

POULTRY.

HENS WITH ROUP.

P. Williams in Rural New Yorker says that if he had a large flock of hens that had symptoms of roup, he would at once clean the roosting places and sprinkle carbolic acid about the houses. Then he would give a feed of soft food once a day and put in it some ginger. Flocks of chickens often seem to have taken a little cold and cough and pip a little; but this wears off without their having roup. But if the birds have swelled heads and run at the nostrils, they have roup or will have it surely if not treated. In that case, Mr. Williams would separate the worst ones, bathe the heads with camphorated oil and inject it in the nostrils.

SUCCESS WITH POULTRY.

The greatest faults of beginners are overfeeding, overfencing, careless and irregular feeding and lice. All these troubles, and particularly the last, originate in ignorance of the needs of fowls. It is impossible for an inexperienced person to realize the difficulty of keeping down these parasites. It is not too much to say that three-fourths of the failures to lay, diseases and deaths are directly attributable to them. The fight against lice must never be lost sight of. There is a strong temptation to over-crowd, especially in winter, but it is a costly mistake. If you yield to it the birds will not do well and will fall easy victims to disease, which, like the raging lion, is always prowling about seeking what chickens it may devour.

Overfeeding generally results from kindness of heart. This is not appreciated by the birds, but by their putting on an extra coat of fat instead of reciprocating with an increased egg output. Careless and irregular feeding is another mistake. Chickens know quite as well as men when their dinner hour has arrived, and expect as such to receive an irritation of mind that checks egg production. All these are points which the average beginner fails to appreciate.

WHAT TO EXPECT.

Don't go into the poultry business thinking it is an easy way to make money. If you do you will soon wish you hadn't, for you will find you've made the biggest mistake of your life. Lazy people may possibly get away as merchants' lawyers, though they will never climb to the top of the tree, but a lazy poultry keeper will make as big a failure as a lazy editor.

Lots of work is necessary in the poultry business. This work largely consists of unflagging attention to what seems petty details but the lack of attention to which has been the chief cause of the many failures in the poultry business. They seem such little things to us that we are apt to forget that they are often more important than the big ones, as, occurring more frequently, their sum total is much greater. Chicken existence, like human life, is made up mostly of these little things which, like all routine work, become utterly wearisome and trying unless you have brought liking to your task and a firm determination to triumph over all obstacles.

If you possess these qualifications you start well equipped for your undertaking, and the latter will lift you over many a slough of despond on to solid ground. It will make you acquire that knowledge of the capabilities of each member of your flock which will lead to judicious breeding and the rejection of the culs without hesitation. Difficulties and discouragements will disappear before the light of experience. Your flock will become a source of pride and you may confidently look forward to obtaining with congenial occupation greater profits than are to be found in any other branch of farming.

UTILITY OF EGGS.

Eggs—good eggs—are a meal in themselves. Every element necessary to the support of man is contained within the limits of an egg shell, in the best proportions and in the most palatable form. Plain boiled, they are wholesome. The masters of French cookery, however, say that it is easy to dress them in more than 600 different ways, each method not only economical, but salutary in the highest degree. No honest appetite ever yet rejected an egg in disguise. It is nutriment in the most portable form and in the most concentrated shape. Whole nations of mankind rarely eat their plain as readily as do the humble tradesmen or peasantry—at all events, things we dine with did. Far more than fish (for it is a watery diet), eggs are the scholar's diet. They contain phosphorus, which forms a variety of functions in the economy. And they are the best nutriment for children, for in a compact form they contain everything

HORTICULTURE.

The real value of a garden cannot be known adequately by those who are not compelled to buy all garden produce for their use. We sometimes think lightly of our privileges. It is very different, indeed, to go out into the garden and pull up a dozen or two of radishes for table use from having to go to market and pay a high price for the same; and so it is with lettuce, carrots, green peas, and, in fact, every product that the garden will produce.

PATTENING FOR MARKET.

If you have not already fattened your surplus fowls for market, the quicker you get them in seasonable condition the better before the markets are overstocked, as they usually are in cold weather. Look over the stock carefully and select the number you wish for market; make a large slatted coop for every dozen, and run a partition in the center so there will be six in each side. Put the coops in a comfortable shed or outhouse, where they will have plenty of light to eat and drink from. Get a large board for the front of each coop and place sharp grit and small pieces of charcoal or charred corn where the birds can get it. If there is a slaughter house near by or a butcher's shop, get some coarse and bloody pieces; chop them up and put them in a boiler with water already in the boiler. Boil the meat separates from the bones, then stir in corn meal until it becomes like thick cream; season with salt and pepper, and feed while agreeably warm. Allow the fowls half an hour or so to pick at the mash, and then feed them the darkened coop until the next feeding time.

You can vary the feed to suit the appetite of the birds. One may boil the corn, another may make mush, and again boil some potatoes or roots with the mash, the object being to induce the birds to eat as much as possible. Keep the board clean, and have fresh water or milk for drink. The slaughter house offal and fresh bones from a butcher's shop, cooked with corn meal or ground barley, make the best and cheapest feed for fattening. It is best when putting up young birds of the same age and size. They look and sell better in even lots. Three weeks of steady fattening will put the birds in good condition for the table; then the flesh will be tender and sweet.—Ohio Poultry Journal.

SOME QUESTIONS OF INTEREST.

Editorial: Poultry is beginning to show improvement since my first letter to the Stock and Farm Journal. I think we can begin to mate breeding pens by January 1, 1895. As you know, the poultry throughout the country is doing well at this writing. I visited the yards of a fancier at this place and found some fine and more important than the big ones, as, occurring more frequently, their sum total is much greater. Chicken existence, like human life, is made up mostly of these little things which, like all routine work, become utterly wearisome and trying unless you have brought liking to your task and a firm determination to triumph over all obstacles.

How many have had a successful season? What is the matter at the Fort? Is there no fancier there that could drop a line now and then on poultry? Let's hear from all the fanciers in the state. I will answer all questions. What has been the most successful treatment you have used to eradicate lice? What the most successful treatment you have used to eradicate the black fly? Which for cholera? There is no cholera to amount to much in this section, mites and fleas being our greatest pests, together with the chinch; and say, when those chinch get a start they are just as hard to get rid of, if someone knows a good remedy please give it to the editor for insertion in the poultry column.

Market poultry will be liable to bring a good price from now until after the first of January, 1895, and I am in hopes it may be good the entire year. I hope all the fanciers will have a good year also. Come, neighbor farmers, improve your flocks. If you are not all able to have a flock of thoroughbred fowls, purchase a male or a setting of eggs, and you will find it beneficial. I hope our readers that attended the fair profited by so doing, and I am satisfied they were profited, if they asked questions concerning poultry. C. F. BAUGH.

That old and solid school, the Fort Worth Business College, reports a large attendance. The faculty is made up of experienced men and women—all specialists in their line. It will pay our young people to write to Prof. Preuitt and receive a beautiful catalogue.

The Fort Worth Business College has the finest penman connected with any school in the South.

HORTICULTURE.

The real value of a garden cannot be known adequately by those who are not compelled to buy all garden produce for their use. We sometimes think lightly of our privileges. It is very different, indeed, to go out into the garden and pull up a dozen or two of radishes for table use from having to go to market and pay a high price for the same; and so it is with lettuce, carrots, green peas, and, in fact, every product that the garden will produce.

A COMMON MISTAKE.

The mistake is often made of applying the water upon the surface, and it is made worse by the practice of giving each tree a pailful or so at a time and repeating it daily. One or even two pails of water thrown on the ground under a tree will at best only wet the soil to the depth of an inch or so, and as this does not carry it down to the roots little or no good will result. In fact, it may lead to harm, as a crust will form, particularly upon a heavy soil, and not only will the water that has been applied quickly evaporate, but the loam already in the soil will be hastened. If the application is frequently repeated it will result in making bad matters worse. Instead of watering the plants every night for a week, had the same amount of water been applied at one time and the arrangements been such that it would slowly seep into the tree would have been amply supplied in all probability, and no further application would have been necessary for ten days or more.—American Gardening.

