Tips on How to-Improve Your Lighting

Use One Large Bulb

There is one time when 2 + 2 doesn't equal 4, and that's when you add lamp bulbs. One 150-watt bulb gives more light than three 50-watt bulbs, so where practical, use one or two large bulbs instead of three or five smaller bulbs.

Keep Spare Fuses On Hand

Buy a few extra fuses the next time you are in a drug store, electric shop or other place where fuses are sold. Then you'll be prepared to put in a new fuse should one burn out.
