland's one in.

Miss Tri-County Vies For Miss Wheatheart

Candy Moore, Miss Tri-County, representing Bailey, Farmer and Lamb Counties, is a contestant in the 31st Annual Wheatheart of the Nation Pageant scheduled at 3:30 p.m., Saturday, August 20, in the Perryton High School auditorium.

She is among 26 entries in this year's contest. They come from three states and numerous Texas Panhandle communities.

The pageant is the highlight event of the annual Perryton Wheatheart of the Nation Celebration which features a week's worth of activities. These include a junior rodeo, tractor pull, old timers reunion, demolition derby, parade, motorcycle rodeo, free breakfast and barbecue, and old fashioned threshing bee.

These activities will be held during this week, August 15-21.

Contestants in the beauty pageant are vying for the first place scholarship of \$1,000 to the college or vocational school of the winner's choice. Other prizes awarded in the pageant include: first runner-up, \$500 scholarship; second runner-up, \$250 scholarship; third and fourth place runners-up, individual gifts. The pageant sponsor is the Ochiltree County Chamber of Commerce.

Judges selecting the 1977 Miss Wheatheart include Bill Nelson, executive vice president of the Texas Wheat Producers Association and Producers Board; Mrs. Rosemary Clements, model and former Miss New Mexico (1967); and Mrs. Janis Geddes, co-owner of Briercroft Dance Academy in Lubbock. The women have both participated in other beauty pageants as judges, contestants or directors.

Nelson has judged two other pageants.

Contestants begin their pa-

Pep Club To Sell Journal Subscriptions

Following a recently successful subscription campaign at the Three Way School, the Lazbuddie High School Pep Club plans a subscription campaign in their community.

Members of the Pep Club plan to begin their campaign today (Sunday) and will conclude it on Saturday, September 3. The subscriptions will be turned in to The Journal on Monday, September 5.

They will be selling both new subscriptions and renewals for the Muleshoe Journal and Bailey County Journal. For each new subscription, and for renewals the Pep Club will receive a portion of the sale.

Approximately 20 girls will be working the entire Lazbuddie area with the campaign. They will be using the money for Pep Club activities.

Jeana Cole is sponsor of the Pep Club. For your subscription, if you are not contacted, call 965-2828. The member selling the largest number of subscriptions and renewals will receive a personal check for their own use.

Zimmatic Wins City Tourney

After leading the city league in Men's Softball at the end of regular season play, the Marauders lost the championship to Zimmatic who became city champions last weekend.

In the semi-finals, Zimmatic defeated Spurgeons and the Marauders bested the Outlaws to gain the playoff slot.

With the first game Friday night in the playoffs, the Marauders were downed 18-8 by Zimmatic, sponsored by Western Sprinkler. During the Saturday night finals, Zimmatic defeated the Marauders 4-0 to take the championship title.

CANDY MOORE MISS TRI-COUNTY

PRACTICING CATCHES...During football practice, the Mules are practicing passing and catching passes during the two-a-days. Two-a-days ended Friday, and the Muleshoe Mules will practice once a day this week.

Mules Make Comeback Following Obscurity

After years of obscurity brought on by farm mechanization, the American mule is today being returned to the plow. It is even shoved into the limelight at rodeos and fairs, the Texas Department of Agriculture reports.

Across the country, a resur-

gence of interest in mule-raising and use is on the upbeat in increasing response to everything from rising fuel and tractor prices to the desire to return to nostalgic techniques of a simpler time.

Mules may have been neglected but never completely discarded, however, because there have always been a number of tasks for which man has found no adequate replacement. When it comes to towing felled logs down treacherous, winding mountain trails, nothing is better than a mule. And because of its smaller feet and surefooted manner, mules can take hunters and other sportsmen farther into the wild than most other animals.

Wilson Hired As Principal At Lazbuddie

During a meeting of the Lazbuddie School Board last Monday night, Mickey Wilson was hired as the new high school principal. A native of Muleshoe and graduate of Abilene Christian College, he has been the Lazbuddie School Athletic Director for the past two years.

Other new teachers included Rose Ann Smith, elementary teacher; Alba Wilcox, migrant teacher; Debbie Weir, sixth grade and science teacher and Dennis Owen, assistant coach and science teacher.

Registration and the first day of classes will be combined on Monday, August 29.

Find Colon Cancer Early Advises Cancer Expert

Like all other cancers, the key to successful treatment of colon cancer is finding the cancerous cells while they are few in number and the chances for a cure are greatest. The colon or large intestine is one of the body's largest organs and functions to remove waste materials. The lower 5 - 8 inches of the colon is known as the rectum.

"It is most uncommon to diagnose cancer of the lower bowel in individuals under the age of 40 unless they have a heredity factor that places them at a higher risk," explains Dr. Rulon W. Rawson.

Dr. Rawson, associate director for scientific operations at the National Large Bowel Cancer Project at M. D. Anderson, notes that the highest occurrence of colon cancer is in individuals over 60.

Symptoms that may indicate the presence of a tumor on the colon or rectum are blood in the stools which may appear bright red or black in color, changes in bowel habits such as constipation or diarrhea, and, occasionally, abdominal discomfort or pain.

It is important to remember, explains Dr. Rawson, that hemorrhoids, which are not cancerous, often cause bleeding commonly mistaken for cancer warnings. For that reason, an early warning signal should be brought to the attention of a physician to best determine what the warning sign means.

One of the most common types of growth in the inner lining of the colon or rectum

is a polyp, a wart-like growth that can change into a cancer. About 10 percent of the population develops such growths which should be removed.

Instruments called a sigmoidoscope or colonoscope allow the physician to view the colon tract and remove suspicious samples of tissue for biopsy to determine if cancer or precancerous polyps are present.

Because localized colon cancer detected early and treated properly has a cure rate of about 90 percent, researchers have directed more attention in recent years to developing effective screening programs.

"Studies supported by the National Large Bowel Cancer Project have indicated that persons over 40 without symptoms of colon cancer can be screened by having them provide samples from their stools on special slides to determine if there has been nonvisible blood loss through the colon tract," says Dr. Rawson.

Tested on 6000 individuals in recent years, the slide test has proven useful for locating polyps and cancers. One percent of those tested were determined to have blood in the stool. Forty-two of those persons with blood in stools were found to have a removable cancer or precancerous polyp and were cured.

The key, explains Dr. Rawson, is early detection. Such screening programs represent just one positive part of an intensive effort.

Research in the areas of causal factors, preventive measures, knowledge of the body's immune system and drug treatments (to name a few) are all providing similar, positive, new directions for the goal of defeating this very common form of cancer.

Tickets On Sale For Fair

Tickets went on sale Monday, August 8, for the Panhandle South Plains Fair's star-studded lineup that will headline the 60th annual exposition here September 24-October 1.

The tickets went on sale at the fair offices and also may be ordered by mail. Mail order requests should be addressed to the fair association at P.O. Box 208, Lubbock, 79408.

Reserved seat tickets for all shows are \$6. General admission tickets are \$5.

Jimmy Carter, President, on southern states tour:

"There are no hidden meanings in our commitment to human rights. It is not addressed to any particular people or area of the world.

Do you have further questions? Call your local unit of the American Cancer Society or call M. D. Anderson Hospital & Tumor Institute's Cancer Information Service, 1-800-392-2040 toll-free in Texas, 792-3245 in the Houston area.

He that hath right, fears; he that hath wrong, hopes.

GOSPEL GROUP TO PERFORM...A special concert is scheduled tonight (Sunday) in the First Baptist Church in Muleshoe. Singers will be The Followers, a well known gospel singing group. All interested people have been invited to attend the concert said the associate pastor, Rev. Kenneth Carter.

Baptist....

cont. from page 1
 pianist, Steve Potts," said Rev. Carter.
 He concluded, "The Lord put all these folks together to present the best in Christian Evangelistic music. The Followers are known for their smoothness, close harmony, and unique arrangements. Whether in church or a concert, your soul will be thrilled and your heart blessed by the Followers. Everyone is cordially invited to hear them in concert tonight (Sunday) at the First Baptist Church in Muleshoe.

Weather...

cont. from page 1
 modification for food production and the program is almost completely agriculturally oriented now.

Following the years of experimentation, the weather modification program was brought to this area around 1970. It was instituted for a dual purpose, said Bryant. One is hail suppression and the other was to increase the rainfall amounts.

Atmospherics Inc., one of the two weather modification companies in the area, is headquartered at Littlefield. It operates in northeast Bailey County; southeast Parmer County; Lamb County and Castro County.

In these counties, Bryant said 485 subscribers include the communities of Earth, Springlake, Olton, Dimmitt, Pleasant Valley, Sudan, Littlefield, Fieldton, Spade, Amherst, Y-L and Cotton Center.

Dr. Stanley A. Changnon, Jr. and Dr. Griffith M. Morgan Jr., both atmospherics scientists reported, "About two percent of the national crop production each year is lost to hail (\$685 million), and in some hail prone areas of the Great Plains, this average loss represents 15-25 percent of crop values. Although property loss due to hail is less and is estimated to be 10 percent of the crop loss, cities and towns of the Great Plains area suffer from occurrences of major damages from hail."

They added, "One set of information used was from recent evaluations of a commercial hail suppression program in two county areas that used cloud base seeding. The average reduction in hail loss represented with it a 48 percent reduction in hail insurance loss."

The scientists cited that cloud seeding in South Dakota began in 1961 and spread from the initial counties to include other counties. They said a five to 50 percent reduction in hail damage occurred, while rainfall was increased.

Figures reported show:

	hail	rain
1972	-40%	+11.5
1973	-20%	+4.2
1974	-18%	+9.6
1975	not final	+3.9

The figures were reported by Dr. Schaefer, who Bryant said is called "The Father of Weather Modification."

Tom Henderson, who was with Dr. Schaefer on the first experiment in Yellowstone National Park, now operates Atmospherics Inc. in Littlefield.

Bryant said all research has proven that where modification programs are instituted, the amount of rainfall has been increased.

He also spoke of weather modification programs being conducted in India, and reports by Dr. K. Krishna, Dr. R.K. Kapoor and other noted Indian Scientists where they reported positive results in experimentation with the weather modification program in their country. The experiments were rain enhancement programs.