THE FAMILY GARDEN.

Much enjoyment and a great deal of healthful food can be obtained from the family fruit garden. The soil needs to be rich and well prepared. The best land on a farm is the best soil for this purpose. It should be convenient to the house, and so laid out that cultivation could be nearly done by horse power. It is surprising how much and how great a variety can be grown on a small garden when properly managed. It will furnish grapes, cherries and currants for a daily supply six months each year, and each kind will furnish a surplus in the height of its season. The indigestible pie and cake can be banished and tired mothers saved many hours of weary work. The family should have the best of everything the soil produces. Parents know and children understand, that where fruit has to be bought, it is not a choice, large, full ripe fruit from your own grounds will convince you that the fruits are the chief of all the products of the earth; blessings designed to please the eye and gratify the taste, to multiply our comforts and beautify our lives, and to indicate the culture of fruit and the refinement. Their use as foods tends to a healthy, refined temperance, and a long life. Give the fruit garden a trial. The same care given to it as to the vegetable garden will produce astonishing results.—Nurseryman and Orchard.

ORCHARD TREES.

Intelligent tree treatment is just as essential for our orchard trees as for the magnificent shade trees around our houses or in the streets, writes the editor of Farm and Home. The popularity given to arboriculture during the last few years has had the effect of calling the public attention to the needs of trees, and there have sprung up in various parts of the country practical tree growers who are doing wonders in showing the people what can be accomplished through the application of intelligent methods of cultivation. We are at least getting symmetrically shaped shade trees, fine forest and timber trees, and even good fruit trees. One of the first essentials of good tree culture is to understand the general shape of the trees under culture. A pear tree does not take the shape of an apple, peach, or forest tree any more than a maple assumes the style of growth of a horse chestnut, hickory, or beech. Consequently we cannot prune trees alike. The growth of a green-leafing tree is very different from that of a Northern Spy, and the Seckle pear trees are entirely different in shape from the Sheldon or Anjou. We want well shaped fruit trees but we do not want to deform them by pruning after some preconceived notion of our own. Given the natural shape of the tree, it is well then to stick close to the general type as possible. That is, the shoots and branches that are abnormal should be clipped off while very young. It should be unnecessary to cut off large limbs, for the young twigs should be pruned before

HORTICULTURE.

they have assumed any such size. The rule is that large limbs should be cut off, or need to be cut off, only when they have been broken accidentally, or twisted by the wind.

TRANSPLANTING TREES.

If every needed preparation has been made and a tree is properly lifted and set, it can be removed successfully as long as the ground continues warm enough to insure the output of fresh roots in sufficient numbers to supply the water which is wasted from the trunk and branches by evaporation during the winter. But whether or not a tree will be likely to survive—that is, whether its chance of life barely outweigh the dangers of death in the operation of removal—is not the question which an enterprising planter ought to discuss. His work will be best done with a tree simply because it has vitality enough left to put forth leaves. What he wants is a tree with an unbroken continuity of life, and a promise of longevity and conditions which insure its best development in size, in beauty and in characteristic expression.

Small trees can be moved successfully at any time of year by one who knows just how to do it. But in this latitude the transplanting of trees ought not to be postponed until as late as the middle of November. Certainly, no tree ought to be transplanted after this date, unless the ground has been thoroughly and intelligently prepared beforehand. If trees must be moved or purchased now it is better to heel them in carefully and at once begin to water the plants where they are to live permanently.—Garden and Forest.

THE HOTEL WORTH.

An Enterprise Which Reflects Great Credit on the City for Which it is Named, and Takes Rank With the Best in the Country. For a long time this city, one of the best business points in Texas, was sadly deficient in the best illustrated hotel facilities, and until the hotel mentioned above was established there was a constant kick from the traveling public. The hotel was built and opened at a most opportune time, just when the closing of the Pickwick and burning of the Arlington, made it imperative, that accommodations be provided for the vast number of strangers who daily come into Fort Worth. The gentleman in charge of the new building which faces a block on Main street, determined that nothing should enter its walls but the best that money could buy. The Hotel Worth is today second to no other in the South in point of furnishings, service, and everything that goes to make up a first-class, modern hotel. Every convenience and appointment of the Hotel Worth, is in accord with the most modern ideas in hotel building. The Hotel Worth is a pleasure to the eye, and a pleasure to the pocket. Mr. W. E. Hardwick, proprietor, has an extensive acquaintance among the stockmen of the country, extending from Montana to the Gulf, and he will with few exceptions stop with him when in Fort Worth. A mention of Hotel Worth would not be complete without something about the bar, which in this instance is the most ornate in Texas. Done in white and gold, with large and expensive mirrors, the effect of which is heightened by brilliant electric lights; it presents the prettiest effect imaginable, and altogether is in keeping with the general excellence of the entire hotel. Fort Worth and Texas owes Mr. Hardwick a vote of thanks for the establishment of the Hotel Worth, and his patronage will without question bring him lucrative returns for his enterprise and business sagacity.

CATTLE FOR SALE.

We have 1000 Southern Texas four year old calves that we will sell for immediate delivery at \$14.50 per head. One of the best bred herds in Western Texas numbering between thirteen and fourteen thousand, price \$10 per head, counted out. Also several hundred calves of twelve hundred pound feeders at prices to suit.

AGENTS LABOR ONE WEEK.

Agents Labor One Week. We do all kinds of painting and decorating work. We manufacture the material and outfit, and teach the art. We sell the only complete outfit, including tools, wheels, and materials for painting, papering, glazing, and other work. Gray & Co., Plating Works, Dept. 4, Columbia, Miss.

WHY SOME WIRE FENCES FAIL.

Take 40 rods of straight wire fence, no matter what the name, how big the wire, it must conform to Nature's laws. One end may be fastened to a meeting house, the other to a big barn, but when a cold day comes, either the M. H. and the B. will move 8 in. nearer together, or the wire will not break, they will stretch, before the age and nature come back. This great power of Nature knows no man's, except the cold Springs of the PAGE WOVEN WIRE FENCE. Adrian, Mich.

THE LIVING LAND and LIVE STOCK AGENCY COMMISSION DEALERS IN ALL KINDS OF TEAKS AND LIVE STOCK, AND GENERAL INVESTMENT BROKERS.

Opposite Pickwick Hotel Fort Worth, Texas.

CATTLE We have at all times a large list of all kinds and classes of cattle for sale. We make a specialty of buying and selling feeding steers and contracting for the future delivery of any required number or class of cattle. Our extensive acquaintance and correspondence with buyers, together with the large list of cattle constantly on hand and for sale, enables us to make it to the interest of both buyers and sellers to deal through our agency.

HORSES AND SHEEP We handle in large lots all kinds and classes of live stock, and make a special feature of horses and sheep. The former in lots of not less than 200 and the latter in flocks of not less than 1000.

RANCHES We make a specialty of handling ranches of all kinds, with or without the stock, in Texas, New Mexico, Arizona and Mexico.

WILD LANDS We represent over a million acres of wild lands in Texas, New Mexico, Arizona and the Republic of Mexico, suitable for speculation, ranching or colonization purposes. We have among these some rare bargains.

STOCK FARMS We have a few rare bar farms, containing from 2000 to 10,000 acres each. These are especially suited for fine stock or feeding farms, and will be sold very cheap.

IMPROVED FARMS We have improved farms of all kinds, sorts and sizes, and can no doubt suit anyone wanting a good farm or comfortable home.

