FARM NEWS.

Hall near Alvord last week did much damage to vegetation.

Shipments of potatoes will be made from Richmond, Tex., this week.

A. G. Farrington of Yoakum, Tex., has patented a machine to kill boll weevil.

A vigorous effort will be made to extend the culture of ginseng and pecan trees in Tennessee.

Great damage was done to fruit and grain crops in Cooke county, southwest of Gainesville, by hail which fell last week.

About 80,000 young peach trees have been planted out at Atlanta, Tex. A few trees there will come into bearing this year.

Cotton receipts at Paris, Tex., up to May 1 were 30,025 bales for the season. Receipts for the corresponding date last year were 48,208.

There will be a large addition to the acreage of the onion crop on the irrigated farm near Laredo, which netted the last season over \$500 to the acre.

The Lovelady Truck Growers' association will be among the first carload shippers of new Texas potatoes. Growers now have a few and crop is very promising.

There are 2000 acres of potatoes to be marketed from Atlanta, Tex. Shipments will be made about May 20. The outlook for the potato crop is fine. Atlanta will have about 200 acres in potatoes.

A dispatch from Magnolia, La., says that more sulky plows and riding cultivators have been sold in its vicinity during the past year than ever before, and that other improved farm machinery is gradually coming into use to enable the farmers to dispense with the services of unreliable help.

The East Tennessee Farmers' convention will hold its twenty-seventh annual meeting on May 21, 22 and 23. This convention is one of the most practical held annually in the South, and has usually attracted authorities of national repute in agriculture. It is expected that this year Secretary Wilson and ex-Gov. Hoard will attend. Prof. Andrew M. Soule, of Knoxville has the arrangements for the convention in charge.

tion in high-lying and poor soils was defective. In some districts the seed was also of bad quality, having been damaged by rain and previous harvest. The young seedlings were, moreover, much tried by the normal heat of November and the singular absence of the usual dews.

Late rains have brought about a wonderful improvement in crop conditions in Hamilton county. Wheat and oats are looking fine and promise a big yield. A great deal of millet, sorghum and the feed crops will be planted this season, as they were a success last year, and have saved the farmers and stockmen many thousands of dollars which would have been sent out of the county for feed had they not raised them.

At this writing the fruit crop in Van Zandt promises a large yield, especially apples and peaches. Strawberries are already beginning to ripen, and in a short time dewberries and blackberries will be ready to market. Our black land neighbors will soon be eating the delicious peaches and feed crops will be planted this season, as they were a success last year, and have saved the farmers and stockmen many thousands of dollars which would have been sent out of the county for feed had they not raised them.

WEATHER REPORTS FOR FARMERS.—It is announced from Galveston that the United States weather bureau has inaugurated a new system of distributing weather bulletins in the rural districts. The system is simply in the experimental stage, the reports are so favorable that it is almost certain that the new scheme will be declared a success at the expiration of the first month's test. The new plan is for the mail carriers in the country to display the weather signals on their wagons while delivering the mail, and in this way keep the farmers posted on weather changes. It is considered a great improvement over the old system of mailing cards to the country people in cost, labor and time. The custom in vogue heretofore for the forecast director of the United States weather bureau to telegraph every morning the weather forecast to the postmasters of the rural districts. The postmaster "set up" the forecast in a printing stamp arrangement, and then took enough copies of the forecast to distribute to the patrons of the postoffice. These cards were then delivered to the farmers with the daily mail matter. In Texas something like a half million of these cards are used every year. The cards are furnished by the weather bureau. In addition to the cost of the cards and rubber-stamping outfits furnished the postmaster, must be considered the time consumed by the postmaster in stamping several hundred of these cards every day.

The new system is very simple, novel and advantageous. The forecast is telegraphed every morning from the forecast station of the United States weather service and the mail carriers simply hold the signals on their wagons or carts, and as they travel over their routes the farmers

soon learn to read the signals by a glance at the little flags and pennants. The flags are exact reproductions of the signals used by the weather bureau at its stations in the large cities. The flags are about two feet long and are hoisted on a staff about six feet high. The weather bureau will distribute cards explaining the signals, so that the country residents can glance at the flags and pennants and refer to their explanation card and read the weather forecast. In a short while they will memorize the various colors and positions of the weather bunting and be able to call off the weather prediction at a glance at the signals.

Mount Pleasant—Need dry weather for cotton.

Comoros—Bugs have shown up in the wheat, but recent rains killed most of them.

Nevada—All crops in fine condition; no bug.

Planter—Decrease in acreage of grain; farmers afraid of bugs returning.

Piano—Cotton and grains very fine.

Fort Worth—Oats not very good and heading prematurely.

Defective arrangement for running off prospects for a large grain crop.

Tom Bean—Prospects are that this will be a record-breaker for crops in this section.

Rusk—Cotton, corn and tomatoes rather poor; some damage to peaches by hail.

Corisiana—Large increase in acreage of corn on account of shortage last year.

Bloomington—Wheat and oats badly damaged by drought.

Hillboro—Some wheat poor on account of drought; may be plowed up and planted in cotton.

Waco—Small grains damaged by early droughts.

RUSSIAN BUTTER.—The Russian butter export trade has assumed very threatening proportions. The other butter producing countries, and is getting more attention, both private and governmental, this year than ever. The supply of refrigerated wagons is to be increased more than 100 per cent, but as a writer in the Milch-Zeitung points out, it is little use increasing the accommodation if that accommodation is itself defective, says Kuhlows Review, it appears that the complaints as to the quality of the butter as it arrived in this country were well founded, and they arose through the refrigerated wagons either not being sufficiently supplied with ice for their long journey or through a defective arrangement for running off the water as the ice melted. Fresh wagons on a new model are to be built, and will be cooled, not with ice but with a refrigerating installation either as noted in another paragraph on this page, each wagon carrying its own refrigerator, or in a series of wagons forming a special train and accompanied by a refrigerating plant in a wagon attached.

The Russian wagons will be planned to maintain a temperature of not more than 10 degrees C. (50 degrees Fahr.) throughout the long journey. Denmark, it appears, is offering to supply wagons, each carrying its own refrigerator. There must be a good opening for cold storage at the ports of reception and loading for abroad; such as Cronstadt, Riga, and Revel. It is arranged now that eight butter trans shall leave the town of Ob every week during the summer for the coast. There is some fear that the Russians may not be able to sort the butter well enough for the London market and the Danes do not appear to be anxious to help them in the task which is so efficiently discharged in Denmark. Cold storage is still very short at the ports for this purpose.

Fowls appreciate good food as well as other animals, but it is unwise to limit them to one kind, but it is ever so good or wholesome.

Omaha—Too much rain for cotton.

COTTON BELT'S REPORT.—The general freight department of the St. Louis Southwestern has issued its report for the year, showing the present condition and prospects of cotton, grain, fruit and vegetable crops along its lines. Among the points of principal interest are the following:—

Tomatoes, potatoes and peaches better than ever known in this section.

disc, cutaway or springtooth harrow—anything that will tear up the land—will be sufficient to start the cow peas. It may be broadcasted in the rough furrows and covered with a harrow or roller, or even "scratched in," such a rough fitting will not give the best results, but even with this unfavorable start the plant will quickly cover the ground, smother weeds and subdue the soil, besides adding greatly to its fertility. This plan is of special value for northern farmers in New England and other sections where parts of farms have passed out of cultivation. There are many instances where such waste land has been changed in a single season into good corn ground. The plan followed was simply to make an application of the mineral elements of plant food, potash and phosphoric acid, causing a heavy growth of peas, which absorbed much atmospheric nitrogen by it and the vegetable matter improved both the chemical and physical condition of the soil. If it fully to expect a heavy growth of peas, which would produce the best paying results with this or any other plant. The point is that no farmer should reject the plan because for any good reason he can not give it the best of care.

Texas will want more hogs than farmers will be able to supply next fall.

The Journal Institute

STOCK MELONS WITH CORN.—A pamphlet issued by the 101 Ranch, El Paso, Ok., has been widely distributed in this section. It is a valuable discovery, and plant these melons in all the fields where you plant the stalks. We have never lost an animal in pasturing corn stalks in fields where these melons were grown. These melons keep the bowels in a loose condition, and so ward off disease. No farmer can afford to pasture his stalks without having these melons in the field. If you grow them once you will always grow them. They are large and of a light green color, weighing from twenty to fifty pounds apiece, and are excellent for life, one vine often growing sixty feet long and bearing as many as a hundred melons.

