

CATTLE.

Stock sanitary commission have quarantined California cattle, except where they are for immediate slaughter.

Government inspectors at slaughterhouses of the big cattle buyers have found the meat of all sorts that have lives inside with hair on.

The Texas cattlemen who shipped and drove their herds to the Indian Territory for the purpose of grazing are now shipping back to Texas, sadder but wiser men.

It is gathered from talks with buyers of marketable cattle that they are looking to Texas for the major part of their supply for the coming year.

Feeding cattle, says the National Stockman, owing to the rush of half-fat stock to market on account of the drought and the light demand for the feed lots, are at present selling at quite reasonable figures.

Men who have been in the cattle business for years and who have watched the markets closely during that time, inform the Amarillo North-west that the prospects for high prices for Texas fat cattle this winter were never better.

The conditions spoken of in the following excerpt from the National Stockman do not apply to Texas, but the advice given is fine for cattlemen everywhere.

The following item from the Deming, N. M. Headlight is of grave interest to Texas cattlemen.

American capitalists turned to Mexico as the Mecca of the cattle raiser, and bought up and leased large tracts of land, which they stocked with cattle.

Now that the duty on Mexican cattle has been reduced to 20 per cent ad valorem and Texas is long on grass and short on cattle, an unusual heavy importation of their cattle from Mexico may be confidently expected.

SHEEP AND WOOL.

A dead cur kills no sheep. There is no mutation in wrinkles.

Never let your salt box nor your fresh water tank in the sheep pasture get empty.

When the farmer's purse is empty in the spring his wool money comes timely.

The sheep comes the nearest of any to being the general-purpose animal on the farm.

When breeding for mutton aim to have it clothe with a heavy fleece of desirable wool.

The consumption of mutton in the large cities is said to have increased a hundred per cent in fifteen years.

When protectionist wool-growers contend that wool would be below its foreign price it is due to expected free wool, they overdo their clammy howling; it is very fatiguing.

The July report of the Department of Agriculture shows a variation in the average weight of the fleece in different states this year ranging from 25 pounds in Alabama to 75 pounds in South Dakota.

The Boston Herald recently reported the sale of 100,000 pounds of Michigan X at 17 cents, which was a record for the wool of the state.

The average grower makes a great mistake if he spends more than one Saturday afternoon at what manufacturers call a sheep show.

Never has so much woolen ignorance been displayed about wool tariff, wool and wool growing in foreign countries as during the past year.

Some brilliant Australian wool sought to test the credulity of a lot of wool-growers in the United States.

The American Sheep Breeder thinks that a secondary product like wool, milk, or fat, will always be a by-product.

Prof. J. A. Craig of Wisconsin gives some valuable pointers in the following article which are helpful to the novice or inexperienced sheep raiser.

The "Streets of Cairo," "Old Vienna," "Gothic Palace," "Hanging Gardens," "Porphyry Wheel," will be faithfully portrayed.

The Royal Highness, the mighty Velled Prophet and retinue, will enter the city of Cairo on the evening of October 2 and parade through the principal thoroughfares of old Cairo.

POULTRY.

A hen without the attentions of the male bird will always lay better, and her eggs will always keep longer, says a writer.

If one plans he should reap. Hundreds of poultry breeders have spent the past five or six months attending to breeding, feeding and raising of young crops of fowl with the expectation of realizing a fair profit from them.

HOUSEHOLD.

SOME REASONS WHY I WANT TO VOTE, AND WHY I WANT RIGHTS.

I see many articles in the papers of late in regard to woman's rights, and as I am a woman's rights woman, I want something to say myself.

You say, "Well, if we are such good Christians, why don't we pray for our husbands, sons and brothers?" Yes, we do pray until we are hoarse and exhausted, but God says: "Those who are praying must help themselves," so you see he means for us to get out and work, and work we are going to do, and I'm not ashamed to say so.

