MAVERICKS.

Very favorable reports of range conditions come from Pecos and Toyah, though it is pretty dry south of Pecos. A Mexican was severely burned by the explosion of a pear-burner on the Shiner ranch near Pecos a few days ago. Returns from the cattle shipment made a few days ago by Messrs. J. J. Sumners, North & Buehrig and George Thomas have been received. The first two shipments were the first steers and others-bulls. The latter brought \$42, North & Buehrig steers, \$45; and the Sumners' steers, \$50. They aggregated 1170, and eight cars of them weighed 1200. These are the cattle that were fed on cotton seed hulls and meal. It shows what improved methods and good blood will do for feeders. Besides the first cost of the cattle and the feed, there was a profit of about \$18 per head. Progressive ideas, it will be seen, yield very handsome returns in the stock business.—Cuero Star.

IN THE PLAINS COUNTRY.

Col. C. W. Holt, who has been traveling through West Texas and the Panhandle, to a journal man said: "In the early part of the fall the frosts were unusually frequent and unusually heavy, but the grass was so rank, and the turf was so thick that there was a heavier amount of feed on the plains than in ordinary years. Consequently cattle have wintered better than usual. "There have been established there a great many small stock farms of just a few thousand acres of land. These people have raised feed stuff. They are taking care of the mother cows of young calves, so that the percentage of loss of young calves will be small. "Just before I left, I saw a rain northwest of where I stayed, at Gall, that I think went over a considerable portion of the plains country. "The rush for lands in that country is a craze. While passing through Gall, I heard from some of the county officials that a few days before that, some fourteen sections of land had become subject to application under the school land law. The men who were trying to get the land, put their wives to the front to make the applications, and there was a sensational scene, the details of which I really would not undertake to describe. "However, the whole plains country will be taken up in stock farms, and the big ranch business is gradually disappearing in Texas."

SAN ANGELO CATTLE SHIPMENTS.

The next few weeks will witness a decided movement in the cattle business, as the following figures will show. San Angelo is easily holding her own as first in the rank of shippers for this section. The list of shippers follows: M. Heit shipped 50 cars March 31, and 30 cars April 1, and A. M. Miller to ship 50 cars to-day. Bird & Mertz, April 3, 50 cars. Sol Mayer, April 4, 50 cars. W. T. Cawley, April 5, 35 cars. Harris Bros., April 6 and 7, 75 cars. Bird & Mertz, April 7, 50 cars. M. B. Muller, April 8 and 9, 75 cars. Higginbotham Bros., April 8, 10 cars. A. M. Miller, April 8, 35 cars. Sol Mayer, April 9, 30 cars. H. M. Stonebreaker, April 10 and 11, 150 cars. Adam, Shavor & Slaton, April 10 and 13, 100 cars. W. Talbot, April 14, 50 cars. W. B. Stillman, April 15, 40 cars. J. M. Slaton, April 14 and 15, 80 cars. R. Harris, April 15, 17 cars. N. M. March, April 16, 40 cars. J. S. Todd, April 16, 60 cars. Hassard Bros., April 17, 63 cars. A. M. Miller, April 17, 33 cars. J. B. Murrah, April 18, 15 cars. H. M. Stonebreaker, April 18 and 19, 60 cars. Sol Mayer, April 19 and 20, 125 cars. Hassard Bros., April 21, 63 cars. Bird & Mertz, April 21, 50 cars; April 22, 30 cars. Hassard Bros., April 22, 15 cars. J. Hersey, April 22, 30 cars. H. G. Dearing, April 23, 75 cars. Sawyer Cattle Co., April 24, 60 cars. J. Findlater, April 25, 18 cars. Shannon & Brown, April 25 and 26, 100 cars. Gay Bros., April 27, 30 cars. J. Montague, April 27, 30 cars. Spaulding & Hays, April 28, 29 and 30, 210 cars. J. Miller, May 1, 75 cars. F. M. Lottow, May 2, 75 cars. W. B. Stillman, May 3, 75 cars. Sawyer Cattle Co., May 4, 30 cars. Sheep—J. R. Hamilton, double-deck sheep, April 18, 10 cars; 25, 12 cars; May 3, 15 cars. F. Baker, May 6, 40 cars. Total cars cattle, 2354. Total cars sheep, 49. In addition to the above list, Mr. Loper estimates that there will be at least 200 more cars of cattle and 300 more cars of sheep shipped from Angelo during the season, which will swell the total nearly 3000 cars. Last shipping season the total shipped from San Angelo amounted to 1612 cars.—San Angelo Press.

