### Former Lubbock Mayor Seeks A Senate Station

Morris W. Turner could best be described as experienced. "Moe," as he is known to most people, has been tested in leadership qualities through both elected public office and private business. Turner intends to put this experience to work in the Texas Senate. He is a Democratic candidate who hopes to represent the 13 counties of the 28th Senatorial District. Two years' service in the office of Lubbock mayor have given Turner much of this experience. He was elected mayor in 1972, following four years on the city council. These six years of service in elected public (see Turner, page 3)

### The Spectator...

By Mary Brecheen

Years ago, a little eight-year-old girl in New City was shocked to hear from her peers that there was no Santa Claus. Upon bringing the unbelievable revelation to her father, and needing to be reassured that there was, in fact, such a person, the father "passed the buck" by telling her to write a letter to the editor of *The Sun*, and never the answer, then she could consider it

The story goes that she did, and sure enough, an answer appeared in the editorial column, and she has been quoted many times since. "Yes, Santa Claus, there is a Santa Claus..."—a masterpiece of literature, in my opinion.

This week, *The Spectator* received an anonymous letter with the plea, "I am a rural Lynn County resident who does not think it is fair that as rural residents, cannot vote for city officials. The city wants rural money in the treasury, but not our voice in electing the officials. I'd like very much to hear from you in your editorial. If you feel that I am wrong, speak your mind in the editorial. Tell me why I'm wrong. If I am open to criticism when justified, I'll be glad to forward to the editorial—*The Spectator*. I'll remain, Anonymous."

Anonymous Friend, I live, I am painfully aware of the void of knowledge and understanding of many things. However, my answer to you is that, as a matter of order, a person must vote in his political or governmental entity.

It is amusing to me that so many people in Lynn County have been, and I quote, "sad that George is retiring and I'd sure vote for him again if he were in the race." For many years, the county has been Mahon's district, but no more—and we can't vote for him, even though we'd like to, if he were going to be on the ballot. He is out of our mental or political entity—for lack of a word or explanation.

Often enough do I express my gratitude that I vote, based on nothing but my rights and duties as a citizen in a governmental entity, not determined by my color, my sex, or my own property.

I spend a great deal of time in a world of confusion, pretending to hear the words of my fathers—Thomas Jefferson, Abraham Lincoln, and Henry, etc.—if they could know that I am so concerned about the nation and the privileges which they paid a great price. Would they not be glad they had spent their lives in vain, to know that they do not care enough about the freedoms they have, to investigate a candidate and to know his intentions?

Thank you for your interest. Would that others would be enough to question.—*The Spectator*.

Farmers must have more stable markets and a fair return on their investments, or every citizen suffers. We must make the (see Stenholm, page 3)

### State Health Department Issues Dump Ultimatum To Mayor, City Council

Mayor Mel Leslie received a letter on Tuesday of this week from Texas Department of Health regarding the unauthorized solid waste disposal site north of Tahoka, 3/4 miles west of FM 400 and 1/4 miles north of the junction of FM 400 and US 87, the old dump ground.

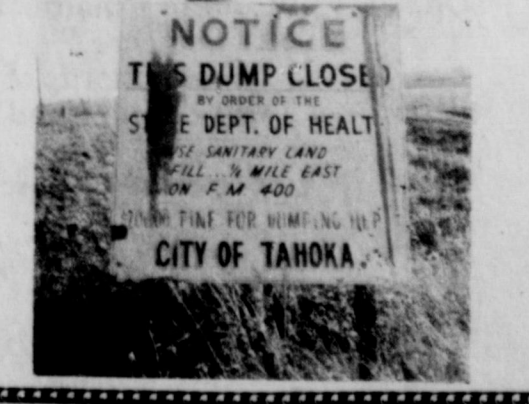

The letter stated unequivocally that the site has not been legally permitted by the State Health Department, nor is it being operated in compliance with the "Solid Waste Disposal Act" of Vernon's Civil Statutes.

Prior to May 1, the Department official said, the City of Tahoka must take whatever action is necessary to prevent solid waste, including brush and construction or demolition debris, from being deposited at this illegal site.

