HORSES AND MULES.

FACTS ABOUT MULES. In the general depression, the low price of horses and mules is attributed to the rapid substitution of electrical and other motors in the street car service of towns and cities.

Missouri can boast of the largest number of mules of any state, January 1894, the number being 256,828, valued at \$45.51 each.

After John Bull's Money. It has now been definitely decided that the horses belonging to Richard Croker and M. F. Dwyer which are to uphold the American colors on the English turf the coming season, will be shipped for their new training ground next Saturday.

Messrs. Croker and Dwyer have arranged to send their formidable stable over by the Mississippi of the Atlantic Transport Company.

Mighty George Wilkes. George Wilkes, who was foaled in 1856, died at the age of 28. His stud career, which may properly be said not to have begun until he was 17, covered but nine seasons, yet in that time he accomplished such a record that he may, without presumption, be called the greatest of modern trotting sires.

formers, headed by Harry Wilkes, 2:13 1-2, for many years the acknowledged champion trotter of the racing world whose victories were gained and reputation made before the advent of the "skinnor" or "bicycle sulky."

The head of the house was once himself the champion stallion, and since more than one champion record of his dynasty, and one after another have proceeded to "add to golden numbers" until his name is on the record books as "fastest on record" they have not held that what ones they have.

George Wilkes, was, as we have said, foaled in 1856, and bred by Col. Pelter, of Newburg, N. Y. He was sired by Rysdyk's Hambletonian, out of a mare named Dolly Spanker, whose pedigree is recorded as by Henry Clay, out of Telegraph by Baker's Highlander, which version, once regarded as fully established, has, in the light of recent researches, been shown to be in serious doubt, so much so that it is regarded as highly probable that the true version has not and never will be disclosed.

It is not an unusual thing for a cow of the right type to return nearly three times the net profit that one of the beef type will. We are very much in need of more knowledge on the amount of food of support required by dairy cows. If we assume that it requires \$30 worth of feed to support a cow well, and butter brings 20 cents a pound, it will take 125 pounds of butter to have cows whose annual yield far exceeds this amount.

Immigrant Information. The "Rock Island Route" is now running through vestibule sleeping cars between Texas and Colorado, leaving Fort Worth daily at 8:15 p. m., and arriving in Denver at 7:45 second morning. If you intend making a business or pleasure trip to Colorado this summer, call on your nearest ticket agent, or address the undersigned for folders, rates or information.

The Southern Poultry Journal. Is the only second-class poultry journal in the South. Has but one competitor on earth. Its editor has not been "a fencer all his life," has set hens and raised chickens only nine years.

DAIRY.

The principal causes of impure milk are: Impure air in the milking place, bad food, foul water and filth; and as they are all causes readily controlled, they are inexcusable. The farmer who exposes his cows to such conditions has no right to complain of low prices and lack of customers.

FOOD OF SUPPORT. Farmers should bear in mind that a cow needs a certain amount of food support; that is, to build up waste tissues, keep up animal heat and supply the work on the muscular system produced by locomotion.

It is not an unusual thing for a cow of the right type to return nearly three times the net profit that one of the beef type will. We are very much in need of more knowledge on the amount of food of support required by dairy cows. If we assume that it requires \$30 worth of feed to support a cow well, and butter brings 20 cents a pound, it will take 125 pounds of butter to have cows whose annual yield far exceeds this amount.

STRIppINGS. Creamery butter outsells dairy butter in the market because the best farm butter is sold to private customers, and does not reach the market. The poorer grades go to the country stores and determine the rating of "dairy butter."

That old and solid school, the Fort Worth Business College, reports a large attendance. The faculty is made up of experienced business men and women—all specialists in their line. It will pay our young people to write to Prof. Prentiss and receive a beautiful catalogue.

work, and have it always at the same degree of ripeness, regardless of the weather or surroundings.

In a private dairy of Jerseys there is but play for one's genius, and a man works best with that for which he has a love. If he can not knock out a profit from such a herd he has no business with one. What a good conscience one can have when it comes to selling one or trading it to his neighbor!

When a calf is drinking milk it should be fed slowly and with intervals of rest and cold milk should never be given, as this chills the stomach and provokes indigestion.

God food never creates the character nor temperament of a cow, nor makes her a good dairy animal, any more than it will make a race horse out of a plug plodder. It supports the animal, but will never make a good cow out of a small milker, and there is no use wasting effort.

SITUATION WANTED. A lady with son 14 years old wants a situation as housekeeper for widower on ranch or stock farm. Boy can and will make himself generally useful. Address M. E. G., care Texas Stock and Farm Journal.

THE most successful farmers and gardeners buy their seed directly from the growers; for this reason we raise largely the most risky kinds, especially Cabbage and Onion Seed. This latter is extra fine this season. Our catalogue contains more varieties of vegetable seed, and none more of the new that are really good—see outside cover for an illustrated selection from our new specialties, which we will sell at half rates. Catalogue free.

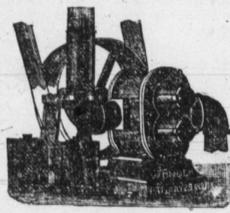

PERSONAL! BLOOD ROOT COMPOUND is nature's best blood purifier and blood builder. By causing pure, rich blood to flow through the entire system, it speedily cures Rheumatism, Neuralgia, Headache, General Debility, Dyspepsia and all nervous diseases. For weak kidneys and Bright's disease it has no equal on this God's green earth. It is no man's made medicine. It is a product of nature and man never did or can make its equal. Sick people grow better from the first few doses. Weak and puny folks grow strong and healthy after using a single package. BLOOD ROOT COMPOUND is the greatest discovery of the age. 5,000 testimonials of its value. Price, 50c a package of over 100 doses. Our agent will supply you, or address THE KING CHEMICAL COMPANY, 571 State Street, CHICAGO, ILL.

HOTEL WORTH.

COMMISSION DEALERS IN

CATTLE AND RANCHES,

FORT WORTH, TEXAS.

We no longer do a general real estate and live stock commission business, but will in future handle cattle and cattle ranches exclusively.

Our working force has been increased and our facilities in every respect greatly improved, consequently we can now render efficient and valuable aid to those wishing to buy or sell anything in our line.

Give us full description, price, terms, etc., of any cattle you may have for sale. If your prices are reasonable we will send you a buyer.

If you are a buyer, advise us fully as to what you want. We can save you a lot of time and trouble by referring you to some one of our numerous clients who wants to sell just the number and kind of cattle you want to buy.

We are well equipped for handling our business and confidently believe we can make it to the interest of both buyers and sellers to transact their business through us.

It is no trouble for us to answer letters, we therefore invite correspondence from both buyers and sellers, and respectfully invite our friends to call on us when in Fort Worth.

Texas Stock and Farm Journal.

PUBLISHED EVERY FRIDAY BY The Stock Journal Publishing Co., 407 Main Street, Opposite Hotel Pickwick, FORT WORTH, TEXAS.

Entered at the Postoffice, Fort Worth, Tex., as second-class matter.

Subscribers, Attention! Look at the address label on the Journal sent to you. The small figures opposite your name show the expiration of the time paid for.

Attend the Farmers' congress, which meets at the Fort Worth union stock yards February 19.

Attend the meeting of the Texas Live Stock association of San Antonio, February 12-14.

This year will not witness as many cattle driven and shipped from Texas to the Indian Territory for grass as for the past three or four years.

The Texas State Swine Breeders association meets at Fort Worth union stock yards February 19.

The burning of the Cotton Palace at Waco was a calamity to the state, and for the good of Texas, the Journal hopes that it will be rebuilt in time for another exposition.

The farmers of Texas need not fear over production if they unite in diversifying their crops.

A convention has been called to meet at Houston, Tex., February 19, to make recommendations on the subject of better roads.

The farmers and stockmen of this state have many a lesson to learn on the subject of economy in feeding.

At this time of year the successful farmer or any other, shrewd business man, has the plan for his year laid out.

Do not forget that early in 1896 Fort Worth is going to celebrate the admission of Texas into the Union...

You cannot buy pork as cheap as you can produce it... Note cattle ad. of B. P. Day in this issue...

We were told that a repeal Sherman silver law would cause the biggest fool in the entire economy...

I used to think that a head-on collision was the only way to give the family...

hibiting the importation of English meat, dead or alive. As England never has been a meat exporting country, this is plainly a lick at America.

The secretary of agriculture has sent a bill to both houses of congress providing that hereafter all of the seed and plant distribution be done through the different agricultural experiment stations, and then only to persons engaging to make full tests and report results to the stations, the seeds and plants to be purchased by the stations with a view of their adaptability to localities.

