OUR 33rd YEAR

THURSDAY, JUNE 20, 1963

NUMBER 25

MOORE or Less

by Johnnie Moore

I guess maybe one day we will learn that most campaign promises are usually a lot of hot air and nothing more. Take for instance one specific campaign promise made by our President just three-- and a little over-- years ago. He said quite clearly when he was seeking the highest office in our land that he would balance the budget and keep it balanced. But now, he and his New-Frontiersmen are telling us that deliberate budget deficits are the secret to fiscal success. Sure is confusing to have the horse change streams in the middle of it all.

Was it Patrick Henry who said "Give me Liberty or give me death" or did he say: Taxation without Representation is Tyranny? We can't say about our liberties but we do know that under the present setup we pay taxes unto death and our liberties are slowly being taken away from us and our representation is, at times, doubtful.

One mark of dictatorship is rigid control of the labor force. Just recently, Cuba, which is now perfecting the tools of dictatorship, announced that from now on all employment must be handled through the state employment service... we are heading in the same direction here... A number people connected with the U. S. Employment Service have made it plain that they want to do all the job placement in the country. In the Employment Security Review it is stated that "It is intended that the employment office in each locality will become the community manpower center."

One news item we read recently showed that common sense won over a bunch of sociologists when the House of Representatives voted overwhelmingly to allow teachers in the District of Columbia schools to spank unruly pupils. Probably this should be put under the "Progress Reports."

NEW OWNERS---Mr. Glen Moorehouse and Mr. Sid Wade, who recently purchased the local Plains Frozen Foods from Mr. A. E. (Dick) McGinty, are shown in front of their newly acquired store. They took over its operation this week.

Review of 1964 Wheat Program

The wheat program for 1964 under provisions of existing law are reviewed by the U. S. Department of Agriculture in response to questions that have arisen since the referendum of May 21. Price support will be available to producers who plant within the acreage allotments which have been established for the 1964 wheat crop. Allotments were announced in April. The national average support price will be 50 percent of parity. (The present

parity price is \$2.51 per bushel.) There will be no marketing quota penalties for planting in excess of acreage allotments. However, the statute provides that producers who overplant their allotments will receive "history" credit only in the amount of their allotments. Farmers who have Conservation Reserve contracts agreed to plant within their farm acreage allotments, and this means that the 1964 Conservation Reserve payment for

the farm is dependent on compliance with the wheat acreage allotment. Wheat that was grown in excess of marketing quotas in the past will be subject to the original penalty provisions until July 1, 1964. After that date, stored excess wheat may be released without penalty.

The amount of such wheat in storage on farms and in warehouses is estimated at 45 million bushels. This could be increased from the 1963 crop, which is subject to marketing quotas, and excess wheat from this crop may be stored by the producer to avoid payment of penalty. On the other hand, underplanting or underproduction of 1963-crop wheat could result in the early release of excess wheat that had been stored from previous crops to avoid payment of penalty. Other items of interest to growers in administration of

the 1964 wheat program without marketing quotas include: --- ASC county committees will hear all appeals of 1964 farm wheat acreage allotments. Farmers have 15 days from the date of the county committee's decision to appeal to the ASC State Committee if they do not agree with the county committee decision. --- Hearings on appeals of farm normal yields will not be scheduled because the yield figures will not be applicable

for 1964. Where producers wish to furnish proven yield data, such data will be filed in the county office with other records of that farm.

Murder Trial Underway

The long, laborious task of selecting and impaneling the jury for the trial here of Mr. T. M. Ward who is charged in the September 1962 slaying of Tiny Helms in Denver City, Ward is being represented by Mr. Calloway Huffaker and Mr. Virgil Crawford both of Tahoka. On Thursday no actual plea

had been made by defendant Ward in answer to the charges and none was expected until after the impaneling of the jury. On Wednesday, the day the trial actually began, only a total of seven prospective jurors was questioned toward possible selection. The trial is expected by most observers to take several

days, and possibly over one week. At one point in the proceedings on Wednesday, defense made a move for another continuance in the trial due to the fact that one defense witness, a Denver Citian named Meyers, could not be located. Defense had pointed out that Meyers was the first person to see the scene of the alleged shooting and thereby was a very

important witness to the defense. Motion, however, after a conference between defense council and the defendant, withdrew their motion. It looks now, as though, according to reports, that the trial will continue as scheduled. A great amount of interest is being shown by county citizens in even the preliminary portions of the trial.

Zip Mailing Code Effective Here 1st

Our five-digit ZIP Code is 79355, Postmaster A. I. Hayes announced today. "Everyone in Plains will use this ZIP Code on all their correspondence to speed mail delivery and reduce the chance of mis-sent mail," Postmaster Hayes said. ZIP Code, the Post Office Department's revolutionary new system of improved mail dispatch and delivery, goes into effect nationally on July 1. Postmaster Hayes stressed the importance of all citizens of Plains learning this city's ZIP Code and using it in their return address on all correspondence. In answering mail, he said, ZIP Codes taken from return addresses on incoming mail should be used. "The ZIP Code is literally the last word in mail addressing," Mr. Hayes said, "It should follow the city and state in addresses." He cited this example of the proper use of ZIP Code: A. I. Hayes

Postmaster, U. S. Post Office, Plains, Texas, 79355. The new ZIP Code plan, Mr. Hayes said, for the first time will permit the Post Office Department to short-cut repeated address reading. "The address on mail must often be read as many as eight or ten times by postal employees, to get it to the proper destination," Mr. Hayes said. "Each handling slows the process of mail dispatch and adds to the opportunity for human error. "With ZIP Code, a clerk needs only to glance at the code to know immediately to what national area, state and post office the letter is destined, and to speed it on its way, cutting up to 24 hours off the time between deposit and delivery." Mr. Hayes said that when ZIP Code is in full swing, the United States will have "the most modern system of mail distribution and delivery in existence."

Duffers Delite Open

Duffer's Delite, the local miniature golf course operated by the local Boy Scout Troop, has now officially been opened for the summer. Announcement was made this course will be open on Monday, Wednesday, Friday, and Saturday nights from 7 p. m. to 10:30 p. m. and on each Sunday afternoon from 2 to 4 p. m. Price per game this year is set at 35 cents, unless four persons play on one scorecard in which instance the price is 25 cents per person. The course has been com-

pletely re-worked and improved for this year's season. One improvement, hole number five, the ant hill, has a special innovation, in that anyone making a hole in one on it will be awarded five free games. The course, this year, will be operated jointly by members of the Plains Lions Club and Scout Troop 778. One other new idea has been added is that anyone bringing three used score cards to the course will be given one free game.

Texas Bond Committee salutes these groups for their patriotic support of the Bond Program. Chairman Moorhead said.

Rodeo Queen Hopefuls Busy

As the dates for the 10th Annual edition of the Plains, Yoakum County Rodeo, July 25-26-27, draw near, the selling of contestant tickets on the part of the four Rodeo Queen Contestants for this year is really picking up according to all reports. The donation, which costs \$1 per ticket is one vote for the contestant from whom it is purchased, and each ticket also entitles the purchaser to one chance per ticket on a saddle that will be given away on the final night, Saturday, of the Rodeo. Contestants for this year are Sylvia McGinty for the Yoakum County Roping Club, Brenda Duke for the Plains Dirt Gardeners, Loretta Taylor for the Plains Lions Club, and Letha Watson for the Plains Chamber of Commerce.

