HEALTH FOR ALL

The Case Of The Disappearing TB Van

Remember the TB "bus" on the corner with lines of people waiting to be X-rayed? The scene is disappearing. For years, the mobile X-ray unit was a standard way of finding out who had TB. But the times—and the problem of TB—are changing.

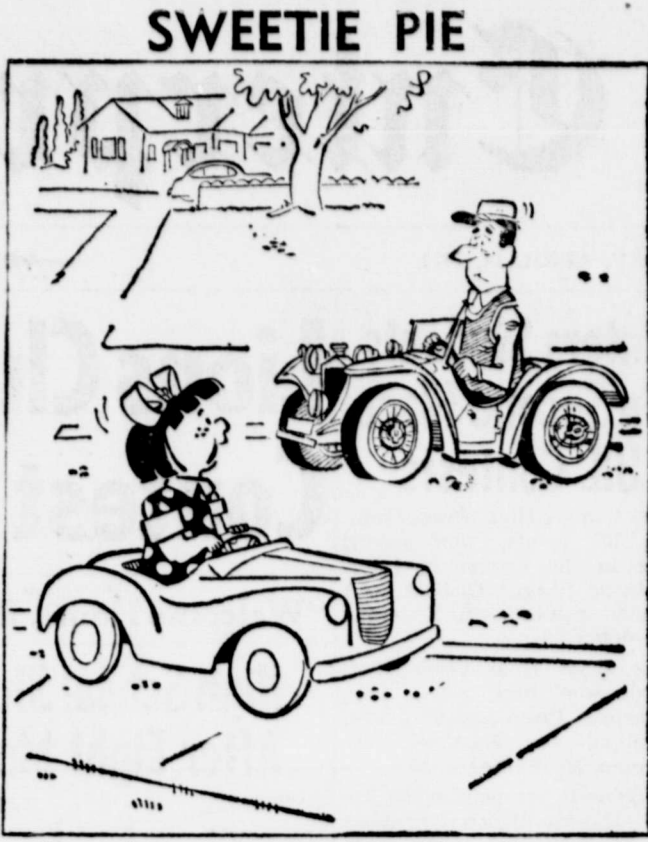

The numbers of people with active TB and those with tuberculous infections have declined over the last decades. Taking drugs can prevent infections from developing into active disease. And even when active disease does develop, drugs can make the patient non-contagious within a short time.

However, there are still people who have active TB and do

not know it. And when they have live TB germs in their sputum, they can spread the disease just by coughing and sneezing.

But back to the disappearing TB van. The fact is that mobile X-ray units surveying general populations find too few cases. Over 95 percent of people with new or reactivated TB are found by other means than mass X-ray screening in the community-at-large. Even in the inner city and ghettos, where the incidence of TB is higher. Today most active TB is discovered because the person has symptoms and seeks medical advice.

Some common symptoms of TB are coughing a lot, feeling tired all the time, spitting blood

"Soy, mister, aren't you a little old to be driving a kiddie car?"

the large ones. It is wise to avoid buying berries with large uncolored or "seedy" areas. These are signs of poor flavor and texture. A dull shrunken appearance or softness are signs of over-ripeness or decay. Also, watch for berries with mold which can spread rapidly from one berry to another.

Because fresh strawberries are so delicate they need to be handled carefully to avoid bruising. When you get them home, empty the berries into a shallow tray. Sort out damaged or decayed berries. Cover loosely with wax paper and store in the refrigerator. Just before serving, wash the berries in cold water. Lift them gently from the water and drain dry. Remove caps after berries are clean and dry. And serve them as soon after purchase as possible—within 1 or 2 days.

Strawberry Pie
1 cup sugar

1 tablespoon cornstarch
1-8 teaspoon salt
3 cups fresh strawberries
1 recipe plain pastry
1 tablespoon butter
Mix sugar, cornstarch, and salt together and add to berries. Line piepan with pastry, add filling, dot with butter and cover with top crust. Bake in very hot oven (450 degree) F. and bake 10 minutes; reduce temperature to moderate (350 degree F.) and bake 30 minutes longer. Makes one, 9 inch pie.

Some researchers believe there is a relationship between viruses and certain cancers. Help them find out and help wipe out cancer in your life time. Give to the American Cancer Society.

Support the American Cancer Society's programs of research, education and service. Your dollars will help speed the day of victory over cancer.

Happy Homemaking

By BARBARA BAKER

Use a clean sponge on your stove top as a spoon holder. It is handy to clean up any spills and can be washed and rinsed along with the dishes.

If baby's plastic pants are washed in hot water and rinsed in hot water, they will stay soft much longer. Quick drying, as over a register, also helps. It is the rinsing in cold water that hardens them.

Dip cotton swabs in oil before cleaning the children's

ears. This cleans the wax off without pressure.

When teaching a baby the art of drinking from a glass, hold a sponge under his chin. This is a real help for new mothers and encourages one to keep on pursuing what could be a messy task, and baby comes out without a drip.

If small children hate to have their faces washed, use dad's shaving brush to get up a good lather and they will love it.

H. D. Agent's Column
Fresh "Nearby" Strawberry Time

People eat first with their eyes, then with their taste buds. That's likely one reason the spring fresh strawberry season is such a delightful occasion in good eating. The bright red, juicy and tasty berries catch your eye in the field or market or the moment they are brought into the home.

Announcement of the 57th re-opening of the federal-state fruit and vegetable market news office at Hammond, La., on March 27, reminds us that fresh strawberries from nearby fields are in our immediate future. This office reports supplies, shipments, quality and prices of Louisiana berries that travel to major markets of the country.

Then, as soon as the Louisiana berry deal gets well underway, there'll be berries from Arkansas, South and East Texas—and before we know it, home patches and local commercial gardens all over the country will pour forth their delectable goodies.

In 1915, when the first U. S. Department of Agriculture market news office opened in Hammond, the strawberry season lasted only a short time. Home-makers had to work hard and fast to preserve the berries for winter use.