The preliminary work of holding a Farmers' Congress in Fort Worth at even date with the Texas Swine Raisers' association meeting, has been carried out with vigor, and it now rests with the farmers themselves as to whether or not this important meeting shall be a success.

The San Antonio grand jury has indicted several prominent citizens for election frauds.

The Galveston cotton exchange has issued a circular urging the reduction of one per cent in the cotton acreage of Texas.

The president of Mexico has notified Guatemala that Mexico will not concede an inch in the boundary dispute.

M. Felix Faure, minister of marine in the recent French cabinet, was elected to fill the vacancy caused by the resignation of Perier, the French president.

The Waco Cotton Palace burned Saturday night at a loss of \$60,000 with insurance, and you will make money fast.

State Senator Gage has introduced a bill in the Texas legislature, the provisions of which are that the possession of cattle, horses and mules with horns or teeth is declared to be prima facie unlawful.

The emperor of China has issued an edict condemning to death admiral and generals who were in the defense of Port Arthur.

IT SHARPENS the appetite, improves digestion, and restores health and vigor.

THE EMPEROR OF CHINA has issued an edict condemning to death admiral and generals who were in the defense of Port Arthur.

THE DISCOVERY of the liver controls the blood, the "Discovery" controls the liver.

FOR SALE. Ranch bugles, Concord guggies, with hand-bags, felt-leather-top, that not feel much like juggling over what they considered a corpse.

BREEDERS' DIRECTORY. Cape Jasmine Stock and Poultry Farm. J. W. SMITH, Kilgore, Tex. Head of registered Poland-China swine headed by Royal Wilkes, he by Guy Wilkes, 2d, out of Waxiana, one of Mr. Bobbin's best sows.

80-SHORT HORN BULLS-80 I have for sale 30 bull calves, also 25 yearlings and 25 two-year-old bulls, extra quality. W. P. HARNED, Bunceton, Mo., Cooper Co.

J. D. CALDWELL, Brownwood, Texas. Breeder of Short Horn Cattle, Berkshire Hogs and Black Langshan Chickens.

Hereford Park Stock Farm. Rhine, Wise County, Texas. RHOME & POWELL, Proprietors. Breeders and Importers of Pure Bred Hereford Cattle.

Blue Mound Blooded Stock Farm. J. W. BURGESS, Proprietor. FORT WORTH, TEXAS. BREEDER OF REGISTERED SHORT HORN CATTLE. Young stock for sale at all times. Write for prices.

PERCHERONS AND FRENCH COACH STALLIONS. A fine list of which are for sale. CORRESPONDENCE SOLICITED. FOR SALE. I have for sale, and keep constantly on hand a good stock of thoroughbred Duroc Jersey Red Swine. Also pure bred Holstein-Friesian Cattle.

ELMWOOD POULTRY FARM. R. A. Corbett, Proprietor, Baird, Texas. The oldest established poultry yard in Texas, and have won first premiums than any breeder in the State. Bred the following standard breeds: Bred Plymouth Rocks, Black Langshans, White Minorcas, Brown and White Leghorns, and Silver Spangled Game Hens.

JACKS AND JENNETS FOR SALE. I have the largest and finest assortment in the State, send for catalogue. A. J. PERU, La Salle Co., Ill.

TENNESSEE JERSEYS World's Fair Blood. Choice heifers, close up in blood to the "little big cow" of the World's Fair. Romp's Princess 5185. Three young bull, five months old, out of tested daughters of the great Commaisse bull, King Coffee, Jr., 12317, sired by pure Stoke Pogis, St. Lambert bull. Splendid individuals with gilt-edge pedigree. Apply at once and state what you want. W. GETTYS, Ingleside Farm, Athens, Tenn.

AGENTS LADIES OR GENTS. Plaster or collecting goods for all kinds of work, such as painting, papering, and all other work.

HOUSEHOLD.

LYE HOMINY.

Take some old heavy cloth such as thick toweling, make into little sacks enough to hold one-half gallon wood ashes, if the ashes are very strong, if not one gallon. Fill the sacks with ashes, put four or five gallons of water in an iron kettle, and in the sacks of ashes, let boil until the water will bite severely when touched to the tongue. Now remove the ashes, and throw in as much shelled corn as the lye will cover well. Let boil until the hulls will come off easily by rubbing corn briskly between the hands. Now dip the corn all out into clean vessels, throwing what lye remains away. Cover the corn with water, let soak a few minutes, rubbing and stirring the corn well with the hands. Now wash out and return to the kettle, cover with clean water, put to boil, let boil several minutes, then wash to throw away the water, wash as before, return to the kettle, cover with clean water and boil as before. It will need to be washed and put to cook in clean water three or four times, according to the strength of the lye, when it will be very white and can be cooked in the last water until the grain begins to burst, when it is ready for use and if kept in a cool place it will keep till spring. Do not let it freeze, as it injures the taste and softens the corn.

To prepare lye hominy for the table put one quart hominy to cook in a saucepan, cover with new milk, add one tablespoon butter salt to the taste. When it begins to boil stir in one tablespoon of flour which has been fried with milk. Sugar can be added if desired. Fried hominy: Have hot fryings ready, throw in the hominy, salt and pepper, stir off and fry till the grains are very brown.

SIMPLE HOME REMEDIES.

For slight cuts there is nothing better to control the hemorrhage than common, unglazed brown wrapping paper, such as is used by marksmen and grocers; a piece to be bound over the wound.

The pain of a burn or scald can be instantly relieved by the use of bicarbonate of soda. Put two table-spoonfuls of soda in half a cup of water. Wet a piece of linen cloth in the solution and lay it on the burn. The pain will disappear as if by magic. If the burn is so deep that the skin has peeled off, dredge the dry soda directly on the parts affected. Another excellent remedy is equal parts of linseed oil and lime water.

Croup, it is said, can be cured in one minute, and the remedy is simply alum and sugar. Mix a teaspoonful of powdered alum with twice its amount of sugar, and administer it as quickly as possible. Almost instantaneous relief will follow.

To stop bleeding from a cut bind a handful of flour. To remove inflammation from bruises, apply a cloth wrung out in very hot water and renew frequently until the pain ceases or apply raw beefsteak. Coffee pounded in a mortar and rubbed on an iron plate, sugar burned on hot coals, and vinegar boiled with sugar and spices on the hearth and furniture of a sick room are excellent demulcents.

The skin of a boiled egg is the most efficacious remedy that can be applied to a boil. Peel it carefully, wet and apply to the part affected. It will draw off the matter and relieve the sore in a few hours. Sufferers from asthma should get a muskrat skin and wear it over their lungs, with fur side next to the body. It is said to bring certain relief.

Powered starch is an excellent preventive of chapping of the hands, when it is rubbed over them after washing and drying them thoroughly. It will also prevent the hands from becoming sticky and becoming rusty. It is therefore well to have a small box of it in the workbox or basket, and near your wash basin.

OUR SCHOOLS.

Reader have you a school in your district? If you have not, we pity the children of your neighborhood who are growing up without the benefits of education. You are not doing your part as a parent, a neighbor or a man if you do not do all in your power to establish and sustain a school, and a good one, in your district, for no pen can describe the loss a child sustains by growing up in ignorance. In selecting a teacher do not be content with the belief that anyone will do, but get the best one that can be had. There is as much difference between teachers as there is between day and night, vice and virtue, intelligence and ignorance. Do your best to secure the most proficient teacher, even though you pay double what you would have to pay for the services of an inferior one. You pay freely for other needs—why not pay for education, the most valuable of all things? For a good farm, horse, cow, sheep or implement you do not hesitate to pay a good price, yet for a teacher, in whose care you place the custody of your children, you pay the most miserably low price, and frequent complaint at that. What a mistake; what a sin! No better use can be made of your money than in securing an education for your children. When you get a teacher do not imagine your duty is done. You must visit your children at the school, and get your neighbors to do likewise, that both teacher and pupils may be encouraged to put forth their best efforts. Then you want to keep posted as to what the teacher is doing. You would not trust a cow, a horse or any living animal you possess in the hands of another for this length of time without seeing what care was being taken of it; why, then, your children? Are they less valuable or dear to you? You ought to wish your sons and daughters to grow up useful members of society, and it is your duty to see that they are given an opportunity to do so. The public school is the safeguard of all our boasted liberties; for only education can keep back the encroachments of ignorance and superstition. Again we urge upon you the importance of a school, a teacher and a good one—American Yeoman.

A TEXAS ROUND-UP.

Midland, Tex., Jan. 11, 1895.