CITY REAL ESTATE We have a large list of desirable improved and unimproved resident and business property in the city of Fort Worth to which we invite the attention of those wanting to make safe and profitable investments of this kind.

EXCHANGE We give especial attention to exchanging land for city property, real estate for live stock or vice versa.

Believing that we can make it to the interest of both buyers and sellers to deal through us, we respectfully solicit their patronage. **GEO. B. LOVING & SON, MANAGERS.**

Texas Stock and Farm Journal.

PUBLISHED EVERY FRIDAY
The Stock Journal Publishing Co.,
607 Main Street, Opposite Hotel Pickwick,
FORT WORTH, TEXAS.

SUBSCRIPTION, \$1.00 A YEAR

Entered at the Postoffice, Fort Worth, Tex., as second-class matter.

Subscribers, Attention!
Look at the address label on the Journal sent to you. The small figures opposite your name show the expiration of the time paid for.

Subscribers who desire a change of address will please give both present and future postoffice.

There have been more county fairs held in Texas this year than ever before, and without exception they have been successful.

The following comparison by an exchange is a center shot: "The man who devotes a week to the advertisement of what he wishes to dispose of and then rails because he did not get great returns is like the boy who studied with a lawyer for two days and then came home and said 'This law ain't what it's cracked up to be. I'm sorry I learned it.'"

The list of gin accidents grows longer each year at a rate that is appalling. Every day the press records the loss of limbs and oftentimes lives from the cotton gin death traps.

The daily recurrence of atrocious outrages in the Indian Territory by banded outlaws is rapidly convincing the people that the admission of that blighted spot on the map of the country to statehood is an imperative necessity.

The resolution passed by the cotton convention at Montgomery, Ala., urging Southern legislatures to encourage the establishment of cotton manufacturing in the South, by exempting them from taxation for a period of ten years, is a move in the right direction.

The Cotton Palace at Waco, the crowning glory for the year 1894 of Texas' greatness, is attracting big crowds of sightseers, who attend and are convinced that the half has not yet been told of the state's resources.

Texas Stock and Farm Journal is the oldest paper of its class in Texas. Besides its already established large circulation, its growth for the past few months has been phenomenal.

The irrigation convention called to meet at San Antonio December 4 does not seem to attract the attention its importance deserves.

The Vicksburg board of trade and cotton exchange have issued a general call for a convention of all persons in the United States who are opposed to option gambling to meet November 29 in that city.

present the ground is too dry to admit of planting. However, there is yet considerable time in which planting can be done, and even if rain falls within the next month the acreage promises to be larger than ever before.

The meeting at St. Louis within the week of representative citizens of Texas as cities and managers of railroads and steamship lines, for the purpose of directing immigration to Texas seems to have been productive of plans, which if carried through, will result in no little good.

The Western range shipping season is over, and with the exception of what might be termed "remnant shipments," the Texas season is in the same condition.

From expressions and opinions made by the present state land commissioner it is certain that his closing report will record in no uncertain tones the reduction of the lease and selling prices of state lands.

The marked shortage in the total number of cattle in America which, according to statistics, is about a million head, and which is clearly shown by the decrease in the number slaughtered at the four big markets last year.

"With the exception of corn, cotton and certain fruits, the big crops of the country have been harvested. Prices are decidedly irregular, certain cereals, such as corn, oats and barley, commanding fair to good figures, while wheat has not recovered from the old-time level of depression, and cotton is selling at the lowest figures since before the war.

husking to determine that the crop is spotted, where here and there good results, while throughout a large part of the belt the out-turn is no better than promised four to eight weeks ago.

The export trade, which is growing stronger, demands a better grade of stuff from the states, which have usually supplied this demand, what Texas ships will have to suffice, which should cause an upward trend in prices.

The above well-written article, taken from Farm and Home, covers the views urged by the Journal, except in the "last" paragraph, where it regards the present prices of farm staples as abnormal and looks for the return of old values.

The Brazos river is being surveyed by the United States engineer from Richmond to Velasco.

The fall race meeting opened at San Antonio Monday with good attendance and a good card of races.

Alabama negroes are preparing to migrate to Liberia in large numbers, and about 200 will leave early in December.

The Japanese have been victorious in their recent wars with the Chinese and the Chinese emperor is preparing to flee from Peking.

President Cleveland has been asked by the Chinese government to mediate between China and Japan.

It is announced that the federal government will ask the bankers of New York for another loan of \$50,000,000, and will issue gold bonds for that amount bearing 5 per cent interest.

year. With the practically exhausted supply of cotton seed feed stuff in Texas, and the fine grass that clothes the ranges, cattle can be taken up and put in shipping condition in shorter time than usual, which should make the supply of feeders go on steadily through the late winter and early spring months.

The Nebraska relief commission appointed by the governor to arrange for relief for drought sufferers, has been organized and is at work collecting and distributing funds.

I like the paper very much.—L. Nelson.
You paper fills the bill.—J. D. & C. H. Bell.
I think it the best paper in the country for farmers and stockmen.

NEWS NOTES.
The races at Taylor were very well attended, and successful.

The Plan roller flour mill is about completed, and will be started up in a few days.

The boundary commission, to establish a fixed line between Texas and Mexico, has arrived at Havana, Tex.

The immigration meeting at St. Louis Monday, held for the purpose of diverting immigration to Texas, was attended, delegates having been present from Fort Worth, Dallas, Houston, Waco, Abilene, Wichita Falls, Taylor, Cleburne, Comanche, Brownwood, Corsicana and Pecos Valley.

The Limestone Fair and Stockraisers' market, held at Groesbeck Friday, was a success.

The Corral county fair at New Brokenshire, Tex., closed its two-day successful session Tuesday.

The fall race meeting opened at San Antonio Monday with good attendance and a good card of races.

The remains of the late czar of Russia was buried at Moscow Saturday with imposing pomp and ceremony.

A twelve-year-old boy killed Deputy Marshal Chocks in the Kiowa country, Indian Territory, one day this week.

The New Orleans labor troubles are at an end, and shipping has been resumed by the steamship companies.

The eighteenth annual session of the general assembly of the Knights of Labor convened in New Orleans Tuesday.

Hon. L. J. Story of Lockhart, Tex., has been appointed state railroad commissioner in place of Judge W. P. McLellan, who has resigned.

Wm. Sturges, the plaintiff in the famous Sturges-Parwell litigation, over Northwest Texas lands, died at Oswego, N. Y., Monday.

Work will begin at once on the \$50,000 light house at the mouth of the Brazos river, for which an appropriation was made in March, 1893.

John M. Taylor, a blind man of Arkansas, pleaded guilty at Fort Smith, Ark., to the receipt of over \$17,000 in pensions fraudulently.

The fourth annual exhibition of the San Antonio Horticultural society was held in that city Tuesday, November 13, with a good attendance and quite an attractive display.

A passenger train on the Frisco was held up four miles east of Monette by two masked men Monday night, and carried several hundred dollars, and escaped with the booty.

It is announced that the federal government will ask the bankers of New York for another loan of \$50,000,000, and will issue gold bonds for that amount bearing 5 per cent interest.

Three masked men held up the bank at Sylvan Grove, Kan., Monday, and in riding away with one of them was shot by the cashier. His companions seeing he was wounded, fired several shots into his body, finishing the work

started by the cashier. They then rode away and escaped. The robber was arrested and \$1,500 of the stolen money on his person.

The Texas and Pacific railroad's big cotton wharf at New Orleans burned Monday evening. The entire wharf and 28,000 bales of cotton were totally consumed. The loss will reach \$1,000,000.

The new steam warship of the American navy, the St. Louis, was launched at Philadelphia Monday, Mrs. Cleveland, wife of President Cleveland, christening it as it glided into the water.