Charity Listing

The following named charity bills were approved by the Yoakum County Welfare Board at regular meeting June 13, 1963:
Esther Henderson-Plains Frozen Foods - \$7.44.
Ernest Jones-Plains Frozen Foods - \$14.13.
T. E. Ethridge - Plains Frozen Foods - \$91.13.
Mrs. Charles Murphy-Evans Gro. - \$45.00.
Charles Murphy - Dr. Sharp - \$15.10.
Emma Ewing-Southwestern Public Serv. Co. (Lights) - \$2.90.
Carl Miller - John Sealy Hosp. - \$255.00.
Lino Cortez - Lampasas Funeral Home Lampasas, Texas (Burial) - \$150.00.
TOTAL \$ 581.50

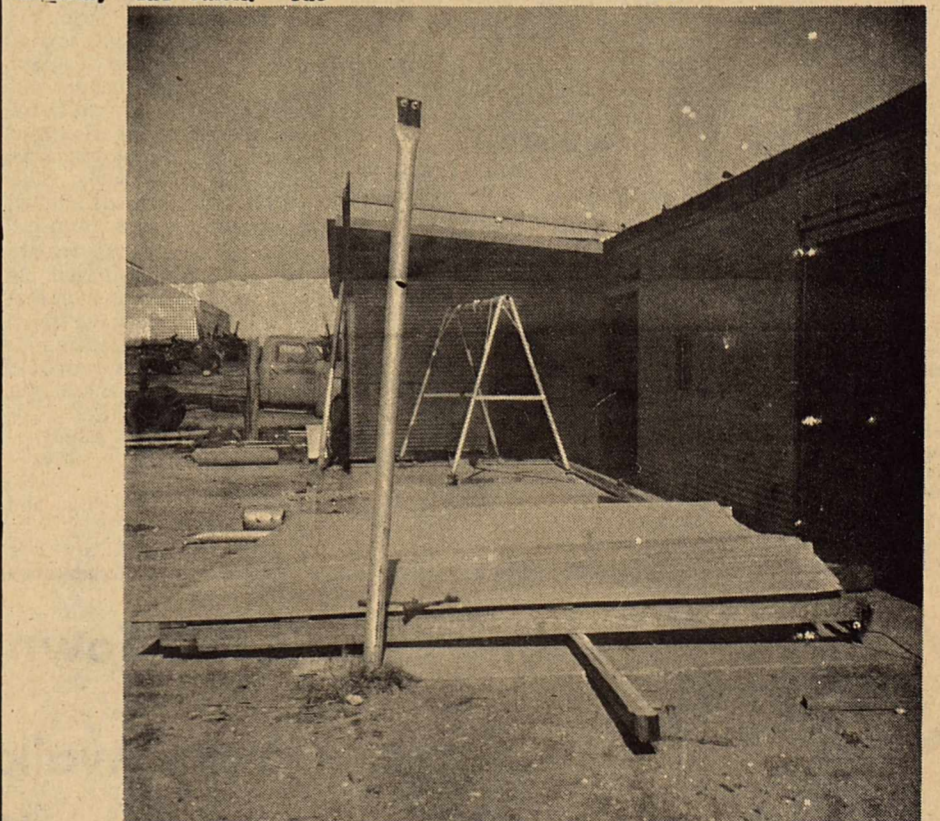

STRAIGHT FROM UMP'S CORNER

Plains little leaguers saw their first week of three double hitters this week. On last Friday night the Giants were pitted against the Cubs in the first game. Final score of that game was 13-10 in favor of the Cubs. Scoring in the game ran 6-0-0-7 for the Cubs; and 0-3-7-0-0 for the Giants. The eight o'clock game on the fourteenth was called by the umpire due to high wind after only three and one-third innings, meaning that the game will half to be completed at a later date. At the point the game was stopped, the score was 10 for the Indians and 0 for the Yankees. Then on Saturday night the first game saw the Cubs and Yankees as opponents. Scoring for the Cubs ran 3-2-0-3; and for the Yankees it was 1-1-2-0-1, final score winding up at 8 for the Cubs and 5 for the Yankees. At eight o'clock on the same night the opponents were the Indians and the Giants. Scoring that game for the Indians was 3-13-0-2; and for the Giants it ran 0-1-1-11. final score the Indians was 18 and for the Giants 13. On Tuesday night, June 18 first game was between the

Savings Bond Sales Report

Bond sales in Yoakum County totaled \$3,375 during May according to Mr. D. P. Moorhead, Chairman of the County Savings Bonds Committee. Savings bond sales in Texas during the month of May were \$11,844,620. This represents an increase of 3% over May 1962. "I was happy to note the sales increase in Texas during May and feel confident that this is a direct result of the outstanding support given to the Freedom Bond Drive by bond volunteers, newspapers, radio and TV stations, organizations, and others. The

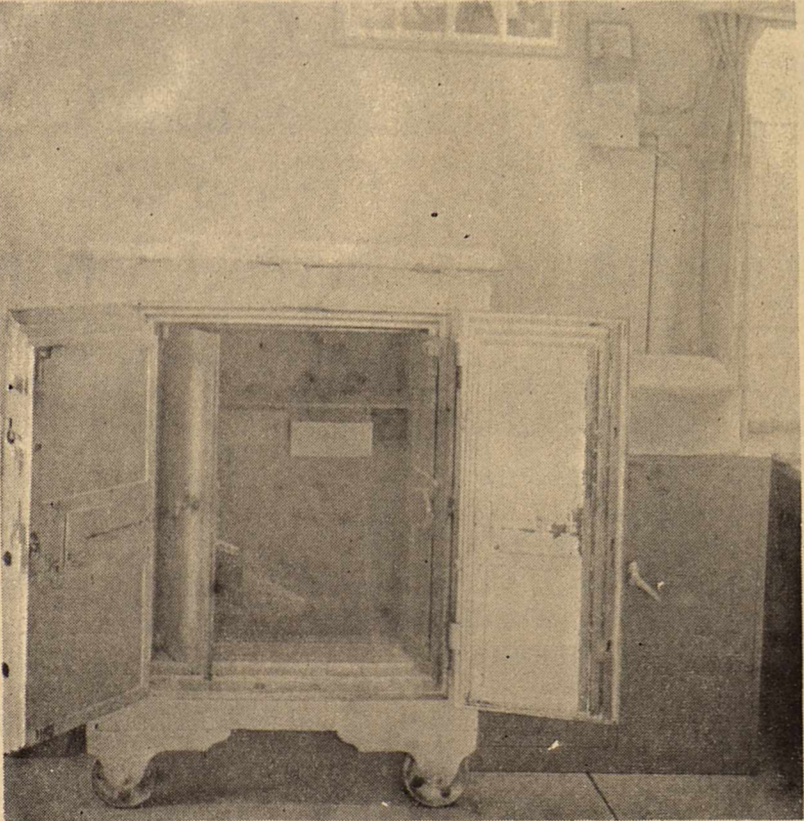

Cubs and Giants. Score wound up at 15 for the Cubs and 0 for the Giants. Scoring the Cubs was 2-1-2-10. In the second game the Yankees faced the Indians in a game that was called after three and one-half innings because of the weather. The game counted, however, as the trailing team got its full time at bat. The Indians won 4-2. Scoring by innings for the Indians was 0-2-2-2; and for the Yankees 1-0-1-0.

ROBBERY SCENE---The office of the D. C. Newsom located on the east side of Plains was broken into on Tuesday night of this week

by person or persons unknown. No money or property was taken from the premises with the exception of a small lock box which was taken from the

safe. It contained no money but it did hold several papers and documents which were valuable to no one but the Newsoms.

STORMY WEATHER-----A small twister barely missed the town of Plains last night (Wednesday) and hit the S & W Machine Shop just outside

the city limits on the west end of Plains. Damage was not reported to be too great, but the front sheet metal awning was blown from the building;

the steel posts which were sunk in cement were uprooted; and a portion of the sheeting was found strewn 200 yards behind the building.

