ROGER BABSON SAYS—

"Every City Should Organize and Support A Good, Well-Filled Library"

I am a great believer in public libraries; I believe every city should support a good one. I am especially interested in the work my friend Thomas Drier is doing to encourage such libraries. Andrew Carnegie showed wisdom in selecting public libraries for his gifts. Whether, however, he would make the same choice today, we do not know. Certainly, public libraries now have great competition from radio, television, and "paper back" books.

RADIO AND TELEVISION
 I would not object to these new developments if they were putting out better material. The librarian can urge readers to take out good books; but listeners to radio and television get too much of the stuff which is thrown out on the air whether good or bad. Is such material making our people softer, or harder?

I wish that cities would support their public libraries through paid

advertisements in local papers. Working with the librarian, they could do much to improve their citizenry. Just think, one can get absolutely free the novels, histories, and life observations of the most prominent writers of the world; the life thoughts and life works of great teachers, preachers, scientists, bankers, merchants, manufacturers, and shopkeepers. The opportunity truly is terrific. For free material thereon, write Mr. Thomas Drier, St. Petersburg, Florida.

WHAT ARE PEOPLE READING?
 We must encourage people not only to use their public libraries but to get the best reading material. In a recent trip to the Boston Public Library's periodical reading room, I found 35 percent of the people there reading the funnies, 25 percent reading about sports, 20 percent accounts of murders and other crimes, 15 percent features and ads; while only 5 percent

appeared to be reading editorials or other worthwhile material. According to ex-Governor Harriman who recently returned from Russia, a situation like this makes Mr. Khrushchev very happy.

WHAT MAKES CHARACTER
 Psychologists tell us that most of what we hear and read "goes in one ear and out the other." This may be good news to educators and parents, but not to those who sponsor radio and TV programs. It is said that less than 20 percent of the possible television viewers see any given program, while less than 1 percent remember it or the name of the sponsor.

Although I am a great believer in intelligent advertising of all kinds (except billboards), I feel that there is a tremendous waste of money in much of the radio and television advertising. Unsound material sent out over the air undermines American character, which is the real defense of the United States.

NEEDED: MORE OPEN LIBRARIES AND MORE CHURCHES

When I was at Cape Canaveral in Florida a short time ago, I was astounded at the many billions we are spending on missiles compared with the 3 billion we are spending annually on Christian education. Furthermore, while these experimental missiles and anti-missiles are being sent up every hour of the day, comparatively few churches are open each day. The Roman Catholics set a good example in keeping their churches open; but of the 275,000 Protestant churches, only about 13,500 are registered as open every day. Those desiring detailed free information on keeping churches open should write the Open-Church Foundation at its National Headquarters in Gloucester, Mass.

America was built by church people. New England was settled by the Pilgrims and Puritans; Pennsylvania by the Quakers; Virginia by people from the Church of England. The first thing built in each new community was a church, and the next a schoolhouse. Academies and small colleges followed. Khrushchev hopes that we will kick down this ladder by which we climbed; but let us be careful not to do this.

Conclusion
 Churches, schools, and governments must realize that we are living in a critical period. We must not let these organizations become social clubs. We must all work to make harder citizens, anxious to render service rather than to get profits or security. We must not let our children become "softies." If they can no longer work in the cornfield or at the woodpile or kneel at the church altar we must give them something to take the place of these great fundamental educators.

The Foy Allcorns Honored At Shower In Hopewell Church

Honoring Mr. and Mrs. Foy Allcorn, who were married July 18, in San Angelo a miscellaneous shower was given Saturday, August 1, in the annex of the Hopewell Baptist Church. Mrs. Allcorn is the former Margaret Warren of Ballinger.

Guests were greeted by the honoree's and the groom's mother, Mrs. Lonnie Allcorn. Carolyn Faubion registered the guests and Brenda Faubion played piano selections throughout the evening. Gifts were shown and refreshments were served to approximately sixty guests.

Runnels County HD Clubs Observed Rally Day Thursday

Eleven Runnels County Home Demonstration Club observed Rally Day Thursday, August 6, in the Ballinger Armory. Registration began at 10 a.m.