When I hear a woman say, "Oh, I wouldn't vote, I don't want to vote," do you know I pity her from the bottom of my heart. I think they must be weak under the name of womanhood, for a woman can't mix in politics and attend to her home duties.

Another reason why I want women to have rights is that when she finds her husband a poor fellow who has been led into sin by some "dude," and if he should come along, why you would smile and bow, as if you thought he was the purest thing on earth.

Will you please to look at England. I think she is far ahead of this country in management, and why is it ruled by a woman? A woman course, and it is strange that the women purify the home so thoroughly and well, and yet not be able to purify the ballot?

Why is it a woman who has sense enough to raise a family of boys up to voting age has not sense enough to vote? How many young men know more at 21 than their mothers, how better to vote for the good of themselves or their country?

Leaving you to dream on woman's rights. Adios. MAID S.

Editor Journal: Cottonwood, Callahan Co., Tex., Sept. 17.—I enjoyed reading Mrs. Emma George's letter very much. I hope that the ladies who are interested in our valuable paper, and that should include every woman farmer, will take her advice and write more for their page.

George's description of her trip to the Double mountains with delight. I spent about three years of my life around Double mountains, and her letter brought to my mind many sweet memories, and also many sad ones, too, of the past. Indeed, it is worth climbing to the top of the mountain upon which she went to behold the picturesqueness which is ready to present itself to the eye of one who has reached the summit.

The cotton of this section is opening fast and our farmers seem to be keeping right up with it, judging from the way the ginnings are being rushed. We have one shuck at Cottonwood, running with a capacity of eleven bales per day, which will soon increase its capacity to eighteen bales per day, and in a few days we will have a second one ready for work with a capacity of about ten or twelve bales per day, and they will both very likely be kept busy for about a month and a half, as the ginning for a large district is done here. In fact, Cottonwood is the best location for a first-class ginning outfit, that I know of in West Texas. The people of Cottonwood would heartily welcome any man who would come

here and put up a first-class outfit, because both outfits that we have are unprepared to handle the large amount of cotton that is to be handled here, even when we have our smallest crops.

Mr. Hul Ross, one of Baird's wide-awake stockmen, was by the section of the country last week buying cattle. Mr. Jack Clifford, near Putnam, bought one of the most difficult of the few days ago, amounting to about fifty head, at about \$7.60 per head.

Mr. William Morris, the post, says the woman's special work—housekeeping—is one of the most difficult and important branches of study. People lift their eyebrows over women mastering the high mathematics. Why, it is infinitely more difficult to learn the details of good housekeeping.

A very attractive bodice for evening or theater wear is made of Chinese-grown silk, and tasteful garnishes with a deep cream guipure lace. The lace forms a deep dirndl, from which proceed three bands, two of which pass over the shoulders, and a third stays at the neck at front and back; the silk is gathered between the bands.

There will be no decided change in the fashions for autumn, and the only really new thing is the dress of a different material from the bodice, while sometimes the overdress and bodice need both alone and combined with each other.

Blue is going to be the popular color for the coming winter, especially in the fashionable color and "blue" shades. Brown will appear in every possible shade, and black will be in vogue, used both alone and combined with all the other colors.

In the dress materials for fall, which are being shown in this country, the most noticeable and figured effects are the hosiery cloths and some cheviot tweeds in brown and gray colors for tailor-made gowns, but the popularity of this style of gown is likely to decrease.

Waistcoats will be less popular and those worn must be of the choicest material of most correct fit. White and drab corduroy with pearl or white buttons, cut high and with a wide front, is the correct style for the correct waistcoat for this season.

The Good Cook. A delicious filling for layer cakes is made of fine ripe cherries, crushed and sweetened, sprinkled with lemon juice and placed between the cakes. It must be made in a tin before being fried; it will not absorb so much grease and it will have a delicious crust that cannot be obtained in any other way.

