NUBS OF NEWS

A very successful county fair was held at Taylor last week. The livestock displays were good and the racing program was an interesting one.

Major O. P. Poe of Denton says that Denton county this year will produce from 1,750,000 to 2,000,000 bushels of wheat.

During the past week rains have fallen over a considerable portion of Texas, reaching almost from the Panhandle to the Gulf.

Fruit growers in Central Texas have so far produced more peaches than could be readily sold.

The Colorado board of agriculture has appointed Jacob E. Cowan professor of botany and horticulture in the State Agricultural College.

A New York report says: Texas comes forward this week with heavy peach shipments to the market.

Thomas H. Winn has sold his Isle Claire plantation, situated on the Lacassine bayou, about ten miles west of the town of Lake Arthur.

According to a report from New Orleans, the Southern Pacific Railroad secure a large immigration of Boers for the territory in western Louisiana.

Martin H. K. Paulsen of Baltimore, president of the United Fruit and Steamship company, recently organized in St. Louis with a half million dollars capital stock to fight the United Fruit company.

A Journal correspondent at Friddy, Mills county, Tex., writes, under date of June 30: "Farmers have harvested an immense crop of wheat and oats and are now ready for threshing."

them to come out, hence the small crop of pears. The blackberries have been fairly good, but in all this section the damage done to the vines by the very cold winter of 1898 and 1899 had greatly diminished the size and vitality of the bearing wood.

The curculio has had a bad time living through two seasons with no plums to rear their young in, hence their damage to the plum crop this year has been very light.

Our people must supply themselves with spray pumps, as well as plows.

TEXAS COTTON ACREAGE.—Murphy & Co. of Atlanta, Ga., have issued the following circular regarding their estimate of the Texas cotton crop.

In our estimate of the cotton crop computed upon information received between June 1 and 15, we called attention to a shrinkage in Texas acreage, resulting from unfavorable weather conditions and the abandonment of bottom lands.

Since our last report there has been some complaint of excessive rains in South Carolina, Alabama, Georgia and Mississippi, but not of sufficient importance to warrant any change in the estimates previously given for these states.

USE OF PRESERVATIVES.—It is, of course, out of the question to think of making a deliberate attempt to use any formalin or other milk preservative upon children, the milk inspector of Chicago has been trying it on kittens and guinea pigs, taking two that were perfectly healthy to all appearances and feeding one on milk that was known to be pure, and the other on milk that contained the preservative.

ORGANIZATION IN MISSISSIPPI. The Mississippi State Dairyman's association was organized a short time ago at a meeting held at the Mississippi State Agricultural Experiment Station.

Grapeland, in the eastern part of Texas, reports an increase in acreage of 25 per cent, with the observation: "If we can have a few weeks of dry weather, this year will be about 25 per cent better than last year."

Mr. Briggs, of Buffalo, N. Y., told his experience in selling milk at 4 cents a gallon. "I have had a very instructive talk was made by Mr. S. M. Barr, Memphis, Tenn., relating his experience as a commission merchant who was handling butter for some time."

FEEDING THE DAIRY COW.—It is not the size of the dairy herd that gives a profit to the owner, but the amount that is produced by it, says the Care and Management of such cows as Signal's Lily Flagg, the cow which holds the world's record of producing over 1000 pounds of butter in a year.

Mr. H. S. Chapman, in discussing the subject of "Butter Making," said that he had been at the meeting of the Texas Dairy Producers' association, and that he had been at the meeting of the Texas Dairy Producers' association.

Mr. H. S. Chapman, in discussing the subject of "Butter Making," said that he had been at the meeting of the Texas Dairy Producers' association, and that he had been at the meeting of the Texas Dairy Producers' association.

or no stubble lands planted in cotton this year, owing to the late season and the condition of grounds. On the whole, the crop averages two and half weeks late, several points reporting it as late as six weeks. As to general conditions, the general trend seems to be unfavorable at this time.

Of our correspondents only 27 per cent report crop in good condition, while 23 per cent report crop suffering for rain, 19 per cent complain seriously of boll rot, and 25 per cent report crop in weeds and generally in bad condition.

Taking our returns at their face value, which have corroborated each other in many instances, there is on the one hand a report that the expected increase in acreage has not only been met, but with a decrease of 2.4 per cent, has undoubtedly increased.