Dear Household:

For the last three weeks I have been vainly trying to find something to write about that might interest the Journal readers, but outside of Christmas trees, balls, etc., there has been very little doing. Yesterday, however, I noticed several herds of cattle pass here, and upon making inquiry learned that there was a "round-up" in process about two and one-half miles north of this place. It occurred to me then to make this my subject. True, to the stockmen this is an old, old story, and will hold little interest, but the Journal readers are not limited to stockmen only. A large percentage of them are farmers, and others who have lived always in the city and would not, I venture to say, know the difference between a Texas Long Horn and a Jack rabbit.

For their benefit I will describe to

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

Baking Powder

ABSOLUTELY PURE

the best of my ability a round-up, as is conducted on the plains of Texas.

"Roaming over the vast prairies are millions of cattle, which twice year are gathered into bunches, or herds, and accounted for and marked. It is these semi-annual round-ups and brandings, in which the typical Texas cowboy is the prime mover, and the exciting attending circumstances that lend color to this one feature of Western life."

The cowboy is now looking forward and planning for the coming spring round-up. Before spring comes every detail is well studied. The respective "out-fits," composed of from thirty to forty cowboys, with a cook, have their own ranges to ride. Generally the ranges are about twenty miles square. Each outfit has its own corral—a point to which all cattle in that district are driven. As a rule these corrals are circular, and from 150 to 300 feet in diameter. The start for the range ride is made in the early morning, and by noon the herds are within sight of the corral, and then the "cutting" process begins on what is known as the "mill ground," which is a level tract of land. Around the outer edge of the mill ground the cowboys ride, keeping the cattle on the move, but under control. It is at this point that, working in pairs, they cut the cows from their brand, and drive them into the corral. Next they separate the "strays," or those steers and cows branded with the same brand, for the market, and stampede and allow them to roam for another six months. After this is done the cowboys go into the pen, where the range ride is built for heating the branding iron. These irons are divided into two classes—the brand used for cattle allowed to run on the range, and the "yard" brand. The former is crudely made, but the latter is a studied and registered combination of letters of a fixed design. In the corral the cowboys "work" the herd and drag the calves to the fire, where the respective ear marks are stamped and branded in; then the calves are allowed to run on the range once more.

In these round-ups the cattle are bunched in herds numbering from 500 to 15,000. The cowboy is paid monthly, getting from \$20 to \$30 per month, with all the horses he wants and "grab" thrown in. On the range ride he sleeps on the ground rolled up in his blanket, with his saddle for a pillow. The down Easterner or tenderfoot is wont to look upon the Texas cowboy as something a little less savage perhaps, than the prairie wolf. A few days spent on one of our cattle ranches would convince them how terribly they were mistaken. While among cowboys, as in every calling in life, we find good and bad mixed, yet under a rough exterior we often find great big kindly hearts. I saw a great rough cowboy once at the bedside of a sick brother, nursing and tending him as tenderly as a mother could have done. Among these cow-punchers are often found Eastern college graduates, many of whom are punching for their health—though some are not. It is a great school for any man, for honest dealing is everything. STAKED PLAINS GIRL.

TRACK THE CONSTITUTION.

More Love of Country and Less Greed for Spots Would Result in the Common Good.

St. Jo, Texas, Jan. 19, 1895.

Editor Journal:

In these piping times of peace, it is well to let young America know that at one time it was a healthy maxim, "Old men for council and young men for war." But boys changed now, simply by being changed, young men for council and no war with the sword. Nothing but political fires are burning on the altar of every home. Fire is a purifier to cleanse the forest of decaying vegetation, hence the political parties are the salt of the nation to keep off the rot of corruption.

I remember in the good old antebellum days, our fathers taught us to hate abolitionists, and educated us to shoot with the rifle, as we expected to have to use the gun on the abolitionists as well as on deer, and all those who wore the gray, as well as those who wore the blue, with equal gusto. What we saw, heard and felt from 1861 to 1865. In the language of the queen of Sheba, "the half has never yet been told, where the same size is fitted for surrender at Appomattox the boys in gray ("rags") started home to meet loved ones, who were watching and waiting for their return, but many thousands never came home, but slept on the brow of the hills at Manassas, Peach Orchard, Gaines Hill, Frazier's Farm, Missionary Ridge, Antietam, Jonesboro, Charleston, John's Island, Ocean Pond, Vicksburg, New Orleans and hundreds of other places. What few of us reached home found poverty and not plenty, with homes devastated with property gone, and negroes free. We were all of one accord, in one place, and hunted up the old rusty plow that had lain idle for over four years; we put the old army horse to the plow, broke up the red hills of Georgia and the South, many of which had been fertilized with the blood of the "Yank" and the "Reb." Cotton and corn grew as never before; new fields were cleared, old ones reworked, new blood flows through the veins of many sons and daughters of the blue and the gray. Why have we learned wisdom from experience? It was a dear school, but we will profit by it. The man that composed "Sweet Home" died in a foreign land, and was brought back to be buried on his native soil. And little did we think that from '61 to '65 that we were making history to be read by—subsequent generations.

While some men boast of wisdom, others of power, of money, and other known fact that a large part of the ex-Confederate soldiers are as loyal to the Federal government as are the ex-Federal soldiers. I have predicted that the time would come in the history of this government when those who wore the blue and those who wore the gray would be forced to pool issues on a political line for the prosperity of the constitution and federal union; for the poet has said, "No, ah! see, a doubtful step I tread, a hostile world with terror's raised, and for delusion spread." Have we no prince born in America? Why, when I think of my great ancestors, who marched barefooted, and lived on potatoes, and fought for seven years to throw off the yoke of taxation

without representation, no wonder Patrick Henry said: "Give me liberty or give me death." Any man who has read the history of France can see at a glance where we are drifting. In America the fires of communism are smoldering in the ashes of discontent, in every populous city in the United States. It only has to be fanned into a blaze; then it is you will hear the cries of destruction to persons and property. Why not stop and let us reason together. Have we lost our patriotism and our loyalty through greed for office, and the spoils thereof? Why, sir, in antebellum days men went to congress not for money but for fame and love of country. And in those days the farmers were the money-lenders. Now they are the borrowers, and the borrower is a servant to the lender. It is only wonder that we have political rascals and crooked politicians, and being fed on buncombe, so that some fellow may get his hand into the public treasury, and when he leaves he is like the fat manager after devouring the kernel of the nut he is so fat he can't lie still in a smooth place. Why, sir, if my tongue were touched with a live coal from off the altar of my God, and I was endowed with wisdom from Heaven, and had the oratorical power of Henry Clay, Col. Robert Tombs, Zeb Vance, Ben Hill and Henry Grady, it would be impossible to portray the grandeur and greatness of the United States with proper legislation in the interest of all the people and protection of home and home folks.

Whenever a government taxes its subjects more than a mereittance to pay the expenses of the same economically administered, it violates the original compact and the people should rise

Every Day in the Year. The "Great Rock Island Route" runs a solid vestibule train to Kansas City and Chicago, leaving Fort Worth at 8:15 p. m.

This train also lands you in Denver or Colorado Springs for breakfast second morning, only one business day out.

For Lincoln, Omaha and other Eastern Nebraska cities, it saves a whole night's ride as via any other line. The equipment, road bed and motive power are strictly first-class and "up to date."

Our rates are cheap as consistent with first-class service and the requirements of safety. If you are going East, North, Northeast, West or Northwest, call on the nearest ticket agent for maps, information, and etc. or address the undersigned. J. C. McCABE, G. T. & P. A. Fort Worth, Texas.

The Stock Journal Sewing Machine is one of the oldest and best known makes on the market, and our name is put on it simply because we sell them so low an agent could not afford to handle them if the old name were used. Thousands of these machines are sold yearly by agents at from \$20 to \$25 more than we ask for them.

up as one man and put in a new set to guide the ship of state. Yours for the constitution.

A. P. CAGLE.

In turning a horse out to pasture never frighten him and make him run away from you by striking him with the halter or bridle and yelling at him. This is a very bad habit, heartless and senseless, and results in making the horse very hard to catch. It is often necessary to get a horse up very quickly, and if he is very hard to catch the delay may be quite serious. A bit of apple or grain for the horse every time you go into the field will enable you to catch him at any time you want him. If, when you take him something to eat, you attract his attention by whistling he will learn to come when you whistle at all times of the day or night; only never deceive him; always have something for him when you call him.

SOUTHERN TEX

(Edited by H. H. Carlidge, manager of the Panhandle Texas Stock Farm Journal office, opposite the Hotel, San Antonio.)

Allen McCoy is home from a Montana, says steer cattle are scarce in that country; that the have been mostly marketed, most centers, and the three feeders.