And by July 1, all previously deposited waste must be removed to an approved site or compacted and covered with a final cover of at least two feet of compacted earth. Also, by July 1, a written status report must be submitted to the Department of Health outlining the progress which has been made. In the event that full compliance has not been attained, the status report must include the reasons for delay and the date corrective action will be fully implemented.

Vernon's Texas Civil Statutes, Article 6674v-2, states that it is unlawful for any municipal corporation, private corporation, firm, or person to dump, deposit, or have any refuse, garbage, rubbish, or junk on or within 300 yards of any public highway or county road. Any violation of this Act, shall upon conviction, subject the offender to a fine of not less than \$50 and not more than \$400, and each day of any such violation shall be treated as a separate offense.

Both Mayor Leslie and City Administrator Ray Mason have said that violators of the above statute will be prosecuted.

**Managing money**

AUSTIN, Texas (Spl.) — Don't take out a mortgage that is more than two-and-a-half times your annual take-home pay.

That advice comes from Dr. Harold Wolf of The University of Texas Finance Department, who is the author of college and high school textbooks on money management.

Carelessness is frequently at the root of troubles with personal finances, Dr. Wolf says. Ways to improve those finances, he says, range from setting up a "loose" budget that includes an item for savings to investigating the terms of three or four places before borrowing money or buying insurance.

Appointed to co-chair the Taylor County steering committee for the "Dusty Rhodes to Congress" campaign were Claude Hicks, superintendent of the Hendrick Home for Children, and Mrs. J. E. Connally, an Abilene physician.

Rhodes said "I am proud to say that this committee represents a broad base of experience in our county, such as medical, education, business, law, insurance, agriculture, real estate, retired people, teachers, and oil. You are involved."

Said Hicks of Rhodes, "I can tell you there is not a better advocate for the rights of people anywhere! Dusty is

a fighter who doesn't like compromise. . . . In Dusty Rhodes, we have a man who is capable of national leadership, who can and will be a tremendous asset to not only the people of the 17th Congressional District, but to the entire nation as well."

Mrs. Connally stated, "The people of the 17th District are losing a faithful servant with the retirement of Congressman Omar Burleson. We have to think toward the future. We have to make sure that the most qualified candidate is elected to take Congressman Burleson's place. We need someone who will listen to, and be an advocate for the people. ## Become A Care-Corp Volunteer

BY LORAIN CROWSON  
Lynn County Community Volunteer

Thousands of people in Texas need help to make their lives brighter, more meaningful, and perhaps less lonely.

Volunteer to help them, and yourself, by joining the Care Corps. Several ladies of the First Baptist Church of Wilson volunteer several hours each month helping others. Last month, their project was making house shoes for an orphan's home. They make about 100 pair per year, and make three sizes. The house shoes are made of double knit material, buttons, and trims that are donated to them. They ask for a different project each month.

We have grocery men in our county that volunteer their time taking phone orders and delivering groceries to the shut-in and elderly people in their communities. Several young girls babysit for sick mothers, while others do

## SENTRY SAVINGS ASSOCIATION

After all, what are neighbors for?

## Washington is giving Lynn County the death sentence. Should we get a good lawyer and fight?

If you don't believe it, just look around you.

Our farmers are selling their products at 1951 prices, while their production costs have gone up 675% since then.

Housewives are being beaten to death by prices when they shop for food and clothing for their families. Nobody can believe what it costs for a bill of groceries today.

Are the merchants getting rich? Not on your life. Their profit margin, the thing that keeps them in business, is shrinking every day. All their costs are up, plus they have to wade through a deepening ocean of government red tape.

Does it sound to you like we may need some help? Does it sound like things may not be going our way? But, you say, maybe this is temporary. Maybe it is a passing thing. Maybe it will go away.

Stop dreaming. It not only is here to stay, it is going to get worse. Here's why.

The government controls our lives and our businesses. Congress runs the government. That means that congressmen in Washington control us. Now here is the sad part. Not many of those congressmen care about us. In fact, not many care about Texas—and most of those

who do care and have some influence on other congressmen are about to retire.

