Excess Uric Acid Gives Rise to Many Unpleasant Troubles.

AUTHORITIES agree that an excess of uric acid is primarily due to faulty kidney action. Retention of this toxic material often makes its presence felt by sore, painful joints, a tired, languid feeling and, sometimes, toxic backache and headache. That the kidneys are not functioning right is often shown by scanty or burning passage of secretions. Thousands assist their kidneys at such times by the use of Doan's are recommended by many local people. Ask your neighbor!

In 1925 Chevrolet astonished the automotive world by attaining an annual production never before reached by any manufacturer of gearshift automobiles.

Yet, so spectacular has been the increase in demand for Chevrolet cars, that a new and even more brilliant record is the climax for 1926.

Thus, for two years in succession, Chevrolet has broken all its previous records and has set a new mark in automotive history.

This splendid achievement results from a steadfast adherence to the fundamental Chevrolet policy of building a car of the finest possible quality to sell at a low price.

That the vast majority of buyers now demand a car of this type-and that Chevrolet is building such a car—possessing the highest degree of smooth performance, smart appearance, and economical operation—is proved by Chevrolet's success. Come in and see this record-breaking Car.

To the Public

I wish to state to the public that I have bought a Gin in Ballinger, from the Runnels County Gin Company, that Mr. Towler has been operating.

I have this gin in first class condition in every respectequipped with the Mitchel double saw bur extractor machines, I believe the best on the market,

This being my first year in Ballinger I am taking this method of putting my business before the people and am asking a liberal patronage of the customers of this territory.

Having been in the gin business fourteen years, with that experience and the very best machinery money can buy, I believe I am able to reder you the best of service. That being my goal, I will not be satisfied with anything less.

Assuring you that your loyal co-operation and liberal patronage will be very much appreciated, and will take pleasure in thanking you in advance.

Hope to see you soon, as I am ready to gin your cotton at any time.

····· Why Diversified

Diversified farming makes possible crop rotation, and gives epportunity to build up soils worn out by the one-crop system. The ground is always occupied with an essential crop.

Crop rotation in addition to increasing the productivity of the soil protects the grower against the liability of losing his whole year's work through the failure of a single crop.

Here is a Thought About Your Telephone Service

The telephone business is a public service. In this business the interests of the people served and of the community are of first importance. We can not ask you to wait until tomorrow or offer you "something just as

This situation is as it should be and must be if business and social life is to go on along its present high standard. So the relations of the customer and the community to the service of the West Texas Telephone Company in Ballinger are very close.

The people of this community and the community as a whole must have this service. This company must

It is a case of fifty-fifty when measured by its relative importance to both parties.

In such a situation fair dealing, frankness, and understanding is necessary on the part of all of us.