From Parson Jones

Dear Mr. Publisher: If it gets much hotter I'm gonna start carrying ice in my hip pockets. Oh I'm not talking about the weather. Some of my members are making it awful hot for me. They're really giving me down in the country. You mix that all up with this scorching weather and you got a mess.

Now Mr. Publisher, the thing that's wrong is that some of the folks down at our little Church are trying to run me off. (Can you imagine anybody trying to run a loveable fellow like me off?) What

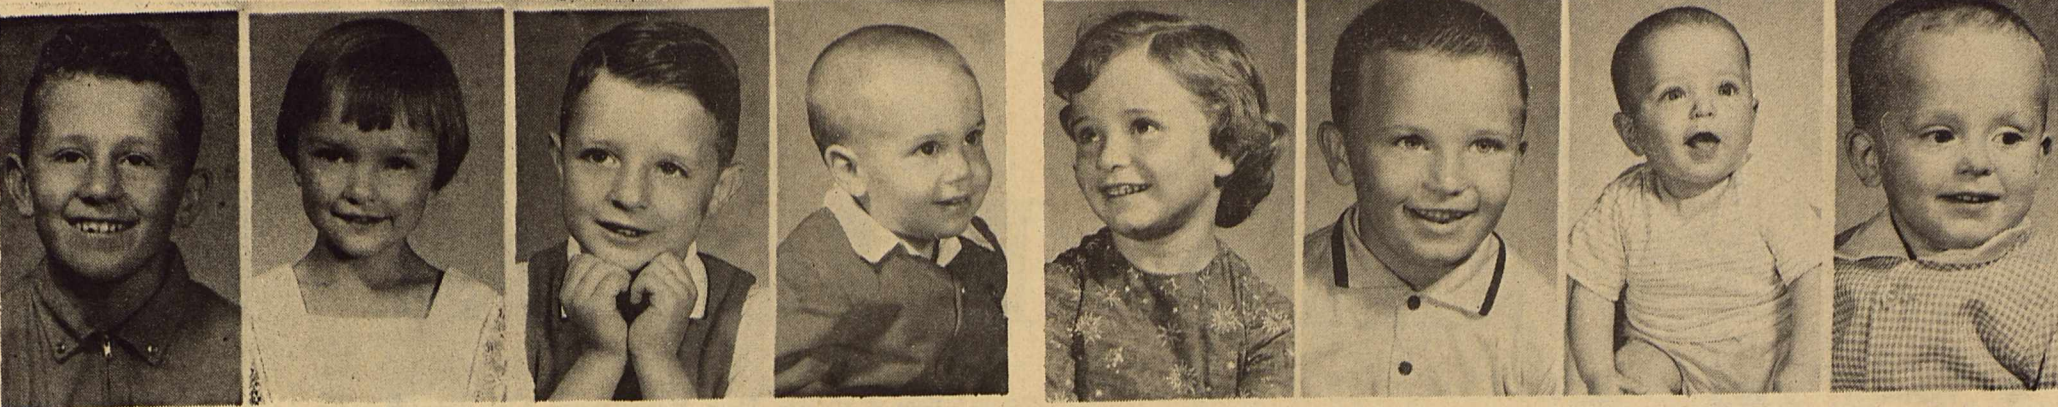

done it was the sermon I preached last Sunday. I sermonized on Jonah and the whale. I told 'em how the whale had eat up Jonah cause he wouldn't do what the Lord wanted him to. Hezekiah's wife and Ellie Nicklesinger hoilered amen. They liked it long as I was talking about the other fella, but what I said next shore changed their tunes. I told 'em that a whale was gonna eat them if they didn't soon start listening to the Lord. Well sir, Mr. Publisher, Ellie's face turned white, her mouth flew open and she looked like she had a case of the black tongue. Hezekiah said his wife could not sleep a wink Sunday night cause she can't swim a lick, and she kept thinking about sloshing around in that whale's belly.

Big Slim said I had scared the daylights outa his younguns with that fish story. (That's kinda hard for me to believe, cause I've seen them younguns of his watch one gangster program after another on TV and not bat a eye.) Amos' brother said the story made him sick on his stomach and ruined his whole day. That ain't what it was, Sir--it was a hangover from Saturday night.

Anyhow Mr. Publisher, several of the folks are heading up a campaign to get rid of me. I told Hezekiah it was a sad day when a fella gets run off for his preaching. Hezekiah swore it wasn't that at all. He said that the reason they was asking me to leave was cause the Church was running low on money, so they was just gonna do without a preacher for a while and let the money accumulate.

He don't have to smooth it over for me, cause I know it was my sermon that done it. That's kinda odd cause I was run off from my last Church over this same sermon. Now I been thinking Mr. Publisher, that I might as well make some money out of this whole thing. What I'm gonna do is take this sermon and a few more like it and put 'em in a book. I'm gonna call the book, "Moving Sermons". Folks is always wanting to hear moving sermons and I'll guarantee you Mr. Publisher these will move you. If you don't believe it try preaching 'em.

Yours truly, Parson Jones

Gordon and Sheila McRae, America's celebrated "Music Mates", dance to FM-Stereo music from new wall-hung "Stereo Music Mates".

Like the versatility of the famed McRae duo, "Stereo Music Mates" establishes a new high in Stereo versatility. Divided into two matched hardwood cabinets, this novel Stereo can be hung on the wall, set on tables or shelves or stood on the floor with detachable legs as Consoles. One cabinet contains AM-FM and FM Stereo Multiplex radio with stereo speaker system. Its companion piece contains an automatic record changer and record storage compartment.

Packard Bell designed Stereo Music Mates for smart, modern homes like the McRae's where they are winning favor for unique decorative design as well as a fine source of home entertainment.

SUNDAY'S SERMON

Rev. ROBERT H. HARPER
 A SMALL WORLD?

YEARS ago I heard a Commencement orator say that a passenger on a railway train going west at sixty miles an hour on an earth turning on its axis every twenty-four hours from west to east, etc., might reflect whether he was going in this age of science and invention, or words to that effect.

And years ago I heard a bishop say that in China he sent a cable

JUST A THOUGHT:
 In many of the tasks that we undertake is not how long it takes us to do the job but instead how thoroughly the work is done when we turn and walk away from it.

to his wife in Austin, Texas. He sent it after supper and she received it before breakfast the same day. That was fast enough. But now, traveling east, men can span the ocean in a few hours, eating breakfast in New York and spending the night somewhere in Europe.

To the men who travel widely over the world in a few hours the World may seem a small place. But the world is as large as when men first knew it. They have only learned to travel over it faster. It is not a small world. There was much of it left when Alexander said that there were no more worlds to conquer. And there is doubtless much of it that the Russians will never conquer.

But the world is big enough for men to dwell in righteously; in love and brotherhood, if they love God and their fellow men.

HEALTH HINTS
 By JOHN PEYTON

SENSIBLE SUMMER EATING
 So many people who take their vitamins every morning all winter long, feel that once summer is here, it's no longer necessary to have that Unicorn with their morning orange juice. It's true, of course, that summer fruits and vegetables are excellent sources of vitamins and minerals. But it's also true that summer eating habits tend to be more erratic than winter schedules. Hot summer weather may not be as conducive to good appetite, and cold sodas and quick snacks may cut down on the desire for regular meals, at a season when we may be most active.

The wisest suggestion is to try to eat three well-balanced meals every day regardless of heat or busy schedules. That means including the basic food groups recommended by the U. S. Department of Agriculture: milk, poultry, meat, eggs and fish; fruits and vegetables; and bread and cereals.

