

FARM NEWS.

The pecan crop in Collin county is larger this year than ever before.

The Truck Growers' association at Mabank, Tex., has over 50 members.

New corn sold on the streets of Wills Point at 85 cents a bushel last week.

A truck growers' organization, with 28 members, has been formed at Jefferson, Tex.

James L. Ford of Jefferson, Tex., has placed an order for 4000 Elberta peach trees, to be delivered this month.

At Weatherford, Tex., cotton seed sold at 30 cents a bushel last week. The Weatherford oil mills are bringing in some seed from Louisiana.

The harvesting of the rice crop in Fort Bend county has been commenced. There are several hundred acres in rice in that county this year and the acreage will be increased next year.

J. W. Embury of Waxahachie, who recently sold 1000 acres of Ellis county land at \$12 an acre, was a visitor at the Fort Worth office of the Journal this week. He stated that he had purchased 2000 acres of land near Wharton and expected to go into the cultivation of rice and sugar on an extensive scale.

R. C. Pierce, of Marx, brought two good ears of corn to our office this week. The seed was planted on June 13, and never had but one shower of rain upon it. The ears were of good size, and the kernels sound. He got the seed from the north. This is certainly a fine corn for this country. It matures so early that the drought does not hurt it.—Athens Review.

Gen. Malsler, of the Chappel country, was in town Wednesday and reported the little black worms making a clean sweep of grass and wheat fields in his part of the country. He said Charlie Harris reported a 15-acre oat field perfectly green Monday morning, and the oats high enough for grazing, bare as a yard Wednesday morning.—San Saba News.

The cotton experts are now trying to reach a correct conclusion regarding the damage caused the crop in Mississippi by the recent spell of bad weather, and the most conservative estimate is that there has been a deterioration of 15 per cent since the publication of the monthly government report, which credited Mississippi with prospects for a crop of 85 points.

A Hillsboro report says that John Alexander, a truck farmer living in the sandy land near Woodbury, has had success with winter onions and cabbage. He plants his crops in the fall and has them ready for market by the first of April. He says he has done so for several seasons, and will soon be

ready to plant his next crop. This year he made nearly \$300 on less than half an acre of land. He states that he could make money raising tomatoes at 20c a bushel, and would contract to raise nothing else on his farm if he could get a contract to sell all the tomatoes he could raise for \$20c a bushel.

From Hood county comes the statement that army worms have destroyed all the young corn grass, besides a considerable quantity of sorghum in some parts of the county, and farmers fear they will destroy all wheat and rye that are sown early. Nearly all the worms that first appeared have now gone into ground, but the fear is that the second hatching will come out before frost.

A Victoria report says: Erskine Barden, teller at the First National bank, is exhibiting an American Ponderosa lemon picked from a tree in his yard planted last year. The tree contains 21 others equally as large. It is the size of a pineapple and would make a dozen lemons of ordinary size. It weighs 21 ounces and is said to be similar in taste to the ordinary lemon, and can be used for the same purpose.

The New York Chronicle in its issue of Sept. 28 adds: "Telegraph except at this evening denote that, except at a few points in the Southwest, there has been little or no rain during the week and that, in consequence, the gathering of cotton has made very good progress. With regard to the condition of the crop, our correspondent at Galveston states that it is unexcited and that complaints of damage by Mexican weevil are numerous. Reports from Alabama are to the effect that deterioration continues and the yield is very disappointing. In some localities in the Carolinas it is claimed that late cotton would be helped by rain."

W. B. Doak of Maplehurst farm, Russellville, Tenn., writes: "The state commissioner of agriculture, Capt. Thomas H. Payne, will hold the first meeting of the Upper East Tennessee Farmers' Institute at Morrisville, Tenn., Oct. 2 and 3. Ex-Gov. Buchanan will address the convention on organization. Capt. Payne will expound the purposes of the institute. Prof. Andrew M. Soule, of the university, will try to entice the farmers over wheat culture in spite of the fly, winter killing, and other set-backs. This is a most excellent speaker on a very large subject. However, we are glad to know that fly and stock and horticultural themes have largely succeeded grain raising on such programs. Maplehurst will exhibit at the Interstate, True County and Chestnut Grove fairs next month."