Delegates elected by the council last Tuesday, to attend the State Texas Home Demonstration Association convention in Galveston in September are Mrs. Marion Hays, Mrs. W. J. Curtis and Mrs. Jim Weatherby. Alternates are Mrs. E. F. Farley, Jr., Mrs. Glenn Eager and Mrs. Alfred Multer.

Miss Ollie Chenoweth, agent, announced that two Norton 4-H girls, Carolyn Gattschalk, senior, and Myra Minzenmayer, junior, will model in the District Dress Revue.

Runnels County Home Demonstration members will participate in the West Texas Fair in Abilene, September 12. The education committee with Miss Chenoweth chose "Keys to Distinction in Dress" for its theme illustrating the rule of fourteen dressing guides as applied to apparel distinction. A dress or suit, hat, gloves and purses made by individual members will be displayed.

A complete hat, showing the different stages of procedure, will be made in Exhibit No. 5 on September 16. Six other members will be in charge of the exhibits from 10 a.m. until 10 p.m.

Mrs. Clyde Simmons, Mrs. J. L. Ohlhausen and Mrs. Tom McNailey will serve on the nominating committee for 1960 council officers.

Texas' New Water Safety Laws Explained

(This is one of a series of three articles concerning Texas' new Water Safety Act. It is being published in the interest of safety for all sportsmen and others whose recreation interests include boating, swimming and skiing.)

The phenomenal growth of interest in motorboating and other water sports, during the past few years, has brought about a concentration of statewide problems that were, heretofore, little more than a nuisance with only occasional dire results.

Today, however, the leading problem has been one of how to foster accident prevention with a minimum of regulations and maximum of protection and freedom for all water sport enthusiasts, i.e., fishermen, swimmers, skiers and just plain pleasure craft operators.

Texas' new Water Safety Act is the first statewide attempt to promote safety in water sports by broad legislative means.

In brief, the Water Safety Act hits at the problem in three general ways: By specifying minimum safety equipment and operation (Part I); Providing penalties for unsafe operation or non-compliance with the Act, and a means of enforcement (Part II); Finally, by making provisions for boat identification through a numbering system.

A condensed explanation of this system is the duty of Part III.

On August 11, of this year, the Texas Highway Department will begin administering all provisions of the Act. However, boat owners have a March 31, 1960 deadline to make application for a Certificate of Numbers (registration). The deadline for dealers and manufacturers is April 1, 1960, after which time each boat manufactured and sold must be complete with numbers.

The Act requires that the number painted upon or attached to the hull be of block characteristics of good proportion, not less than 3 inches in height, and read from left to right. The number must be displayed on each side of the bow and kept in a legible condition. Each Texas number will carry the prefix: TX

CLASSIFICATION AND FEES
Each of the following classes of boats will be registered for a three year period for the fees shown:
Class A: Less than 16 feet in

length, \$1.00.

Class 1: 16 feet and over and less than 26 feet in length, \$5.00.

Class 2: 26 feet or over and less than 40 feet in length, \$10.00.

Class 3: 40 feet and over in length, \$12.50.

All motorboats of 10 horsepower or under are exempt from the numbering provisions of the Act. Although it should be pointed out to boat owners in this category that the Certificate of Number system offers a good, inexpensive means of positive identification for proof of ownership purposes.

APPLICATIONS

Applications must be made on a form approved by the Texas Highway Department and be accompanied with the proper fee. Upon receipt of the application, the Department will maintain a record and issue him a Certificate of Number stating the number awarded the motorboat and name and address of the owner.

If the owner transfers any or all of his interest in a motorboat registered in his name, or if the boat is abandoned or destroyed, he must notify the Department, within a reasonable time and surrender his Certificate of Number.

A person who buys a motorboat that has been previously registered under this Act, must make application to the Department for a transfer of Certificate of Number. The application must be accompanied by proof of evidence or ownership, name, address and \$1.00 transfer fee. Owners must also notify the Department of any change in address.

DEALERS-MANUFACTURERS

All new boats manufactured for sale in Texas after April 1, 1960, must carry a manufacturer's serial number stamped on or laminated into the structure of a boat before the owner can obtain a Certificate of Number.

The Act makes special provisions for dealers and manufacturers in the use of boats for demonstration purposes and for selling boats with a temporary facsimile Certificate of Number. The 3-year fee for a dealer or manufacturer is \$25.00.

