POLL TAX STILL IS REQUISITE FOR VOTING

State Democratic Party officials are most concerned that Texas voters are under a false impression that they no longer have to pay their poll tax in order to be able to vote in the 1966 elections, according to Will D. Davis, chairman of the State Democratic Executive Committee.

"Nothing could be further from the truth," Davis said. "A poll tax receipt or a valid certificate of exemption is still the only 'legal tender' acceptable as an admission ticket into the voting booths of Texas."

The three federal judges who will decide the U. S. Department of Justice law suit to abolish the poll tax in Texas as a requirement for voting also have admonished Texas that they had better pay the \$1.75 poll tax levy before the January 31st deadline if they desire to vote this year, according to Ray Shirley, Democratic chairman for Foard County. CECIL TODD

Revival Fires to Be Conducted in Crowell

A "Revival Fires" Rally will be conducted here by Evangelist Cecil Todd, executive head of the "Revival Fires" ministry, on Wednesday, Jan. 26, at 7:30 p. m. at the First Christian Church, according to R. C. McCord, minister of the congregation.

The Christian Evangelists Association, of which Mr. Todd is director, produces a weekly, 30-minute syndicated evangelistic television program called, "Revival Fires," currently being viewed weekly by thousands on three television stations in St. Louis, Joplin, Mo., and Fort Smith, Ark. He also prepares a "Revival Fires" radio broadcast heard on several radio stations covering all of North America every week, and during the seasonal months he conducts giant tent crusades under their huge 2,000 seating capacity tent and in large auditoriums. Nearly 10,000 people have been won to Christ through his evangelistic campaigns.

During this past season of summer crusades, combined crowds for the four crusades reached 31,900, with over 12,000 different people in attendance. More than 1,000 people made public decisions for Christ, at least one hundred and twenty-three were baptized, and three new congregations were assisted in being planted. Mr. Todd, who was reared in the land of no churches, the Kiamichi Mountains of Southeastern Oklahoma, has assisted in the planting of sixteen new congregations during his ministry.

Mr. Todd is editor of the monthly magazine, "Revival Fires," a religious journal that has over 16,000 circulation.

Evangelist Todd will be here for the one service only. Everyone throughout the area, regardless of their religious affiliation is invited to attend.

Fifty-Two 4-H Girls Enrolled in Foods Program

Many families are being served food by a younger member of the family as fifty-two 4-H Club girls are enrolled and participating in the 4-H Foods Program.

The girls are given books that contain information about the four food groups and recipes for preparing foods. Also, the girls study how to serve the food and the importance of the various foods. The books are divided into twelve lessons.

Some of the girls work under the supervision of their mother or an older sister, and others work in groups under the supervision of an adult leader. Adult leaders working with girls this year are Mmes. Bill Dodd, Jack W. Brown, Jeff Bell, Mike Bird, Henry Borchardt, Willie Garrett, Travis Vecera, R. J. Owens and Leon Speer.

After the girls complete their books, "we will have a food show where each girl can select a recipe that she has learned to prepare and exhibit it. The Food Show will be in March," stated Mrs. Virginia Ilse, County Home Demonstration Agent.

Large Amount of Copper Wire Taken in Theft

About 1,150 pounds of new copper wire, which was to have been used in the new sub-station being constructed for West Texas Utilities Co., was taken by thieves last week end.

The wire was stored within a fence around the old sub-station and the thieves took the fence down, backed their truck, in and after loading up the wire, replaced the fence.

In all, three reels of the heavy gauge wire was taken, with the wire from one reel being unrolled and the empty reel left. The other reels were loaded intact.

Cecil Davis, local WTU manager, said the wire cost the company between \$2,500 and \$3,000, and said its probable value on the scrap metal market would be about \$500.

New Sub-Station Being Built for West Tex. Utilities

A new all-steel construction sub-station is being built by the West Texas Utilities Co. on its property one block east of the jail here. The new sub-station, when completed, will replace the old wood-construction substation which was built in 1928.

Cecil Davis, local WTU manager, said the new installation is being built large enough to handle any increased capacity which may be needed in the years to come. The work has been in progress for three weeks, and the contractor has a 90-period in which to build the structure, Mr. Davis added.