That's right. Omar Burleson, Bob Poage, George Mahon, Olin Teague, men who have given Texas several decades of dedicated service as Congressmen, have chosen to retire.

So, at the very time when the men and women of our county are fighting for their economic lives, at the time their future is really on trial in Washington, a new man has to be put on their case.

That new man had better be a good man. He had better be one who can go into the courtroom of Congress and plead our case well. He had better be an experienced defender who can keep our citizens from being sentenced to more inflation, more red tape, higher costs, more government control.

For the future of your family, your friends, your neighbors, don't you agree? We can have that kind of man in Washington fighting for us. Dusty Rhodes is a candidate for Congressman from the 17th District, of which our county is a part. Dusty is a lawyer. He is a trial lawyer—a good one.

That is why we need him in Washington. That is not the only reason. He is also a

small businessman and he knows the kind of struggle they are having to make enough profit to stay in business.

He farms a little place and runs a few cows. You don't have to explain to him about the farm situation—he knows first-hand.

Dusty has a wife and four children. He can tell you about inflation and how the costs of providing for a family have skyrocketed.

He knows all that, but he also knows more. He knows how to defend someone. He knows what to do when the cards are stacked against him. He knows how to change people's minds. He knows how to handle a trial... and the people of our county are on trial. A trial for their livelihoods.

It is up to you. You can sit back and do nothing.

Or you can do something about it. You can send Dusty Rhodes to Washington to defend you.

A lot of your friends and neighbors have already decided to vote for a good defense. Won't you join them?

Miss Corley won first in the Medicine and Health Division and also won the Outstanding Biology Award. Her exhibit was entitled "The Effects of Smoking on Blood Clotting," and her findings were that cigarette smoking does affect the entire circulatory system. According to her, the results of the experiment could be useful in the study of cancer, hypertension, and various heart and blood diseases.

Brookshire's exhibit was "The Advantage of an Impulse Turbine Over A Reaction Turbine In A Low-Volume Dam." His conclusion was that in a low-volume dam, located in a very mountainous region, an impulse turbine is much more efficient than a reaction turbine for generating electricity. He says that civil engineers can use this principle to determine the easiest and most efficient turbine to be used in various situations. Modern physicists test the best types of turbines to be used in each situation.

He won third in the Engineering Division, and the Superior Award from the Navy, plus a chance for an international cruise.

Faculty sponsor, Mrs. Rubeth Griffing, said the Naval Award usually went to the overall winner of the Fair; therefore, it was a special honor for Brookshire to receive it. He is the son of Mr. and Mrs. Charles Brookshire.

Simpson's project was a Van de Graff Electrostatic Generator, the purpose of which was to see how readily static electricity could be produced from friction alone and what things could be done with this static electricity.

The son of Mr. and Mrs. Austin Simpson, he won second place in the Physics

Division, plus a certificate from the Army for the Outstanding Exhibit.

Young Jennings, son of Mr. and Mrs. Phil Jennings, won second in the Physical Science Division, in addition to certificates from the

Department of Energy and the Army, for his exhibit of a small-scale solar heater. His reason for doing the project, he said, is because fossil fuels are getting harder to obtain and the price of them is getting higher and higher. His hypothesis, which he

proved, is that a solar heater with a 12' by 18' solar panel and a 300-gallon rock storage would easily heat an average-size home.

Miss Draper, daughter of Mr. and Mrs. Robert Draper, and Williams, son of Mr. and Mrs. Jimmy

Williams, won third-place ribbons, for a telegraph set and a volcanic study, respectively.

The purpose for the project on the telegraph, so Miss Draper said, was to aid people in understanding the Morse Code. "I think it might be a good idea for people to learn the Code in case of distress," she said.

Williams depicted, in his model, the workings of a volcano. He showed the cone, base, and the vent, and the purpose of each. "I learned quite a bit about volcanoes through my study," he said.

Mrs. Rubeth Griffing is sponsor of the Science Club at Tahoka High, and has Miss Corley and Brookshire in a physics class.

Simpson is a student of Mrs. Hedy Bufe, in 9th-grade Physical Science.