"Sunny Slope Herefords." 150 bulls from 6 to 30 months old, 60 yearling heifers, 60 cows from 2 to 8 years old.

G. A. STANNARD, EMPORIA, KANSAS. CATTLE SALES.

Holman Bros., of Gillespie county have sold 200 steer yearlings to J. B. Middlebrook of Liano. West & Bennett of San Antonio, last week, sold to Riley Smith and C. T. H. Hunter 1500 4-year-old steers from the Spofford ranch. The cattle will be shipped to the Territory. King Bros., of Throckmorton, recently sold 100 steers and up at \$31. D. Buchanan purchased from John Ledbetter at Quannah 700 ones at \$17.50. Henry Gray and Shelton Holcomb have purchased 300 cows at \$13.50 from the Kimble county ranch of T. A. Sloan. J. S. Todd, of Muskogee, I. T., lately purchased at San Angelo 500 cows from the Half-Circle 6 ranch at \$15 and 1500 head of Bar S. cows at something over \$16. The cows were purchased for the Territory. At Llano Shaw & Peck sold 125 steer yearlings to J. A. Mayes at \$12. In Sultan county Don Cooper bought a small bunch of twos from August Meckel at \$22. F. H. Sears of Canadian, has sold to McCristian Bros., 250 two-year-old steers and 450 yearlings to be shipped to Montana in May. W. V. Whitehead has purchased about 1500 steers, twos, from various parties in Sutton county, paying about \$18. J. B. Goodlett purchased of Capt. P. R. Scott, a three section pasture and improvements, and 1000 head of cows and calves. The consideration was \$5,000.—Quannah Observer. Last week A. J. Culpepper sold to A. G. Startz five loads of steers, which were shipped from Dilley to New Braunfels to be put on feed. The price was \$31.25 per head. R. W. Murchison of Eldorado has purchased from Thomson Bros., 20 bulls at \$42.50. The White & Spearwingen Livestock Co., recently sold 2000 GXY yearlings, at private terms, to Henry Harding. While here last week W. B. Stillman bought Territory cows from the following parties: G. W. Stephenson

VACCINATION IN BLACKLEG.

Its Efficacy Fully Established—Relative Merits of the Two Methods in Vogue. While there is no known cure for blackleg, there is a reasonably certain preventive, as cattlemen are finding to their satisfaction and profit. The preventive is vaccination. There is no longer any doubt as to its efficacy. The principle involved is as firmly established as that which underlies the vaccination of the human subject for the prevention of smallpox. There are two methods of vaccination with Blacklegoids. An important saving of time is effected when a considerable number of cattle are to be vaccinated. The method of vaccination with Blacklegoids is simplicity itself. The operator inserts a single Blacklegoid into the neck of the animal, selects the place of inoculation (preferably in the side of the animal's neck) and, with a single thrust, plunges the needle well down with the plunger. The operator is then withdrawn, and the needle is thrown away. The operation need not consume one minute. Indeed, in November last a herd of 113 animals on the Marshall Field ranch, near Slaton, Neb., was vaccinated with Blacklegoids in exactly thirty-five minutes. This represents an average of three vaccinations a minute, and is believed to be record time for such a performance. Blacklegoids seem to represent the perfection of blackleg vaccine, and in their evolution science has performed a work of inestimable value to the cattle raisers of the country. The difficulties of filtering, measuring and mixing incident to older methods are long since a thing of the past, and the work of the operator is limited to keeping clean the injector, loading and discharging it. Blacklegoids may be obtained through any retail druggist. Messrs. Parke, Davis & Co., the well known manufacturing chemists and biologists of Detroit, Mich., have recently issued an eight page folder describing in detail the cause, symptoms and nature of blackleg, which we are informed they will be pleased to send to any stock raiser, postpaid, upon request. It is explained fully both their Blacklegoids, which they particularly recommend, for the reasons suggested, and their "Blackleg Vaccine Improved," which they continue to market and which for several years has been the blackleg vaccine most in demand in the various stock raising regions of

THE WOODLAND STAR HEREFORDS.

