We like to put it in capitals that way because we believe it is the most im-portant thing in the battery business. Of course we can't make a new bat-tery out of an old one, or a good bat-tery out of a poor one, or a long-lived battery out of a short-lived one. There are limits even to battery service.

But we can make any battery last longer and serve better if you give us a chance. We can make the Willard Threaded Rubber Battery do both— and it already holds records for long life and reliability.

We can always do more with a battery if we get a chance right at the start, although we are ready to help anytime. Come in!

NOT EFFECT COLORADO

Mr. O. Lambeth, local coal dealer, says the strike of the coal miners which began April 1st, will not like. ly affect the local people, nor the domestic consumers of this country. The largest stock of coal ever in the country are now above ground and in hands of dealers and consumers, and the non-union miners will likely continue at work.

The strike is over the renewal of the contract which expired March 31st. The miners seek shorter hours per day and more days per year and in some districts more pay, also all concessions and privileges won during the war, including collective bargaining. The mine owners seek to do away with collective bargaining, and want to reduce wages. They are also favoring the open shop plan.

While it will likely be a stubborn fight, with outlawry in some places as the miners are mostly foreignors the government announces it will not permit crime and will see that the country does not suffer for fuel.

ARCHIE McDONALD WILL PROBABLY LOSE ONE EYE

Advices from Dallas Wednesday indicated that Archie McDonald. who was carried to St. Paul's sanitarium in Dallas Thursday of last week for treatment, would probably lose his eye which was injured several days ago as he was assembling a tractor at the A. J. Herrington Ford agency. McDonald was placing a spindle on a tractor and in striking the piece with a hammer a small particle of steel was lodged in his eye.

McDonald was carried to the Alexander Sanitarium at Abilene to remove the steel by magnet.

Now is the time to have your windmill repaired. Phone 280.
