GIRLS' FORTUNES.

The children were trying their fortunes one day. By naming their buttons in this funny way: A "rich man," a "poor man," a "beggar," a "chief,"...

MURDEROUS NATIVES.

Harrowing Tales of their Diabolical Treachery.

Only Two Out of Nine Escape—Mowing the Black-Skinned Devils Down with Shot from a Six-Pounder—Sweet Revenge.

In the year that our civil war broke out I left Honolulu for a trading trip among the islands to the south, but being more particularly bound for the Paumotu Islands, which lie to the southeast, on the Tropic of Capricorn.

"Oh, no. You will have full charge when we get on trading grounds, as I will have to look after the barter. Take such precautions as you like, though I think it will be trouble for nothing." My bump of caution is decidedly prominent.

the likes of me to give you advice, but I think we should get ready for a row." I thought so, too. We took the cover off the mainsail and hoisted it part way up, ran up the jib, uncovered the foresail, and acted as two men might who were caring for a craft at anchor.

BONE-BUTTON MAKING. The Process of Manufacture from Vegetable Ivory. From human bones? No. From ivory? No. From bone of dog or cat? No.

THE FARMER'S FUEL. Why Wood Should Be Thoroughly Seasoned Before It Is Used. Comparatively few farmers employ any thing but wood as fuel for family use.

Official Paper of Chase County.

If Canada should be annexed to the United States there would be free trade between the two countries.

A new paper has been started in Emporia, which is called 'The Sunday Gazette.' It is edited by Mr. J. F. Craig, formerly editor of the Emporia Daily Republican.

Governor Tom Moonlight, of Wyoming Territory, will be in this city in a few days enroute to Chicago, in which city he will deliver an address before the Burns Club on the anniversary of the great Scotch poet.

The Warder Grand Opera-house of Kansas City, Mo., is to be sold at sheriff's sale on Wednesday, January 20th, unless certain notes are paid, which are held by the National Bank of Commerce of that city.

Three of the largest wool-growers in the State of New York failed recently near Rochester. Their names are Volney P. Brown, and Chester and Charles T. Brown.

The Philadelphia Telegraph does not join other Republican papers in belittling and vituperating the President, but, with clearer perception and sounder judgement says: 'We are constrained to say that the President in his message makes the most forcible argument against the protective policy that can possibly be made.'

After a few days visit in this city with the family of his daughter, Mrs. C.W. White, Hugh Harvey left yesterday for his home at Strong City, accompanied by his grandson, Master Charlie. While here Mr. Harvey informed us that he had just returned from one of the most enjoyable visits of his life among relatives in Steubenville, Mingo and other places in Ohio, whom he had not seen in twenty years.

The Courier-Journal calls the attention of the Republican papers, that are lamenting the fact that the negro of the South will not burn and shoot, and make the rivers run red with blood, to the condition of things in Clairmont county, Ohio, where 400 negro children have been turned from the public schools by the whites, their houses stoned and their doors and windows broken in.

YOU WANT THE EARTH.

The immigration at the five leading ports of the United States during November, 1888, was 25,419 against 32,198 in November, 1887. For the periods of eleven months ending with November in each year the totals are 493,583 for '88 and 497,646 for '87.

Seven thousand women voted at the recent election for school trustee in Boston, and this is pointed to as an indication of greater interest on the part of women in public affairs in the future.

THE PUBLISHING AND PATENT OFFICES OF THE SCIENTIFIC AMERICAN.

Perhaps some of our readers have visited the extensive offices of the Scientific American, at 351 Broadway, New York, but many have not, and to such the following account may be of interest. A correspondent who recently had this pleasure informs us that he was greatly surprised at the magnitude of the establishment.

The Architectural Department occupies the top floor, and here may be seen the manager of this department, and also a number of draughtsmen at work preparing plans and general designs for the Architect and Builder edition of the Scientific American, which is published monthly, and has attained a widespread circulation.

Some idea may be had of the extent of the business done at the office of the Scientific American when we state that over one hundred persons are employed by Mann & Co. on their extensive patent departments.

We shook hands on the street the other day with a fine looking hearty young man, a wealthy farmer in one of our townships, a hale, hearty young man one of the best fellows in any world, and able to make his living anywhere. We went to Winfield the next day and saw upon the streets a decrepit old man, out of shape with rheumatism, poor and old, with enough ability and knowledge to run a county office in good shape.

FROM COLORADO CITY, COL. COLORADO CITY, COL., Dec. 29th, 1888.

To W. E. Timmons: How are you old friend? I see by the last issue of the COURANT you have me down as insane. You just say to all of my friends in Chase county that I am still all right in the upper story and your informant was rather premature. I was off a little for a few days, from an overdose of bromide of potassium. I am improving slowly from injuries caused by a severe fall.

Our little town is still prospering, and the Cottonwood Falls 'colony' are all doing well. We get a plant of glass working machinery in the near future. The weather is very fine. No snow or real cold weather yet.

Christmas passed off to the satisfaction of nearly every one. Mrs. Pennell and children reached home all right and she returns many thanks to all her friends for their hospitality, and regrets she could not have stayed longer.

The Chicago canners are appealing to Congress for a drawback on all tin-plates used for making their cans either for the home or foreign markets. If this favor is extended them, they will withdraw their opposition to a heavier tax on the article used by the rest of the people, so that the industry of making tin-plates can be established in this country.

Mr. Frank Blackshere, who is now at work at Topeka, spent the holidays at his home near Elmdale.

"It is of no use to argue the question. Philip, I am neither a stubborn nor opinionated, I have simply had a lesson that will last a lifetime." "Look here Jack! you are like some old bachelor who has been pelted by one woman, and goes about declaring all women are false." "Not at all, my brother Charles died of Bright's disease, brought on by using one of these so-called 'blood purifiers'—the kind you see attractively advertised in every book and corner. It contained iodine and potassium, a drug as useful in extreme cases when cautiously given under a doctor's supervision, but death dealing to all who take it in quantity. If your brother had died under such circumstances, you would hate patent medicines as I do."