THEY SHOULD BE PLANTED IN THE CORN FIELDS AT THE TIME THE CORN IS PLANTED, OR LATER—AT ANY TIME THAT PUMPKINS ARE PLANTED WILL DO—AND MAY BE LEFT IN THE FIELD UNTIL NEEDED FOR USE. Before frost they are so hard that it is necessary to cut them with an ax, but after they have been cut they are indispensible, as they expand the stomach and thus allow the hogs to eat as much towards the last day of fattening as at the beginning.

THEY ARE ALSO DELICIOUS FOR TABLE USE. When cooked they taste like fresh apples, and are excellent for sauce and pie.

THEY ARE ALSO DELICIOUS FOR TABLE USE. When cooked they taste like fresh apples, and are excellent for sauce and pie.

BACKACHE

Is only one of many distressing symptoms which point to the presence of a chronic disease. If women thoroughly understood the relation of the local womanly health to the general health, they would understand that backache, headache, nervousness, dizziness, faintness and similar feminine ailments, cannot be cured until the womanly health is established.

Dr. Pierce's Favorite Prescription cures diseases peculiar to women. It establishes regularity, dries the drains which weaken women, heals inflammation and ulceration, and cures female weakness. In curing these local diseases, it cures the ailments which they cause; backache, headache, dizziness, faintness, nervousness, and other ills peculiarly feminine.

One of the best equipped and most thorough schools in the South. Students entering almost every week in the year. No vacation. POSITIONS GUARANTEED. Scholarships unlimited. Railroad fare paid. For the address of 12 persons who might be induced to take a course, write your name on a card and send it to the following address: N. R. STURGEON, President, McKinney, Texas. See our new catalogue.

Metropolitan Business College

W. W. DARBY AND A. RAGLAND, PROPRIETORS, DALLAS, TEXAS.

We have a personal investigation of our school—it will convince you that the METROPOLITAN is absolutely the best equipped, the largest, the most progressive, the most reputable and the most successful college of Dallas, Texas. HORSE.

O. C. LANE, SANTA ANNA TEXAS. Breeder of registered French Coach horses and Polled Durham cattle.

JACKS.

JACKS AND JENNETS FOR SALE. G. W. GRIFPITS, Rosenthal, Tex.

From 50 to 100 bushels of Irish potatoes per acre is a good fair crop. Parties who are posted think the recent rains insure a fine yield in this locality. Under contract the growers are insured 50 cents per bushel, and the price may be higher. This guarantee, however, promises a return of at least \$40 to \$50 per acre. There is a large acreage planted in potatoes, so that in a few weeks now there will be a snug lot of money received by the farmer who has not heretofore been getting any considerable crop returns, except in the fall.—Rockdale Messenger.

One of the best places for the poultry to run is the orchard.

A DAY ON A PARLOR CAFE CAR FOR 50 CENTS.

You can ride a day on a Cotton Belt Parlor Cafe Car for only fifty cents extra; have your meals at any hour you want them, order anything you want, from a porthouse steak or lamb, to a chicken down to a sandwich, take as long as you please, and you will only pay 50 cents to pay for what you order.

COWS, YEARLINGS—The undersigned would like to correspond with stockmen who would buy cattle in from 10 to 300 head, bunches. **F. J. REYNOLDS, LaGrange, Texas.**

HOGS AND CATTLE MARKET REPORT. For particulars apply to it. **ED. F. SMITH, Fort Worth, Texas.**

MAVERICKS.

Ben C. Mays of San Angelo writes: "Some parts of this section are in good shape but in some other parts it is dry and stock are not doing well."

About 3000 cars of cattle will go from San Angelo to the Territory this season. Hays & Spaulding shipped 5000 head from that point last week and J. M. Shannon shipped 50 cars.

It is claimed that the shipments of cattle from Texas to Oklahoma and the Indian Territory over the Santa Fe are the heaviest ever known in the history of the road.

The Fort Worth and Denver City railway has engaged to carry 3000 cars of cattle from Texas to northwestern states during this month.

Carl Mueller, a German farmer of Runge, claims to have been very successful in using concentrated lye for dehorning calves. His method is as follows: When the calf is three days old a thick solution of concentrated lye is applied to the spot where the horn will grow. A spot the size of a dime is all that is necessary and one application is all that is needed. The only precaution to be taken is to protect the calves from rainy weather to prevent the solution from running and thus leaving an unsightly scar.

Andy Fisher has sold his ranch on Clear Fork in Fisher county and has moved to his home in Crockett county.

Austin dispatches state that parties have made application at the general land office to purchase two sections of land in Brewster county as "dry grazing," offering \$25 per acre for it, or \$16,000 for each section, and have deposited the first payment of \$400 on each section. The land commissioner cannot award the land pending a decision by the supreme court in the landmark case of the Colquitt-Tipton Mining company vs. Charles Rogan, land commissioner, to compel the latter to award certain Brewster county lands under the general mining act. A number of applications to purchase land under the mining act and under the actual settlers' provision are being held up until the court renders its decision on the question as to whether or not the commissioner shall be compelled to sell under the mining law land which contains minerals, but which has never been classified as mineral-bearing by the geological and mineralogical survey.

James B. Gray of Fort Worth has sold to W. Q. Richards 34,265 acres of land, known as the Moon ranch south pasture, in Crockett county. The consideration was \$325 per acre cash. The land is in a solid body and part of the purchase Mr. Gray made on the first of last May from William Garnett of England at \$1.75 per acre.

Prizes for Hereford Bees.—The American Hereford Breeders' association has decided to award \$500 in prizes to the owners of the best car lots of Hereford fat cattle and stockers exhibited at the American Royal Cattle

and Swine show at Kansas City next fall. This will be a new feature of the Kansas City show. The money will be distributed as follows: Best car of fat stock, \$75; best car feeders, 2 years old, \$50; best car feeders, 1 year old, \$35; best car calves, prospective feeders, \$15. Twenty head of fat stock make a carload and twenty-two head of feeders make a carload. All animals to be shown under the same management as the actual settlers' provision are being held up until the court renders its decision on the question as to whether or not the commissioner shall be compelled to sell under the mining law land which contains minerals, but which has never been classified as mineral-bearing by the geological and mineralogical survey.

The name given to the male Angora is usually "buck," and the female, "doe," and to the castrated animal, "wether," but to the former "billy," to the female the several names of "doe," "ewe" and "nanny" and the male is often designated by that of "male," "sire," "buck," "ram" or "billy." The young of either sex are termed "kids." The flesh of the Angora is called mutton or venison. The latter term is nearer its taste and flavor, as it nearly resembles deer meat.

Cream is Money in these days of Creameries, and if you can raise your calves as well without it, you are many dollars ahead on each calf. In another column you will see what the Security Stock Food Co. have to say about their "Calf" Food. It's worth looking up.

Each year, in these days of Creameries, and if you can raise your calves as well without it, you are many dollars ahead on each calf. In another column you will see what the Security Stock Food Co. have to say about their "Calf" Food. It's worth looking up.

Dr. Terrill's New Book, On Diseases of Men.

OFFICES: Dallas, Fort Worth, San Antonio, CHAS. A. ALLEN, SPECIAL AGENT, CHICAGO, ILLINOIS.

Entered at the postoffice at Dallas, Tex., as second class mail matter.

TO CORRESPONDENTS. All correspondence and other matter for the Journal should reach us not later than Monday morning to secure prompt publication.

TO SUBSCRIBERS. Subscribers desiring the address of their paper changed will please state in their communication both the old and new address.

DATES FOR PUBLIC SALES. May 7-8, 1902-Kansas City, Collin Cameron, Heford.

THE OLEO BILL. The game of ping-pong between the house and senate, with the oleomargarine bill as the ball, is over at last.

RAILWAY EXTENSION IN TEXAS. Not for many years has there been such a manifest interest in railroad building in Texas as is now evidenced by the plans for extensions now being made by the various railway companies.