Things have changed a bit. We now have fresh berries available, to some extent, the year around. Still excitement of the first berries—lusciously ripe from vines in nearby gardens—cannot be excelled.

A hidden bonus in strawberry eating lies in their nutritive value. Fresh or frozen, they rate high in vitamin C. A half-cup of strawberries—a dish of strawberries and cream or a large piece of strawberry pie—provides the minimum daily dietary needs of this important vitamin. And strawberries that have ripened on the plant contain more vitamin C than those picked half-ripe and held until fully ripe.

So this is the time to enjoy and losing weight. And one or all of the symptoms can mean TB.

To find out more about ways to detect TB, contact your local tuberculosis and respiratory disease association. They have the facts.

DON'T GET UP NIGHTS! It takes just 48c and 12 hours to start relief—or your money back at any drug counter. When functional kidney disorders cause BACKACHE, leg pains, burning, frequent or scanty flow, take gentle BUKETS 3-tabs-a-day treatment. Help nature flush kidneys and regulate passage. NOW at MAIN DRUG COMPANY.

the full glow of eye-catching, tasty and nutritious fresh spring strawberries from nearby production centers. You can expect supplies to increase gradually, with peak shipments in May and June, as the season advances.

In buying strawberries, USDA's Agricultural Marketing Service suggests that you look for berries with a full red color and a bright luster. The flesh should be firm and the cap stem still attached. The berries should be dry and clean. And, usually, medium to small sizes have better eating quality than

WASHINGTON
"As it looks
from here"
OMAR BURLISON
Congressman
17th District

Washington, D. C. — Since the early days of our Nation some of the most heated legislative battles have centered around our immigration policies. Sever-

al occurred in the years following World War II and since that time immigration quotas have been considerably liberalized.

There is pending Legislation to grant entry into this Country of relatives of citizens, which would have the potential of increasing the over-all quotas considerably.

This issue has always been sensitive since the make-up of the Congress represents many ethnic origins, each with a sympathy towards the country of its forebears. Especially is this true with the Italians of which there are approximately 15 in the House of Representatives. The Irish are also in prominence.

A Presidential Commission on population growth addresses itself to this question in its third and concluding report. The Commission gives weight to the effect of immigrants on the United States population growth in the immediate years ahead. Admittedly, it leaves a number of questions unanswered as to how a more strict policy of immigration could be achieved but it does say that immigrants contributed mightily to the Country's development but have also created problems. It recognized that our immigration laws have reflected a compassion for the oppressed and the tradition should not be tossed aside, al-

NO GENERATION GAP here! Russell Miller of Clarinda, Iowa, and grandson Billy Durrant of Des Moines were obviously getting around together very well when snapped by the cameraman at the Iowa State Fair.

Commission suggested, needs to know more about its immigrant population and its governmental agencies should keep better abreast of immigrant impact on its total population. Beyond that if Americans are to become serious about limiting the growth of our numbers, the need will arise to fashion some kind of formula to deal with the issue of over-all population trends and policy.

The prospect of dealing with population growth is not imminent although it is an overriding challenge of long-range effect. Until there is a greater awareness of the long-range consequences, and because of the sensitive nature of the issue, any action will probably be postponed for a considerable time.

HEALTH LETTER
UNDERWATER BREATHING MASKS

Surgical masks are standard costumes in operating rooms. But scuba gear may be the next style.

At Indiana University Hospital in Indianapolis, operating room personnel wear surgical masks connected to respirator systems that function like scuba masks. Air is supplied, while exhaled carbon dioxide is directed away from the operating area. A gentle breeze of sterile air is blown constantly over the patient.

In the real underwater world, a scuba diver straps to his body the equipment that supplies his air and removes the carbon di-

oxide he exhales. The air he breathes, underwater as well as out of the water, is one-fifth oxygen and four-fifths nitrogen. But nitrogen becomes narcotic to divers after a depth of about 40 yards. At deeper levels, divers have to carry expensive helium instead of nitrogen.

Scientists are looking for ways to increase man's ability to breathe underwater without masks. At the University of Marseilles in France, Dr. Jacques Chouteau kept two goats alive for a full day in a pressure chamber simulating conditions 300 yards underwater. The unusual aspect of the experiment was that a cylinder filled with a gas called potassium superoxide kept reconvertng just the right amount of oxygen in the chamber. The goats, incidentally, thrived on their daily ration of one cigarette, which they ate with obvious pleasure.

One day man can live under the sea if he can figure out how to breathe just the right combination of gases.

In the meantime, to find out

more about the many problems of breathing above water, contact your local tuberculosis and respiratory disease association. It really is a matter of life and breath.

though the problem of over-population must and should be reckoned with.

The report says the time has come to look at our immigration policy in the light of a number of considerations. The document points out that because fertility rates in the United States have been declining, immigrants now account for a substantial part of our population growth. It makes the point that 400,000 immigrants entering the United States yearly now represent 1-5 of the total annual increase. If immigration continues at this level, the report says, and if all families were to average two children each, then immigrants arriving between 1970 and the year two thousand, plus their descendants, would number 15 million and account for nearly one quarter of the total population increase during this period. This number would go up if the figures on illegal aliens continue to rise.

The commission did make one clear recommendation. It appears to be the easy one and reflects some sentiments being voiced in the Congress. This is to pass legislation imposing civil and criminal sanctions on employers who knowingly hire illegal border-crossers.

It is hardly reasonable that an employer should have to determine whether an employee had the proper credentials or not. Sure, he could ask the question but whatever answer he got would hardly be proof that he knew the employee was an alien. This burden should not be placed on the employer but since the Bracero Labor Law was repealed under the influence of the labor unions, the "wetback" practice has been the only way many Mexicans across the border could find a way to make a living. The type of labor sought by farmers and ranchers was not and is not available among our own citizens.