FOUR-LEGGED ALTERNATIVE...Gus Hessler is one of many Texas farmers today who have looked to the past for an alternative to high fuel and equipment costs. Here, he uses a mule to plow his 70-acre farm outside Kyle, Texas. In addition to nostalgia, mules can be very practical when there's work to be done.

Mules..

cont. from page 1
 medium-sized work and pack mules, the saddle mules and the miniature mule.

Because of genetic problems, they successfully mate only on very rare occasions. The mule is the result of the mating of a male ass, (or donkey) jack and

Rain...

cont. from page 1
 one out rows are showing better condition because there is less water stress.

"It's a little hard to say what the dryland crops will produce at this time," he added, "but if we can continue for awhile with warm nights and hot days, we will be able to produce a high fiber cotton."

In the vegetable harvest, potatoes are near completion and early onions are out. Bell pepper should be well underway by the end of the month and cabbage is about the same. He said he had noticed a few ripened commercial tomatoes, although major harvest is not expected until the end of the month.

In the hail damaged area from Highway 746 to near Needmore, and approximately two miles wide, Tanksley said some cotton was heavily defoliated and some large squares were knocked off. Some large bolls had bruises, and approximately 10 days of hot weather will be necessary to determine actual damage to the crop.

Hay has been helped by the cool weather and the rain, although more rain is needed, and one of the greatest recipients of the moisture was the rangeland in the county, which the county agent said may have received the most benefit from the recent rains.

 Think this through:
 It's too hot to go to church.

Date Set For Crusade At Lazbuddie

Following the successful first annual Lazbuddie Meet Jesus Crusade, the 1978 crusade dates have been set as July 16 through 23, 1978.

Ronald Elliott, 1977 general chairman said an organizational meeting will be called in January 1978 to select a general chairman, evangelist and singer for the '78 crusade. He emphasized that any interested layman or pastor is welcome to come to the January organizational meeting.

Elliott also expressed his appreciation and thank you to the many people who assisted with the crusade and to the newspaper and radio station personnel who cooperated in publicizing the 1977 crusade.

The Speaker Reports

by Bill Clayton

AUSTIN--The week the Legislature passed a school finance bill, I mailed to the school board trustees of every district in the State a memorandum pointing out

the Legislature's intent when it enacted the legislation.

I told these school board members that it is my opinion that the bill provides a fair approach to funding public education in all areas of the State--urban, suburban, and rural.

Of this \$945 million, approximately \$142 million was added to the equalization aid program, \$345 million was provided for salary increases, and another \$117 was included for program improvements.

The most important characteristic of the bill is the expenditure of \$341 million for the reduction of the local share of funding the Foundation School Program.

This increased funding by the State is a significant factor as the responsibility

of supporting public education is shifted more to the State level and the Legislature is "freeing up" funds for use by the local school districts.

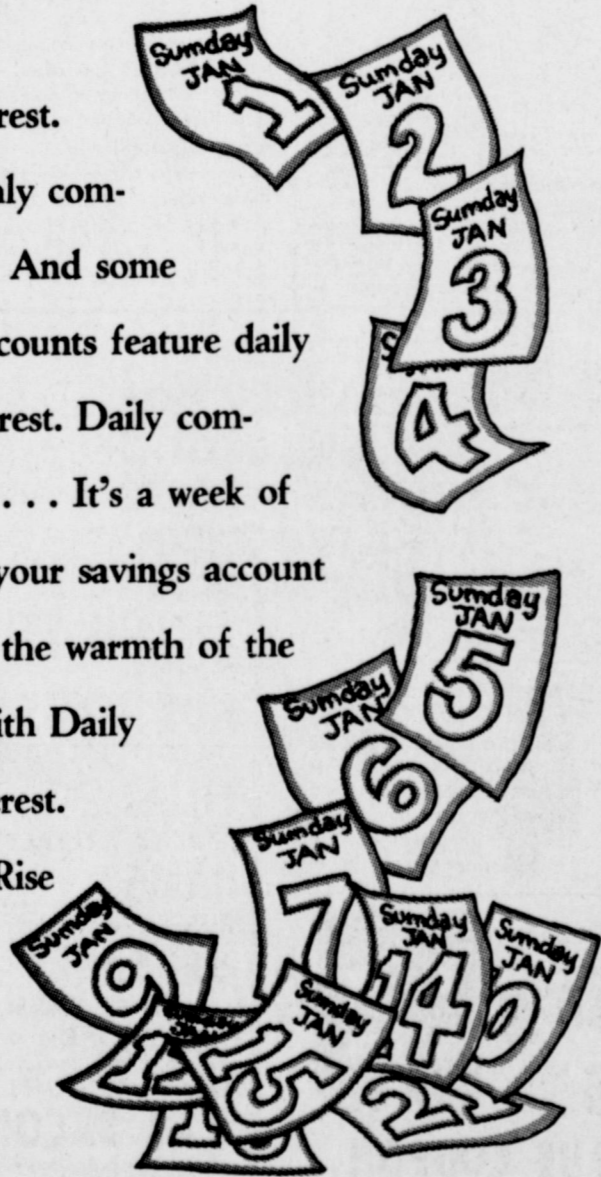

In many cases, this additional money will have to be used for program costs and other necessities in the district.

Because the Legislature believes in local control of our public schools, no mandated tax relief was included in the bill. Nonetheless, I believe the intent of the Legislature is that school boards should carefully examine the new budgets being prepared and determine whether tax reductions are possible.

 We suspect taxes will be high for some years to come.

MRS. GARY WAYNE SMITH

Miss Becky Sain, Smith Exchange Vows

Miss Becky Diane Sain and Gary Wayne Smith were united in marriage in a candlelight ceremony July 2 at 3:00 p.m. in the Trinity Baptist Church of Muleshoe. Rev. Nolan Rawle, cousin of the bride, officiated at the double ring ceremony.

Parents of the bride are Mr. and Mrs. Walter Sain of Muleshoe and the groom's parents are Mr. and Mrs. Cecil Evans of Fort Worth.

The couple exchanged vows before the altar which was decorated with a flare of white cathedral candles with gypsophilia and emerald and accented with sonia bows. Banks of greenery and candles were used on the prayer rail. Sonia roses and gypsophilia marked the family pews.

Mrs. Elbert Hamilton, organist, and Mrs. John Jones accompanied Miss Debbie Evetts as she sang "My Sweet Lady" and "Follow Me". Mrs. Jones provided traditional wedding music on the piano.

Presented in marriage by her father, the bride was attired in a formal length gown designed by the bride and made by her mother. The gown was of candlelight silk chiffon over peau-de-ange satin. The moulded bodice featured a see-through yoke with a shirred high ring neckline enhanced by rows of seed pearls. Long, loose bishop sleeves were caught at the wrist by a deep cuff and held by tiny self covered buttons. The full A-line skirt was cut to floor length in front and tapered down to create a chapel length train in back. Matching silk chiffon fell over the front and back of the gown forming a drape over the front bodice and falling from the shoulders in back was a deep drape forming a sweep train that flowed over the chapel train. Completing her ensemble was a three tiered veil of candlelight silk illusion which was attached to a Juliet headpiece of valpoint lace and tiny seed pearls. She carried a cascade bouquet of peach carnations, sonia roses, lily of the

valley, sonia daisies, gypsophilia and springeria. Silk flowers of the brides chosen colors accented the bouquet. Following tradition for something old, she wore a gold wedding band 74 years old, belonging to her late grandmother Sain. Something new was her bridal ensemble, something borrowed were shoes from her sister, and something blue was her satin garter of candlelight ribbon and trimmed in blue, made and given to her by her aunt, Mrs. Mac Province.

Mrs. Buddy Williams of Paducah, sister of the bride, was matron of honor. She wore a floor length gown of spring green floral voile, featuring a high neckline, an empire waistline and a deep V yoke with butterfly sleeves forming a cape effect with an A-line skirt held at the waist by a self fabric sash. Miss Bonnie Sain served her sister as bridesmaid. She wore a gown made identical to the matron of honor of apricot floral voile. The attendants both wore sonia daisies and gypsophilia with peach and sonia ribbon streamers in their hair. They carried a single long-stemmed sonia rose.

Flower girl was Miss Lisa Rawle of Chico, cousin of the bride. She wore a floor length gown of blue floral voile, princess style, with butterfly sleeves and self fabric sashes tied in back. In her hair she wore sonia daisies and gypsophilia with peach and sonia satin streamers. She carried a miniature basket filled with silk flowers of blue, yellow, and green sonia and scattered live rose petals down the aisle in front of the bride.

Candlelighters were Miss Shelley Sain and Tim Sain, sister and brother of the bride. Miss Sain wore a dress identical to the flower girl. In her hair she wore sonia daisies accented with baby's breath and satin ribbon streamers of sonia and peach. Mr. Sain wore a candlelight tuxedo. His boutonniere was a peach daisy.

The groom wore a candlelight tuxedo with a candlelight ruffled shirt, vest and bow tie. His boutonniere was a sonia rose. Serving his brother as best man was Alan Smith of Ft. Worth. Groomsman was Tim Mattson of Ft. Worth. They were also ushers. They wore candlelight tuxedos with candlelight ruffled shirts, vests and bow ties. Their boutonnières were sonia daisies. The father of the bride also wore a tuxedo the same as the groom's attendants.

Guests were registered by Mrs. Alan Smith, Ft. Worth, sister-in-law of the groom.

For her daughter's wedding Mrs. Sain wore a pink floor length gown with long full chiffon sleeves. She wore a pink carnation corsage. Mrs. Evans, mother of the groom, wore a daron floor length apricot floral gown with a matching long chiffon cape and a peach carnation corsage.

A reception was held following the ceremony in the Fellowship Hall of the church. The table was laid with a white cloth with sonia bows caught at each corner of the table. Centering the table was a silver candelabra holding an arrangement of sonia roses and white carnations, peach carnations, white daisies and gypsophilia. The traditional wedding cake was separated between the layers with columns and held white frosted wedding bells. Sonia sugar roses and small white bells draped each tier. The top tier held two white doves nestled under wedding bells.

The cake was encircled in an arrangement of English Ivy, sonia roses and white daisies. The cake, apricot slush punch, nuts and mints were served from crystal and silver appointments by Mrs. Richard Warren and Miss Sharon Daves. Miss Suzanne Milligan and Miss Sonya Milligan, cousins of the

bride from Azle, passed out rice bags fashioned like tiny roses and made from the material of the brides gown and shades of material of her attendants dresses.