With a decrease in acreage of 2.4 per cent last year for Texas, we must needs readjust our estimated acreage for the cotton crop for the former year; also our figure for the yield of this year's crop. Based upon last year's Texas acreage, this 2.4 per cent decrease gives us an estimated yield of 2,498,395 bales, being a net increase over last year of only 6.17 per cent.

Since our last report there has been some complaint of excessive rains in South Carolina, Alabama, Georgia and Mississippi, but not of sufficient importance to warrant any change in the estimates previously given for these states.

USE OF PRESERVATIVES.—It is, of course, out of the question to think of making a deliberate attempt to use any formalin or other milk preservative upon children, the milk inspector of Chicago has been trying it on kittens and guinea pigs, taking two that were perfectly healthy to all appearances and feeding one on milk that was known to be pure, and the other on milk that contained the preservative.

TEXAS FARMERS' CONGRESS IN THIRD ANNUAL SESSION.

business for the farmer to come to him for advice, and then have to seek the aid of the machinery and the machinery for the insecticide.

The farmers should next make a study of the way the insects are attacking their crops, and then have to seek the aid of the machinery and the machinery for the insecticide.

He then discussed the various cotton pests, and said they are all distinct species, and do not develop one into the other, but are entirely separate.

Mr. Peters said that he had seen the same solution used by the same man to make the arsenic dissolve better.

Prof. Mally said that was a very good idea. He said he used two gallons of my farm in the dairy. I believe that lime in limestone and Hill counties to knock out the grasshoppers.

He also recommended the use of the concoction for spraying alfalfa to protect it from the grasshoppers.

John Howard, immigration agent of the Southern Pacific, also of the Farmers' and the Farmers' Mutual, the Landlords and Large Land Owners. His address was exceedingly interesting.

Two Sections Held Their Sessions Together.—Papers Read. The dairy and live stock sections, owing to their closely allied interests, held their sessions together.

The 15th annual meeting of the Texas Horticultural society was held during the congress, the society holding several sections and discussing many topics.

C. A. Kirkpatrick of Collin county, delivered an eloquent address of welcome which was responded to by Judge Frank Hill, commissioner of agriculture of Arkansas.

B. L. Adams of Bonham, delivered an address on "Increasing the Membership of the Horticultural Societies."

T. V. Munson reviewed the history of horticultural societies in Texas, which was listened to with close attention.

J. L. Harmon of Brenham, spoke in favor of the consolidation of the horticultural and truck growers organizations.

J. S. Kerr of Sherman, spoke of loyalty to the horticultural societies, and of the love of doing the work and this spirit is what will make the society most successful.

Prof. R. H. Price of the Agricultural and Mechanical college, read a paper on "The General Outlook for Horticulture in Texas."

Prof. R. H. Price of the Agricultural and Mechanical college, read a paper on "The General Outlook for Horticulture in Texas."

Prof. R. H. Price of the Agricultural and Mechanical college, read a paper on "The General Outlook for Horticulture in Texas."

Prof. R. H. Price of the Agricultural and Mechanical college, read a paper on "The General Outlook for Horticulture in Texas."

very interesting paper on "Dairying as a Business." Mr. J. Walton, Jr., of San Antonio, read a paper on the subject of "Advisability of Establishing a Herd Book for Texas Grade Cattle."

There will be no objection whatever to establishing a herd book for Texas cattle when we can get a breed that can be relied upon. We have as much right to establish a breed of our own as they have in England or Scotland.

John L. Sneed of Tyler, told of the progress in fruit growing in East Texas and described the outlook as most promising.

John S. Kerr of Sherman, read a paper on "Apple Culture in Texas."

Prof. F. W. Mally of Hulen, state entomologist, read a very able address on "Fruit and Their Culture in South Texas."

Miss Catherine Kerr, the only lady delegate in this section of the congress, read a paper on "Women's Work in Horticulture," in which some new features were brought out.

The talk of Mr. Linderman of Alvin, on the subject of "Fig Culture," was the cause of much discussion on that subject by the members of the society.

Major H. M. Stringfellow read a paper on "New Horticulture by an Old Horticulturist."

Prof. R. H. Price delivered a paper on preserving fruits in their natural condition.