A south bound train on the M., K. & T., was held up at Blackstone, I. T., Tuesday night by fifteen bandits, who failed to get any express money, relieved the passengers of their valuables.

Terrible forest fires were raging in West Tennessee and Eastern Arkansas Saturday, causing the loss of much valuable property and timber lands, besides destroying several valuable plantations.

The Choctaw Indians are mobilizing under arms with the avowed intention of avenging the death of Silas Lewis who was executed for murder a short time since. The situation is said to be alarming.

The Nebraska relief commission appointed by the governor to arrange for relief for drought sufferers, has been organized and is at work collecting and distributing funds.

As a result of the late election in New York, the city of Brooklyn and New York suburbs will be consolidated into one, which will make New York the largest city in the world, with a population of over 3,000,000.

A convention representative of all the states and cities of the Union has been called to meet in St. Louis December 11, to discuss and formulate a plan for the relief of the homeless and indigent children found in all the cities of America.

Two members of the Cook gang looted the town of Lenah in the Indian Territory, robbing the post office and stores E. E. Melton tried to stop the bandits and was shot down. The bandits escaped unharmed in the direction of Coffeyville.

The horticultural fair at Sherman opened on the 8th inst., with a fine collection of horticultural and miscellaneous exhibits. A large attendance caused the exhibitors to feel very much encouraged over the interest taken in their work.

The inter-state anti-option convention will meet at Vicksburg on November 20. The object of the convention will be to prepare for the inaction of legislation to prevent speculation in future options, especially in the instance of cotton and grain.

A federal grand jury in Mississippi refused to indict the governor, treasurer and attorney in the matter of the Mississippi State warrants, similar to United States currency and National bank notes, as charged by Treasury Chief Hazen.

The boundary commission, to establish a fixed line between Texas and Mexico, has arrived at Havana, Tex., and is at the head of the commission, is trying to establish the old bed of the Rio Grande as the line, which, if done, will settle the question of many cut-offs, or banks, on both sides of the river.

The bravery of Dan Phillips, an engineer on a Santa Fe passenger train, saved the lives of a number of people last Saturday night. By sticking to his engine, when other trainmen jumped for their lives, he succeeded in stopping his engine within a few feet of a burning bridge over a deep creek, into which the train would have plunged.

The immigration meeting at St. Louis Monday, held for the purpose of diverting immigration to Texas, was attended, delegates having been present from Fort Worth, Dallas, Houston, Waco, Abilene, Wichita Falls, Taylor, Cleburne, Comanche, Brownwood, Corsicana and Pecos Valley.

The Limestone Fair and Stockraisers' market, held at Groesbeck Friday, was a success.

The Corral county fair at New Brokenshire, Tex., closed its two-day successful session Tuesday.

The fall race meeting opened at San Antonio Monday with good attendance and a good card of races.

The remains of the late czar of Russia was buried at Moscow Saturday with imposing pomp and ceremony.

A twelve-year-old boy killed Deputy Marshal Chocks in the Kiowa country, Indian Territory, one day this week.

The New Orleans labor troubles are at an end, and shipping has been resumed by the steamship companies.

The eighteenth annual session of the general assembly of the Knights of Labor convened in New Orleans Tuesday.

Hon. L. J. Story of Lockhart, Tex., has been appointed state railroad commissioner in place of Judge W. P. McLellan, who has resigned.

Wm. Sturges, the plaintiff in the famous Sturges-Parwell litigation, over Northwest Texas lands, died at Oswego, N. Y., Monday.

Work will begin at once on the \$50,000 light house at the mouth of the Brazos river, for which an appropriation was made in March, 1893.

John M. Taylor, a blind man of Arkansas, pleaded guilty at Fort Smith, Ark., to the receipt of over \$17,000 in pensions fraudulently.

A VOTE FOR TEXAS.
Fatal Effects of a Solitary Ballot in the Indiana Hills.
Indianapolis, Ind., Nov. 14.—Campaign literature is seldom as interesting as a circular sent out last week by Chairman Taggart of the Democratic state central committee of Indiana, urging upon voters the importance of each ballot. After warning Democrats not to scratch congressional candidates because the next house may elect the president, the circular calls attention to a most remarkable instance, when, in 1884, a single vote cast in Switzerland county, Ind., caused the final admission of Texas into the Union.

David Kelso, the Democratic candidate for state senator in that county, was counsel, shortly before election, for a young man accused of murdering a false friend who had betrayed him in a love affair. The prisoner, poor in purse, was acquitted, and swore to do all in his power to repay his attorney. On election day the young man lay in bed, suffering from a fever, and against the protest of his physician had himself taken to the poll, two miles away. After voting for Kelso he was taken home and died. The official count gave Kelso one majority.

It devolved on the legislature to which Kelso was elected to choose a United States senator. The Democrats were defeated, and the two branches, Timlan A. Howard, Whig, and Oliver Smith, Democrat, were the regular candidates. Kelso, who had been elected to the legislature, would not vote for Smith under any circumstances. He brought over to his side another Democrat named Hoover, and for many days and weeks the battling went on, always with this result: Howard 74, Smith 74, Hannigan 2. Seventy-six votes were necessary to elect a senator, and Kelso, a brilliant young lawyer and Kelso selected him as his candidate without consulting him in the beginning of the long struggle.

The Nebraska relief commission appointed by the governor to arrange for relief for drought sufferers, has been organized and is at work collecting and distributing funds.

As a result of the late election in New York, the city of Brooklyn and New York suburbs will be consolidated into one, which will make New York the largest city in the world, with a population of over 3,000,000.

Wheeler, Robertson County, Texas.

HOUSEHOLD.

GRAY HAIR.

Gray hair by no means shows a premature decay of the constitution. It is purely a local phenomenon, and may exist with great bodily vigor.

THE MIDDLE-AGED WOMAN. The fascinating, middle-aged woman is not looking for flattery. Either she has had enough of it, or she knows that men bestow it easily on all women alike.

A MAN'S POCKET. "Men are fond of laughing at the little ways and whims of women," said our sprightly hostess.

"I have often watched my husband carefully change the contents of coat or trousers pockets from one suit of clothes to another. Solved, worn envelopes and folded papers are tenderly transferred, and for a long time I was impressed with the important operation and drew a sigh of relief when the operation was over.

TIMES CHANGE.

Mrs. Helen Laughlin says: Not many years ago people who lived in cities and even smaller towns, looked with contempt and scorn at derision concerning those who lived on farms.

IRONING.

"No, I don't get very tired when I iron," said an experienced laundress to a lady who was expressing sympathy at her hard work.

THE HOT WATER BAG.

When the India rubber hot water bag is in use as it is at present, it becomes almost a duty to possess one, says a writer in Good Housekeeping.

Royal the Superior Baking Powder.

Office of the Health Commissioner, St. Louis, Mo., Jan. 21, 1893.

THE conflicting publications about the baking powders caused me to ask City Chemist Dr. Sullivan for a report upon them.

WM. N. BRENNAN, M. D., Health Commissioner.

Office of City Chemist, CITY HALL, ST. LOUIS, Nov. 25, 1892.

WM. N. BRENNAN, M. D., Health Commissioner, Sir: In compliance with your request, I have carefully analyzed baking powders on sale in this city, and report to you as follows: * * * the Royal excels all others. It is the highest in strength, in fabrique a faultless arrangement of agents, pure and wholesome, free from adulteration with lime, ammonia or alum.

Royal is the only Baking Powder containing neither ammonia nor alum.

ROYAL BAKING POWDER CO., 106 WALL ST., NEW-YORK.

drive. Many as are the blessings of the hot water bottle, it must not be forgotten that it is also a source of danger. I always see that the stopper is absolutely tight, and never use it without a thick cover.

GOVERNING TEMPER.

Almost every human being is possessed of some infirmity of temper, and a mother's first care should be to observe in which particular her child's disposition requires to be subdued and corrected.