The stock has all been taken in the tobacco farm, and the owner has rented the land and secured the services of Mr. Dublin, an experienced tomato grower to superintend the farm. He will have to employ a number of hands in the cultivation, staking, pruning and gathering. They will put twenty acres in for shipping and thirty acres for the canning factory. The

farm is located close to town, and is convenient for the members of the truck growers' association to go out and see the operation. The main object of the enterprise is to furnish the stock growers with object lessons, from which they may learn the way to manage tomatoes. Work will begin on the farm about Dec. 1, if not sooner. They have donated to them three tons of fertilizer by different companies.—Atlanta Journal.

Table with columns: Name, Acres, Returns. Lists names like C. I. Bustin, S. S. Dublin, A. C. Dublin, etc., with their respective acreages and returns.

Mr. Billington fertilized his land principally with manure, using only 100 pounds of commercial fertilizer. He also grew about one-third morula plants on his land than growers usually do.

WEEKLY CROP REPORT.—Following is the weather bureau's weekly summary of crop conditions issued last week. The week has been unseasonably cool in nearly all districts east of the Rocky mountains, with light to heavy frosts, more or less damaging, throughout the central valleys, Middle Atlantic states and northern portions of the Central Gulf states. Excessively heavy and damaging rains occurred in the East Gulf and South Atlantic states. On the Pacific coast the weather conditions were favorable except in northern and portions of Central California, where rains probably caused extensive damage to grain, hay and grapes.

Late corn has been damaged to some extent by heavy frosts in North Dakota and portions of Nebraska, Kansas and Missouri and Iowa, the percentage of damage in the last named state being very small. The crop has also suffered some slight damage on low lands in Indiana and Ohio, but the bulk of the crop east of the Mississippi river is matured and safe from injury from frost. Cutting has progressed favorably and is nearing completion in some states. The heavy rains in the South Atlantic and East Gulf states caused much injury to cotton. In the central and eastern districts much cotton has been discolored and considerably bent out by heavy rains, while rotting and sprouting are quite generally reported, and cool weather has checked growth. In Texas picking progressed uninteruptedly, and in some localities some improvement in late cotton is indicated, but the general condition of the

crop in that state is poor. But little damage was done by frost to tobacco in the Ohio valley and none elsewhere. Favorable reports concerning apples continue from Kansas; more encouraging statements are also received from portions of Arkansas and Tennessee, and a slight improvement in late apples in Missouri is indicated. Elsewhere the apple outlook continues unpromising.

With but few exceptions, plowing and late fall seeding have progressed favorably and the reports from the state of the Mississippi valley indicate that early sown wheat is coming up nicely.

THE SUCCESS OF RICE.—Discussing the increase of the rice-growing industry, S. L. Cary, in Southern Farm Magazine, says: "The safety of a crop is the largest factor in success. A very few of us as yet realize the many dangers that irrigation throws around growing crops. To-day one-half the growing crops are menaced by drought. Irrigation is a safe remedy. The average loss annually reaches way up in the millions. The loss by insects, bugs, worms and grasshoppers reaches hundreds of millions more."

We have the same safe remedy in double irrigation. Fires from prairies, from engines, from any and all sources causes the loss of millions more. Water will save wherever you have the suitable conditions, canals, wells and level clay soil. Indeed, the conditions are all met in the rice belt. Ordinary people were satisfied with a rainfall of sixty inches (five feet) each year, and well they might be if it were evenly distributed. But that is seldom the case; for instance, May and June have averaged a little over six inches each for thirty years, but this year may give 35-100 of an inch and June about one inch, or a shortage of over ten inches. This loss might easily ruin the growing crop. The remedy is also found in artificial irrigation.

Again, experience has shown that there is time in the life of every crop when irrigation would double its yield. Most of us have found that regularity of production is a very important factor in success: A small average crop assured each year, like a small monthly stipend of allowance, is more desirable than a large crop followed by a certain period of want. Double irrigation gives double security for all growing crops, and makes the game of making a living, at which all have to play, almost a certainty. Rice-growing in southwest Louisiana has double irrigation (natural and artificial).