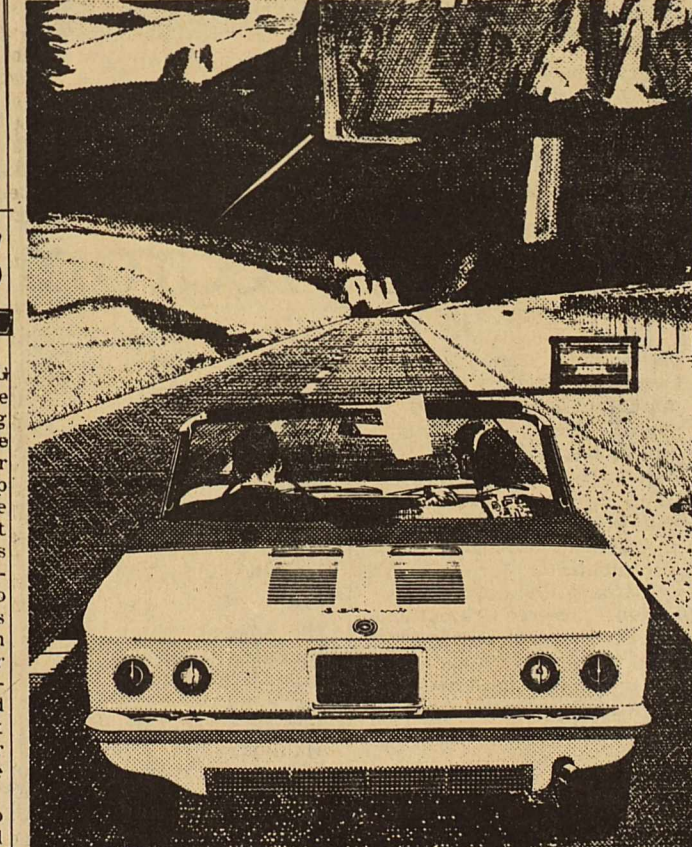

But since we're all only human and there are bound to be those days when we don't eat three well-balanced meals, many prudent people continue their vitamin capsule every morning—all year round—to insure that they obtain their minimum requirements.

But since we're all only human and there are bound to be those days when we don't eat three well-balanced meals, many prudent people continue their vitamin capsule every morning—all year round—to insure that they obtain their minimum requirements.

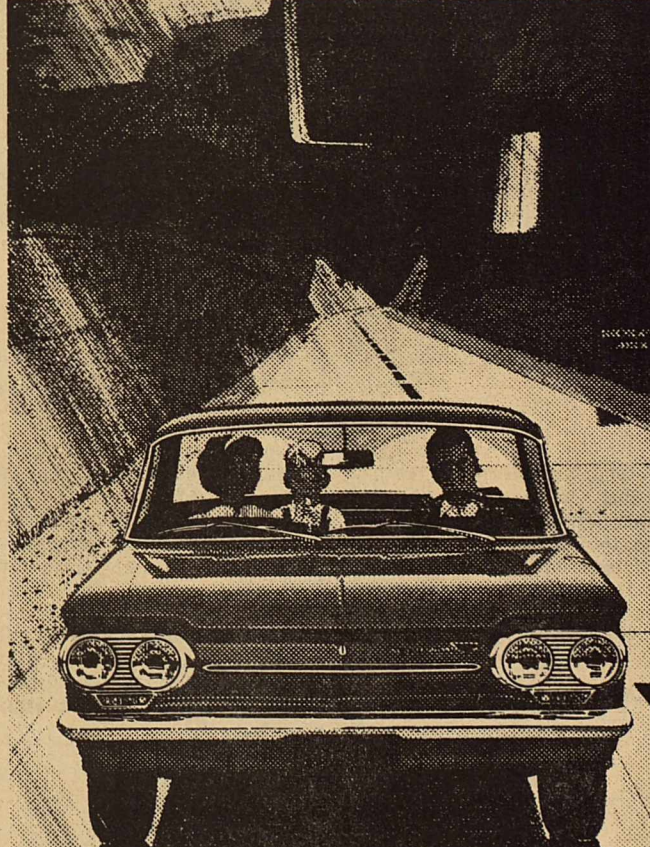

Card of Thanks

Words cannot express our heartfelt gratitude to all the wonderful friends who so greatly sustained our beloved husband and Daddy during his illness by innumerable acts of kindness and made his days happier by their concern and encouragement. To all those who also sustained us with so many, many kindnesses, beautiful floral tributes, and sympathetic understanding, we extend thanks from the bottom of our hearts. We are blessed and comforted in knowing his life was such that so many of you have shown that you share with us in his loss. We ask God's most gracious blessings on each of you.

Monza Spyder Convertible

Monza Spyder Club Coupe

Come hill.. or high water

Vacations go smoother in a Chevrolet Corvair

Bring on those mountains! They're not so high and mighty when you've got Corvair's gummy six and rear-engine traction working on them.

You scurry up the meanest grades. You move with sure-footed agility on wet pavement, muddy lanes, gravel and other would-be miseries.

And with most of Corvair's weight on the rear wheels, you have easy steering, too. Fact is, the handling's so light and responsive we don't even offer power steering for the car.

And there's more to feel good about. No problems with your radiator boiling over or going dry, because there's no radiator. Corvair's engine is air cooled. No concern about brake adjustments; either, because the brakes adjust themselves. Nothing much to think about at all except the good time you're having.

Like to do that in a sporty bucket-seated Monza Club Coupe or Convertible? Like to spring into summer with a 4-speed stick shift* and Spyder package* with its 150-hp Turbocharged engine? Your dealer's got just the Corvair and the Trade 'N' Travel deal on it to put you in a holiday mood.

"I REMEMBER"
BY The Old Timers

From Clara Comstock, Sparks, Oklahoma: I remember Polk Pickin' time back in Arkansas where I was born. Some folks called it "Polk Sallet," but what ever you wish to call it, it's a pretty "larripan" eatin'! Oh, we have boughten Lettuce now, and other greens from the freezer, but there's nothin' like a good mess of Polk Greens, Wild Onions and "dry salt" meat and of course Corn Bread!

Let's see, it's been nigh on to 50 years since I was a young'en and went a Wild Green huntin'—I don't know how Mama knew when the Polk was up, but come one day in the spring, she'd announce "we'll go Polk huntin' today!" We'd ask Edna and Liza (neighbor kids) to go along, and stop on the way for Aunt Ola and her kids. We'd get our bonnets and a bucket and off we went. We'd go over across the school yard, and down by the old Cotton gin, looking for the white stalks from last years crop. We'd climb fences, and crawl under them, and then someone would find a Polk stalk, we'd dig away the leaves, and there was the tiny red Polk, just coming out of the ground, we'd cut it off carefully, so it would come up again for the next Green hunters.

Of course we children knew the common Polk, but the other's we weren't sure of, so we'd pick them, and ask Mama, or Aunt Ola if it was "greens." There was one called "Blue Stem," another was Wild Lettuce, a kind of Thistle and Narrow Leaf Dock—and of course Lambe Quarter that grew all around the garden fence we'd get when we got home).

Equalization Board

In obedience to an order of the Board of Equalization regularly convened and sitting, notice is hereby given that said Board of Equalization will be in session at its regular meeting place in the Plains School in the City of Plains, Yoakum County, Texas at 9:00 o'clock A. M. the 1st day of July, 1963 for the purpose of determining, fixing, and equalizing the value of any and all taxable property except oil and utilities, situated in the Plains Independent School District, at which time and place said Board will consider any evidence you may elect to submit as to the value of said property for taxable purposes. The Board after consideration of all evidence submitted, will finally fix, determine, and equalize the value of your property for taxable purposes for the year 1963.