SOUTHERN DEVELOPMENT. While a great deal of fuss is being made over the possibilities of the arid section of the West when it shall have been developed by irrigation at public expense the resources of the southern and southwestern states, where no outlay of money from the public treasury is needed, have been so little exploited that few people yet realize what these states have to offer to industrious immigrants.

ed up in the cotton producing states and their immediate neighbors. The building of the Nicaragua canal will stimulate all these industries.

The splendid resources of the South and the mild climate which makes living so much cheaper than in the North and West are attracting more and more attention.

The outlook for Texas sheep is particularly flattering. Values have lately been higher than in the banner year of 1900 and prices have, some 25 per cent above those of last spring.

From all sections of the country are coming reports stating that those who attended the Confederate reunion at Dallas carried home golden opinions of Texas and Dallas.

The demoralization in market prices occasioned by the beef trust investigation is causing heavy losses to Texas feeders.

Texas has lots of convicts and lots of bad roads. The right kind of a connection might prove beneficial all around.

Some people are hard to satisfy—That Washington street car conductor, for instance, didn't want to take money.

The Washington authorities insist that the northwestern cattlemen must get off the fence and take it with them.

There are still some dry spots in Texas where a little water cure would be welcomed.

The Texas women do not believe there is a beef trust.

And once more, raise hogs.

Now, let's get back to politics. Who is in favor of working short term convicts on the public roads, just as an experiment, if for nothing else?

Big Sandy welcomes the progressive immigrants, especially people from our own land, but to the ignorant and unprogressive class we will frankly advise you to stay away, as you are likely to feel very lonesome among industrious people.

It seems to be a question in many places whether the cowman shall buy the land or quit. This seems hard when he has been the pioneer in the wild West and the first to make the then forbidden waste productive and a source of revenue to the state.

When you are out in the Lampasas country if you want anything you don't see, just ask for it. The Lampasas Leader says:

neath the surface, and Mr. McCrea says it will burn readily, and with an odor of kerosene. He also says there is an abundance of zinc in his neighborhood, besides fine indications of oil, coal and other valuable minerals.

Land is becoming so high in value in this country that large ranches will eventually be a thing of the past, so the ranchman should give his attention to raising fewer and a better grade of cattle.

The cutting up of the big cattle ranches into small stock farms does not by any means indicate a decline in the cattle industry.

Any trust or combine which has for its object the monopolizing of the food supplies of the people, thereby increasing the price on the necessities of life, should not be tolerated by the American people.

For years we sighed for the day of high prices. When they would not come because of droughts, combinations, floods and other hindrances, it was seriously proposed to force up prices by flooding the country with cheap money.

Upon my arrival on the ground I knew for the first time the object of my coming. I used every effort to pacify the major and shame Lindsay, but without success.

The principals were placed back to back and instructed to advance five paces, then turn and fire one shot, the shots to be thus continued till the revolvers were emptied.

The major valiantly endeavored to retain the defense of his own honor. He had dominated his son for many years, but now their relative strength was reversed.

"Now, gentlemen, let us proceed with this affair. I represent my father, who, though he is as brave as ever, has not the eyesight for a marksman."

The major valiantly endeavored to retain the defense of his own honor. He had dominated his son for many years, but now their relative strength was reversed.

"Gentlemen," he said in no uncertain tones, "these pistols are not loaded with ball cartridges."

Greenville, Ala., seems to be doing a good business in raising bees for other parts of the country. The Montgomery Advertiser says that shipments of hives have been made to points in Dakota, and mentions a carload of these honey foundries recently shipped to West Virginia.

An experienced farmer in Oklahoma has a new method of planting corn, which he claims will often produce a crop when the wind has destroyed the crop as planted in the ordinary way.

A free gardening association has been organized at Atlanta, with Mayor Mims, president, and Chief of Police J. W. Ball, secretary, to institute in that city a system of vacant-lot farming by poor persons, which has been successfully carried out in Detroit, Philadelphia and other cities.

After chickens are one-third or one-half grown, coarse bird food may be mixed with grain to an advantage.

Building Up a Newspaper

Old Major Du Pont was a remarkably quiet man, very gentlemanly and polished in his manners. Born and bred in Louisiana, he was a typical creole.

There came to town one Edgar Lindsey, who settled himself to establish a newspaper called The Spy. His idea of getting up a circulation was in rooting up skeletons supposed to exist in people's closets or selecting some indefensible person for attack.

On the morning of publication of the first article a self constituted committee of civil war veterans called at The Spy office to protest. They found the editor fingering a note from the major demanding a published apology or satisfaction.

The trouble I had with farmers is that they want to run everything. The question is often asked: Is the farmer a good commercial risk? My answer is yes; he is the best, and cite as my proof the success, small losses and large surpluses in the small country banks, where the money is loaned almost entirely to farmers.

Between Goldsboro and Wilmington there are about 100 acres in strawberries. Other small fruits and vegetables are grown extensively, says the Raleigh News and Observer.

FOR SALE—150 well graded stock cattle, with or without 1000 acre lease; fine grass, everlasting water. For particulars address M. DOBINS, Eulogy, Tex.

FOR SALE—200 yearlings, 150 two-year-old and 150 three-year-old steers, all one year raising; high grade Hereford; no oil cows; also 100 head of calves. J. N. RAYNER, Rayner, Stonehill, Ok. Tex.

FOR SALE—Land and cattle, above quarter in lot to suit prices. H. O. PERKINS, Big Springs, Tex.

FOR SALE—200 yearlings, 150 two-year-old and 150 three-year-old steers, all one year raising; high grade Hereford; no oil cows; also 100 head of calves. J. N. RAYNER, Rayner, Stonehill, Ok. Tex.

FOR SALE—Land and cattle, above quarter in lot to suit prices. H. O. PERKINS, Big Springs, Tex.

FOR SALE—Land and cattle, above quarter in lot to suit prices. H. O. PERKINS, Big Springs, Tex.

FOR SALE—200 yearlings, 150 two-year-old and 150 three-year-old steers, all one year raising; high grade Hereford; no oil cows; also 100 head of calves. J. N. RAYNER, Rayner, Stonehill, Ok. Tex.

HOW FARMING PAYS. In an address before the Vanvliet Farmers' club of Maryland, W. S. Powell read a paper in which he took issue with persons who claim that farming does not pay.

From a cash or ready-money standpoint there may be some ground for this contention, but in my estimate it is not correct. I believe that, considering the great number of people engaged in agriculture, the percentage of successful men is fully as large in our calling as in any other profession or trade.

FOR SALE—100 acre farm, five miles west of Wharton, good black land; will make fine rice or sugar farm; 33 acres in cultivation, balance pasture, all fenced, a barn, good buildings, plenty of water. A bargain—If taken at once, apply to H. GLENN, Lullita, Tex.

FOR SALE—Nine hundred acres of fine black land in Kaufman county, five hundred acres of which is in cultivation. A beautiful tract through the heart of the county, with a well, a fine school, a fine water, there are nine houses on the place, with a well at each house. It is three miles from the Texas Midland and the same from the Texas and New Orleans railroads.

FOR SALE—Four improved sections of land in Crosby county, Texas; all agricultural. For price and further particulars apply to W. S. BOYD, Atgney, Emma, Tex.

A FARM that contains 200 acres of fine black land as can be found in North Texas is listed with us for sale. It is located within half a mile of a good school and church, ten miles from a city, and has a garden, not a stalk of Johnson grass; dwelling has nine rooms, a bath, a garage, a room cottage, two good barns and granary, cement cellar, smoke house and chicken house. It is a beautiful place. Call on the owner, J. L. STEPHENSON & CO., successors to MORRIS BROS. & CO., 1600 Main St., Fort Worth, Tex.

FOR SALE—Four improved sections of land in Crosby county, Texas; all agricultural. For price and further particulars apply to W. S. BOYD, Atgney, Emma, Tex.

FOR SALE—200 yearlings, 150 two-year-old and 150 three-year-old steers, all one year raising; high grade Hereford; no oil cows; also 100 head of calves. J. N. RAYNER, Rayner, Stonehill, Ok. Tex.

THE HORSE SHOW.

GREAT EVENT IN DALLAS WHICH ATTRACTS THROUGHS OF VISITORS—LIST OF AWARDS.