The Commission's final report noted the "inconsistency" of planning population stability while admitting large numbers of immigrants each year. While the majority of the Commission recommended against raising immigration levels, it also voted against any move to tilt downward the annual number allowed to come and all this does is put off answering a difficult question. This Country, as the

District 8-AA Track and Field Meet Saturday

Winters High School will field track and field teams in the University Interscholastic League District 8-AA meet scheduled in Ballinger Saturday.

Chili Black, coach and athletic director of Winters High School, said about 28 high school boys will make up the varsity teams going to the District meet.

A freshman division also will be run, with about 20 boys from Winters to be entered, Coach Black said.

Preliminary events will begin at 9:30 a. m. and run until 11:40. Finals will begin at 2 p. m., with last events scheduled for 5 p. m.

The district meet will be held on the new all-weather track at the new Ballinger High School.

Admission for the final events will be \$1 for adults, and 50 cents for students. No admission will be charged for the preliminary events.

CREWS

Success in marriage is much more than finding the right person. It is a matter of being the right person.

The community supper was a pleasant get-together. Mrs. Robert Hill, Mrs. Calvin Hoppe, Mrs. Brenda Brown served the evening meal. A business meeting was called by President Marvin Gerhart. A gift of \$25 was donated to the Cancer Fund. Games of 84 concluded the evening.

Sympathy from us to the families of Mrs. Fannie Morrison who passed away Monday morning.

Mrs. Effie Deitz thanks everyone who sent cards, flowers and visited while she was in the hospital. Mrs. Douglas Bryan visited Mrs. Deitz Thursday. The Bryans had Sunday dinner with the Wayne Bryan family at Norton.

Mrs. Effie Deitz was dismissed from Shannon hospital and is recuperating in the Manor House in Ballinger.

Mr. and Mrs. Marion Wood were in Temple over the weekend to visit with her sister, Mrs. Jean Huffman.

Bro. Smith, Mrs. Harold Smith and son Kelly and a friend were dinner guests Sunday with the Theron Osbornes.

Mr. and Mrs. Raymond Kurtz visited in the Fritz Deike home Sunday afternoon. While there they saw her niece and family, Mr. and Mrs. Winford Carey of Baytown, Mr. and Mrs. Mike Deike of San Antonio and other relatives and friends.

Margie and Marilyn Matthews returned to Cisco Junior College Sunday.

Mrs. Ruby Matthews is spending a few days with the Odie Matthews.

Junior High Band To Cisco College Festival Saturday

The Winters Junior High Band, under the direction of Kirke McKenzie, will be among 70 elementary and junior high musical organizations participating in the twelfth annual Cisco Junior Music Festival to be held on the campus of Cisco Junior College Thursday, Friday and Saturday, April 13, 14, 15.

The Winters band is scheduled to give their concert performance at 10:20 a. m. Saturday.

The annual festival is Cisco's and Cisco Junior College's largest influx of visitors each year. The 1972 festival is expected to draw some 3000 guests to the campus during the three-day activities.

Eris Ritchie, CJC Public Relations Director and Band Director, is director of the festival, which is sponsored by the college's Public Relations Department. Lynn Low, Cisco High School Bandmaster, is associate director, and the CHS Band Boosters will have charge of concessions during the three-day affair.

Junior High and Elementary bands, orchestras, and choirs from a 200-mile radius of Cisco will participate in the various festival events. Events to be held will be concert and sight-reading for entire organizations, and solos, ensembles, and twirling for individuals and small groups of students from the or-

First Quarter Dry In Winters, Only .56 Inch

The first quarter of 1972—January, February, March—was almost as dry as the same period in 1971, with only 0.56 inch of rainfall measured by Roy Rice, U. S. Weather reporter. In 1971, 0.33 inch was recorded.

Except for last year, this 1972 quarter was the driest first quarter experienced here since 1967, when 0.30 was recorded.

Last year's total rainfall—37.16, heaviest recorded in several years, is credited with fair sub-moisture conditions in this area. Heavy seepage, which caused delay in harvest of much of the 1971 crop, still is reported in places, along with natural streams with running water.

Heaviest rainfall recorded in this area for the first quarter was in 1968, when 13.81 inches of moisture fell locally. This was followed by two years when good amounts of rain were received during the first three months—1969, 3.67; 1970, 7.35.

Atty. Gen. Martin asked the U. S. Senate judiciary committee to review granting of immunity to Frank Sharp.

Charles R. Miles Completes Basic USAF Training

Airman Charles R. Miles, son of Mr. and Mrs. Doris L. Miles of Winters, Tex., has completed his U. S. Air Force basic training at the Air Training Command's Lackland AFB, Tex. He has been assigned to Chanute AFB, Ill., for training in the armament systems field.

Airman Miles is a 1971 graduate of Winters High School. His wife, Claudia, is the daughter of Mr. and Mrs. Claude Pressler of 7811 Overbrook, Houston.

ATTENDED WEDDING

Mrs. Joe Baker and Mrs. Gladys Wilson, accompanied by Mr. and Mrs. Bob Hatcher of Abilene, spent the Easter weekend in Kenedy where they attended the wedding of their grandson, Alan Wiley and Miss Karen Stokes. Mr. Wiley is the son of Mr. and Mrs. Noel Wiley, and the bride is the daughter of Mr. and Mrs. George Stokes, all of Kenedy. Mrs. Baker and Mrs. Wilson remained for a week's visit in the Noel Wiley home.

HAD SURGERY

Argene Hodge of Odessa, formerly of Winters, son of Mrs. H. J. Hodge Sr., and brother of Homer Hodge, both of Winters, underwent surgery early Wednesday morning at Santa Rosa Medical Center in San Antonio. Mr. and Mrs. Homer Hodge are at his bedside.

County SCS Unit Receives 20-Year Safety Award

The Runnels County work unit of the Soil Conservation Service has been awarded the coveted 20-year Safety Award for not having a lost-time personal injury from any cause.