By order of the Board of Equalization, Plains Independent School District, Yoakum County, Texas,
By Garland H. Swann,
Secretary, Board of Equalization

Legal Notice

In obedience to an order of Equalization, regularly convened and sitting, notice is hereby given that said Board of Equalization will be in session at its regular meeting place in the Courthouse in the town of Plains, Yoakum County, Texas, at 9:00 o'clock A. M., beginning on Monday the first day of July, 1963, and from day to day thereafter, for the purpose of determining, fixing and equalizing the

value of any and all taxable property situated in Yoakum County, Texas, until such values have finally been determined for taxable purposes for the year 1963, and any and all persons interested or having business with said Board are hereby notified to be present.

SHAMROCK

NITROMITE
82.2% NITROGEN

SIDE-DRESS

WITH THE FULL MIGHT OF NITROGEN

It's now or never for this year's cotton and grain crops. The nitrogen needed for an abundant, high quality harvest should be applied before the 12th week of growth or before the plant begins to boot or bloom. Anhydrous ammonia supplies this nitrogen in the largest quantity by volume and in the most usable form. We recommend and sell Shamrock Nitromite because we know it to be a fine brand of anhydrous ammonia, 82.2% nitrogen.

JetAge In The Home

There was a time when things around the house came packaged in bottles, jars, and tubes. Now they come sealed in aerosol containers, ready to be rushed into use on a jet of compressed gas.

Instead of lifting bottle caps, twisting jar covers and squeezing tubes, it's the push of a button that instantly puts the product a homemaker wants where she needs it without effort or fuss.

It is this ease and convenience of use that is responsible for the aerosol packaging of everything from insecticides to deodorants, from plant sprays to shampoos, from window cleaners to whipping topping for cakes. About 40% of all household products bought today are in aerosol form.

An aerosol is a product sealed into a metal, glass or plastic container with a liquefied compressed gas. Regulating the gas mixture permits adaption of the principle to a variety of products and uses, from suspending a thin mist in the air, to spray-coating a surface or producing a creamy pleasant foam.

The first aerosol product ever introduced to the public was an insecticide. The year was 1946. Today, there are more than 500 different household products packaged as aerosols with more still to

come. The latest include a growing range of medicines and home remedies and a steadily increasing variety of ready-to-serve table foods.

Among the newest and perhaps the most unusual is Emko, a spermicidal aerosol foam contraceptive designed for feminine use. Easy and convenient to use, it has proved to be a highly effective birth control method. Joseph Sunnen, St. Louis philanthropist, long a supporter of family planning projects, and head of the Emko Company, was the first to suggest the idea of an aerosol foam contraceptive. During a visit to Puerto Rico for a meeting with family planning authorities there, Mr. Sunnen recognized the tremendous need on the island for an effective and easy-to-use contraceptive would have to be one that could be used by women, without medical assistance or prescription, and without follow-up feminine hygiene measures. From these suggestions Joseph Sunnen developed the idea for combining a chemical spermicidal barrier with a virtually impenetrable physical barrier, the aerosol foam. Thus Emko was born.

Among the other new and novel aerosol medical products are emergency pain relievers for quick relief and antiseptic treatment for painful burns, scrapes and open wounds. For the nursery, there are diaper fresheners, skin lotions and powders to soothe baby. And for summertime, there are aerosol medicines for the treatment of sunburn, poison ivy and muscle strain. Doctors are now testing an aerosol spray for the relief of angina pectoris, the heart ailment, a skin toughener for athletes, and vitamins.

As for new aerosol household products, there are spray-on gloves for the kitchen, a

girdle slip-on spray to make it easier to get in and out of this particular undergarment, a hosiery run preventive and a petticoat stiffener.

Among the new ready-to-use aerosol foods are barbecue sauce, catsup, cheese spreads, chocolate syrup, chocolate sauce, coffee, fat free cooking oil, horseradish, mustard, salad oils, salad dressings, meat tenderizer and a spray to preserve the freshness of eggs.

The homemaker can expect many more products to be packaged as aerosols. Today it seems that almost anything that can be applied or dispensed can be aerosol packaged.

Opening lead: Small spade.
East covered dummy's jack with the ace and returned nine of spades. South ruffed a diamond on the spade king, tried the club finesse and was down one trick. South cross-ruffed diamond on the spade king, tried the club finesse and was down one trick. South cross-ruffed remainder of the hand.

COMMENT: South's only chance was to get a heart lead, thus establishing a place to sluff losing spade before that suit was led.

Attending a year book workshop at Trinity College in San Antonio this week is Sarah Hunt. Sarah is editor of the P. H. S. 1963-64 annual.

Farmers Union Prexy Seeks Debate

Jay Naman, Texas Farmers Union state president, told members and guests of the Haskell County Farmers Union at a meeting in Haskell last night (Wednesday, June 19) that: "All of the farm income gains and reduced costs to government accomplished during 1961 and 1962 could be lost if the Congress accepts the proposals of state and national Farm Bureau leadership to repeal the feed grain program recently passed. The effort to do this is cleverly hidden in the small print of other legislation, which Farm Bureau is supporting as a substitute for the certificate wheat plan defeated in referendum."

Cotton Thirstiest While Fruiting

Cotton's need for moisture is greatest during the square, bloom, and young boll states, says Wayne Keese, extension agricultural engineer with the Texas Agricultural Extension Service.

The rate of water use by cotton plants varies through the growing season and intelligent irrigation is based on the periods of greatest need, says the engineer. The plants use very little water for the first few weeks after emergence but beginning with the appearance of the first square the rate of water use increases steadily. When the first blooms appear, the water requirement again increases steadily. When the first blooms appear, the water requirement again increases rapidly and the maximum rate of water use occurs at the peak bloom stage which is usually three to three and one-half months after planting, says Keese.

Shedding of fruit by cotton has been found to be associated

with low soil moisture during the early bloom and fruiting stage and therefore an adequate supply is needed for high yields, Keese explains. Excessively high moisture levels should also be avoided especially after the first bolls appear. This moisture can cause late vegetative growth which probably will not increase lint yields and can be undesirable if machine picking is planned.

Keese warns not to wait until all the available moisture has been used before irrigating the crop. Normally, irrigation should be started when 50 to 60 percent of the available moisture in the root zone is depleted. He recommends regular examinations of the soil in the root zone to determine the amount of soil moisture remaining. A soil auger or a sharpshooter can be used to obtain the soil sample and the rooting depth of the crop can also be checked as the season progresses.

Don't overlook the importance of soil fertility in successful cotton irrigation as optimum yields are produced when soil fertility and soil moisture are balanced, says Keese. See your local county agricultural agent for more information on cotton irrigation and while there get a copy of B-896, "Texas Guide for Growing Irrigated Cotton."

chances for desperately needed cotton legislation by contributing to the defeat of the wheat program, the Texas Farm Bureau joins its national leadership in opposing all proposed cotton legislation except that part of one bill that reduces price supports and increases acreage. It turns its back on the Cooley Bill presently being backed by all segments of the cotton industry, and which is considered the legislation upon which there is sufficient grower and processor agreement that it might pass the Congress.

"Farmers Union has testified in behalf of both the Cooley in the House of Representatives and the Talmadge Bill in the Senate. These bills will remove the inequity in price that has prevented domestic mills from competing effectively with foreign cotton, allowing more cotton to be consumed domestically. This will in turn enable us to maintain the present acreage, and keep the price supports at current levels. The Farm Bureau proposals will reduce grower income, move cotton from the traditional growing areas, and eventually result in a reduction of acres in these areas.