For sale, seven bulls ranging in age from 14 to 19 months old, and several yearling heifers, all of excellent service in the spring. For particulars address, NOAH LENTZ & SON, Lake City, Mo. V. WISS. Breeder of pure-bred Hereford cattle. (Ranch in Goliad county, Texas.) Both sexes for sale. Address Drawer 817, Beaumont, Texas. A. B. JONES, BIG SPRINGS, TEX. Breeder of Registered Herefords. Young stock for sale.

2104 Stallions in Service 2117

Bred to the champion trotting stallion in state or southern states, GOV. STRONG, 2104 winner of \$7 race out of 47, the greatest record of any stallion in world, under 9 years old. His pedigree contains 48 standard crosses. He sired "The Webster 2:28 1/4, Myra 2:50, and 4 others can beat 2:30." BENO CLIPPER, 2117, the champion saddle stallion and sire of addlers of state. He and colts have won 85 premiums in state show rings. He is sired by Reno Defiance 2:39 1/4, sire of 15 with records below 2:35 1/4. Terms: To insure colt, \$25.00 and \$30.00 respectively. Make from distance kept cheap. Address W. O. FOOT, Dallas, Texas. A. E. BUCK, McKinney, Texas. When writing to advertisers please mention the Journal.

Galloway Cattle

FOR SALE—Two carloads yearling bulls, all registered; 70 head of registered cows from 2 to 4 years old, all bred to imported Woolley 10055 (7445). Correspondence solicited. C. N. MOODY, Atlanta, Mo. PASTEUR BLACKLEG VACCINE ready for use. Single Blackleg (for common stock): No. 1 (10 doses) \$1.50; No. 2 (20 doses) \$2.50; No. 3 (50 doses) \$6.00. Double Blackleg (for choice stock) \$2.00 for 10 doses, first lymph and second lymph inclusive. Blackleg Vaccine Ointment, for applying Blackleg vaccine, 50 cents. PASTEUR VACCINE CO., Chicago, New York, Kansas City, Ft. Worth, Denver, San Francisco. VACCINATE YOUR CATTLE. PARKE, DAVIS & CO.'S BLACKLEG VACCINE (Blackleg Vaccine Pills) WILL POSITIVELY PROTECT THEM FROM BLACKLEG. Our Blacklegoids afford the simplest, safest, surest method of vaccination. No filtering is necessary, no measuring, no mixing. Each Blacklegoid is an exact dose, and it is quickly and easily administered with our Blacklegoid Injector. While still marketing our "Blackleg Vaccine Improved," we recommend the use of our Blacklegoids because of their absolute accuracy of dosage and their ease of administration. Ask your druggist for them and you will get a vaccine that is reliable, a vaccine that has stood every test. Write us for literature—free on request. PARKE, DAVIS & CO., Detroit, Mich. BUCHANAN'S Cresylic Ointment, Standard for Thirty Years. Sure Death to Scow Worms and will cure Foot Rot. It beats all other remedies. It won First Premium at Texas State Fair, Held in Dallas, 1895. CARBOLIC SOAP CO., Manufactured and Sold by J. T. Clark.

TUTT'S PILLS

will save the dyspeptic from many days of misery, and enable him to eat whatever he wishes. They prevent SICK HEADACHE, cause the food to assimilate and nourish the body, give keener appetite, DEVELOP FLESH and solid muscle. Elegantly sugar coated. Take No Substitute.

two weeks each should be made at intervals during such a period. I will suggest that the first should be commenced some time between fourteen and twenty-eight days after freshening, the second between 114 and 128 days after, and the third between 214 and 228 days after.