The rainfall is well distributed as well as abundant in this department, as evidenced by the fact that a general failure of crops has not happened in 100 years, and now 100 canals and 500 irrigating wells are battling successfully the worst drought in the history of the country, and expect to save the most valuable crop ever made. Irrigation is

the best fertilizer, and adds 50 per cent to the value of a sure crop. Anciently the renter paid 30% per cent for water; to-day the canal charge is 20 per cent, and the wells give water to the owner at the actual cost; probably 10 per cent of the crop. Prof. W. C. Stubbs, in charge of Louisiana's three experiment agricultural stations, said recently that "Southwestern Louisiana had more improvement and more money the past five years than any similar belt in the United States," and he might have added that all this has been brought about by the introduction of modern methods and machinery with double irrigation into one crop—rice—by immigration from the northwest.

These people found the hook or sickle the only harvester, the walking beast the thrasher, the mortar and pestle the common rice cleaner for table use. Only a short time ago, comparatively, the invention of labor-saving machinery or any change in the established order of things was considered sacrilege, against the sacred liberty of recent date. The invention of labor-saving machinery is the child of labor. The mother cannot go back on her own child, and we of the nineteenth and twentieth centuries have found in those things, said to belong to God, the most valuable things in the lives of men. The coal, the oil and the hardest wheat, the sifter of the earth are the motive power of commerce; gold, silver and copper the life of trade; steam and electricity that move the world and carry man (his trade), and his thoughts to the ends of the world. Most of these, and many other things of infinite value, have been evolved by man in the past century from the hidden mysteries where man was said to be forbidden to tread. But we are not sleeping on our laurels, having distanced all competitors. Our success has opened up new fields. Out of a possible 1400 varieties of rice, we have tried possibly a dozen. Our patriot, Hon. Henry Wilson, United States commissioner of agriculture, has commissioned one of our ablest professors to go around the world in search of the best varieties of seed rice, and any useful knowledge of the most valuable crop.

"Eternal vigilance, the price of liberty," is also the price of success. The experimental stages in modern rice-growing have each and all been tried "so as by fire." The importation of fresh seed will doubtless be full of danger. We imported cane with peach trees, and the cottony cushion scale with the orange tree, and the Carolina weevil with the Carolina seed rice. All experiments are full of danger and dangers.

Our success, bought by labor, has been great; has only just begun, and is to be far excelled in the near future. We see no limit to progress in this commercial era. Rice is the king of the cereals in its history, its water distribution, its better adaptation as food for man and beast. Its cultivation takes less from the soil, and its use gives more to man, and its growing is more profitable than the growing of any other cereal.

It is the hardest, will stand more

THE HOUSEHOLD

UNCLE HIRAM'S OBSERVATIONS.

"I've seen," said Uncle Hiram, "lots of noble men an' brave through jes' one bit of folly brought t' ruin an' the fust dollar made."

"An' yet they made a failure, much t' every one's surpris' 'cept me."

"So I've learned a valued lesson that to you I ain't wotting on aples that you find beyond your reach."

PRETTY WEDDING CUSTOM.

A pretty custom at English royal weddings has been in vogue since the marriage of Queen Victoria.

CHAFFEE EXCUSED HIM.

"Bill Hall," who is now a wagon-master on duty at Pacey cavalry barracks, is the hero of an amusing little story in which Gen. Chaffee, the new military governor of the Philippine islands, figures.

"Bill" Hall formerly campaigned with Gen. Chaffee in New Mexico and other points in the West. It seems that during the recent China campaign "Bill" was stationed at Taku. While there he was called before Gen. Chaffee and asked if he could handle 90,000 rounds of ammunition.

ly decided that he could handle the ammunition. He made an answer to this effect and was told to take the ammunition and follow the fourteenth infantry.

"Very well, sir," he said, "I'll report you to Gen. Chaffee in the morning."

"The next morning Col. Dugess approached the general and reported the occurrence, stating that he had ordered Wagon Master Hall to pick up his spades as his men dropped them and that Wagon Master Hall had refused.

FALL OF SALT LAKE.

Investigations made by the department of agriculture show that since 1865 the level of Great Salt Lake, Utah, has fallen 14 feet.