The Elks club horse show, the first event of the kind ever held in Dallas, was a very pronounced success. There were some remarkably fine specimens of equine flesh in the contests, many of them from St. Louis, Kansas City, Denver and other cities where they have carried on a robust gallop in previous shows. As a society event the horse show was fully up to expectations. The ladies appeared in great numbers wearing stunning costumes to which none but the initiated society reporter could do justice, and they were just as enthusiastic over the high-stepping horses as were any of their male escorts.

The awards in the various classes were:

Class No. 1—Harness horses: To be shown before suitable vehicles. Harness horses must be practically sound, and will be judged by their adaptability to the purposes and vehicles specified in the several classes. In the park classes, horses having conformation, quality, style, all-round action, and ability to go a good pace will be especially considered. In the classes for horses suitable for town work, conformation, substance, carriage, and whether moving or standing, will be especially considered.

Class 2—High school horses: Conformation, beauty and style to count 40 per cent; performance in high school to count 60 per cent. First prize \$50, second prize \$30, third prize \$20.

Class 3—Ladies' (Kansas City) chestnut gelding, 15.1, 5 years, first; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, second; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, third. Four entries.

Class 4—Ladies' (Kansas City) chestnut gelding, 15.1, 5 years, first; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, second; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, third. Four entries.

Class 5—Ladies' (Kansas City) chestnut gelding, 15.1, 5 years, first; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, second; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, third. Four entries.

Class 6—Ladies' (Kansas City) chestnut gelding, 15.1, 5 years, first; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, second; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, third. Four entries.

Class 7—Ladies' (Kansas City) chestnut gelding, 15.1, 5 years, first; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, second; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, third. Four entries.

Class 8—Ladies' (Kansas City) chestnut gelding, 15.1, 5 years, first; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, second; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, third. Four entries.

Class 9—Ladies' (Kansas City) chestnut gelding, 15.1, 5 years, first; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, second; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, third. Four entries.

Class 10—Ladies' (Kansas City) chestnut gelding, 15.1, 5 years, first; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, second; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, third. Four entries.

Class 11—Ladies' (Kansas City) chestnut gelding, 15.1, 5 years, first; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, second; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, third. Four entries.

Class 12—Ladies' (Kansas City) chestnut gelding, 15.1, 5 years, first; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, second; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, third. Four entries.

Class 13—Ladies' (Kansas City) chestnut gelding, 15.1, 5 years, first; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, second; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, third. Four entries.

Class 14—Ladies' (Kansas City) chestnut gelding, 15.1, 5 years, first; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, second; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, third. Four entries.

Class 15—Ladies' (Kansas City) chestnut gelding, 15.1, 5 years, first; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, second; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, third. Four entries.

Class 16—Ladies' (Kansas City) chestnut gelding, 15.1, 5 years, first; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, second; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, third. Four entries.

Class 17—Ladies' (Kansas City) chestnut gelding, 15.1, 5 years, first; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, second; A. E. Ashbrook's (Kansas City) chestnut gelding, 15.1, 5 years, third. Four entries.

ing in the ring, will be considered in judging. No distinction will be made between open and top wagons. In four-in-hand, tandem and high school classes the money will be divided 60 and 40 per cent in case there are but two exhibitors. Stallions, in harness, to pneumatic cart. First prize \$30, second prize \$20, third prize \$10.

Henry Exall's Silver Electric, bay horse, 16.0, 3 years, first prize; W. O. Fook's (Dallas) Standard, brown horse, 16.0, 4 years, second. Two entries.

Class 9—Jumping class: Open to all. Performances over fences to count 50 per cent. Individuality and soundness, 50 per cent; two at 4, and two at 1 1/2 feet. First prize \$50, second prize \$30, third prize \$20.

Class 10—Pairs of roadsters: A roadster, when mature for driving, should not be under 3 years old. Conformation, style of going, manners, hook and knee action, whether driven with ordinary or heavy traces to force action, also whether strained with checking or severe bits, and as they are and appear at the time of showing in the ring, will be considered in judging. No distinction will be made between open and top wagons. In four-in-hand, tandem and high school classes the money will be divided 60 and 40 per cent, in case there are but two exhibitors. Pair of horses 8 years old and over. First prize \$50, second prize \$30, third prize \$20.

Class 11—Gaited saddle horses: All animals must show five distinct gaits; that is, first, walk; second, trot; third, rack; fourth, canter; fifth, running walk, fox-trot or slow pace. Conformation to count forty. Horse, mare or gelding eligible to all classes, either long-tailed or docked. First prize \$50, second prize \$30, third prize \$20.

Class 12—Gaited saddle horses: All animals must show five distinct gaits; that is, first, walk; second, trot; third, rack; fourth, canter; fifth, running walk, fox-trot or slow pace. Conformation to count forty. Horse, mare or gelding eligible to all classes, either long-tailed or docked. First prize \$50, second prize \$30, third prize \$20.

Class 13—Gaited saddle horses: All animals must show five distinct gaits; that is, first, walk; second, trot; third, rack; fourth, canter; fifth, running walk, fox-trot or slow pace. Conformation to count forty. Horse, mare or gelding eligible to all classes, either long-tailed or docked. First prize \$50, second prize \$30, third prize \$20.

Class 14—Gaited saddle horses: All animals must show five distinct gaits; that is, first, walk; second, trot; third, rack; fourth, canter; fifth, running walk, fox-trot or slow pace. Conformation to count forty. Horse, mare or gelding eligible to all classes, either long-tailed or docked. First prize \$50, second prize \$30, third prize \$20.

Class 15—Gaited saddle horses: All animals must show five distinct gaits; that is, first, walk; second, trot; third, rack; fourth, canter; fifth, running walk, fox-trot or slow pace. Conformation to count forty. Horse, mare or gelding eligible to all classes, either long-tailed or docked. First prize \$50, second prize \$30, third prize \$20.

Class 16—Gaited saddle horses: All animals must show five distinct gaits; that is, first, walk; second, trot; third, rack; fourth, canter; fifth, running walk, fox-trot or slow pace. Conformation to count forty. Horse, mare or gelding eligible to all classes, either long-tailed or docked. First prize \$50, second prize \$30, third prize \$20.

Class 17—Gaited saddle horses: All animals must show five distinct gaits; that is, first, walk; second, trot; third, rack; fourth, canter; fifth, running walk, fox-trot or slow pace. Conformation to count forty. Horse, mare or gelding eligible to all classes, either long-tailed or docked. First prize \$50, second prize \$30, third prize \$20.

Class 18—Gaited saddle horses: All animals must show five distinct gaits; that is, first, walk; second, trot; third, rack; fourth, canter; fifth, running walk, fox-trot or slow pace. Conformation to count forty. Horse, mare or gelding eligible to all classes, either long-tailed or docked. First prize \$50, second prize \$30, third prize \$20.

Class 19—Gaited saddle horses: All animals must show five distinct gaits; that is, first, walk; second, trot; third, rack; fourth, canter; fifth, running walk, fox-trot or slow pace. Conformation to count forty. Horse, mare or gelding eligible to all classes, either long-tailed or docked. First prize \$50, second prize \$30, third prize \$20.

Class 20—Gaited saddle horses: All animals must show five distinct gaits; that is, first, walk; second, trot; third, rack; fourth, canter; fifth, running walk, fox-trot or slow pace. Conformation to count forty. Horse, mare or gelding eligible to all classes, either long-tailed or docked. First prize \$50, second prize \$30, third prize \$20.

Class 21—Gaited saddle horses: All animals must show five distinct gaits; that is, first, walk; second, trot; third, rack; fourth, canter; fifth, running walk, fox-trot or slow pace. Conformation to count forty. Horse, mare or gelding eligible to all classes, either long-tailed or docked. First prize \$50, second prize \$30, third prize \$20.

Class 22—Gaited saddle horses: All animals must show five distinct gaits; that is, first, walk; second, trot; third, rack; fourth, canter; fifth, running walk, fox-trot or slow pace. Conformation to count forty. Horse, mare or gelding eligible to all classes, either long-tailed or docked. First prize \$50, second prize \$30, third prize \$20.

