THE OPENING OF SCHOOL MEANS. . .

The beginning of this school year draws one major reaction from the student body, "Well, it's here. ...'' Yes, it's here and it symbolizes many different things to each class.

To the freshmen, with their great round eyes, it means finally emerging into the world of high school bedlam. The best four years of their school life is beginning with the joyous plague of invitations to join the school's many activities and organizations

To the sophomores the long desire "to belong" is finally realized. Being old veterans at the art of hall dodging and locker slamming, you have only to master the talent of sleeping with your eyes open, to make this year one of your most

exciting

To the juniors, it means becoming familiar with magazines, hurdling chairs with 4 bowls of chili all to raise money for the junior-senior prom. A word of warning passed on from the experienced. . . "Plan for rain

Most of all this year carries a message to the seniors, their last time to play on the CHS field, the last time to march in the Wildcat Band, the last time to defend the reputation of CHS on the basketball court and the last time to aggravate that special teacher. So to them we say "Make a memory of each moment!"

gon When questioned as to Nixon's impounding certain federal funds. Price says that Congress has been weak over the past 10 to 15 years, and Nixon has challenged the Congress to take care of its

responsibilities. In effect, the Congress is a demogogary since on nearly all legislation, Congressmen and Senators first think of what voting for or against certain legislation will do in affecting the attitude of the voters back home to them, rather than what

is best for the country. As an example, he said Congress last year passed a law holding federal spending to \$260 billion a year, and at the same time passed legislation that would cost far in excess of this amont: then criticized the president when he vetoed some measures in an effort to hold down spending.

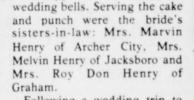

Price added that there are three large voting blocs in the country - 30 million on social security, 24 million on welfare and from 24 to 30 million in organized labor.