FOR THE FARMER'S WIFE.

A clever physician once prescribed a new and becoming dress as the best remedy he knew of for a nervous, careworn woman, says the Ladies' Home Journal.

SUGGESTIONS FOR MAMMA.

Of the convenient things I have made for my baby I will tell you first of my baby creeper. I cut a plain waist and cut the neck low and the wools large so as to be easily put on.

PEOPLE WHO FROWN.

Dear Household,—Upon your kind invitation I will write. I want to talk upon various subjects, and I doubt not but my poor little manuscript will be buried in the loathsome depths of the ever-watchful waste basket.

THE STEEL SQUARE AND ITS USES.

The Carpenter's Steel Square and its uses, being a description of the square and its uses in obtaining the length and breadth of all kinds of timber, Groins, Brackets, Purline, Collar Beams, etc.

HOW TO HUNT AND TRAP.

Containing full instructions for hunting the buffalo, elk, moose, deer, antelope, bear, fox, grouse, quail, quail, quail, woodcock, snipe, etc.

THE OVEN.

Perhaps there is no one point in housekeeping which puzzles the beginner so much as the proper heat of the oven. It is said the oven is half the cake, and different articles require such varying degrees of heat that much practice is necessary to always succeed.

THE COMPLETE CARRIAGE & WAGON PAINTER.

A work of 300 pages, written by a practical painter, giving in plain language detailed directions for painting carriages, wagons, sleighs, and full instructions in all the various operations, including coloring, staining, varnishing, and coloring. With numerous recipes for mixing colors. 300 illustrations.

THE PRACTICAL ANGLER.

How, where, when, and what to catch fish, by Kit Clarke, author of "Where the Trout Hide," etc. Giving a description of all the various methods of catching fish, and the best methods of capture. Their habits and haunts, and all requisite information whereby the novice can acquire the art of fishing. 144 illustrations.

THE BREEC-HOLDER.

By GLOAN, Des-Manufacture, Separation, Loading, Cleaning, Shooting, etc. Price, \$1.25.

THE DOG.

Compiled and edited by Frank Forester. Containing full instructions in all the various operations of dog training, including the treatment of all diseases. 112 illustrations.

HOW TO TRAIN DOGS.

Variety and sport in dog training, including the training of the dog to do as he is bid, to walk erect, to dance, etc. Price, \$1.00.

DISEASES OF DOGS.

Their pathology, treatment, to which is added a complete dictionary of canine medical terms. A practical guide for every dog owner. Price, \$1.00.

FRANK FORESTER'S HORSE OF AMERICA.

By HENRY W. HANCOCK. In two superb colored original portraits of thirty celebrated representative horses. This standard historical work has been thoroughly revised, new articles compiled and perfected by S. D. and B. G. Bruce. Price, \$1.50.

over the "ways of the world." If you will just sit down and take a common-sense view of things, I think you will not fret half so much.

To begin with, don't expect too much of your so-called "friends," who are more or less acquaintances. Perhaps you tell them something and you have their promise that they'll "never breathe a word of it."

Don't expect men to be angels, for they are not; and of course they are not always good themselves. Are you?

Housekeeping is difficult to some people who do not carry it on by system, and of course it takes practice to make a perfect housekeeper. Make the children their partners in the work.

A PLEA FOR HOMES.

Just why housekeeping and housework should be considered undignified labor—drudgery—something to be avoided—is beyond comprehension.

Housekeeping is an art, and really high art. The never-ceasing, never-ending work with pots and pans, brooms and dust brushes, against ever-encroaching dirt, is no harder work than the correct touch of music, or the delicate and harmonious blending of colors at the easel.

Home is her palace, where she sits enthroned, husband and children, willing, loving and loyal subjects. Her altar, altar, altar, her altar—drudgery, reform, equal rights, etc., are slowly but surely attracting the attention of most women.

HOW TO DRAW AND PAINT.

A complete course of drawing and painting, containing concise instructions in outline, light and shade, perspective, shading from nature, figure drawing, arabesque, landscape, marine and portrait painting, etc. Price, \$1.00.

FRANK FORESTER'S COMPLETE MANUAL FOR YOUNG SPORTSMEN.

Manual for young sportsmen of fowling, fishing, and other sports. Price, \$1.00.

FRANK FORESTER'S FIELD SPORTS.

Containing the history of the various sports, including shooting, fishing, and other sports. Price, \$1.00.

FRANK FORESTER'S FISH AND FISHING.

Containing a full description of the various fish of the world, and the best methods of catching them. Price, \$1.00.

FRANK FORESTER'S AMERICAN GAME IN ITS SEASONS.

A full and complete description of the various game animals of America, and the best methods of hunting them. Price, \$1.00.

HOW TO TRAIN DOGS.

Variety and sport in dog training, including the training of the dog to do as he is bid, to walk erect, to dance, etc. Price, \$1.00.

DISEASES OF DOGS.

Their pathology, treatment, to which is added a complete dictionary of canine medical terms. A practical guide for every dog owner. Price, \$1.00.

REAL OUR BOOK BULLETIN.

EXCELSIOR LUMBER LOG BODY and Hand-Containing tables of Board, Scantling and Plank, etc.

RANDALL'S PRACTICAL SHEPHERD.

How to manage a flock of sheep, and the various diseases to which they are liable. Price, \$1.00.

LEWIS' PRACTICAL POULTRY BOOK.

Containing full instructions for raising and managing poultry. Price, \$1.00.

HOW TO HUNT AND TRAP.

Containing full instructions for hunting and trapping various animals. Price, \$1.00.

WILLARD'S PRACTICAL BUTTER BOOK.

Containing full instructions for making butter. Price, \$1.00.

THE STEEL SQUARE AND ITS USES.

The Carpenter's Steel Square and its uses, being a description of the square and its uses in obtaining the length and breadth of all kinds of timber.

THE COMPLETE CARRIAGE & WAGON PAINTER.

A work of 300 pages, written by a practical painter, giving in plain language detailed directions for painting carriages, wagons, sleighs, and full instructions in all the various operations.

BURTON P. EUBANK, ATTORNEY AT LAW.

Practises in all Courts, State and Federal, - - Hurley Bldg., Ft. Worth, Texas.

SAN ANTONIO AND ARANSAS PASS RAILWAY COMPANY.

THE ONE Live Stock Express Route. From Texas Points to the Territories and Northern Markets.

Agents are kept fully posted in regard to rates, routes, etc., who will cheerfully advise and assist.

R. J. MARTIN, General Freight Agent, San Antonio, Texas.

SOUTHERN TEXAS

(Edited by R. R. Claridge, manager Branch Office Texas Stock and Farm Journal, Room 8, over T. C. Frost & Co.'s bank, San Antonio.)

A. Y. Walton, Jr., & Co., of San Antonio, the well-known Devon breeders, sold last week to J. A. Coleman, of San Antonio, a fine head of grade Devon cattle, male and female.

The Daily Express says that what the Democratic party needs is a leader. To a man viewing the procession from up a tree or on a fence, it would seem that too much leadership is mostly what is the matter with the party.

Mr. J. B. McLellan, the Hayes county stockman and cattle feeder, was a caller at the Journal office this week. Says if he don't get a bunch of steers to suit him he will feed some sheep this time.

John I. Claire, the Bee county stockman, passed this week on his return from a visit to his children, who are in school at Austin. He recently sold 11,000 steers in the territory, which will be held over this winter.

I was at the Taylor races Thursday. The racing was fine, but the attendance was light. The famous stallion, Joe Patchen, was on exhibition and met with an ovation. My old friends in the Taylor country seemed glad to see me, and I was glad to see them.

Mr. J. H. Blackaller of Frio county is here. He says his big steers are knee deep in grass, and that for the first time there are a few chills loose in his section, as a result of the flood this fall.