Class 23—Gaited saddle horses: All animals must show five distinct gaits; that is, first, walk; second, trot; third, rack; fourth, canter; fifth, running walk, fox-trot or slow pace. Conformation to count forty. Horse, mare or gelding eligible to all classes, either long-tailed or docked. First prize \$50, second prize \$30, third prize \$20.

Class 24—Gaited saddle horses: All animals must show five distinct gaits; that is, first, walk; second, trot; third, rack; fourth, canter; fifth, running walk, fox-trot or slow pace. Conformation to count forty. Horse, mare or gelding eligible to all classes, either long-tailed or docked. First prize \$50, second prize \$30, third prize \$20.

THE CELEBRATED WILLARD STEEL RANGE \$25.00

W. M. G. WILLARD, Dept. 10, 619-21 N. 4th St., St. Louis, Mo.

E. G. SENTER, ...LAWYER...

341 Main Street, DALLAS.

Demoralized by Investigation.—Capt. J. L. Pennington of Fort Worth, livestock agent for the Estaco road, said Thursday afternoon: "I have received several notices to-day by wire from Kansas City and St. Louis asking me to notify all cattle shippers that owing to the investigation now in progress on the so-called beef trust that the market for foreign meat is being held and strictly of cattle, the high price and scarcity of feed."

"About two years ago cottonseed was worth \$5 to \$6 per ton, hulls from \$12 to \$13, hay from \$4 to \$6, corn from 20c to 30c per bushel, and at these prices the cattle for the year 1900 were fed and fattened. The cattle for the seasons of 1901 and 1902 were fed and fattened upon corn at \$5 to 7c, cottonseed meal from \$22 to \$30 per ton, hulls from \$8 to \$11, hay from \$15 to \$20 and cottonseed from \$15 to \$20 per ton. These were the 'conditions' of Texas. The stock growing states of the North, such as Iowa, Illinois and Missouri, had practically no feed and comparatively few fat cattle to throw upon the markets. Under these conditions why should not meat be high? This is a question that comes strictly to the point of supply and demand. And is it fair or just to accuse the

ENCOURAGING SILK CULTURE. Mr. Gerald McCarthy of the North Carolina department of agriculture...

It is also likely that the North Carolina Agricultural Society will offer...

POULTRY. A dark comb is an indication of a congested state of the system. Land that dries quickly after a rain is well adapted to poultry raising.

The plumage of old fowls tends to shade lighter with increasing years. About one foot of space on the roost should be allowed for each adult fowl.

A handsome appearance is worth one or two cents a pound on poultry in selling. Fowls may eat too much grain or meat for their health...

By a judicious system of winter feeding you can materially increase the comfort of the fowls. Chickens hatched from eggs laid by a hen that has been laying all winter will often lack vitality.

Whole wheat and like foods give starch and feather-making properties and less oil to the blood. Ground or crushed bone is so valuable for their health...

Cleanliness, care and common sense are absolutely necessary at every point of management with poultry. The morning meal may be made more palatable and stimulating by adding cut onions with salt and pepper.

When one does not care to raise chickens it is better on the score of economy to keep the layers without coops. Carelessness in the little details necessary to good management will soon show in the condition of the fowls.

A clear pig is one that has not been fertilized and remains much the same to the end of the period of incubation. See that the hens are well developed and not too fat.

When the hens are too fat, reduce them in flesh by giving them shorter rations and give more bulky and less fattening food. For cholera add a teaspoonful of liquid carbolic acid to a pint and a half of water.

Clean, pleasant and suitable quarters, with wholesome, nutritious food have HADBY'S WHITE WYANDOTTES WERE away in the lead at largest Texas show. Eggs \$2.00. T. E. HUBBY, Waco, Tex.

BERMUDA FARM - BARRED AND WHITE PLYMOUTH ROCK EGGS. \$1.00 per 15. W. P. ROCKS, \$1.50 for 15. Mrs. L. E. FOWLER, Gordonville, Tex.

BLIND STAGGERS IN PIGS. - Blind staggers, or, in medical parlance, epilepsy, in pigs, is quite common.

FATTENING HOGS. - Prof. A. M. Soule, of the university of Tennessee, says in regard to methods of fattening: It is impossible to say which breed of hogs is easiest fattened...

SPRING AND FALL LITTERS. - F. M. Church, of Iowa, writes: In raising pigs I would begin by selecting a gilt from the litter of a sow that I know to be a good brood sow...

AGED BEEF CATTLE DECREASING. According to figures issued by the census of 1890, the average age of all beef cattle in the country was 2.13 years.

AGED BEEF CATTLE DECREASING. According to figures issued by the census of 1890, the average age of all beef cattle in the country was 2.13 years.

AGED BEEF CATTLE DECREASING. According to figures issued by the census of 1890, the average age of all beef cattle in the country was 2.13 years.

AGED BEEF CATTLE DECREASING. According to figures issued by the census of 1890, the average age of all beef cattle in the country was 2.13 years.

AGED BEEF CATTLE DECREASING. According to figures issued by the census of 1890, the average age of all beef cattle in the country was 2.13 years.

AGED BEEF CATTLE DECREASING. According to figures issued by the census of 1890, the average age of all beef cattle in the country was 2.13 years.

much to do in determining the flavor and quality of both the eggs and the flesh of fowls. A healthy fowl does not need condition powders, egg food, or varied preparations, but wholesome and varied food.

A good way to tell a fresh egg is by the air bubble in the large end. The smaller the air bubble, the fresher the egg. A fresh egg must be examined closely to see the air bubble.

TO GET RID OF MITES. - H. C. Young of Jonesboro, Texas, says: Are any of you troubled with mites? If so, here's my plan for exterminating them: First clean out the poultry house of all droppings, nest material, etc.

SUCCESS WITH INCUBATORS. - V. M. Couch writes: Where more than one hundred chickens are to be raised, I believe it will pay well to buy an incubator, as I am of the opinion that if properly managed, better hatches may be attained with nearly all of the incubators now on the market than with hens.

With my first experience in the use of an incubator, I found at the end of the hatches, a good many chicks dead in the shell. They were apparently fully mured and many had popped the shell, and at the same time, a lack of moisture to be the cause, but I have since become convinced that I was wrong, and that in my case it was too much moisture rather than too little.

DAIRYMAN'S OPPORTUNITY. - The opportunity for the private dairyman who makes a trade and secure remunerative prices for every pound of butter he makes is better than ever before, says the Iowa Homestead.

MARKETS

DALLAS.
(Reported by National Live Stock Commission Co.)

Cattle receipts were more liberal last week than the week previous and quality only fair. Our market only marginally in sympathy with the northern decline of 25 to 50 cents per hundredweight last week caused by the "beef trust agitation." In spite of the short receipts on the northern markets prices here taking a sharp decline. We anticipate a strong steady market throughout this week, but would advise shippers not to ship anything except their best stuff. We believe we will have no trouble in disposing of the best grades of killing cattle readily at satisfactory prices.
While there was only a fair run of hogs in last week's offerings there were enough for the packers to try to force shippers to take lower prices for their hogs than they were worth causing trade to be slow and weak. The outlook for a strong active market this week is good, and choice 200-pound hogs and up will sell at \$5.50@6.75.
Receipts of sheep were light and quality generally common. The fat sheep on sale were disposed of readily at satisfactory prices, while prices ruled slow on the half-fat stock. There is a good demand for fat mutton and if you have anything ready for market now is a good time to ship. Northern hog market closed steady, cattle 10 and 20 cents higher, and sheep lower.

CHICAGO.
Chicago, Ill., May 5.—Cattle—Receipts 4500, including 300 Texans. Market 10¢ lower, native shipping and export steers \$5.00@6.75, dressed beef and butcher steers \$3.00@6.75, steers under 1000 pounds \$3.65@6.15, stockers and feeders \$2.75@4.75, cows and heifers \$2.25@6.00, canners \$1.50@2.90, culls \$3.40@5.25, calves \$5.00@6.00, Texas and Indian fed, \$4.35@6.00, grassers \$3.30@4.30, cows and heifers \$2.50@4.20.
Hogs—Receipts 4100. Market active; pigs \$5.50@6.75, packers \$6.80@7.10, butchers \$6.90@7.32.
Sheep—Receipts 3700. Market steady; native muttons \$4.00@6.00, lambs \$5.60@7.50, culls and bucks \$3.50@5.00. Texas sheep \$3.45@5.65.