E. W. Kirkpatrick read a paper on "Fruits of the Future."

Mr. A. G. Pickett addressed the society on "The Relation of the Fruit Grower to the Truckster."

Mr. A. M. Ragland of Pilot Point, Tex., read a paper on "How to Increase New Varieties of Trees and Plants."

John Howard, immigration agent of the Southern Pacific, also of the Farmers' and the Farmers' Mutual, the Landlords and Large Land Owners.

Resolved, that the experiments being made by the experiment stations of Texas and Missouri in inoculating cattle against Texas fever have the confidence of the Farmers' Congress, and that it is believed to be the duty of the state of Texas to provide suitable buildings and equipment for work of this character and for research regarding diseases of all kinds among domestic animals so as to afford all possible protection to dairy and stock farmers and the live stock interests generally.

He said Mr. Cushing was one of the first graduates of the Agricultural and Mechanical college was called upon for an address on varieties.

A resolution was passed calling on Texas congressmen to ask the agricultural department of the United States to print the book of T. V. Munson on grapes, after revision.

Prof. F. W. Mally was elected president of the society. He said he would at once inaugurate work to make the society the peer of any in the country and asked the support of the members.

B. L. Adams of Bonham, was elected vice president; Sam H. Dixon of Paul, secretary and treasurer; E. Mixer of Richards, La., second vice president.

Mr. Dixon announced that Mr. Morse consented to print a brief history of the horticultural section in the report of the congress. J. S. Kerr was appointed to assist the secretary in preparing the matter.

Resolutions Adopted in Regard to Government Improvement. The Brazos River Navigation association held a meeting during the session of the congress.

The committee is as follows: T. H. Brown, chairman; J. D. Rogers, D. C. Giddings, Jr., Leonard Tillotson, L. I. Foster, H. Miller, J. W. Carson and Louis R. Bryan.

At an adjourned meeting the following resolutions were adopted: "Whereas, by a recent act of congress the United States government has provided for a survey of the Brazos river from its mouth to the city of Waco to determine the practicability as an engineering problem of securing slack water navigation between those points;

"Resolved, I. That in our opinion a permanent organization, consisting of properly accredited delegates, chosen in such manner as the people may determine, and to be known as the Brazos river improvement convention, should be organized immediately.

"Resolved, II. That such convention should at once begin the work of collecting statistics and other information on the following points: (a) The engineering problem involved; (b) the government engineer for such consideration as he may accord it; (c) the past history of the navigation of the river; (d) the amount and value of the commerce of every character transported by the river; (e) the cost of such work.

"Resolved, III. That in our opinion a permanent organization, consisting of properly accredited delegates, chosen in such manner as the people may determine, and to be known as the Brazos river improvement convention, should be organized immediately.

"Resolved, IV. That such convention should at once begin the work of collecting statistics and other information on the following points: (a) The engineering problem involved; (b) the government engineer for such consideration as he may accord it; (c) the past history of the navigation of the river; (d) the amount and value of the commerce of every character transported by the river; (e) the cost of such work.

"Resolved, V. That in our opinion a permanent organization, consisting of properly accredited delegates, chosen in such manner as the people may determine, and to be known as the Brazos river improvement convention, should be organized immediately.

"Resolved, VI. That such convention should at once begin the work of collecting statistics and other information on the following points: (a) The engineering problem involved; (b) the government engineer for such consideration as he may accord it; (c) the past history of the navigation of the river; (d) the amount and value of the commerce of every character transported by the river; (e) the cost of such work.

"Resolved, VII. That in our opinion a permanent organization, consisting of properly accredited delegates, chosen in such manner as the people may determine, and to be known as the Brazos river improvement convention, should be organized immediately.

"Resolved, VIII. That such convention should at once begin the work of collecting statistics and other information on the following points: (a) The engineering problem involved; (b) the government engineer for such consideration as he may accord it; (c) the past history of the navigation of the river; (d) the amount and value of the commerce of every character transported by the river; (e) the cost of such work.

"Resolved, IX. That in our opinion a permanent organization, consisting of properly accredited delegates, chosen in such manner as the people may determine, and to be known as the Brazos river improvement convention, should be organized immediately.