Now that the election is over, maybe we can get somebody to talk business. Too many elections, and it seems that the less of principle at stake the more runs is made.

Mr. John Shand, manager of the Cable ranch, that makes a specialty of thoroughbred Polio cattle, was in to see me this week. He recently imported a fine bull calf, which they put to suck a Texas cow, and have been treating the calf with fever.

The commission don't have so much to say in favor of the meat monopoly as they used to, since the latter began to buy so many cattle direct from the range, thereby shutting off the commission's access to the stock yards.

State of Ohio, City of Toledo, Lucas County, I, Frank J. Cheney, do hereby certify that the within and to be published in the Journal is a true and correct copy of the original as the same appears on the records of said county.

After this week, the Stock and Farm Journal office will be across the street from the Southern hotel, where friends of the Journal are cordially invited to call.

Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1904.

Hall's Catarrh Cure is taken internally and acts on the mucous surface of the system. Send for testimonials, free.

The Stock Journal Sewing Machine, fully described elsewhere in this paper, is fully guaranteed to be as good as any machine made.

For the HOLIDAY EXCURSIONS to the OLD STATES the "COTTON BELT ROUTE" will sell tickets December 21st and 22nd.

Through cars will leave all prominent stations on the above routes to go through to Nashville, Chattanooga, Birmingham, Atlanta and other cities in the Old States.

Ob, Yes, Gentlemen! Several good mesquite pastures to lease—a "snap" or two in ranches; can lease some property on exchange.

I agree that 800 gallons per minute will do what is claimed. The water is put on the land with a sprinkler, but its irrigating capacity depends on the absorbing capacity and the slope of the land to be irrigated.

The Stock Journal Sewing Machine is one of the best machines made. It is the oldest and best known makes on the market.

SWINE.

We feed all pigs and swine with little or no steam during cold weather, such as ground corn (having no heat), ground corn and oats, wheat middlings and some bran.

I see a question asked if salt will kill hog cholera. Verily, a salty water will certainly kill them and do it quickly.

Supposing that the land to be irrigated slopes to the east; then make your beds or lots from north to south, with the irrigator on the west side.

There is no question but what filthiness is injurious to pigs. It has also been the cause of the dreaded hog cholera.

George T. Perkins of Saco, Me., asks the Practical Farmer if pigs should be fed on a mixture of ground corn, even if fed good grain.

There is no question but what filthiness is injurious to pigs. It has also been the cause of the dreaded hog cholera.

SHEEP AND WOOL

There were 372,000 sheep sold on the Chicago market during the month of October. This is the largest monthly receipts on record, being 46,000 more than the previous largest receipts.

After a few weeks' rest the foreign markets for sheep have recuperated and are once more at a point where exporters can do business without material loss, and probably some profit. How long this state of affairs will last is uncertain, for the chances are that the promise of some profit will induce heavy shipments, but markets will be glutted, and prices will again sink so low as to entail heavy losses. If this branch of the trade could be reduced to a regular and reasonable basis, if this sporadic plan could be avoided, it would be much better for the Chicago market and the shipper, too. Some American sheep were recently sent to Paris, but, considering the fact that it is likely that the exportation did not pay very well.—Chicago Producers' Journal.

BETTER TIMES FOR SHEEP

One of those who do not believe that the American sheep industry will go to ruin on account of free wool is Prof. Thomas Shaw, of Minnesota, who recently spoke as follows at a sheep breeders' meeting. "It is my conviction that even in the face of free wool we can still grow sheep at a profit, if we grow the right kind. Yes, the right kind. This is a large question, and I cannot enter upon it now. Better days are at hand. Amid the gloom of the present we can see the gleam of that brighter, better morning. Is it not, therefore, to be expected that the sheep industry will not decline and disband in flocks? Is it not a huge mistake? So strongly do I feel on this question, that if my voice could reach every flockmaster in the land, I would say to him, 'Do not commit this folly. Men, like sheep, are good imitators; and as a leader of a flock goes the others; and because some flockmasters have abandoned their flocks, others will do the same. Can none be found to rush along the line between the living and the dead sheep, to stay the upfired hand, and is ready to destroy whole flocks of sheep, which this country cannot afford to do without? The day is near at hand when we would be glad to resurrect those breeding sheep, which, for the sake of a few dollars, have been sacrificed in millions at the shrine of ill-timed apprehension.'"

SHEEP ON THE FARM

The wool sheep, as a rule, are best, but they are especially sensitive to storms, cold and wet. They need more nutritious food than the harder kinds, or they will not stand the winter at all well. Such breeds, therefore, are most profitable only under proper conditions. All sheep do better upon a variety of food. When of pasture, they need corn stalks, straw and hay in turns. If grain is fed give it at night. The starving process injures the quality as well as diminishes the quantity of the wool, and affects the wool in the same way. It is said that Dorset ewes will face any dog and fight for their lambs. They are a prolific breed, often giving three lambs, are large and hardy, and are popular because of their qualities for both mutton and wool. A good sheep for this purpose is one that will give you one of the first essentials in raising sheep is to have good sheep. This fact is not too thoroughly impressed upon the farmer who does not raise sheep and mutton, if he would obtain a fair return for his labor and care.

The number of sheep received at the markets in the last year was more than fourfold that received during the ten years previous; cattle doubled, while swine were about the same. There are a number of reasons for this, but especially for mutton has there grown a great fondness. Lambs, dropped in November, well fed until they reach a certain weight, are a ready market near the larger cities, especially in the east. Two or three months later the mothers are fattened, clipped and sold at a good figure. The lambs will bring from \$5 to \$10 a piece. This should be a profitable industry.—Exchange.

THE DEMAND FOR MUTTON.

Americans are fast learning that mutton is an excellent food—not the tough, lean, leathery meat of former days when the production of mutton and mutton was only an uncongenial side issue, but the tender, juicy mutton which we are now raising in many sections. The consumption of mutton has increased threefold within the past decade and ought to increase twenty-fold within a few years. There is no denying that our mutton used to be pretty poor stuff and deserved the reputation it has, but fortunately the latter still clings to it in the minds of many people who would be surprised to learn that physicians prescribe it for patients instead of beef, which it outranks in healthfulness and digestibility. Carelessness or ignorance of the proper method of killing and skinning the sheep had also much to do with the popular disfavor, as it was responsible for the woolly, greasy, and tainted flavor which at times repelled even the most ardent mutton eaters. This objection has now been removed, and tender, juicy meat, properly prepared, is so commonly offered in the markets that prejudice must rapidly give way.

There is no doubt that the mutton sheep has a great future before it. If, despite free trade and high rents, the English farmer can find money in the industry, the American farmer can do no less. The mutton sheep is a natural and political advantage, ought to be able to do it. It is not true that the English sheep raiser has any idea of going out of the business. The number of sheep in that country has declined, owing to last year's great drought, but at this autumn sales of the sheep, the prices have prevailed. A Lincoln ram was sold for \$700 and nineteen others of the same breed averaged \$150 each. Another lot of twenty averaged \$140 each. At a Scotch ram sale one Border Leicester ram brought nearly \$500 and two others \$500 each. The same breeder sold thirty-two rams at an average of over \$200.

To be able to pay these prices farmers must not only make money heretofore, but they must be satisfied that there is still some to be made and that it is to be obtained only by the use of the finest rams procurable. The importance of breeding only the best has been too much overlooked in America. We are only slowly realizing that it is not the quantity but the quality that counts. While we may find that one good animal may cost more than ten of the inferior ones, it will bring considerably more when marketed, and meantime the greater expense of maintaining two animals must be set off against the original cost.

WOOL SITUATION.

