Preceding the business meeting a bountiful barbecue meal was served with over 4,000 persons sampling the beef, salad, beans, potatoes and drinks, and all the trimmings. Taylor Tractor Firm Enlarging

Taylor Tractor and Implement, local John Deere Agency managed by Fenn Taylor, is completing construction of a large new 40 by 100 foot shop building on the east side of the square which is adding to the attractiveness of the downtown area.

Taylor now owns the entire east side of the square, and the new shop building connects up the old Applewhite building with the old Claude Donaldson building. Both these buildings and the new shop are being

finished with a deep aqua Delta steel covering.

Mr. Taylor says this will give the firm the largest shop in the entire South Plains area. New equipment is being added, and a new tractor line will be on display Aug. 19.

STATE CAPITAL Highlights AND Sidelights

by Bill Boykin
TEXAS PRESS ASSOCIATION

A recent statewide survey shows 22 per cent of Texans, or 2.5 million, are poor compared to a nationwide rate of 13 per cent.

Further, Texas accounts for nearly 10 per cent of the nation's poor.

Texas Office of Economic Opportunity submitted the 300 page report to Governor Preston Smith, terming it the most comprehensive study ever undertaken among the Texas poor.

The Rio Grande Valley area was shown as having the highest incidence of poverty in the state -- 42.2 per cent of the population. East Texas was next with 29 per cent poverty rate.

The East Texas and Lower Rio Grande Valley areas also have the smallest proportion of persons completing high school.

About 55 per cent of the heads of poor households are employed, and 70 per cent of those have fulltime permanent jobs, according to the study.

However, low income levels make it difficult for these persons to bring their families out of poverty.

Guidelines for the report set poverty level for a family of four at an annual income of \$3,800.

More than one third of the Texas poor are children under 15, and four out of five are black or Mexican-American.

George P. Taylor, TOEO director said the report will be the basis of programs to alleviate poverty in the state. Recommendations include bringing in new industry to decrease unemployment, housing expansion and better health care and food programs.

A proposed four-year anti-poverty plan for Texas would seek \$6.3 billion in aid from national and regional OEO. REFORM SESSION STUDIED - Governor Smith disclosed he is putting together a "full package" of insurance reform proposals in case he decides to call a special legislative session this year.

Reports indicated the governor was serious when he said he may call such a session on insurance matters. Smith himself continued to lash out at the insurance regulatory board. When members ordered a rate cut for auto insurance averaging 11 per cent statewide, Smith said a 21 per cent reduction was in order.

Smith said he must work closely with legislative leadership to achieve anything in a special session, but Lt. Governor Ben Barnes and House Speaker Rayford Price said he hasn't said a word to them about his plans.

If Smith calls the session, apparently he will propose wholesale reorganization of the board and a controlled

competitive rate system for property and auto insurance. ELECTION BILLS PAID - The state ran out of money before it paid 1972 primary election expenses and fell about \$325,000 short of meeting all its bills.

The last \$117,000 available was sent to county officials last week. A lot of election workers, printers, and suppliers have not been paid for their work.

The money was dispersed on a pro rata basis, amounting to 26.65 per cent of bills still outstanding in the counties. Remaining expenses will have to go uncompensated until the 1973 Legislature can make appropriations. An appropriation of \$2.1 million was set aside by the Legislature last spring for the 1973 primaries.

"I can find no other source of funds available at this time," said Secretary of State Bob Bullock. "When we have paid all the county chairmen, we will not have one cent remaining of the \$2.1 million appropriated."

AG OPINIONS -- Death penalties may be commuted to life sentences at any stage between jury verdict and granting of a new trial, Attorney General Crawford C. Martin held.

In other recent opinions, Martin concluded: One convicted of a felony may have rights of citizenship restored and become eligible to hold public office.

A county clerk may record marks or brands given the same name in they are themselves different.

Podiatrists may not create a professional association under the Texas Professional Act but can create a professional corporation where all shareholders are licensed podiatrists.

The county attorney of Harris County may investigate election frauds, although the primary duty is that of the district attorney.

Established procedural rules for parole revocation under a new U.S. Supreme Court decision are not applicable to revocations prior to June 29, 1972.

Parks and Wildlife Department officers have duty to pre-

serve the peach and disperse riots.