ST. LOUIS.
St. Louis, Mo., May 5.—Cattle—Receipts 4500, including 300 Texans. Market 10¢ lower, native shipping and export steers \$5.00@6.75, dressed beef and butcher steers \$3.00@6.75, steers under 1000 pounds \$3.65@6.15, stockers and feeders \$2.75@4.75, cows and heifers \$2.25@6.00, canners \$1.50@2.90, culls \$3.40@5.25, calves \$5.00@6.00, Texas and Indian fed, \$4.35@6.00, grassers \$3.30@4.30, cows and heifers \$2.50@4.20.
Hogs—Receipts 4100. Market active; pigs \$5.50@6.75, packers \$6.80@7.10, butchers \$6.90@7.32.
Sheep—Receipts 3700. Market steady; native muttons \$4.00@6.00, lambs \$5.60@7.50, culls and bucks \$3.50@5.00. Texas sheep \$3.45@5.65.

KANSAS CITY.
Kansas City, Mo., May 5.—Cattle—Receipts 2000 natives, 500 Texans and 70 calves. Market 10¢@20¢ higher, choice export and dressed beef steers \$6.75@7.30, fair to good \$5.00@6.70, stockers and feeders \$3.65@6.15, Western fed steers \$4.40@6.15, Texas steers \$4.35@6.00, Texas cows \$2.55@5.00, native cows \$2.90@5.50, native heifers \$3.10@6.50, canners \$2.00@2.80, bulls \$2.30@5.50, calves \$3.50@5.75.
Hogs—Receipts 6000. Market steady to strong; heavy \$7.20@7.35, mixed packers \$7.05@7.30, light \$6.75@7.15, yearlings \$7.00@7.15, pigs \$5.00@6.70.
Sheep—Receipts 3000. Market steady; native lambs 10¢ lower, native muttons \$5.00@7.20, Western muttons \$5.75@7.15, native wethers \$5.55@6.15, Western wethers \$4.80@6.30, fed ewes \$5.05@6.70, Texas clipped yearlings \$6.00@6.20, Texas clipped sheep \$4.75@6.70, stockers and feeders \$3.10@5.00.

Eggs—Fresh 12¢.
Butter—Per lb., creamery 30¢; country butter 15¢.

WOOL AND HIDE MARKET.
Dallas, May 5.—
Dry flint beef hides, 16-lbs. up, 13¢; dry flint fallen hides, 16-lbs. up, 12¢; dry flint light hides, 10¢; dry salt hides, 10¢; green salt, 40-lbs. up, 6¢; green salt, under 40-lbs., 5¢@6¢; dead green hides, 40-lbs. up, 6¢; dead green hides, under 40-lbs., 5¢.
Summer Hog Supply.—The Cincinnati Price Current, which has gained a very enviable reputation for the reliability of its estimates, says: "Since the hog slaughtering industry has become continuous in its operations throughout the year there has naturally prevailed much interest in the indications for the summer season supplies of hogs, to follow the lessened marketings usual just subsequent to the winter months. While the trade shows that there are no means available for reliably foretelling hog supplies, it is nevertheless interesting and serviceable to secure what information can be had from good sources.
A year ago the Price Current, in submitting the result of extended inquiry in regard to prospective marketings of hogs, said: 'The result points to a summer season supply about the same as last year, probably falling a little behind for the period ending with June, and correspondingly increased later.' The packing records indicate a decrease in March, the small decrease in April, while May witnessed a larger movement than ever before recorded for that month, and June somewhat exceeded the corresponding month in the preceding year, the four months ending with June showing a net decrease of 34 per cent in the comparison. There was a continuance of large numbers during July and August, but September and October were somewhat short compared with the preceding year. For the eight months ending with the close of hogs slaughtered in the West, which was not strikingly at variance with the early calculations. There was a decrease in the eastern slaughtering, but that the aggregate for the eight summer months was less than 3 per cent in excess of the number in the preceding year. This result was a confirmation of the approximate accuracy of the forecast made at the season's opening, an exceptional freedom from losses by ailments among swine had its influence in enlarging the numbers marketed.
The summer season of last year has been followed by a larger marketing during the winter months, and it was expected by the trade—a result which has been promoted by the continued good prices of hogs and scarcity and high cost of feed material in inducing the movement more or less in advance of the ordinary season of animals marketed. This was reflected in the large decline in the average weight of hogs slaughtered during the past winter.
Coming now to the evidences available as to prospective supplies of hogs for marketing during the period ending Nov. 1 next, we find by inquiry among prominent receivers of livestock and packers at Chicago that the average of opinion indicates a decrease, compared with last year of 10 per cent. Various good authorities estimate that there will be no decrease in the supply for that market. At Kansas City the prevailing opinion is that there will be a decrease of about 30 per cent. The Omaha market shows a decrease of 15 per cent, while some of the trade there regard it likely that the decrease will be considerably less than this. At St. Louis a decided shortage is looked for, amounting to about 15 per cent. At St. Joseph there is considerable difference of opinion, the prevailing indication being about 15 per cent decrease. At Sioux City the expected decrease does not appear to exceed 5 per cent. At St. Paul an increase of 10 to 15 per cent is looked for. At Milwaukee the decrease is expected to reach 15 to 20 per cent. At Indianapolis 10 to 15 per cent decrease is looked for. All the prominent interior markets a decrease is anticipated, ranging from 5 to 20 per cent, and apparently averaging about 20 per cent. These returns, with many others from supply points, appear to point to a general average decrease of about 15 per cent in the comparison with last year, for the market supply of hogs for the period from March 1 to Nov. 1. There is also a prevailing expectation that the average weight of hogs will be reduced in the comparison. The deficiency in numbers is expected to be greater for the last half than for the first half of the eight months of the summer season.

Rockport is to soon embark in grape culture and wine manufacturing on a large scale. Samples of wine made here have been pronounced to be far superior to the California article, and conditions are such that the business can be made a paying one right from the start.—Rockport Enterprise.

RENOVATED BUTTER.

MANUFACTURE OF THE PRODUCT WHICH IS LEADING THE FIGHT AGAINST OLEOMARGARINE.

The "light-colored oleomargarine bill" has attracted much attention to the rank, rancid re-worked stuff called process or renovated butter, the manufacturers of which are so anxious to knock out the competition of a more wholesome butter substitute. There has been more or less discussion over what renovated butter is—even the dairymen are compelled to admit that it contains impurities while the chemists unanimously state that it is much less wholesome than oleomargarine and there are greater chances for adulteration in its manufacture.
Hon. Geo. M. Whitaker of Boston, the Massachusetts dairy commissioner, recently appeared before the Massachusetts legislature and made the following argument in favor of the regulation of "renovated" butter:
"This hearing has one unpleasant feature. I see friends on each side of the question, persons who on previous occasions have stood shoulder to shoulder for honest dairy products, persons whose united support the dairy bureau should have, persons whose interests in many respects are common.
1. What is renovated butter?
On this subject there is substantial agreement. It is a real milk product, prepared from butter oil and milk. It is clean, wholesome and in most cases free from adulteration.
The idea of renovating butter is an advance step. In the dairy bureau report of 1889 I said: 'It is in the abstract a gain to humanity, as in any process that economizes wastes, utilizes by-products, and perfects and increases the world's food supply.' In the report of the next year the process was alluded to as 'clean and wholesome.' In the report of 1901 I wrote: 'Renovation is always commendable, whether in the case of human beings. Improvement in process of stock. The question of the nature of the raw material used comes the first apparent difference between the two sides in this case. The butter oil is obtained by melting the butter which is usually such as is unmerchantable because of lack of flavor or bad flavor. On this point all are agreed. But there is some disagreement as to the degree of badness. Major Alvord, chief of the United States bureau of animal industry, is made from butter which has become unmerchantable, or what we would call bad butter, running through all the degrees of badness."
Other authorities are more emphatic in their use of such expressions as rotten, stinking and inferior. In the western part of the state writes us: 'Mr. of this town advertises continuously 'Elgin creamery butter, 25 cents per pound.' This business ought to be stopped, for this figure is less than our wholesale price. We could multiply such statements almost indefinitely, but they would be merely cumulative."

