AUTUMN'S HARVEST

may be made in the spring-at least so far as the main crop is concerned—but the opportunities for safety and profit do not end when the spring planting is done.

There is ample time for additional feed crops, and there is also the matter of improved live stock, which is well to consider no matter what the season may be, or what croppromises it may hold forth.

You may not be entirely satisfied with the results of the harvest, but you will have many reasons for gratitude if you will make an earnest effort to increase live stock and feed production to a point where it will assure you a real living

Premiums

For the past 17 years at intervals, we have put on subscription campaigns and have given away expensive premiums to those who work for subscriptions as well as a large commission to a campaign manager, but due to the financial conditions, we have decided to give our subscribers this difference.

In Runnels County Only This offer is good only to subscribers who

reside in Runnels county, those residing outside will still pay our regular rates: 50 cents for 3 months, 90 cents for 6 months and \$1.50

For a Limited Time This change of price is not permanent as

the cost of news print has not been reduced. but for a limited time we are offering our weekly paper to those who reside in Runnels county as quoted above, but will later change The Paper

The Banner-Ledger, the only paper published at your county site, is bigger and better than ever before. Besides picking up the local news from the Daily Ledger for six days, state news and Associated Press stories, we have 18 rural correspondents, and expect to increase the number when the county schools open, to give you the news from ALL OVER Runnels

Loss Announced

Rain Monday night and Tues- Texas amounted to \$876,160.00, The September fire loss for heaviest fire toll of any Septem-

A noticeable increase was evident in the September Roads in this section of West caused by heating units being started as cold weather began. For that reason the following warning has been issued by J. W Mills to secure the services of Mr. not at all. School busses exper- Deweese, fire insurance commis-

"Beginning with the winter season there are additional fire stoves, furnaces, boilers and their pipes, explosion of hot water heaters, explosion of oil heaters and lamps, defective chimneys and flues, and gas as a heating purpose. Therefore, it is most important that the highest degree of care be exercised by the public in general to insure 'safety' from fire in dealing with each of these daily necessities of life. Also, it is the duty of city officials, fire marshals and fire chiefs, to see that regular inspections are made in order that fire hazards from these particular causes (and other causes) are

corrected or eliminated." Cotton gins came in for a heavy loss during September with a reported loss of \$22,948. Gas, natural and artificial, caused another big item of loss with a

total of \$80,468. Ballinger has continued to keep down its losses and no big fires have gained headway here to hurt on the annual tabulation. The loss here when considered against the value of the property involved has been remarkably low and much of this is due to the excellent fire department maintained in the city.

Recently fire in a seed house at the Ballinger oil mill was held to a very low figure when more than \$80,000 worth of property was involved.