EXCESS FUNDS

Sportsmen will be pleased to learn that excess funds accrued from boat registration fees, above administrative costs, must be used for purchasing access ways to public waters, boat ramps and for their maintenance.

MRS. RAYMOND GERALD DANFORD (Photo by Little)

Barbare Ann Hand Became Bride Of Raymond Gerald Danford Friday

Barbara Ann Hand, daughter of Mr. and Mrs. S. A. Hand, became the bride of Raymond Gerald Danford, son of Mr. and Mrs. P. H. Danford, Friday afternoon at 4 o'clock in the home of her parents.

The Rev. Virgil James, pastor of the Southside Baptist Church, officiated for the double ring ceremony before a wrought iron archway decorated with green fern and white carnations.

Mrs. J. P. Danford, sister-in-law Sub Deb Club. At the present, Mrs. and J. P. Danford served his brother as best man. Mrs. Danford wore a blue shantung dress with pink accessories. She also wore a corsage of pink carnations.

Given in marriage by her father, the bride wore a ballerina length dress of white lace over taffeta fashioned with a fitted bodice, bouffant skirt and a bolera with a peter pan collar and long sleeves coming to a point at the wrist. Her veil of illusion fell from a crown of seed pearls and her cor-

sage was of white carnations.

Following the ceremony, a reception was held in the home of the bride's parents with Nina Hord and Mrs. J. P. Danford serving as hostesses.

The bride's table, laid with white linen, was centered with an arrangement of pink rosebuds.

For a trip to New Braunfels, the bride wore a white pique sheath with white accessories. The bride is a 1957 graduate of Winters High School where she was cheerleader, a member of the girls basketball team, Gale staff, Future Homemakers of America and the Sub Deb Club. At the present, Mrs. Danford is employed at Smith Drug.

The groom, a 1958 graduate of WHS, was a member of the track team, Blizzard basketball team and Future Farmers of America. He recently finished Texas Barber School in Fort Worth and is employed at Frank's Barber Shop.

No Grazing Now Means More Grass Seed Next Year

Range deferment during August, September and October will make grass seed for the coming year. This is also the season when plant vigor increases the most, says Glen Green of the local Soil Conservation Service.

More than average rainfall was received during June and July in the Runnels Soil Conservation District.

Since the rains the better grasses such as sideoats grama, little and cane bluestem and buffalograss are seeding already. With complete deferment these grasses can be increased to provide a high quality vegetative cover.

This cover will protect the range from wind and water erosion and provide more and better grazing for the winter months. Deferment should be applied to

ranges which makes the fastest improvements. Caution should be taken not to overgraze other pastures.

A few of the many cooperators in the Runnels Soil Conservation District who practice range deferment are Pete Giesecke, Jr., Joe Willike, R. T. Burks and Norval Alexander.

APPRECIATION

In expressing my sincerest appreciation to the friends in Winters who have been so interested in the success I have gained so far by the public reception of my record, "Waterloo." I wish to thank those who have sent cards and letters of congratulations and best wishes.

Many of you sent clippings from newspapers and one teenager friend wrote, "You keep writing them and we will keep playing and loving them." (That I hope to do). It is my earnest desire that each of you will accept this as a personal expression of my sincerest thanks, since lack of time does

not permit me to write each of you personally. Marijohn Wilkin. Jtp

State Fair Will Offer New Horse Show Oct. 9-25

An entirely new horse show, offering a total of \$34,840 in cash premiums and featuring most of the fashionable light horse breeds in the United States, will be inaugurated at the 1959 State Fair of Texas, Oct. 9-25.

The State Fair of Texas Horse Show, as it is officially titled, will present three different series of shows, with judging scheduled almost every day of the fair.

The new attraction will bring together in one show for the first time at the State Fair such breeds as the American Saddle Horse, Tennessee Walking Horse, Thoroughbred, Standardbred and Arabian. The popular Quarter Horses, Palominos and Shetland Ponies which have been featured in previous State Fair shows will also continue to be spotlighted.

The Horse Show will be presented in the new, modern \$1,000,000 State Fair Livestock Coliseum, which will seat more than 7,000 spectators. With its adjacent stables and exercise areas, the new Coliseum is considered to be an ideal setting for such an elaborate horse show. The Coliseum will be put into use for the first time during the 1959 State Fair.