Members of the houseparty were Miss Bonnie Carpenter, Mrs. Evelyn Moore, Mrs. Mae Province, Mrs. Leslie Mills and Mrs. Ansel Ashford.

For a wedding trip to New Mexico, the bride wore a red and white polka dot polyester jumpsuit with a detachable corsage lifted from the bridal bouquet.

The bride is a 1971 graduate of Muleshoe High School. She attended West Texas State University and graduated from Texas Tech. She teaches Special Education at Mahon Elementary School in Lubbock.

The groom served in the U.S. Navy and is an air crewman in the U.S. Naval Reserve. He also attended Texas Tech. He is presently employed with the Federal Aviation Agency in Lubbock as an Environmental Support Engineer.

Out of town guests attending were Mr. and Mrs. Cecil Evans of Ft. Worth, Mr. and Mrs. Leslie Milligan, Jr., Suzanne and Sonya of Azle; Mrs. Marshall Rawle of Chico; Mr. and Mrs. Doyle Sain, SuWanna and Ada of Dodson; Mr. and Mrs. Nolan Rawle and Lisa of Chico; Tim Mattson of Ft. Worth; Miss Betty Paul of Ft. Worth and Miss Lori Callahan of Ft. Worth.

Mr. and Mrs. Cecil Evans hosted a brunch following the rehearsal Saturday morning, July 2, at the XII Steakhouse in Muleshoe.

Reverse migration studies under way

AUSTIN, Texas (Spl.) — Two University of Texas marketing scholars have begun a research project to try to pinpoint what causes persons to move back to small towns from large cities.

To determine the influences that contribute to "reverse migration," Drs. W. Thomas Anderson and Linda Golden will survey the life styles over time plus the buying habits and attitudes toward traditional American values of about 4,500 persons who live along an urban-rural continuum radiating from a large metropolitan city to smaller towns.

They also will examine how the public and private sectors can adapt to provide services and goods to the small-town "migrants."

MRS. MARTY MCGUIRE

Mrs. Marty McGuire Feted With Shower

A shower feted Mrs. Marty McGuire, the former Miss Treena Bass, Monday afternoon, August 8, in the Muleshoe State Bank Community Room.

The serving table was laid with a white cloth. Silk flowers of orange and yellow arranged in a crystal vase served as the centerpiece. Banana punch and thumbprint cookies were served from crystal appointments by Mrs. Hal Helton, sister of the honoree of Clovis. Miss Cara Bass, sister of the honoree, registered guests.

Special guests were Mrs. E.A. Bass, Muleshoe, mother of the honoree, Mrs. Davie Engelking, Muleshoe, sister of the honoree, Mrs. Hal Helton, Clovis, N.M., sister of the honoree, Miss Cara Bass, Muleshoe, sister of the honoree, Mrs. D.M. McGuire, Muleshoe, mother-in-law of the honoree, Mrs. Audrey McGuire,

Shallowater and Mrs. Helen Beaver, Farwell, grandmothers of the honoree, Mrs. Carolyn Woods of Ralls and Mrs. Francis McGuire of Shallowater, aunts of the honoree.

Hostess gifts were a coffee maker, electric can opener and Faberware cookware.

Hostesses for the occasion were Mrs. Don McDonald, Mrs. Alfred Hicks, Mrs. Max Crim, Mrs. James Robinson, Mrs. Douglas Bales, Mrs. David Stoval, Jr., Mrs. Raymond Treider, Jr., Mrs. John L. Seaton, Mrs. Kenneth Hall, Mrs. Gordon Wilson, Mrs. Roy Miller, Mrs. Gary Dale, Mrs. Richard Engelking, Mrs. Jerry Engelking, Mrs. Darrell Mason, Mrs. Royce Turner, Mrs. W.B. Wagon, Jr., Mrs. Ernest Martin, Mrs. Jess Pendergrass, Mrs. Manuel Self and Mrs. Jim Shafer.

Tops Has Weekly Meeting

TOPS Chapter 34 met in The Bailey County Electric Community Room on Thursday, August 11, with president, Mrs. J.O. Parker presiding. Twenty one members answered roll call. Weekly Queen was Mrs. Edd Harp. First runner-up was Mrs. Dan Vinson, second runner-up was Mrs. Don Martin.

It was reported by several of the members that they planned to attend Rally Day in Pampa on October 22. Rally Day is held each spring and fall.

Out of Orbit

Pharmacist has "tried them all..." ...discovers weight control program that really works!

Pharmacist Dan Smith of Burger's Drug Store in St. Charles, Illinois is a NaturSlim "believer" after losing 18 pounds in just two weeks. After hearing so much about the NaturSlim program from customers and seeing the excellent results they were having, Dan decided to try it himself.

"In my many years as a pharmacist, I've seen and tried numerous weight-loss plans, but none have worked as well for me as NaturSlim. And NaturSlim is very nutritional too!"

After three months, Dan has not regained any of the lost pounds either, as so often happens when "rebounding" from starvation diet plans. He maintains his weight by taking NaturSlim once daily... and eating normally otherwise.

Dan says, "It was surprisingly easy, too! I didn't have to attend any weigh-ins, starve myself or do any special exercises."

With the NaturSlim program, there are no shots, drugs or long lists of forbidden foods. In fact, you are encouraged to eat a normal, well-balanced dinner every day.

The next time you are in the St. Charles area, stop by Burger's Drugs and see Dan yourself. He'll tell you personally what he thinks about NaturSlim!

Lazbuddie Young Homemakers

Plan Year's Activities, Programs

The Lazbuddie Young Home-makers met in the home of Mrs. Harrol Redwine, Tuesday afternoon. The meeting was called to compile the years work program and projects.

President, Mrs. Harrol Redwine, called the meeting to order. Minutes of the previous meeting were read by Secretary-Treasurer, Mrs. Clay Mims. She also gave the financial report.

Mrs. Lloyd Bradshaw informed members of the upcoming programs planned for each meeting. They are Dough Art, Candy Making and Decorating, Holiday Foods and Ideas, Gift Wrapping, A More Beautiful You, Tri-Angle Home Center Tour, Lamaze Method of Birth and a Spring Style Show.

Mrs. Jimmy Dale Seaton, Chairman of Social Committee, reported that a social had been planned for December 10. This will be the Family Christmas Party. Mrs. Harrol Redwine, Chairman of the Projects Com-mittee reported on the proposed projects for 1977-78. Those projects discussed and voted on were: special recognition of Lazbuddie's elderly citizens, a party for the F.H.A. Girls, provide a scholarship for a senior, Motorcycle and Bicycle Safety Clinic and help with eye examinations for school children and providing money to purchase glasses for those in need.

Members voted to have as their money making projects for 1977 the annual pecan sales and a booth at the school Halloween Carnival.

Those present discussed the upcoming Area Meeting to be held in Amarillo, September 10th. Several members plan to attend.

Refreshments were served from a table setting using a

yellow and white daisy theme. Those attending were: Mrs. Clay Mims, Mrs. Jimmy Dale Seaton, Mrs. Ronald Mayfield, Mrs. Robert Gallman, Mrs. Lloyd Bradshaw, Mrs. Darrell Mason, Mrs. Jim Collum and Mrs. Harrol Redwine.

Orders are now being taken for pecans by the Lazbuddie Young Homemakers. You may contact Mrs. Harrol Redwine at 965-2247, Mrs. Clay Mims at 965-2979, Mrs. Jim Collum at 965-2367, Mrs. Darrell Mason at 965-2953 or any Young Home-maker.

Beverly Adkins

To Speak In

Toronto, Canada

Mrs. Billy (Beverly) Adkins, daughter of Mr. and Mrs. Jack Smith of Lazbuddie, and employment manager for South-western Bell of Oklahoma City, Okla., will speak at the Interna-tional Toastmasters Convention at Toronto, Canada, August 20.

Smith of Lazbuddie will accom-pany his daughter and son-in-law on the trip. Mrs. Adkins graduated from Lazbud-die High School in 1961 and has a Bachelor's degree in Home Economics and Biology from Texas Christian University.

She has held several executive positions with Southwestern Bell since joining their staff in 1968. She is the immediate past president and treasurer of the Oklahoma City Insurance-masters Club of Toastmasters Inter-national.

Mrs. Smith is the mother of two sons. Also living in Lazbud-die is her brother, Jack Finley Smith, and living in Longview is her sister, Mrs. Katherine McKenzie.

Miss Judy Catherine Winters, C.C. Purdy Repeat Vows

A candlelight ceremony uniting in marriage Miss Judy Catherine Winters and Clifton Cary Purdy was held Friday, July 29, in the home of Dr. Bruce Purdy of Muleshoe. Rev. Bill Watson of Earth, pastor of the United Methodist Church, officiated.

The bride is the daughter of CMSgt. and Mrs. James Winters, Sr., of Panama City, Florida. The groom is the son of Mr. and Mrs. John Purdy of Muleshoe.

Surrounded by candelabums decorated in English Ivy and baby's breath with pale gold tapers, the bride, given in

marriage by her father, wore a gown of pale gold open-work lace bodice and sleeves over a skirt of polyester crepe. Her train was of the open-work lace with matching Juliette cap and tulle veil. The bridal bouquet contained the pastel colors of the wedding party in daisies and baby's breath.

Mrs. Kevin McDonald of Clovis, N.M., served as matron of honor. She wore a gown of pale pink batiste trimmed in matching lace on the bodice and sleeves. She carried a bouquet of pink daisies.

Attending her sister as brides-maid was Miss Joan Winters of

Panama City, Fla. Miss Winters' gown was of baby blue batiste with matching lace trim in the same style as the matron of honor. Her bouquet was of blue daisies. Miss Krystal Wright of Fort Rucker, Ala., niece of the bride, was train bearer. Her gown was of similar design in pale violet with a matching wrist corsage.

Steve Oliver of Muleshoe served as best man, with Dr. Bruce Purdy, brother of the groom, serving as groomsman. Buddy Meadows, cousin of the groom, served as the ring bearer.

The traditional double-ring

ceremony-concluded with the lighting of a unity candle by the bride and groom.

Out-of-town guests were Mr. and Mrs. Jim Simmons, Plain-view, Mr. and Mrs. Bob Copeland, Lubbock; Mrs. Janet Wright, Fort Rucker, Ala.; Mrs. Oley Brown, Dumas; Mrs. Bob Meadows, Lubbock; Miss Deanna Finney, Clovis, N.M.; Miss Nikki Smith, Galveston; and Kevin McDonald, Clovis, N.M.