Third, all the tests be made under the supervision of two representatives of an experiment station who should watch the cows day and night, note the care, weigh the milk, etc.; that the results should be subject to confirmation by retesting in every case that the authorities of the exposition requested.

Fourth, that prizes be offered for net profit, for value of total solids, for value of butter fat, etc.

Fifth, that the number of prizes be at least 100, but no one breed be awarded more than 25.

Sixth, that after the completion of the period allotted for testing all the winning cows be exhibited on the grounds of the exposition, perhaps two weeks, to be seen by all and critically studied by those who desire to study their conformation.

The average cost of testing a cow would not exceed \$150. At this rate twenty-five would cost \$3750. An appropriation of \$5000 would cover this and leave a balance of \$1250 for duplicating the prizes of the exposition.

Mr. W. P. Henry brought a sample of the velvet bean to the Messenger office Saturday. It is a large bean, of peculiar color and shape, and has some remarkable qualities. It makes a good cow feed when ground into chops.

But the main feature of the new bean which especially commends itself to Mr. Henry is its foliage. The seeds are planted some five feet apart each way, and the vine runs on the ground and puts up shoots at short intervals, until the ground is covered as if sown broadcast.

The leaves shed from these stalks, and falling to the ground accumulate until a thick carpet is deposited. It is said to be a very fine fertilizer, and has been known to increase the productiveness of poor land 50 per cent.

Mr. Henry will plant about five acres of this bean this season.—Rockdale Messenger.

Way Bros. of Dallas, Texas, factory representatives for Bush & Gerts Piano company, invite the Confederate Veterans and visitors to the reunion to call at their office, 349 Main street, and inspect their line of high grade pianos and organs.

The David Hardie Seed company of Dallas is one of the largest distributors of garden and field seeds in the South-west. They have recently received a large importation of Bermuda grass seed and can make prompt shipments.

Knights & Jetton have nine head of Jacks unsold of their carload, and if any one wants a good Tennessee Jack now is the time to write to them at Fort Worth, Texas, care Polk stock yards.

Texas needs more hogs.

ularity is the enormous prices now being paid for good breeding stock. For example, a pen of seven birds sold for \$500. This was double the largest sum paid for this number of fowls, and many other breeds are selling their stock at fancy prices.

These of the Wyandotte family, there are several different branches, but we see the White Wyandotte outstripping the others in the race of popularity.

Free range and careful feeding are important in getting strong fertile eggs. Plenty of exercise on free range so that stock will not get too fat is of great benefit.

Another point is quite essential to success. Do not force your fowls all winter trying to make a big egg record and then expect a lot of eggs in the spring possessing strong vitality.

White vs. Colored Chickens.—In Poultry Topics Mrs. D. M. John writes: This subject is claiming wide attention all over the country, where there is an interest in poultry, and we believe that the white plumage man is gaining ground constantly.

HUBBY'S WHITE WYANDOTTES WERE shown at the lead at the Texas show. 4 eggs \$2.00. T. H. HUBBY, Waco, Tex.

BERMUDA FARM—BARRED AND WHITE Plymouth Rocks, Silver Laced Wyandottes, Buff Rocks, Silver Laced Wyandottes, Buff Rocks, Silver Laced Wyandottes, Buff Rocks, Silver Laced Wyandottes, Buff Rocks, Silver Laced Wyandottes.

67 PRIZES WON THIS SEASON.—R. A. "Aggie," aged 1 year, Texas, Wyandotte, Buff Rocks, Silver Laced Wyandotte, Silver Seabright Bantams, Eggs \$2.00 per 15. Belmont Farm, Waco, Tex. Catalogue free if you mention the Journal.

UP-TO-DATE BERKSHIRES. Baron Victor VI, 67th Champion, Dallas Fair, 1901, at head of herd. Write me, J. C. WELLS, New York, Tex.