The three junior high students are in Mrs. Pam Vaughan's Earth Science class.

# UIL One-Act Play Serves Many Purposes...For School And Students

TAYLOR applies make-up to Donnie Clary, prior to a dressed-up performance of the drama. Clary plays the part of a young man in the drama.

JODIE BRECHEEN, who plays the part of Mother Shipton in the play, sits while the director, Mrs. Leah Taylor, applies make-up. Wynne Brookshire is in the background.

FACULTY DIRECTOR CRAIG GARNER, right, instructs Gary White on techniques to use in the drama presentation.

MAKE-UP TECHNIQUES play a big part in One-Act Play competition. Wynne Brookshire, standing, is "made up" effectively to play the part of an "old, grizzled man." Bryan Moore, seated, also is "made up" to look like an older man.

THOMAS, standing, and Jona Valentine realize the importance of acting in a One-Act Play contest. Miss Thomas is The Duchess, and Valentine is Finny Woods, in Tahoka's presentation.

According to the Constitution and Contest Rules of the University Interscholastic League for 1977-78, the aims of the One-Act Play Contest are: (a) to satisfy the creative, artistic spirit and friendly rivalry among schools, emphasizing high-quality performance in this type of art; (b) to foster the development of good acting, directing, and good stage sets; (c) to promote the use of that art form most applicable to adult life; (d) to learn to lose or win graciously; (e) to bring in good sportsmanship; (f) to improve future acting; and (g) to raise the number of schools which have adopted acting as an academic activity in school curricula.

Faculty members, have given the greatest portion of their time the past two months to satisfying the aforementioned goals, and today at 4:15, at Frenship, they will unfold their drama before a judge—and he in turn will give the verdict. Strict rules must be followed as to costuming, stage sets, play selection, faculty directors, etc., and the play must not exceed forty minutes, from beginning to end. The Tahoka selection, *The Outcasts of Poker Flat*, was adapted from the short story by Bret Harte, and has its setting in a cabin in the Sierra Nevada Mountains of California, in 1850. Faculty directors are Mrs. Leah Taylor and Craig Garner. Members of the cast are Gary White, Wynne Brookshire, Donnie Clary, Bryan Moore, JoEllen Brecheen, Jona Valentine, and Inola Thomas.

## STATE CAPITAL Highlights AND Sidelights

by Lyndell Williams TEXAS PRESS ASSOCIATION

AUSTIN — Texas Public Utility Commission will begin hearings May 22 on Southwestern Bell Telephone Company's request for a \$214.3 million rate increase. PUC, at a pre-trial hearing, directed staff members to submit their conclusions on Bell's financial needs by May 15. Attorney General John Hill and the Texas Municipal League were given authority to participate in the case as opponents of the proposed rate hike.

Meanwhile, George Cowden, PUC chairman, told Bell to provide information desired by the opposition. Bell last month filed its new rate request. In September 1976, the company asked for a \$298.3 million increase, but PUC went along with only \$57.8 million, and courts consistently upheld the finding. The increase would mean a 75 cents to \$1.20 advance in residential rates, varying by size of the city served. It also would add on gross receipts tax levies ranging from two to four percent in most cities. Business phone rates would go up from \$1.60 a month to \$3.80, and installation charges would advance substantially.

Bell claims it cannot cope with demands for expanded service and make a fair rate of profit on its investment without substantial rate relief. Foes Give Up An Austin district judge refused to issue an injunction to block a May 6 Democratic primary referendum vote on whether the 1979 legislature should approve increases in interest rates for loans under \$5,000. Attorneys for loan companies which attempted to block the referendum indicated they would throw in the towel after the ruling and not appeal as they originally planned. District Judge Herman Jones said the State Democratic Executive Committee had used its discretion in electing to put the issue on the party ballot. "I do not find a basis for a court injecting itself into it," Jones stated. The loan companies maintained voters almost certainly will vote against raising interest, and that the referendum, therefore, will prejudice the legislature against their bill to increase rates next year.