A notary who continues to meet any one of three statutory requirements has not "permanently removed" himself or created an automatic vacancy.

A former state employee who was eligible to be a member of the Employees Retirement System is not eligible to receive a Texas Ranger pension.

COURT MERGER URGED -- Merger of the Texas Supreme Court and Court of Criminal Appeals, elimination of municipal and justice of the peace courts and non-partisan election of judges were proposed by the Chief Justice's Task Force for Court Improvement.

A series of seminars are being scheduled over the state to hear comments on the proposed revisions.

Under the recommendations, courts of civil appeals would become courts of appeals handling both criminal and civil cases.

The Legislature would be directed to create a system of county courts at law to perform the judicial functions now performed by all courts below the district level.

UNEMPLOYMENT JUMPS - A jump in the unemployment rate last month was spurred largely by new graduates and summer job seekers, according to Texas Employment Commissioner.

The jobless rate reached 4.6 per cent statewide, but this was less than the 5.3 per cent rate of June, 1971.

Actually, the University of Texas Bureau of Business Research reports, the Texas economy is getting better and better and 1972 second-quarter and first-half performances of economic indicators ended on a solid upbeat. No boom is yet in sight, however.

APPOINTMENTS -- Dick Whittington, formerly of Dewers in Liberty County, has been named deputy director of Texas Water Quality Board, succeeding Joe P. Teller.

Governor Smith appointed William H. Earney of Marfa district judge of the 83rd judicial district. He succeeds the late C. E. Patterson.

SHORT SNORTS

A special election is set for September 16 in District 46, Place 3 of Brooks, Cameron, Kenedy, and Willacy counties to select a successor to Rep. J. A. Garcia Jr. of Raymondville who resigned. Agriculture Commissioner John White warned early destruction of cotton stalks in the Lower Rio Grande Valley is necessary to fight the pink bollworm menace.

New information on Texas fairs, fiestas, and celebrations during August and September is available from the highway department.

Land Commissioner Bob Armstrong has been elected secretary of the Western State Land Commissioners Association.

Four minor party lawsuits to get on the November general election ballot have been set for hearing before three federal judges in San Antonio September 7.

A Senate committee probing health care costs was told hospitalization in Texas isn't quite as high as the national average - if that's any consolation.

Special guests at the noon luncheon other than Lion wives were Bill Craig of Tahoka, Mr. and Mrs. Carl McCormick of Lyons, Ill. and Mr. and Mrs. Hugh Sams of Francisville, Indiana. McCormick is brother of Mrs. Ed Redwine and visited the Redwines briefly last week.

You can give white cotton gloves a crisp, like-new appearance with spray starch. After washing gloves, roll them up in a terry towel to remove excess moisture. Then spray evenly with starch and let dry.

Steve Roberts In Army Training Corps

STEVE ROBERTS

Cadet Steven K. Roberts, 21, son of Mr. and Mrs. James F. Roberts, Tahoka, Tex., is receiving practical work in military leadership at the Army Reserve Officers Training Corps advanced summer camp at Ft. Riley, Kan. from June 17 - July 28.

Cadet Roberts, who is scheduled to receive a B.S. Degree in 1973 from Texas A & M University, College Station, is one of more than 10,000 students attending Army ROTC Training at six installations in the U. S.

The six-week ROTC advanced camp provides an opportunity for cadets to develop and demonstrate leadership capabilities in a field training environment. The instruction supplements theories and concepts which cadets learned in the classroom on campus.

Cadets normally attend the training between their junior and senior years. This enables them to better comprehend their final year of classroom work and to function as cadet leaders on campus.

Cadet Roberts is a 1969 graduate of Tahoka High School. He is a member of Alpha Pi Mu Fraternity.

Updating Feed Grain Bases

The Grain Sorghum Producers Association will be working to get an updating of the feed grain bases for future farm programs. This decision was made by the Board of Directors at its regular meeting on July 28, 1972.

The GSPA Directors felt

Post Rodeo August 17-19

The 32nd Annual Post Stampede Rodeo is scheduled for Aug. 17-19, with each night's show to start at 8 o'clock, following the grand entry.

that updating the present feed grain bases would work to the advantage of future farm programs. The present allotments were established based on the plantings in 1959 and 1960. Since that time new areas of feed grain production have come into existence. GSPA officials felt that it was in the best interest of production control to extend the Program to those growers who do not presently have allotments.