Tomato jam—Stew peeled ripe tomatoes until thick with two-thirds their weight of white sugar. When half done, flavor with sliced lemons, from which all seeds have been removed. Remove the slices of lemon when the jam is placed in a jar or glasses.

MARKETS.

FORT WORTH LIVE STOCK MARKET REPORTS.

Wednesday, Sept. 19.—There has been during the past week a very light run of cattle, far less than the demand. The competitive cattle buyer who spoke of last week is here and ready to buy anything offered; and the manager of the stock yards says that he feels now that he can ask all the people he has advised to hold back their beef for a while to come along now. There was a fair run of hogs this week, but not as many as wanted. Those offered sold at good figures and shippers generally seemed pleased.

MARKET QUOTATIONS.

Table with 2 columns: Item (e.g., Beef steers, Fat cows, Canners) and Price (e.g., \$25.00, \$24.00, \$24.00).

This shows a slump in the hog market over last week as some hogs brought as high as \$5.85 last week; prospects, however, are encouraging all around.

W. L. Fuller, I. N. Stuart, J. C. Smith, J. D. Farmer, C. R. Harris, W. J. Fitzler, J. W. Hollingsworth, G. S. Chapin, L. W. Gray, J. N. Haley and T. E. Lamb were the Tarrant county people in with hogs and cattle through the week.

Cattis & Hall, local feeders, had cattle on the market. J. H. Cowan, Grapevine; E. B. Carver, Henrietta; S. P. Stone, Hallsburg; J. S. Stinson, Alvarado; H. H. Riddle, Alvarado; I. B. Edwards, Fate; J. W. Pool, Nevada; B. Hackett, Boyd, were all on this week's market with a car or more of hogs and cattle.

The packing house located on this market has notified the stock yards people that they are on the supply of beef steers, fat cows and killers generally, as their increased meat trade will require them to kill more cattle to supply the demand.

The above, coupled with the fact that the competitive buyer is now located here and ready to buy any cattle offered, should make brisk trading, which the stock yards people say they hope will be appreciated.

The following bulletin is from J. F. Butz & Co., live stock and commission merchants, Union stock yards, Fort Worth: Hogs—Market 15¢ to 25¢ lower. Top hogs, \$5.50 to \$5.75; mixed packers, \$5.25 to \$5.40; demand good at the decline.

Table with 4 columns: Hogs, Average, Dock, Sold. (e.g., 79, 211, .., \$5.45).

realize anything on it. Hence they are all after the cattle and prices have advanced 15 to 20¢ on all grades. Current cattle values are about as follows: Prime steers, 1400 to 1400 lbs., \$3.00 to \$3.25; Choice steers, 1200 to 1400 lbs., 4.75 to 5.00; Light to good steers, 1000 to 1200 lbs., 4.00 to 4.50; Poor to fair steers, 800 to 1000 lbs., 3.50 to 4.00; Western steers, 2.75 to 4.00; Texas steers, 2.00 to 3.00; Poor to medium cows, 1.00 to 2.00; Fair to choice feeders, 2.00 to 3.00; Poor to medium stockers, 2.00 to 3.00; Bulk cows and stockers, 1.25 to 2.50; Veal calves, 1.25 to 4.00.

There has been no material change in the sheep market this week. Receipts have been somewhat more liberal than usual, but the offerings have been readily absorbed at fully steady prices. There is also a very fair inquiry for cattle, but rather low figures. Choice fat wethers would do well readily up to \$3.00, and good to choice lambs are selling at from \$2.00 to \$4.00.

LIVE STOCK MARKETS.

Chicago Live Stock.