"Embracing again the discredited programs of the Benson Administration, Farm Bureau is seeking lower prices in the form of a sliding scale, along with the soil bank scourge the previously ravaged small towns and rural communities. So as to protect its friends in the grain storage business, Farm Bureau sees to it in its proposals that all grain will be carefully insulated in storage facilities and kept there at the taxpayers' expense and the storage man's profit.

farm programs, I believe that this position is completely foreign to the thinking of the rank and file membership of his organization. I wonder if Mr. Devaney has made clear to his members what he is proposing as a substitute for the certificate plan for wheat defeated in the referendum? "I feel sure that our friends in the news media will cooperate in providing facilities for statewide coverage of these debates, and I only hope that my past disappointing experience in getting Farm Bureau to meet me in a public forum will not be the case at this critical time."

the COMPTON QUIZ

By Keith Roberts, Director, Information Service

Test your knowledge with these questions and answers from the pages of Compton's Pictured Encyclopedia.

1. What state is the only one to recognize two official languages?
2. Who was the first woman to win more than one Nobel prize?
3. What bird lays a three-pound egg?
4. Does a United States citizen forfeit his citizenship when he marries an alien?
5. Who was the "Lady with the Lamp"?
6. How did the United States get the nickname Uncle Sam?
7. How many instruments make up a modern symphony orchestra?
8. What famous Southern song was written by a Northerner?
9. Who was the first American novelist to earn his living by writing?
10. Which of the 13 colonies was founded as a haven for imprisoned debtors?

- ANSWERS**
1. New Mexico recognizes English and Spanish.
 2. Madame Curie 1903 and 1911.
 3. The ostrich produces the largest birds' egg.
 4. No.
 5. Florence Nightingale, honored in Longfellow's poem, "Santa Plomena."
 6. Started as a jest referring to local title of Samuel Wilford in Longfellow's poem, "Santa Plomena."
 7. 70 to 100.
 8. Dixie — written by Daniel P. Tandy, 92 — ranges from Troy, N. Y., during War of 1812.
 9. Florence Nightingale, honored in Longfellow's poem, "Santa Plomena."
 10. Georgia (1771-1810).

make your own TV TEST

(Circle correct personality with pencil. Add score at bottom.)

1. Seen often on "Stump the Stars," she had title role in Kildare episode, "Hastings' Farewell."
Rita Gam, Beverly Garland, Dana Winter.
2. Another "Stump the Stars" regular, also a "Rebel."
Stubby Kaye, Nick Adams, Harry Guardino.
3. She's "White Witch Doctor" in Saturday TV movie.
Ann Jeffries, Rita Hayward, Susan Hayward.
4. Well-known singer had troubles with father in "Virginian" episode.
Dick Lawrence, Fabian, Andy Williams.
5. He became a father in Disney's "A Salute to Father."
Mickey Mouse, Goofy, Donald Duck.

ANSWERS: Garland, Adams, Hayward, Fabian, Goofy, Mickey Mouse, Donald Duck, Stubby Kaye, Harry Guardino, Rita Hayward, Ann Jeffries, Susan Hayward, Dick Lawrence, Fabian, Andy Williams, Mickey Mouse, Goofy, Donald Duck.

Live by Faith

"The just shall live by faith." — Habakkuk 2:4

If we have faith in Christianity, then we have faith in God and in the purpose of our own existence upon earth.

Paul the Apostle reminded the Galatians that, as Abraham believed in God, so was righteousness expected of Abraham. While Abraham was blessed with faith, this gift was not Abraham's alone. We can all share faith in Christianity and accordingly share in the promise of eternal salvation.

If we have faith; in ourselves; in our fellow man, we will be able to more readily understand why it is that the "just shall live by faith."

THE PLAINS RECORD

Sarah Hunt Attending Institute

Sarah Lee Hunt of Plains is attending the second annual National High School Journalism Institute on the Skyline Campus of Trinity University, June 16-21.

Miss Hunt, the daughter of Mr. and Mrs. Earl D. Hunt, is editor of the Plains High School yearbook, "Cowboy."

The Institute, sponsored by Trinity, includes lecture and laboratory sessions on newspaper and yearbook editing conducted by members of the Trinity journalism faculty and professional journalists in San Antonio.

Special sessions on contemporary thought in politics, philosophy and psychology are also scheduled.

C. Court Minutes

In their regular meeting last Monday morning, Yoakum County Commissioners attended to regular business, including the paying of bills as presented by the auditor.

They also decided to sell a \$5,000 hospital bond.

Decision was made to increase the salary of Zonell Cook, who works in the Tax Collector's Office, to \$335 a month.

Students Need Birth Certificates

When the first school bell rings this September there will be 264,783 six-year-old children entering school for the first time in Texas, according to estimated enrollment figures compiled by the Texas Education Agency.

In addition to the million-and-one chores that must be performed in getting the youngster ready for school—new shoes, clothes, health examination—most school districts require proof of age for beginning students. A certified copy of a birth certificate is usually requested.

Anticipating this, the Records and Statistics Section of the Texas State Department of Health is readying itself for the onslaught of requests for such copies that comes pouring in during the middle and late summer.

The problem is, too many parents wait until the last moment before requesting their copy.

Because of this, a temporary increase in staff is necessary. It takes a sizable staff just to open the thousands of letters received daily, let alone search out the requested certificate, remove it from the thick volume, photograph it or make a certified copy, mail it out, and then return

the original certificate to its proper place.

Years of experience have eliminated nearly every bottleneck. The operation is smooth and fast. Usually, the copy is mailed within a day or two after the request is received.

However, one serious bottleneck still exists—persons who insist upon waiting until the last few days before school begins to mail in their request.

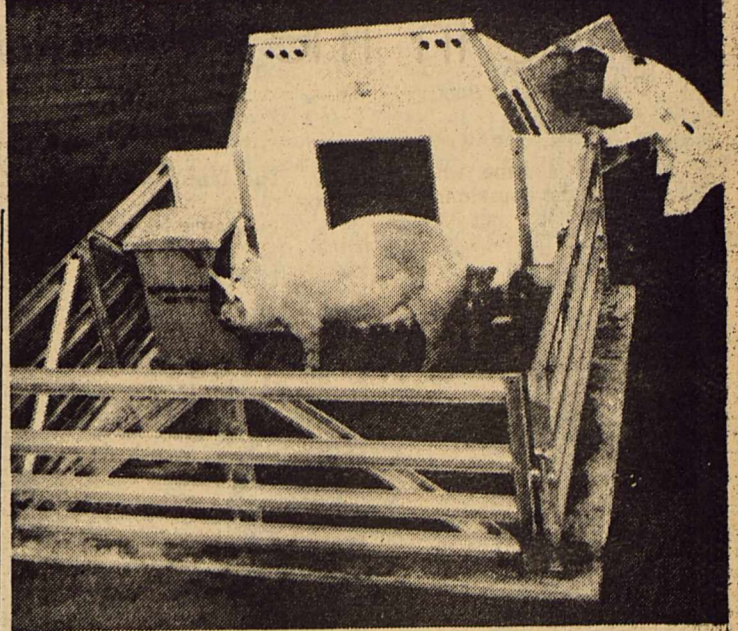

In recent years the last-minute rush hasn't been quite so bad, but it is still a serious problem. Requests should be sent in as soon as possible. The State Health Department fee for certificate copies is \$1.50.

Certified copies can also be obtained from county clerks and local registrars for a similar fee.

Most important aid for speedy service—aside from getting requests in early—is complete and correct information.

Parents should include the child's name, his place of birth, date of birth, and the parents' name (including the mother's maiden name).

Armed with the correct information, a certified copy or birth card will be speeded on its way as quickly as many years of experience and a well-trained staff can send it.

A PIG HOUSE . . . This latest in houses for pigs, complete with exercise pen, is a far cry from the old pig sty. Called an "Isolt," it is said to have reduced losses of baby pigs to nearly zero.