It was a dark, rainy night. The click of steel at the same time warned the intruder that the sentry's eyes were upon him—at least that his quick hearing had detected the stealthy steps on the wet sod. Then came out in a half-muffled voice: "Who goes there?"

POLITENESS OF SWEDISH CHILDREN.

One of the most attractive features of Swedish life to the strangers, says William Curtis, of the Chicago Record-Herald, in his letter from Sweden, is the politeness of the children.

WHY MURCHISON WENT BACK.

MAURICE VELLOR.

As James Murchison looked back over what he was pleased to call his career, it seemed to him that all that had ever happened to him had been the result of some extraneous and irresistible force.

SUCH A CHANGE.

Not only in feelings but in looks. The skin is clear, the eyes are bright, the cheeks are plump.

COOK BY STEAM.

That's the new way. The famous BEVERIDGE SANITARY COOKER is doing the honors.

RODS.

For locating Gold and Silver.

MYSELF CURED.

I will gladly inform anyone afflicted with COCAINE, MORPHINE, OR LUDABUM, of a new-sounding, harmless home cure.

MR. MARY BALDWIN.

When writing to advertisers please mention The Journal.

GREAT MEN WHO MARRIED SERVANT GIRLS.

The man out west who caused his family great pain and anger the other day by marrying his servant girl can plead the example of many celebrated men as an extension or a justification of his act.

SAVED BY HIS WIFE.

There is an officer in the regular army who is stationed not a hundred miles away from Governor's Island this very day.

It so happened that a night or two before graduation day Mr. X—let him be called that—was obliged to be on sentry duty. The officer of the guard that night got a sudden idea into his head; the cadet might be so disheartened that he would be negligent of his duty.

BLOOD AND IRON.

You could not live an hour without iron in your blood.

You could not get the benefit of one breath of air without this same iron. The blood runs the circuit of the body every three minutes, and when it reaches the lungs each atom of iron takes two atoms of oxygen back with it to keep the fires of life going.

On the day this measure became law the gambling establishments throughout the country closed their doors, all save one.

With the great man. "Very," said Murchison abstractedly, "I was waiting for what he should see next."

CROWNED A DEAD QUEEN.

How strange, after all, is truth! The old proverb has been made emphatic again and again by pages from history, and the ghastly tale of Inez de Castro and her crowning is not the least remarkable.

MARKETS

PORT WORTH

(Reported by the Fort Worth Livestock Commission Co.)
Fort Worth, Sept. 30.—The receipts of hogs at the Fort Worth market were 21 cars. We sold the first of the week a straight car of hogs at \$6.22 1/2, and latter part of the week sorted hogs at \$5.25. The market was very quiet. We look for our market to continue strong on good fat hogs. Mixed fat hogs are not selling quite as well, all the way from \$4.50 to \$6.00, according to quality. Fat light pigs, weighing 100 to 125 pounds bringing \$4.00 to \$4.50, and up to 150 pounds \$3.50 to \$4.00.

The supply of cattle the past week has been liberal. There has been very little change in prices either on the market or any of the Northern markets; however, the best fattest steers are selling a little stronger than at any time in the past 60 days, and the discrimination against the poorer kinds is increasing. We had one choice load of 24-pound grass steers at 1 3/4 straight through, and sold to first class buyers. Also sold a few choice cows that were good grass cows, and one fancy cow at \$5.25. We call your attention to these facts showing you how well it pays to bring the best kind, and the low prices shown below on the inferior grades show that it takes the good stuff to bring the good prices.

Choice fat steers \$3.00 to \$3.50, medium fat steers \$2.75 to \$3.00, medium fat cows \$2.50 to \$2.75, medium fat calves \$2.50 to \$2.75, and oxen \$1.50 to \$2.00, canners \$1.25 to \$1.50, sorted hogs \$4.50 to \$5.00, light fat hogs, prime packers \$4.50 to \$5.00, light fat hogs, 125 pounds up \$4.50 to \$5.00.