Probe Launched The House General Investigating Committee has launched a new inquiry into operations of the State Insurance Board. Rep. DeWitt Hale of Corpus Christi, the committee chairman, said a Travis County grand jury recommended the investigation. "We are interested in a lot of things, not criminal—but perhaps poor administration of a state agency," said Hale. The Travis County grand jury indicted former Insurance Commissioner Joe Hawkins last June for lying about rides on an insurance company airplane. Hawkins in February pleaded no-contest to a lesser misdemeanor charge that he accepted the plane ride illegally, and got a one-year probated sentence

and \$2,000 fine. The House committee went into closed session to hear complaints by former insurance agents from Houston. Hale also invited two members of the grand jury that began the insurance probe to brief the committee.

Courts Speak The U.S. Supreme Court asked for new arguments in a case involving diversion of natural gas now produced and sold in Texas to the interstate market. The state seeks to overturn a Federal Power Commission ruling holding California should keep getting gas from a Gulf Oil lease in Crane and Ector counties of West Texas, though leases expired in 1975.

When the leases expired, the company holding mineral rights to the property attempted to sell the gas to a Houston industrial supplier, but FPC blocked the sale.

Audit Scores The troubled Governor's Office of Migrant Affairs was rapped by State Auditor George McNeil for its handling of federal manpower training funds. McNeil also found the agency to be understaffed. Gov. Briscoe said many of the shortcomings pointed up by the audit have been corrected.

McNeil said there may be a need to strengthen technical assistance, monitoring and evaluation to prevent future irregularities in spending and performances at sub-contractor levels of training programs. Approval Delayed Gov. Briscoe and two other high officials delayed approval of purchase of an \$8 million, 6,741-acre tract of land in the Rio Grande Valley for a new state prison. Briscoe, Land Commissioner Bob Armstrong and James Windham, chairman of the Texas Department of

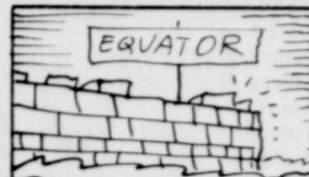

Corrections, pointed to differences between appraisals of the land value and purchase price and raised legal questions.

The Department of Corrections wants to buy the land from Big Five Farms, a five-man partnership, with an option to purchase twice as much next year for \$6 million more. Briscoe noted State Land Office and Texas A&M appraisals of the property at about \$6.8 million. The governor also pointed out the legislature appropriated money for a "West Texas" prison site, and suggested an attorney general's opinion on legality of the purchase.

Short Snorts Texas Commissioner of Higher Education Kenneth Ashworth criticized methods of distributing property tax funds for college campus construction as "archaic." David A. Witts, chairman of Texas Aeronautics Commission, blasted a congressional sub-committee's vote to outlaw state regulation of the commuter airline industry within state borders and

of intrastate airlines certified by Civil Aeronautics Board as absurd and destructive. Deputy county clerks are covered by the county civil service act, according to a new attorney general's opinion.

Agriculture Commissioner Reagan Brown warned of bogus "landscape experts" and "fly-by-night" plant salesmen operating in the state with arrival of spring. The governor asked the U.S. Department of Agriculture to declare Zapata County a disaster area to assist farmers and ranchers with emergency loans to cover losses caused by early-year drought.

It is believed that there is enough stone in the Great Wall of China to build an eight-foot wall around the earth at the equator!

More-than-routine business is efficiently handled by the executive vice-president of the firm, Mrs. Barbara Jaquess, who also is the teacher of a 30-day course of study in Vocational Office Education known as "Lester Hill Office Simulation."

Once the employees are hired, they establish office files and go through orientation sessions that familiarize them with their specific job duties and the duties of the entire department.

The "play office" or simulation revolves around the operation of a branch office of the Lester Hill Corporation, a national distributor of hotel and motel supplies and equipment.

Then the actual day-to-day office work begins. As far as the classroom situation will permit, the work flow parallels that of an actual business office and begins when the office receives its first orders from customers.