The show's opening Series I, Oct. 10-13, will feature 3 and 5-gaited horses, fine harness horses, Futurity of Texas, walking horses, road and parade horses and hunters and jumpers.

Series II, Oct. 14-18, will star the ever-popular Open Cutting Horse Contest and Quarter horse conformation and performance classes.

The third series of the horse show, Oct. 20-25, will present Shetland Ponies and Palomino and Arabian horses in halter and performance classes.

The new show is a member of the American Horse Shows Association. Series I and the Arabian show of Series III will be conducted in accordance with AHSA rules.

Ray W. Wilson, the State Fair's livestock manager, is manager of the State Fair of Texas Horse Show. Douglas Mitchell of Fort Worth, longtime State Fair horse show official will be assistant manager, and J. Glenn Turner, a vice president of the State Fair, is chairman of the Coliseum Horse Show Committee which is planning the attraction.

Studies Made On Cotton Root Rot

Cotton root rot has been a serious disease in Texas for at least 100 years, says Dr. L. S. Bird, Texas Agricultural Experiment Station plant pathologist.

Obtaining information on root rot were objectives first given by the Texas A. & M. College System to L. H. Pammel in 1886. Dr. Pammel reported his preliminary findings in Texas Agricultural Experiment Station Bulletin No. 4 in December 1888.

Dr. Pammel said correctly that root rot is caused by a soil inhabiting fungus, and to control the disease the spores and fungus threads which transmit it through

the soil from plant to plant must be destroyed. He said that from a practical point of view, a proper method of crop rotation is the best way to destroy the fungus.

Following this pioneer work, a large number of scientists working for the Texas Station, the USDA and other public agencies have studied and many are still investigating the root rot problem, Dr. Bird says.

Observations and experiments indicate that the root rot fungus attacks some 2000 species of wild and cultivated plants, with cotton the major cultivated crop attacked. For this reason, the disease is commonly referred to as cotton root rot.

Many methods have been used to try to eradicate root rot, among them; tillage practices — using

deep plowing and large disk plows; crop rotation; building up soil organic matter; increasing soil microorganisms; chemical control; conducting biochemical investigations; soil and fertility experiments; and by trying to find cotton varieties resistant to root rot. Dr. Bird adds that the best practices to follow in a control program are: rotating cotton with crops which are not susceptible to root rot, increasing the amount of organic matter in the soil, deep fall plowing, and by nitrogen fertilization.

Patience is the art of solving problems by letting them alone.

If you never advertise, some people will never hear of you, or what you have to offer.

State Accepts Valley Tract for Whitewings

The State of Texas has accepted a quit claim deed to approximately 1 1/4 acres of land in the Lower Rio Grande valley, to add to 66 acres previously purchased for a white-winged dove nesting area.

The small parcel was delivered to the Game and Fish Commission for a token payment of \$1 by Grover C. Singer, Brownsville Shipper and grower of valley citrus fruit.

The State recently had bought the 66 acres from Mrs. Dell Vashell. The back side of the tract, a small creek, making it difficult for fencing. With the addition of the Singer property, it was possible to better fence the area.

The Game Commission now owns

several of these small tracts in the valley which provide brush nesting areas for the whitewings. Mr. Singer's quit claim deed was sent to Gov. Price Daniel, who approved the State's acceptance of the property.

As a result of the work done on these white-winged dove nesting areas, the bird has been making a successful comeback in the valley. This year the Commission has set up another whitewing season for the 3rd consecutive year. This season there will be shooting on three alternate days, September 11, 13, and 15, from 2 p.m. until sunset.

WHY DO WITHOUT A LITTLE LUXURY LIKE THIS... LET ALONE

Chevy's the only car of the leading low-priced three that gives you the convenience of crank-operated tent windows. No awkward latches to fumble with... your knuckles and fingernails will appreciate it.

THESE BIG CHEVY VIRTUES!

bigger brakes

Bigger, yes, and built with bonded linings for as much as 66% longer life. And how's this for proof that Chevy's a real stopper: in a NASCAR*-conducted test of repeated stops from highway speeds, Chevrolet outstopped both of the "other two" time after time.