Miss Winters is employed by Handy Dan and Purdy is employed by the Ramada Inn, both in Austin. They will make their home at 401 West Croslin in Austin.

Mrs. Jimmy Henderson Honored With Shower

A bridal shower honoring Mrs. Jimmy Henderson, the former Miss Scotti Knox, was held Sunday afternoon, August 7, in the home of Mrs. Clinton Rogers.

The serving table was laid with a handmade cut-work antique white linen over blue table cloth. A centerpiece of blue miniature carnations and flocked baby's breath around a blue pillar candle was used. Banana punch and thumbprint cookies were served from crystal appointments by Mrs. Bobby Henderson, sister-in-law of the honoree. Guests were registered by

Mrs. David Harris.

Special guests of the honoree were her mother, Mrs. Gary Knox of Haslet, Mrs. Bob Henderson, her mother-in-law, Mrs. Wayne Cox of Justin, grandmother of the honoree, Mrs. J.C. Pearson, Sr., Mrs. Bobby Henderson and Mrs. Lee Pearson both of Canyon and Miss Patti Glover of Haslet.

Hostess gift was flame orange Le Creuset cast iron cookware. Hostesses for the occasion were Mrs. George Wheeler, Mrs. Joe Sooter, Mrs. Jimmie Carpenter, Mrs. Dee Clements, Mrs. Frank McCamish, Mrs. Bobby Newman, Mrs. J.L. Saylor, Mrs. Austin Floyd, Mrs. Bernis Camp, Mrs. Betty Carpenter, Mrs. Irene Splawn, Mrs. Barbara Milburn and Mrs. Clinton Rogers.

Epsilon Sigma Alpha Meet

The first called meeting of Epsilon Chi chapter of Epsilon Sigma Alpha sorority was held, Tuesday, August 9, 1977, at 8:00 P.M. in the home of Mrs. Charles Moraw. The president, Mrs. Derrell Matthews called the meeting to order. Topics discussed as business were fall rush, the annual E.S.A. dance, and possible ways and means projects for the coming months. It was decided that the annual E.S.A. dance will be cancelled due to conflicting activities scheduled for the date of the dance.

Members attending the called meeting were Mrs. Derrell Matthews, Mrs. Wayne Tunnell, Mrs. Terry Hillin, Mrs. Terry Parham, Mrs. Grady Free, Mrs. Larry Gully, Miss Janet Ellis and Mrs. Charles Moraw. Hostesses for the evening were Mrs. Charles Moraw and Mrs. Derrell Matthews.

If you're very good, or very smart, someone will eventually discover it without your bragging about it.

MRS. JIMMY HENDERSON

and Mrs. Ramiro Nicolas, all of Bovina.

Tamira Genice Otwell

Mr. and Mrs. Robert Otwell of Baytown are the proud parents of a new baby girl born July 10 in Baytown. The baby weighed seven pounds and twelve ounces and was named Tamira Genice Otwell. She is the couple's first child.

Grandparents are Mr. and Mrs. Bill Whalin of Houston, Mr. and Mrs. Jerrell Otwell and Mr. and Mrs. Elmer Davis, all of Muleshoe.

Great-grandparents are Mr. and Mrs. Alfred Steinbock of Lazbuddie, Mr. and Mrs. Jack Lee and Mr. and Mrs. Albert Davis of Muleshoe.

Jacqueline Gonzales

Mr. and Mrs. Mickey Gonzales of Bovina are the proud parents of a new baby girl born August 9, at 1:39 p.m. in West Plains Medical Center. The baby weighed six pounds and was named Jacqueline Gonzales. She is the couple's first child.

Grandparents are Mr. and Mrs. Jose Santellana and Mr.

energy with a conservationist electric water heater

Maximum efficiency in appliances is what we're all looking for ... to save energy, save money.

That's why the CONSERVATIONIST ELECTRIC water heater is worth looking at. It saves 15% of the energy used in a like-sized regular electric water heater and delivers all the dependability of electric water heating. The Conservationist is heavily insulated on all sides so heat is retained inside the water heater ... used for what you're paying for ... to heat water.

And, you save on space above the heater because an electric water heater does not need a flue or vent.

Ask us about the Conservationist ... the electric water heater designed to use energy wisely and save.

Hearn Named Manager General Telephone Office

O.D. Hearn was named Brownfield Division Manager for General Telephone Company of the Southwest. He succeeds W.F. Morris, Jr., who is retiring. Morris has been in Brownfield since 1969, when he was named Western Area Operations Manager. In 1974, he was named

Brownfield Division Manager. Morris joined General Telephone Company of the Southwest in 1942, as an exchange repairman in Kilgore. He has held various positions in Irving, the North Texas Division, and the East Texas Division. The Grand Saline native is vice

president of the Brownfield Evening Lions Club and a member of Terry County Chamber of Commerce, Manpower Planning Committee, Terry County Radio Club, and the Independent Telephone Pioneer Association. He and his wife are members of the Baptist church. Hearn previously served since

1975, as Eastern Area Service Manager for General Telephone Company of the Southwest in Texarkana. Hearn began his career with General Telephone as a lineman in Memphis in 1956. He served in several positions with General Telephone in Robstown, Brownfield, Garland, and Texarkana. He was formerly in Brownfield for over ten years.

A native of Clarendon, he is currently enrolled in the Bachelor of Liberal Studies through the University of Oklahoma. Mr. and Mrs. Hearn have two children, and will relocate to Brownfield.

The Consumer Alert

by John L. Hill
Attorney General

AUSTIN—Are you an "impulse buyer"? For example, did you wait until the recent long, hot Fourth of July weekend to rush out and buy the first air conditioner you could find?

Did you postpone vacation plans until the last minute, then drive off with your family on a trip with no definite idea of where you would stay, what you wanted to see, or how much you could afford to spend?

Or maybe you put off replacing a lost raincoat and umbrella until the day a Texas "gully-washer" came, then had to dash into the nearest department store and grab whatever you could find that hadn't already been sold.

If these descriptions sound like you or someone you know, you may be interested to learn that they are symptoms of "impulse buying" — an affliction that can cost you time, money, and satisfaction in the long run.

Our Consumer Protection Division attorneys say that "impulse buying" isn't restricted to larger purchases,

either. If you go grocery shopping without a prepared list to stick to, you could be tempted by many small but relatively costly food items—bakery goods, T-bone steaks, packaged snacks and sweets, or convenience foods.

What's wrong with "impulse buying"? Just about everything, our lawyers and other consumer experts stress. When you shop in a hurry, you don't have time to examine a product carefully, can't compare brands or price, can't look for the best warranty.

In the case of the air conditioner—it's no secret that Texas summers are going to be hot. So, if you need an air conditioner, it's best to plan in advance. You can take advantage of off-season sales, and get a model that suits your needs. You can look for an energy-efficient one too!

And how about the vacation? Just picture two parents, two children under 10, and a mass of luggage, all spending the night in the car because every hotel and motel

ARTIST OF THE MONTH...Elsie McMillan of Earth was chosen as the July Artist of the Month. She has been a member of the Muleshoe Art Association for six years and is a member of the Lubbock Art Association. Mrs. McMillan has won several second and third places in art shows. She prefers to paint with oils. Mrs. McMillan has studied under artists Lonnie Mason, Ben Konis, Mac Karow, Harold Roney, Dan Rippe, Danny Gamble and Connie Martin. She has lived in Earth for ten years. Besides painting, she works with her husband at his accounting-bookkeeping office. She has one son.

were full at the vacation destination. That's reason enough to plan in advance next time!

As far as the umbrella and raincoat—when you buy in a hurry, you're likely to be dissatisfied later. Maybe the raincoat (the only one left) was a size too small and rather expensive. After only three wearings, it begins to split at the shoulder seams. The

umbrella, a poorly made one in a flamboyant fabric, ends up in the bottom of a closet.

The key to avoiding hasty decisions that you will often regret later is planning, say our lawyers and many consumer experts. If you know a purchase is going to be needed in the future, you can take plenty of time to make sure it's a good buy, and exactly what you want. You can arrange your budget to allow for it. And you can comparison shop for the best price, quality, warranty, and service. Of course, not all "impulse buying" is bad. But the odds of getting a lemon are much greater if you shop in haste without planning.

For assistance with a consumer problem, contact the Attorney General's Consumer Protection Division in Austin, Houston, Dallas, San Antonio, El Paso, Lubbock, or McAllen. Outside those areas, call this toll-free number: 1-800-252-9236.

BIBLE VERSE

"As I was with Moses, so I will be with thee; I will not fail thee, nor forsake thee."

1. To whom is this promise addressed?
2. Upon what occasion?
3. What task did he accomplish?
4. Where may this promise be found?

Answers To Bible Verse

1. To Joshua.
2. Upon his succession to the leadership of the children of Israel, after the death of Moses.
3. He led the Israelites over the Jordan into the Promised Land.
4. Joshua 1:5.

Wheeling, Stealing Big Crime Business

By Clarence M. Kelley
Director, FBI

Thinking back a few years to the time when I was a boy in Missouri, bicycles were, for the most part, considered toys. When one disappeared, it was usually because some youngster took it for a joy ride and failed to return it. Unfortunately, that's often not the case today. Many bicycles are hardly toys. They are quite valuable, especially those equipped with finely machined gears and accessories. As a result, bicycles are stolen in great numbers by professional thieves.

Bicycles are often stolen off of lawns or porches and out of unlocked garages at night. School yards and playgrounds are popular targets of bike thieves during the daytime.

Don't make it easy for a bike thief to steal your bicycle. Practice these few crime resistance reminders which could help you to "keep on biking."

(1) Register all bicycles with the appropriate local agency. Permanently etch your driver's license number preceded by your state's initials on the frame of all your family's bicycles. This will make it identifiable to a police agency. Report the theft of any bicycle to the police.

(2) Don't leave bicycles on the lawn, on the porch or in an unlocked garage—especially at night. If a bicycle must be left unattended anywhere, it should

be secured to a solidly fixed rack or tree with a good quality chain and lock. The chain should not be looped just through a wheel but through the frame and both wheels.