J. S. Richmond, area conservationist of San Angelo, made the presentation to Woodrow Hoffman, district conservationist of the Runnels SCS unit, and said, "This kind of outstanding safety record doesn't just happen. It's the result of a good safety program being observed and practiced by each member of the work unit staff."

Gerald Merz, range conservationist, also received a one-year safe driving award from Hoffman. "This safe driving record doesn't just happen either," Hoffman said in presenting the award to Merz. "It's also the result of careful, defensive driving. You set a day-to-day driving example that all of us should try to follow."

The awards for the excellent safety record were approved by Clyde W. Graham, SCS State conservationist. The SCS is cooperating in the "Zero In On Federal Safety" program whereby all agencies are placing emphasis on eliminating major causes of employee injuries during calendar years 1971-1972.

The Runnels work unit of the

WINGATE

Guests last Sunday in the Edwin Voss home were Mr. and Mrs. Vanner Voss, Mr. and Mrs. Erwin Voss, Mrs. Ethel Hant-sche, a nephew from Lamesa, Mr. and Mrs. Vogler, Paula and Bill. Mrs. Voss was a visitor in the Irvil Talley home.

Mrs. Verg Awalt is still in California with her son, Larry, who is ill. At last report he was improved.

E. J. Bishop underwent heart surgery in Houston recently. A nice crowd attended the community day luncheon and sports activity. Raymond, Nina and Neta Cowan were here from Abilene.

Mrs. Lena Wheat was surprised with a party Sunday on her 70th birthday. Hosted by her children in the home of Mr. and Mrs. W. F. Matthews of San Angelo. Other hosts were Mr. and Mrs. L. C. Briley, Midland; Mr. and Mrs. A. R. Wheat, Garden City; Mr. and Mrs. Gene Wheat of Winters. Others attending were Mr. and Mrs. Ron Briley and Mrs. David Bryan, Mr. and Mrs. Hubert Bryan, Mr. and Mrs. J. L. Carter, Buchanan Dam; Randy and Tommy Matthews, Larry Wheat, Dobbie Wheat, Kathy Schwartz, Garden City; Bill, Douglas and Julie Wheat; Dora, Chester and Joyce

Wheat, Andrews; Mr. and Mrs. Bub Phillips; Bryan Briley; Mr. and Mrs. Red Dooley and Denise Matthews.

THE WINTERS ENTERPRISE

Mrs. Pearl Whigham of Abilene, has been visiting in the home of her sister, Edna and Dock Rogers, this week.

Mr. and Mrs. Olen Ricketts of Waco visited the past weekend in the home of her parents, Mr. and Mrs. Walker Allen.

The highlight of our Wingate news today is that Rickie Dean, son of Mr. and Mrs. Hollis Dean, who was injured the 9th of August, 1971, due to a fall from his horse, returned home from Houston on Monday night. The entire community says hello and wishes him good luck in his continued recovery.

Defense And Aerospace Upturn

Wellesley Hills, Mass., April, 1972. The worst downturn in two decades for the aerospace industry as a whole is giving signs of abating as the U. S. economy stages a recovery. Since the fourth quarter of 1971, many of the major aerospace and defense companies, now much leaner after extensive streamlining and more efficiently managed, have been taking heart from a more receptive Congress. No doubt improved business conditions, an ever-increasing Soviet arms threat, the nearing end of the Vietnam involvement, and the obsolescence of aging tactical weaponry—all making for a less hostile public sentiment towards aerospace and defense—are dictating the need for renewed activity.

Modern Aircraft And Missiles

Several major aircraft programs, development of which has already been funded, include (1) the B-1 advanced manned strategic bomber, (2) the F-14 Navy supersonic fighter, (3) the F-15 Air Force superiority fighter, (4) the S-3A carrier-based antisubmarine aircraft, (5) the Navy A6 electronic attack plane, and (6) the AX counter-insurgency aircraft. Still waiting in the wings is the Airborne Warning and Control System. If fully funded for production, many of these could be billion-dollar programs.

In addition, in the area of missiles, there are such well-known potential systems as Poseidon (a seabased successor to Polaris), the important ULMS (the Navy's undersea long-range

missile), Harpoon (a type of anti-ship missile), and Minuteman 3. It is generally believed that we have enough new weapons being developed to maintain a strong defense posture. However, increased funding is necessary to place them in operation before our arsenal becomes outdated.

The National Aeronautics and Space Administration (NASA) officials received the green light in January to select a contractor to develop a reusable space shuttle in the next six years. Complete government funding of the Skylab flights (successor to Apollo), the space shuttle, and the space station could mean a rebirth of the overall space industry. The space shuttle itself will represent an investment ranging from \$5.5 billion to \$6.5 billion.

The Research Department of Babson's Reports believes that the prospects for the commercial manufacturers are also looking up, especially as two new jumbo trijets are appearing on the market this year. McDonnell Douglas' DC-10 and Lockheed's L-1011 will be flying commercially, for the first time and will give Boeing's 747, currently in service, a competitive run. With air traffic already registering a substantial improvement this year, the aircraft companies should receive a pronounced uplift through new commercial orders.

New Look In Contracting

Dubbed "Milestone," the new military contracting system promises to be more successful than past systems in avoiding extensive cost overruns. The technique is devised in such a way as to prevent a weapon from going into production until all development requirements and economic feasibility are met. "Milestone" should render the aerospace industry less vulnerable to severe impacts stemming from possible cancellation of large-dollar amount contracts. On the other hand, aerospace companies, through more closely monitored competition, stand a much better chance to make a profit.

Current Advice

Of the major aerospace and defense manufacturers involved in many of the above programs, the Research Department of Babson's Reports is presently recommending the purchase for appreciation of North American Rockwell and Raytheon. The Babson staff previously recommended McDonnell Douglas and Thiokol at lower prices. Both of these investment issues would again prove interesting if there were any minor setback in the overall market.

WANT TO BUY something? Put an ad in the Enterprise Classified Wanted Column.