"Resolved, X. That such convention should at once begin the work of collecting statistics and other information on the following points: (a) The engineering problem involved; (b) the government engineer for such consideration as he may accord it; (c) the past history of the navigation of the river; (d) the amount and value of the commerce of every character transported by the river; (e) the cost of such work.

"Resolved, XI. That in our opinion a permanent organization, consisting of properly accredited delegates, chosen in such manner as the people may determine, and to be known as the Brazos river improvement convention, should be organized immediately.

NOTICE TO ADVERTISERS. Advertising copy should reach us not later than Saturday preceding the issue in which it is to be published.

Coming Sales. SEPTEMBER 12, 1900—D. L. Dawdy & Co., Shortlows, Kansas City, Mo.

DECEMBER 4-7, 1900—American Galloway Breeders' Association, Galloway, Chicago, Ill.

NOVEMBER 15, 1900—S. M. Winslow, Paul Byrd and J. S. Goodrich, Galloway, Kansas City, Mo.

THE STARTING POINT. The need for better methods and more perfect results in the industrial development of Texas is generally recognized.

The question of first importance to the people of this state is, how may these ends be reached. Not every proposal that professes to promote the desired results will do so.

Out of the recent destructive fire at a New York wharf, in which nearly two hundred lives were lost and millions of property was destroyed, has come an agitation for a condensed cotton bale.

Building from the roof downward is never a safe or profitable plan of procedure. The place to make the beginning for industrial progress, for improved methods, and to scatter the seeds of science relating to agriculture and to stock raising, the twin industries that represent eighty per cent of the capital and labor of Texas, is in the public schools, where the whole people of the state may take the benefits, without discrimination.

There are approximately 800,000 children under instruction in Texas every year. This is the crowd that is going to better conditions in Texas if they are to be bettered, not the two or three hundred who are fortunate enough to be able to seek the higher courses of instruction.

With Gov. Sayers a breeder of Short-horns, Hon. J. W. Bailey a fast horse-man, and Hon. Barney Gibbs championing the Texas hog and the Texas mule, it appears that live stock diversification is gaining a firm foothold in Texas politics.

About 4,000,000 pounds of wool are stored in San Angelo, Llano, Lampasas and Burnet, waiting for better prices. The Texas wool grower has reached a point where he doesn't have to sell unless the price should be satisfactory.

The federal government has put an expedition in the field to make a geological survey of the trans-Pecos country, including a large part of West Texas, and extending into New Mexico.

The following were among the subscriptions recently received by the Journal:

Enclosed find check for \$11.00 to cover ten years subscription for W.W. Batchelor, Ferris, Texas and one year for Frank McKay.

I want the Journal ten years longer. Please extend my time to June 20, 1911, and acknowledge receipt of this.

INDUSTRIAL EDUCATION. History of the Movement in Texas Outlined by State Chairman V. W. Grubbs of Greenville.

V. W. Grubbs, chairman of the state committee of industrial education and publisher of the Greenville "Herald," writes:

The interest you manifest in the subject of industrial education by your frequent editorial comments in the space given to matter in that line prompts me to submit to your readers an outline of the plans and purposes of our organized movement.

The situation in China has changed but little, as far as the world knows, during the last three weeks. Stories of massacres of foreigners in Peking and elsewhere come in daily and are contradicted on the same day and from the same sources.

The Texas Truck Growers' association held a meeting Thursday, A. G. Pickett, the president of the association, presiding.

It is believed that the ensuing state Democratic convention to be held at Waco will insert a strong plank in its platform in favor of the Agricultural Extension College.

The entire South is becoming deeply interested in the movement, the Southern Industrial convention at the session at Chattanooga providing a board to direct the same in all of the Southern states.

California climate is a little hard on harness unless it is well taken care of. San Jose, several years ago discovered by accident a very fine way of cleaning up and putting harness in order.

The Pacific ocean is the water outlet for more than half the population of the earth. The southern and western states are peculiarly interested in protecting the interests of this country wherever that great artery of business touches.

A steamer sailed from New Orleans Monday with 1000 mules for the British army. Disturbing events in Asia and Africa continue to beckon the Texas mule to the front and when he gets there he will stay there.

Sugar is going up, and as sugar and cotton usually travel together, this is not altogether discouraging.

TEXAS FARMERS' CONGRESS.