(3) Regularly remind your children that just as bicycle safety rules will reduce the chances of their being hurt in an accident, crime safety practices will reduce the chance that their bike will be stolen.

(4) Encourage school and recreation authorities to provide secure bike racks located where they can be viewed by employees of the facility.

Keep your wits—and keep your wheels.

Bula News
By
Mrs. J. Blackman

A good rain fell over the entire community Tuesday night, with varying amounts from one inch to two inches. The cotton and early grain was in much need of moisture.

Jimmy Harris was guest speaker Sunday at both services for the Church of Christ. He was accompanied by his wife Carolyn. Jimmy is a student at Lubbock Christian College.

Mr. and Mrs. J.L. Cox and children, Jammy and Denene were supper guests Saturday night of his mother Mr. and Mrs. Harvey Whittenburg, of Oklahoma Lane.

Shelly, Greg and Gerrod Salyer, children of Mr. and Mrs. Glen Salyer of Friona, spent the past week with their grandparents Mr. and Mrs. L.H. Medlin. Their mother was in Dallas for a Home Makers Teachers convention.

Oliver Simmons of Lubbock spent Saturday and Saturday night with his parents Mr. and Mrs. F.L. Simmons. Oliver had just returned from a ten day visit in Houston with his daughter and family, Mr. and Mrs. Robert Murphy and children Sharron, Sheila and Robert, Jr. He also visited in Austin with his mother's sister, Mrs. Odessa Houghton and brother Mr. and Mrs. E.M. Oliver and in Dallas with Mr. and Mrs. George Simmons and Mrs. Geneva Simmons.

Mrs. Tom Bogard drove to Littlefield Monday afternoon for a visit with Mrs. Nora Gaston. Tuesday being Mrs. Gaston's 80th birthday, she took her out to eat and for a drive.

E.P. Farmer of Merkel, has recently been transferred from a Merkel Nursing home to the West Plains Nursing home in Muleshoe. He has two sisters, Mrs. Lorilla Jones and Mrs. Jim Claunch, who live at Bula and are happy to have him closer to them. He also has a son Charles who lives near Muleshoe.

Miss Alma Lou Pierce of Lubbock, spent a week of her vacation last week visiting with her parents Mr. and Mrs. P.R. Pierce.

Mr. and Mrs. V.C. Weaver attended the Van Paden family reunion Sunday at their home in Springlake.

Mrs. Carl Jones and children, Leslie and Britt from Bartow, Georgia, left Monday for their home after a visit of several weeks here with her mother, Mrs. Lorilla Jones and brother Wendell, also other relatives in the area. She was accompanied from Tula with her friend and her children who had driven with her to visit with her parents in Tula.

Mr. and Mrs. Delbert Roberts and boys, Rance and Kendon from Junction, are here for a few days visit with her parents, Mr. and Mrs. Tom Bogard and her sister the Ray Kennisons of Olton. They came up Tuesday for the funeral of Claude Hutcherson of Plainview. Mrs. Roberts (Opal Bogard) played with the Flying Queens 1960 thru 1964, during his sponsorship of the Flying Queens.

Mr. and Mrs. Erwin Nieman of Muleshoe spent Sunday afternoon with the P.R. Pierces. The ladies are sisters.

Jimmy Carter, President:
"My campaign for human rights has been embarrassing to the Soviet Union and to other countries with totalitarian governments."

Griffin Bell, Attorney General:
"We've got so many things going on, I have to be patient, and I'm not given to patience."

Donald Kennedy, FDA Commissioner, on daytime sedatives ban:
"Users run the risk of being drowsy during the day, when they may be operating automobiles or other dangerous machinery."

View From The Plain

by J.D. Peor
I & E Field Officer

Hunting season is just around the corner and individuals interested in attending a Texas volunteer hunter safety course should plan to attend the next class scheduled Aug. 15 and 16 at the Lubbock Baptist Association Bldg., 2601 Salem, Lubbock, Tx.

Classes will be held from 7-11 p.m. both nights and a \$1 fee will be required for registration and books.

Hunting is already one of this nation's safest sporting activities and the hunting accident rate has declined steadily over the last two decades. Statistics show that more people are injured bicycling than hunting and the safe record of hunters is due to the excellent instructors who teach the classes.

Only one instructor has taught more than 500 students in Texas and he will be the instructor for the class to be held next week. He is Joe Davis of Lubbock who, along with 1,251 other instructors, have recommended 31,231 students for certification across Texas.

The course is open to adults and youngsters and everyone who successfully completes the course will receive a Texas hunter safety card if they are 12 years of age or older.

Some 24 states require some form of hunter safety training before a hunting license will be issued. All of these states will accept the Texas hunter safety card including New Mexico, Colorado and Kansas.

For information on attending the next class call the Texas Parks and Wildlife Department 806/744-6847.

WILDLIFE INDICATORS
There are various techniques that personnel of the Texas Parks and Wildlife Department use to predict the upcoming hunting seasons but, nature has her own indicators including an abundance of certain species of wildlife.

"We are seeing an abundance of grasshoppers and rabbits this year and if sportsmen will recall, every year that these two species are numerous, the hunting is good," said Ted Wheelis, Lubbock regional law enforcement supervisor.

"There are very dry spots across the Panhandle and South Plains but some areas have had too much rain at one time," Wheelis continued.

An over-population of grasshoppers might be bad for farm crops and the family garden but for game birds, it is a summer feast. Every species of bird including quail and turkey are finding plenty of the juicy hoppers this summer and the insects will be around until the first hard frost.

Ample numbers of cottontail rabbits mean plenty of food for the predators such as coyote and bobcat and less trouble for the farmer and his chickens.

Liability Insurance Improves Outlook

Liability insurance should be an important consideration of businessmen and homeowners, believes Dr. Wayne Hayenga, economist for the Texas Agricultural Extension Service.

"Any property owner is responsible for the safety of those on his property. Farmers and ranchers with livestock, machinery and ponds on their property have an increased need for liability insurance," says Hayenga.

A "general" liability insurance policy covers a property owner's

negligent actions on the insured location, whereas a "comprehensive" policy covers negligent actions of the property owner on any location.

In order to be proved negligent, Hayenga says the following situations must be proved: --Conduct must fall below the mythical standard of a reasonable and prudent person, a failure to meet his normal responsibilities.

--Damage must have occurred, either to a person or his property, before a complaint or suit

can be filed in a court of law.

--The act in question must be shown to have caused the damages. Burden of proof to show who is negligent lies with the complainer.

--The complainer must be free of criticism. He must not have contributed in any way to the negligence, or recovery may be barred.

"The insurance company will pay claims only up to the limits of the policy," explains the Texas A&M University System specialist. "The minimum amount of \$10,000 is usually not sufficient if a major catastrophe

occurs." Substantially more coverage can be obtained at just slightly

higher rates, so it may be a wise investment to purchase higher limits, advises the economist. "Also, remember that liability insurance offers no protection against claims brought by regular employees for injuries and accidents," adds Hayenga.

Texas Food and Fiber

by Reagan V. Brown, Commissioner
Texas Department of Agriculture

Texas has long been an exporter of agricultural technology, but maybe it's time for us to look at the efforts of other countries -- especially in the most efficient use of water.

Israel, for example, has been extremely innovative in several respects. In the Negev Desert, scientists are rediscovering farming and water storage methods used more than 2,000 years ago by the ancient Israelites. Farmers have learned how cotton, cucumbers and potatoes can thrive on centuries-old brackish water, found in vast quantities under the desert.

Rainfall has been increased up to 15 per cent in some areas by cloud-seeding. Recycling of waste water for agricultural uses and desalination are helping to meet the water requirements of this half-desert country.

Developed about 15 years ago in Israel, drip irrigation has brought dramatic savings in water and increased yields in high-profit crops such as tomatoes, grapes, strawberries, eggplants, and peaches.

New technologies and equipment, including various levels of automation for control of water, are being used. It is not unusual to see

Israeli farms with a special control room, equipped with electronic remote sensing and control devices and a computer -- all used to operate the irrigation system. Mathematical models for scheduling allow irrigation schemes to push crop yields to their maximum.

I do not intend to imply that we in Texas are twiddling our thumbs and ignoring the progress that is going on about us. We are studying -- and sometimes putting into practice -- some of the exotics of water development and use. Desalting of water is a part of Texas' water planning, for we have vast quantities of brackish water underneath the topsoil. Use of recycled water is being practiced near Lubbock, and the use of drip or "trickle" irrigation has caught the rapt attention of university research scientists and some of our irrigation farmers.

We are far from being home free in meeting the future needs for water for all purposes in Texas. But we are making progress.

I am optimistic that we will move into a new era of water development, conservation, and wise management that will provide Texas with the water it must have.

Out of Orbit

IT STILL LOOKS LIKE JUST PLAIN OLD CRAB-GRASS TO ME!

YOU CAN BANK on it!

Member, Federal Reserve Bank

Why is it that when the farmer is most in need of a loan, the bank may find it more difficult than usual to make the loan? Often it is a problem of tight cash flow. Here's what happens: Uncertainties beyond control of the farmer often create a "money pinch". Prices may fall below the cost of production while machinery, fuel, and other costs keep going up. When earnings are driven down and costs go up — cash flow decreases. When there is little money to spend, less money circulates. And as money circulation falls, so does the bank's ability to loan money. But the bank still is the best place to seek help. Even with tight money, ideas are plentiful. For instance, some government programs may be available — such as Emergency Livestock Loans and Drought Emergency Loans. If you need assistance in an emergency, ask any of our officers. When they advise you on agricultural financing... you can BANK on it!

Jesse Mendoza In Training At ROTC Camp

Cadet Jesse Mendoza, son of Mr. and Mrs. Pablo Mendoza Sr., Lazbuddie, recently completed six weeks of training in fundamental military skills at the Army Reserve Officers' Training Corps basic camp at Ft. Knox, Ky.

The basic camp is designed to give junior college graduates and college sophomores who have not taken ROTC courses the chance to enter the program. The camp also qualifies high school graduates for the ROTC program at any one of the nation's six military junior colleges.

During the encampment, cadets received training in basic rifle marksmanship, military drill and ceremonies, communications and individual and small unit tactics.

Cadet Mendoza is enrolled in ROTC at West Texas State University, Canyon. He is a 1972 graduate of Lazbuddie High School.

The Lonely Heart

A recent survey of agricultural credit conditions in Texas shows that money lenders are serving more farmers and ranchers and that the average loan amount has increased.