Elbert Harp, GSPA Executive Director, stated: "The purpose of the Feed Grain Program is to help bring the production in balance with demand. To bring all producers under the Program and thus help curtail the total supply should in turn help the market price situation."

It was pointed out that a period in the late sixties and early seventies could be chosen as a base period for establishing allotments in addition to continuing the 1959-60 base period. New allotments could be established for each farm according to the larger base period. Harp stated: "We will be working to develop a satisfactory method of updating the feed grain bases for the new farm programs to be developed next year."

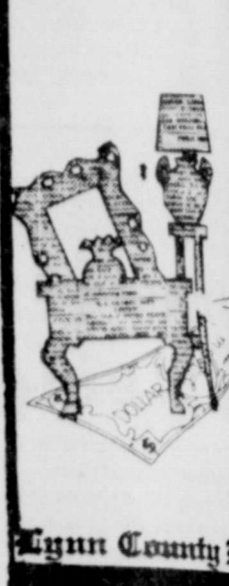

Adrian Parker of Saint Jo, Tex., is producer of this year's rodeo, with competition scheduled in bareback, saddle bronc and bull riding, tie-down calf roping and team roping and girls' barrel race. There will also be a specialty act and a wild mare race each night.

The opening day rodeo parade will be at 5:30 p.m. Aug. 17, with floats competing for \$200 in cash prizes, and a dozen or more riding clubs vying for first, second and third place trophies.

Rodeo competitors may obtain entry information by writing Johnny Kemp Post Stampede secretary, Box 302 Post, Tex. 79356. The rodeo office will open at 8 a.m. Monday, Aug. 14. The office telephone number is (806) 495-3374.

excited over the recent rain
she fell and broke her arm!

It all happened Tuesday af-
ternoon of last week, during
the latter part of the 12 inch
rain which fell at their home.
The pick-up truck of the Cara-
way had become stuck in the
mud near their house, and she
and her son, Don, were going
back to the house. As she
neared the house, she slipped
and fell, breaking her arm.

Cecil says excitement over
the rain caused her to fall, or
possibly it had been so long
since she had walked on muddy
ground she had forgotten how
to navigate in such weather.

BILL GRIFFIN
SAYS ...

Johnsongrass is one of the
most widespread perennial
weeds, since nearly every
sate in the U. S. has some
infested areas. This tall-
growing grass spreads by two
ways. Underground stems, or
rhizomes, act like roots and
spread quickly in cropland.
Rhizomes become tangled on
tillage equipment and hitch a
ride to infest other fields.
Another method of spread is
by seed. Seed blows into crop-
and from johnsongrass in di-
ches and lake areas. John-
songrass seed is hard to sepa-
rate from hay or straw and
is difficult to clear out of some
crop seed. Extensive re-
search in johnsongrass con-
trol has been conducted by

the Texas Agricultural Ex-
periment Station at the Tex-
as A & M University Agri-
cultural Research and Exten-
sion Center at Lubbock. Weed
research at the Center was
conducted by Dr. Dudley Smith.
Various control methods and
chemicals were studied in cot-
ton fields with several cooper-
ating growers.

Good weed control just
doesn't happen, it must be
carefully planned before the
crop is planted. In cotton or
soybeans, plan on double disk
incorporation of the full re-
commended rate of Treflan or
Planavin for your soil type.
This controls seedling john-
songrass and prevents more
new plants from establishing.
Preliminary test work in cot-
ton by the Texas Agricultural
Experiment Station shows that
applying a double rate of Tref-
lan for two years, with thor-
ough incorporation gives
good control and excellent sup-
pression on old rhizomes. Good
soil incorporation is essen-
tial.