Maj. Keeran of the Victoria is in the Journal office this says that leaving out what was by Bennett & West and O'Brien steers are few in his section.

Lon Allen thinks that a Ber Poland China cross makes the rancher hope that is the sort he likes. Nat Powell, Dimitt county, is the cross.

Nat Powell, the Golda coun dealer, has gone to Missouri for young bulls.

Mr. John Shand, manager of "Leon ranch," Bexar county, is in the Journal office this week. He gotten out a very handsome cow of their thoroughbred Follies herd, which is the largest herd in the Panhandle.

Texas is long and and all live stock just now, and any one who would be very desirable would be so cheap. Consider your fine climate, low taxes, investors ought to be interested in putting money in land. As the railroads are more than ever to help, wouldn't it be good time for Texas land to make an organized effort to get outside capital in Texas lands and buyers who as a great good a few years ago, and when now more than we did it debt and low value for our make the struggle a hard one. We do not head this way. Let's not jump the gun on our as fast as we did before.

Texas is rapidly becoming a as well as a breeding state.

Maj. McMurtry of the Wichita country, is down after a cow thousand dollars.

Mr. Witherspoon of With Dross, South Texas, has sold a pair of Fed and marketed abroad winter, a thousand head of Dross, steers, and says they are well.

A syndicate has proposed to deep water at Aransas Pass on from that a boat house is to be raised. Latest reports are to be that about half that sum has subscribed in two counties. Will produce of the great lower Mississippi valley comes down through to market, who can estimate her loss?

Al McEdden says if the bug good enough, some dandy eye will be raised from tolerably of Mexican cows.

A. J. Walton, Jr., is preparing to migrate a farm in the Panhandle. He says he will have nothing but the best on the ranch.

There is now a considerable in Mexican cattle in the local in Recently J. H. Campbell & Co., 814 West of Houston, Tex., sold Mexican cattle at \$14 per head 400 head to another party at head. The cattle were in good head, and there will be a number other shipments here for sale.

Mr. Editor: The above, from the "Port of Call" and "The Daily" seem to bear out a statement in the last Texas Farm and Journal. What is the matter? One of your mistakes, evidently. - Reader Rose, Texas.

Nothing the matter, and not any discrepancy. Several ago, several herds were taken on the line into Mexico from Texas Arizona for grazing purposes, and that they by the \$20 duty by the McKimber law. Under the duty of \$2 per head these cattle turning, and these are the cattle which there is considerable in the local market.

M. T. Brown & Co., of Fort Worth, dealers in wind mills, pumps, well fittings, cypress tanks, etc., have an advertisement in the Journal. This is a first-class firm, and those thinking of purchasing anything in their line should consult them before buying.

J. P. Gordon of Sulphur Springs called at the Journal office Wednesday. He reported that Gordon Bros. and some of the other Sulphur Springs feeders had on Tuesday sent sixteen tons of fed cattle to market, for which they expect to get 4 cents. They were a fine lot.

Jno. Gamel of Madison county was in Fort Worth Sunday, having just returned from a trip to Kansas city. He said that he had been to the fair and that he had seen everything in good shape. He left Monday for Kaufman, where he expects to buy some cows to ship to the Territory.

James J. H. Gregory and sons, Marblehead, Mass., one of the best and most reliable firms of seed growers on the continent, send the Journal one of their elegant, illustrated catalogues, a work that while advertising their seed, is valuable, and every gardener in the land should have one. This firm sends them free to all. Write for one.

That up to date cracker Jack Texas railroad, the Texas Midland, has sent the Journal one of "daily reminders" done in Morocco, the same being a calendar, diary and memorandum combined. It is a handy and useful little article, and General Manager Green and General Freight and Passenger Agent Reid have the Journal's thanks.

James E. Aronson, Zenith, Tex., contributed a practical article on the benefits of irrigation to last week's issue of the Journal. He is 70 miles from the nearest railroad point, and has a large family, yet he made a fine thing on three acres of irrigated ground not a furrow of which was planted until in May. It is these practical lessons which count.

Baker Bros., one of the best known firms of nursery and seed men, tell the Journal's readers of what they have for sale, beginning with this issue. By handling nothing but the best of stock and by dealing fair and square with their customers, this firm has built up a business second to none in the state, and all readers of this paper will make no mistake in patronizing them.

It is a usual custom with dry goods firms to make a big drive in some line of goods every now and then to attract attention to their store, and often

PERSONAL.

Capt. Chas. Goodnight was in from the Panhandle Thursday and Friday.

J. W. Overton of Tyler, Tex., a well to do stockman, was in Fort Worth Saturday.

Col. Job J. Smythe of Itasca was among the stockmen who visited this city Friday.

W. H. Gibbs of Goree, Tex., a stockman, was a visitor at the Journal office Saturday.

L. H. Hill, a well known citizen of Albany, Tex., was registered at Hotel Worth Friday.

R. M. Dickinson, a Haskell county cattleman, was pleasant caller at the Journal office Monday.

R. B. Moore and H. Stewart of Dublin were in Fort Worth Wednesday. These gentlemen were in the market for some stock cattle.

N. F. Hood of Fort Worth, dealer in buggies, has a local advertisement in the Journal. He sells the best makes of buggies at close prices.

Schmitt & Martinson, Fort Worth, general blacksmiths, do all kinds of work in their line, and in first-class shape. Take you work to them.

C. M. Bolles of Dallas, a real estate agent, offers a fine Dallas county farm for sale in this issue of the Journal. Here is a chance for investment.

Pete Stromstad, prince of mixers, tells the Journal readers of the location of his saloon in this issue in another column. Try his free lunch.

T. J. Lemmon of Haskell, a cattleman, called on the Journal while in Fort Worth Monday. Said that grass is fine and cattle fat in his district.

Capt. S. W. Easton, D. L. Knox and brother, were in Fort Worth Wednesday, and called at the Journal office. These gentlemen were in the market for a bunch of yearlings.

Sam Wilm of Bosque county, a well known stockman, was in Fort Worth Saturday, and called at the Journal office. He reports stock of all kinds looking well in his locality.

While in Fort Worth put up your team at the Avenue Wagon Yard, and if you have cattle, horse or calf calves for sale, you can sell them there. See their advertisement for location.

G. A. Morris, retail cash grocer, opposite the Fort Worth High School, carry a large line of farm and ranch groceries which they sell cheap for cash. Read their advertisement in this issue.

J. Addison, Jacksboro; W. H. Breeding, San Antonio; N. L. Waggoner, Breeding, and A. P. Belcher, Henrietta, were among the prominent cattlemen registered at Hotel Worth Wednesday night.

J. C. Matthews, manufacturer, of Gorman, writes the Journal, and asks to continue his advertisement, as the ad he has been carrying has brought him a great many inquiries and business as well.

Wm. H. Glascock of Brunswick, Mo., offers some extra fine seed corn for sale. There is as much difference in corn as in any other kind of seed. Send to Mr. Glascock for a catalogue, which he will send you free.

The Avenue Grocer Co., Thirteenth and Jennings avenue, Fort Worth, Texas, are the place for farmers and stockmen to do their trading. See their advertisement in another column.

M. C. Hancock and J. A. Shawver of Seymour, Texas, cattlemen, were in the city Monday and called at the Journal office. They report cattle looking fine in their country, but the continued drought is making stock water very scarce.

F. W. Axtell, wholesale dealer in Monitor steel and wood wind mills, has an ad in this issue. There is a large demand for windmills just now, and Mr. Axtell should be consulted before concluding purchase as he can make it well worth while.

A. Blance & Co., collectors and exporters of wool, bolls and plants, have a number of the Journal for two beautiful catalogues, descriptive of a number of new plants and bolls collected, one among which is Sacaline, the much discussed new forage plant.

M. T. Brown & Co., of Fort Worth, dealers in wind mills, pumps, well fittings, cypress tanks, etc., have an advertisement in the Journal. This is a first-class firm, and those thinking of purchasing anything in their line should consult them before buying.

J. P. Gordon of Sulphur Springs called at the Journal office Wednesday. He reported that Gordon Bros. and some of the other Sulphur Springs feeders had on Tuesday sent sixteen tons of fed cattle to market, for which they expect to get 4 cents. They were a fine lot.

Jno. Gamel of Madison county was in Fort Worth Sunday, having just returned from a trip to Kansas city. He said that he had been to the fair and that he had seen everything in good shape. He left Monday for Kaufman, where he expects to buy some cows to ship to the Territory.

James J. H. Gregory and sons, Marblehead, Mass., one of the best and most reliable firms of seed growers on the continent, send the Journal one of their elegant, illustrated catalogues, a work that while advertising their seed, is valuable, and every gardener in the land should have one. This firm sends them free to all. Write for one.