The Boston Advertiser of November 2, in stating up the wool situation among other things says: "The expected advance in the cost of foreign wools which was thought would follow the removal of the duty was not only not realized, but the country has not panicked out at all, and now that the flurry of the change is over it looks as though it would be a little difference in the market of the world whether this country exacted a duty on wool or not. This country is a large consumer of wool, but we also raise a large amount, and our wools naturally depend on the home consumption for a market. As yet manufacturers depend largely on domestic wool from their mills, as outside of the few of the finer wools which have been used here for years home manufacturers know little about the new kinds that are now available. By degrees they will probably get used to other kinds of wool, but at the same time, as long as the production of wool in this country holds up to its present quantity, our purchase of foreign supplies will naturally be limited. With all of the flurry caused by the removal of the wool tariff practically passed away, the outlook for any higher prices for domestic wools is not very promising, and the trade have generally settled down to meet the situation as it is. Manufacturers are causing the shuttle to travel in the outcome of their competition with the mills of Europe than they are in speculating in wool, and there will probably be only a quiet call for supplies from now on, until the larger mills, who are at present stocked, are again forced to come in for supplies. Advice regarding the cost of wool abroad are not at all alike, some reports saying that this is the cheapest market of the world for American manufacturers to buy in, while others offer choice wools to be laid down here on this Australian clip, at prices 4 to 6c lower per scored pound, than the wools can be bought for at present. There is certainly nothing apparent to induce any buying large quantities of wool, such as the wool is needed to use at once, and it is by no means surprising, that those buyers who are in position to wait, are doing so.

There is yet quite a business doing in territory wools, but purchasers are confined more to smaller parcels than in the case for a couple of months past. The range quoted for choice fine medium wools is yet on the basis of 34¢ to 35¢ scored, although lots of 4 to 6c lower per scored pound are being offered. Oregon wools are going lower as to quality. For the best fine, about 34¢ to 35¢ is yet not out of the way to quote, although sales at these prices are not common. Oregon wools remain quiet with the market about steady. Texas wools continue in quiet demand, with best 12-month growth springing about the same basis as choice territory grades. California wools rule quiet with no material change in the market.

EVERY MAN

Should be possessed of certain information, without which millions contract nervous and most destructive habits which habitually make young men permanently aged, pale, haggard, listless, devoid of ambition, easily tired, languid, forgetful and incapable. All madhouses and swell lists of suicides, separate husbands and wives, untold sufferings to millions, even unto the third and fourth generations, can do no better service to the rising generation than to place in their hands the information and warning contained in a little book recently prepared by a staff of medical specialists, who have had vast experience in dealing with the grave maladies hinted at and who feel that they owe it to humanity to warn the young of the land against these most destructive habits, which are far more prevalent than any layman can imagine, and which if persisted in gradually undermine the constitution, and finally destroy the future happiness of the victim. Cut out this notice and enclose it to Dr. Hathaway, 1231-2 E. Commerce street, San Antonio, Texas, and the book will be sent free of charge from observation, in a plain sealed envelope.

AGE IMPROVES IT.

The Youth's Companion is soon to enter upon its sixty-ninth year of publication and as one says who has been a constant reader of its columns for more than thirty years, it has steadily improved year by year. Its articles today cover the whole field of life and experience, furnishing a vast amount of valuable and entertaining reading of a character not found elsewhere, and of so great a variety that The Companion interests alike each member of the family. The prospectus for the volume of 1895 announces an unusual array of attractions; fourteen serial stories, a wealth of short stories, anecdotes, humorous sketches, adventures, science and home articles, timely editorials on all important questions, and more than two hundred original poems of the highest class.

Full prospectus and specimen copies sent free on application. New subscribers receive the paper free to January 1, 1895, and one year from that date, it comes every week. Finely illustrated. THE YOUTH'S COMPANION, Boston, Mass.

OUR SEWING MACHINE.

A Bank President's Testimony to Its Worth. Kemp, Tex., Oct. 30, 1894. The Stock Journal Publishing Co., Fort Worth, Texas. Dear Sir: I will say that I got the sewing machine and am well pleased with it. The machine gives perfect satisfaction in every respect. Will advise those who are in the market for a good stock pad to correspond with you. Yours respectfully, W. C. MASON, President Kemp Bank.

Every Day in the Year.

The "Great Rock Island Route" runs a solid vestibule train to Kansas City and Chicago, leaving Fort Worth at 8:15 p. m. The train also lands you in Denver or Colorado Springs for breakfast second morning, only one business day out. For Lincoln, Omaha and other Eastern Nebraska cities, it saves a whole night's ride as via any other line. The equipment, road bed and motive power are strictly first-class and "up to date." Our rates are cheap as consistent with first-class service and the requirements of safety. If you are going East, North, Northeast, West or Northwest, call on the nearest ticket agent for maps, information, and etc. or address the undersigned. J. C. McCABE, G. P. & A., Fort Worth, Texas.

Important Information. The "Rock Island Route" is now running through vestibule sleeping cars between Texas and Colorado; leaving Fort Worth daily at 8:15 p. m., and arriving in Denver at 7:45 second morning. If you intend making a business or pleasure trip to Colorado this summer, call on your nearest ticket agent, or address the undersigned for folders, rates or information. It is needless to add that we still continue to run the "River" to Kansas City and Chicago with out change of cars. Purchase your tickets via "The Great Rock Island Route," and get full value for your money. J. C. McCABE, G. P. & A., Fort Worth, Texas.

You do not need to spend \$300 for a watch. A dollar and a half sent to the Stock Journal office, Fort Worth, Texas, will get a watch that is guaranteed to keep good time. See advertisement elsewhere in another volume.

FULL DESCRIPTION.

THE STOCK JOURNAL SEWING MACHINE is a possession of great merit. The combination embodied in its construction is the result of 25 years' experience in manufacturing and selling machines. Nothing that is at all experimental has been allowed to creep in, thus insuring to the buyer that the features of this machine are reliable and durable. The greatest care has been exercised in making the construction extremely simple, and yet the proper proportion of parts to give strength and easy running qualities have not been overlooked. It has an eccentric movement causing the shuttle to travel in a circular course, a noiseless double four motion drop feed, operated positively in a very simple yet unique manner, and it is the only feed motion ever invented where the movement of any of the parts does not exceed the length of the stitch. The advantage in this is striking, as wearing of the parts is almost entirely done away with. The length of the stitch is regulated by a thumb screw in front of the upright arm; a very convenient place for the operator and it can be regulated so as to make a very long or short stitch. The machine uses a double thread and makes a lock stitch. The upper thread is drawn into position without passing through any holes until the eye of the needle is reached. The upper tension is reliable, and is fitted with a liberator, which enables the operator to remove the goods without danger of unthreading the machine, as by removing the spool from the automatic and requires no change in sewing heavy goods with a long or short stitch. The shuttle is a marvel of simplicity, is self-threading, carries a very large bobbin and is made of the finest of steel. The needlebar is round with adjustable steel bearings packed above and below with felt, which retains the oil so that it does not run down and soil the thread or work. The needle is self-setting with short blade and large shank, which gives the needle strength. The machine is fitted with a loose hand wheel which enables the operator to wind the bobbin without running the machine. The work need not be removed, nor is it even necessary to unthread the machine, as by turning the hand wheel the pin and replacing it with an extra spool, the bobbin can be again filled with thread. The automatic bobbin winder is so reliable that an imperfectly wound bobbin is impossible. The arm is high and correspondingly long, and gives plenty of room for handling all kinds of work. The head of the machine is firmly hinged to the table, and the bed-plate is in-laid or counter-sunk into the wooden table. It rests on rubber cushions, which absorb all the jar and noise. All the parts subject to wear are made of the finest steel and carefully hardened and so fitted that the machine can be run at the highest speed without injury or danger of getting out of order. The general design of the machine is very pleasing, and great care has been taken to have the japanning and ornamentation of the highest character. The fly wheel, all of the bright parts, together with the under parts are polished and nickel plated. The material used in the cases is either black walnut or oak as desired, and the trimmings are all nickel-plated. The stand is light and graceful, yet so proportioned as to give it great strength. It is nicely finished throughout and both treadle and drive-wheel are hung on adjustable steel centers, and it is mounted on four nickel plated castors. The attachments furnished with the Stock Journal Machine, are made of the best steel; highly polished and nickel plated and include the following: Rubber, leather, binder, underbrider, four hammers of assorted widths, shirring plate, quilting, thread cutter, foot hemmer and folder. Each machine is also supplied with the following accessories: One dozen needles, six bobbins, sewing guide, guide screw, oil can, filled, large and small screw drivers, wrench, certificate of warranty good for five years, and fully illustrated instruction book.

