Business Firms to Take Holiday July 4th

Absentee Voting To Begin July 5th

Absentee voting may begin on July 5th, according to Lawrence Nuck-olls, County Clerk and will cease on July 21st in order that all may be back in the office and ready for their respective boxes on July 25th. It is not likely that there will be

a heavy absentee vote this year due to tire conditions keeping many from taking vacation trips.

First National Bank Flush With Pennies

"Save your pennies" proved to be a profitable hobby of two Charlie, Texas boys—believe it or not.

Joe and Charlie Bevering, sons of Mr. Ed Bevering of Charlie, Texas, along with their father dug out the old bucket of pennies which they has been putting aside from time to time through the years, and yester-day morning the youngsters brought in their savings to the First National Bank to be exchanged for defense bonds. When the count was over it was found that accumulation had grown to 8.100 pennies, or \$81.00, or one 10 quart bucket full weighing 51 pounds. These pennies had been saved through 12 yrs.

Notice Of The Fifth Registration

Scrap Rubber Drive Now Under Way

The scrap rubber drive in Clay county ,in keeping with the national scrap rubber campaign, is well unway and meeting co-operation over the entire section. Civic leaders who are handling the campaign in every section of the county are hopeful that this area will meet the challenge by prodeing as much or more scrap rubber than any other section of its size in the nation.

They want all citizens to do their best to add to the country's stock pile that is so vital to the war effort and is necessary to avert drastic curtailment of civilian automobile

Take your scraps to your nearest filling station and receive one cent per pound or donate it to Uncle Sam. Many are putting the money therefrom into war stamps and

Items to look for to swell the pile include: Rubber lawn hose, hot water bottles, children's toys, bathing caps, shoe heels, medicine droppers, rubber sheeting, old tubes, old tires, pencil erasers, rubber gloves, baby buggy tires, floor mats, fruit jar rubbers, tractors tires and rubber aprons.

Church of Christ

Minister: L. R. Lovelady Our Union With Christ

When ones life fails to bear fruit, he ceases to be in union with Jesus says that "every branch that beareth not fruit is tak en away.' Jesus is the vine, and Christians are the branches .We are saved to serve. Be, and then do, is the law of the kingdom. There is no such thing as a fruitless Christian. When branches fail to bear fruit, He taketh away. A fruitful life is evidence of union with Christ. The lack of fruit is evidence tha tunion with Churst has been broken. The fruits of the spirit are Love, Joy, Peace and Godliness: when these are gone, what evidence do we have that we are in union with Christ.

The beauty of the vine is its branches, but the glory of thevine is the fruits that grow on the vine. Lets think of the Story of the Fig Tree, and how it was cursed because i had no fruit thereon. It had foliage such as leaves; but no fruit. Jesus cured it and it withered and died. This shows a nact of mercy for the ground in which it was drawing the fate from, but giving nothing in return. When hearts of men fail to bear fruits to the glory of God, it is an act of mercy that God has for the fruit bearers that

this vital union be broken lest it draw fats from the faithful.
Christ said: "Without Me ye can do nothing; abide in me, and I in you. As the branch can not bear fruit within itself, except it abide in the vine, no more can except ye abide in me".—John 15:1-6; First to be a Christian we must bear fruits. Then he insists that we bear more fruit". And much fruits. Much fruits means up to our limited pos sibilities. A small amount of fruit might be much fruit one year, but

Help Your Percolator Last for the Duration *

Electric percolators, like many other household appliances, are out of production due to the war. You'll want to take good care of the one you have so that it will last.

Don't tet your percolator boil dry and be careful not to put it in water, for it might burn out. Use only a damp cloth to wipe the outside. and avoid letting the cora become twisted or frayed.

When your percolator refuses to "perc," it may be that the fuse in the base is loose or has burned out. Stores which sell electric appliances and electric shops usually can replace the fuse in a few minutes.

A Picture of 40 Gas Ranges you cannot buy

It takes that metal, to stop the enemy

> So Take Good Care of Your Gas Equipment

Make it Last till We Win this War!

* * Since this country has to skimp on metal household goods, we urge you to keep your gas equipment in first class condition.

I. ROOM HEATERS: To store for the summer, remove dust inside and out; wrap in newspapers and keep in a dry enclosed place.

II. RANGES: Do not let food spill over (in top cooking, the simmer-burner heat prevents this; in oven-cooking, careful handling does it). Do not set hot vessels on the bare porcelain surface. (Use cork mats.) Do not use the oven to heat the kitchen in cold weather (prolonged heat will cut down the life of the oven walls). Do not clean up the range while the enamel is warm. When it cools, remove crumbs and spatters with a damp cloth. Do not over-cook foods. It means wear and tear on the range, as well as on the groceries.

SPECIAL NOTICE

The Government Order freezing all types of gas heating equipment has been amended. Floor Purnaces, Gasteam Radiators, Circulators and Radiant Heaters NOW may be sold and installed for use in rooms which do not already have some type of heating equipment. Likewise, under certain conditions, you are permitted to purchase and install Gas Ranges and Gas Water Heaters. You gas company will be pleased to advise and assist you with complete information and details.