At the start of the course of study, students in VOE apply for jobs at Lester Hill's

## Sancap will control the tough broadleaf weeds that escape your preplant.

Preplant herbicides are great for controlling grasses. But the fact is, they just can't control the stubborn broadleaf weeds that are breaking through cotton here in the South High Plains. So, if you grow cotton on sandy soils, spray an overlay of Sancap® herbicide at planting. Because Sancap is strong on broadleaf weeds. Strong enough to stop the tough ones that escape your preplant. Help prevent poisoning accidents--practice a few household safety rules.

- \*Clean the medicine cabinet periodically, dispose of un-needed medicines when the illness which they were prescribed is over.
- \*Use safety packaging properly--close the container securely after use.
- \*Keep all household products and medicines out of children's reach, and, preferably, lock them up when not in use. When these products are in use, always keep them in sight--even if it involves taking them along when answering the telephone or doorbell.
- \*Store internal medicines separately from other household products.
- \*Keep items in their original containers--never in cups or soft drink bottles.
- \*Properly label all products, and read the label before using.
- \*When giving or taking medicines, always do so with the light on.
- \*Avoid taking medicines in front of children--children tend to imitate adults.

### Gardening Great For 4-H'ers

Spring is almost here, and that means gardening time. Gardening can be a wholesome and worthwhile learning experience that can result in lots of fresh, mouth-watering vegetables such as cucumbers, tomatoes, green beans, watermelons, radishes, onions, and lettuce.

It's enough to make anyone, especially a youngster, jump with joy. And youngsters can take an active part in growing these tasty treats through a 4-H gardening project.

Gardening is a good way for 4-H'ers to help their families beat the high cost of living and provide good home-grown meals. Furthermore, a gardening project helps youth learn responsibility and about such things as seed germination, plant growth and development, pollination and flowering. Young people can also learn the basics of insect and disease control and ferti-

tion principles. A gardening project can range from a window box or pots and cans to a full-fledged backyard plot.

Plants grown in containers will have to be watered and fertilized more often than those grown in the ground. Soil should be a mix of organic matter, peat moss, and sand.

Vegetables can also be grown around the edges of flower beds. A border of lettuce, onions, carrots, or parsley is attractive as well as edible. Plant tomatoes, peppers, or eggplants with taller flowers and put beans and cucumbers against a fence or screen.

Whatever the size of the garden and the types of crops grown, a 4-H gardening project can be a most rewarding experience for youth.

\*The above information comes from Charles Gardner, Extension area 4-H and youth specialist, Overton.

### PCA Directors Attend Meet In San Antonio

Financing and the agricultural world get attention when Lubbock Production Credit Association directors go to San Antonio April 6-8, to be among 500 farmer-rancher stockholders and guests attending the 22nd annual meeting of the Federal Intermediate Credit Bank of Houston.

Lubbock PCA directors attending include Cleve Littlepage, chairman, of Tahoka; Dewey E. Wells, Jr., vice-chairman, Ralls; T. A. Elmore, Tokio; Dalton Redman, Morton; and Keith Young, Seagraves. PCA officers accompanying them include Alton Strickland, president, and John R. Ball, first vice-president.

According to Strickland, those attending represent 30 PCAs and 6 agricultural credit corporations in Texas which obtain their loan funds from the FICB of Houston. These organizations last year loaned nearly \$1.6 billion to Texas farmers and ranchers. PCAs of Texas and the Houston bank are part of the nationwide Farm Credit System which provided nearly \$40 billion last year to the nation's food and fiber producers.

Lubbock PCA makes agricultural loans to producers in Cochran, Crosby, Gaines, Garza, Hockley, Lubbock, Lynn, Terry, and Yoakum Counties.

### Mouser Leaves Lynn ASCS

Delbert Mouser, head clerk at the Lynn County ASCS office in Tahoka, recently resigned his position and is being succeeded by Kent Shepherd, who has been farming near here until this year.

Mouser is moving to a farm near Spade, Lamb County, where his wife was appointed postmistress several months ago. He will hold a similar position in Littlefield, with the Lamb County ASCS.

Tommy J. Lawson, county executive director, resigned a month ago to become manager of the Producers Co-op Gin at Grassland. Sharon Smith is acting as manager of the office until a replacement for Lawson can be found.