IN THIRTIETH ANNUAL SESSION. (Continued from page 2.)

amount of commerce that would be affected directly or indirectly through the influence of water rates on transportation charges, the probable savings to consumers and the area and territory that would probably be brought under cultivation.

That until a permanent organization can be effected the convention, through a committee, undertake the work of collecting this information and presenting it to the proper authority.

The College Cansery. One of the new features of the A. and M. college which attracted much interest during the congress was the cansery.

The cansery factory was established this year and began operations on June 9. Prof. Price says the total cost of the plant was \$361. He started it on a modest scale, because, he says, most of the cansery factories in Texas have proved unsuccessful because they began with a great deal of costly machinery and with a big expense account.

TRUCK GROWERS. Brief Session Held—Fruit Prospects in East Texas.

The Texas Truck Growers' association held a meeting Thursday, A. G. Pickett, the president of the association, presiding.

The plant here comprises boilers for cooking beans, tomatoes, etc., and boilers for the cans. The cost of an outfit for canning peaches exclusively would be much lower than the figure above mentioned.

Convention Notes. The dairymen on the grand were very much interested in Yontje Netherland, a Holstein cow, bred on the farm.

NURSERYMEN. New Organization Formed to Affiliates With the Congress.

Pursuant to a call previously made through the press of Texas, a number of nurserymen convened at College Station during the Texas Farmers' Congress.

Emulsion for Harness. California climate is a little hard on harness unless it is well taken care of.

THE EXHIBITS. In the exhibit hall almost every variety of plums, grapes and other small fruits found in Texas was displayed.

A thousand chances to win a cash prize. See 4th page of the Journal.

FORT WORTH

The following stockmen were visitors during the week: G. H. Connell, Dublin, W. H. Jennings, San Antonio...

W. Jordan, government inspector at Quannah, was a visitor in the city. C. Y. Brown of the Evans-Snyder...

W. E. Butler, representing the Malloy commission Co. at Brownwood, was in the city.

J. E. Green of Chicago, of the firm of Green, Wells & Co., is visiting his ranch near Henrietta.

Lum Hudson of San Angelo was in the city en route to the Territory where he will ship cattle to market.

A. F. Crowley of the Malloy Commission Co. returned from a three weeks visit in Midland and vicinity.

F. M. Bowen of Scoggins, Bowen & Bourne, of Colorado City, was in the city en route home from Kansas City.

J. C. Stribling, S. H. Buchanan and John Mays of Llano were in the city en route to the Indian Territory where they will ship cattle to Kansas City.

W. W. Miller, livestock agent of the M. K. & T., returned from a trip to Kansas City, where he witnessed the convention proceedings.

The Fort Worth stock yards sold 83 cars of cattle and 93 cars of hogs during the month of June. This record is not so large as that of May, but considering the season is regarded as being very good.

W. P. Anderson, traveling livestock agent of the Santa Fe, was in the city en route to Kansas City from a trip through the Panhandle. He reports conditions to be good, but that the farmers all needing rain.

P. W. Hunt, general agent for the Pasture Vaccines Co., returned from a trip through the Panhandle. He re-

ported all hands busy with the harvest, the threshing being done as rapidly as possible with the number of machines to be had.

The Malloy Commission Co. are well satisfied with the sale of the Dr. J. W. Woodruff cattle from Midland at Kansas City Thursday, where they brought \$4.50.

R. B. Bumphrey and F. A. Allison, prominent stockmen of Taylor, were in the city. They report that grass cattle have all been shipped to market from that region.

J. W. Cone shipped eight cars of cattle from Benbrook to St. Louis on Friday. Ben F. Hackett shipped five cars from Bluffdale to Chicago, and Charles McFarland and Ed Farmer had thirteen cars from Aledo for the same market.

Large wheat shipments are reported by the railroads from Panhandle points. The export shipments are not as large as expected owing, it is thought, to the recent decline in prices.

Dr. Bacon Saunders was taken to Colorado City by special train on Thursday night for the purpose of attending George Arnett, the wealthy cattleman, who was suffering from an attack of appendicitis.

L. J. Allen, inspector of the bureau of animal industry, passed through the city en route to El Reno from San Angelo, where he has been inspecting the shipments of hogs for the transportation.