DALLAS

(Reported by the National Livestock Commission Company)
Dallas, Sept. 30.—The National Livestock Commission Company reports that hogs are needed very badly in the local market. They are selling for \$4.25. Demand for fat cattle is extra good at account of the fair. The market is overstocked with the thin and half-fat class. Fat steers, cows, heifers and calves have a ready sale. Fat sheep are in good demand. Shippers should bill their steers with the privilege of the Dallas market, which will give them the benefit of selling here if prices are satisfactory, and at the same time enable them to spend a day at the great State Fair.

Quotations today were as follows:
Prime steers, 900 lbs up to \$3.00 to \$3.25, choice steers, 700 lbs up to \$2.75 to \$3.00, medium fat cows and heifers \$2.50 to \$2.75, medium fat calves \$2.50 to \$2.75, veal calves \$3.00 to \$3.25, choice muttons, 90 lbs and up \$2.75 to \$3.00, stock hogs \$4.50 to \$5.00, sorted hogs, 200 to 300 lbs \$4.00 to \$4.50, choice hogs, 170 lbs and up \$4.50 to \$5.00, heavy hogs \$4.00 to \$4.50, light fat hogs \$4.50 to \$5.00, stock hogs \$3.00 to \$3.50.

CHICAGO

(Reported by the National Livestock Commission Company)
Chicago, Ill., Sept. 30.—Cattle receipts 21,000 head, including 15,000 Texans and 6,000 others. Good fat steers \$10.00 to \$11.00, medium fat steers \$9.00 to \$10.00, poor to medium \$8.00 to \$9.00, stockers and feeders \$7.00 to \$8.00, calves \$2.00 to \$3.00, Western steers \$3.00 to \$4.00, Western steers \$3.00 to \$4.00.

ST. LOUIS

(Reported by the National Livestock Commission Company)
St. Louis, Mo., Sept. 30.—Cattle receipts 670 head, including 4200 Texans. Market steady. Good fat steers \$10.00 to \$11.00, medium fat steers \$9.00 to \$10.00, poor to medium \$8.00 to \$9.00, stockers and feeders \$7.00 to \$8.00, calves \$2.00 to \$3.00, Western steers \$3.00 to \$4.00, Western steers \$3.00 to \$4.00.

KANSAS CITY

(Reported by the National Livestock Commission Company)
Kansas City, Mo., Sept. 30.—Cattle receipts 7000 head natives, 4000 Texans, 1200 calves. Good fat steers \$10.00 to \$11.00, medium fat steers \$9.00 to \$10.00, poor to medium \$8.00 to \$9.00, stockers and feeders \$7.00 to \$8.00, calves \$2.00 to \$3.00, Western steers \$3.00 to \$4.00, Western steers \$3.00 to \$4.00.

NEW ORLEANS

(Reported by the National Livestock Commission Company)
New Orleans, La., Sept. 30.—The market for choice to medium beef cattle was active and firm throughout the past week.

COTTON MARKET

(Reported by the Cotton Commission Co.)
Houston, Sept. 30.—Cotton steady. Good ordinary 5-8-16, low middling 7-16, middling 8-16, fair 9-16, good 10-16, extra 11-16, black 12-16. Sales 500 bales up and 100 to arrive.

GRAIN MARKET

(Reported by the National Livestock Commission Company)
Dallas, Sept. 30.—Wheat, No. 2, 78c. Corn, No. 2, 55c. Soybean, No. 2, \$1.00. Cotton, No. 2, 15c.

PRODUCE MARKET

(Reported by the National Livestock Commission Company)
Dallas, Sept. 30.—Quotations given are those made by dealers to the trade. Prices to producers are 25 to 50 per cent lower.

WOOL AND HIDE MARKET

(Reported by the National Livestock Commission Company)
Dallas, Sept. 30.—Wool steady. Good ordinary 5-8-16, low middling 7-16, middling 8-16, fair 9-16, good 10-16, extra 11-16, black 12-16. Sales 500 bales up and 100 to arrive.

PLAGUE TO CATTLE-RAISERS

Twenty Million Dollars Lost This Year—Annually Through the Ravages of Blackleg.
While for a long time common in England, the most recent years that blackleg has been prevalent in this country, it has been particularly noticeable in the startling intelligence that of all animal diseases in the United States it is the most fatal to the white stock in the United States. It is a striking peculiarity of the malady is that highly susceptible to its attack.