Chicago, Sept. 19.—The cattle market was without specially new features: good to prime steers were wanted and were promptly taken at steady prices. There was a fair sprinkling of cattle, including that described, and there were a number of sales at better than \$8. For common to fair cattle, the market was slow with a weaker tendency. The supply of the latter was large, and sellers found it necessary to make some concessions in order to unload. Sales of natives were on a basis of \$1.25 to \$1.75, with most of the sales at \$1.75 to \$2.75 for cows, heifers and bulls and \$4.75 to \$5.75 for the popular range and stocking steers. There were about 1000 of the former and 1000 of the latter, and quotations were \$1.15 to \$1.75 for cows, heifers and bulls, and \$4.75 to \$5.75 for the popular range and stocking steers.

At the opening of the hog market there was a fair amount of business, and good to prime hogs of all weights. Indeed, the first sales showed an advance of 50¢ to \$1.50, having been quoted at \$1.00 to \$1.50 for the start, and before 10 o'clock the advance of 50¢ to \$1.50 had been lost. The supply was moderate and buyers did not seem inclined to do much at the ruling prices, and not all the offerings were taken. Sales were at \$5.50 for poor to extra, \$6.00 to \$6.50 for good to choice, and \$6.50 to \$7.50 for the quality being very common. Receipts were estimated at 22,000, making 60,000 for the last three days, against 62,000 for the same time last week and 60,000 a year ago.

Higher prices were paid today for both sheep and lambs. The supply was moderate and the demand for receipts, and prices paid or offered for good to choice sheep and lambs. The former were quoted at \$1.00 to \$1.50 for poor to choice, and \$1.50 to \$2.00 for the quality being very common. Receipts were estimated at 22,000, making 60,000 for the last three days, against 62,000 for the same time last week and 60,000 a year ago.

The supply of the light sort of cattle does not seem to reach the market. There is a demand for fat cows and beef steers daily in excess of the receipts, and prices paid or offered for good to choice cattle should encourage the shipping of some good stuff. There has been quite a decline in the hog market, but everything sold readily and at a profit.

crop, making the yield of that country 33,000,000 bushels, or 100,000 larger than last year. Outside orders failed to materialize in sufficient quantity to absorb offerings, and a fair 15 to 20¢ price for December bushel, remaining around 50¢ until the last hour. Receipts at Chicago, Minneapolis and Duluth amounted to 867 cars, while primary arrivals aggregated 1,000,000 bushels. Exports were fair at about 500,000 wheat and flour. This latter item, however, failed to serve as a lever, because the market above the bearish feeling, which was gradually growing more noticeable, and when Bradstreet's finally came out, making an increase in the world's visible supply of 1,532,000 bushels, and an increase East and West of the Rockies of 2,200,000, holders became discouraged. Early buyers and scalpers became sellers, elevator people did likewise.

Corn seemed too heavy under its own weight to react under all of which the market gave way, scoring a decline of 5-8¢ more, or a net decline for the session of 1-1 1/2¢ to 1-2¢ per bushel. Receipts, closing at about the lowest point.

Under the influence of light receipts (201 cars) corn was strongest, the opening being 1-1 1/2¢ to 1-2¢. This slight strength, however, did not appear attractive enough for outsiders to buy on and local professionals selling orders to absorb their high priced offerings began to offer the market down among themselves, and the result was a net decline for the day of 1-1 1/2¢ to 1-2¢.

Bradstreet made an increase east and west of the Rockies of 345,000 bushels. Receipts for tomorrow are estimated at 370 cars, or 1,182,000 bushels, should materially slacken. It looks as though holders of high-priced corn may begin to liquidate in a most depressing way. The market is not always selling who have hitherto come to the support of the market on any down turn, do not lend their support in the future.

On a very bearish Iowa state crop report, making the oat crop of that state 120,000,000 bushels, against 95,000,000 in 1932 and 100,000,000 in 1931, the oat market was freely offered from the start, and closed about 5-8¢ lower than the opening.

The market opened firm at top prices for the day, but closed decidedly weak and lower. A few buying orders were the cause of this early strength, but there was too much spot and futures buying and until the latterly became a good buyer of January lard, prices looked very weak.

This buying proved a steady influence for a short time, but on the later slump in grain hog products went with it and at the close the situation looked discouraging for holders.