Short Takes

Church vs. Cathedral
A cathedral is a church in which the cathedra or bishop's throne is placed. Architecturally speaking, however, a cathedral need not differ in any respect from an ordinary parish church.

Underwater Monument
The Buck Island National Monument lies entirely underwater. Visitors to this Virgin Islands attraction snorkel above a coral garden which teems with tropical fish.

Boundary of Space
There is no exact or recognized boundary but many space scientists place the beginning of space—as far as earth is concerned—at 60 miles above the earth's surface.

Egg-Laying Mammals
The only two egg-laying mammals are the spiny anteater or echidna and the duckbill platypus of Australia and New Guinea.

Birds Are Toothless
In no living bird are teeth present. Substituting for teeth is a powerful gizzard which grinds food when necessary. The gizzard is located near the bird's center of gravity.

Light the Way
The Ainu people of Japan, when burying a relative, tie bits of charcoal to grave poles for light to enable the departed soul to see the way to friends in another world.

HEALTH FOR ALL

HOW BIRDS BREATHE

Birds breathe with their lungs. And through their bones. The bones of birds are hollow. They contain air, not marrow. A bird with a blocked windpipe can still breathe if a connection is made between one of its bones and the outside air.

Birds, like people, have two lungs. But unlike people, birds have lungs that allow air to flow through the lungs instead of in and out. Air flows through somewhat the way water flows through a sponge.

The air flows into bones and into large air sacs, which are larger in volume than the lungs themselves. The sacs are located in the chest and abdominal areas and help maintain high levels of oxygen and just the right amount of carbon dioxide in the bird's body. A bird's breathing, in fact, is regulated primarily by the concentrations of carbon dioxide in the blood. An increase in carbon dioxide stimulates breathing. A decrease causes breathing to slow down or even stop for a while.

In many ways, the respiratory system of birds works just the opposite to that of humans. For example, when birds inhale, their lungs diminish in volume. As they exhale, their lungs expand. The unique breathing system of birds increases their oxygen intake by 10 to 15 times when they fly and allows them to expend more energy, weight for weight, than a man does when he runs at top speed. Their system allows them to soar miles in the air where man can barely breathe at all.

ADD ODD Mailbox Dept.
This model, designed by Darvis Anderson of Blair, Wis., features a special compartment for air mail. Postmen with short reaches are not amused, it is reported.

COUNTY AGENT'S WEEKLY NOTES

Early Control Reduces Black Spot in Roses

For beautiful roses in your lawn or garden this summer, take steps now to control black spot. County Agricultural Agent Parker cautions all homeowners.

"Black spot is the most serious rose disease problem encountered by rose growers," says Parker. "It is caused by a fungus which leaves a black spot with an irregular margin surrounded by a zone of yellow tissue. In addition to the unsightly black spots on the blossoms, plants may also shed their leaves."

"Begin control measures by raking and burning all fallen leaves in the spring and removing all old leaves from the rose plants. This will reduce one source of fungus spores that can cause new infections. At the same time, prune the tops of infected roses to eliminate overwintering infection sites on the upper stems.

In spite of cultural methods, chemical protection will also be required for most hybrid teas, notes the agent. Begin fungicide applications when the first leaves are one inch long. Repeat applications at regular intervals according to label directions. Direct sprays so that both surfaces of the leaves are covered. The degree of black spot control will be no better than the coverage obtained, emphasizes Parker.

Effective spray materials include Benlate, Daconil 2787, Dithane M-45, Phaltan and Zineb. Other fungicides may also be available at your local garden or supply store. Sulphur dust, and old "standby" fungicide, is still used by many growers and is an effective material. However, its use should be discontinued after temperatures reach 85 degrees F. or the leaves will bronze, cautions Parker.

Check Ornamentals for Aphids:
Check ornamental plants for aphids during warm weather. Aphids thrive on new plant growth when nights are cool and days are moderately warm.

Most ornamentals are susceptible to one or more species of aphids, notes the agent. Spring flowering bulbs, mums and roses are just a few that these insects attack. Aphids cause loss of plant vigor, stunted growth, deformation of buds and flowers, and curling or puckering of leaves.

Aphids pierce the plant with their needle-like mouth parts and feed on plant sap, explains Parker. The insects create a sweet sticky substance called honeydew which attracts ants, flies, wasps and lady beetles and provides a medium for mold growth. Infected arborvitae, pines and other trees drip the honeydew on the sidewalks and patios.

Aphids can be many different colors, including black, green, yellow, pink, red and gray. These pests cluster in large groups on buds, stems, leaves and the bark of willows and arborvitae.

Daily spraying with a strong stream of plain water will discourage light infestations. However, young, tender growth can be broken and buds knocked off.

Diazinon, Meta-Systox-R, dimethoate or malathion sprays give excellent control of heavy aphid infestations. When spraying, wet the entire plant with a

fine mist. Choose a warm, still day to apply insecticides.

Dry systemic insecticides in granular form or in fertilizer mixes are also effective against aphids and certain other sucking pests, says the Agent.

However, these should be used as a preventative measure applied soon after annuals become established or when perennials are growing vigorously. If a systemic insecticide is applied to the soil, a heavy watering should follow to distribute the chemical in the soil. If aphids are present, four days to a week may be required for control, depending on the size and vigor of the plant. Another insecticide application may be required in five to six weeks if re-infestation occurs.

Read the labels on pesticide containers and follow all directions and precautions.

Plants Aid In Noise Control:
Do you want to cut down traffic and neighborhood noises, but aren't sure what steps to take? Then try using plant materials around the home grounds suggests the County Agent.

Recent studies show a noise level of 60 decibels, or noise equivalent to heavy expressway traffic, can cause a rise in blood pressure. Noise in the range of 130 decibels, or equivalent to a jet taking off, can actually

cause physical pain. Even the sound of your neighbor's lawn mower can be distracting if you are trying to work inside a building.