That up to date cracker Jack Texas railroad, the Texas Midland, has sent the Journal one of "daily reminders" done in Morocco, the same being a calendar, diary and memorandum combined. It is a handy and useful little article, and General Manager Green and General Freight and Passenger Agent Reid have the Journal's thanks.

James E. Aronson, Zenith, Tex., contributed a practical article on the benefits of irrigation to last week's issue of the Journal. He is 70 miles from the nearest railroad point, and has a large family, yet he made a fine thing on three acres of irrigated ground not a furrow of which was planted until in May. It is these practical lessons which count.

Baker Bros., one of the best known firms of nursery and seed men, tell the Journal's readers of what they have for sale, beginning with this issue. By handling nothing but the best of stock and by dealing fair and square with their customers, this firm has built up a business second to none in the state, and all readers of this paper will make no mistake in patronizing them.

It is a usual custom with dry goods firms to make a big drive in some line of goods every now and then to attract attention to their store, and often

first-class goods are offered below cost. Such an instance is found in the advertisement of G. Y. Smith in this paper, where ladies' gloves and underwear are offered at simply astounding prices. The high standing of this firm is all the guarantee that any one could wish, and the Journal hopes that its readers will take advantage of these unparalleled offers.

R. T. Miller writes the Journal an interesting letter on the needs of the people of West Texas. There is no getting around the fact that there is such a condition as he cites, and if all the Texas law makers could only pay a visit to that part of the state in which Mr. Miller lives, they would not be long in making up their minds to grant relief to the people who have investments in the semi-arid section.

The Drumm-Plato Commission company well and favorably known to all of Texas stockmen, has notified the Journal that M. E. Wilson is now treasurer of the company, vice T. S. Hutton, the late governor, and member of the Evans-Hutton-Hunter company. Mr. Wilson was elected treasurer of the Drumm-Plato company at the last annual meeting of the board of directors.

Mrs. J. C. Frye of Plano, Tex., accompanied by a young lady who did not leave her name, paid the Journal office a very pleasant, though brief, call Tuesday. Mrs. Frye said she and her husband and I were well pleased with the Journal. I got a "great deal" of satisfactory information from its columns relative to raising and marketing household work, and my husband finds it invaluable in the care of his stock.

A. Laird of Vernon, Texas, a live stock dealer and feeder, was in Fort Worth Tuesday. He said: "I would like to buy a bunch of good feeding, weathers somewhere near Vernon. I have a bunch on feed now, am feeding the corn in the ear. I give them sorghum for roughage, and member of sorghum or cotton seed meal and sorghum. Hulls are so terribly scarce now that feeders are looking to other stuff for roughage."

Coon Dunham, a well known Coleman county cattleman, was in Fort Worth Sunday. He said: "Cattle are holding on to their flesh better than I have ever seen for the time of year. I do not believe they will get sound. Grass is still fine and my section there is no scarcity of water for stock. Some yearlings in my country brought \$22.50 a few days back. They were extra fine, and show plainly how it pays to breed good stock."

B. E. Potter, of Green county, Ill., says: "I am well pleased with my white French artichokes. The tops are as good for cattle and horses as the tubers are for man and horse. The fact is, I have nothing on the place but what will leave corn for the artichoke patch. Their yield is wonderful." Mr. J. P. Vlesinger of Melville, Ill., offers to send the Journal's readers a copy of the planting, culture, harvesting and yield record. Send him a postal card and get it.

W. E. Cobb of Wichita Falls, ranching cattle in Lamb county, spent some days in Amarillo this week, selling 24 head of sorghum-fed cattle, and was well pleased with the sale. He is delighted with the sale of his entire stock of cattle, about 3000 head, for spring delivery, at his ranch at \$11 per head, to Mr. E. Brody of Childress. Mr. Cobb bought the cattle about a year ago at \$7.50 per head, and taking the loss of grass and water, it shipped and sold, he has cleared the handsome sum of about \$25,000. Am- rillo News.

C. W. Merchant, a well known Abilene cattleman, was in Fort Worth Monday and Tuesday, and went south on a business trip. The fact is, he has been little or no inquiry for two in my part of the country, and the fact is there are very few cattle of this age in the country or westward of the line. A good many of the Montana buyers are getting their supply this year from Texas, and those thinking of the Arizona range a short time since and I find that they have some good cattle in fact their herds are well bred up. I believe the market is better for less than is being asked in Texas."

J. C. Sleson, a cattleman from near Paret, T. T., was in Fort Worth Wednesday, wanting to buy some cows to put on grass in the Territory. He said: "I believe the climate is being an investment that a man can make in the cattle line, and I want a bunch that I can sell off in July or August, and hold the price as long as I can. We have plenty of feed in the Territory, and I would not mind feeding them some. Grass and water is plentiful in our pasture, and we have had no rain since last July, but our tanks all filled up at that time, and we have enough water to last us till next summer."

"Uncle" Henry Stephens and Chas. H. McCann, representing the R. Barse Commission company, arrived in Fort Worth Wednesday from Kansas City, and called at the Journal office. They have had more than 200,000 head of cattle on the market since July 30, and report that the market is better than it has been for some time. They say that there are more cows on the market than there have been for some time, and that the market is better than it has been for some time. They say that there are more cows on the market than there have been for some time, and that the market is better than it has been for some time.

J. H. Paramore of Abilene, a wealthy cattleman, was in Fort Worth Monday. Reports of the city of Midland, Tex., that there will be a great shipping point for grapes, fruits and vegetables. A newly arrived man in our country has a never-ending supply of grapes, and soon as these natural resources are brought into use in watering the ground you will see our section come to the front.

O. M. DeWitt of Fort Worth, a cattleman and sheepman, was a caller at the Journal office Saturday. He said: "There will be, I think, about 400,000 head of mutton sheep marketed from Texas in the spring. At the present time sheep are not doing so well as account of the lack of rain through the fall. You see, with sheep it is very different with cattle. If good fall rains prevail a great deal of wool, and the sheep get fat on the weeds. There are lots of sheep in the neighborhood of San Angelo, most of which are muttons. Within the last few years the sheepmen of Texas have given up the plan of breeding for wrinkles and heavy fleeces, and are using large smooth bucks, and in consequence have a very fair grade of mutton sheep. The exception of New Mexico and Arizona, Texas sheep are raised at a smaller cost than in any other states, but even with that they are not doing so well as they are doing to do. There are different opinions as to whether it is better to raise sheep or not, but I think it works all right. It does not. I see that the lease question is being agitated considerably in the far West, and I think it may result in increased revenues to the state for the first two years, but after that time the lease will not be paid. It is far the best way of the land is concerned 2 cents lease and about 50 cents purchase price would apply to the most of it."

J. I. McWhorter of Baird, Callahan county, was in Fort Worth Wednesday and dropped in at the Journal office. Mr. McWhorter is an old-time and successful cattleman, and wastes every

phase of the business very closely. In a conversation with a Journal man he said: "The cattlemen of this state are not up in the practical knowledge of feeding. I claim, and I have proved by actual experience, that cotton seed meal and sorghum can be fed to cattle longer, and will fatten them faster than meal and hulls. The good feed that is wasted every year would fatten the cattle of two states. Cotton seed cake fed on the grass will fatten cattle nearly as well as meal and hulls. I was talking to a farmer the other day who had been raising 4-cent cotton and complaining of the hard times, and I told him that if he had gone into his own feed when his corn was about matured and topped his corn and pulled his fodder every bit of which he could have saved, and when gathering time came shucked his corn in the field and then saved the stalk and chucks, he could have been in a position to have fattened a couple of car loads of good cattle out of which he would have made more money than out of his whole cotton crop. If every farmer in the country would plant and save it all, then get him a good feed meal and sorghum, he could fatten his cattle from 5 to 50 head of good cattle. He could fatten some sheep and some good hogs, and he need not have any feed when his corn was about matured and topped his corn and pulled his fodder every bit of which he could have saved, and when gathering time came shucked his corn in the field and then saved the stalk and chucks, he could have been in a position to have fattened a couple of car loads of good cattle out of which he would have made more money than out of his whole cotton crop. If every farmer in the country would plant and save it all, then get him a good feed meal and sorghum, he could fatten his cattle from 5 to 50 head of good cattle. He could fatten some sheep and some good hogs, and he need not have any feed when his corn was about matured and topped his corn and pulled his fodder every bit of which he could have saved, and when gathering time came shucked his corn in the field and then saved the stalk and chucks, he could have been in a position to have fattened a couple of car loads of good cattle out of which he would have made more money than out of his whole cotton crop. He could fatten some sheep and some good hogs, and he need not have any feed when his corn was about matured and topped his corn and pulled his fodder every bit of which he could have saved, and when gathering time came shucked his corn in the field and then saved the stalk and chucks, he could have been in a position to have fattened a couple of car loads of good cattle out of which he would have made more money than out of his whole cotton crop. If every farmer in the country would plant and save it all, then get him a good feed meal and sorghum, he could fatten his cattle from 5 to 50 head of good cattle. He could fatten some sheep and some good hogs, and he need not have any feed when his corn was about matured and topped his corn and pulled his fodder every bit of which he could have saved, and when gathering time came shucked his corn in the field and then saved the stalk and chucks, he could have been in a position to have fattened a couple of car loads of good cattle out of which he would have made more money than out of his whole cotton crop. MARKETS.