ITEM: Good buys in June are milk and dairy products, listed in the "plentiful foods" category at this time of year. Milk production is at its peak during this month. On the list of "plentifuls" most everywhere: broiler-fryers, eggs, beef, and early summer vegetables—lettuce, cabbage, potatoes, sweet corn and carrots.

ITEM: Summertime is ice cream time and most everyone likes the "homemade" kind. Hand freezers are still popular. You can buy a gadget to electrify your old-time freezer—or you can buy an ice cube tray that makes ice cream in the freezer compartment of a refrigerator.

ITEM: One advantage in buying bedding plants in individual clay pots is that you can select any number of plants exactly the same size, to insure the symmetry of your flower garden right at the start.

ITEM: Planning to sell or buy an older home? Take a look at the new company's Plumbing, Appraisers and Independent Buyers commonly determine the age of a house by the appearance of its plumbing fixtures.

Weekend guest of the T. E. Ethridge family were Delton Ethridge and Helen and Patty Irwin from Croville, Washington, Gene Ethridge and family from Slaton, J. B. Douglass and family from Lubbock, and Lindell Ethridge and family from Brownfield.

Mike Reading Availability

First step in providing cotton farmers with the new "mike" testing service of the U. S. Department of Agriculture has been taken by the Lubbock Cotton Classing Office.

Instructions for applying for this marketing service were mailed to 381 ginners in this territory, according to Mr. Palmer, Officer-in-Charge of the Lubbock Classing Office.

Also, a booklet of questions and answers about "mike" testing, pictures of the scientific instrument, the micronaire, and how it operates, have been sent to ginners to help them explain the service to their customers.

"Ginners are the key people in making the 'mike' testing service available to cotton farmers," Mr. Palmer emphasized, "because it's up to them to apply for it and to handle the fee of 8 cents per sample."

All cotton farmers in organized Smith-Doxey cotton improvement groups are eligible to have their cotton "miked."

"The micronaire reading will give farmers another measurement of the quality of their cotton in addition to the traditional grade and staple classification," Mr. Palmer said.

Ginners are urged to apply for this "mike" testing service as soon as possible. Deadline for applying is July 1.

How can you get a "mike reading" on your cotton? Ask your ginner to apply for this U. S. Department of Agriculture service, says W. K. Palmer, Officer-in-Charge of the Lubbock Cotton Classing Office.

Science Briefs

Interplanetary Compass
The magnetic poles of the planet Jupiter have been tentatively located by two Australian physicists. Like the magnetic poles of the Earth, they are some distance away from the planet's true North and South poles.

Versatile Virus
A tumor virus from chickens has been found able to induce various types of cancer in mice, rats, guinea pigs, hamsters and rabbits, according to a Texan virologist.

Dream On
About 20 percent of a normal night's sleep is spent dreaming, a group of University of Chicago scientists have found. The time is divided into five or six dreams, the final one lasting as long as 45 minutes.

High Spy
Biologists have found a use of their own for Tiros, the weather-spotting satellite. It may be used to detect the formation of swarms of desert locusts.

ITEM: Because research indicated some thoughtless people opened jars of baby food in stores, sometimes even tasted them, some manufacturers have introduced screw caps on baby food jars with safety features which indicate whether or not the jars have been opened. One type has a button in the center of the cap which is held in a depressed position by vacuum in the jar. If cap is opened, button pops out. Another type has parallel lines continuously across top of the cap and these lines will no longer match at rim after cap has once been removed.

ITEM: More persons are killed in falls around the home than in any other type of home accident. Danger point: tub or shower. Solution: install a "grab bar." It's inexpensive, can be anchored to the studding of wall adjacent to tub or shower. Under no circumstances should it be "tacked" to plaster or tile where it can become loose and pull out under stress.

ITEM: While colored plumbing fixtures are becoming more and more popular, a smart decorating touch is to use a colored seat on a white water closet bowl in the bathroom or powder room. A colored seat makes it possible to brighten the bathroom interior by carrying the color theme to towels, bathmats, shower curtains and wall paper.

ESSICK

EVAPORATIVE AIR COOLERS

TWICE AS MUCH COOLING ALL SUMMER LONG

Many coolers lose as much as 70% of cooling efficiency because dust, dirt and salts clog the filters.

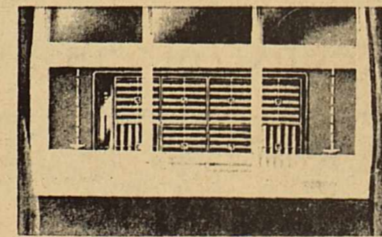

Patented No-Clog Sta-Fresh Filters are guaranteed clog-proof, with complete insect protection, assuring 100% cooling efficiency all summer long.

Filters saturated with water become heavy and often sag and settle from the top, drawing hot, unfiltered, uncooled air into the cooler which continues all summer long and may create as much as a 70% cooling loss.

Patented Grip-Lock Filter Holders are guaranteed to prevent sagging and settling of filters for the life of the cooler, assuring 100% cool, clean, filtered air.

Without correct water trough adjustment, sections of the filters remain dry, resulting in substantial cooling loss and costly service expense. Correct water distribution is almost impossible if the trough is not visible and adjustable from the outside while the cooler is in operation.

Patented Free-Flo Visible Water Troughs with external adjustment assure 100% filter saturation, and 100% cooling for the entire life of the cooler.

ALL WEATHER CONTROL. *Patented Window Closing Attachment lets you close and lock your window ----
Eliminates entry of dust, rain and drafts into your home. ----
Provides protection against illegal entry. Eliminates removing and storing cooler during winter months. Furnished on all Deylle and Capri Models.

"NO-CLOG STA-FRESH" FILTERS. Redwood impregnation eliminates the offensive odors which often exist in other cooler filters. Coarse mesh outside prevents clogging and fine mesh inside gives positive insect protection.

Some Rent Cars Cheaper

A small but growing number of drivers are deciding it's wiser to rent a car than to buy one, according to an article in the current issue of Changing Times, the Kiplinger Magazine.

The article notes that renting can save if the driver uses a car only once in a while, parking is troublesome and expensive, and a car-owner normally trades in his new car every two years or so and takes a big licking in depreciation -- the annual loss in value as the car grows older.

To determine whether or not renting would pay, the magazine advises first totaling the cost of owning a car--finance charges, garage costs, insurance, license fees and depreciation, added to operating costs figured at 3 1/2 cents a mile for gas, oil, tires and maintenance for a new standard-sized car, about 3 cents a mile for a compact.

Figuring rental costs includes estimating the number of miles to be driven, and breaking them down by days or weeks, depending on the time periods the car would be

rented, then adding in the cost of transportation by other means when not driving a rented auto.

Finally, the magazine advises, the driver should ponder the intangibles, too. "By renting a car, you cut down on such irritations as parking problems and maintenance worries. On the other hand, if you buy an auto you will always have it available for immediate use."

from HISTORY'S SCRAPBOOK

IMPORTANT DATES AND EVENTS FROM YESTERYEARS

Charter for a new league of nations was completed at a San Francisco conference, June 21, 1945. June 21 marks the longest day of the year and the beginning of summer.

The Nazi army invaded Russia, June 22, 1941. President Roosevelt signed the GI Bill of Rights, June 22, 1944.

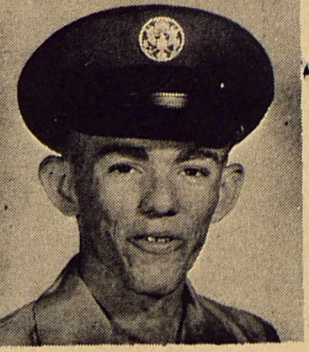

James Long declared himself head of a republic in Texas, June 23, 1819. Wiley Post and Harold Gatty began round-the-world flight, June 23, 1931.