Mr. Davis also said that a new all-steel construction sub-station has recently been completed at Truscott.

WARM WINTER CAUSES UNUSUAL PLANT GROWTH

"Everybody talks about the weather but nobody does anything about it" is especially true in Foard County this year. Residents have certainly been talking about the absence of cold weather this winter.

Last week's issue of the News told about tomatoes which had ripened here in Crowell in January.

Curtis Casey of Truscott was in the News office Wednesday last week with several stalks of rye he planted last fall. The rye was about waist high, and had long heads about 6 inches long.

Reports of pear trees blooming in November and now containing small pears have been heard.

Moss is growing in the Country Club just about like it does in mid-summer. Ordinarily in the

winter, the moss dies back and goes to the bottom.

All in all, Foard County is experiencing a winter like the old-timers report having never seen before.

Cold Weather This Week
The coldest weather of the winter thus far came Sunday with a norther that blew across this section, and brought an abrupt end to the balmy weather.

Light moisture was falling here as this issue of the News went to press Tuesday night.

Farm Program Notices Mailed to Foard Farmers

Ray Hysinger, Chairman, Agricultural Stabilization and Conservation County Committee, said this week that notices have been mailed to producers in Foard County, listing farm allotments, base acreages, yields, and payment rates under the 1966 wheat, feed grain, and upland cotton programs.

With this information, farmers will be able to determine whether they wish to participate in the programs and the extent of their participation. Program benefits include price support loans and payments and diversion payments.

Any producer who feels that the yield, wheat allotment, feed grain base, rate, or conserving base shown on the notice he received for his farm is incorrect or inequitable—as compared with like data determined for similar farms—may ask the county committee to reconsider the matter. Such requests should be made in writing and mailed or delivered to the county committee within 15 days from the mailing date shown on the notice.

To take part in the programs, the farm operator first files his intentions on a prescribed application form at the ASCS county office during the sign-up period. This period starts January 24, 1966, and will extend through April 1, 1966.

Uncle Sam has a couple of plans to make your money as easy to save as it is to spend. There's the Payroll Savings Plan where you work. And the Bond-a-Month Plan where you bank.

Easy as pie, but the best part of the idea is that there's a bigger cut of the pie for you, the longer you hold onto your Bonds. When they mature, you get \$4 back for every \$3 you invest.

There's no state or local income tax on Series E Savings Bonds. And you may defer payment of the federal income tax until your Bonds are cashed.

While your bankroll grows, freedom throughout the world grows a bit, too. And your Bonds are helping this cause more than a little.

Get in the U. S. Savings Bonds habit, and before you know it, you'll have a pocketful of red, white and blue green-stuff that'll come in mighty handy just when you need it most.

Quick facts about Series E Savings Bonds

- ✓ You get back \$4 for every \$3 at maturity
 - ✓ You can get your money when you need it
 - ✓ Your Bonds are replaced free if lost, destroyed or stolen
 - ✓ You can buy Bonds where you bank, or on the Payroll Savings Plan where you work
- Buy E Bonds for growth—H Bonds for current income

city toast...or country toast?

Which do you prefer... city or country
toast? One is as good as the other... be-
cause it's toasted electrically!

Thanks to the effort and foresight of a
dedicated few, a dependable supply of low-
cost electric power has made country toast
possible. But, it didn't come easy. Rural
residents were forced to provide their own
electricity through cooperatives... because
no other source was available. Now, mil-
lions of electric cooperative members own
and direct their own power source, so they
can enjoy country toast.

Yes, the comforts and conveniences of
country living, even in remote places, are
fast being taken for granted. A move to city
or town for the comforts of living is no
longer necessary. In fact, thousands are
moving the other direction... to the coun-
try. They can have their toast and eat it, too.

Inspection Made of County's Sheep Flocks

Joe Burkett, Foard County agent, announces that the Texas Animal Health Commission, assisted by the Animal Health Division of the United States Department of Agriculture, launched an extensive inspection of sheep flocks with Foard County on Jan. 15. All inspections are under the supervision of Dr. W. H. Horu, area veterinarian, and were conducted in Foard County by Dan Reynolds.