Dr. Wayne Hayenga, economist in management for the Texas Agricultural Extension Service who conducted the survey noted that over a quarter of the 149 lenders responding were serving more clients and 65 per cent were serving the same number of customers.

"Interest rates declined for farm loans for the fourth straight semi-annual period." Interest rates for feeder cattle loans are down from 8.74 per cent to 8.26 per cent and farm and ranch operating loans are down from 8.64 per cent to 8.45 per cent from last November.

"If these interest rates do change, they are predicted to go up. However, most of the lenders expected the rates to remain stable," says Hayenga.

According to requirements for feedlot loans, which show only 30 per cent of these loans hedged on the futures market, cattle prices are expected to get better. On the other hand, the demand for the dairy cattle loans will probably remain the same or decrease slightly.

"An increase in forward contracts made by crop farmers indicate a rising security consciousness," points out the economist. "Fifty-seven per cent of the contracts were made on an acreage basis in contrast to 43 per cent of the contracts made on a quantity basis."

Health Laws Affect Several Groups

Free bleeders and babies are two of several groups who will benefit when several pieces of health legislation become law August 29. Texas legislation affecting motorcycleists and cancer patients also will be effective August 29, but those people are not as fortunate, the Texas Medical Association (TMA) says.

The bill repealing the mandatory motorcycle helmet law for those over age 18 passed about two months before the American Medical Association (AMA) issued a new, in-depth study of motorcycle helmet safety. The report attacks many anti-helmet arguments such as the one that says helmets can cause spinal injuries. The study points out that any injury serious enough to trigger a helmet-related spinal injury also would cause a fatal head injury almost invariably if the rider did not have a helmet. Another part of the report shows that motorcycle helmets do block out some sound, including part of the loud noise of the motorcycle itself, but the helmet does not block out necessary traffic warning sounds. The AMA report also gives new facts on helmets' effects on sight, heat and other factors. It concludes that all motorcycleists should wear a helmet for safety's sake.

adequate safety and health standards. The TMA has adopted a position urging physicians not to prescribe Laetrile because it would create false hopes and waste patients' money. Repeated tests have shown the drug is ineffective in treating cancer. However, Laetrile supporters argue that terminally ill cancer patients should have the right to anything they want to take. But TMA points out that there is no way to restrict the drug to dying patients alone so thousands of cancer patients who could be cured may waste time, money, and ultimately their lives, using useless Laetrile.

Babies are not known for their lobbying abilities but a couple of pro-baby bills were passed. One piece of legislation TMA supported authorizes the state health department to develop programs to study Sudden Infant Death Syndrome, the main killer of infants between the ages of one month and one year. Counseling for victims' parents also will be available to help relieve their unnecessary guilt about an infant's death. Another new bill that becomes effective August 29 authorizes the state health department to establish a hypothyroidism testing program for infants. Hypothyroidism, a disease that interferes with physical and mental growth, often can be controlled by proper medication if the condition is detected early enough.

Lawmakers also took a hard look at death and decided that a terminally ill patient should be able to ask to have life support measures ended if the person was going to die soon anyway. For more information on the Texas Natural Death Act, write Texas Medical Association, Communication Dept., 1801 N. Lamar, Austin, Tex. 78701.

The legislature also helped out people who get injections. Effective August 29, consumers will not get stuck with state sales tax on all syringes and needles used for medical purposes. The law formerly applied only to syringes diabetics use.

Hemophilia patients also came out ahead in the legislature. Effective August 29, this TMA-supported bill authorizes the state health department to set up a program helping hemophiliacs obtain the blood they need to replace the large amounts the disease can cause them to lose.

Registration for the reunion starts Fri., Sept. 2, with a hospitality party that night, general assembly at 1:00 p.m. Saturday, with General Paul Adams as guest speaker, and dinner dance at 7:00 p.m. Memorial services will be held on Sunday, Sept. 4 at 10:00 a.m.

The 36th Division served in five major campaigns in Europe, had 15 Congressional Medal of Honor winners, and were credited with the capture of Hermann Goering and Field Marshall Von Rundstedt.

36th Division Reunion Slated On Labor Day

Labor Day Weekend will bring 600 veterans of the famous Texas' own 36th Division Association for their 52nd annual reunion.

Royal Coach Motor Inn is Headquarters for the men who wore the "T-Patch" during WWII, the first American troops to invade Hitler's Europe at Salerno, Sept. 9, 1943.

The 36th Division, made up of men of the Texas National Guard were mobilized in Nov. 1940 at Camp Bowie, Brownwood, Texas, with 10,000 men. The Division strength of 18,000 was made up of draftees from Texas. Replacements were made from men of every state in the union.

For information, contact: Amil Kohutek, membership chairman, 1933 College St., Abilene, TX 79602.

Richardo Gauna Gets Promotion With Marines

Marine Sergeant Richardo T. Gauna, son of Mr. and Mrs. Elveterio P. Gauna of P.O. Box 81, Earth, has been promoted to his present rank while serving with the Marine Detachment aboard the aircraft carrier USS Kitty Hawk, homeported in San Diego.

Ag Credit, Service Up Nationwide

Service who conducted the survey noted that over a quarter of the 149 lenders responding were serving more clients and 65 per cent were serving the same number of customers.

"Interest rates declined for farm loans for the fourth straight semi-annual period." Interest rates for feeder cattle loans are down from 8.74 per cent to 8.26 per cent and farm and ranch operating loans are down from 8.64 per cent to 8.45 per cent from last November.

"If these interest rates do change, they are predicted to go up. However, most of the lenders expected the rates to remain stable," says Hayenga.

According to requirements for feedlot loans, which show only 30 per cent of these loans hedged on the futures market, cattle prices are expected to get better. On the other hand, the demand for the dairy cattle loans will probably remain the same or decrease slightly.

"An increase in forward contracts made by crop farmers indicate a rising security consciousness," points out the economist. "Fifty-seven per cent of the contracts were made on an acreage basis in contrast to 43 per cent of the contracts made on a quantity basis."

Announcing

Once again it's time for all Bailey County Farm Bureau members to get together and adopt Farm Bureau policies.

The resolutions we adopt will become Bailey County Farm Bureau policies for 1978. Approved resolutions dealing with state and national issues become recommendations for the Texas Farm Bureau convention. Resolutions approved at the state convention dealing with state matters become state policies, and likewise, national resolutions adopted become recommendations to the annual meeting of the American Farm Bureau Federation which will be held in Houston in January. National policies adopted there become policies for all Farm Bureaus everywhere.

Our County Policy Development Committee asks each Farm Bureau member to make his recommendation for resolutions in writing by September 1, 1977. Send your resolutions to: Bailey County Farm Bureau; P.O. Box 408, Muleshoe, Texas.

Current Fisherman Report

Fishing Report for July 18th through August 1, 1977.

Compiled by the Canyon Fisheries Lab of the Texas Parks and Wildlife Department.

GREENBELT RESERVOIR--Channel catfishing is very good with several large fish being caught. Fish in the eight to eleven pound class have been caught. Bass fishing is slow with a few being caught, one six pound bass was caught last week. Panfish are biting well but fishing for walleye and crappie is slow. One twelve and one-fourth pound northern pike was caught over the period. The water temperature is 78 degrees and the lake depth is 73.3 feet.

LAKE MEREDITH--Fishing for walleye has remained pretty good in water 45-55 feet deep. Several limit catches were reported over the period, mostly fish in the two to four pound size. One eight pound walleye was caught. Channel catfishing is very good for fish from three to ten pounds. Some nice flat-head catfish to 18 pounds have also been caught. Crappie fishing has been slow though Mr. and Mrs. Akins of Amarillo caught 12 nice fish on minnows in North Canyon. Most other fishing is slow. The water temperature at five feet is 76 degrees and the lake depth is 82.9 feet.

LAKE McCLELLAN--The water temperature is now 84 degrees and the lake is 16 inches below spillway level. Channel catfishing is good for fish up to 10 pounds. Bass fishing has been fair though mostly small fish have been caught. Fishing is slow for crappie.

LAKE MACKENZIE--A late season run on crappie appears to be developing. Several parties caught five or six crappie each which were eight to ten inches long. Bass in the one to two pound class are showing up pretty regularly, one individual caught nine nice fish. Channel

catfishing is still good particularly on water dogs. The lake temperature is 78 degrees at six feet and the depth is 85.2 feet. The lake has cleared considerably since the heavy rains of early summer.

LAKE BAYLOR--Fishing has slowed somewhat though a few good fish are still being caught. Ellis Knight caught a six pound, a 6.4 pound, and a 7.5 pound bass during the period. Some nice channel catfish up to 11.5 pounds have been caught at night and numerous smaller fish also at night. Sunfishing is good but fishing for crappie is slow.

LAKE MARVIN--Bass fishing has been very good on black topwater baits. Two fishermen caught a string of 22 bass last week, most of the bass are in the one to three and one-half pound range. Channel catfishing is pretty slow but bluegill fishing is very good for pan-size fish.

LAKE PAULINE--Fishing for most species is slow though a few bass, channel catfish, and crappie are being caught. Most of the bass and channel catfish are in the one and one-half to three pound range.

COPPER BREAKS STATE PARK LAKE--Bass and channel catfishing is generally slow with a few of each being caught. Most fish are small but one three pound bass was caught. One string of nine bass was taken during the period. Fishing for hybrid sunfish is very good on small topwater baits. These sunfish weigh from one-half to one pound.

LAKE THEO--Early and late fishing for channel catfish is good. Fishing for other species has been slow. Recent rains may improve the fishing for bass and crappie.

LAKE RITA BLANCA--The lake is rising again and the water temperature is 75 degrees. Fishing for bass has been very good for fish in the one and one-half to three and one-half pound range. Waterdogs and bass lures have been catching the fish. Channel catfishing has been good at night for fish weighing from two to seven pounds. The lake has cleared some since the heavy runoff of earlier this year.

Weather Tampering: We All Do It

Chances are pretty good that everyone has heard or made the remark, "Weather is in the hands of God. Man shouldn't tamper with the weather." All right, then, here are some of the things that must be done to keep from messing with the weather.

Factories, cities and highways must be destroyed. Factories pollute, large blocks of pavement reflect heat and disrupt normal weather patterns. We will have to get rid of every car, truck, tractor, train, plane--every mode of transportation that uses any kind of energy that gives off a particle of exhaust.