*National Association for Stock Car Advancement and Research.

award-winning engines

The NASCAR Outstanding Achievement award goes to Chevrolet! Chevy wins for "the creation and continuing development of America's most efficient V-type engines... for the establishment of new levels of V8 compactness combined with outstanding smoothness." And you can choose among eight V8's and the Six that won the Mobilgas Economy Run for its class.

full coil ride

You're the expert on ride, so you'll want to try Chevy's easygoing smoothness for yourself. MOTOR TREND magazine can give you a hint of what you're in for: "... the smoothest, most quiet, softest riding car in its price class." And Full Coil springs, of course, never squeak, never need grease.

fresh styling

POPULAR SCIENCE magazine gave Chevy's styling a thoughtful look, then said it this way: "In its price class, Chevy establishes a new high in daring styling..." You'll find your own happy way of saying that Chevy's the only unmistakably modern car in its class.

greater roominess

Automobile Manufacturers Association records carry the facts on this. In a Chevy sedan, for example, you've got more front seat head room than all but one of the high-priced cars! And Chevy's front seat hip room spreads up to 5.9 inches wider than comparable cars.

bigger savings

Here's solid proof that Chevrolet squeezes more miles out of a gallon: In the famous Mobilgas Economy Run, two Chevrolet sixes with Powerglide took the first two places in their class. Winning mileage: 22.38 m.p.g. And that, friends, took top honors for Chevy from every full-sized car!

higher trade-in

N.A.D.A.* Guide Books prove that your Chevrolet will keep its value. Chevy used car prices last year, for example, averaged up to \$128 higher than comparable models of the other two cars in Chevrolet's field.

State Capitol Highlights:

Legislator Asks Governor To Make Decision On Special Term for Teachers

By VERN SANFORD
Texas Press Association

With the bottleneck broken on a tax bill for regular spending, legislators began to look down the road.

Rep. Murray Watson of Mart proposed a resolution that pointed up the lawmakers' uneasiness about having more rough decisions before the year is out.

Watson's resolution called on Gov. Price Daniel to say immediately whether he would call another special session to raise money for the Hale-Aikin school improvement program.

Hale-Aikin proposals which include an \$800 a year salary boost for teachers, would cost an estimated \$120,000,000 a year. There have been repeated rumors that the governor will re-call the Legislature next fall to enact Hale-Aikin. Also floating around is the rumor that a 1 cent per gallon hike in the gasoline tax is being "saved" for that purpose.

Watson charged, "I think there's been a definite deal made with the Texas State Teachers Association....Somebody else should know what's going on here instead of just the governor and the teachers' lobby."

Governor Daniel's supporters called this unfair. They declared that the governor, like everyone else, couldn't tell how it would be until after the dust settled from the fracas over raising money for the

basic budget. AT LAST—When the Legislature finally voted out the new \$185,000,000 tax bill, it voted it out in a big way. Tally was 29-2 in the Senate and 115-24 in the House.

This is well over the required two-thirds to make the bill effective immediately on the governor's signing.

House, which had been hamstrung for seven months on the tax issue, came unstrung so suddenly it surprised the bill's advocates. Voting ended good naturedly with "yea" votes recruited in the atmosphere of an old-fashioned revival meeting.

Most talked-about feature of the new bill is a severance beneficiary tax of 1.5 per cent on natural gas. It was the first time the Senate had approved this tax. Many House members had said they would not vote for any bill that didn't include it. It will bring in an estimated \$15 to \$18,000,000 over two years if not ruled unconstitutional.

Three-fourths or more of the bill's revenue will come from selective sales taxes. Newcomers are a 3 per cent tax on jewelry and furs, a 3 per cent tax on hotel and motel room rentals, 3 per cent on boats, motors, cameras, air conditioners, 25 per cent on tobacco products other than cigarettes.

Taxes on cigarettes will go up 3 cents a pack; liquor and wine, 20 per cent; motor vehicle sales, from 1.1 to 1.5 per cent.

Utility gross receipts will go up 20 per cent, and the corporation franchise tax will go up by 75 cents per \$1,000 capital for one year, 50 cents per \$1,000 thereafter. LADIES DAY—Senate debate on the tax bill was enlivened by the arrival of a "women's march on the Capitol."