Disking two or more times
cuts up rhizomes better, mixes
the chemical through the
soil, and places treated soil
next to more old root sec-
tions. If cotton is planted
later after soil warms up,
yields are not reduced as a
result of high application ra-
tes. Rhizome control with
Treflan drastically reduces
the johnsongrass population,
particularly when followed by
a postemergence herbicide
program. High, double rates
of Treflan for johnsongrass
control are not labeled or re-

commended for use yet. "But
results have been good in re-
search plots," says Dr. Smith.
Interested growers should
only treat a very small area
to observe how this prac-
tice works on their farm.
Timely cultivation in any
crop is an essential part of
a total control program for
johnsongrass. The weed is
forced to regrow with repeat-
ed tillage and hand hoeing of
infested spots. More root
reserves or carbohydrates
are used up each time new
shoots are produced. Total
control will depend on having
a chemical in the soil to sup-
press root growth, spraying
shoots to kill foliage and
roots, and soil tillage to make
the plant exhaust its reser-
ves. But watch ditches, fence
rows, and lakes. Because once
a field is cleaned up, these
are sources for reinfestation.

workers who have died, and
97 are getting benefits as dis-
abled workers or their depend-
ents.
Hutton pointed out that al-
though most social security
beneficiaries are older
people, about one out of every
four is under age 60. In
Texas, 350,000 people under
age 60 are collecting social
security payments each
month. Nearly 200,000 are
under age 18, receiving pay-

ments because a working father
or mother has died or is
getting social security disabil-
ity or retirement benefits.
Most of the 35,000 beneficia-
ries in Texas between 18 and
22 years of age, are getting
student's benefits under a pro-
vision in the social security
law permitting the continua-
tion of a child's benefits be-
yond his 18th birthday, and
up to age 22 if the child is at-
tending school full time.

Also in this 18-22 age group
Hutton said, are some other
type of beneficiaries, illustrat-
ing the broad family protec-
tion that the social security
program provides workers of
all ages. Some are children
of retired, disabled, or de-
ceased workers who became
disabled before they reach 18
and who will probably never
be able to work and become
self-supporting. The monthly
benefits of these young peo-
ple, severely handicapped by
physical or mental disabili-
ties, will continue indefi-
nitely. Benefits are also pay-
able to the mother if the dis-
abled son or daughter is in

the mother's care.

Hutton said that another
relatively small but significant
group of youthful social se-
curity beneficiaries are those
who are receiving benefits as
disabled workers. Social se-
curity disability payments can
be paid to a person who be-
comes disabled for work even
if he has less than 5 years
of work under social security.
As little as 1 1/2 years of work
is required in the case of a
worker who becomes disabled
before age 24, Hutton said.

When you spend money out of town it is gone. It keeps traveling with little chance of returning.

Money spent at home stays at home. It returns in many ways. In more successful businesses, improvements, expansions and new construction.

Dollars increase in value and provide more taxes that improve parks, playgrounds, streets and schools.

If all purchases that could be made at home were made at home think of all the improvements that would be possible.

NURSING HOME NEWS

Hello from Colonial Nursing Home. Everything around here seems ship-shape. Sorry if things were in a mess when you were by, but spring house-keeping in August has been going on, including stippling and waxing the floors.

We were shocked and saddened to hear of the death of Dr. Thomas. We will miss him. We thank the family for the flowers they shared with us.

Mr. C. E. Birdwell brought us some peas and beans. The M. F. Jones' sent us some fresh squash, okra, tomatoes and cucumbers by Dwayne Jones. Then Dovie Jolly brought us some fresh peas, squash, grapes, and tomatoes. Some of us wonder why our clothes seem to be getting too small. Thanks to each and everyone of you.

Mr. H. A. Dial has had more visitors, including Mr. and Mrs. J. B. Fortenberry of Amberst.

Mother Reed and Mrs. Harter don't get out much any more, but their families visit them often.

Mrs. Todd continues to have visitors and some of her folks brought her some tree-ripened peaches from Oklahoma. Among those visiting her was Etta Aldridge of Clifton.

Our movie Friday was "Free from Care" filmed in Nova Scotia where all sorts of sports could be enjoyed - big fish, bear, wild fowl along with beautiful scenery.

We had several visitors Sunday. The Sweet Street Baptist Church brought our Sunday services.

One of our L. V. N., Mrs. Kajsja Milan is on a leave of absence for surgery on her hands. Lets pray they will be helped.

Mrs. Mary Woods was taken to the Lynn County Hospital for X-rays and test. We hope she will be back soon.

Hopkins County Reunion Sunday

The annual Hopkins County Reunion will be held Sunday, Aug. 13, in the Lubbock Mackenzie Park.

Each family is asked to bring a basket lunch and card table. Hopkins County Stew will be served.