The shipments of mules for the use of the British government in South Africa still continues. C. S. Marshall of Baird is in the city en route to the delivery to A. S. Desmith of the contracting agent.

Receipts at the Fort Worth stock yards during the week amounted to 25 cars of hogs. The cattle shipments were mostly through shipments to market.

It is reported that the deal which S. B. Burnett has had under consideration for some weeks for the purchase of the "Figure Eight" ranch in King

Hubbard City; House & House, Caddo; J. Beck, Mansfield; G. P. Kellum, Valley Mills; G. H. Crittenden, Bridgeport; J. A. Farron, Commerce; R. G. Bennett, Seymour; J. F. Bartlett, Bartlett; J. P. Hamilton, Grandview; Rizer & Adams, Meridian; W. O. Sully, Alvarado; Mayfields & Co., Alvarado; Loughmiller, Pottsboro.

The adjourned meeting of the Tarrant county Square Bale Ginners' association was held in the court square on Saturday. The object of the meeting was to complete the organization and to take action on the constitution and by-laws which had been drawn up.

In a letter addressed to the Texas Floral society, John Henry Ellis, a Kansas farmer, writes the sunflower, a native of the Southwestern states, can be made a very profitable crop.

Arrangements are about completed for the seventh annual convention of the Texas Cotton Seed Crushers' association to meet in the city on July 19.

Major Charles B. Peck of Houston, superintendent of the Texas Car Service association was in the city Friday, and conferred with the local railroad officials concerning the grain blockade existing at Galveston.

A committee of the Texas Millers' association met in this city Thursday to discuss matters concerning the export trade and also the rate question.

Each of the above instruments is guaranteed as well as the other values. Stool and cover with Piano; Stool and bench with Organ; also, immense stock of new pianos. Address WILL A. WATKIN MUSIC CO., 215 N. Main St., Dallas, Texas.

WILL A. WATKIN MUSIC CO.'S LATEST BARGAIN LIST. 6-12 octave grand piano, \$35.00. 6 octave "Chickering" upright piano, \$25.00.

At a recent meeting of the Dallas Commercial club a cotton committee was appointed for the purpose of making Dallas a cotton market second to no other in Texas.

ofed dollars in cash? I had known of Dr. Duncan six months ago. I would be several thousand dollars ahead, and I would have a cheerful, robust and happy man six months ago.

"No, sir. Dr. Duncan gives no medicine, for his treatment reaches every part of the body, and does not depend in any way upon drugs."

"No, I am on my way to Galveston, from which place I shall go to New York and travel for a little while in the East."

With a hearty hand shake and a cheerful good-bye, Prof. Brantley walked briskly away.

After the professor's departure, Dr. Duncan told of another case of a lady who had been in the Sanitarium two weeks. She had been very ill for five years, hardly able to be upon her feet.

DALLAS. E. F. Wortham of Gainesville, was here Monday.

W. T. Brown of Wylie marketed a car of hogs in Dallas Wednesday.

H. S. McAvoy of Weatherford, was a guest at the Oriental Saturday.

P. W. Trece of Ovilla was among the visiting swine breeders Saturday.

J. W. Medlin of Roanoke was among the visiting cattlemen during the past week.

Wm. King, the Pecos cattleman, was shaking hands with friends in Dallas Sunday.

L. O. Thompson, the well known stockman and farmer of Alvord, was here Monday.

Jno. Billingsley of Ovilla, was on the Dallas market this week with a consignment of hogs.

W. T. Beverly, the well known Collin county merchant and farmer, spent Sunday in the city.

J. P. Seliger and E. P. King of Farmersville, each sold a car of hogs in Dallas last Thursday.

R. M. and L. S. Brotherton, the well known Wheatland swine men marketed hogs in Dallas this week.

I. T. Pryor of San Antonio, the well known cattleman, was a visitor in Dallas during the past week.

J. E. Chiles of Dulany was in Dallas Thursday with a consignment of two cars of hogs. They averaged 200 pounds and sold for \$4.65.

S. A. Allen of Garland, came in Monday morning and is authority that the rains of the past week have greatly retarded the corn and that the farmers will make a fair crop.

Col. Henry Exall was notified by wire last Friday that at Pekin, Ill., his four-year-old filly, Emerin Electric, had won second money in a race, the time being 2:15, 2:18 and 2:16.