Gallery was filled with flowery hats and excited chatter as some 40 to 100 women (estimates varied widely) swept in "to show those lobbyists what's what."

Leaders were Mrs. Jud Collier of Mumford and Mrs. Minnie Fisher Cunningham of New Waverly, both workers in the militantly liberal Democrats of Texas Clubs.

They were, according to Mrs. Collier, "infuriated by the scandalous lobby which has blocked action on the tax bill." Specifically, they favored a bill heavy on gas taxes and light on selective sales taxes.

LEGISLATING ENDED ABRUPTLY—Tax bills have had a lot of attention during the current special session of the Texas Legislature. But there were more eyes on charming Miss Carol Ralphs when she stopped in for a capitol building visit than ever looked at a tax bill.

This fetching miss from Farron, Utah whose theme song is 'Remember the A-La-Mode', is America's Miss Dairy Princess. She was accompanied by Mrs. Anne Reeve,

whose husband Lew is publisher of the Ocoela (Wis.) Sun. Mrs. Reeve is the chaperone for Carol's journeys about the country.

Miss Dairy Princess was introduced in the House, addressed the Senate, and was the recipient of complimentary resolutions from both branches of the legislature.

Then the lawmakers settled down to work again.

71 NEW PATROLMEN—A total of 46 new patrolmen now are manning Texas highways. These trainees have just graduated from the Law Enforcement Academy of Texas Department of Public Safety. Also graduating were 20 drivers license patrolmen and five license and weight patrolmen.

Presenting diplomas to the group was Col. Homer Garrison Jr. director of the department. He announced that there still are 73 openings for the force. Eligible to fill these posts are young men 21 to 35 years of age—and they are badly needed.

CITY BUSES LOSE OUT—Another cause, apparently lost for this year, is that of exempting city bus systems from the state gasoline tax.

Rural area senators, led by Sen. Wardlow Lane of Center, voted it down.

City spokesmen say the buses, needed by low-income people, can't stay in the black unless they get tax relief. San Antonio's transit system went to the wall, was taken over by the city.

Senator Lane made a scathing attack on "taking care of Highland Park" (a swank Dallas suburb) when the state is having a hard

time finding money "to pay the old age pensioners."

DANIEL OPPOSES FEDERAL TAX—Governor Daniel asked the National Governors Conference to join him in opposing an increase in the federal tax on gasoline.

Congress is considering President Eisenhower's recommended 1.5 cent per gallon increase to pump new life into the federal highway building program.

Governor Daniel charged the federal government would have plenty of money for the highway program if it would quit using gasoline tax money for other purposes. He said further gasoline taxing should be left to the states, which need the money worse.

Earlier this year the governor mentioned the gasoline tax as a possible source of additional future revenue. State gasoline tax is presently 5 cents a gallon; federal tax, 3 cents a gallon.

ATTENDED FUNERAL

Those attending the funeral of Luke Massengale of Weatherford were Mr. and Mrs. C. H. Eubank and grandson, Bruce Garrett of Shreveport, Louisiana; Mr. and Mrs. O. D. Bradford Sr. and Mr. and Mrs. O. D. Bradford Jr. Mr. Massengale died unexpectedly Wednesday of a heart attack and was buried in the Greenwood Cemetery Friday afternoon. Mrs. Massengale is a sister of Mrs. Eubank and Mrs. O. D. Bradford Sr.

Life is no more puzzling to man than death, but it has greater popular support.

Pitched Battle In House Over Labor Control Bill**

By Congressman O. C. Fisher

All stoppers have been pulled out in the battle over a labor control bill in the House this week.

The lines are drawn between those who want no legislation—or virtually none—and those who feel that as a result of disclosures by the McClelland committee some additional laws are needed to curb corruption and racketeering by irresponsible labor leaders.

The House has before it two choices: one, a bill reported by the House Labor committee and, two, a substitute bill by Congressmen Landrum of Georgia and Griffin of Michigan.

The committee bill is a pitifully weak and meaningless excuse for a labor bill. The substitute measure is a middle-of-the-road, fair and moderate bill. It will have the support of those who really want something done and who do not heed the Hoffa threats. It has my support. It would outlaw secondary boycotts, "hot cargo" contracts, blackmail and extortion picketing, etc. It would do nothing to hinder or interfere with legitimate activities of honest labor unions, and would in fact provide security and protection for the rights of union members.