We are in receipt of the preliminary premium list of the three National Hereford shows to be held this fall, and Secretary Thomas informs us that prospective exhibitors should write him at once for same. The classification does not differ materially from that of last year except that there is an additional class for yearling bulls, so that this year there is a class for senior yearling bulls and another for junior yearlings. At the American Royal at Kansas City the Stock Yards company is giving \$500 in prizes for car lots of Herefords, \$200 of which is for fat stock and \$300 for feeding out. This is in addition to last year's premium list. For the International at Chicago the Hereford Association offers \$900 in prizes for carload lots of fat Herefords. This amount is in addition to the premium offered by the International management and should bring out an exceptionally large exhibition of "white-faces" in the pen. Write C. R. Thomas, Secy., 225 West 12th street, Kansas City, Mo., for a premium list, which will give full particulars.
Up to this point there is, therefore, full agreement between the contending parties. Renovated butter is a real milk product, clean, wholesome and pure (though with no particular emphasis on the word pure). It is made from low grades of butter and has become a staple article of merchandise. The process is in the line of progress and gives the market a better second grade butter than could be secured a few years ago.
On one phase of the subject the friends of renovated butter are silent, though they will not dispute the fact. Renovated butter is an unnatural butter. The process of renovation breaks up in a measure the complex nature of the butter, and creates an unnatural oil. In addition to this the way in which the milk is mixed with the oil creates so emphatic an emulsion that the little flocks of casein are locked up in the oil in an unnatural manner. Consequently renovated butter when melted has a muddy appearance, unlike the clear oil of natural butter. Renovated butter does not melt and boil like natural butter, does not look like it when under the microscope, and can not be substituted for natural butter in some kinds of fine cooking. Renovated butter is most emphatically an unnatural butter.
2. As to the name.
"Sterilized" is commonly used in the trade, but renovated butter is not the sterilized butter of butter makers or dairy experts, and in fact is not sterilized. "Process" is misleading, as all butter is the result of some process. "Refined" is correct in a sense, but liable to be misleading. No word has yet been suggested which so accurately describes the article as "renovated." That is just what it is—renovated, put in condition, restored. Purified is also one of the definitions of renovated.
Major Alvord says:
"It is just what the name 'renovated' implies."
In a recent dairy bureau report this was said:
"A New York butter dealer says: 'Renovated butter is sound hard, and it would have a killing effect on the trade in this state. But this is just what it is, and I see no reason why it should not be branded that way.'"
The question of law.
We now understand what renovated butter is—a pure, wholesome, clean, but unnatural butter. It is a butter which has been restored, renewed, put

in good condition. It is therefore a legitimate article of merchandise, if sold honestly. And unless it is sold dishonestly to a considerable extent those who suffer from the competition have no right to grumble. Every kind of business has to encounter competition, and if that competition is honest, the legislature has no right to interfere.
But there is a widespread impression that renovated butter is not sold honestly. This impression led to the laws in Pennsylvania and New York which antedated the Massachusetts law. The impression led to the recent action of the national house of representatives. The head of the national dairy department says:
"The chief objection to this renovated butter is that it is sold in large quantities under misrepresentation in place of fresh creamery butter, and at prices much above its actual value. Fraud upon purchasers and consumers is thus perpetrated and this is the feature connected with the business which needs governmental interference and regulation."
My own opinion and the reasons therefor are found in the Massachusetts dairy bureau report of this year. "But experience and observation covering the retail markets of the whole state, including those selling from both stores and wagons, convince us that in many instances the consumer does not know what he is buying, and the article is sold dishonestly. When any inferior article is thus sold dishonestly as something better than it is, becomes a damage to legitimate business. We believe that renovated butter, as it is ordinarily sold, is a menace to the business in natural butter."
"Here are some facts which we can substantiate. When the best creamery butter was quoted in assorted size tubs, in a strictly wholesale way, at 22 to 23 cents per pound, a large Boston retailer advertised in a showy manner in the Sunday papers that he owned creameries in the finest dairy sections of the country, and could therefore sell direct to the consumer an article of 'super quality,' at a very low price. This dealer, having made this boast, thereupon offered 'Locust Valley Elgin Creamery Butter' at 22 cents per pound in five pound boxes and at 20 cents per pound in tubs. A bureau inspector purchased one of the five-pound boxes at 22 cents per pound—less than the extreme wholesale price of butter in tubs in round lots—and the stuff proved on analysis to be renovated butter. Such things seem to us to be more of an injury to business than the single transaction between the seller and the individual buyer, for the quoting of such a price in such a misleading way tends to unsettle values, to impair confidence and to injure producer and middleman. At the same time it tended to above another large retailer was advertising fine Vermont dairy butter at 22 cents per pound; our inspector bought some, and it proved to be renovated butter which probably never saw Vermont. In a suburban town a dealer sold his 'best creamery' butter at 28 cents per pound to one of our inspectors, and this, too, proved to be renovated butter. A wholesale manager in the western part of the state writes us: 'Mr. of this town advertises continuously 'Elgin creamery butter, 25 cents per pound.' This business ought to be stopped, for this figure is less than our wholesale price. We could multiply such statements almost indefinitely, but they would be merely cumulative."

"THE LONG TRAIL"
OF THE CATTLE RANGE
has given prominence in history to the now world famous Texas Panhandle. But a few years ago the wonderful possibilities of this region as a wheat country became known, and great things were prophesied for "The Granary of the South," which subsequent harvests justified. Comparatively recent is the demand of good livens for "Vernon Cantaloupes," but it's come to stay. Those acquainted with this section and its wealth as a producer of feed-stuffs, corn and cotton have long believed in it, nor have they been moving away. When Northwestern Texas remained hospitable for its excellence in the face of almost universally discouraging crop conditions, people began to see reasons for the faith of those inviting them to enter and possess the land; and now, with farms and ranches being bought daily by new settlers coming in by wagon and rail, three new railroads now building and four more projected, seeking a share of the general prosperity, good reason is evident for the favor with which the territory along "THE DENVER ROAD" is regarded by prospectors.

\$500 REWARD

Will be paid for any case of syphilis, elephantiasis, loss of manhood, nervous debility, seminal losses, weak, shrunken or undeveloped organs which I fail to cure. This offer is backed by \$25,000 worth of real estate owned by me in Houston, Texas. Consultation and advice free and confidential. Send for symptom blank. Address: DR. F. A. HOLLAND, 1019 Congress St., Houston, Tex.

THE TWIN TERRITORIES

According to advices from Guthrie, the cotton acreage of Oklahoma will be twice as large as every before in that territory. This is occasioned by the fact that cotton is always a sure and profitable crop and easily market.

ed. Kaffir corn will also be grown this year in abundance, and alfalfa and cow peas.

An appeal has been taken to the general land commission of the United States by the territory of Oklahoma, to decide a case wherein the land laws of the government and territory—containing lands that were reserved by the government for the territory and afterward leased to parties by the territory have been filed upon by homesteaders, and the filings have been allowed by the government officials.

V. M. Teedford, secretary and treasurer of the Oklahoma Racing association, has sent out circulars stating that the circuit will be as follows: Opening at Newkirk, Sept. 1 to 6, inclusive; Oklahoma City, Sept. 8 to 13, inclusive; Shawnee, Sept. 15 to 20, inclusive. There are only three towns in the circuit, but they offer \$25,000 in purses with the proper guarantee. Ten of the purses will be for \$600 each and the entries will close July 15.

WANT NEW TOWN—A large number of prospective buyers at the new townsite of Okemah, I. T., lately united in a demand upon the townsite management to the effect that the purchasers be permitted to pay 21 per cent of the purchase price for the property and deposit the balance in any bank the company might suggest, to be subject to its order on and after one of the proposed railroads was built into the town and the depot located where it was proposed. The townsite company, it is alleged, refused to accede to this demand. The buyers then withdrew and formed a new townsite company, offered as follows: A. B. Dunlap, Holdenville, treasurer; S. B. Allen, Bristow, secretary; George McLagan and F. F. Lamb, Okmulgee; H. C. Way, Holdenville; S. E. Allen, Bristow; H. H. Holman, Wetumka; O. W. Meacham, Henryetta; Dr. Shives, Shawnee; Mr. Jennings, Wewoka, and Mr. Brinker of Beggs, trustees. An allotment was secured near the site of Okemah from W. T. Berry on condition that the allottee retain as his share one-fourth of the lots for his own use, and that blocks for school, church and general municipal purposes be reserved. The buyers were each to have a business and residence lot, to be determined by drawing. An assessment of \$2.50 was levied, and this entitled the party to registration. About 325 registered and became members of the new town company. The town was named McDermott. The land will be platted at once and the drawing will take place at a future date. Steps have been taken to move the postoffice from the old town to McDermott.