W. D. Kelloff, a well-to-do Kaufman county farmer who resides near Mabank, was in the city one day during the past week and had the misfortune of having his pocket picked. He said that his loss was between seventy and one hundred dollars, in currency and silver.

E. B. Krone of Denton county, was in the city Friday. He says that the wheat crop of Denton county this year will be nearly two million bushels. The corn crop, however, will be short;

Many breeders are now feeding mash in the evening, claiming that the fowls are hungry on the following day and will be more active in foraging for food.

SAN ANTONIO. T. J. Buckley has just returned from a trip to St. Louis with a shipment of cattle. He reports very satisfactory prices.

H. S. Tom, of Floreville, recently bought 200 yearlings from Harry Land, of Wilson county, at \$15 per head.

A. W. Hosie, of Toyah, was in San Antonio several days this week and reports a fair round town.

G. K. Chinn, the Uvalde county sheepman, sold 10 per cent cut-back and is looking around for some more equally good.

E. Marschall, a stockman of Mason county, was in San Antonio a couple of days this week. He says that there is nothing exciting going on up his way in live stock circles, but that cattle are doing better than they have for years.

Wm. Classen, a cattle and sheep raiser of Wetmore, Bexar county, was in from his ranch a couple of days this week. He still has his clip of twelve months wool on hand, having so far failed to get a satisfactory bid. He said his cattle and sheep were doing first rate and that he had come through with a large calf and lamb crop.

Mayer Half has just returned from his ranch out in the Pecos country, where he spent the month of June, the busy time during the branding season. While in getting a little busy out there, stockmen are by no means suffering for rain and cattle are looking extremely well. The calf crop has been heavy, with practically no losses from worms or wild animals.

Jos. Cotulla, one of the best fixed stockmen of southern Texas, who owns a big ranch in LaSalle and has another leased near Encinal, was here a couple of days this week. He says that the stockmen here are looking for rain and cattle are looking extremely well. The calf crop has been heavy, with practically no losses from worms or wild animals.

W. I. Clare of Beville was here for a few days the early part of the week on his way home after having spent a month out on his ranch at Spofford. He said that he had been having a good deal of trouble with worms. He went out to take a look at things but found the worms deprecatory to such an extent that he pulled off his coat and went to work. He said that the worst trouble was over now and with dry weather for a while there was no further danger.

Jno. Kritzer, the Taylor cowman, who has been traveling extensively in the country below San Antonio of late was here a couple of days during the week. He said that "some of the country is getting dry and I find the cattle are all too high. The present owners of beef cattle seem to have gotten the idea that the particular breed they own will soon be extinct or very rare. They want entirely too much money for their little old dogs. There is not going to be any feeders to speak of in this country, as a larger proportion of the aged steers have gotten fat and gone to market than ever before. This is not going to seriously discommode the feeders, however, unless prices fall some. It is somewhat dry down here, but not so dry that we wish for rain. During the past ten years, from records we have kept, we find that when rains have fallen in July they

Green Davidson and N. W. Fleming returned from their Eagle Park ranch the early part of the week, where they spent several days in distributing their young steers on pastures for the summer. They are about through making shipments to market for the present.

Horace Story, of San Marcos, passed through San Antonio on his way home from Atascosa

SHEEP--GOATS

Dr. A. M. Rork of the bureau of animal industry formerly stationed at San Antonio, Tex., has been sent to Trinidad, Colo., to inspect sheep for scab.

Ed Davis of San Angelo, bought at private terms 1100 sheep from J. W. Murray of Coleman, Tex. He sold to a Kansas City buyer 1700 fat sheep at \$2.50.

The above is a cut of the instrument used by Terrill for the examination of Catarrh and all nose and throat diseases. It enables the Doctor to show his patient the condition of the affected parts, and if needed treatment explaining its necessity.

A SURE CURE The early effects of Catarrh, Croup, Whooping Cough, and all other diseases of the throat, chest, and lungs, are cured by Dr. J. H. Terrill's Catarrh Cure.

DR. J. H. TERRILL, 245 MAIN STREET, DALLAS, TEXAS.