But it will be a tough battle,

with a sizeable amount of politics mixed in. Observers claim it will give an indication of the effect of CIO-COPE's activities in last Fall's election, following which COPE announced 221 of the 436 members of the House and 53 of the 98 Senators were beholden to them and their legislative desires.

Few of us know our real friends until we meet with misfortune or difficulty.

The best ideas germinate in honest, idealistic minds, and are not the result of selfseeking thoughts.

Something Wonderful Happens

When you cook better..live better..Electrically

"It's like having a whole staff of chefs cook dinner for you . . ." That's what homemakers say after they try one of the new automatic electric ranges.

And you'll agree with them! Imagine a wonderful world where all the work and worry of cooking is gone forever — with an electric range that almost thinks for itself. Time and temperature controls cook delicious meals without your even having to watch . . . when you live better—cook better electrically.

30 For less than 3¢ the average family saved by WTU can cook a complete meal the modern electric way . . . and enjoy the cleanliness and convenience of Electric Living. Change now to Electric Cooking.

FRIGIDAIRE brings you the PULL 'N CLEAN OVEN

Here's the easiest cleaning ever offered in a range, and a Frigidaire "Pushdown" Oven cleaning is easy for you. It's the wiping off the range top. You're actually not cleaning the oven door. The whole oven actually pulls out—out on the door for easier cleanup. Simple—just use soap and water clean the entire oven interior.

Use some scrubbing of baked-on spots while door is open. The oven is cooled and standing with the oven door to your way. Now it's really easy to reach back corners—in reach of surface. Simply a breeze to hang all of the oven open-free and bright.

And that one-piece porcelain enamel interior is so smooth—you can wipe it down with a nylon scrubber!

Most of us who fish usually take along an ice chest or two.

Generally, however, because they are bulky, they are placed in the car first and other gear is stacked on top of them. Then if we want a cold drink along the road we stop at a service station and buy it.

I've just found a better way! Weber puts out a dylite cooler that fits perfectly between the car's front seat and the dash, riding on the hump.

With this chest in place you always have a cold drink or food handy.

But here is another idea that works well with these coolers. Before you leave home fill some milk cartons, or half-pint size ice cream containers, with water.

Place them in your deep freeze overnight. By the time you are ready to leave they will be frozen.

Then place these frozen water cartons in your Go-Kooler.

This serves a dual purpose. In the first place, if you carry four or bottled beverages, the ice in the cartons will keep everything cool without being messy. The melting ice stays in the cartons and does not dampen food that is in the coolers. Secondly, as the ice melts you have cold water to drink that is your own, hometown water.

This Weber Go-Kooler is especially handy where there are children. Kids are always wanting a drink.

Because it's extremely light in weight, small in size, and very efficient, the cooler is most practical for the tourist as well as the fisherman.

Once at the fishing site the Go-Kooler can be used to cool down drinks at the camp or in the boat. Or if needed, it makes an excellent minnow bucket!

Most of the fishing tournaments have been completed. If nothing else, they have proved that fishing is no longer for men only. Women have come from these tournaments with some of the top honors.

You will remember that Elaine Vickers, an attractive housewife from Buchanan Dam, won the State Bass tournament at Belton. She took it from a field of 300 men who were top fishermen.

On the coast women continued to win honors. For instance, Mrs. Dan Braman caught a 453 pound blue marlin some 40 miles out in the Gulf of Mexico. It was the largest ever caught on the western gulf.

Mrs. Paul Millsap of Houston won the overall Port Aransas tournament with 2,331 points. She caught two sails and a tarpon.

Miss Helen Logan of Dallas won

top honors for ling and Mrs. Jack Shanklin of Port Aransas won the bonito award. Mrs. C. C. Shotts of San Antonio caught the largest jack fish.

Women are proving their ability at fishing, despite the fact that men have considered it their game for these many years.

It was a revelation to watch some of these women fishing in the tournament.

A couple of years ago the editor of a national publication declined an article submitted by a Texas writer about women fishermen. He advised the writer that he always suspected that when a woman won fish prizes some man had caught the fish.