Officers for this year are A. N. Crowson, president, Sam Crowson, vice-president, Margaret Bartley, secretary and Mrs. Iris Smith, program chairman.

All former residents of Hopkins County are invited to attend.

Home laundry experts say it's as inadvisable to underload as to overload an automatic washer. Before washing just a few pieces or one bulky item, add a few cotton terry bath towels as buffers to balance the load. This lets soap or detergent solution penetrate all the fabric equally to loosen and remove soil.

Livestock Inspection Reinstated... Stocks of Grain Show Increase... Wool Production Declines... Early Stalk Destruction Urged... Pecan Producers To Vote.

LIVESTOCK moving from Texas, Oklahoma, Puerto Rico and parts of Arizona, California and New Mexico must be inspected and certified free of screwworms before being moved interstate.

The regulations will be in effect through Nov. 30 of this year, and from April 15 through Nov. 30 in future years until the present screwworm infestation is overcome.

State and federal veterinarians, state and federal livestock inspectors and accredited veterinarians are authorized to make the necessary inspections, supervise pesticide applications and issue shipping certificates.

TEXAS stocks of grain in all positions as of July 1 are estimated at 190 million bushels. This compares with 141 million bushels a year ago. The largest increase is in sorghum stocks followed by wheat, corn and rye. Stocks of oats, barley and soybeans are down from a year ago.

Sorghum stocks are estimated at 129 million bushels compared with 86.9 million bushels in 1971.

Nationwide, large increases were noted in corn, sorghum grain, wheat and rye. Stocks of corn, oats, barley, and sorghum totaled 81.7 million tons, 35 percent more than 1971.

Feed grain disappearance during April-June totaled 44 million tons, 17 percent more than for the same quarter in 1971.

WOOL production in Texas for 1972 is estimated at 29,765,000 pounds, according to the Texas Crop and Livestock Reporting Service. This is down two percent from last year's production of 30,397,000 pounds.

Spring shown wool is expected to account for 83 percent of the total wool production.

Nationwide, wool production is expected to be down four percent from the 1971 production of 159,084,000 pounds.

The Texas lamb crop is now estimated at 2,302,000 head, up one percent from last year. Nationwide, the lamb crop is estimated to be down four percent from 1971.

EARLY destruction of cotton stalks in the Lower Rio Grande Valley as well as throughout all of the state is urged. Mandatory deadline is Aug. 31 in the Lower Rio Grande Valley counties of Cameron, Willacy and certain portions of Hidalgo and Starr counties under the pink bollworm act.

Early destruction of stalks will help prevent build-ups of pink bollworms and other cotton insects for the 1973 crop.

HOG CHOLERA outbreaks in Texas and throughout the nation continue to hamper efforts in the final stage of hog cholera eradication.

Fifty cases have been reported in Texas since late last year. Federal quarantines are now in effect in all of seven Texas counties-Dawson, Harris, Jim Wells, Moore, Nueces, Terry and Webb--and parts of Bexar, Mitchell and Nolan counties.

PECAN producers in Texas will vote this fall on a proposed check-off referendum being conducted by the Texas Pecan Growers Association. Proposed assessment will not exceed 50 cents per 100 pounds of pecans. Money will be used to finance a program of production, marketing and use of pecans.

Tricky statistics

Unemployment statistics are generally taken to mean that people are out of work because there are no jobs available. Yet in many parts of the country, employment is high; jobs are going begging. Mr. Danforth W. Austin, Staff Reporter of The Wall Street Journal, writes, "While the nation's unemployment hovers around 5.9 per cent of the labor force, or about five million workers, thousands of jobs are empty for lack of takers; indeed, some estimates put the total as high as a million. Some 94,000 jobs in manufacturing were open in February, nearly a third of them for more than a month. And these didn't include vacancies among such large employers as the service industry, mining and exploration concerns, and building con-

tractors." Employers as well as labor experts are puzzled by the unemployment, help wanted phenomenon. In many areas, there is a shortage of both skilled and unskilled workers. According to Mr. Austin, some authorities believe that "... welfare benefits and unemployment insurance, while preventing many of the jobless from having to perform degrading work, also dampen their enthusiasm to seek jobs beyond their own communities." There are other factors in the unemployment picture such as inadequate machinery for matching up job hunters and available jobs. Contrary to what the statistics say about unemployment, there is still evidence that the U.S. is a land of opportunity for those who are willing to work and to learn.