FORT WORTH MARKET.

This market partook of the characteristics of the big points for the week past. Supplies have been fair and prices steady at the decline mentioned at the close of last week's report.

At this writing the hog market showed an advance of about 5 cents, with the demand strong. There were very few stocks of hogs offered during the week, light and heavy killers have held the boards.

Table with columns: No., Ave. Price, Dock. Price. Lists various commodity prices.

Table with columns: No., Ave. Price. Lists cattle prices.

SELLERS AND CONSIGNMENTS. A. P. Houns, Willis Point and W. J. Logan of the local market were among those who sold cattle.

CHICAGO LETTER. Chicago, Jan. 21.—Last week 3600 head of Texas cattle were received, being a decrease of 1000 head as compared with the same week a year ago.

At the present price of meal, feeders ought to be very well satisfied with present prices. We do not believe that values will go much lower.

During the week the following were included among the sales of Texas cattle: 1132 pounds, \$4.25; 23 steers, 922 pounds, 3.50; 18 steers, 1212 pounds, 4.00; 199 steers, 1132 pounds, 4.05; 150 steers, 1142 pounds, 3.85; 27 steers, 1012 pounds, 3.40; 29 bulls, 1227 pounds, 3.15; 10 bulls, 1237 pounds, 3.65; 166 steers, 1047 pounds, 2.40; 300 steers, 1116 pounds, 3.95; 80 steers, 1241 pounds, 4.25; 215 steers, 939 pounds, 3.45; 260 steers, 1108 pounds, 4.00; 100 steers, 1183 pounds, 3.90.

Prices for sheep have not changed much. The export demand is good and shippers were well cleared, but owing to a dullness in the Eastern market, the week's business closed had there it a good tone to the trade and the outlook for good sheep is favorable.

GODAIR, HARDING & CO. Chicago Live Stock. Chicago, Jan. 23.—The cattle market was neither as active or as strong as there was reason to expect.

Only two or three sales, however, were reported at over \$4.45, and the bulk were between \$3.90 and \$4.00. Lights were largely at \$3.85 to \$4.05, and \$4.20 to \$4.40 bought most of the heavy and medium weights.

New Orleans Futures. New Orleans, Jan. 23.—Cotton—Futures steady; sales, 32,300; January, 5.05; February, 5.10 to 5.11; March, 5.23 to 5.24; April, 5.28 to 5.29; May, 5.28 to 5.29; June, 5.34 to 5.35; July, 5.40 to 5.41; August, 5.45 to 5.46; September, 5.48 to 5.49; October, 5.52 to 5.53.

New York, Jan. 23.—The cotton market opened fairly active and steady, with prices unchanged to one point higher. The steadiness of the market was short-lived and was due to a report of a reduction of the acreage of the belt, and that by the time for planting a large proportion of cotton land heretofore devoted to cotton will be left uncultivated or given over to other crops.

reach 220,000 bales this week. This estimate figures in some uncertain vessels which may not clear in time. The semi-weekly movement at the interior towns is figured at 63,000 bales, against 45,000 bales last year.

The International Route. The International and Great Northern railroads is the shortest and best line between points in Texas and Mexico and the principal cities of the North, East and Southeast.

Facilities for feed, water and rest in transit are provided at San Antonio, Taylor, Palestine, Longview, Texas; Kansas, Little Rock, Poplar Bluff, Cairo and St. Louis.

SOUTHERN TEXAS

(Edited by H. R. Claridge, manager of the Texas Stock and Farm Journal office, opposite Kern Hotel, San Antonio.)

Allen McCoy is home from a Montana, says steer cattle are scarce in that country; that the have been mostly marketed at most centers, and the three feeders.

Maj. Keenan of the Victoria, was in the Journal office this says that leaving out what was by Bennett & West and O'Brien steers are few in his section.

Lon Allen thinks that a Ber Poland China cross makes the ranch hog. That is the sort he Felix Shaw, Dimitt county, w the cross.

Nat Powell, the Golda coun dealer, has gone to Missouri fo of young bulis.

Mr. John Shand, manager of "Leon ranch," Bexar county, Castleman, proprietors, was Journal office this week. They gotten out a very handsome ca of their thoroughbred Polled herd, which is the largest herd bred Polled-Angus cattle in the if not in the South.

Texas is long on land and s live stock just now, and son people to come in and buy son would be very desirable abou land is so cheap, too, it wou that, considering our fine clim low-taxes, investors ought to documents to put in their la land. As the railroads are mor than ever to help, wouldn't i good time for Texas land ow make an organized effort to outside capital in Texas lands land buyers did us a great o good a few years ago, and t them now more, and we did d debt and low values for our make the struggle a hard one.

Texas is rapidly becoming a as well as a breeding state.

Maj. McMurtrey of the Wichita county, is down after a co thousand feeding steers.

Mr. Witherspoon of With Bros, South Texas, here after ers, Fed and marketed a winter, a thousand head of Bros, steers, and says they f well.

A syndicate has proposed to deep water at Aransas Pass on tion that a few hours of 3600 raised. Latest reports at sum fact that about half that sum is subscribed in two counties. W produce of the great lower Mis river valley come down through market, who can estimate her ness?

Al McFadden says if the bu good enough, some dandy ye may be raised from tolerably c Mexican cows.

A. J. Walton, Jr., is prepar 4000 a 20-acre feed farm in 40-Mexican cattle in the loca

"There is now a considerable 40-Mexican cattle in the loca Recently J. H. Campbell & Co., Sid Webb of Bellville, Tex., 40 of Mexican cattle at \$14 per hea 29 head to another party at head. The cattle were in good ton, and there will be a nu other shipments to be made.

Mr. Editor: The above, for today's Fort Worth Gazette de seem to bear out a statement of the last Texas Farm and What is the matter? Farm and mistake, evidently. — Reader Kane, Texas.

Nothing in the matter, and not early any discrepancy. Seven ago, several herds were taken the line into Mexico from Tex Arizona for grazing purposes, an caught there by the 52 and the McKimby law. Under the duty of \$2 per head these cattie turning, and those are the which there is "considerable i the local markets." They a Mexican cattle, as the price shows, but American cattie find bars partly down, and coming Mexican cattle are not only fe first grade, far below that the average Texas range. The marketable beefs in Sonora, Gt. Hu, Nuevo Leon and Tama would not supply the Chicago pa with "canning stuff" for who writer founds this opinion upon loss personal observation. — Fu

Seems to be a case where b party of the first part and the of the second part are partly rig partly wrong. Cattle have been from Mexico to this soil that w finally taken to Mexico from th and then there have been a few that never have been a foreign shore. However, I elined to agree with Farm and that there are not likely to be Mexican cattle to come over ye to affect adversely the Americ ket. As to the effect in stim cattle growing on the other sid that is another question. The is very cheap over there, but getting very cheap over here.

Note cattle ad of B. F. Da in this issue. He is reliable a posted.

We were told that a repea Sherman silver law would cau turn of prosperity; then, when I would do it, an when that fa help matters, or rather when i things worse, we are told that e return is the one, particular th quired to make everything rig they would only let the couny awhile, it might get right again.

I used to think that a heade feared to death Jack rabbit wa the biggest loss in the entire economy, but I have changed m A cunning congressman can giv round the corner the start u him hands down that natu phoolom. John Hlave knows to go through a crack in the It is big enough, but some o congressional tariff-and-curren ers do not seem to be able to of the woods through an ope the timber.

It looks bad to see a ranchm to town alone and spend money to give the family, or at least t wife, a day or two in the city, the ladies derive pleasure from

SLADE'S VISIONS. From Which He Deduces a Lecture to Farmers' Girls.