RICHARDSON HERD POLAND CHINAS. Herd headed by the great Gus Wilkes 2nd, Jr., 2367, assisted by Texas Chief. Pigs for sale of the most fashionable and profitable strains. Write J. W. FLOYD, Richardson, Dallas county, Texas.

BIG SPRING STOCK FARM. Best equipped hog ranch in North Texas. Poland Chinas, the most noted sows and greatest boars. Up-to-date breeding. Pigs furnished not related and bred sows at reasonable prices. FLOYD BROS., Richardson, Tex.

DAIRY PROPOSED TEST OF DAIRY BREEDS AT ST. LOUIS. S. Hoxie of Yorkville, N. Y., writes to the Journal.

Every owner of pure bred dairy cows should wake up on this subject, especially if he owns a valuable cow that may be sought after for this test.

I was a member of the committee for securing cows for the Chicago World's Fair test. Our experience was fruitful of lessons. We visited thirty-eight states, traveled thousands of miles and put in seven months of hard work.

Many of the breeders living in the East refused absolutely, and so did many of the Western breeders, to furnish any cows, or else they had none that were coming in at the right time.

We had in charge a campaign which it was our duty to see prosecuted to a successful termination, and we found that we had to go to the Chicago exhibition with inferior animals and cows that were not fairly representative.

Every one will agree with me that such experiences ought not to be repeated. The remedy is in securing a plan on which our breeders will be generally united.

To this end there should be free discussion of the subject. I know of no better place for it than in the columns of the agricultural press.

The best plan for the test, in my opinion, would be one modeled after the form of the Ohio state plan. This plan has been successfully used for several years under the auspices of the Ohio state board of agriculture.

There would have to be widely different details at the state fair. I will suggest a few details tentatively: First, the period over which the test should be extended ought to be a long one, probably ten months.

Second, that at least three tests of staked as before, the doe following closely behind. I now record the number of the doe in a book and mark the number of the stake to which her kid is tied.

While I am engaged at this work in the morning with one man to help me my herder is directed to take the does out early so as to allow them plenty of time to fill up before the kidding is to commence again for the day.

I now drive out all the mothers from their kids and place a red paint mark on one horn so that in case any one should mix with the dry bunch she can readily be seen and brought back, and then I turn them out to run alone, as they will all come back before night to their kids and can be turned in with them.

My reason for staking by the front foot only is that they do not pull so hard by the front foot as the hind foot. As to the time necessary to keep these youngsters on the stake, I am governed by circumstances.

SWINE RAISING TWO LITTERS.—J. T. Moward of Columbia, Mo., says: Where we raise pigs to feed for the market it pays to raise two litters a year. It costs just as much to fence and build two pens for one year as one litter a year as it does to raise two litters a year and it costs about \$12 to keep a brood sow for twelve months, more or less, according to the number of sows kept on the farm.

Now a man can keep one or two sows much cheaper because the sows are supported from the pen and the sows are supported from the pen and the sows are supported from the pen.

SWINE PLAGUE AND CHOLERA.—In the Atlanta Journal Harvie Jordan of Monticello, Ga., writes as follows: The annual losses from hog cholera throughout the different states in the Union are unquestionably quite heavy, although there is another disease equally as contagious and fatal, known as "swine plague," which is often thought to be cholera by farmers who are not well posted on the two diseases.

The two diseases are pursued in similar both in symptoms and effect, so much so that it often requires a microscopic examination of the internal organs of the dead animal to distinguish the difference.

These diseases may be made infectious by exposing wild hogs to a diseased animal or by feeding the internal organs of diseased carcasses to other animals.

The germs of cholera are more evenly distributed along through the blood vessels and hemorrhages do not occur. In swine plague there are ulcerations of the large intestines and collapse of the lung tissue.

In swine plague there is inflammation of the lungs and congestion of the mucous membrane. Yet, notwithstanding these distinctions of the two diseases in the different parts of the animal attacked, it is nevertheless difficult for the average observer to distinguish one from the other.

These diseases may be made infectious by exposing wild hogs to a diseased animal or by feeding the internal organs of diseased carcasses to other animals.
