The Strange Case of MARY PAGE

The Great McClure Mystery Story, Written by FREDERICK LEWIS In Collaboration With JOHN T. M'INTYRE, Author of the Ashton Kirk Detective Stories Read the Story and See the Essanay Moving Pictures

Copyright, 1915, by McClure Publication

SYNOPSIS. Mary Page, actress, is accused of the murder of James Pollock and is defended by her lover, Philip Langdon. Pollock and the strength of the defense built was intoxicated. At Mary's trial she admits she had the revolver. Her maid testifies that Mary threatened Pollock with it previously, and Mary's leading man implicates Langdon. How Mary disappeared from the scene of the crime is a mystery. Brandon tells of a strange hand print he saw on Mary's shoulder. Further evidence shows that horror of drink produces temporary insanity in Mary. The defense is "repressed psychosis." Witnesses describe Mary's flight from her intoxicated father and her father's suicide. Nurse Walton describes the kidnaping of Mary by Pollock, and Amy Barton tells of Mary's struggles to become an actress, of Pollock's pursuit of her and of another occasion when the smell of liquor drove cally introduced as evidence had been Mary insane. There is evidence that Daniels, Mary's manager, threatened Pollock. Mary faints on the stand and again goes insane when a policeman offers her

All through the long hours of the night he had kept his lonely vigil-now foring over the legal documents on the table, now pacing the floor in a frenzy of anxiety, or making his way down the echoing corridors to look in with mute suffering at the room where Dr. Foster and Nurse Walton watched so silently beside a moaning, twitching figure on a narrow prison bed. But when the scanty furniture of the office was gradually emerging from the enveloping cloak of night into visible ugliness he had at last sunk into a doze of complete exhaustion. Miss Walton, coming to the door, an eager message on her lips, turned silently and pityingly away. Some betraying sound reached him, however, and he lifted his head with a start, blinking to find the lamplight paling before the gray of morn-

in spite of his grief, as a lover, over the crowds from wild applause. her suffering, the lawyer in him exulted in the episode which cemented into place the cornerstone of his case.

The thought of this lent a hint of buoyancy to his tired body as he made another trip to the cell where, at Dr. Foster's orders, they had carried Mary, still screaming with frenzy.

Mary herself was sleeping soundly when he glanced into the cell, and Dr. Foster was on his feet, frankly stretching, while Miss Walton was bathing her tired eyes at the basin in the corner.

Both greeted him with a smile, and, answering the question in his eyes rather than the one he huskily whispered with his lips, Dr. Foster said:

"She will be all right now. She woke, conscious, just after your last visit and is now sleeping soundly. There's nothing to worry about-at least, not just at present."

"Thank God!" Langdon's voice broke on the words, and Dr. Foster put out his hand and patted the shoulder of the younger man reassuringly, saying:

"We all say that, but you'd better go get some rest now; you look done up." "Oh, I'm all right," said Langdon. "But, Doctor, is she-is it going to be possible to go on with this trial? Can Mary bear it?"

"I think so." The answer came slowly. "Of course yesterday's scene was bad, very bad. But you must realize that the attack, while it was plainly due to the whiskey thrust upon her, was only to some extent brought about by the fact that the liquor was handed her at a time when she was hysterical and had been re-enacting events that kept her earlier experiences constantly in her mind. Given healthy surroundings and happiness, I wouldn't worry about attacks in the future."

Langdon nodded absently, for his heart was echoing the earlier words of the great alienist: "Given healthy surroundings and happiness I wouldn't worry about attacks in the future," and he was vowing to himself that, cost what it might, he would yet win

freedom and happiness for her. He had not dared hope that she would be well enough for the trial to when she woke a few hours later she vowed she was perfectly able to go into court even then. And so, no more than an hour late, the proceedings

were continued. That hour had seemed a very short time to Mary and to Langdon, but it was a very long one to the excited spectators who crowded the rooms to the doors, whispering excited reminiscences of the day before.

he had ever known. In consequence the opening hours of court were marked by a series of bitter wrangles during which even his honor lost his temper, and the restlessness of the spectators became open disorder. But for all his acidity of wit and skil at argument it was a losing fight that the District Attorney waged. He was conscious of that himself. Therefore it came as no surprise when it was at last brought summarily to an end by the judge, who ordered the testimony of the policeman as to Mary's madness

entered as evidence. With a long breath of relief Langdon turned back toward his seat, suddenly becoming conscious that he was hold ing a crumpled scrap of paper which the bailiff had thrust into his hand some moments before. He remembered now that the court officer had said something when he gave it to him, but he hadn't caught the words, and it was with entire indifference that he opened the note and read the hastily scrawled words. But at the sight of them indifference gave place to excitement. Crumpling the paper up in his hand, he turned sharply to the bailiff. "Call George Brennan!" he said, and

Langdon himself was equally shaken by the wonderful little interlude that had come like a streak of sunshine through the dreary gloom of the court scene, but those about him attributed the unsteadiness of his voice to excitement, and only Mary guessed the real reason and flushed rosily under her own thoughts.

"Did you see Mr. Pollock again tha night?"

"Yes. When I got back to the stage I found him there denouncing Shale for having failed to do his part, and when I asked him if he had mean murder, he said, 'Yes! I meant to have him killed through an apparent acci dent. What is more, I tell you here and now, that I'll kill Mary Page and I'll kill myself, before Langdon shall win her!' That's what Jim Pollock said, and that's what I thought he had done-that night. I SWEAR I didn't go into that room! But I heard then quarrel, and I heard the scream and the shot. And I thought he'd done it -and I ran away, in sheer horrorthat's all! My God! You must believe me. It's true that I quarreled with Jim Pollock, not once, but many times It's true that he didn't play fair with me, but can't you see that I had ev erything to lose and nothing to gair by his death! It's meant ruin to me-

and ruin to my wife and little giri." I His voice broke pitifully over the last words. Leaning forward, he buried his face in his shaking hands, waiting for the next question. But it didn't come. That tragic outburst had carried conviction, not merely to Langdon but to everyone in the room, and whatever shadows of suspicion had hung over Mr. Daniels faded before the pitiful but indubitable veracity of his story. The mystery, if mystery it was, of James Pollock's death was still as impenetrable, and the cords of the law that for a time seemed to be loos ening from about Mary Page, had

tightened again. But to Mary and Langdon that tes imony of the manager had brough something that for the time at least seemed greater than the law-an understanding of Mary's heart, vision of what might yet be if freedom could be won for her.

It was a strange moment for a great love to find expression, and a strange story which had wakened it; and, while Langdon felt deep in his heart that no words were needed after that glance of Mary's he could not forbeat following her to her cell when court had adjourned. She glanced up at him with sudden shyness when he came in, and her hands went out waveringly, but whether to hold him off or to cling she could not herself have told. Lang don had no doubts, however, and caught them close in his warm grasp and drew her to him in a silence more eloquent than words. Then, stooping till his cheek lay against her hair, he whispered unsteadily:

"Mary, when Daniels told of James Pollock's attempt on my life, your eyes said something to me that they have never said before. Did you mean it. dear?" Then, as she clung to him mutely, he laughed softly and added: "I know you did. You can nevet, deny it now, my darling, and when all