\$500 REWARD Will be paid for any case of SPYTHRIL, CHLORO, or BLOOD POISONING which my remedies fail to cure. Young, old, middle aged, Single or Married Men, and all who suffer from the effects of LOST MANHOOD, Nervous Debility, Unnatural Losses, Failing Memory, Weak, Shrunken or Undeveloped Organs, should send for my FREE MEDICAL TREATISE, which contains much valuable information for all who suffer from private diseases.

THE QUESTION. Where shall I go for the summer? Is it better to go to the North, East or West via the fast "Katy Flyer," a wide vestibule train with buffet sleepers and "Katy" reclining chair cars, seats free. Apply to any "Katy" agent and they will cheerfully furnish you with information as to rates, time-schedules, etc. or write to W. G. Crum, general passenger and ticket agent, Dallas, Tex.

The Custer county, Wyoming, wool warehouse was recently destroyed by fire. There were 900,000 pounds of wool in the warehouse, partially insured. Loss, \$250,000.

W. I. Harmon of Edgmont, S. D., recently sold his entire flock of sheep to the Cattle Sheep Company of Custer, for a consideration of \$25,000. Six years ago Harmon started into the sheep business with a capital of about \$300.

WOOL IN MONTANA--Wool buyers have made some deals in Wyoming and at the Caspar markets considerable wool has been sold at an advance of 25 cents, but there are still remains in store many bales of fleeces, agents of the Eastern houses preferring apparently to have it consigned, but owners holding out for selling, says the Miles City Stock Growers' Journal.

REGULAR FEEDING ESSENTIAL--Regularly and uniformly in feeding are of prime importance, says Bulletin No. 36 of the U. S. Department of Agriculture. Some of the most successful feeders manage a large feeding establishment with absolute regularity and precision.

THE DAWES COMMISSION will begin making the final roll of the Choctaws, preparatory to the allotment of lands in the Cherokee nation, under the provisions of the contract this week, as follows:

Opening of Reservation--The opening of the Indian lands continues to be an absorbing topic of conversation in the Indian Territory. The settling up of the Kiowa, Comanche, Arapahoe and Cheyenne reservations means much for two at least of the civilized tribes as well as for the white people who will be given the opportunity to settle there and take up homes.

PAINT TALKS--XXX PROGRESS IN PAINTING. It is too often assumed by painters that the use of the brush is the only thing that counts in painting.

THE NEW ROUTE OPEN. Line Will Be Open May 15th With a New Through Train Between Chicago, Arkansas and Texas.

THE COTTON BELT RATES. Cincinnati, Ohio--Annual Convention E. Y. P. U. July 12 to 15, one standard fare plus \$2.00 for round trip.

NEW MEXICO

William McIntosh, the most extensive Merino sheep raiser in central New Mexico, recently completed the shearing of his flock after thirty-eight days' work. An average of nine pounds to each sheep was obtained, making his spring clip amount to nearly 215,000 pounds, which he will hold for the market.

THE TWIN TERRITORIES The reunion of Roosevelt's Rough Riders at Oklahoma City last week was a very successful affair and great crowds witnessed the grand parade in the city.

CATTLEMEN IN NEW MEXICO are vigorously protesting against the late covering of the federal lands which all fences on federal lands must be taken down, one or within thirty days.

GEORGE M. SLAUGHTER, manager of the Slaughter ranches, is having the 360-acre tract east of Otis Brothers' sheep ranch bought from the Roswell Land and Water company, fenced, and will also fence the 1360-acre tract six miles south of Roswell, also bought from the company, fenced soon.

BLACK-LEG VACCINE. We notice quite a few reports concerning the disease called black leg, which is always liable to break out in the spring of the year.

PERIOD OF GESTATION. Some animals carry their young for an abnormal period, either shorter or longer, and this habit becomes characteristic with them.

THE CATTLE TRAIL ROUTE. This road has penetrated the great plains and opened up to civilization the world an immense expanse of country hitherto an unknown waste.

THE LIVE STOCK MARKET OF ST. LOUIS. The St. Louis National Stock Yards, located at E. St. Louis, Ill., directly opposite the City of St. Louis.

FORT WORTH STOCK YARDS COMPANY. Operate the only Live Stock Market Center in the Southwest. The only Market in Texas where you can secure TOP PRICES FOR CATTLE AND HOGS.