Receipts of hogs, 21,000; market 5¢ up. Estimated for tomorrow, 20,000; cattle, 19,000. Market 5¢ off.

COTTON MARKETS. Fort Worth Cotton Letter. The New York cotton market opened at an advance of 2 to 3 points and was firm during the first hour's session, selling during that time at 6 points advance over last night's firm price.

This was due mainly to buying by shorts, who, at these low prices, are not disposed to hold over for large profits, preferring small profits but always selling on any reaction. There was also a noticeable demand for cotton among investors, and with a better demand from spinners, who took 187 bales today, against 40 on yesterday. These influences had a stimulating effect on values, but later on the day the cotton market was again depressed by reports from the South that the cotton crop was better than expected.

During the last hour of the session the market became very weak on a further decline of 1-1/2 points in the spot and heavy selling by a prominent New York operator, and the market closed steady at a decline from the highest point of the day of 19 points, or from 4 to 5 points below that of last night. Sales, 330,000. New York spots were quiet at 6 3/16, with spot sales amounting to 4500 bales, of which 3300 were to arrive. Port receipts were large, but not counted as extraordinary, being 22,147 against 15,319 same day last year. Houston receipts continue liberal, at 755, against 4438 last year.

SLADE ON PICNICS.

And Politics—He Reports the Keller Picnic Too Previously. While there's brush and girls there will be picnics. Moses reported the first picnic of which we have any account, and tells how that eve, then a giddy girl dressed so as to display her charms to the best possible advantage, and tempted Adam into eating the apple intended for other uses.

NEWS AND NOTES

Nearly all of the Texas public schools opened this week. A pneumatic saddle is another one of the new things for race horses. Governor Hogg delivered the opening speech at the Belton fair on Tuesday.

The next national irrigation convention will be held at Albuquerque, N. M. Levi P. Morton secured the Republican nomination for governor of New York. The highest recorded price paid for a horse is \$150,000; for a cow, \$30,000; for a ram, \$8,000.

John Morrow of Dallas stabbed James O'Neal to death on the streets of that city Sunday night. He says that O'Neal was unduly intimate with his wife. After the expenditure of columns of ink the much looked for fight between Corbett and Jackson is off. It is not likely that these two will ever fight.

The grand jury of McLennan county now in session is investigating an alleged case of embezzlement. The exports of American cattle to France have been about 1,000 weekly, and the price has ranged for the past month from \$12.50 to \$14.50 per hundred, dressed weight.

The Bureau of American Republics reports that the exportation of wheat from Argentina in the past four months was 782,689 tons, say 26,000,000 bushels. This is a very large increase over previous exports.

"THE STOCK JOURNAL" Machine, which is now in the hands of the manufacturer, is being built for this purpose, and our object in offering our readers this machine is to save them money and to increase the circulation of the paper.

EVERY MACHINE IS GUARANTEED FOR FIVE YEARS.

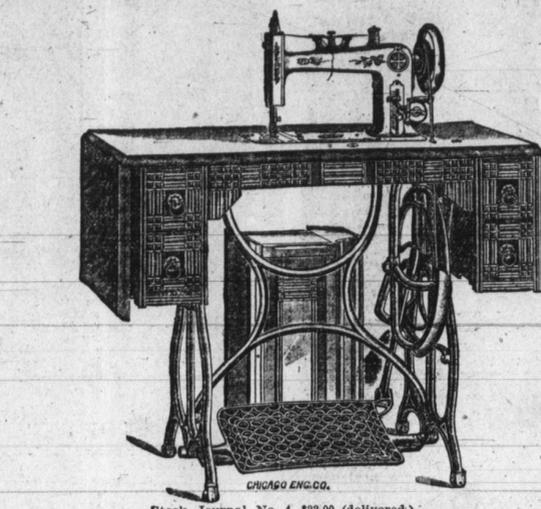

If after fifteen days trial it is not found satisfactory it may be returned if unimpaired, and your money refunded. It is high time the people of this country should be released from the high-priced, monopoly-protected machine, made to suit through agents who have long had the field to themselves.