The county agent outlines several principles of sound barrier planting that can be applied to home landscaping. Thickness or density of a particular planting has a lot to do with its sound absorbing capacity. Evergreens have always been recognized for their value in protection against sound. However, where evergreens are not possible, homeowners may wish to consider the use of a dense and wide deciduous hedge. Where space is limited, a dense vine covering on the side of a building can be effective in reducing noise penetration.

In an attempt to control noise, space out planting, graduating from low to high as they approach the house, explains Parker. A groundcover or low hedge near the sidewalk helps to trap ground level noises. Low trees and shrubs used in island plantings in the lawn area act as intermediate height barriers to noise. If needed, taller trees may also be used near the house to blot out any second-story sound waves.

One point to remember is that hard surfaces do not absorb sound; therefore, paved areas

for drives, walks and parking should be kept to a minimum. When paved areas are part of the landscape setting, planting buffers will help muffle noise. In walk areas, the use of soft materials like tree bark, tan bark or sawdust will reduce noise and render a pleasing contrast.

"Wild Rovers"

Two simple cowhands, who really don't want to hurt anyone, decide to rob a bank and head for Mexico to make their dreams of an easy life a reality in the Blake Edwards film for MGM, "Wild Rovers."

William Holden and Ryan O'Neal star as two different generations of cowboys who nevertheless become great friends and partners in the crime. Karl Malden stars as their boss, a rancher who feels the bank robbery is a personal affront, and sends his two sons, played by Tom Skerritt and Joe Don Baker after the lawbreakers.

Set in the 1880's west, the original screenplay by Blake Edwards, who also produced and directed "Wild Rovers," calls for a chase across half the American southwest set against the spectacular scenic backgrounds of Monument Valley, the Colorado River, the red-rock country of Arizona, and the snow country in the mountains near Flagstaff.

One of the most unusual horsebreaking sequences ever filmed provides additional excitement as Holden and O'Neal capture and break a wild mare in the snow.

Sub Deb Club Met Monday

The Sub Deb Club met Monday evening in the Lee Miles home. Plans were made to have a gas sale.

Present were Linda Roberts, Brenda Blackerby, Lea Mostad, Landa Walker, Jessie Waldrop, Lou Ann Cole, Gayla Springer, Carla Brown, Kathy Hope, Mary Beth Jacob, Brenda Easterly, Cathy Schwartz, Lisa Brown, Tonja Whitlow, Cheryl Whitlow the hostess, Kim Miles, and sponsors, Mrs. Wayne Solomon and Mrs. Charles Pinkerton.

Ray D. Shafer Died Last Week In Abilene

Ray Dean Shafer, 70, died at 5:10 p. m. Tuesday of last week in Hendricks Memorial Hospital in Abilene.

Funeral services were held at 2:30 p. m. Thursday in the Shep Baptist Church, with the Rev. Ted Bigham and the Rev. Virgil James officiating.

Burial was in the Shep Cemetery.

Mr. Shafer was born Jan. 22, 1902, in Mason County, son of the late Mr. and Mrs. Alexander Shafer. He moved to the Shep community as a young boy with his parents in 1912, and attended school there.

He married Eunice Vera Barbee in Abilene in October, 1920. He had lived in and around Winters for many years, and for a number of years was Ford dealer in Winters. In recent years he was a car salesman for the local agency.

Survivors are his wife; a son, Bryan Ray Shafer of Odessa; five grandchildren; four great-grandchildren; two sisters, Mrs. Rosa Miller of San Angelo and Mrs. Pearl Dunagan of Loneview; two brothers, L. D. Shafer of Abilene and Elmer Shafer of Winters.

Flavio Cardenas Died In Abilene Hospital Friday

Flavio Cardenas, 65, of Wingate, died at 6:45 p. m. Friday in Hendrick Memorial Hospital, Abilene.

Rosary was said at 7:30 p. m. Sunday at Spill Memorial Chapel, with funeral at 10:30 a. m. Monday. Burial was in Wingate Cemetery.

Mr. Cardenas was born Feb. 12, 1907, in Gonzales County, the son of the late Mr. and Mrs. Antonio Cardenas. He married Antonia Gonzales Aug. 31, 1930. Mrs. Cardenas died April 2, 1969.

He had been employed at Dry Manufacturing and for a number of years was employed by the City of Winters until his retirement.

He was a member of Mt. Carmel Catholic Church. Survivors are one daughter, Mrs. Tony Soto of Wingate; five grandchildren and one great-grandchild; four sisters, Mrs. Petro Gonzales of Winters, Mrs. Juanita Monteyo of Seguin, Mrs. Jesusa Garcia of Louise and Tomasa Cardenas of Louise; three brothers, Jose of Louise and Jesse Cardenas of Winters.

CARD OF THANKS
We want to say Thank You for all the acts of kindness everyone has given us during Smokey's illness and death, for all the money, flowers, food and all the kindness. We wish to say Thank You to Dr. Rives and the nurses. Thank you all and may God bless each one of you.—Olen Cranford Family. Itc

"Give to your American Cancer Society. We want to wipe out cancer in your lifetime," says Joan Crawford, Number 1 volunteer of the cancer-fighting agency's Crusade. The glamorous star is the ACS National Crusade Chairman for 1972, heading a dedicated army of 2,000,000 volunteers.

Ruth Circle Met In Sanders Home

The Ruth Circle, WSCS of the First United Methodist Church, met in the home of Mrs. Bob Sanders Tuesday morning, with the vice chairman, Mrs. Frank Mitchell, presiding. Mrs. Forrest Davis led the opening prayer.

Mrs. H. O. Abbott presented the devotional on "What is Faith," and presented an article from the April issue of Response, "Universality of Human Needs and Inspirations." A discussion period followed. Mrs. W. W. Parramore led the closing prayer.

Present were Mesdames D. A. Dobbins, M. L. Dobbins, Frank Mitchell, Bob Sanders, W. W. Parramore, W. T. Nichols, H. O. Abbott and Forrest Davis.