On the home front, if you smoke, you're adding to pollution. You are tampering with the environment if you use hair spray or deodorant. You are changing your natural environment if you heat or cool your home.

Ridiculous? The point is that man has been doing things that alter the weather ever since man discovered how to make fire, invented the horseless carriage.

At times, nearly everyone wishes he could change the weather. For farmers, the greatest interest is in increasing rainfall and decreasing hail. Though no one can control weather to his fancy, man now has the technology to manipulate destructive hail and augment rainfall by seeding clouds with silver iodide.

MAN CANNOT MAKE CLOUDS WHERE NONE EXISTS. SILVER IODIDE CANNOT TEAR UP AN EXISTING CLOUD. Silver iodide is used as a seeding agent because it is easily stored and can be distributed into the cloud as ultra-fine particles where they behave like ice crystals.

The world's leading scientists say if all the silver used in 100 years of cloud seeding accumulated in the top two to six inches of soil that no additional silver concentration could be found. You get more iodide from the salt you use on your breakfast egg than you would ever get from iodide used in seeding clouds.

BUT WHAT ABOUT DOWN WIND EFFECTS? The down wind effects of seeding clouds has been one of the big questions from the beginning of cloud seeding. There have been down wind effects in only two cases since seeding activities got underway after WWII. In these two cases, there was a slight increase in rain.

Never, never, anywhere in the world, has there been any documented decreases in rain nor any increases in hail down wind from the seeding activities.

Another question is why do the cloud seeders need to fly outside the area from where they are seeding to increase rain or decrease hail. The reason is that those seeding clouds need to intercept and seed those clouds 15 minutes before they move into the target area to be able to bring about a change. A cloud isn't modified immediately. A period of time is necessary.

In the seven and a half years cloud seeding in the hail suppression program has been going on in the Lamb and Hale County areas, the maximum miles to fly out to seed a cloud was 12 miles, and then in only about three cases. Seeding five to six miles from the target area would take care of 90 percent of the seeding activity. But these additional miles are needed to allow time for seeding clouds in instances where hail filled clouds need to be seeded 10 or 12 miles out.

BUT DOESN'T THIS "TEAR UP" CLOUDS? That has been the charge. It simply is not so. Seeding to decrease damage from hail changes the cloud potential for producing hail stones into beneficial rain or smaller hail stones that will melt into rain before they hit the ground.

When the program first started, the hope was that hail could be reduced by 50 percent. According to a report by Dr. Paul Schickendanz, hail damage has decreased about 60 percent. At the same time, Dr. Schickendanz noted rainfall in the seeded counties has increased 5 to 10 percent. It would be easier to assume that rainfall would be decreased, but instead it has increased.

The only time a cloud has been successfully "torn up" was when a small cloud was quashed from the top in the Phillipines years ago when a WWII giant transport dumped two towns of cement and two tons of lime on top of a cloud. This is quite different from microscopic particles being released into the updrafts of clouds.

WHEN A FARMER NEEDS RAIN and doesn't get any, it is nice to have someone or something to blame. Until cloud seeding came along, blame fell on the devil. Reckoning that man can, to some extent, control his environment is as hard to understand as flying to the moon. But look at the technology we now enjoy because someone dared to and did make this giant step to the moon for mankind.

So what is holding up progress in weather modification? The same force that stifled production of the horseless carriage, fought the building of cotton gins, and said man would have been given wings if he'd been intended to fly.

When emotions are involved, reasoning often suffers. Even commercial airlines have been accused of seeding clouds.

It is time for people to realize that man's influence on our environment is so strong that nature's ground rules have been changed. The air is filled with particles and each of those particles has the ability to modify clouds.

There are rivers in the sky that can be tapped for much needed moisture in the future. Big Spring farmers are firm believers of seeding clouds for rain.

WITH ENERGY COSTS UP, farmers with adequate water for irrigation cannot make a crop without rain. Irrigation never benefits crops like rain. With water shortage, it would be a shame to stop a program that offers 15 percent additional needed rainfall.

Never has a claim been proven that any person or area received less rainfall than he would have received from any cloud, whether it was seeded or not.

It is time to become informed voters. It is what people think that will determine the outcome of this science, rather than what scientists know.

If there is a chance you will be out of town on the August 20 election date, vote absentee between now and August 19.

GO TO THE POLLS Saturday, August 20, and vote for the issuance of a permit providing for weather modification and hail suppression.

BOB BULLOCK
Comptroller of Public Accounts

Dear Mr. Bullock:
Are Bibles sold by chain stores subject to the state and local sales tax?

No. Bibles, books consisting wholly of writings sacred to any religious faith and transcriptions of these sacred writing, including records and tape recordings, are exempt from the sales tax.

Sheet music and films with religious themes are subject to the tax, however.

Dear Sir:

Why does your office continue to bill me for franchise tax on a corporation formed by my late husband? The corporation has been inactive since his death.

A franchise tax is assessed on all non-exempt corporations until such time as the corporation is dissolved, or its charter is forfeited administratively.

I suggest you contact the Secretary of State's Office immediately. You will be sent the necessary forms for dissolving the corporation and notified of any outstanding franchise tax that must be paid.

Mr. Bullock:
I took my girl to a western dance recently and the ticket

seller added a tax to the price of the ticket. I refused to pay the tax and they wouldn't let us in. I say that tickets are exempt from tax, but my girl said they wouldn't be charging it if it wasn't legal.

Who's right?
Your girl. There is a 10 percent gross receipts tax on the price of tickets to such events.

Mr. Comptroller:

I recently rented a carpet cleaner and the man at the rental place added a sales tax to the rental charge. Are rentals covered by the sales tax?

Yes. The Sales Tax Act defines a "sale" to include lease or rental and therefore rental receipts are subject to the sales tax.

Ask Bob Bullock is produced as a public service to the taxpayers of Texas by the State Comptroller's Office. The answers here do not necessarily apply in every similar situation and should be used only as a general guide.

If you have a question, write Ask Bob Bullock, c/o Tax Information, LBJ Building, Austin, Texas 78774 or call toll-free 1-800-252-5555.

Harold Brown, Defense Secretary:
"There is no need to revive the draft now, it could become necessary in the 1980's"

Griffin Bell, Attorney General:
"The U.S. needs a spirit of humaneness and compassion toward illegal aliens."

For rent at less than 10¢ per acre per day.

Here are three new rental plans from Pierce that should make it possible for you to put a new Circle-Master center pivot on your farm.

Plan A. Rent a Pierce Circle-Master with a money use charge equal to 4.1% simple, per annum, based on a 7 year rent only program. No security deposit required.

Plan B. Same program for 10 years. The charge would be equal to 6.7%.

Plan C. Rent with an option to own with interest as low as 5.7%.

If these plans don't suit you, call us, and we'll tailor a rental plan specifically for you.

For complete information on rental plans, see your local Pierce dealer.

Enochs News
By Mrs. J.D. Bayless

E.C. Gilliam is home from the Morton hospital and Mrs. Gilliam was transferred from the hospital to the Roberts Memorial Rest home in Morton Thursday.

Mr. and Mrs. Bob Newton's grandchildren, Patric and Cory Newton from Stinnett have been visiting with them recently.

Carl Hall and children, Mr. and Mrs. Bill Burris, Jackie, Rickey and Terry of Wellman, Mr. and Mrs. Kenneth Cheatham and family of Lubbock, Mr. and Mrs. Johnny Mercer and son of Brownfield, Mr. and Mrs. Lawrence Hall, Larry and Nancy, and two granddaughters of Calif. all visited, fished and had a family gathering at Possum Kingdom. They left July

30th, and some stayed until Friday, August 5.

Rev. and Mrs. Ray Cunningham of Slide and Mrs. Gracy Swanner of Lubbock were guests in the home of the girls sister, Mr. and Mrs. J.D. Bayless Tuesday.

J.W. Layton, Jr., from Washington arrived Wednesday for a visit with his father, Mr. and Mrs. J.W. Layton. Other guests during the weekend was his daughter, Mr. and Mrs. Eldred Mixe and son, Sterling of Crosbyton.

Kim Rowden of Lubbock fell of the cabinet Tuesday and was admitted to the Methodist hospital where she spent two days. She didn't receive any broken bones, she came home with her grandmother, Mrs. E.N. McCall to spend a week, while recuperating. She is fine.

Alma Lou Pierce of Lubbock

spent her holidays with her parents, Mr. and Mrs. P.R. Pierce the past week. Mrs. Jim Carpenter and boys of Muleshoe came Thursday and they all went to Bull Lake Thursday night. Miss Pierce spent the night with them.

Mrs. Robert George spent Monday night with her parents, Mr. and Mrs. E.N. McCall. Mrs. Don Vanlandingham and children and a little friend, Micael Bank of Lubbock came and visited with them.

Mrs. Kenneth Millsap and daughters of Tulla came Tuesday and stayed till Sunday morning and did some canning and visited her mother, Mrs. Alma Altman. They had dinner with her sister, Mrs. Kenneth Coats Saturday.

Mr. and Mrs. Edward Crume and Diane and Mrs. J.W. Layton attended the wedding of Gail Cash and Sonya Jack, Saturday, July 30, at the First Baptist Church at Hereford.

Lee Olan Chick came Sunday to visit with the J.W. Laytons and their company.

Mrs. Alma Altman attended the Sunny Dale Reunion Sunday at the Flame Room of the Pioneer Gas Company at Littlefield.

J.W. Layton and son, J.W. Jr. drove to Midland today Monday to visit Mrs. Mandy Terrel.

Mrs. J.D. Bayless was in Muleshoe Saturday and visited in the home of her brother, Mr. and Mrs. Claud Coffman.

Visitors in the Baptist Church Sunday morning were Mr. and Mrs. Eldred Mize of Crosbyton, Mr. and Mrs. Mark Derrington of Del Rio, Mrs. David McDaniel and daughter of Austin, Lawrence Hall of Calif. and J.W. Layton, Jr., of Washington.

Mr. and Mrs. Dannie Petree and family of Lubbock were dinner guests in the Chester Petree's home Sunday. Mrs. Kenneth Petree of Clovis came Friday and spent the weekend and picked up her children who had spent the week with their grandparents.

Begin says no to PLO at Geneva.