DO NOT BE DECEIVED.

Do not allow yourself to be deceived by persons interested in reflecting on the value of these machines. In the purchase of one of these machines you save about one-half of the expenses which enter into and form a part of the expense of a sewing machine, such as agents' salary, board, horse-hire, profits of middlemen and jobbers, who stand between the manufacturer and the small dealer, retailers' expenses and "brokers' canvassers' commissions, loss of accounts, interest on money on past due accounts, store rent, insurance, clerk hire, taxes, etc.

DESCRIPTION OF THE GLEANER

The arm of the Gleaner being high and long, gives ample room for handling the most bulky work. All of the parts subject to wear are made of the finest steel, carefully hardened, and so well fitted that the machine can be run at the highest speed with ease and without danger of getting out of order. The machine uses a double thread and makes a lock-stitch. The take-up and feed are positive in their action.

Stock Journal No. 4, \$22.00 (delivered.)

The SHUTTLE is self-throwing simple, made of the finest steel and has the latest movement. There is no better shutoff made.

AUTOMATIC BOBBIN-WINDER.

Every machine is fitted, without extra charge, with a perfectly automatic bobbin-winder, which winds the bobbin as evenly as a spool of thread.

SELF-ADJUSTING TENSION.

Permits change from light to heavy work, or vice versa, with no change of tension.

ATTACHMENTS.

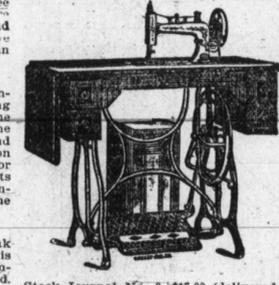

With each machine is furnished free a full set of attachments, which are warranted of solid steel, polished and nickel-plated and warranted for five years, which no other manufacturer in the United States does.

ACCESSORIES.

The following accessories are also included: One dozen needles, one sewing gauge, six bobbins, one large and one small screw-driver, one gauge-screw, one oil can filled with oil, one wrench, and one elaborately illustrated instruction book containing complete directions for operating the machine and attachments and other such information as will enable a novice to handle the machine with ease.

WOODWORK AND STAND.

The woodwork is made up from oak or black walnut, is preferred, and is first-class in every respect, all trimmings being polished and nickel-plated. The stand is of the very latest construction, having both treadle and drive-wheel hump on adjustable steel centers. The legs are fitted with nickel-plated casters, and the treadle support has six casters.

Agitate Irrigation. Every resident land owner in West Texas should have a right to know whether he is a stockman or farmer he should look to this matter first of all things. The time is not far distant when every tillable acre of land in the West will be watered by artificial means. The great Lipan flat, probably the largest body of smooth, tillable, irrigable land in America, will, in the course of a few years, be in cultivation. Why? Because there is no soil on earth so fertile and at the same time so easily tilled. The more you study irrigation the more you fall in love with it.—San Angelo Enterprise.

The Bureau of American Republics reports that the exportation of wheat from Argentina in the past four months was 782,689 tons, say 26,000,000 bushels. This is a very large increase over previous exports.

THE KANSAS CITY STOCK YARDS

Are the most complete and commodious in the West and second largest in the world. Higher prices are realized here than further East. This is due to the fact that stock marketed here is in better condition and has less shipping, having been shipped a shorter distance, and also to there being located at these yards eight packing houses, with an aggregate daily capacity of 9000 cattle, 40,000 hogs and 4000 sheep. There are in regular attendance sharp, competitive buyers for the packing houses of Chicago, Omaha, St. Louis, Indianapolis, Cincinnati, New York, Boston and the Export trade to Europe. All the eighteen railroads running into Kansas City have direct connection with the yards.