It was one of those bright days of early June, and in front of the Fort Worth National Bank, Yes, that's the time and place at which the vision appeared to me. It was a bright calico dress, had on a neat white apron and wore a plain straw hat, with only a dainty ribbon for ornament. It spoke pleasantly and smiled, oh so sweetly and frankly to acquaintances whom I met on the steps, tripped into the bank, transacted some business at the counter, stepped lightly to the sidewalk and vanished amid the busy throng. She was a farmer's daughter, whom her father, then busy with preparations for coming harvest, had sent to fetch funds for attendant expenses. Her entire wardrobe never cost her father more than \$5, and not one cent of that was paid for cutting, fitting or making. I am sure for no milliner could have fashioned a dress so simple, so tasty, so elegant. Not to have admitted, you, loved her, wouldn't have been such a rise against nature. I saw her emerge from the crowd, step into her road-cart with a few bundles, give her pony a gentle pat, and the whip and disappear out first street. Then I began to muse and to wonder why such a being could remain single without receiving all the marriage proposals in the country. While thus musing another vision appeared. It was in a massive heavy-cushioned carriage drawn by two high-stepping horses, driven by a negro who had nothing else to do. This vision was encased in folds of silks and satins, and gems worth a king's ransom sparkled from her person and garments. Her dress and ornaments must have cost hundreds of dollars, for a milliner must have worked at least a week to shape so much costly silk into such a burlesque of a dress. She did not deign to put her foot on the ground, but sent for the cashier, whom she named and named her account she had been notified that her account was overdrawn. But the im-perturbable cashier drew out several perturbation. There were the plain figures; he had only followed the bank's rules, and had no apologies to offer. The woman had a pretty face, and so how I was sorry for her. She was so over-dressed and ill at ease. Poor girl, she was so rich, and uncomfortable. She would not have worked at her had been well dressed, like the farmer's girl. But with this woman you lost sight of her person in gazing at her wonderful array of finery. It been just as sensible to have fallen in love with a milliner's dummy of a girl.

Reflecting on the foregoing, I am in a proper frame of mind to deliver a lecture to farmers' daughters. Dear girls: Do not think I wish you to dress like nuns, and to have no fun in the world. On the contrary, I wish you to be as pretty as you can, and to be bright and happy as birds in the springtime. I do not wish you to be too sedate—only sensible—always merry, but never frivolous. Lay it down as an incontrovertible proposition that the most perfect, most lovable work of creation is a frank, sensible, handsome woman, and what the Creator has made so well I would not have a milliner mar. In these days of degeneracy, a bright, handsome farmer's daughter is ashamed to enter the neighborhood church or pay an afternoon visit to a neighbor in a pretty calico dress made with her own hands. That's what makes me weep. The hot-house progeny of the great cities have to employ all the arts of the dressmaker and the distillations of the druggist to renew and re-vestish their faded charms, but the pure air and bright sunshine of the farms and meadows build up a form and a complexion which will not rub off on her lover's coat collar. I would not have our daughters imitate their ideas of dress from the costumes of Paris and New York any more than I would have them go to the same sources for their ideas of morality and propriety. I do not mean that they should wear gaudy should wear nothing but calico, but I do mean that one who could not make herself a gown from whatever material her father can afford, that would enable her to break the heart of any unmarried business man in the land, is not well educated nor fit to be courted. It is not the dress that makes the woman, as some silly people seem to think. Let me tell you something, girls. The Prince of Wales, soon to launch the greatest fleet of the greatest nation on earth, and who now has the richest nation on the globe to pay his bills, has daughters, and I have it from good authority that they seldom wear a hat which costs over \$4; that they can make their own gowns, and are good housekeepers. Their grand-mother, Queen Victoria, is the foremost woman in all this world, and her entire life has been an example of domestic virtues, which the women of civilization might well follow. I do not doubt but there are small business men in this country whose daughters spend more for dress than the daughters of England's imperial prince. The emperor of Germany says publicly that he does not care whether his wife, the empress, and the other women of his empire study the constitution of the country or not so that they study to make their homes bright and happy. There are examples from high sources for those who are fond of aping foreign habits.

We are prone to degeneracy; the country is the suit of the earth. You can not but notice the tendency of business men to go to the country to select a wife. This is because they desire a partner for life untouched and un-feminized by the temptations, follies and frivolities of city life. The fine de-sele girl is all right for a sweet-heart, but sensible men do not select them for the mothers of their legitimate children. They do to court, but not to marry. Learn to cook, learn to keep house, learn to make your own clothes, and then if you marry a man who is able to keep servants for these purposes, as I hope you will, you will be able to properly manage and direct those servants so that your household will be bright and happy, thus insuring the presence of your husband at home after business hours, instead of spending his spare time at clubs or somewhere else, where there is something cheerful and bright. If you should happen to fall in love with some big-hearted fellow who hasn't yet made his fortune your knowledge of household duties will enable you to help him in a position to keep servants to take the work off of you as you grow older, and have more of the cares of life around you than you will have when you first marry.

By all means learn something besides household duties. Every girl in these days is supposed to have had opportunities of attending school, and she should have time afterwards to supplement the knowledge gained here by a judicious reading of current literature. The present high standard of the leading magazines of the country renders them especially worthy of your attention. You will find them both pleasant and profitable reading. Read nothing but good literature, but keep yourself as well posted as you may be on the current events of civilization.

Eschew politics and woman's rights ideas. You are too pure, too exalted to be dragged down in such mire. Yours is a noble mission. It is to make home a paradise and to shape the characters

of the future rulers of the land. The old saying that "the hand that rocks the cradle rules the world," contains a great deal of truth.

Remember that you are determined to be a fine de-sele girl that it is safer to be so after you have married. Otherwise you are liable not to marry—at least not well.

Caution—Buy only Dr. Isaac Thompson's eye water, carefully examining the outside wrapper. None other genuine.

THE STATE OF TEXAS. In the district court, February term, A. D. 1895. To the sheriff of Tarrant county, greeting:

You are hereby commanded that by making publication of this citation in some newspaper published in the county of Tarrant, four weeks previous to the return day hereof, you summon Aleck R. Pigg, whose residence is unknown, to be and appear before the district court to be held in and for the county of Tarrant, at the court house thereof, in the city of Fort Worth, on the second Monday in February, A. D. 1895, the same being the 12th day of February, A. D. 1895, file number being 899, then and there to answer the petition of Sarah Jane Pigg, filed in said court, on the 23d day of November, A. D. 1894, against the said Aleck R. Pigg, and alleging in substance as follows, to-wit: Plaintiff sues for divorce from defendant on the grounds of cruel and inhuman treatment towards plaintiff, and plaintiff alleges in her petition that the defendant is a man of most violent passions and ungovernable temper, and made it unsafe for plaintiff to live with him, and his inhuman treatment rendered their living together insupportable. Therefore plaintiff prays that the marriage between plaintiff and defendant be dissolved and declared null and void and that plaintiff be adjudged to have the custody of Berle Pigg, the minor child of their said marriage, and that plaintiff have judgment for costs of suit, and such other and further relief as may be just and equitable.

Herein fail not, but have you then and there before said court this will, with your return thereon, showing how you have executed the same. Witness, R. H. McNatt, Clerk of the district court of Tarrant county, given under my hand and seal of said court, in Fort Worth, this 24th day of November, A. D. 1894. R. H. McNatt, Clerk District Court, Tarrant County, Texas. By J. C. Branum, Deputy.

The Southern Pacific Sets the Pace. Fastest on Record.

2 1/2 days to Los Angeles, Cal. 2 1/4 days to San Francisco, Cal. On November 1, 1894, the Southern Pacific will inaugurate their new train, "Sunset Limited," with a complement of Pullman's most luxuriously appointed cars, consisting of Composite cars "Golden Gate" and "El Capitain," each embracing baggage compartment, barber shop, reading cafe, smoking parlor and library, modern double drawing room sleepers "Paso Robles," "San Ardo," "San Lucas" and "San Vicente," dining cars "De Minuto" and "Castle Crags," meals of palatial perfection, in which meals will be served in the cars.

This magnificent train, vestibuled throughout, lighted with Pintsch gas system, the most perfect of modern appliances, passenger trains, will leave New Orleans once a week every Tuesday, at 8 a. m., reducing the time 60 hours, or 2 1/2 days, to Los Angeles, and 77 hours, or 3 1/4 days, to San Francisco.

Connections will be made at New Orleans, Houston, Tex., San Antonio, Tex., Los Angeles and San Francisco, with all lines diverging. Special attention is called to the fact that the finest passenger service between the Atlantic and Pacific oceans will thus be inaugurated by the "Sunset Limited" over the famous Sunset Route.