As a result of two outbreaks of sheep scabies within the last year, other states have imposed dipping requirements that hamper the marketing of Texas sheep. Relinquishing of these requirements will be considered upon an inspection of all flocks without evidence of scabies being found. Industry cooperation is needed so that the necessary inspections may be conducted in an organized manner with a minimum of inconvenience to the sheep producer.

Warren Everson Seeks Re-Election as Pre. No. 4 Commissioner

Warren Everson announced this week that he will be a candidate for re-election for the office of Commissioner of Precinct No. Four, subject to the action of the Democratic primary. In making his announcement, Mr. Everson says: "I have enjoyed working as Commissioner of Precinct No. Four and am grateful to the people of the Precinct for the opportunity to serve in this capacity. In the event I am re-elected, I shall continue to exert

my best efforts for the Precinct and the county as a whole, and discharge the duties of the office in a fair and impartial manner. An experimental paper hood which could be assembled without tools or need of a foundation, and was large enough to accommodate four people, was guaranteed to stand a year in any climate, reports the American Paper Institute. It stood for several years.

Identifying Numbers Under IRS's Automatic Data Processing

A taxpayer's number is the principal method of identification under the Internal Revenue Service's Automatic Data Processing, according to Ellis Campbell Jr., District Director for Internal Revenue Service's northern Texas District. Mr. Campbell says all individual taxpayers should verify their Social Security numbers by reference to their Social Security cards or by contacting the Social Security Administration if there is any question of the correctness of a number.

If there has been any change in marital status or in the taxpayer's name, the nearest Social

Security office should be contacted to make any of these on his or her Social Security records.

The taxpayer's 1965 tax return will be matched with his Social Security records. A discrepancy exists in the Social Security number will probably be a delay in getting a refund.

By making any of the corrections at an early date, a taxpayer could avoid any delay in getting a refund.

Boy Scout Safety Life Saving Training Pays Off Handsomely

The increasing effectiveness of the safety and life-saving training of the Boy Scouts of America pays off when emergencies arise. This is seen when the National Court of Honor of the organization cites 70 members for life or for some other meritorious action.

Scouting aims to reinforce a boy's natural courage with knowledge in handling self in emergencies. Quick, sure decisions. Those being honored are in teens, boys who, forgetful of their own safety, acted with courage and cool resourcefulness when the gency came.

One of the 70 being honored is a Wichita Falls Boy Scout, Willie Allen Taylor. He earned the Certificate of Merit, Northwest Texas Council's highest honor, at a banquet held Jan. 18 in Wichita Falls.

The citation accompanying his honor is: When gasoline spilled at Perryton, Texas, on July 19, 1965, he panicked and fled. His son, Life Scout Willie Allen Taylor, fourteen, to his father and began rolling on the ground to put out the Willie's hands were slightly

Exciting news from FRIGIDAIRE ELECTRI-CLEAN OVEN!

From dirty... to clean AUTOMATICALLY

NO MORE MESSY CLEANING

- Q. What happens to the dirt?
- A. The electric-clean oven heats up to about 500°. At this temperature oven soil is turned into a loose ash and vapor. The vapor is vented thru a special air purifier.
- Q. How can it clean the racks & rotp bowls?
- A. Frigidaire uses a special heat-resistant porcelain enamel for both the oven liner and cooking unit rotp bowls. The racks get cleaned right along with the rest of the oven.
- Q. Is there any hand cleaning left to do?
- A. Possibly there will be a small amount of oven ash that may remain after cleaning. This can be whisked out easily.

- Q. What about safety features?
- A. As soon as the temperature rises above boiling heat, oven double-locks itself. It can not be re-opened until the temperature returns to conventional oven heat. Frigidaire uses extra insulation and its electrical system and high heat process are UL approved.
- Q. How expensive is it to operate?
- A. This full-size oven cleans itself for about the price of a cup of coffee—much less than the cleaning cost of special chemical oven cleaners.

This unique Frigidaire Range may seem too good to be true. But, true it is and you may see it at your nearest WTU showroom.