Lutheran Ladies Aid Meeting Held Thursday Afternoon

The Ladies Aid of St. John's Lutheran Church met Thursday afternoon with Mrs. Walter Gerhart, circle chairman, presiding. Mrs. Ellis Ueckert had charge of the program, and Mrs. Bill Hoppe gave the scripture reading and led prayer.

Mrs. Walter Probst, Mrs. Jack Whittenburg and Mrs. Ellis Ueckert were Bible study leaders. Offering meditation was given by Mrs. Ueckert.

A playlet, "Poor Circulation," was presented by Mrs. August Stoecker, Mrs. Ted Hantsche and Mrs. W. F. Minzenmayer. Thirty members and one new member, Mrs. Gus Voss, were present. Refreshments were served by Mesdames Ervin Ueckert, Carl Wessels and J. J. Wessels.

Mary Martha Circle In Traylor Home

Mary Martha Circle, WSCS of the First United Methodist Church, met in the home of Mrs. Thad Traylor Tuesday morning, with ten members present.

Mrs. J. D. Vinson presided, and the opening prayer was led by Mrs. August McWilliams.

Mrs. Roy Crawford presented the program, "What Is Faith," assisted by Mrs. M. E. Leeman. Present were Mesdames E. L. Crockett, August McWilliams H. J. Hodge Sr., Roy Crawford, W. F. Lange, M. E. Leeman, J. D. Vinson, Celia Lang, Ruth McDaniel and Thad Traylor.

Winters Den Dieters Hosted Wingate TOPS Club Monday

Winters Den Dieters Club was the loser in a contest with the Wingate TOPS Club, and hosted a "losers" dinner for the Wingate group at The Den Monday evening.

Named queen for the past year was Mrs. Bill Webb, and Mrs. Pearl Dunnam was named queen of the week in the Winters club.

Den Dieter members present were Mesdames Bill Webb, C. R. Pinkerton, D. W. Williams, Paul Gerhardt, Charles Kruse, Milt Bunger, Lillian Awalt, Bob King, Pearl Dunnam, Carl Pendergrass, and a new member, Mrs. R. W. Owen.

Wingate TOPS members present were Mesdames Pat Pritchard, Alpheus Hill, Ed Donica, Richard Beck, Mathie Romine, J. R. Thompson, Ernest Ware, Bill Hamilton, Edward Poehls, Joe Bryan and E. F. Albro.

Goal Digger Club Meeting Monday

The regular meeting of the Goal Digger Club was in the home of Keri Lynn Laughon Monday. The program was presented by Gwynne Geistman.

Members present were Karen Simpson, Susan Byrns, Betty Hood, Kandi Rouzas, Robbie Morrison, Sheree Tekell, Keri Lynn Laughon, Gwynne Geistman, Susie Spense, Maurine Riess, Keva Harrison, Ginever Fairey, Robin Sanders, Julie Spraberry, Ellen Sanders, and sponsors, Mrs. Carolyn McKenzie and Mrs. Mary Lynn Presley.

Esther WSCS Circle Meeting Tuesday

Esther Circle, WSCS of the First United Methodist Church, met Tuesday morning in the home of Mrs. T. C. Stanley. Mrs. Clarence Hambricht, chairman, presided and Mrs. F. R. Anderson led the opening prayer.

Mrs. Ralph Arnold presented the program, "Higher Education."

Others present were Mesdames E. L. Marks, W. T. Stanley, E. W. Bridwell, A. J. Hood, Carl Baldwin, Paul Gerhardt, A. M. Nelson, and Miss Marguerite Mathis.

CARD OF THANKS

We would like to say "Thank you" to all of our friends for their cards, calls and beautiful flowers, and for their concern during our stay in the hospital. Everyone was so wonderful. We deeply appreciate it. We want to thank Dr. McCreight and all the nurses and hospital staff for their wonderful care of us in the hospital. A very special thanks to Mrs. Jim King. We hope we may in some way show our appreciation. Our families join us in saying "Thank you."—Mary Lynn Presley, Mrs. Pat Pritchard.

Cleaner Water Results Of Planting Grasses

Cleaner water and less silt is one of the benefits which can be expected from shaping and planting grass for the protection of parallel terrace systems, a conservation spokesman has said.

Gerald Merz of the Runnels County Soil Conservation Service assisting the Runnels Soil and Water Conservation District, said that 528 acres of grassed waterways have been shaped and seeded in the local conservation district to date.

Grassed waterways replace the county road ditches and old ditches along the fences in the district, he said. Natural drains are used for waterways if possible, because they usually require less shaping unless they are gullied. Grade is usually

as providing a safe release of water. For more information on design, and types of grasses to plant in your waterways contact the Soil Conservation Service.

Grassed waterways are designed by the SCS to carry the expected storm runoff. Grassed waterways help to beautify the countryside as well

Shelih Kraatz, Rodney R. Stenard Plan Winters Wedding May 20th

Mr. and Mrs. Robert O. Kraatz announce the engagement and approaching marriage of their daughter, Shelih Lucrecia, to Mr. Rodney Robert Stenard of San Angelo.

The prospective bridegroom is the son of Mrs. Claire Jones of San Angelo and the late Mr. Robert E. Stenard.

The wedding will be held in the Winters First United Methodist Church, May 20.

Miss Kraatz is a 1969 graduate of Winters High School, and is a senior nursing student at Angelo State University, a candidate for summer graduation. She is a member of Gamma Chi sorority.

Mr. Stenard is a 1967 graduate of San Angelo Central High School, a 1971 journalism graduate of Angelo State University where he was active in Circle K International. He is employed as a staff writer for the San Angelo Standard-Times.

Conservation Service Discusses Rare, Endangered Species At April Meet

Have you seen a Texas pistachio tree, an Attwater prairie chicken, or a Texas wildrice plant lately?

Probably not, because they are scarce.

But they are some of the rare and endangered species that were discussed at an inter-agency conference in Austin April 5.