### City Slates Public Hearing

According to Ray Mason, City Administrator, the City of Tahoka will have a public hearing on Monday night, April 10, and again on April 17, at 7 o'clock in the Community Center, to discuss the possibilities of a community block grant.

All citizens are invited to attend the hearings.

## Dusty Rhodes Says Farmers Imposed Upon By Government

Congressional candidate A. L. (Dusty) Rhodes has a number of ideas that he would like to see implemented when he is elected to Congress, which would be of benefit to the nation's farmers. "With the possible exception of the elderly on fixed incomes," stated the candidate recently, "the farmer is probably the segment of our society hardest hit by the inflationary spiral. Add to that the fact that the farmer, as an independent businessman, isn't even allowed to compete within the free enterprise system because of price controls set on his crops by the federal government, it's easy to see why agriculture is in the disastrous situation it's in."

According to the Abilene businessman and attorney, there are a number of actions that can be taken immediately to help ease the situation presently faced by farmers. "I have contacted my congressman and my senators with suggestions about what can be done on the immediate scene. I have urged them to pass a joint resolution calling to account the U.S. Department of Agriculture, and our U.S. trade representative, and demand to know why we have not more forcefully worked to present and sell our products on the foreign market. The Congress has the power of international political persuasion, and I think this power should be used to help improve the agricultural scene domestically."

The candidate continued, "I don't think our farmers want a handout in the form of another government subsidy. They are already over-burdened with government interference as it is. I am convinced, as expressed to me by those actively involved in agriculture, that the farmer merely wants to be left alone to compete on the world market within the free enterprise system, without having his prices set

by Uncle Sam. In other words, the farmer is tired of being used as a political football, and I'm prepared to use every means at my disposal, and fight with everything that is in me to be a vocal advocate to this end for the farmer. The farmers, as well as the rest of the residents of the 17th District, are looking to their next representative to be a man who can obtain results. I think this will be measured within the farming community by whether or not our goal of 100% parity in the marketplace is achieved. The voters will have to closely examine the qualifications of the various candidates in this race, and then decide who can most effectively plead their case in the Halls of Congress, and act as a persuasive influence to bring our congressmen around to our way of thinking."

Rhodes is considered to be the front-runner in the race to replace retiring U.S. Representative Omar Burleson. Besides Rhodes, six other Democrats and one Republican have announced their candidacy.

As recipients of the 1978 Gerald W. Thomas Outstanding Agriculturalist Award, Smith was recognized as a producer, J. Owen Gilbreath, Lubbock, as an agri-businessman, and Elmer B. Hudspeth, Lubbock, as educator-communicator.

He has been designated a distinguished alumnus of Texas Tech University and is a former regent of the institution. can Lung Association of Texas.

Smith also has served as a director for the National Council of Farm Cooperatives, the Texas Federation of Cooperatives, the National Cotton Council, and the West Texas Savings Association.

He also has served as a member of the 10th District Farm Credit Board, the National Council of Farmer Cooperatives, the National Cotton and Cottonseed Research Advisory Committee of the U.S. Department of Agriculture, the National Agriculture Advisory Commission, and the National Cotton Advisory Committee.

In 1961 he was named Cooperator of the Year by the Texas Federation of Cooperatives. The 4-H has presented Smith the Silver Spur Award and the Future Farmers of Texas designated him an honorary Lone Star Farmer.

THURSDAY, APRIL 6, 1978

### LEGAL NOTICE

General Telephone Company of the Southwest has filed tariffs with the Public Utility Commission of Texas to implement the Federal Communications Commission's telephone equipment registration program (FCC Docket 19528). The tariffs have an effective date of April 15, 1978. The proposed changes will reduce rates for extension telephones and 25 foot long cords; will restructure one-time charges for service connection, moves and changes, increasing some and reducing others; and will offer reduced monthly rates for one-party business and residence customers who provide their own primary telephone instrument. The proposed changes in rates, with some increasing and others decreasing, will reduce General's Texas revenues from its Texas operations by \$2,565.00.