John Cabot "discovered" North American mainland, June 24, 1497. President Roosevelt pledged "all possible aid" to Russia, June 24, 1941.

The Marine Corps was established by Congress, June 25, 1776. The A.E.F. reached France, June 25, 1917.

Fifty nations signed the new League of Nations charter in San Francisco, June 26, 1945.

The British government recognized Charles DeGaulle as leader of all free Frenchmen, June 27, 1940.

McCurley Goes Assignment

Airman Gary K. McCurley of Bronco, Texas is being re-assigned to Lookout Mountain Air Force Station, California, for training and duty as a motion picture editing specialist.

Airman McCurley recently completed United States Air Force basic military training here.

The airman, son of Mr. and Mrs. R. C. McCurley of Bronco, attended Plains High School.

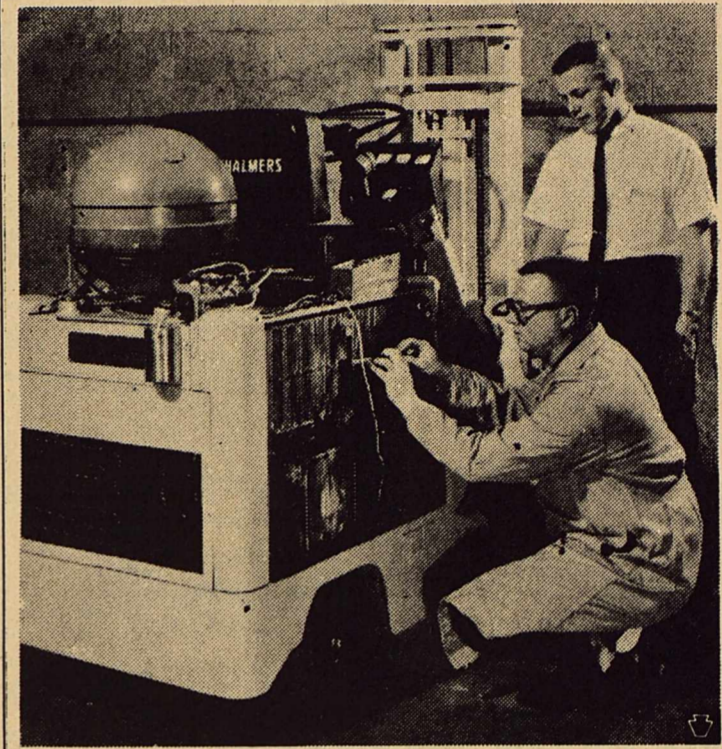

New Aerospace Study

WASHINGTON — The Stanford Research Institute reports that "significant and difficult problems" in the aero-space industry-government relationship must be overcome if this country is to get the best possible weaponry and space systems.

Karl G. Harr, Jr., President of Aerospace Industries Association, said an independent study was conducted by S.R.A. and financed by his organization.

The S.R.A. reporting team found that while "the achievements of industry have helped to preserve the security and international technical reputation of the country," many individuals in government and business believe the relationship "is not as creative, productive or rewarding as the parties involved as it should be."

Water And Air, Fuel For The Future?

This experimental fuel cell powered fork lift truck developed by Allis-Chalmers has been work-tested "with most satisfactory success," the company reported. The firm is also currently conducting numerous other studies in fuel cell technology. In one such study water and air would be converted into suitable fuels for fuel cell powered vehicles.

ply lines required to bring in vast quantities of fuel for tanks, trucks and personnel carriers.

It also appeared feasible to design all components of a depot so that they could be easily transported by trucks or planes. A complete depot could be put into operation quickly, and dismantled and erected elsewhere to keep pace with a fast moving army.

This system would be practical even in arid regions since the by-product of fuel cell operation is water which could be returned to the depot for reprocessing into fuel.

The study was primarily concerned with using nuclear energy to produce fuel for vehicles. However, the fuel could also be used in fuel cells to

provide electricity for communications systems, field hospitals or command posts.

Allis-Chalmers scientists said that present military vehicles with gasoline or diesel engines could also burn hydrogen as a fuel. They would be less efficient than hydrogen-oxygen fuel cell vehicles. This, however, would minimize the problem of converting existing conventionally powered vehicles to fuel cell powered vehicles.

In addition, certain types of missiles can be powered with hydrogen and oxygen. A mobile energy depot could potentially be adapted to space applications with a self-contained system placed on a planet or the moon to provide fuel for exploratory vehicles.

SMOKING TIPS FROM A. M. A.

It all started with Sir Walter Raleigh and a Y-shaped pipe.

The pipe was a gift to Raleigh from Sir Francis Drake -- a souvenir from the West Indies, where natives put the pipe prongs in their nostrils and inhaled the smoke of a smouldering substance they called "tobacco."

Raleigh apparently set the style of his day, for when he took up smoking the practice soon became fashionable. All this happened nearly 400 years ago -- in 1586. Since then smoking has become perhaps the most deeply ingrained habit of humanity.

Today in the United States alone, more than half the men and a fourth of the women smoke cigarettes daily, and additional millions smoke pipes and cigars. And the habit is winning more and more young recruits each day.

Teen-aged youngsters in increasing numbers are succumbing to the blandishments of national advertisers who depict smokers as virile men or beautiful girls, or to the pull of "belonging" to a sophisticated group whose smoking members frown on non-

men and a fourth of the women smoke cigarettes daily, and additional millions smoke pipes and cigars. And the habit is winning more and more young recruits each day.

Studies by the U.S. National Institutes of Health, the British Ministry of Health, and other scientific organizations of equal prominence, purport to show a strong statistical relationship between smoking

and higher death rates from heart diseases, lung cancer and other pulmonary diseases.

The position is attracting support from many organi-

zations -- among them the Texas Medical Association, the American Cancer and Heart Association, the American Public Health Association, the U. S. Public Health Service and departments of health in most states.

Some researchers are so firmly convinced of the connection between cigarettes for public sale if introduced as a new product on today's market.

A fewer number of capable researchers are unimpressed by the statistical studies, claim they are inconclusive and actually contradictory. But they are finding it increasingly difficult to defend their stand in the face of ominous facts and evidence which continues to build up.

The late Dr. William Mayo used to say cigarettes, cigars and pipes were mere "adult pacifiers," "something for idle hands to play with. If true, breaking the smoking habit probably isn't as hard as it has been represented.

Should you, personally, make the effort? That's your decision, just as the decision for or against beginning to smoke must be made by teenagers themselves.

Plan Carlsbad

Diamond Jubilee

Not so long ago, if a fellow told of water sport skills displayed in Carlsbad, N. M., his listener would mark him off as a nut who'd had too much dust.

However -- much to the southwest's credit -- it is a true story.

Believers are coming to Carlsbad by the thousands each Sunday afternoon to watch the Diamond Jubilee water sports show as it makes impressive practice runs on the Pecos River.

This is part of the buildup pointing to New Mexico's biggest birthday party of the year. Carlsbad will be 75 years old come August and to prove its still full of life and kicking up a storm it will stage a Pageant of Progress on August 4-10.

Aside from the water show, which will feature the world champion water ski troupe from Cypress Gardens, Fla., there will be dances, fashion shows of the past and present, contests in dress of the Jubilee Belles and in beard growing by the Brothers of the Brush.

Leaders from throughout the State of New Mexico will be present for the affair which opens on Monday, August 5, with Governor and Homecoming Day.

Information on the Diamond Jubilee, such as accommodations and a complete schedule of events, may be obtained by writing Diamond Jubilee Headquarters, 126 S. Canyon St., Carlsbad, N. M.