There are four ways to get it. 1st. To any sending us \$22.00, we will send the Journal and this machine, paying all freight and charges. 2d. To any one sending us 20 subscribers and ten dollars for same and fifteen dollars additional, \$35.00 in all, we will send the machine prepaid. 3d. To any one sending us 20 subscribers and \$20.00 to pay for same, and \$4.00 in addition we will send the machine prepaid. 4th. To any one sending us 32 subscribers and \$32.00 to pay for same, we will send the machine freight paid. NOTICE: All subscriptions must be paid in advance. You need not send them all in at one time, go to work and send in as fast as you get them and you will be credited with them and when you get up the number, the machine will be sent as proposed. The above description tells all about the machine. We can add nothing to the description after saying that if after fifteen days trial it fails to do any work done by any family sewing machine you may return it to us and we will refund you every cent you have paid on it. Remember that we cannot send the machine C. O. D. for the reason that we pay cash in advance for them. If you have any doubt about us carrying out our contract you may inquire of any bank, Express Co., or business man in Fort Worth. Sample machine may be seen at our office. STOCK AND FARM JOURNAL, Fort Worth, Texas

The Southern Pacific Sets the Pace.

2-1-2 days to Los Angeles, Cal. 3-1-4 days to San Francisco, Cal. On November 1, 1894, the Southern Pacific will inaugurate their new train, "Sunset Limited," with a complete Pullman service. It has appointed cars, consisting of Composites, each "Golden Gate" and "El Capitain," each embracing baggage compartment, barber shop, billiard room, cafe, smoking parlor and library, modern double drawing room sleepers "Paso Robles," "San Ardo," "San Lucas" and "San Vicente" dining cars, "Del Monte" and "Castle Craig" general parlors, in which meals will be served a la carte. This magnificent train, vestibuled throughout, lighted with electric gas system, the most perfect of modern appointed passenger trains, will leave New Orleans once a week, every Thursday, at 8 p. m., for Los Angeles, 60 hours, or 2-1-2 days, to Los Angeles, and 7 hours, or 3-1-4 days, to San Francisco. Connections will be made at New Orleans, Houston, Tex., San Antonio, Tex., Los Angeles and San Francisco, with all lines diverging. Special attention is called to the fact that the finest passenger service between the Atlantic and Pacific oceans will thus be inaugurated by the "Sunset Limited" over the famous Sunset Route.

No extra charge whatever will be made for passage on this train in addition to regular first-class unlimited, limited, single or round-trip tickets, beyond the regular Pullman charges for sleeping car accommodations, as charged on regular trains. For further information, circulars, time tables, etc., apply to J. S. SCHRIEVER, Traffic Manager, New Orleans, La. A. G. P. & T. A., Houston, Tex. S. F. B. MORSE, G. P. & T. A., New Orleans, La.

The International Route.

The International and Great Northern railroad is the shortest and best line between points in Texas and Mexico and the principal cities of the North, East and South. Double daily train service and Pullman sleepers on night trains between Galveston, Houston and St. Louis; Laredo, San Antonio and St. Louis; and between San Antonio, Austin, Taylor and Dallas, via Hearne. As a live stock route to Northern markets it is the quickest and best. Lots of ten cars or over will be taken through in solid trains and in the quickest possible time. Shipments to Chicago via St. Louis are given the benefit of the St. Louis market. Facilities for feed, water and rest in transit are provided at San Antonio, Taylor, Little Rock, Longview, Texarkana, Little Rock, Poplar Bluff, Cairo and St. Louis. For further information call on nearest ticket agent or address J. E. GALBRAITH, G. F. and P. Agent, J. D. PRICE, A. G. P. & A., Palestine, Tex.

Remember.

Holiday excursions to all points in the Southeast will be sold over the Texas and Pacific railway, at one fare for the round trip, December 20, 21 and 22, 1894; limited for return passage to 30 days from date of sale. GASTON MESLIER, Gen'l Passenger and Ticket Agent.

Don't ask us if the Journal Sewing Machine is as good as some other sewing machine. It is almost unequalled and there is no better machine made. Our guarantee relieves you of all risk. See All descriptions in another volume.

THE UNION STOCK YARDS, CHICAGO.

Consolidated in 1895. The Largest Live Stock Market in the World.

The center of the business system, from which the food products and manufactures of every department of the live stock industry is distributed from.

Accommodating Capacity: 50,000 Cattle, 200,000 Hogs, 30,000 Sheep, 5,000 Horses.

The entire railway system of Middle and Western America centers here, rendering the Union Stock Yards the most accessible point in the country. The capacity of the yards, the facilities for unloading, feeding and shipping are unlimited. Packing houses located here, together with a large bank, capital and some one hundred different commission firms, who have had years of experience in the business; also an army of Eastern buyers insure the best market in the whole country. THIS IS STRICTLY A CASH MARKET. Each shipper or owner is furnished with a separate yard or pen for the safe keeping, feeding and watering of his stock, with but one charge of yardage during the entire time his stock remains on the market. Buyers from all parts of the country are continually in this market for the purchase of stock, cattle, stock hogs and sheep.

THE GREATEST HORSE MARKET IN AMERICA.

The Dexter Park Horse Exchange

With its dome lighted amphitheater, with a tunneled driveway through the center an eighth of a mile long, and a seating capacity of 6000 people, is the greatest horse show arena in the country for the sale or exhibition of "crappy" turnouts, coaches, fire drivers or speedy horses. Besides this, there are daily auction sales established here, which is claiming the attention of buyers and sellers from all parts of the country. This is the best point in the West for the sale of blooded stock. To the stock growers and shippers of TEXAS, KANSAS and the WESTERN TERRITORIES, you are invited to continue with us by billing your stock through to the active and quick market of Chicago.

The Live Stock Market of St. Louis. THE ST. LOUIS NATIONAL STOCK YARDS

Located at East St. Louis, Ill., directly opposite the City of St. Louis.

Shippers Should See that their Stock is Billed Directly to the NATIONAL STOCK YARDS.

F. G. ENOX, Vice President, CHAS. T. JONES, Superintendent

THE KANSAS CITY STOCK YARDS

Are the most complete and commodious in the West and second largest in the world. Higher prices are realized here than further East. This is due to the fact that stock marketed here is in better condition and has less shrinkage, having been shipped a shorter distance, and also to there being located at these yards eight packing houses, with an aggregate daily capacity of 9000 cattle, 40,000 hogs and 4000 sheep. There are in regular attendance sharp, competitive buyers for the packing houses of Chicago, Omaha, St. Louis, Indianapolis, Cincinnati, New York, Boston and the Export trade to Europe. All the eighteen railroads running into Kansas City have direct connection with the yards.

Table with 5 columns: Cattle and Calves, Hogs, Sheep, Horses and Mules, Cars. Rows include Official Receipts for 1893, Slaughtered in Kansas City, Sold to Feeders, Sold to Shippers, Total Sold in Kansas City.