Field Day September 12

The Texas A & M University Agricultural Research and Extension Center north of Lubbock will host its 63rd Annual Field Day and Open House Tuesday, September 12 beginning at 1:00 p.m.

Detailed discussions will be presented at eight different locations in the field according to Dr. Jack Gipson, research scientist and Mr. Oliver Newton, agricultural meteorologist, co-chairmen of the field day.

Topics to be featured at the field stops include: drip irrigation, oilseed crops, cotton diseases, cotton varieties, narrow-row cotton, soil fertility, vegetable crops and sorghum breeding and insect control.

A shuttle service will depart from headquarters every 15 minutes, and visitors may disembark at the discussion site of their choice and then catch a subsequent shuttle when they are ready to move on. This is a new innovation and was added at the request of farmers who participated in the planning sessions of this year's event, according to Gipson and Newton.

Other topics to be featured which are of vital interest to the agricultural industry on the High Plains are weed control and weather. Special "classes" will be conducted at the headquarters area on these subjects.

Displays and exhibits will also be featured for public viewing. These will include plant diseases, soil testing, plant physiology, and a large machinery exhibit.

Everyone with an interest in agriculture in West Texas is encouraged to attend the field day and open house. According to the field chairman, it promises to be an afternoon well spent.

PECAN producers in Texas will vote this fall on a proposed check-off referendum being conducted by the Texas Pecan Growers Association. Proposed assessment will not exceed 50 cents per 100 pounds of pecans. Money will be used to finance a program of production, marketing and use of pecans.

Tricky statistics

Unemployment statistics are generally taken to mean that people are out of work because there are no jobs available. Yet in many parts of the country, employment is high; jobs are going begging. Mr. Danforth W. Austin, Staff Reporter of The Wall Street Journal, writes, "While the nation's unemployment hovers around 5.9 per cent of the labor force, or about five million workers, thousands of jobs are empty for lack of takers; indeed, some estimates put the total as high as a million. Some 94,000 jobs in manufacturing were open in February, nearly a third of them for more than a month. And these didn't include vacancies among such large employers as the service industry, mining and exploration concerns, and building con-

HOG CHOLERA outbreaks in Texas and throughout the nation continue to hamper efforts in the final stage of hog cholera eradication.

Fifty cases have been reported in Texas since late last year. Federal quarantines are now in effect in all seven Texas counties-Dawson, Harris, Jim Wells, Moore, Nueces, Terry and Webb-and parts of Bexar, Mitchell and Nolan counties.

LIVESTOCK moving from Texas, Oklahoma, Puerto Rico and parts of Arizona, California and New Mexico must be inspected and certified free of screwworm before being moved interstate.

The regulations will be in effect through Nov. 30 of this year, and from April 15 through Nov. 30 in future years until the present screwworm infestation is overcome. State and federal veterinarians, state and federal livestock inspectors and accredited veterinarians are authorized to make the necessary inspections, supervise pesticide applications and issue shipping certificates.

TEXAS stocks of grain in all positions as of July 1 are estimated at 190 million bushels. This compares with 141 million bushels a year ago.

The largest increase is in sorghum stocks followed by wheat, corn and rye. Stocks of oats, barley and soybeans are down from a year ago.

Wool production in Texas for 1972 is estimated at 29,765,000 pounds, according to the Texas Crop and Livestock Reporting Service. This is down two percent from last year's production of 30,397,000 pounds.

Spring shown wool is expected to account for 83 percent of the total wool production. Nationwide, wool production is expected to be down four percent from the 1971 production of 159,084,000 pounds. The Texas lamb crop is now estimated at 2,302,000 head, up one percent from last year. Nationwide, the lamb crop is estimated to be down four percent from 1971.

Early destruction of cotton stalks in the Lower Rio Grande Valley as well as throughout all of the state is urged. Mandatory deadline is Aug. 31 in the Lower Rio Grande Valley counties of Cameron, Willacy and certain portions of Hidalgo and Starr counties under the pink bollworm act.

Early destruction of stalks will help prevent build-ups of pink bollworms and other cotton insects for the 1973 crop.