No extra charge whatever will be made for passage on this train in addition to regular first-class tickets, or round-trip tickets, beyond the regular Pullman charges for sleeping car accommodations, as charged on regular trains.

For further information, circulars, time tables, etc., apply to J. S. SCHRIEVER, Traffic Manager, New Orleans, La. A. G. P. & T. A., Houston, Tex. S. F. B. MORSE, G. P. & T. A., New Orleans, La.

ANOTHER MACHINE HEARD FROM Palo Pinto, Tex., Nov. 28, 1894. Steek and Farm Journal, Fort Worth, Texas.

Gentlemen: I received my machine on the 21st, and have tried it and am well pleased. I must admit that I was greatly surprised when I saw the machine and saw how nicely it did its work. I regard it as good as any machine sold in this country. I am more than pleased with it. I. S. EADES.

The Stock Journal Sewing Machine, fully described elsewhere in this paper, is fully guaranteed to be as good a machine and as handsomely built as any machine made. It is not an ordinary cheap John Bull, and offers of fifteen days' trial makes the customer perfectly safe.

You do not need to spend \$200 for a watch. A dollar and a half sent to the Stock Journal office, Fort Worth, Texas, will get you a watch that is guaranteed to keep good time. See advertisement elsewhere in this paper.

A Watch for \$1.50. That's just what we've got, and we warrant it to be all right and to run all right too. It is American-made, quick wind, quick set, and a good time-keeper. A delay ten minutes will cost many a thousand times the price of one of these watches. See advertisement elsewhere, send \$1.50 to Stock Journal, Fort Worth, Texas, and get a watch free by return mail. We throw in a chain and charm.

All genuine Sponner Horse Covers buy this trade mark. All other covers are inferior quality.

KANSAS CITY STOCK YARDS

Are the most complete and commodious in the west and second largest in the world. The entire railroad system of the west and southwest centering at Kansas City has direct rail connection with these yards, with ample facilities for receiving and reshipping stock.

Table with 5 columns: Cattle and Calves, Hogs, Sheep, Horses and Mules, Cars. Rows include Official Receipts for 1894, Slaughtered in Kansas City, Sold to Feeders, Sold to Shippers, Total Sold in Kansas City in 1894.

CHARGES—YARDAGE: Cattle 25 cents per head; Hogs, 8 cents per head; Sheep, 5 cents per head. HAY, \$1.00 per 100 lbs.; BRAN, \$1.00 per 100 lbs.; CORN, \$1.00 per bushel.

NO YARDAGE IS CHARGED UNLESS THE STOCK IS SOLD OR WEIGHED. C. F. MCREE, General Manager. E. E. RICHARDSON, Secy. and Treas. H. P. CHILD, Asst. Gen. Manager. EUGENE RUST, Gen. Superintendent.

The Live Stock Market of St. Louis. THE ST. LOUIS National Stock Yards

Located at East St. Louis, Ill., directly opposite the City of St. Louis. Shippers Should See that their Stock is Billed Directly to the NATIONAL STOCK YARDS.

F. G. KNOX, Vice President. CHAS. T. JONES, Superintendent.

THE UNION STOCK YARDS, CHICAGO.

Consolidated in 1895. The Largest Live Stock Market in the World. The center of the business system, from which the food products and manufactures of every department of the live stock industry is distributed from.

Accommodating Capacity: 50,000 Cattle, 200,000 Hogs, 30,000 Sheep, 5000 Horses. The entire railway system of Middle and Western America centers here, rendering the Union Stock Yards the most accessible point in the country.

The capacity of the yards, the facilities for unloading, feeding and reshipping are unlimited. Packing houses located here, together with a large bank, capital and some one hundred different commission firms, who have had years of experience in the business; also an army of Eastern buyers insure this the best market in the whole country. THIS IS STRICTLY A CASH MARKET.

Each shipper or owner is furnished with a separate yard or pen for the safe keeping, feeding and watering of his stock, with but one charge of yardage during the entire time his stock remains on the market. Buyers from all parts of the country are continually in this market for the purchase of stock cattle, stock hogs and sheep.

THE GREATEST HORSE MARKET IN AMERICA. The Dexter Park Horse Exchange

With its dome lighted amphitheater, with a tunneled driveway through the center an eighth of a mile long, and a seating capacity of 6000 people, is the greatest horse show arena in the country for the sale or exhibition of "trappy" turnouts, coaches, fire drivers or speedy horses. Besides this, there are daily auction sales established here, which is claiming the attention of buyers and sellers from all parts of the country. This is the best point in the West for the sale of blooded stock. To the stock growers and shippers of TEXAS, KANSAS and the WESTERN TERRITORIES, you are invited to continue with us by billing your stock through to the active and quick market of Chicago.

Some Watch Talk.

The enormous number of our Premium Watches sold since we introduced it has led us to confer with some factories for more pretentious Watches. Below we present a list of what, after a personal visit to the factories and wholesale dealers, we consider the best Watch bargains in America. We are not offering these Watches for profit; we are not in the jewelry business, but we want circulation and circulation we must have.

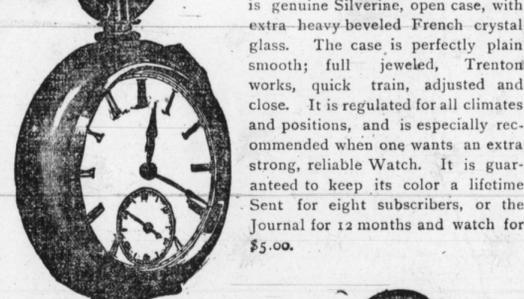

This is a Coin Silver, engraved Chatplain Ladies' Watch, exact size of cut. It is stem wind and stem set, select jewels, cylinder escapement, correctly timed, tested and fully warranted. We give this Watch free for a club of 8 subscribers, or send it prepaid and the Journal 12 months for \$5.00.

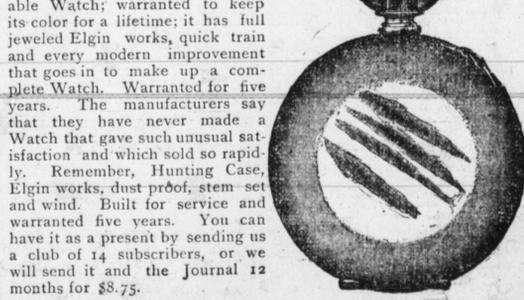

This is a Ladies' Hunting Case, heavily Gold Plated Watch. This Watch is most handsomely engraved, excellent jeweled nickel works that run well and keep perfect time. The movement is imported, is stem wind and stem set. This is a most handsome Watch at a special price—a bargain to us and to our readers. Fully warranted. We send it free for ten subscribers, or the watch and Journal 12 month for \$6.00.

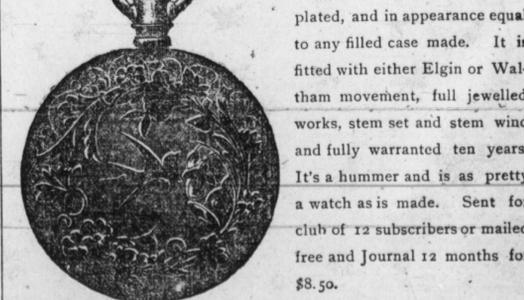

This Watch is our pet and is a good full value. It is a watch built for use—hard constant use. It is genuine Silverine, open case, with extra-heavy-beveled French crystal glass. The case is perfectly plain smooth; full jeweled, Trenton works, quick train, adjusted and close. It is regulated for all climates and positions, and is especially recommended when one wants an extra strong, reliable Watch. It is guaranteed to keep its color a lifetime. Sent for eight subscribers, or the Journal for 12 months and watch for \$5.00.

This is a Dueber, Silverine, Hunting Case, a very fine serviceable Watch; warranted to keep its color for a lifetime; it has full jeweled Elgin works, quick train and every modern improvement that goes in to make up a complete Watch. Warranted for five years. The manufacturers say that they have never made a Watch that gave such unusual satisfaction and which sold so rapidly. Remember, Hunting Case, Elgin works, dust proof, stem set and wind. Built for service and warranted five years. You can have it as a present by sending us a club of 14 subscribers, or we will send it and the Journal 12 months for \$8.75.

Heavy Hunting case, elegant in design, extra heavy, gold plated, and in appearance equal to any filled case made. It is fitted with either Elgin or Waltham movement, full jeweled works, stem set and stem wind and fully warranted ten years. It's a hummer and is as pretty a watch as is made. Sent for club of 12 subscribers or mailed free and Journal 12 months for \$8.50.

Address, TEXAS STOCK AND FARM JOURNAL, Fort Worth, Texas.