Thoroughly wetting the hair once or twice with a solution of salt and water will keep it from falling out.

Orange is to have a big paper mill. This is a good year to begin raising hogs.

Fannin county farmers are making \$15 per ton on alfalfa.

A canning factory has been completed at Blissom.

Mildew may be removed from white garments by soaking in buttermilk and salt, and then exposing to the sun.

Good feeding and good care will make even common fowls more productive.

Things at Home and Abroad.

Labor Strikes.—Thousands of workmen, ranging from New England to the middle West gave up their jobs on May 1 in the endeavor to force from their employers better hours of work or better pay. The storm center of industrial trouble seems to be Pittsburgh, but even there fewer men went out than were expected. In the vicinity of New York the number who struck on the first of the month could be reckoned by hundreds. Following is the estimated total of the strikers in the most important centers: Pittsburgh 8000, Philadelphia 850, Akron 100, Cleveland 100, Youngstown 2000, Utica 200, Reading 250, Buffalo 2000, Troy 1000, Cape Ann, Mass., 800, Providence 1000, Rochester 500, Bridgeport 200, Hartford 250, New Britain 50, Hudson county, N. J., 300, Montreal 5000, Illinois (miners) 5000.

Railway Extensions.—A press report from Austin says that an amended charter of the International and Great Northern was approved April 30 which provides for the following extensions: From Navasota, through the counties of Grimes, Madison and Leon, to a point near the town of Oakwoods, in Leon county, about eighty miles. From a point eleven miles north of Italy on the Fort Worth division through the counties of Ellis and Dallas to the city of Dallas; about twenty-nine miles.

From Oakwoods in Leon county through the counties of Leon, Preston, Navarro and Ellis to Waxahatchie, about eighty miles.

From Neches, in Anderson county, through the counties of Anderson and Houston to the town of Coltharp, in Houston county, about forty-five miles.

From Palestine through the counties of Anderson and Cherokee to the town of Rusk, a distance of thirty miles.

From the town of East Columbia, in Brazoria county, through the counties of Brazoria and Matagorda, to Bay City, a distance of thirty-one miles.

While the number of miles included in the extensions were not given they were obtained from the official map of the railroad commission, and the total number of miles embraced in the amendment is 296. Most of the calculations were made on the direct route idea, and are of course subject to change and may include twenty-five or thirty miles in addition to the calculations stated above.

The extension to Coltharp is in a new territory and will no doubt develop several good towns in that county. The extension to Beaumont does not, it is understood, require any charter amendment.

To remove paint splashes on window glass moisten the spots with a strong solution of soda, then rub hard.

COMBINED SCIENCE TESTED.

WHY DR. DUNCAN IS SO MUCH MORE SUCCESSFUL THAN ALL OTHERS WITHOUT DRUGS OR KNIFE.

Combined Science means every science useful without drugs or useless operations. It means a mountain of remedy and skill, superior to all others who only have attained a spark of knowledge of some science not effective enough to cure any one alone. The traveling cure-all has always proved a failure, and should not be placed before the suffering public until the operator has gained a full knowledge of the body and all the methods sufficient to meet any condition of the system and a full knowledge of all diseases and what disease really is. So many have sent a small fee to some persons representing themselves competent to learn them by mail a profession that would cure any or all diseases. What folly! What an imposition, not only upon the person who accepts their offer and sends them their money; but upon those who go to such persons for treatment. Such a profession could not be attained by correspondence and misrepresentation. Dr. Duncan states that it cost him five thousand dollars to make him proficient in Combined Science, and that he feels sure that unless the whole scientific science is well known, and full knowledge of the body and diseases as well, that no one should claim to be able to treat with any success any disease, and could not do so truthfully. Dr. Duncan cures almost all his worst patients in thirty days to six weeks, and it is permanent. He has been in Fort Worth more than three years, and has maintained one of the best regulated drugless sanitariums during all that time in the state of Texas. He has treated successfully five thousand people who were afflicted with the worst and most aggravated diseases, pronounced the most incurable, and which all other professions had pronounced incurable, classed among all diseases known in this country to human flesh, and has always succeeded. Out of all these thousands treated by him he has not lost but three patients by death. He has accepted the worst insane, and cured them sound and well. He has accepted the consumptive and cured them. He has accepted the dreaded meningitis of the worst form and mastered that disease. He has accepted the worst paralytic and cured them. He has cured the cripples from all causes and forms. He can, beyond doubt, reduce any fever in thirty minutes. He can control and regulate the circulation in the same length of time. He has, by his method, full control of the heart action and nervous system and digestion, and soon regulates them with ease and precision. He can, beyond doubt, re-establish normal conditions of the mind in all cases. In fact, he can establish complete normal conditions of the entire body. Could you ask for more? This successful man is located at 300 East Fourth street, Fort Worth, Texas.

NEW MEXICO

Frank D. Parks of Roswell has sold his half interest in the sheep business to his partner, J. S. Lea. The firm owned about 5000 sheep besides the lambs.

Gid Rowden of Pecos and W. H. Godair of Roswell, have sold to A. J. Nisbet, representing the American Livestock and Loan company of Denver, Colo., 1200 two-year-old steers, to be delivered at Pecos May 15th.

Frank Divers and R. F. Barnett of Roswell, have bought of Mart Byrd a two-thirds interest in a seven-year lease of the 84,000 acre—X—ranch in the Texas Panhandle and 4200 head of cattle on it. The ranch is fenced and lies about thirty miles west of the Yellowhouse ranch bought by the Littlefield Cattle company last year. The deal foots up about \$90,000.

J. M. Russell, of Henrietta, Tex., went out to the Hall ranch Thursday of last week, in company with Jim Williams, foreman of the 84 ranch, owned by J. M. Daugherty, who also owns the Hall property. Mr. Russell is starting a ranch just above Roswell, and is in the market for 10,000 yearlings. He is on a deal for the 84 yearlings also, and will return here in a few days to continue negotiations.

Mr. Russell says land in his part of the country is getting too valuable for grazing purposes and he has been compelled to move his stock business to New Mexico. He was very much pleased with conditions around Carlsbad, and thought the Hall ranch and cattle to be very good property, although the grade of stock is not as high as the 84—Carlsbad Current.

SIMPSON, President. ANDREW NIMMO, Gen'l Manager.

WE ARE STILL BUYING HOMES FOR THE PEOPLE!

"Truth Crushed to Earth Will Rise Again" and the Home Co-Operative Co. and its plan will live when its traducers have long been forgotten. It is built on a solid foundation which cannot be shaken by misrepresentation and abuse. If it were not founded on correct and logical principles the truth would be sufficient to arrest its progress. It is no "Get something for nothing" scheme, but a legitimate plan for buying homes for members without charging interest and giving them a longer time to repay the money than they could get anywhere else. Every member pays back every dollar his home costs and there is no possible obstacle to prevent this company living for ages. A \$1,000 home by this plan costs the member but \$1,073.00, which includes all expenses and reserve fund payments, and gives him 16 years and 8 months to pay this amount in small monthly payments.

300 Homes Were Matured up to April 30, 1902. 12 OF THEM IN TEXAS

and most of the holders of these matured contracts have received their property. Matured contracts are worth a premium to their holders and everyone will bring at least \$100 more than it cost the original member.

PAUL McCOMBS, 487-489 Main Street, Dallas, Texas; Mortgage \$4,000.00. Pays \$21.40 a month.

Holders of matured contracts have chosen homes and rented them for double the amount of their monthly payments. A company whose contracts command a premium must stand pretty well with the people. So popular has this company become that since the first of the year we have

Increased Over 8,000 New Members.

These new members are coming from almost every state in the Union. We have never been barred from any state and have branch offices in all the principal cities, where we are doing business as openly and above board as we are in Texas.