The Lieutenant Governor's Report

By Bill Hobby

The 64th Legislature created the Joint Advisory Committee on Government Operations to examine and evaluate the organization and methods of operation of state government and to present recommendations for improving the structure of state government to the 65th Legislature. The work and recommendations of the Committee received much praise and several of its proposals were approved by the 65th Legislature.

The adoption of a Sunset Act (SB 54) will have significant impact on the operation of state government. Under this legislation, each state agency, except a few with constitutional status, would be abolished on a certain date unless the Legislature passes a law to continue its existence. This continuance would be for a 12-year period toward the

end of which the agency would again be subject to legislative review.

A legislative committee will review an agency and its duties every 12 years to determine whether or not the functions of that agency are needed and, if needed, are being carried out properly. The committee is to be composed of four members of the House appointed by the Speaker and four members of the Senate appointed by the Lieutenant Governor to serve four-year terms.

The bill places 175 agencies on a staggered 12-year review cycle beginning September 1, 1979. Twenty-six agencies including the Texas Turnpike Authority, the Pink Bollworm Commission and the State Bar of Texas, will be subject to review at that time.

The committee, with the assistance of the Legis-

lative Budget Board's performance and evaluation section, will review each agency in depth. It must conduct public hearings and evaluate each agency according to 14 criteria stated in the bill.

The committee must recommend, prior to the appropriate legislative sessions, whether agencies should be continued, abolished or reorganized. The Legislature must act on the committee's recommendations in order for them to take effect.

The 65th Legislature approved legislation (SB 1139) calling for the consolidation of Texas' three major water agencies. The Water Development Board, the Water Quality Board and the Water Rights Commission will be combined under one agency titled the Department of Water Resources. This consolidation anticipates a biennial savings of approximately \$3.5 million in general revenue through increased efficiency and elimination of duplicative functions.

The State Building Commission is abolished under Senate Bill 759 and its powers and duties are transferred to the State Board of Control. Senate Joint Resolution 48 proposes a constitutional amendment which authorizes the actions called for in SB 759. These measures further direct the termination of the State Building Fund and the transfer of its unexpended and unobligated funds to a special fund in the State Treasury.

Under House Bill 580, proposed rules of state agencies must be subjected to legislative review and a fiscal note stating the fiscal implications of the proposed rules to the state and local units of government must be provided.

The Governor is required by SB 332 to prepare and submit to the Legislature every two years a report on the organization and efficiency of state agencies. The report is to include information regarding the efficiency of agency operation and recommendations for reorganization of agencies and consolidation, transfer or abolition

of their functions. SB 737 requires an agency to notify the Legislative Budget Board and the Governor's Budget and Planning Office before contracting to use a private consultant whose total anticipated fee exceeds \$10,000. The agency must demonstrate that there is substantial need for the consulting services and that the agency cannot adequately perform the consulting services with its own personnel.

A property accounting system to be administered by the State Board of Control is created under SB 513. This system is designed to insure the orderly accounting for state property, to establish responsibility for the maintenance and care of state property and to prescribe the method of fixing pecuniary liability for the misuse of state property by officials and employees.

SB 450 gives the coordinating board authority to approve or disapprove all new construction and repair of all buildings and facilities at institutions of higher education, the total cost of which is in excess of \$100,000. The Board is required to determine formulas for space utilization in higher education facilities and devise methods to insure maximum daily and year-round use of such facilities.

The State Board of Education is required by Senate Concurrent Resolution 29 to improve its management information capability to provide current information necessary for decisions of the Legislature. SCR 30 directs the State Board of Education to revise its accreditation standards to require each school district to assess the proficiency of its students in basic skills and to formulate plans for remedial programs if necessary.

A central clearinghouse for computer software developed or acquired by state agencies is created under SB 612.

The person who drinks his first cocktail never sees himself as a probable alcoholic, but it has happened.

PARENTS' RESPONSIBILITY

"Train up a child in the way he should go: and when he is old, he will not depart from it." Proverbs 22:6

Ask anyone what his most precious possession is, and he will almost invariably say, "My children." The desire for the welfare of our children enables us to "move mountains." We will do anything, give them anything, if we think it will help them.

The one most important thing we can do for them, however, is to instill in them a love of God, and a desire to obey him. The church can help you in this endeavor, inspire and strengthen you. We invite you to take your family to church this week. It may make a great difference in the life direction taken by your children.

Everyone in the Church is responsible for the Church in Every Home.

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

The Sandhills Philosopher

Editor's note: The Sandhills Philosopher on his Johnson grass farm on Sandy Creek comes to the rescue of Congress and the car companies this week, more or less. Dear editor: It's puzzling. Sometimes Congress can see the light, sometimes it can't. For example, take the national debt ceiling. There's a law prohibiting the Federal Treasury Department from spending above that ceiling, which now stands at 700 billion dollars. When you hit that ceiling, stop, the law says.

But the Treasury Department says it can't stop, it's got to spend 75 billion more than that to keep the wheels turning. Do you think Congress flees from this problem? You think it tells the Treasury "that's the law, abide by it"? Not at all. It recognizes its duty when it sees it, wrestles with the problem and comes up with the answer: raise the debt ceiling. Over the past decade Congress has solved this problem over and over again, raising the ceiling every time the Treasury Department says it's got to have more money, if you want to call it that.

Now the puzzling thing is that Congress has a similar problem and can't think what to do about it. It's the miles-per-gallon car problem. Congress wants the car makers to produce by 1978 cars that'll get more miles per gallon, and the car makers say they can't do it by then and still meet the anti-pollution standards being demanded.

The answer is staring Congress in the face and its members can't see it. There are two obvious means of getting the car companies to produce cars that'll get 30 miles per gallon or more in all makes and models. And they wouldn't have to wait till 1978; they could do it tomorrow.

All Congress has to do is (1) shorten the length of a mile or (2) increase the size of a gallon. Any Congressman who can't see that needs a vacation.

Yours faithfully, J.A.

The Great Eye Am "They call me 'Busy Needle'--I always make it a point to go through the work that is laid out for me." "Oh, I know, but not until you are hard pushed."

The Scientists Tell Me... Plant Invaders Threaten Our Lakes and Waterways

By Robert L. Haney

TAES Science Writer

Silent invaders are taking over huge areas of lakes and streams in Texas and if not halted soon, they will cost the State millions of dollars a year to control.

It is believed that these water plants have been brought into this state by boats trailered here from the Southeast. The problem is very bad there. Florida, for example, is spending \$20 million a year to try to contain such plants and has apparently given up hope of eradicating them.

The two dominant newcomers are the floating water hyacinth and the submerged hydrilla.

Nourished by nitrogen-rich runoff from farmland, lawns, and golf courses, or effluent from heavily populated areas, these weeds have become serious impediments to navigation; have inhibited boating, swimming, and fishing; have devalued water frontage for developers and homeowners; and, potentially, will provide a suitable environment for transfer of disease by mosquitoes and snails.

In the last five years, aquatic weed infestation has increased from 50 to over 2,000 acres in Lake Living-

ston. In Lake Conroe, constructed in 1972, hydrilla has already infested more than 5 percent of the water area and an estimated 2,000 acres are affected.

Since hydrilla needs light to grow, in clear water it can live in water 15 feet deep. And where it grows, it tangles boat propellers and fishing lines and interferes with nesting for game fish, as well as with water sports such as swimming and skiing.

At the present time, the best known method of control is chemical treatment but it's temporary and costly (\$150 per acre). Mechanical harvesting and control with snails, manatees, and fish are in research and development stages in other states.

Researchers with the Texas Agricultural Experiment Station (TAES) are studying the underground stems of hydrilla (tubers) which are the primary means of infestation and reproduction.

"This may be the most vulnerable spot in the plant's life cycle," says Dr. R. J. Newton, Experiment Station plant physiologist. Newton is presently researching the ways in which

this underground organ is formed and how it produces new plants under a wide range of environmental conditions.

Knowledge of this could lead to more timely herbicide treatments and mechanical harvests, as well as increasing the feasibility of biological control measures. Herbicides now available on the market will destroy the foliage but will leave the tuber essentially untouched. The hydrilla has an astounding tenacity for life and can regenerate itself after long periods of being dried while out of the water.

Newton and two other researchers at Texas A&M University, R. H. Scott of the Biology Department and Dr. C. R. Benedict, Experiment Station plant physiologist, believe this contributes to its competitive dominance in U.S. waters after its introduction into this country from Malaysia.

These scientists are investigating what adaptive mechanisms the hydrilla possess to revive and reproduce after periodic drying.

Control, not total eradication of aquatic weeds, is the aim of much of today's research.

Newton says that, though such weeds in the wrong place are costly nuisances, a recent study by the National Academy of Sciences suggests that they could be

assets and should be looked at as free, renewable resources that require no planting, fertilizer, or cultivation.

Animals such as carp, crayfish, and waterfowl feed on aquatic weeds, all these help clear waterways and are a source of protein for human consumption.

As a ruminant feed, aquatic weeds show promise but more research is needed on their nutritional qualities. Hydrilla and water hyacinth may be used as chemical fertilizer and used as a green manure or compost. And the water hyacinth removes pollutants from wastewater with surprising efficiency.

It's good business, even in family deals, to keep the record straight.

REAL ESTATE
JOHN W. SMITH 272-4678
W. M. POOL II BROKER

240 A west of town, 3 wells, lots of underground tile. 2 1/4 mile top sprinklers. All goes for \$500 acre.

336 A stock and hay farm. 1-circle, 2 siderows, small house, but highly improved. All goes for \$744 Acre.

3 extra good half section of land for sale in Parmer County. 1/4 section hay farm east of town. 2 wells. \$600 acre. 60 A north, 2 miles, 2 small wells. \$600 acre. No house. 8-32t-4tsc

REAL ESTATE
JOHN W. SMITH 272-4678
W. M. POOL II BROKER

3 bdr., 3 bath, no garage. Storm cellar, fence 200 sq. ft. \$39,500. 3 bdr., 2 bath, double garage, fire place, evaporated air. All brick. \$52,600.

4 bdr., double garage, 2 baths, utility, sun room, small office, fireplace, approximately 2300 sq. ft. \$58,000.

3 bdr., fireplace, double garage, 2 bath, plush carpets, exquisite landscape. 2250 sq. ft. \$63,000

ALL ABOVE HOUSES SHOWN BY APPOINTMENT ONLY. 8-32t-4tsc