Called by the USDA Soil Conservation Service, the meeting was attended by representatives of state and federal agencies, universities, and various organizations interested in preserving Texas plants and wildlife.

Clyde W. Graham, state conservationist for SCS in Temple, said the purpose of the meetings were to prepare a correlated Texas watchlist of rare and endangered species of plants, animals, fishes and birds; to discuss the kinds of measures important to their habitat; and to discuss the possibility of setting up a monitoring program.

Objective of a monitoring program could be to obtain advance warning of actions and conditions that could further endanger these species. Appropriate action could then be taken to protect them.

"With professional conservationists headquartered in 259 field locations in Texas, we feel that SCS is uniquely capable of playing a vital role in monitor-

ing the situation," Graham continued. "We are asking all district conservationists to examine local SCS and SCS-assisted programs to evaluate effects on these plants and animals, and recommend any action needed for their protection."

"We are attempting to compile a coordinated list of our state's rare and endangered animal and plant species," Graham said. "We plan to keep our local offices informed of just what these species are, where they probably occur, and other information regarding their numbers, habitat, critical factors, and the like."

The Secretary of Interior annually issues a list of rare and endangered fish and wildlife species in the United States. This list includes several species found at least part of the time in Texas, including the Attwater prairie chicken, golden-cheeked warbler, ivory-billed woodpecker, the whooping crane, American alligator, red wolf, and the Houston toad.

SCS has already been actively engaged in trying to help save several rare species, Graham pointed out. For example, range conservationists along the Gulf Coast have helped improve tall grass habitat needed by the Attwater prairie chicken. Excellent results have been obtained in the last few years.

Also, an SCS range conserva-

tionist found a specimen of the mysterious Texas pistachio tree clinging to the steep banks of the Devils River near Amistad Reservoir. The lovely evergreen, relished by wildlife and livestock, was once feared extinct. Seed collected from the tree were planted at the SCS plant materials center at Knox City and at a Texas Forest Service nursery. Since only a few seedlings were obtained, attempts will now be made to propagate the plant by cuttings.

Maps showing preferred golden-cheeked warbler habitat were also printed by SCS and given to the Texas Ornithological Society to aid their attempt to preserve choice warbler nesting sites.

Graham said that SCS cooperative work with rare and endangered plants and animals would represent better utilization of the agency for overall environmental improvement, but that it did not represent a change in SCS principles of conservation.

"SCS technical programs of assistance to land users have always considered wildlife and have had a favorable impact on this resource in Texas," Graham said. "More than 350,000 ponds and irrigation reservoirs, as well as 1,500 upstream watershed lakes, have been built in this state. Although they have been constructed mainly for livestock, irrigation or flood prevention, they are basically conservation pools; they store water for later use, they provide excellent fishing, and they furnish feeding and resting places for water fowl."

Graham said these ponds and lakes have created an estimated 260,000 acres of surface water in small draws and ravines, mostly in dry upland areas. Thousands of miles of edge habitat around these pools favor many species of birds and animals.

The state conservationist also pointed to SCS work in promoting grassland restoration work in strips or other patterns to benefit wildlife. When grassland restoration work is done according to SCS recommendations, strips or patterns of land are restored to formerly productive stands of nutritious grasses, legumes and forbs needed by both livestock and wildlife. Alternate patterns of brush are left for wildlife escape cover.

"Terraces, waterways, reforestation, good land use practices and upstream watershed protection projects help keep streams and lakes clear. They cut sediment damage which kills fish, ruins their spawning grounds, and fills our lakes. Most of our recommended practices promote insaak, assuring a more constant ground water supply. And many, if not most, soil and water conservation district cooperators include wildlife food, water, and cover in their resource conservation plans.

"Thoughtless killing, uncontrolled burning, and other irresponsible acts were once the greatest threat to rare and endangered species," Graham said. "But now the principal hazard is the destruction of habitat resulting from human activities. These include some outdoor recreation activities, industrialization, urbanization and the like."

WILLIAM MODISETT, JR., DONNA RUTH O'NEAL

Announce Approaching Marriage of Miss Donna O'Neal, Mr. Modisett

Mr. and Mrs. Shelby O. O'Neal of Midland, announce the engagement and approaching marriage of their daughter, Donna Ruth, to Mr. William Ezell (Bill) Modisett, Jr., of San Angelo. He is the son of Mr. and Mrs. William E. Modisett, Sr. of 409 E. Parsonage, Winters.

The wedding is set for July 8 in St. Paul's Presbyterian Church, San Angelo.

Miss O'Neal is a 1969 graduate of Robert E. Lee High School, Midland, and currently is a junior at Angelo State University where she is a member of Gamma Chi Social Sorority.

Mr. Modisett is a 1968 graduate of Winters High School, attended Stephen F. Austin University and is presently attending Angelo State University. He is a staff writer for the San Angelo Standard-Times.

Grandparents of the prospective bride are Mr. and Mrs. Vernon O. Wood of Ballinger.

(Continued from page 1)

to be a signal that this little duty should be performed, that there is always a danger of rabies in the area.

We're still primarily a rural area, and there are plenty of wild animals — skunks, possums, coons, foxes, rabbits, etc. — who even venture into town and even make their homes here. There are also lots of these animals in the farm and ranch areas. They are prime carriers of rabies and there always is a danger of an outbreak among the wildlife, which would present a dire threat to the health of the community. Contact with these animals by domestic pets could cause havoc hereabouts.

We're always seeing skunks, possums and coons on the streets and in the alleys in town. And there is no way to keep them from coming into contact with domestic animals. Just a few days ago, a skunk was found in a back yard in the southwest part of town. He was in a "sick" condition, which possibly could have been the last stages of rabies. Dangerous to approach or touch by animal or man, to say the least. A pet coming in contact with him could have become a time bomb.

So if you have pets, it would be a good idea to see that they are vaccinated. If some way could be found to vaccinate all the stray dogs we can't seem to get rid of, that also would be a big help.
