Car Thieves Strike Here Leave One, Steal Another

Yoakum County Sheriff Olan Heath reported that a stolen car was recovered by Deputy Sheriff Don Rogers about a mile north of Plains about 9:15 p.m. Saturday. The car had been reported stolen a drunk charge. Each emplo-yee of the Sheriff's force main Levelland at 8:30 p.m. Deputy Rogers said that the motor in the car was still hot and that the car had run out of gas. Rogers speculated that the car had been abandoned minutes before he arrived on the scene. The automobile was a 1963 Ford and it was owned by Bill Garner of Levelland. Mrs. Garner reported that she saw some men drive it away from their home. The Garners came after the car late Saturday night.

Early Sunday morning a 1951 Dodge automobile was stolen from the Judge Bean Court in Plains. Rogers speculated that the car thieves who had abandoned the Ford the night before took the Dodge here. It belonged to an Oklahoma man who is doing combining West of town. He missed the car at about 6 a. m., as he was ready to leave the motel to return to Oklahoma.

cneating nence, not useful in the Constitutional sense. What if an invention, while useful

for evil, is also useful for good? That is enough basis for a patent. For example, an improved pistol could be patented. Although an instrument for evil in the hands of a robber, it could also be an instru-

ment for good in the hands of a policeman. A third requirement, for an invention to be considered useful, is that it must be more than a mere frivolity.

Of course, what is frivolous to one generation might not be to the next. A century ago a federal court said that a hoop skirt could not be patented, because it had no serious value to society. But today's courts are not likely to be that prim and proper.

As for what might be called "oddball" inventions, the Patent Office generally takes a tolerant view. For instance, it has issued patents for an automatic hat-tipper, a shield for grapefruit-eaters, and a gun for

shooting down flies. For who can be sure that the

oddity of today won't be the success of tomorrow? Wise men scoffed, too, at Alexander Graham Bell's talking toy-one of the most useful, and profitable, inventions of all

Their quality dresses are the very latest in smartness and their styles will distinguish the wearer as a well-dressed woman. This shop has long been known to the women as the place where they can obtain their every need. For any one firm to assume

the fashion responsibilities of this section is rather a large undertaking, but through their desire to represent only the finest and best, Arledge's has become fashion headquarters for the discriminating women of our area. The principle upon which this store is operated is that of furnishing individual and distinctive garments and of meeting any and all competition in quality,

style and price. We wish to compliment Arledge's upon their policy of quality and the latest styles in ladies garments.