All the women fishermen I saw on the Gulf this summer caught their own fish. Furthermore they could drive a boat as well as any man. They could rig up their own equipment and fight a fish to the finish—even on light tackle.

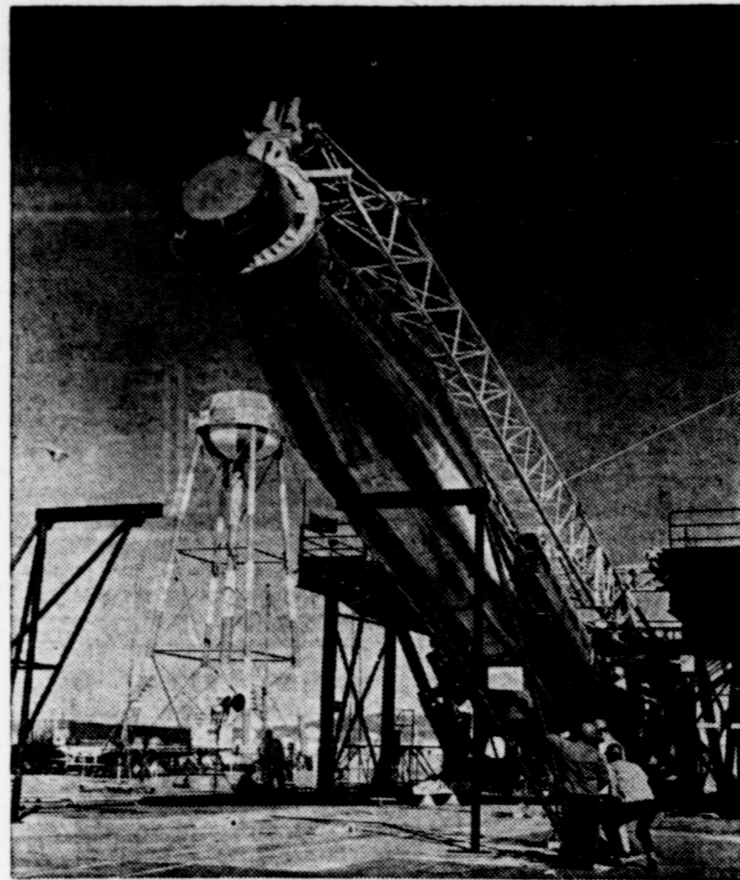

They were attractive too. Some of them were youngsters in their teens. Others were young housewives. One or two were grandmothers.

So I would say that fishing women are here today. They use the same tackle and equipment the men use. They fish like men, only better in some cases. They are more patient and will stay with it longer. Usually they have more stamina than men and make fewer trips to the ice chest.

Actually, women are responsible for the big boom in boating.

Men will go out in most any kind of old tub, but a woman wants a better boat. In this she is very smart.

During any tournament you'll see fishermen out in the surf in 14-foot outboards, battling big fish and the waves at the same time. I watched several this summer. They really put the fear in me. There is little sense in risking a life to win a medal for catching the most fish. There'll come a time when some of this chance-taking will end. One

MUSCLED MISSILE—Pictured, above, at San Diego, Calif., is a new erector-launcher for the Atlas intercontinental ballistic missile, shown. Designed by the manufacturer who assembles the Atlas, the huge boom has the launching mechanism at its base. Use of the sprawling mechanism permits horizontal storage of the missile.

of these days we'll have sufficient boat regulations to keep unsafe boats off the water. Unsafe drivers too! When we do, more lives will be saved.

Let me say this, however. If you've never attended one of these Gulf Coast tournaments I'd suggest you make your plans to go next year. You don't have to participate. You can fish on your own, or you can just watch the others fish. There is plenty of wholesome excitement, and you'll learn a lot about fishing. See you there.

SNOOPING ON VENUS—History-making first contacts with any celestial body beyond the moon was made with the radar pictured, above. The two electronic contacts with Venus were made in February of 1958, and only recently revealed. Signals broadcast from Massachusetts Institute of Technology's Lincoln Laboratory at Westford, Mass., made the 56-million-mile round trip. Months were required to sift the sounds from a jumble of recorded space static, and to make certain that the signals were, in truth, received.
